Congressional Record.

PROCEEDINGS AND DEBATES OF THE SIXTY-SEVENTH CONGRESS SECOND SESSION.

SENATE.

THURSDAY, *May 25, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

INVESTIGATION INTO ALLEGED UNLAWFUL HANGING OF SOLDIERS.

Mr. BRANDEGEE. Mr. President, my attention has been called to an editorial which appears in the New York Times of yesterday, Wednesday, May 24. It is found in the fourth column of the editorial page of the Times and is headed "Were WATSON'S charges proved?" In the course of the editorial it is stated that—

> The investigation went on for more than two months. It ended in February, three months ago, but not a word about the evidence given by the Watson witnesses has come from the Brandegee committee.

As the Senate knows, a committee was appointed, of which I was chairman, to inquire into the truth of the charges made by the Senator from Georgia [Mr. WATSON] in relation to the unlawful hanging of soldiers in the expeditionary forces in France. The committee had hearings for weeks and took a large amount of testimony.

The Times is in error in stating that the investigation had ended or that the hearings were closed. The testimony was taken down by a stenographer, whose stenographic notes were transcribed, and a copy of the typewritten testimony was sent to each member of the committee. It has not yet been printed for distribution, because the committee has not closed the hearings.

The committee was compelled to suspend further proceedings in the matter because of measures which came before the Senate that required the presence of the members of the committee on the floor of the Senate. The treaties were taken up and occupied a long time, and then came the tariff bill, and the committee found it impossible to sit in the Senate Office Building all day long hearing the testimony of witnesses who were summoned from all over the country when interrupted every few minutes by the ringing of the bell to call them to the Chamber to make a quorum or vote on questions before the Senate.

That situation still exists. We are holding sessions in the Senate every day from 11 o'clock in the morning until 10 o'clock at night, and have great difficulty in maintaining a quorum. It is perfectly impossible for the committee to resume sessions upon the question before the Watson investigating committee or the Brandegee investigating committee, whatever it may be called, until the tariff bill is out of the way.

The committee will in the near future hold an executive session to determine its future course. I do not know whether it will be decided that further hearings are necessary or advisable or not.

I do not know when after the hearings shall be finally closed a report of the committee can be made. It may not be possible to hear any further evidence that may be desired and close the hearings, have the testimony printed, and a report made to the Senate at this session of Congress, in view of the situation of the business of the Senate. If it shall be found to be impossible to report at this session, a report can be made in December after the opening of the next session of Congress.

I make this statement because I think it is quite natural for the press of the country and others to assume that if the hearings are closed now they should expect a report in the near future. In order to avoid confusion about it, I am making this statement for the information of the press. I had already notified the representatives of the press and the superintendent of the press gallery with reference to the situation, and it was understood by the press representatives here; but this editorial writer is laboring under an impression that the hearings were closed several months ago, which was not the case.

BUSINESS OF THE SESSION.

Mr. HARRISON. Mr. President, on yesterday in the Washington Post there appeared an editorial on "Republican Absenteeism." I understand the Republican Members of the Senate held a caucus this morning and dealt with the subject. In view of the importance of the subject at this time, I think it is well that the editorial should be read, especially for the benefit of the Republican Members of the Senate. Therefore I ask that it be read at the desk.

The VICE PRESIDENT. The Secretary will read the editorial, as requested.

The reading clerk read as follows:

[From the Washington Post, Wednesday, May 24, 1922.]

REPUBLICAN ABSENTEEISM.

The comment of many newspapers throughout the country is strong in criticism of Congress for its alleged failure to come up to national requirements. Some of the more observant journals now conclude that it was not a rebuke to the Harding administration but a rebuke to Congress that was administered by the Republican primaries in Indiana and Pennsylvania. Whether the voters of those States were primarily anxious to rebuke Congress or not, the effect of their vote seems to be a rebuke which Congress may heed.

The situation in the Senate at this moment constitutes an indictment of the good sense of the Republican Party. At this moment, when Congress is under the fire of criticism and the record of the Republican Party is under scrutiny, when millions of voters are making up their minds on the evidence presented, the Republicans of the Senate are making a record of absenteeism and neglect of public business that will surely return to plague them.

* * * * * * *

Obviously it should be the strategy of the Republicans, if they believe in the bill, to push it through to early enactment so that the country may feel the benefits and reward the party by electing a Republican Congress.

Yet, in spite of the advantage that could be gained by prompt action—always assuming that the tariff bill would benefit the country—the Senate Republicans habitually absent themselves from the debate and from the Senate. Many of them are absent from Washington, neglecting not only tariff making but all other public business. Some of these Senators are away mending their fences, while others are enjoying more or less well-earned vacations.

Of the 60 Republicans in the Senate there has not yet been present on any roll call during the tariff discussion the number required for a quorum, 49. The Senate has before it a measure that is to readjust commercial relations with foreign countries and contributs to the revenues, thus enabling Congress to cut down taxation in other directions. It is a vitally important measure if it does nothing more than settle for a considerable period the policy of the Government in tariff matters, thus permitting industry to conform itself to the conditions created by the law. Yet the party that is responsible for this legislation is neglecting it on the eve of an election at which one-third of the Senate will be on trial before the voters.

How can any Republican Senator absent himself from the Senate at this juncture and then ask his constituents to reelect him on the theory that he has done good and faithful service? How can he expect to see his party supported enthusiastically at the polls if the Republican majority permit the tariff bill to dawdle along under a Democratic filibuster while American business stands halting, not knowing what to do?

On yesterday, when a call of the Senate was made, only 30 Republican Senators answered to their names. Possibly each of the absentees had a good excuse for his absence; but in the list appeared the names of several who have been habitually absent, although they are reported to be in good health and anxious to serve their country as Senators. So anxious are some of them, in fact, that they have deserted the Senate Chamber for the stump, where they rely upon their eloquence to convince the voter that this is the best Congress that has ever met.

A fair example of the comment in many newspapers is the following editorial in the Chicago Tribune, dated May 22:

"Why all the impassioned efforts of political soothsayers and self-seekers to explain the outcome of recent primary elections in various States as a repudiation of the Harding administration? If there is a repudiation involved, why not pin it upon those to whom it belongs? This is not an absolute monarchy. President Harding is not a czar or a kaiser. He is a President, with limited powers. He is an Executive. At best he can only recommend legislation. He does not initiate or pass laws. That is the duty of Congress, and the responsibility lies with Congress.

"The President's record is clean and constructive. We can hardly say as much of the present Congress. If repudiation is seen in recent State primaries, it is repudiation not of President Harding but of a Congress which has been marked by delays, bickerings, private interests, injustice, and lack of construction. * * *

"The President's attitude offers a refreshing contrast. He has been sound and constructive on the most vital issues.

"Between the two—President Harding and the present Congress—it is easy to choose. It should be apparent that if State primary returns are repudiating anything they are repudiating the unconstructive record of Congress, not the superior record of the President."

Individual Republican Senators can meet this criticism in any manner they choose. The rules are easy, and absenteeism is not usually regarded as a legislative or party offense. But at this juncture, when the public welfare is involved in tariff legislation, and the Senate Republicans neglect the bill upon which they rest their party's fate at the polls, absenteeism becomes extremely dangerous to individual Republican Senators seeking reelection, and also to their party.

POLICY OF PRESENT ADMINISTRATION—THE MORSE CASE.

Mr. WATSON of Georgia. Mr. President, with the editorial just read at the desk I would take issue at some length if it were not for the fact that I am not willing to obstruct the Republicans in passing a bill which taxes everything between heaven and hell.

The writer of the editorial said that the President is not responsible for what the Congress has done. Every Member of Congress, every occupant of the press gallery, every interested American citizen who has been in the public galleries, knows that the President is responsible for what the Congress has done and has not done. Time and again his attention has been drawn to the fact that the Federal Reserve Board, in October, 1920, began to destroy the paper money in the country at the rate of $80,000,000 a month, and has continued that ruinous policy until two thousand million dollars of the people's money has been drawn in and destroyed—the most criminal contraction of the currency that was ever known in the history of mankind; and therefore values have disappeared, business has been prostrated, unemployment has arrayed its army of millions.

Every week some millionaire banker, who made his money out of this contraction of the currency, appears in the newspapers, saying that he "sees" prosperity right around the corner. But prosperity stays right around the corner. Nobody ever sees it on this side of the corner. The President himself is reported as having said that we are on the eve of a great revival of business. No such revival need be expected while the contractionists continue to inflate the value of gold by destroying paper money.

Mr. President, who came in here from the east portico and personally took his stand there by yourself, sir, and embarrassed Senators by asking them to confirm at once and without debate such Cabinet officers as the Englishman, Herbert Hoover, and the man who in violation of law is holding the position of Secretary of the Treasury, Mr. Mellon, Morgan's partner, and Secretary Fall, and Harry Daugherty, of whom I am going to say something else before I take my seat? Had the President not come here in person and made that appeal to our forbearance and our courtesy there would have been objection, prompt and strong, to the confirmation of Hoover, the charity broker, who never publishes any accounts or any vouchers of what he does with the hundreds of millions of American money that he has handled; and of Andrew J. Mellon, richer, perhaps, than Rockefeller, holding his office in violation of one of the first laws ever passed by the first Congress of this Republic; and of Secretary Fall, so oiled over with Standard Oil in Mexico and in Colombia, reeking and dripping with Standard Oil scandals; and Daugherty, of whom, I repeat, I shall say something else somewhat later.

What has been the President's course on the soldiers' bonus? That issue has been a live wire throughout the Republic. On that subject the Republicans have wobbled, backed, and filled, and made false statements to the country and false promises to the Senate. What did the President do on the soldiers' bonus? While the measure was pending, and while it was being debated, the President came here and took part in the debate, making a speech against the bonus, a thing that he had no right to do. The President may suggest and may recommend, but his objection to a law must take the form of a veto. Let me read a passage from the historical and biographical essays of John Forster, the great biographer of Charles Dickens. He is speaking of Charles I, the Stuart King who took this the first false step that led him to the block, where his head was chopped off:

But again the ill-advised monarch precipitated this determination. The bill for raising such soldiers by impressment—

That is the English word for conscription—

The bill for raising such soldiers by impressment was under debate on the morning of Tuesday, the 14th of May, when a message was unexpectedly brought in to the effect that His Majesty desired the Commons to attend him in the Lords' House. There, in brief, in temperate phrase, he adverted to the impressment bill which they were then discussing, warned them that in the event of its passing he should give his consent to it only with the express saving of his prerogative, and significantly added that he was little beholden to him whoever at this time began this dispute. The Commons immediately returned to their house, voted it, upon the motion of Pym, a breach of all the ancient privileges both of Lords and Commons that His Majesty should have so taken notice of a bill whilst it was in progress.

That was in the good year 1641. Since that time never has an English king dared to go into the House of Lords or the House of Commons and speak against a bill which was being debated in Parliament.

No American President ever did so until President Harding came in here last year, while the bonus bill was pending, while the debate was in progress, and made a speech against the bill, whereupon the Senator from North Dakota [Mr. MCCUMBER] in charge of it immediately withdrew the bill, with a promise that it would soon be re-reported. That promise has not been kept, and yet the Senator from Indiana [Mr. WATSON] in opening the campaign in Indiana is reported in the newspapers to have again promised the country that the bonus bill would pass. That makes the fourth or fifth promise that has been made on that subject. Whether this promise will be kept any better than the others, time will tell.

Who was it, Mr. President, that recommended to Congress the relief of the war profiteers to the extent of $495,000,000 of the taxes that they were paying on their excess profits? Why should not war profiteers pay a tax on their excess profits? The Republicans have put a tariff tax on sand, which every bricklayer must use, which every plasterer must use, which every builder of a concrete house must use, which every layer of a pavement must use. Every carpenter uses sandpaper; every locomotive carries its sand box; every chimney, pier, pillar, and cement walk calls for sand. Every manufacturer of fertilizer uses sand as a filler, and when the Republicans put a tax on it they add to the burdens of the farmers, who will have to pay more for guano if the manufacturer is compelled to pay more for sand.

Almost every hearthstone in America, almost every monument, almost every tomb has called for the use of sand, and when the Republicans tax it they do what was never done before in any country on earth. Even the patriotic American chicken must pay a tax on the sand in his gizzard. [Laughter.]

And salt! I should like to have somebody tell me what article of food can dispense with salt, from the soup to the walnuts and the wine? The wine having been abolished by our genial friends on the other side, the salt is now confined to the walnuts; but if you are wise you take salt with your pecan nuts, your almond nuts, your hickory nuts, your peanuts, and your walnuts. No fresh meat may be used without salt; no meat can be cured without salt; no fish can be kept without salt.

The herdsman on the plains must have salt for his cattle. The housekeeper on the farm must give old "mooley" her regular allowance of salt. The rich man's pleasure horse must have his salt; the poor man's work horse must have his salt. Salt must be consumed by the very sheep for which the Senator from Idaho [Mr. GOODING] so much yearns that he wants to put a tax on every blanket, on every wool hat, on every scarf, on every shawl, on the woolen mittens to keep warm the hands of the sick and the aged, and the woolen socks that keep warm the feet of those who have been chilled by the growing years. Yet the sheep have to have salt, and the majority propose to tax salt. Of course, the tax on salt is passed onto the sheep, passed into the wool, and passed into the palace of the rich and the cottage of the poor. And he calls himself a statesman; and he says that it was his misfortune—his, GOODING'S, misfortune—to be born in the land of King Alfred the Great, of Shakespeare, of Milton, of Shelley, of Keats, of Carlyle, of Macaulay, of Spurgeon, of John Wesley, of John Bright, of Richard Cobden, of Charles James Fox, of William E. Gladstone. It is GOODING'S misfortune—GOODING'S—to have been born in England. Poor Mr. GOODING! I wonder if England is as much ashamed of him as he is of England.

Every table in America has its salt cellar or cruet; the rich man's steak and the poor man's crust is seasoned with salt; the butter and the eggs clamor for salt; the roast and the stew, the oyster and crab, the veal and the mutton, the kid and the pork call for the salt. The slop of the swine and the food of the poultry and the bread of the dog are the better for salt. The Republican Party has done what has not been heretofore done in America or in Europe since 1789, when the French peasantry, partly because of the intolerable tax on salt, rose in avenging wrath and dethroned the Bourbon King.

These monarchs had compelled the people to buy 7 pounds of salt yearly for each member of the family, and to pay 13 cents a pound for it.

When our people learn that the Republicans have taken salt from the free list and taxed it, woe unto that party.

Who was it that hatched up that four-power pact? The Borah resolution did not call for any four-power pact with Great Britain, France, and Japan. It called for a conference on the limitation of naval armament. When President Harding issued his proclamation, did he put the country on notice that a four-power treaty, revolutionizing the historic policy of our Government, would come forth from a secret conference? He did not. There is not a word in that proclamation about this four-power pact. Yet it came out, was debated here, and

the President came in person to tell the Senate to ratify it. He took upon his shoulders the responsibility which the Washington Post now seeks to place upon those who obeyed him, those "rubber stamps," over there.

We heard a great deal about "stereotypes" and "rubber stamps" and "stencil plates" during the Wilson administration. I should like to know what set of Senators were ever more completely "rubber stamped" than those Republicans over there.

Mr. President, who authorized the President of the United States to fail even to collect the interest on the billions of dollars that we had loaned to Europe? And now since we loaned to England, to France, to Italy, and to almost every other country in Europe huge sums of money, drawn from the American people on those Liberty bond issues, drawn by moral coercion and propaganda, the negroes of Liberia, being imitative creatures like their brethren in America, are now knocking at the doors of the Treasury, asking for $5,000,000, and the Republicans of the House have voted that they shall have it. Well, they have not got it yet.

Another one of the administration's bills was the revolutionizing of our judicial system, depriving the Federal judges of their independence. For hundreds of years the liberty-loving people in England, from which we derive our systems to a very large extent, have fought with brain and with muscle, and have paid in toil and have paid in blood for the independence of the judges. That is all gone. The Federal judiciary has been centralized. The district judges have been put under the feet of the circuit judges, and the circuit judges under the feet of Chief Justice Taft. That is what the bill meant. That was an administrative measure. The independence of the judiciary, for which Webster spoke and for which John Hampden fought, has passed away like a cloud, like a glance of the sun on rippling waters, and hardly a word was said about it in the administration press.

There are various other things that I could mention for which the President has been directly responsible. One is a persistent demand for a huge standing army in time of peace. How long has it been since the press, with unanimous acclaim, was saying that the peace conference had been completely successful, and that wars and rumors of wars should never plague us more; that never again should American boys be snatched by the conscription act, the voice of opposition being hushed by the espionage act and sent across the seas to fight the battles of other nations with which we had nothing to do? We were told that complete peace would reign hereafter; and yet Secretary Weeks and General Pershing are clamoring for a larger army than was maintained in time of peace by Louis XIV, or Napoleon, or Cæsar, or Alexander.

What do you want with this large standing army? Do you fear England? No one will say "Yes." Do you fear France? No one will answer "Yea." Do you fear Japan? Shame upon the man who says it! Whom, then, do you fear? You are afraid of your own proletariat. That is what you are afraid of. You are afraid of the dissatisfied workman, thrown out of employment by these soulless, these heartless, these insatiable trusts and combinations of capital; you are afraid of the millions of men and women and children who do not have enough to eat in this land of bounteous harvests; not enough to wear in the very cotton fields where their hands bring forth the staple that clothes the world.

I wonder if they think that a hundred million people will meekly starve while such men as Mellon, and Hoover, and Elbert Gary, and J. P. Morgan lord it over the earth? The American people will not submit. Therefore these vast combinations of capital want a standing army in order to beat down the dissatisfied, who have a right to be discontented.

The refusal of this administration to recognize the Government of Russia is becoming more and more distasteful to the American people. Our Government is founded upon the principle that the just powers of all governments are founded upon the consent of the governed. They say that the present Soviet Government is not that of the people of Russia. How has that fact been ascertained? By what methods has that been learned? Who are the witnesses? It has been a de facto government for nearly five years. It repulsed the Polish invasion, financed by France, partly with American money. The Russian Government repulsed the attacks successively made by Kolchak, Denekin, and Wrangel. Is not that a de facto government? Mr. Monroe did not wait for over four years to recognize the South American Republics, nor for four years to recognize Greece, nor did the Taft administration wait four years to recognize the Portuguese revolution, in which a king had been killed; and President Washington never broke off relations with the French Revolution, in which a king and queen were killed. He maintained relations with France throughout, as the record shows.

Why not recognize the Soviet government of Russia and open up that vast market to whatever surplus of products we have and get in return her vast resources of minerals, including gold? What is the sense of treating in that manner a country which has always been the friend of America, a country which sent four millions of soldiers to the battle fields, to die in the great World War on the side which we afterwards took? Why do we side against our ally and in favor of our enemies? Is it due to the international bankers? It looks very much that way.

Mr. President, having said that much about this editorial in the Post, I am going to see if I can not destroy the usefulness of T. Bosh Felder as a national lobbyist here in Washington City. He is hardly worth noticing, except that he seems to have an irresistible influence in the Attorney General's office; and I will say to the Senator from New Hampshire [Mr. MOSES], who undertook to defend him here the other day, that he is welcome to interrupt me at any stage of my speech. Let him come right on in, if he wants to get in.

Mr. MOSES. Oh, no, Mr. President; I hope the Senator from Georgia does not think that my conversation with his colleague from Arkansas [Mr. ROBINSON] was by reason of comment on his speech, in which I was taking exception. As a matter of fact, in spite of the modesty of the Senator from Georgia, I will say that I was commenting with the Senator from Arkansas upon the wealth and accuracy of the historical allusions with which the Senator from Georgia was enriching his discourse.

Mr. WATSON of Georgia. Mr. President, if the standard of modesty had not been already set so high by the Senator from New Hampshire, I might feel a little bit abashed by his statement regarding mine.

Mr. President, this morning I received a letter marked "personal," and therefore I will not give the name of the writer, but he referred me to the Senators from South Carolina, and upon consulting my colleague from South Carolina [Mr. DIAL], he says the man is all right. In part, the writer says:

> I am deeply interested as a citizen in the graft investigation and in the attack on the Attorney General. From the evidence of Daugherty's association with Felder, I am satisfied in my own mind that there is something dead up the branch. I have known Tom Felder since his college days and have been a close student of his methods, and he has only a few tricks in his stock of trade.
>
> You will recall that Felder came to South Carolina and was employed to assist the attorney general of the State in the investigation of the dispensary graft scandal several years ago. I am one of the few people in the State that realized that he, by virtue of this employment, protected grafters, hoodwinked the attorney general, and got away with it.

He is still getting away with it. It is a habit he has. Whether or not that habit will persist remains to be seen.

Much has been said about the Morse case, Mr. President, but the facts have not been laid before the public. The subject is interesting, and I will briefly relate them.

Charles W. Morse was the man who organized the Ice Trust in New York. During the winter he cornered all the visible supply, and he sent boats up the Hudson to break up the natural ice that was forming across the river. Many hundreds of those who in former years had made their living by harvesting natural ice and selling it in the summer were reduced to beggary. The papers stated that they stood on the banks of the stream, wringing their hands and shedding bitter tears, as Morse's boats broke up the ice. Next summer he refused to sell any block of ice for less than 10 cents, and the consequence was that many poor people could not buy ice at all. What the suffering was in the crowded tenements of the poorer quarters of New York can be imagined. The sick got no ice. Infants got no ice. The New York papers published editorial after editorial imploring Morse to relax his rules and let the poor have 5-cent blocks of ice. He coldly refused, and, according to the New York papers, there was the horseman and pale horse riding his rounds in many of the poorer precincts of that great city during that torrid summer. A man who would do that has no heart, no conscience; I will not say no soul, because I do not know.

Morse was prosecuted and convicted of one of the crookedest financial deals ever pulled off in Wall Street. No fiercer wolf ever hunted down victims in Wall Street than Charles W. Morse. He was tried, convicted, and sentenced to a long term of years. He was sent to the Federal prison in Atlanta. In a short while it was announced that he was ill of Bright's disease, and the Atlanta Georgian, owned at that time by Fred Seeley, who left the city at about the same time that Felder left it, came out from day to day announcing the progress of Morse's sickness. He was wasting away; he was dying of Bright's disease; he could not possibly live. I was conducting

a weekly paper in Atlanta at that time, Mr. President, and from week to week I stated that Felder and Seeley and Morse and Daugherty were conducting an elaborate fraud; that the man was not sick at all. My intuition as a lawyer convinced me that he was not sick; that the whole thing was a fake, a sham, a make-up, a pretense.

Mr. MOSES. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from New Hampshire?

Mr. WATSON of Georgia. With pleasure.

Mr. MOSES. The real action which should be taken in this case, I gather from what the Senator says, is that Morse should be sued for breach of contract, he having been released from prison under a contract that he would die within 30 days.

Mr. WATSON of Georgia. Mr. President, that is not the view of a lawyer. The view of a lawyer would be this: That the pardon, having been obtained by fraud, is null and void, and Morse ought to be put back in the penitentiary. The contract has nothing to do with it. I hope the Senator will not think I am saying that abruptly. I am just saying it briefly and emphatically.

Mr. MOSES. No; but my understanding of the incident at the time it occurred was that Morse's release from prison was under a contract that he would die within 30 days, and not having carried out his contract I should say he was liable.

Mr. WATSON of Georgia. The pardoning power has nothing to do with a contract between Morse and his lawyers; but if the President was imposed on, then the pardon itself is null and void, and Morse can be put back into the penitentiary. Morse and four sons have put themselves in five different States and are fighting extradition. If I were President, I would annul the pardon, I would send a military squad after Morse, and I would have him back in the penitentiary, either dead or alive.

Mr. President, the city of Atlanta has scores of first-class doctors and surgeons, but not one of them was called in to see Morse. Felder and Daugherty picked out a doctor who said Morse was dying of Bright's disease; and the doctor whom Felder picked was very much the same sort of a doctor that Felder is of a lawyer. There are doctors and surgeons in Atlanta who would never be induced by money or by intimidation to sign a certificate that was false. They were not called in. The man whom Felder picked monopolized the job.

No Army surgeon ever came from Washington to see Morse. A specimen was sent from Atlanta to these Army doctors. That specimen may have been brought about by the eating of a bar of soap, as has been rumored; or, in as big a city as Atlanta, where there are so many hospitals; or, in the State of Georgia at large, where there are so many people, there never would be a time when you could not find somebody who had Bright's disease. Therefore he could have gotten a genuine specimen to send to these surgeons here in Washington. They never went to Atlanta. They never saw Morse. They saw the specimen which Felder sent. Where did Felder get it?

Had the case been based on facts, had there been truth at the bottom of it, at the very time when criticism was leveled upon it, Felder and Daugherty would have said, "We will show you that Morse is sick, by calling in Doctor Westmoreland, or Doctor Durham, or some other Atlanta doctor of high character," some impartial, disinterested, incorruptible doctor. They would have said, "We will show you that Morse is sick." Did they do it? No; they did not. When the pardon had at length been obtained, during the time that Morse had been secreted behind a human fence which no outsider could penetrate, he was taken to the Piedmont Hotel in a closed limousine. If he was sick, why did he object to being seen? Bright's is not a shameful disease. It is not one of which a man need be ashamed. It is one which commands sympathy for him who has it. It is not like smallpox, contagious. If Morse was really sick, why did not his lawyers say, "Here is our sick man. You can see he is sick. You can see from his yellow color that he has Bright's disease. You can see from the general flabbiness of his physique that he is ill unto death."

No; the human fence stood around him, walked with him, put him in the closed limousine, and he was carried to the hotel and into the hotel, and no man saw him. In his room at the hotel no outsider saw him. The reporters were eager for news, and there were curious people who wanted to know the facts, because I had been stating from week to week that the whole thing was a fake, a sham, a humbug, a fraud. Naturally, curiosity was aroused. People wanted to see him.

Did anybody get a glimpse of him? No one. Nobody could penetrate that human screen, that wall which had been built around him by Felder and Daugherty. He was taken to the railroad depot in the same way. He had a car all to himself. Nobody saw him on his way to the depot. Nobody saw him on the car. He was curtained in and taken to New York. Did anybody see him get off the train in New York? Nobody did. The reporters there tried it, but they could not penetrate that human barrier. Again the closed limousine sped away with him to his residence.

He was taken to a steamer, and nobody saw him go on board. He was carried to a stateroom which had been reserved for him, and the reporters again assiduously tried to see him, but they could not do it; but they did make the statement that from the outside they heard his voice, strong and robust, giving directions to his valet about his baggage.

He went to Europe, stayed a few weeks, pretended to drink mineral water, came back in full health, acted the unscrupulous rascal during the war, out of which he and his boys managed to keep themselves, while they devoted their energies to robbing the Government.

That is the Morse case. It has been stated that the lawyers did nothing wrong. A lawyer is supposed to be the sworn officer of the court. He is honor bound not to deceive the court. He is honor bound not to use a perjured witness, if he knows he is perjured; not to use a bribed juror, if he knows he is bribed; not to make a statement to the court if he knows it to be untrue. He is considered a sworn officer of the court. The pardoning power is, of course, the highest of all, and no honorable lawyer would deceive the President, as President Taft was deceived in this case. The men who did it have no honor in them.

In the New York Tribune, which is a Republican paper, the leading editorial yesterday reads as follows:

TIME TO RESIGN.

Unless Attorney General Daugherty has a better defense of his relation to the unsavory Morse pardon than thus far has come from him or his friends he should relieve President Harding of embarrassment by a prompt resignation.

It is not necessary to go into extensive argument. Facts which are so far not effectively contradicted speak for themselves. It is surely an amazing thing that when the conspiracy to get Morse out of prison was hatched it happened that the conspirators went to Ohio and hired a lawyer, without prior connection with the case, who happened to be a friend of the pardoning power.

Mr. Daugherty should never have been named as Attorney General. The appointment was one of the few mistakes President Harding has made. It was a personal selection, and such for high office are seldom happy. The only way to rectify the blunder, if the documents published in the CONGRESSIONAL RECORD are genuine and accurate, is to ask for a speedy resignation, if one is not tendered. Granted that Mr. Daugherty was one of those who were fooled, he is manifestly in that event too gullible to be at the head of the Department of Justice.

Mr. President, this man Felder has published as many statements as the newspapers would carry. No two of those statements can be reconciled with each other, and when he speaks at any length, he contradicts himself in the same statement. He has told three different tales about those bonds he took from Morse. He has told two or three different tales as to the fee he received. He has first admitted and then denied that Daugherty was in the case. His own statements show what kind of a creature he is.

But what is his mysterious influence with the Attorney General? Day before yesterday I responded to a card from the reception room and met a young man, who duly introduced himself to me, and said that he himself had wondered what was the secret of Felder's influence with the Department of Justice, until he had read the speeches of the Senator from Arkansas [Mr. CARAWAY] and myself. Then he told me this—and, of course, I can not vouch for it, but I can give the name of the man, and tell where he can be found: He said that not long ago a British ship, the *J. M. Young*, sailing under a British license, came into New York with a cargo of whisky from abroad. He even stated the number of cases, which I have in memory, but it is unnecessary to state. It was a cargo of whisky. The dry agents got onto it. They seized the whisky, libeled the ship, and swore out warrants for those in charge of her.

The accused ran to the office of Felder and employed him. Why? God knows; I do not. Felder came to Washington, so the young man said, had an interview with Attorney General Daugherty, and from Daugherty's office went to New York with positive instructions to dismiss the proceedings and to release the whisky; and the orders were obeyed.

That is the charge repeated here on the floor of the Senate. If it is not true, let Mr. Daugherty say it is not. I do not say it is true; I do not know; but it is reported to me by a reputable young man whom I can place any time the Attorney General wants him, provided he will promise me and convince me that he will not persecute him with Secret Service men and spies.

The Senator from Arkansas says they have a negro spy on his trail. I do not think many Senators are going to submit to having spies, black or white, on their trails.

This young man told me of another case, where $200,000 worth of wine was seized upstate in New York, and again the

accused hotfooted it to Felder's office and employed him. Felder came to Washington, saw the Attorney General, and again the Attorney General ordered the warrant dismissed and the wine delivered to those who had it in charge.

Those are specific charges. The Attorney General can not afford to ignore them. I bring them to his attention. I do not vouch for them, because I can not; but I am sufficiently impressed to state them. They are cumulative of what the Senator from Arkansas has placed in the RECORD, in writing, and which no man has denied.

When I told the Senate and the country some time ago, on May 17, as I remember the date, what sort of man Felder was, he induced the senior Senator from New York [Mr. WADSWORTH] to place in the RECORD a lot of testimonials from prominent men in Georgia, which testimonials bore no date. I happened to know that they were signed in 1912, and that some of the men are dead, some have been voted out of office, and that none of them would repeat what they said then for Felder, when he was leaving the State. He probably drew up those testimonials himself. He probably typed them himself, and perhaps he represented to the men who signed them that they were letters of introduction. There is great facility in getting signatures to petitions and letters of introduction. One will sign almost anything to get rid of importunity.

On the 17th of this month I challenged Felder to get fresh testimonials from lawyers of good standing in New York, where he has lived for 10 years, or in Georgia, which has been the better off by his absence for 10 years. Has he got them? No. Can he get them? No. Neither by telegram nor by letter can he get them, else he would have done so. Would you live in a great city like New York and practice law for 10 years without having established your character? Why did he not bring some New York testimonials? Because he could not.

Mr. President, there is an editorial in yesterday's New York Times headed "The fee that failed," and I ask the indulgence of the Senate while I have it read from the Secretary's desk.

The VICE PRESIDENT. The Secretary will read the editorial.

The ASSISTANT SECRETARY (reading from an editorial of the New York Times of Wednesday, May 24):

THE FEE THAT FAILED.

Without any question of right or wrong or law or the merits of the case, the letter from Mr. Felder, written in October, 1917, will give pleasure to the discerning sociologist, to the students of incident and motive and character, to the novel reader and the novelist. Could anybody have invented and put into a book the narrative of a search for fees so original and amusing? At the instance of a benevolent Atlantan, Mr. Felder, a distinguished lawyer, tries to get Mr. Charles W. Morse, a native of Maine, out of the penitentiary. Mr. Felder masters the details, "gets in touch" with Mr. Daugherty, a private citizen of Columbus, Ohio, agrees with him to divide whatever "compensation" the former may get from the prisoner to be released. After certain steps have been taken at Washington the captive, who had agreed to pay, and did subsequently pay, $6,000 for expenses, and $25,000, still unpaid upon his release, promised, "in the presence of the penitentiary guard," to pay $100,000 in addition. "Gentlemen," he is reported as saying, with the airiness of Colonel Sellers, "I will make you both rich if you will get me out of here."

How they "got him out"; the discrepancy of civil and military doctors on the state of his kidneys; the regretable reports or legends about the sophistication of those organs by "soapsuds or chemicals or something"; the inevitable appearance in the drama of another citizen of Ohio, that center of politics; cruel tales of "fraud," of threatened revocation of the pardon; other scenes, the means or hindrances to the peripetia, the afterpieces—the fascination of all these must not withdraw us from pursuit of the "compensation." Soon after the penitentiary gates opened outward to him the grateful promiser told Mr. Felder that when he got back to New York he would send him a check for $25,000, to be followed soon by the $100,000. He acknowledged his promise to make his two lawyers rich. The scene must have been rich. The promiser, doubtless too much interested in his health to have a fully competent memory, went to Europe. The check did not arrive, but a son promised that father would settle when he came back. Father came back. His two lawyers met him in this city. He showed them certain stocks, not his own, which he had been allowed to borrow and use. They "had no market value," he said, "but an actual value of par," a curious reversal of the present system of stocks of "no par value," but actual market value. The lawyer from Columbus left in disgust. Finally he refused to take the stocks, either as payment or collateral, in spite of Mr. Felder's urging.

Then the man who was going to make them both rich left the stocks on the dresser in Mr. Felder's room, making him an involuntary bailee, so to speak. Mr. Felder took them home, afterwards hypothecated them. Mr. Morse was always promising to pay, but never paid; and never pretended that the stocks were payment. So, year after year, the compensation never came; and Mr. Morse's lawyers are out of pocket, besides, for a lot of expenses. Modesty, a desire—uphappily ungratified—to avoid notoriety, an altuistic tenderness toward the client, prevented the bringing of a suit for the long-promised, the much-promised, fees. No reader will be inclined to deny that these were "richly earned." Yet no reader who loves a story but will be glad that they were not paid. The search for them is full of romantic interest. We are all the richer for its incidents, and the hero's lawyers will be rich when their client's promises are redeemed at par. Mr. Felder not only has an acute legal mind but he is a letter writer with genius, and his epistle to Mr. Bailey ought to be included in future editions of Professor Saintsbury's "Letter Book."

Mr. WATSON of Georgia. Mr. President, the most amusing thing about the whole episode is this, and, having stated it, I will conclude. Here were three notorious crooks, and Morse outcrooked the other two.

BUSINESS OF THE SESSION.

Mr. HARRISON. Mr. President, I offered this morning and had read to the Senate an editorial from the Washington Post, because of its high Republican authority, and in the hope, too, that it might influence some of the Republican Senators to remain in the Chamber so that we might facilitate the passage of the bill. I understand that the Republicans had a caucus this morning and passed a resolution calling on Republican Senators to be and remain in their seats. I look on the other side of the aisle now and I see only four Republican Senators. There are 56 vacant seats now on the Republican side of the Chamber. We are not surprised that you hold caucuses and pass resolutions calling on your members to stay here and assist in the passage of the bill.

So it is little wonder that you hold caucuses and call on your Republican friends to come in from the seashores and other places and plead with them to stay here. It is little wonder that the New York Tribune, the Chicago Tribune, the Washington Post, and every other Republican newspaper in the country are carrying editorials condemning you for the way you are absenting yourselves from the Chamber and failing to discharge to the country your duty.

Now, Mr. President, I understand that in the conference of the Republican Members of the Senate this morning the question of cloture came up, and that you adjourned that meeting until to-morrow morning, when you are going to try to pass a resolution pledging your Members to change the rules of the Senate and adopt a cloture rule to pass the tariff bill. If you would stay here and vote upon these measures and try to facilitate the passage of the tariff bill, you would not need any cloture. A large percentage of the time of the Senate since the bill was first brought up for consideration has been taken up in roll calls. If you will take the CONGRESSIONAL RECORD and examine it, you will hardly find an instance where 30 Republican Senators out of 60 have answered to their names.

Mr. WATSON of Georgia. Mr. President——

Mr. HARRISON. I yield to the Senator from Georgia.

Mr. WATSON of Georgia. I call my colleague's attention to the fact that there are only four Republicans over there now, and two of them are up for election and think they are going to be beaten.

Mr. HARRISON. I am not surprised. They realize what a handicap they have to make reasonable answer to their constituents.

If you are going to enforce a cloture, let me suggest to you that you do not attempt it upon this bill. Of course, you did not want the bill discussed in the committee, but you brought your representatives from the special interests there to tell you what to do, and you framed it behind closed doors. You did not want the counsel and advice of Democratic members of the committee, but certainly the American people are entitled to a fair discussion and consideration of the bill since it has come before the Senate. I submit that the country will never indorse a cloture, placing a strangle hold upon the minority Members in a discussion of this bill, when every line of it repudiates your campaign promises. If it were not for taking up the time of the Senate, which I desire not to do, it would be apropos in this connection to read the utterances of your presidential candidate in the last campaign and of your vice presidential candidate, as well as all of you who promised to reduce the high cost of living as soon as you came into power. How the people were fooled! Instead of reducing it you are adding, by the provisions of this bill, greater taxes upon meats, flour, shoes, boots, clothing, sugar, and everything that goes upon the breakfast table and on the backs of the people.

So I suggest to the distinguished leader over there not to carry your party to further destruction by the imposition of a cloture rule which will prevent legitimate discussion of the nefarious provisions of the bill, which press down upon the people greater burdens and higher costs of living. Let me appeal to the Senator and to other Members over there to stay in your seats and stop this absenteeism, and we will facilitate the passage of the bill.

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. HARRISON. I have finished.

Mr. LENROOT. Will the Senator yield?

Mr. HARRISON. Yes; if the Senator wants me to yield.

Mr. LENROOT. I would like to ask the Senator if he takes the position that the discussion which has thus far been had on

his side of the aisle while the bill has been under consideration has been legitimate and necessary discussion?

Mr. HARRISON. I will say to the Senator that I have never seen in my experience in this body any discussion so confined to the bill before the Senate as it has been since this bill was taken up for consideration. Of course, there are times, and necessarily so, when speeches have been made upon subjects different from the matter under consideration, but with Senators absenting themselves from the other side of the aisle, showing by roll call after roll call that only 30 out of 60 Republican Members are present, necessarily the time of the Senate will be taken up in roll calls and the whole discussion will be prolonged for weeks and for months.

Important questions which are constantly arising must be discussed upon the floor of the Senate. The Senator can not imagine a more wholesome discussion than that in which the Senator from Georgia [Mr. WATSON] this morning indulged, informing the people of the Attorney General's action in defending Morse in his operations in controlling the great Ice Trust of New York and the other grave matters to which he referred.

Mr. LENROOT. Will the Senator now yield for another question?

Mr. HARRISON. Yes.

Mr. LENROOT. If the Democrats continue to act in the future as they have in the past in connection with this bill, how many years, in the Senator's judgment, will it take to get a final vote upon the bill?

Mr. HARRISON. Well, if it would take a hundred years to get a vote upon the pending bill, it would be well and in the interest of the people, because the Republican Party never started out upon a program that carried heavier consequences to the American people than the passage of this iniquitous tariff bill.

Mr. LENROOT. Then, it is the Senator's position that the Democratic side of the aisle propose to occupy the remainder of this Congress in the discussion of the bill?

Mr. HARRISON. The Senator from Wisconsin knows that the Democrats in larger number in proportion to membership than Republicans have stayed in attendance and have aided the Republicans in forming quorums from the time the bill came up. There has been equally as much if not more discussion by Senators on the other side than there has been on this side of the aisle. There has not been the slightest evidence of any effort at any filibuster or prolonged debate unnecessarily upon the part of Members upon this side of the aisle.

I know the Republicans cringe under the debate, because the Members on this side are giving the facts—they are revealing, day by day, to the American people the unfair, unequal, and outrageous provisions which are carried in the bill.

Mr. FLETCHER. May I ask the Senator from Mississippi to remind Senators on the other side of the fact that it took their party over 12 months to formulate this bill, even to submit it here. They now expect to have it disposed of after a discussion of three or four weeks.

Mr. HARRISON. I do no blame Senators on the other side of the Chamber for wanting a cloture rule so that this bill may be pressed through without the people ascertaining what is in it. They will find out and you will feel in November the reaction from it.

Mr. CURTIS. Mr. President, I merely wish to call the attention of the Senator from Mississippi to the fact that there has been just as much absenteeism on the other side of the Chamber as there has been on this side, and that there has been more absenteeism on the other side without cause than there has been on this side.

Mr. McCUMBER. Mr. President, the Senate has been in session for 1 hour and 20 minutes this morning; we have under consideration paragraph 212 of the bill, yet there has not been one word said about that paragraph this morning. I think I am clearly within the facts when I say that if Senators will go over the speeches which have been made and count the time that has been occupied since the pending tariff bill has been reported they will find that not one word in fifty uttered upon the floor of the Senate has had any relation to the particular item before the Senate. The time has generally been taken up by extraneous matters such as we have had discussed this morning, or other matters which have no reference whatever to the pending bill.

What the Senator from Kansas [Mr. CURTIS] has said is true. There has been practically as much absenteeism on one side of the Chamber as there has been on the other. I have made no complaint because of the absence of Senators on the other side of the Chamber. They are not responsible for this proposed legislation, but the Republican Party is responsible for any legislation that is to be enacted, and so I look to the Republican side and not to the Democratic side of the Chamber to maintain quorums day after day.

However, I want to say to the Senator from Mississippi, who has just spoken, that if we will give our time to the consideration of the tariff bill and when an amendment comes up if we will discuss that amendment and the subjects that bear directly upon it, there will be no occasion for any cloture rule, and we shall get through with the bill as rapidly, probably, as we ought to get through with it. All that we on this side of the Chamber are asking is that we stick to our text, the matter that is before the Senate.

It is true that it often happens during the discussion of such matters as have been before the Senate this morning that a great many Republicans are not present. I sometimes regret that we have fixed up the rooms just outside the Chamber so comfortably, with newspapers handy for Senators to read, enticing them to go outside instead of sitting here in the Chamber. As I now look through the doorway I can see three or four Senators sitting outside. Those Senators are ready to come in and will come into the Chamber just as soon as we get down to business; as soon as we begin to discuss the real subject which is before the Senate, we shall then find Republicans will be ready to come in here and vote.

Mr. HARRISON. The four Senators of whom the Senator from North Dakota is speaking, who are sitting outside now, are Republicans, are they not?

Mr. McCUMBER. Yes; but there are also several Democrats sitting outside as well. If the Senator from Mississippi will go out and look around upon those comfortable seats he will find there just as many Democrats as he will find Republicans. Those Democrats will come back and help us make a quorum if Senators on the floor will speak to the question which is before the Senate. I do not blame Senators for going away; no one can blame them when we hear a lot of stuff in which no one is interested, while the country is interested that we do something with the pending bill. If Senators will merely discuss the matter which is before us, we shall be able to keep a quorum present all the time.

Mr. UNDERWOOD. Mr. President, I merely want to say a word in reference to this matter. The Senator from North Dakota has referred a number of times to debate on extraneous subjects. The Senator has been a Member of the Senate much longer than have I, but in my limited experience in the Senate, during the consideration of any important question before the Senate, I have never seen the time when during the course of the day there were not subjects talked about that had nothing to do with the subject matter before the Senate. That is a habit of the Senate; I presume it has been the habit of the Senate since it was organized, and it will probably continue to be the habit of the Senate. Of course, I recognize that sometimes the debate on extraneous matters runs to a greater length than at other times; but when the Senator criticizes Senators for debating this bill because they do not stick to a particular amendment which proposes to increase a duty 20 per cent or 25 per cent, I think he expects the Senate to narrow the debate within limitations which are not reasonable.

The Senator must bear in mind one or two things in connection with the consideration of this bill. In the first place, he must remember that the bill has been prepared by the majority party; that they prepared it in their own committee—which they had a right to do, and I am not critical of that—that they went into caucus in their own committee and prepared the bill to suit themselves. As I understand, it was afterwards submitted to their colleagues; but it came here with the approval of Senators on the other side of the Chamber who had been informed as to what would be done. Furthermore, this bill affects constituencies which are represented by Democratic Senators as well as by Republican Senators. More than that, it involves great questions of party policy, and, though involving such questions, it was brought before the Senate without any general debate or any provision for general debate on the policy of the bill or the great principles involved. As soon as it came before the Senate the Senator from North Dakota, in charge of the bill, asked that the formal reading of the bill be dispensed with, and the Senate granted the request by unanimous consent. Then he asked that the bill be read for amendment, and that the committee amendments be considered first, excluding all other amendments, which was granted to him by the Democratic Senators on this side, thus bringing the committee amendments before the Senate at once before there was any general discussion whatever of the policies and principles involved in the bill. In view of the circumstances, therefore, I do not think it lies in the Senator's mouth to say that when a Senator desires to discuss the general policy of this proposed

legislation at any time during the debate he should not be permitted to do so and is not justified in doing so.

Mr. McCUMBER. Mr. President, the Senator is always so fair in his discussion of these questions that I want him to be perfectly fair with me in regard to the attitude which I have assumed.

Mr. UNDERWOOD. I am not criticizing the Senator from North Dakota.

Mr. McCUMBER. I understand that; but let me suggest to the Senator that I have stated over and over again that I expected those who are opposed to this bill to make their general opposition and general discussion of the whole policy and then to consider the particular item under consideration. In other words, I expect those who are opposed to the protective policy first to damn this bill and then I expect them to damn each amendment in particular. That is very natural; but what I have objected to is this: I can take some of the speeches that have been made on this bill on the general subject and general policy, the damnation in general, and I can demonstrate that the same speech has been made not less than ten times by the same Senator. Now, when he has said it once or twice it seems to me that he ought to quit and then get down to the particular amendment.

Mr. UNDERWOOD. I am not complaining about the Senator for that criticism; but I am merely saying that that is a habit which the Senate has been indulging in for many years. I thought the Senator's criticism, however, was directed to the fact that some Senators, myself included, in discussing an amendment—although I am sure that I have not in my discussion varied from the bill—have attempted to point out with the amendment as the picture the general effect of this class of legislation on the American people.

I contend that is a perfectly legitimate argument, and I have not attempted to argue in any other way. Although I do not intend to take up a great deal of the time of the Senate, yet when various schedules come up in discussing some of the items I expect from time to time to refer to the general principle involved in the legislation. I can not do otherwise and clearly explain my position to the public. I think that is a perfectly legitimate line of debate.

Mr. McCUMBER. But that does not mean that the Senator will repeat himself twenty or thirty times over on the general proposition. I know he will not. If every Senator was as choice in his discussion as is the Senator from Alabama and would hold as carefully to the subject matter without unnecessary repetition we would be through with this bill by the 1st of July.

Mr. UNDERWOOD. I thank the Senator for his compliment. I wish to say to him what I have said a good many times heretofore, that I think there is no effort to kill this bill by a filibuster. This side of the Chamber is determined that they are going to debate the bill until they can fairly present their viewpoint of it to the constituencies that will decide the issue; but if we were trying to filibuster it would be easy enough to kill this bill or make it run until fall without opening our mouths. There are 2,000 amendments to the bill, and it would be perfectly legitimate to demand a quorum before each vote and it would be perfectly legitimate to call for a roll call on every amendment, and if we were not satisfied with the decision arrived at in Committee of the Whole we could repeat the performance in the Senate. Thus, on the amendments that have been reported by the committee itself there could be forced in the regular order and in a perfectly parliamentary way 8,000 votes on this bill as it stands to-day without the minority offering a single amendment, and a thousand votes would consume at least 2,000 hours.

We are not doing that. We do not propose to do it. The only times when we want record votes—and intend to have them—are either when we want to show our own position on the bill and make a record so that we can show it, or when we want to force your position so that we will have the right to criticize your action politically when the time comes. That is perfectly legitimate, and I want to say to the Senator that although I am very much opposed to the passage of this bill—from my theory of customs legislation I think this is the most offensive bill that has ever been offered to Congress—I recognize the fact that in this country of ours, which is governed by majorities, if you can command a majority on your side of the Chamber you are entitled to put the bill on the statute books; and all I am asking is that we may have the time to present properly our viewpoint.

I realize that when we think the argument on our side is vital, many gentlemen who do not agree with us may think that we are unnecessarily taking time. Probably we have occupied the same attitude toward criticisms coming from your side of the Chamber in the past. That is perfectly natural; but I have no doubt that within a reasonable time, if you insist on passing this bill, you will have the opportunity to vote, and I really believe that the Senator from North Dakota would make more progress on the bill and have less roll calls for quorums if we kept within more reasonable hours. I think the extremely long hours tire out the Senators. They naturally wander out of the Chamber and get away, and we have to wait until they come in again; but I am not criticizing the Senator as to the terms on which he runs his bill. He is driving the team, and he has the right to exercise his own judgment in driving it, and I try to throw no impediment in his way in that respect.

As to the roll calls and attendance, this side of the Chamber is opposed to this bill. What we have under consideration are the amendments proposed by the majority party. We know that they are going to be adopted by the majority party.

Senators on this side, not having that responsibility, being opposed to the bill and having other matters of business to attend to, naturally go off at times to attend to their business; but so far as the majority party is concerned, it has a very large majority in this body. It has 24 majority, 60 votes, and it requires only 49 to make a quorum; and, if I am not mistaken, there has not been a vote cast since this bill has been under consideration when the vote disclosed the fact that there were 49 Republicans in the Chamber. So I do not think the criticism rests on us.

I will say to the Senator that if we had been trying to break his quorums—they have sometimes been broken at dinner-time——

Mr. McCUMBER. I have no criticism about your not maintaining a quorum.

Mr. UNDERWOOD. It would have been easy enough for half a dozen Senators to walk out of the Chamber many and many a time and break your quorum for an hour or two. That has not been done, and will not be done.

Mr. NORRIS. Mr. President, I want to say just a word on this question, as one who is interested only in ordinary expedition of business.

I am anxious, and I think a good many of us who have not taken an active part in this debate are anxious, to have this bill disposed of. Some who feel that way are favorable to it, and others, like myself, are opposed to it; but I wish we could dispose of it, as far as I am concerned, this week. I believe, Mr. President, while I have not heard all of the debate this morning, that the Senator from North Dakota [Mr. McCUMBER] is justified under the circumstances in asking for the long sessions that he is trying to hold; and yet I have found it a physical impossibility to stay here all the time, as many other Senators have. The reason is, as he has somewhat outlined it, that there is so much debate taking place that is irrelevant, and so often repeated arguments are made that are irrelevant, all of which takes up time; and a Senator who sits here for 10 hours a day, ready to vote after the first five minutes, and probably does not succeed in voting during the whole day, realizes the next day, when he has something else to do and the same question is probably up for debate again, that he does not feel like sitting here for 10 more hours, with no certainty whatever that there is ever going to be a vote.

I think we could well take a lesson from the rules of the House of Representatives. I do not mean that we ought to adopt them. This body is much smaller, and the rules can be much more liberal; but in that body when a bill comes before the House there is general debate, and although the speeches are limited to an hour, any Member having the floor can talk about anything he pleases during that general debate. There comes a time, however, when that general debate stops, and when they take up a bill for amendment, as we have taken up this bill, and when that time comes the speeches there are limited to five minutes, except by unanimous consent, and the addresses must be directed to the question then pending.

I do not think it would be advisable for the Senate to go that far, but we can go in that direction, not injure any legitimate debate, and get somewhere with the bill; and I am going to test the sentiment of the Senate on that question now by submitting a unanimous-consent request, Mr. President, that will apply only to this calendar day. I should like to have it apply to more than this calendar day, but I should like to have the Senate try it for one day and see what happens, see if we can not get somewhere, and see, too, that we are not losing any opportunity for fair debate. There may be questions coming up in this bill on which Senators would be justified in talking for two or three hours. I would not want to interfere with them if they were talking about the bill, so it probably would not be wise to have in effect permanently such a proposition as I am going to submit; but I now ask unanimous consent that

during this calendar day all speeches be on the question then pending, and that each Senator be limited to 15 minutes in the aggregate on any pending question.

The VICE PRESIDENT. Is there objection?

Mr. SIMMONS. Mr. President, that rule could not possibly be adopted to-day.

Mr. NORRIS. Will the Senator let me modify it just a little—that each Senator be limited in the aggregate to 15 minutes on each pending motion, unless by unanimous consent his time is extended?

Mr. SIMMONS. Mr. President, that would not help it very much, because I imagine that it would be difficult for one to get unanimous consent to extend the time.

The Senator from New Mexico [Mr. JONES] began on yesterday the discussion not of one amendment, not of one paragraph, but of a number of amendments and a number of paragraphs relating to earthenware, pottery, glassware, bottles, and related subjects. The Senator, I know, has investigated these questions very thoroughly and has accumulated a great deal of valuable data, the benefit of which the Senate and the country are entitled to have. He is making an able general speech upon this very important part of the bill. I take it when the Senator has made his speech relating to these vital questions we shall have very little discussion before voting upon the various amendments which the committee has proposed to the paragraphs dealing with the subjects that he is now discussing in such a very informative way. He certainly ought not to be hampered by any unanimous-consent rule limiting discussion to 15 minutes. That might operate very well when we are discussing a particular amendment, and yet 15 minutes each is not sufficient time to discuss many of the amendments in this bill, amendments of great importance to the people of the United States.

I could not possibly consent to-day to the proposition of the Senator. I should be very glad, however, to talk with representatives of the other side with a view to reaching some understanding by which the debate may be regulated; but I would not consent to any arrangement that did not afford what I consider ample time to discuss the various subjects with which these amendments deal.

Mr. President, I am sure the Senator from Alabama [Mr. UNDERWOOD] has stated the situation correctly when he says that there is no disposition on the part of this side of the Chamber unnecessarily to delay this bill. It is going to require considerable time to discuss it, if it shall be discussed, as it ought to be, in such a way as to enlighten not only Senators who have to vote upon it but the people who have to pay the taxes carried in the measure. The discussion we have had up to this time has been, in my judgment, of very high value. It has caused the press of the country to begin to investigate provisions of the bill and to discuss them.

Senators say this bill ought to be hurried through. There is a large section of the press of the country—newspapers representing the Democratic Party, representing the Republican Party, representing independent and nonpartisan thought, trade journals, and commercial journals—which, since it has been enlightened by these discussions, has expressed the opinion that the bill ought not to pass at all; certainly that it ought not to pass without very full discussion and full notice of what it means.

As much as Senators on the other side may criticize us, I do not think that the consensus of opinion in the country is that the discussions we are having here are unduly prolonged or that they are lacking in that information which the people who are to pay these taxes think it necessary to be had in order that the bill may be properly understood.

I do not desire any extraneous matter to be injected into these discussions. I wish the discussion could be confined to the bill. I earnestly hope that Senators who wish to discuss other questions will wait until we get through with this bill; but I know perfectly well that neither on this side of the Chamber nor on the other side of the Chamber shall we be able, unless we come to some unanimous-consent agreement, to exclude the discussion of extraneous matters. I do not think this side of the Chamber has indulged in that sort of discussion any more than the other side of the Chamber. Nearly every day some Senator on the other side rises and enters into a discussion of something which does not relate to the tariff at all, and likewise that has happened on this side of the Chamber. It has ever been so since I entered the Senate, more than 20 years ago. Nothing but a unanimous-consent agreement would terminate that situation, and nothing but a unanimous-consent agreement will prevent the discussion of extraneous matters.

I am ready to begin right now and quit the discussion in which we are engaged and get down to the bill, and I assure Senators on the other side that there is not a desire over here—and I speak from knowledge—to unnecessarily debate the bill.

We feel, however, that it is absolutely essential that there should be sufficient discussion of it to let the country know what is in the bill. The country is not going to read a tariff bill of 450 pages. The people expect it to be discussed by their representatives here, and they expect to get their information with reference to it through the congressional debates, and that is the only way they are going to get it.

The Senator from North Dakota complains of repetition. He says that we make general speeches, and then when we get to the particular items we repeat the general principles. That is absolutely necessary. We are trying to test certain rates in the bill. We have to test them by certain rules, certain measurements, and as an item is reached, if we want to test the question of whether or not that rate is excessive, we must first refer to the rule. That is the only means of testing it. We discuss those rules in our general speeches, but we have to apply the rule to the particular item as reached, and in applying the rule to the particular item necessarily we have to refer again to the general rule.

It is not repetition when a merchant sells by weight. As each customer comes in, he has to weigh what the customer wants; he must test what is purchased by applying the standard weights. If it is to be measured in yards, as cloth is, of course, every time a customer comes in the merchant gets down his yardstick and measures the cloth, as he must get his weights, and weigh the sugar.

The Senator complains that that is repetition. That is exactly what we are compelled to do with reference to these items. Every time we discuss an item we have to pull down the yardstick and measure it by the yardstick, and determine whether it conforms to the yardstick or not, and sometimes we have difficulty in getting the facts in order to determine whether or not it does conform to the yardstick.

Mr. JONES of New Mexico. May I not suggest that in the discussion of this bill it has developed that they have had a number of yardsticks of different lengths.

Mr. SIMMONS. Quite so. That is one of our chief difficulties. When we try a rate by one yardstick and show that it is not justified by that measure, then they say that it is justified by some other plan of measurement, and we have then to test it by that other yardstick, and every time we test it we naturally must state the general principle with reference to the measurements. I am ready to proceed with the bill.

Mr. KELLOGG. Mr. President, this bill has been before the Senate now for six weeks, and for more than two weeks the Senate has been in session 11 hours a day. The Senator says he wants to have reasonable discussion. I do not object to that, although I have not taken one minute of the Senate's time in discussing the bill. I have spent my time in examining the items and the evidence on them. But it is the privilege of any Senator to discuss it reasonably, and I think it should be discussed reasonably.

The Senator knows that for six weeks debate has gone on from day to day with speeches lasting hours and hours and days which had nothing at all to do with this bill. He knows that hours and hours have been spent by a Senator on items when he could debate the merits of it in 20 minutes, or 30 minutes, or 10 minutes, or 5 minutes, and present his views on it to the Senate. Long speeches do not enlighten the Senate. The Senator knows that at the rate we are going on this bill—and that may be his idea of reasonableness—it could not be put through the Committee of the Whole in less than a year and a half, if we should sit every day. It does not take a year and a half or a year, sitting every day, to have the Senate fully informed and the country fully informed and for the other side to make all the political speeches they need to make, or that will be useful for them, and the Senator knows it.

Mr. President, I do not want unreasonably to limit debate, but there is not another national legislative body in the world where business must be done by unanimous consent and where there are no rules providing for a limitation on the nature of the debate or the length of the debate. I am heartily in favor of a reasonable rule to confine Senators, after cloture is put on, to the subject before the Senate, giving thereafter a reasonable time for every Senator to present his views on the bill and amendments; but at the rate we are going the bill could not be passed, of course, in two years. Perhaps the Senators on the other side take the position that it should not be passed in two years and that they are justified in filibustering. Of course there has been a deliberate filibuster on the bill from the day it was brought in; the country knows it and everyone knows it.

Mr. SIMMONS. Mr. President, I want to say to the Senator from Minnesota that the statement that there has been a delib-

erate filibuster on this side of the Chamber is without the slightest foundation in fact. I assert that there has been no deliberate filibuster.

Mr. KELLOGG. Will the Senator state how many months or years the bill should be debated?

Mr. SIMMONS. I will say that I have no question but that the bill will be passed some time in the month of July, if the Senator will possess his soul in patience.

Mr. KELLOGG. I hope the Senator is correct.

Mr. SIMMONS. I do not mean to say that it will go through the conference by that time, but I do mean to say that I think the bill will pass this body some time in July, unless the Senators on the other side of the Chamber consume time unnecessarily; and they have not been doing that on the subject of this bill up to this time, I admit. In fact, it was two weeks after we began the discussion of the pending bill before we could get Senators on the other side to open their mouths.

Mr. HEFLIN. Mr. President, I have just listened to the speech of the Senator from Minnesota [Mr. KELLOGG], in which he said that it would take a year and a half to get this bill through the Committee of the Whole the way it was now proceeding. I said once before, and I am going to repeat, if the Senate should stay in session that long and defeat this bill outright it would be the greatest service it could render to the people of the United States; but I am sure that they are going to pass this bill ultimately, and I am hoping that we can get through with it by the middle of June. There has been no filibuster here. We have undertaken to discuss the schedules they have already put in the bill, and I submit that practically every one of them which has been put in up to this time is wrong.

If they are wrong, or if we believe they are wrong, and that they should not be put upon the American people, what should we do as Senators representing sovereign States, sworn to do our duty and look after the interests of the people? Should we just sit here and quietly acquiesce in what you are doing, and permit these monstrous schedules to go in, increasing the taxes of the taxpayers of America, without protest upon our part, and without trying to inform the voter what is going on here in his legislative body? Who is it that demands that a cloture rule be put upon the Senate in order that you may hurry the Senate in imposing unjust and burdensome taxes upon the American people?

Mr. KELLOGG. Mr. President, have I suggested that there should not be reasonable debate upon the bill and upon every item?

Mr. HEFLIN. The Senator was complaining that at the rate we are going it would take a year and a half to get the bill through.

Mr. KELLOGG. Is that not true?

Mr. HEFLIN. I hardly think it would take that long because I believe the other side would do as we made you do on the revenue bill. You carried that back to the committee and remodeled it and brought it back and it finally passed, monstrous thing as it was, though it was not as bad as it was at the outset. So we are hoping that we have converted enough of you, or interested enough of you who have to run for reelection this year, so that you will take this thing back and strike out hundreds and hundreds of these oppressive and monstrous schedules, and then bring it back and submit it to the Senate. The bill you have here can not be defended, and you do not want it discussed.

Mr. President, they have for a long time talked on the other side about cloture. The Senate has been in time past a place where great questions were discussed and where great deliberation was had. Great matters have been worked out patiently, ably, conservatively; but there are those in the country now who are greedy for the flesh pots of Egypt, thirsting for the blood that they used to suck under high protection from the body politic of America. They are anxious to come back. We have had them held off under the Underwood-Simmons tariff law, and they are hungry to get back to the public pap. They are now in the saddle. They are in control, and so greedy and avaricious are they that they are even willing to invoke upon this time-honored law-making body a cloture rule in order to put through, under whip and spur, this monstrous thing which they have here in the form of a tariff bill, and we are asked to sit supinely down and fold our arms and let this thing go through, and by so doing hasten the work of robbery upon the masses of America.

Mr. KELLOGG. Mr. President——

The PRESIDING OFFICER (Mr. LADD in the chair). Does the Senator from Alabama yield to the Senator from Minnesota?

Mr. HEFLIN. I gladly yield to the Senator.

Mr. KELLOGG. Is it not true that when the Democratic Party was in power in the Senate it proposed a majority cloture much more stringent than has been proposed by any Senator at this time? I would like to have the Senator answer that.

Mr. HEFLIN. I do not know what you considered in your conference. I understand that you are threatening to bring in a cloture rule and submit it to the Senate, and if you do I believe it will be discussed somewhat at length.

Mr. KELLOGG. Let me say to the Senator that if my recollection is correct, the Democratic majority since I have been in the Senate proposed a majority cloture, which would limit debate, after cloture was voted, to one hour on the bill and all amendments.

Mr. HEFLIN. What bill was that?

Mr. KELLOGG. Any bill coming before the Senate.

Mr. HEFLIN. Was not that while the League of Nations treaty was up for consideration?

Mr. KELLOGG. No; it was not. It was a general cloture rule, and it was modified to two-thirds, and is now one of the rules of the Senate; but it was proposed as a majority cloture.

Mr. OVERMAN. Not by the Committee on Rules.

Mr. KELLOGG. It was proposed by a Democratic caucus.

Mr. OVERMAN. The Committee on Rules, when the caucus reported in favor of a two-thirds cloture, agreed to it, and we have that rule to-day.

Mr. HEFLIN. That is one of the rules of the Senate to-day.

Mr. KELLOGG. The Democratic majority favored a cloture rule of the majority.

Mr. OVERMAN. It never did.

Mr. UNDERWOOD. Mr. President, the Senator from Minnesota was not here at the time, and very naturally has made that mistake. The cloture rule was up for consideration, and both sides thought it was a good plan to have cloture. There was a committee appointed from the Democratic caucus to confer with a committee from the Republican caucus, and the present rule was the result of an agreement reached between the two parties.

Mr. OVERMAN. That is all it was. I was then chairman of the Committee on Rules, and I know all about the rule.

Mr. KELLOGG. The Senator from Alabama proposed a majority cloture rule and voted for it.

Mr. UNDERWOOD. So far as I am concerned, that was my proposition. It was not as strenuous as the Senator suggests, but it was a real cloture. I am not opposed to real cloture myself. I am not speaking for my party, because it was not a party action; but so far as I am concerned I would oppose any effort, and do it strenuously, so that nobody could doubt it, to bring in a cloture rule to apply to this bill as a party proposition, when it has never been done before. When this bill is out of the way, and we can consider, without the purpose of putting over a party bill, what is best for the interests of the Senate, I shall be very glad as an individual to discuss a proper cloture rule with the Senator; but I will say now that if an attempt is made to put a gag rule on this bill, although I believe in reasonable cloture, I shall resist it to the utmost.

Mr. OVERMAN. In order to have history correct, let me say that the Senator from Minnesota said the majority reported out a cloture rule. The Senator from Alabama [Mr. UNDERWOOD], was a member of the Committee on Rules and insisted upon a cloture rule, and the committee voted it down. There was no more action ever taken except to recommend a two-thirds rule, which is now one of the rules of the Senate. The Senator from Alabama will agree with me, I am sure.

Mr. UNDERWOOD. It was then before the Senate. I proposed a rule, and it came up and was voted on in the Senate and was defeated by 7 votes.

Mr. OVERMAN. That is correct.

Mr. McCUMBER. Mr. President, will the Senator from Alabama [Mr. HEFLIN] yield to me that I may ask what is the pending question?

Mr. HEFLIN. Mr. President, the Republicans are in the majority and have control of this body, and they can adopt any rule they want, but if the Republicans on the other side of the Chamber desire to change the rules to limit debate hereafter, let them take that step, and we will discuss it when they bring it in. The idea of invoking cloture upon a tariff bill that taxes all of the necessities of life, that affects vitally every fireside in the Republic.

Why should we have cloture upon a bill like this? Who is it that is getting impatient in the East? Who is it that is afraid of an exposure of what is going on every day at the Capitol? Who is it that is afraid there will be such a protest from the people that this bill will be withdrawn or changed greatly, and their feast will not be as great as they hope and expect it will be? Who is it, I repeat? It is not the American

people. They are not asking for this monstrous thing to be jammed through. They want to know what is in it.

Mr. President, I know, and the country must know, that this bill was framed behind closed doors when Republicans alone were present. No Democrat was permitted to sit at the table when they arranged to put these schedules in the bill. Not until that had been done was a Democrat apprised of what was in it and invited to come in, and that was just before the bill was brought in and laid before this body. There are hundreds and hundreds of pages of testimony. There are 4,000 items in the bill. Are not the people entitled to know what testimony was had? Are they not entitled to know upon what things they are being taxed? Is not the common man and woman, the average citizen, entitled to know how much his expense bill has been increased by this measure? Certainly he has a right to know.

When those in power become so arrogant that they want to shut off the representatives of the people, suppress free speech in this body, and hide from the public what they are doing until the taxgatherer knocks at the door of the American consumer, then things have come to a pretty pass. Oh, Mr. President, if this monstrous thing should go through as it is, when the expense accounts have been run up on the necessities of the people and they come to pay them, if we should go and submit our claims to them for reelection, they would say, "Where were you when they were robbing me through this measure? Where was your protest? I fail to find it. Where are your votes opposing this monstrous thing?" We would just say, "The Republicans were in power, they had the majority, and they could put it over." "But why did you not let us know what they were doing?" A number of them would say, "I am a Republican, but I am not that kind of a Republican. I do not believe in perverting my Government from the ends of its institution and using the taxing power to enrich one class to the ruin of another."

What right have you to use the taxing power to increase the profits of the manufacturers of the East to the detriment and injury of the masses of American consumers? What right have you to do that? You are growing impatient and you are urging us to quit discussing this bill and let you hurry it through. You are getting so impatient and the pressure is becoming so strong that you are now ready in this great deliberative body to invoke upon it a cloture rule in the interest of the tariff barons of the United States. Pity, God pity the Republican Party if you come to that, that you will invoke a cloture rule in order to abuse and misuse the taxing power.

Oh, Mr. President, the history of the Governments that lie stranded along the shores of time tells us that the time came for their fall when discussion of public matters was suppressed, when the corrupt power in control muzzled the press and kept the truth from the people. Then the downfall was due to come. That is the history of them all. Is anybody going to be intimidated by these threats from the other side of the Chamber? Let them frame their cloture and see how soon they will put it through this body. Thank God, there are those on this side of the aisle and a few on the other side whom you will not be able to lash into line to put cloture upon the Senate in order that you may take unjust taxes from the great army of American consumers.

The Senator from North Dakota in his brief talk said that we discuss things here in which nobody is interested. Every speech I have made here was thought by me to be in the interest of the people. Every speech that I have heard on this side of the aisle has been in the interest of the people. Are they nobody? Has the Republican Party become so arrogant, so puffed up on account of the big majority by which they came in by accident, when the world was out of joint and the people wanted a change and are now sorry that they got it? The Republican Party, now drunk on power, in every branch of the Government is taking that attitude toward the people whose strength and glory make this great Republic the splendid thing that it is.

The Senator from North Dakota tells us that the things we discuss are things in which nobody is interested. Mr. President, this Republic was built for the citizen, and the whole aim and end of it is the welfare of the citizen, I do not care how humble he is. I do not care whether he lives in a cabin on the hillside or a mansion on the mountain top. He is under that flag and he is entitled to a fair deal. We are pleading for that for him. Those out yonder have nobody to speak for them, and it is up to the Democrats, it is up to the few Republicans on the other side of the Chamber, to lift their voices in this historic Hall and plead for justice for them. Let the tariff barons of the East scold all they please. They do not own the Government. They think they do. They are able at times to get control of it through the power of the purse, but there never has been such an awakening amongst the American people as is going on to-day. The rank and file amongst the men and women of the country are thinking as never before, How fares the Republic? Who is in charge? Whither are we drifting? What policies are controlling? Is the Government being run in the interest of the citizen or is it being run in the interest of the favored few? Bring on your cloture and we will see if we can not discuss it some.

Mr. McCUMBER and Mr. SIMMONS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. SIMMONS. Mr. President——

Mr. HEFLIN. I am glad to yield to the Senator from North Carolina, who is lifting up his voice in the interest of an honest tax measure and in the interest of the whole people of his country.

The PRESIDING OFFICER. The Senator from North Dakota is recognized.

Mr. HEFLIN. The Senator from North Carolina asked me, just as I closed, to yield.

The PRESIDING OFFICER. The Senator from Alabama took his seat, and the Chair recognized the Senator from North Dakota.

Mr. McCUMBER. Will the Secretary state the pending amendment?

The READING CLERK. On page 36, line 8, strike out the word "if."

Mr. McCUMBER. Mr. President, the pending amendment is to strike out the word "if." We find that it is an unnecessary word placed in the House text of the bill, and therefore we ask that it be stricken out. We have been 2 hours and 15 minutes this morning in session, and we have not yet succeeded in striking out that word "if."

The Senator from North Carolina [Mr. SIMMONS] says, "We are not filibustering. Oh, no!" And the Senator from North Carolina is an honorable gentleman. The Senator from Alabama [Mr. HEFLIN] says, "Oh, no; we are not filibustering. We are only taking 2 hours and 15 minutes to determine whether we shall strike out the word 'if.'" And the Senator from Alabama is an honorable gentleman. They are all honorable gentlemen, and none of them are filibustering; but the fact still remains that we have taken 2 hours and 15 minutes on this subject. And then the Senator from North Carolina, to excuse these long discussions upon subjects that are not pertinent to the question, and especially to excuse the repetition of the same argument over and over again, says that if a merchant is selling cloth he has to use the same yardstick each time that he measures a yard. I do not complain of that; but if he takes his yardstick and measures his yard of cloth, and then takes the same yardstick when he weighs out a pound of sugar, and then the same yardstick when he draws a jug of molasses, and the same yardstick when he counts out a dozen eggs, I would say that he is crazy.

Further than that, the Senator thinks he is justified every time that he measures off a yard of cloth in unwinding 40 rods of a tape measure; then every time that he gets ready to measure off another yard of cloth he unwinds 40 rods more of tape measure; and he repeats that day after day. Well, if the merchant should repeat that for about a week, his concern would be in the hands of a receiver and the second week he himself would be in the lunatic asylum.

Mr. President, it seems to me that we ought to get right down to this bill and determine whether or not the word "if" ought to stay where it is, and that we do not need to take four hours to determine that question.

Mr. SIMMONS. Mr. President, the amendment to strike out the word "if" might have been voted on two hours ago if the Senator from North Dakota [Mr. McCUMBER] had not precipitated and caused the discussion which has detained the Senate for two hours. The whole discussion to which we have listened during the past two hours has been the result of a lecture which the Senator from North Dakota, upon the conclusion of the speech of the Senator from Georgia [Mr. WATSON], undertook to deliver to the Senate of the United States. If the Senator from North Dakota had kept his seat, and had merely asked for a vote upon his amendment to strike out the word "if," we should have disposed of that matter in a minute and then, within the same short space of time, would have stricken out the other "ifs" that he has put into the bill; but the Senator must understand that he can not rise on the floor of the Senate whenever he sees fit to do so and inject extraneous matters and criticize Senators on this side and yet expect us to remain silent under his attack on our integrity and our honor in the management of this bill.

Mr. President, I want to say that I recognize that the Republican Party in the last election won before the people; I recognize that they have a right to say, as they do say, that they hold a commission from the people of the country to enact a measure of tariff taxation applying the principle of protection; but, Mr. President, the mandate which the people gave to the Republican Party was not a mandate to fix protective rates according to their own will and pleasure, but to fix protective rates according to the well-established principle and rule laid down in the platform of the Republican Party. If the Republican Party in the Senate will undertake to frame a bill carrying out that mandate, I will recognize the fact that they are doing no more than their party directed them to do; and while I shall disapprove of their action, because I do not approve of the protective tariff principle, so far as I am concerned, if the measure shall be of that character, it will receive no extended discussion from me.

But, Mr. President, the Republican leaders in the Senate when it came professedly to carry out that mandate of the people trampled under its feet the very essential condition and principle on which the people authorized them to act. It is because they have trampled upon that principle and are seeking here to impose upon the American people a protective tariff that does not comply with the mandate, that ignores the mandate, and that seeks to place taxes upon the people that are dictated not by the principle laid down by the Republican Party but by the greed and avarice of those who are asking that these taxes be imposed upon the people, that I insist we have the right, as the representatives of the people, to take up each item of the pending bill and ascertain whether or not they have transgressed the mandate which they received from the people; whether or not they have applied the rule and condition upon which the people gave them authority to act; and if we discover, as we have discovered, that they have not done so, we have the right to sharply challenge and call the attention of their own party and of all the people of the United States to the fact that the power intrusted to the Republican Party is being abused and exceeded by the Republican leaders in Congress to the great hurt and oppression of the American people.

That is the reason we are taking the time which we consume. We are taking the time with a view to showing that these rates are not in compliance with the declarations of the Republican platform and the mandates which Senators on the other side have received from the people.

Mr. President, that we are performing a function that the people of the country approve and think is a valuable public service is shown by the uprising against this bill not on the part of the Democrats alone, not on the part of nonpartisans alone, but on the part of Republicans themselves. The protests that are coming against this bill, indeed the loudest protests, the protests of most bitterness, are from leading Republicans and orthodox protectionists who joined in this mandate, but who are now denouncing their representatives in this Chamber for attempting to make a tariff in utter violation and abuse of the authority which was conferred upon them.

Mr. HEFLIN. Mr. President, my attention has just been called to the resolution which was submitted this morning by the Senator from Kansas [Mr. CURTIS] to and adopted by the Republican conference, and which reads as follows:

> Whereas the Republicans have a membership of 60 in the United States Senate, which gives them a majority of 24 in the Senate; and
>
> Whereas there is and has been a much larger absenteeism than is justified under existing circumstances, and it is important that all Senators whose health will permit should be present at all sessions of the Senate: Therefore be it
>
> *Resolved by this conference of Republican Senators*, That it is the sense of this conference that the chairman be, and he is hereby, instructed to notify all Republican Senators who are absent from Washington and those who are in the city but have been missing roll calls of the Senate that it is important that absentees at once return to their duties and that those who are in the city be requested to remain within call of the Senate during its sessions; be it further
>
> *Resolved*, That if the absentees fail or refuse to report for duty at once that proper steps be taken to have the Sergeant at Arms of the Senate compel the attendance of such Senators.

I am glad to see some Senators on the other side, the Senator from Kansas [Mr. CURTIS], who is always here, the Senator from Utah [Mr. SMOOT], and the Senator from North Dakota [Mr. MCCUMBER], getting after Republican Senators who are off gallivanting somewhere along the seashore or rolling golf balls on the green and having a delightful time, while we are here in session working day in and day out. The other night the Republican leader from North Dakota [Mr. MCCUMBER] complained that his colleagues were not here attending to their duties. Mr. President, it is a sad spectacle to me. The Republican Senators have a majority of 24 in this body——

Mr. WATSON of Georgia. Mr. President——

Mr. HEFLIN. I am glad to yield to my friend from Georgia.

Mr. WATSON of Georgia. Was not the Senator from North Dakota [Mr. MCCUMBER] absent a month or two last year looking after his badly battered fences in his own State?

Mr. HEFLIN. I believe he was away for some little time. However, I was just about to remark, Mr. President, that it is a sad situation that, with the overwhelming majority the Republicans have, they can not keep a quorum without the aid of Democrats. They want us to stay here and help them make a quorum, but they want us to sit silent while they put this bill through after having obtained a quorum by our presence. I submit that if we have got to make a quorum for Republicans, we are entitled to consume some of the time in discussing what they are trying to do after we give them a quorum.

Now, here comes a Macedonian cry to Republicans, "Come in; leave your summer resorts; get out of your limousines; come back from the golf course and help us, for we are about to sink. SIMMONS and JONES of New Mexico and FLETCHER and WATSON of Georgia and others here who have hammered this tariff bill, have battered us until we need recruits. Come in, you fellows, you who have been sunburned at the ocean side, swimming in the surf, and having a glorious time while you draw down $7,500 a year out of the purse of the people."

We Democrats are here staying all day and attending sessions at night, and the Republicans are off somewhere, Mr. President, just having a good time, and every time they plunge into the surf they exclaim, "Hurrah for the Republican Party!" [Laughter.]

Well, it is a great old party, is it not, that will permit that for the mighty rich—these pampered, purse-proud fellows think nothing about anything except their swollen fortunes. They do not think of matters that affect the common mass of the people; they are thinking in big terms of stocks and bonds. They are speculating in the market trying to boost the price of Liberty bonds, which were driven out of the hands of those who bought them when the country was imperiled by a foreign war. Now, they have driven up the price of those bonds until they are above par, and they bought them for $85 on the $100. Oh, yes; some can afford to stay away; but I am glad there are some on the other side who have the courage to demand that these Republican Senators come back and stay here and attend to their duties.

I want to see them in their places; I want to hear them vote when the roll is called to impose a cloture on this body in order to pass such an iniquitous measure as that now pending in this Chamber. I want the name of every Republican Senator and every Democrat who will dare to go on record for such a measure to have his name recorded in the CONGRESSIONAL RECORD.

So, Mr. President, I congratulate the Senator from Kansas [Mr. CURTIS] for the step which he has taken to bring these recalcitrant Republicans back to the place where the people sent them. Let them stay here and work like we do, and then you will have an adjournment earlier than some of you expect. How do you expect to have an adjournment when you can not keep a quorum of your own side here; when every few minutes you give a Democrat the opportunity of getting up here and making you consume 15 minutes, postponing the day of judgment that much for the taxpayer, by demanding that you produce a quorum? If you kept a quorum here, all of that time would be saved. During most of the day when we look across the aisle we see only the Senator from Utah [Mr. SMOOT] and the Senator from North Dakota [Mr. MCCUMBER] and Senator CURTIS.

In the burden and heat of the day they are about the only three Republicans over there, and the first two would just sit there, and now and then you will see one of them whispering back and forth to the other, and God only knows what sort of tariff concoctions they are hatching out to put upon the American people. [Laughter.] We are trying to get you to change some of these items and we are trying to defeat others, and you complain that we are filibustering.

Mr. President, whenever they want to stop a fight in behalf of the people they either charge that you are filibustering or that the measure is unconstitutional. Did you ever notice that? Whenever you see them bring in a well oiled, crooked scheme, and you stand up and fight it, they say, "You are filibustering now," or they look wise and perch their spectacles high upon their noses and say, "It is unconstitutional." One of those two things they say: "You are filibustering," or "The measure is unconstitutional." If you oppose something that the special interests are trying to put over on the people, why, you are a filibusterer or a demagogue.

Mr. President, it is a compliment to be called a demagogue and a filibusterer by some people; and whenever you want to put something through that will make the special interests stand upon the common plane and be measured by the same standard by which you measure the common citizen, they stand up and tell you that it is unconstitutional.

Senators, it will be a sad day in this body when by their hard and fast rules they will prevent Senators from rising up here and speaking about matters that vitally affect the country, and that is the motive behind this suggestion of cloture.

I say again before I sit down, if you are ever going to try to put cloture upon us, wait until the ordinary matters of legislation are on and submit it then for the calm and deliberate judgment of the Senate. Do not invoke it now to further the pillage and plunder of the American people.

Mr. STANLEY. Mr. President——

Mr. HEFLIN. I am glad to yield to the Senator from Kentucky.

Mr. STANLEY. The Senator from Alabama is a great statesman but a poor politician. He should not have called attention to the attendance on the other side of the Chamber when it is so unusually full. It is very rarely that I have ever seen both the Senator from North Dakota and the Senator from Utah here and their colleagues at the same time. I congratulate the Chamber on having one member of the Finance Committee here at one time. It is unusual, and the country is to be congratulated; and I hope that after awhile we will get two or three members of the Finance Committee here at one time, instead of having them take turns at enduring the service of the people.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. SMOOT. Mr. President, may we have a vote now?

The PRESIDING OFFICER (Mr. LADD in the chair). The question is on the amendment of the Committee on Finance striking out the word "if" before the words "plain white," on page 36, line 8.

The amendment was agreed to.

The next amendment was, on page 36, line 12, to strike out "25" and insert "45," so as to read—

plain white, plain yellow, plain brown, plain red, or plain black, not painted, colored, tinted, stained, enameled, gilded, printed, ornamented, or decorated in any manner, and manufactures in chief value of such ware not specially provided for, 45 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I have been listening to the discussion here for an hour and a half or two hours, most of it bearing upon the question of delay, and confining the discussion to the subject under consideration.

I have heretofore disclaimed any intention of delaying the passage of this bill. I have at times felt discouraged, in the hope that anything of good might be accomplished by discussion, but I believe that those of us who have been discussing the bill may now feel encouraged. There are some indications, at least, that our efforts are reaching the period of fruition. On a number of paragraphs amendments have been adopted which have reduced the taxes proposed by the Finance Committee. At times the negative votes have increased. We are hearing from the country. Opposition is developing to this bill, and there are indications that it is having effect within the inner circles of the Republican Party. I believe that there is some hope that this measure will never be imposed upon the American people. There is some hope that the Republican leaders themselves will repudiate this measure before a much greater length of time has expired.

I have here a clipping which comes from a well-known paper, one of the metropolitan journals of the country. The article is signed by a well-known correspondent, and it gives some indication that the consideration of this measure is receiving attention within the sacred circles of the Republican Party itself. I want to read just a paragraph from that clipping:

No one has any illusions about the tariff bill which is being framed. It is going to be disapproved by the country when it is passed. Yet everyone is impotent to recast it and make it acceptable and everyone is afraid to confess failure and lay it aside until after election.

A curious situation exists with regard to this bill. We have theoretical party government, with the President head of his party. Yet the whole executive branch of the Government is almost solidly against the bill which the rest of the party in Congress is forming.

Mr. Harding, it is said on creditable authority, is in the same state of mind over the McCumber-Fordney tariff bill as Mr. Taft was in over the Payne-Aldrich tariff bill. He is very much annoyed at MCCUMBER, personally, but nothing is done nor can be done. MCCUMBER is so afraid that only chaos will ensue if he attempts to change his program at this stage that there is no moving him. The machine moves forward as if fascinated by its own doom and unable to avoid it.

Mr. President, I am not in close enough touch with the administration officials to confirm what has been said as to the anxiety there regarding this bill, or the opposition which has arisen there regarding the bill; but I hope that everything said in this article is true. I hope that somebody is willing to take quiet and calm consideration of this bill and measure its enormity, and if this discussion has resulted in consideration of that sort there remains the hope that this monstrosity may never be perpetrated upon the people of this country.

They talk about taking up time in discussion. Mr. President, the history of the discussion on this paragraph is justification for everything which has occurred. Here are paragraphs putting taxes upon something that goes into every home. Every breakfast table, every lunch table, every dinner table, is taxed under the provisions of this bill, and the taxes sought to be imposed are higher than were imposed under the old Payne-Aldrich bill, which met with such immediate condemnation on the part of the people of this country. Yet, when that appeared, when the distinguished Senator from New Jersey [Mr. FRELINGHUYSEN] rose in his place last night at my suggestion to tell the Senate why these taxes were increased, we were met with the sole reply that the Finance Committee had recommended these rates, and if we had any objections to them we should submit our objections. Later on in the discussion it appeared that the evidence in the case did not warrant such rates of taxation. Then the distinguished Senator from New Jersey rose and said that he knew something that would justify these taxes; and yet they criticized us for calling attention to these things.

I called attention last night to paragraph 210, which deals with the most common kind of tableware which are used in the humblest homes in the land. The committee had recommended increases of rates a hundred per cent higher than existing law. It finally developed that the committee itself recommended that its proposed amendments be rejected.

In that situation they complain of discussion of this bill. The manufacturers themselves said that, as to the articles included in paragraph 210, they either had no competition or else that the present law afforded them all the protection they wanted. The statements are officially published, and in this record, to that effect; yet the Finance Committee have brought in a bill increasing the present taxes by 100 per cent.

In the absence of any reasons given by any member of the Finance Committee as to why the increased rates proposed under paragraphs 212 and 213 should be agreed to, and after the distinguished Senator from New Jersey [Mr. FRELINGHUYSEN], a member of the Finance Committee, and to whom apparently is delegated the duty of defending the impositions of the bill, insisted that my objections to the measure should be stated, I undertook to formulate a definite course for demonstrating that the rates were not justified.

There is no lawyer in the land but recognizes the greater difficulty in proving a negative than in proving an affirmative, and the law does not put the burden of proof upon those who take the negative side. The law puts the burden of proof upon those who affirm something, and time and again in this Chamber I have referred to that, and I am going to refer to it more during this debate. I say that nobody has a right to use the great taxing power of this Government to impose taxes upon the people of this Nation unless he has a ready and convincing reason for it. None such are even proffered here. They say, "We propose these taxes. We invite you to accept them," and we are deliberately called upon. In this case the Senator from New Jersey absolutely declined to make any statement justifying these rates, but he said that the Senator from New Mexico had studied the question, and that it was incumbent upon him to present his objections. It was one of the most pitiful, woeful spectacles which could occur in the great Congress of the United States.

Do the people of the United States want legislation of that kind? Yet we must assume the burden of proving a negative, that the rates are not justified. I accepted the situation last night, and I undertook to do that in two ways; first, to demonstrate that the pottery industry in this country is not suffering for want of profits. I showed last night that in the years 1911, 1912, and 1913 the average profits of the concerns engaged in this industry were 11.12 per cent. In 1918 they were 25.59, in 1919 they were 24.3, and in 1920 they were 32.76 per cent. That is the condition of the industry. From a financial standpoint, the industry is not suffering.

It seems to me that one other point, if established, ought to be sufficient, and that is that there is no unusual flood of imports into this country; that there is no unusual or disastrous competition in these wares. If those two things are established, is not that sufficient? I have established the one; I shall proceed now to establish the other, and in order to do that it is necessary to consider the whole ceramic industry, the pottery industry, and that comes within the three paragraphs—paragraph 210, paragraph 212, and paragraph 213. Paragraph 214 is a basket provision.

I say that it is necessary to include the whole industry, because the industry is conducted as a whole. It is impossible to segregate costs of one class of wares from the costs of another. It is a whole industry together. So we must take up this discussion with respect to the different kinds of wares and see whether or not there is undue competition at the present time.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from North Dakota?

Mr. JONES of New Mexico. I yield.

Mr. McCUMBER. I would like to have the Senator discuss this situation, which we find in this industry: Suppose that a very fancy dinner set costs $100 in Germany and that a comparable one in the United States costs $400; or, I will say that it is sold to the public in Germany, at a reasonable profit, for $100, and that the same set is sold in the United States, with a reasonable profit, for $400.

Mr. JONES of New Mexico. I believe I will ask the Senator to excuse me.

Mr. McCUMBER. I really wanted the Senator's view upon that feature, because——

Mr. JONES of New Mexico. I shall reach that phase of this discussion a little later, and I am sure it will facilitate matters, and I know the Senator from North Dakota does not want to delay; I hope he does not.

Mr. McCUMBER. I will subside very quickly if the Senator will assure me that it will facilitate matters.

Mr. JONES of New Mexico. I shall reach the discussion of just that situation. I may interpolate at the moment, though, that the illustration which the Senator gives will serve no useful purpose in the consideration of these paragraphs of the bill, because cases of that sort do not exist.

I think it may be well enough for me to refer to some general observations, and, as preliminary to that, I desire to call attention to the fact that there has been no industrial subject in America which has been examined with more care officially than the subject of pottery.

Back in 1912 the Congress made an appropriation and directed the Department of Commerce to ascertain all of the material facts bearing upon this industry, both in the United States and abroad. An exhaustive examination was made of the industry in the United States, including various economic facts and factors bearing upon the question of costs, the general surroundings of the industry, its prosperity, and so forth. They went abroad and did the same thing in England and France and were proceeding in Germany at the outbreak of the war. In this volume which I hold in my hand is the report of the Department of Commerce upon that investigation. So we have a vast amount of official information bearing upon this subject; more, I believe, upon this than upon any other industry in the United States.

In addition to that, the Tariff Commission has made a survey on the subject very much briefer and brought nearer to date than that volume. So we have fairly complete information at this time, at least as much so as can be obtained without waiting to get data up to date or more recent than would seem to be practical under the circumstances.

In the first place, we have a statement here giving us some of the factors about manufacturing costs, both in this country and abroad, and also the situation in Germany with respect to the export trade, and this survey from the Tariff Commission makes this statement:

> No manufacturing costs are available at the present time, and it is doubtful whether they could be obtained even under normal trade conditions. Part of the product is rejected at each stage of the process, and cost distribution is rendered more difficult by the fact that the rejects are often finished into ware entirely different from the main product.

I shall not read a great many of the details bearing upon these general questions, but I want to refer to one now which the Senator from North Dakota suggested awhile ago in his illustration.

Mr. McCUMBER. Let me call the Senator's attention to the fact that I made no suggestion. I started to make one, but I did not finish it. So the Senator must not assume that an incomplete sentence constitutes a suggestion.

Mr. JONES of New Mexico. I am sorry I made the remark. I hope to pass along rapidly and avoid delay in the discussion if I can. I read from that document:

> Recent European export selling prices are approximately equivalent to 250 per cent of the pre-war price, but the German home market price is less than the pre-war price in gold.

I want to get that subject out of the way before I proceed with the general discussion. It has been referred to often, and in other discussions I have called attention to the fact that wages are continually rising in Germany by leaps and bounds, and, so far as the difference in exchange is concerned, there can not be any advantage from that for any long period of time. It is only while the rate of exchange is on the decline that there can be very much advantage from it. But Germany has realized that some of her people were selling goods on this rapid decline in her exchange and has developed a system for the control of the export commodities from Germany. Now, those exports are controlled and are not exported at any price which is destructive of the industry at home or abroad. But we are told by the Tariff Commission itself that the export prices of these commodities are 250 per cent of the pre-war price. I read last night a statement from a witness in the United States that his prices had increased 111 per cent in the United States, but the German export price is 250 per cent of the pre-war price. So that so far as prices are concerned in the export trade this market is not adversely affected.

Moreover, Mr. President, the situation in Germany is vastly changing. So far as this particular commodity is concerned, the German industry is not able to turn out anything like the quantity which it was turning out prior to the war. Here we are at a time three and one-half years after the close of the war. The industry is crippled there yet. In this industry good fuel is one of the prime factors. With Silesia shut off, with the mines of the Ruhr Valley under contract to supply France, Belgium, and Italy with coal, the German industries are handicapped for that fuel. Reports have come that in many of the burnings of this particular industry one-half of the kiln would be destroyed because they did not have good fuel.

I hold in my hands the Times Trade Supplement, dated Saturday, April 22, 1922, in which is discussed the situation in Germany. The Trade Supplement is a part of the London Times. It says:

> The German market is at present in a state of uncertainty. Though the factories are still working busily, and there is no unemployment among skilled workmen, German prices in general are now at the world's level or close to it, and export is beginning to fall off. An increase in freight rates and in the coal tax (each of 40 per cent) came into force on April 1, whilst the official index number of wholesale prices for March already shows a 32.4 per cent increase on February.
>
> Wages and salaries were put up recently 15 to 20 per cent in order to counterbalance the rise in the cost of living. In view of the fall in prices in the world's markets, all these developments will further decrease the difference between German and foreign quotations.
>
> * * * * * * *
>
> EXPORT QUOTATIONS.
>
> Last year export prices were arrived at by increasing inland prices by 100 or 200 per cent, and in some cases even more. This method is becoming a thing of the past now that German prices are approaching the world's level, and only a few classes of goods (e. g., fine glassware) bear an addition to the inland price (30 to 150 per cent) if exported. The losses the German Government sustained by allowing her exporters to sell their goods too cheaply abroad can not be correctly ascertained. A financial paper (Bank) estimates that on the average Germany sold 30 per cent too cheaply and bought 20 per cent too dearly, and that in this way the State lost about 3,200,000,000 marks. Close supervision by the export offices (Aussenhandelsstellen), which also issue export permits, now insures a more uniform system of invoicing for export, and at prices fixed in conjunction with the trades associations. All Aussenhandelsstellen have now definite instructions to refuse export permits unless the goods are invoiced in the currency of the country to which they are going. Only in the case of a few commodities or of goods consigned to low-currency countries may the price be given in marks.

So, Mr. President, it seems to me that we ought not to be afraid of anything of that sort. In corroboration of that statement I want to quote the distinguished Senator from North Dakota. Some days ago when this question of German prices was being considered, that Senator himself said:

> Mr. McCUMBER. The Senator from Nevada asked a question which I think was very pertinent, and that was this: By providing a duty of only 10 per cent ad valorem will we not, if we allow the German manufacturers still to undersell, put the Canadians out of business? I think that would be absolutely true if they were going to sell as cheaply as they could sell; but there is a general error in supposing that because the German manufacturer can manufacture and sell for a third or a quarter less than the American manufacturer can, he thereby will necessarily put the American manufacturer out of business. I do not think he will do it, even though I think the German manufacturer has the power to do it, for this reason: Germany wants gold; she wants all the gold she can get; she wants just as big a profit as she can get; but even if she can produce at 7 or 8 or 9 or 10 cents a pound, and even

though she could sell the article in the American market at such a price that she could drive out the American manufacturer in time, what she wants now is the very best possible price that she can get, and she is selling very closely up to the American price.

So far as the paragraphs of this bill are concerned which we are now considering, I will say that she is selling in the American market above the American price. He continued:

In the case of some imported articles, as has been suggested, she is even selling higher. At any rate, she is selling for all she can get; and I do not think that the American industry is going to be put out of business immediately by any German concern, even though the duty were so low that it would be in Germany's power to do so. However, we fixed the duty at such rate as we thought would enable the Canadian product to come in, so that there would be fair competition between the Canadian product, the German product, and the American product.

Mr. President, if we can once get out of our minds that idea of an excessive and undue competition between this country and Germany, it seems to me then we are in a position to discuss the bill in a sane way.

Last night I showed that the importations from Germany are at the present time nothing like the importations before the war, that even in dollars the amount of importations is not nearly so great as prior to the war, but the prices are 250 per cent of the pre-war prices, which shows that in quantity the importations into the United States from Germany can not exceed one-half what they were prior to the war.

There are many things to be considered in the question of competition in earthenware. Some of the factors are mentioned here:

Packing and transportation costs are usually a relatively unimportant factor in the value of highly manufactured products. An exception must be noted, however, in the case of pottery. The fragile nature of the product necessitates very careful packing and the resulting packages are so bulky that the freight rate per unit of value is very high. Under the best of conditions, the breakage is an important item, and since the ware is often sold in 100-piece sets, the breakage of one piece often causes far more damage than the value of the article broken. This is especially true when the pattern is not one carried in open stock.

Under the present law the Tariff Commission has figured out how much a commodity in the United States must sell for as compared with the cost price in Germany. I just want to call attention to some of those facts.

From France $100 worth of ware would have to bring $176.13 upon landing in the port of New York, Boston, or Philadelphia, and after it is landed then the importer must pay his overhead expenses and must get his profit. Under the existing law the landed cost of French ware valued at $100 in France must stand a valuation of $176.13 in New York as the cost to the importer, who must pay his expenses and make his profit above that. From Japan $100 worth must have a landed cost of $233.33 and from England the English earthenware must have a landed cost of $164.25.

The table was made up incorrectly so far as German ware is concerned. It assumes that the tariff was based upon the selling price in Germany, and at the time the table was made up there was a difference between the selling price in Germany and the export price. But when the emergency tariff law was enacted some months ago the law was changed in that regard so that the duty is imposed on the export price or the home selling price, whichever is the highest, and the figures here regarding Germany do not apply. That, if correct, would show that the German landed cost under existing law is about $170 or $175 for a hundred dollars' worth of goods exported from Germany.

In regard to retail prices in this country the Tariff Commission makes this statement:

The retail prices are the only accurate measure of the competitive positions of the various kinds of pottery, on the price basis, and in this it must be assumed that the percentage retail profit is the same in each case. The following statement applies to first-quality ware and not to seconds and thirds, which are often sold at prices below the cost of production.

It is practically impossible to obtain retail prices which will show accurately the competitive strength of the various grades because the decoration, especially where gold is used, forms a considerable part of the value, and no two designs are exactly alike. In every case investigated, however, with the possible exception of fancy tea sets often sold as advertising features, domestic ware sells at distinctly lower prices than imported ware of the same body and decoration. This is particularly true of the very high grade English ware, and in many cases the difference between the domestic and imported product is so great that the imported has practically disappeared from the domestic market, the business reverting to domestic and French manufacturers. The difference in price between domestic china (as distinguished from earthenware) and Japanese china is about 25 per cent in favor of the domestic product. Domestic earthenware is sold at prices at least 10 per cent below the English.

So when we consider the question of importations from the standpoint of prices we do not find that the importer is cutting the price in this country. To the contrary, the imported ware is selling higher than is the domestic ware which may be comparable with the imported.

In regard to exports—at least as to some kinds of ware—we compete with the world without any tariff help at all.

Exportations of chinaware have increased from $901,537 during the fiscal year 1910 to $2,235,646 during the calendar year 1919. The bulk of the exportations consists of earthenware, this class of pottery having reached a higher state of perfection in domestic plants.

Concerning importations the Tariff Commission say:

Imports of pottery products remained nearly constant at about $10,000,000 yearly during the period from 1910 to 1914. There was a pronounced increase during the fiscal year 1914, but after war was declared imports decreased to less than $8,000,000 annually, and during 1919 amounted to only $7,000,000. The first post-war importations consisted to a larger extent than formerly of earthenware and other ware having a porous body. This ware originates in England and competes actively with the domestic product. The importations for consumption of kitchen and other natural clay wares are fast decreasing to a negligible quantity.

The general importations of earthenware during the first nine months of 1920 amounted to $3,076,330, and of porcelain and other vitrious wares, $4,891,105. Japan supplied over 65 per cent of the porcelain and England 77 per cent of the earthenware. The present volume of pottery imports are less than appears when values alone are considered, because foreign prices have increased to at least 250 per cent of the pre-war figure.

Mr. President, those are some facts bearing upon the general situation. I wish now to take up briefly the different classes of this ware. As to "common yellow, brown, or gray earthenware," I hope I can set at rest any apprehension by reading just this brief paragraph from the Tariff Commission:

The figures of domestic production and imports, together with the statements of manufacturers, indicate that the existing rates of duty are sufficient.

That would seem to be so, for the imports amount to only about $14,000 in one year, and up to $50,000 or $60,000 in another year, out of a total production of nearly $5,000,000. Then, as I called attention last night, the evidence is in the record of a larger number of manufacturers stating that they do not want any increase of duty.

The same thing may be said with regard to Rockingham ware, which I will not undertake to discuss, although, in my opinion, the duty which is put upon that commodity in the amendment to paragraph 210 is higher than it should be. It should not be higher than the duty on common yellow earthenware, because it is made by the same processes and serves the same purposes; but a special duty has been put upon it, which is higher than that of the other common ware, and it should not have been done.

Now, Mr. President, we come to certain items which should be put in a paragraph by themselves, for they have no place in either paragraph 212 or paragraph 213. The industry has practically been developed since those two paragraphs were originally framed in our tariff legislation. They were not then thought of. They are what might be called industrial products, used in industry, as distinct from tableware and decorated ware and commodities of that kind. They are produced in very large quantity and are used for industrial purposes. The business as to two of them at least was developed in this country, and there never has been any competition and there can not be in the very nature of things any serious competition even without any tariff duty. Yet they constitute one of the greatest class of commodities produced by the pottery industry, and under this bill extremely high taxes are imposed upon them. I refer to chemical stoneware, sanitary earthenware, and electrical porcelain. Electrical porcelain is used in connection with various electrical appliances and is strictly an industrial product.

As to these three commodities—electrical porcelain, chemical stoneware, and sanitary earthenware—we have some very valuable information. The Tariff Commission has made a very careful study of these three different classes of products of the potteries of the country. As to domestic production the Tariff Commission tells us:

The demand for sanitary ware, electrical porcelain, and chemical stoneware has become so large that plants now specialize on each of these products. The domestic production is sufficient to supply the home market and furnishes a considerable volume of exports of sanitary ware.

As to sanitary ware, we produce a considerable volume for export in competition with the world, and, of course, as to a commodity of that sort, there is no necessity for a tariff duty.

The raw materials are all found in considerable quantities within the borders of the United States. High-grade china and ball clays are imported to some extent, but domestic deposits of fire clays and coal are equal or superior to any found abroad.

The equipment and structural materials necessary to the manufacturing process are all produced or manufactured in the United States.

The manufacture of sanitary ware and chemical stoneware is largely hand work. Plain shapes are sometimes produced in high-pressure plunger presses, but most of the material is built up and shaped by hand. Electrical porcelain insulators are almost all plain shapes that can be produced in automatic presses similar to those used in pressing brick and tile. This method of manufacture increases the production

per operative. The ware is burned at very high temperatures in standard chinaware kilns, all white ware being protected during the burn by fire-clay saggers.

The industries covered in this survey are operated in large plants usually located near sources of raw material and fuel. Ohio is the largest producer of electrical porcelain and chemical stoneware and is an important factor in the sanitary-ware trade. New Jersey is the largest producer of sanitary ware.

Exports of sanitary ware exceeded the imports by more than $550,000 in 1919. Figures for the other products are not available, but estimates of the trade indicate that there is little if any export or import of chemical stoneware. Electrical porcelain is exported to some extent to localities using domestic electrical machinery.

Now, as to imports.

England formerly exported considerable quantities of sanitary ware to the United States, but with the improvement of the domestic product, only small amounts, chiefly specialties, are now imported. Electrical porcelain and chemical stoneware have been developed in the United States, and foreign material has never been able to find a profitable market here.

Bear in mind that these three items constitute a very large percentage of the total pottery product and that this bill, which proposes generally to raise duties higher than ever before known in the history of this country, also raises the duties upon these three items of industrial earthenware.

In speaking of the competitive conditions, it is said:

Sanitary ware and chemical stoneware are both very heavy per unit of value and are manufactured in single units weighing as much as 200 pounds. In order to prevent breakage in shipment the ware must be carefully packed. These are powerful factors in favor of the domestic industry, since domestic ware may be shipped by rail direct from the manufacturing plant to the consumer. Foreign ware must be handled at least three times. * * *

England possesses fuel, clays, and other necessary raw materials in close proximity to one another. China clays are cheaper than in the United States but fuel is more expensive, and labor costs have increased proportionately more than they have in the United States.

Mr. President, I have here some tables showing the foreign trade, both imports and exports, in sanitary earthenware. That is the only one of these three kinds in which there has been any appreciable foreign trade one way or the other. This table shows that the production in the United States from 1910 of sanitary earthenware has increased from less than $7,000,000 to about $11,250,000, and that the imports—which are doubtless these novelties referred to a few moments ago—amount only to $5,000 or $6,000 per annum, and the exports range from more than $200,000 to nearly $800,000.

As to the electrical and chemical stoneware and porcelain, there are no statistics regarding the export trade, because it has not been important enough to justify the gathering of statistics.

These three commodities ought by all means to be taken out of these paragraphs, and they constitute 22 per cent of the whole of that industry.

I do not believe I care to comment further upon that.

We proceed now to the consideration of some other general conditions regarding the white earthenware. That is the kind that is found on a great many of the tables of the country. It is a little less attractive article than the chinaware, but it serves a useful if not a decorative purpose, and we are given some very important observations regarding that.

The Tariff Commission and the Commerce Department give us the various items of cost in this country and abroad as they existed prior to the war. I shall not go into details, but will make the general remark that the present tariff more than offsets any difference in cost, as found by that investigating department of the Government.

Now, with special reference to earthenware pottery, which comes under paragraph 212, which would increase the rates above the existing law by about 30 per cent.

The comparative costs of production are also stated with regard to this earthenware from the Department of Commerce, and it states the amount that the cost of production in the United States was above the cost in the foreign countries; but the landed cost of the ware under existing law more than offsets that, and the figures are given in this examination of the subject.

A great deal has been said about this class of labor, and the survey shows how much more efficient the American labor is than labor anywhere else in the world—how much more efficient than the English labor, how much more efficient than the French labor, the German labor, and the Japanese labor—and compares their wages and takes all of that into consideration. This would be decidedly informing if I cared to consume the time in dwelling upon it.

To show how our industries are prospering as compared with these industries of other countries, I think it is well enough to present what is said upon that subject:

Ten American establishments, owning 46 per cent of the investment in the total of 28 potteries, obtained net earnings in 1913 ranging from 10 to 21 per cent on their investment. The value of white ware is enhanced by decoration. The more artistic the decoration the better the price obtained. Through their greater success in decorating the ware, German and Austrian china potteries obtain a large percentage of earnings above the cost of manufacture, including decorating, packing, and selling expenses. Deducting all costs from the selling prices, German china potteries secured net earnings of 21.47 per cent, Austrian china potteries secured 20.63 per cent, German earthenware potteries 15.27 per cent, English earthenware potteries 8.97 per cent, 6 typical American earthenware potteries 17.06 per cent, and 28 American earthenware potteries 14.47 per cent.

That would indicate, at least, that the industry in this country under existing law is not at any serious financial disadvantage. It is suffering no loss; and for subsequent years the same thing may be said, as shown by the figures which I have previously put into the record.

Another demonstration that the American producers are not suffering under competition is derived from the fact that the retailers of this country are paying less for their comparable domestic wares than for the foreign product—not very much, but it is a very significant statement:

The data obtained in 1914, while not conclusive, indicated that relatively higher prices were obtained in the United States for foreign than for domestic ware. The average difference between the cost to the retailer and his selling price was 65.81 per cent in the case of American earthenware, 65.24 per cent for Austrian china, 78.18 per cent for German china, 89.16 per cent for French china, and 67.28 per cent for English earthenware.

So, so far as the retailers of this country are concerned, they have to pay more for the comparable foreign product than they do for the domestic product; and under those conditions it is impossible for the American producer to be hurt by this competition.

Another factor which is significant:

Of the earthen pottery, in 1910 the domestic production amounted to about $15,000,000. In 1918 it amounted to more than $25,000,000, and it shows a very healthy progression during those years prior to the war, while the imports for consumption have ranged right around $2,000,000 for all of the years prior to the war and since.

Then the value of the imports for consumption and the duty paid, and the rate of duty, indicates this: That nearly all of the imported earthenware is of the decorated kind, because the duty on decorated ware is 40 per cent under existing law, and on the undecorated ware it is 35 per cent. The average duty collected on the imported article is about 39½ per cent, showing that the importations are confined almost entirely to the decorated ware—a very important point, which I shall refer to in another connection.

That information relating to white ware, as it is called, is supplemented by a distinct table showing the growth of the industry in the United States by yearly periods. For the five years 1897 to 1901, inclusive, the growth of the industry was 34.48 per cent, and for the five years 1902 to 1906, inclusive, 14.40 per cent, and then by yearly periods on up until, as I said awhile ago, the output of this white ware has increased from about $10,000,000 to about $18,000,000.

In regard to the relation of the domestic production to domestic consumption, this survey says:

The tableware in habitual family use in American households and subject to a great deal of wear and tear and breakage is, as a rule, of domestic production, and for purposes of utility none other is needed. It is not so expensive as the higher grades of imported ware. Prior to the war, however, large quantities of cheap Austrian, German, and Japanese china tableware, especially cups and saucers, sold in 10-cent and department stores, were imported into the United States.

Mr. SUTHERLAND. Mr. President, I would like to ask what page the Senator is reading from.

Mr. JONES of New Mexico. From page 44. I proceed:

Earthen tableware of general utility, which includes plates and dishes as well as cups and saucers, is displaced only to a limited extent by imported English earthenware. This displacement is not owing to either the quality or durability of the imported ware, but to special decorations and the names of historic potteries, printed on the back of the ware. The products of a number of domestic potteries compare favorably with imported ware in quality and artistic design.

Then the survey shows the exports of this ware, where it goes to, and so on. It goes principally to Canada.

In regard to the imports of this earthenware, it says:

Germany's exports of earthen tableware to the United States for the calendar year 1912, amounted to only $182,546, while its china tableware exported to the United States was valued at $3,017,364. Much of the latter was cheap china and competed with American earthenware, although prices charged were generally higher.

Austria's exports of earthenware of all kinds to the United States for the calendar year of 1913 were valued at $8,491, while its china tableware to this country was valued at $458,825, and a large proportion of the latter was cheap china and competed with American earthenware.

The exports of France to the United States in 1913 amounted to $1,704,440, not segregated by classes or varieties. Very little of this was earthen tableware. It was principally chinaware of an excellent grade, not competitive with American earthenware. Much of it was of a luxurious character and not produced in this country.

In regard to Japanese chinaware, it says:

Japanese chinaware is competitive in that it displaces domestic china and earthenware. The prices charged for Japanese ware of similar decoration is fully 25 per cent higher than that of domestic china and three times that of earthenware—

with which it comes in competition. There can be only one explanation for that, that that Japanese ware has a decoration which appeals to the American housewife when she wants to get a cheap ware. The use of Japanese chinaware instead of the earthenware is because it is cheap and serves only for such purposes as are generally known in households when you do not care so very much for your ware, where breakage is considered, and so forth. But there is something about the decoration which causes the American housewife to pay 25 per cent more for the Japanese chinaware than for the American product, and three times as much as for the American earthenware used for the same general purposes.

Regarding the domestic prices, the survey says:

Plates, cups, and saucers form about 62 per cent of total domestic tableware output. For a period of 26 years the wholesale selling prices of these articles have been compiled from authentic sources by the Bureau of Labor Statistics. It shows that the average price of white earthenware plates per dozen from 1890 to 1899 was 44.79 cents. In 1905 it was 45.86 cents. In 1910 it was 46.21 cents; in 1915, 46.33 cents; and in 1916, 48.44 cents per dozen.

In 1914, the manufacturers' wholesale selling price at factory in Ohio of a 100-piece dinner set of white earthenware, not decorated, was $3.58, and in the same year at Stoke-on-Trent, England, the wholesale selling price at factory of the same kind of a set of white earthenware was $2.55. When the import duties, transportation, and other charges of delivery at New York were added to the wholesale selling price at the factory in England, the landed cost was $4.31. The addition of the invoice charge for crate and packing and railroad freight charges to the wholesale selling price at the factory in Ohio made the delivery cost at New York of the American ware $3.92—

As compared with the foreign price of $4.31, demonstrating that there is no competition as far as price is concerned.

In this connection I desire to call attention to some very significant figures in this table, giving these prices for that long period of years. It is quite significant, it seems to me, that during the years from 1905 to 1909, inclusive, the price of plates, white granite, should have remained at 45.8 cents per dozen, or a little less than 46 cents per dozen, for that period of five successive years, precisely the same price for each of the five successive years, and then for the next three years, 1910, 1911, and 1912, the price had been increased less than a cent per dozen; but it remained at precisely the same fraction for that period of three years. Then for the next three years the price had increased just a small fraction more, but the price remained precisely the same for the whole of the next three years, and from 1890 down to 1916 the price had varied but little. In 1890 the price per dozen of those white granite plates was a little less than 49 cents, and in 1916 just a little less than 48.5 cents per dozen.

As to the cups and saucers, I notice a very significant thing. For the year 1905 and the two succeeding years the price of cups and saucers remained precisely the same, and then came an advance for one year of about 5 cents, and then the price went back a little, and for three more years remained at precisely the same fraction, running into the ten-thousandths of a cent. For the next three years, 1913 to 1915, the price varied a little, and then for 1916 the price was increased a little. But the price on the cups and saucers, white granite, from 1890 down to 1916, has remained the same for all practical purposes. The price in 1890 was 62 cents, 61 cents in 1891, and in 1916 about 60 cents.

It seems to me that if figures of that sort mean anything they mean that the industry in this country is a closely controlled one; that there is some sort of an association here which is absolutely controlling these prices. They control the American industry, and it is that kind of a management which is before the American Congress to-day seeking the higher duties, when the facts of the case do not show that they are suffering from any competition under existing law.

I could give very many more facts bearing upon this subject, but I will not do so.

Mr. FRELINGHUYSEN. Mr. President——

Mr. JONES of New Mexico. Will the Senator pardon me just a moment? As to the common ware, the Finance Committee itself, by its request that its proposed addition to the duty be not agreed to, confesses that there is no competition in that. As to those three great lines of industrial commodities, I think I have demonstrated that there is no competition.

As to earthenware, the competition comes, if at all, in the decorated earthenware, and that comes not through competition in prices but through competition in spite of its prices, because of the peculiar designs which appeal to the housewives of the country and that sort of thing should not be controlled by legislation.

That leaves the one great field of industry still to be met concerning chinaware. We get the most of our imports in chinaware. Let us inquire whether or not that situation should be met by an increase of the tariff.

I have only to quote to you one sentence from the Tariff Commission, as follows:

The postwar competition—

That is, in chinaware—

is based on quality and decoration rather than on price, the foreign ware selling for a higher price than the domestic product of a similar grade.

Mr. President, I have here a number of calculations made from prices in this country of those wares compared with the prices of the domestic product. They were taken from the so-called Reynolds report. In no case, I believe, was it found that the existing law did not more than equalize the selling price of the foreign article and the domestic article. On the other hand, the great mass of figures obtained show, just as the survey which I have read shows, that the selling price of the foreign article is higher than that of the domestic article.

Now, I wonder if the people of the United States want to control that sort of thing by legislation. The domestic comparable article is selling cheaper than the foreign article. The domestic housewife is willing to pay more for the foreign article than for the domestic article. It is a matter of quality. It is a matter of decoration. It is not a question of price. I should like to know whether the majority in this Chamber are willing to try to control by legislation the quality and decoration of the chinaware which shall go upon the tables of the country.

Is there a woman in all the land who does not take pride in her tableware? She lives with it. She has selected that ware because of the little clinging vine which is burned into it, the little band of gold, the design, the decoration. She puts it upon her table. That is where the family gathers round. The ware upon that table is the decoration with which the family lives. In many households it takes the place of the flowers found in the center of the table.

Are we going to deprive the housewives of their choice? Are we going to say to them, "You shall not have this decorated ware produced in France or England or Germany, but you have to take this American ware, whether you want it or not. It is true you are willing to pay more for the foreign ware than the domestic ware, but we are going to stop that, and by law we are going to prevent the women of the country from selecting the ware that shall go upon the breakfast table, around which the family assemble and where they gather their friends." By so doing you enter those homes and destroy the spirit which binds the family together. That is what you are attempting to do by proposing amendments to the bill providing rates higher than ever proposed before, as I read to you last night from testimony, rates higher than the managers of the business themselves say they want. The testimony is that they will be satisfied, even on this chinaware, with the Payne-Aldrich rate, but the rates which you propose are 16⅔ per cent higher than the Payne-Aldrich rates.

Mr. President, I ask how this is going to be justified. You may complain about discussion, but the people of the country want to know about these things. Here is a commodity which enters every household in the land, from the highest to the humblest, a necessity of life, an article which bears the food to support life, and yet you propose in this state of the case to make the duties higher than they have ever been before.

With these facts existing, doubtless known to exist by the majority of the Finance Committee, they come in with these exorbitant rates of taxation, lay them before the Senate, and tell us to take them without investigation.

Mr. President, I have stated in brief form the objections which I have to the increases in these two paragraphs. The distinguished Senator from New Jersey [Mr. FRELINGHUYSEN] asked me to do it. I have done so, and now if he has any facts to justify these rates, let us have them, and let us put them beside those which I have presented.

OPERATIONS OF GENERAL ELECTRIC CO.

Mr. LA FOLLETTE. Mr. President, I have just received a very important letter from Mr. Samuel Untermyer, of New York, which I wish to have read into the RECORD. I will read it in my own time or send it to the desk, if there is no objection, and ask the Secretary to read it.

The VICE PRESIDENT. The Secretary will read the communication.

The Assistant Secretary read as follows:

NEW YORK, *May 24, 1922.*

Hon. ROBERT M. LA FOLLETTE,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR: As counsel for the joint legislative committee on housing of the State of New York, I desire to have promptly placed before Congress, with a view of securing such action as Congress may deem appropriate, the following state of facts with respect to the General Electric Co. and my comments thereon:

The company has a virtual monopoly in the manufacture and sale of electric-light bulbs in the United States. It manufactures and sells upward of 97 per cent of all such bulbs. The manufacturers of the remaining 3 per cent of bulbs are financially so weak and are being so harassed with lawsuits by the General Electric Co. that they are on the verge of extermination and are continuing their precarious existence subject to the will of the General Electric Co. A limited part of the product is manufactured and sold under licenses from the General Electric Co.

The distribution system employed in order to maintain this monopoly provides for two classes of selling agents known as class "A," located in the large distributing centers, and class "B," who are supplied by the jobbers, the latter in turn making distribution to the consumer. Prior to the entry in the Federal court at Toledo of the decree, to which reference will hereafter be made, the General Electric Co. sold its product outright through these distributing agencies, but since that decree the sales have been made under cover of a pretended consignment plan whereby the bulbs remain the property of the General Electric Co. The latter, after allowing itself a clear profit of over 50 per cent above the cost of production and overhead charges, requires the distributing agencies to exact from the consumer retail prices that add at least another 70 per cent over the selling price of the manufacturer, which the consumer is required to pay.

The prices charged the latter throughout the United States are shown to be grossly extortionate, but a large part of the profit is hidden under fictitious or exaggerated depreciation, overhead, and other illegitimate charges.

The situation can best be illustrated by a few figures. The total business of the General Electric Co. in all lines for the year 1920 was $268,000,000, of which $60,000,000 of its total sales (which excludes those of its chief licensee, the Westinghouse Co.) consisted of electric-light bulbs, from which it will be noted that about 22 per cent of its total sales consisted of bulbs. Its total net profits for that year were about $25,000,000, of which it is forced to admit that about 80 per cent was derived from the manufacture and sale of bulbs, so that 22 per cent of its total business yielded 80 per cent of its total profits.

This does not take into account the added burden of 70 per cent allowed to its distributing agents, which is at least twice what it should be, and is more than double the cost of distributing the various other lines in which it deals. These other products, which are largely competitive, are practically "carried" on the back of the extortionate profits allowed to the agents on bulbs.

As one of the many evidences of the concealment of profits in the bulb business the following figures for the year 1920 are instructive: The total plant account of the company on which $182,271,111.59 had been expended up to the end of that year stands on the books at $66,536,682.23, as of December 31, 1920, which is less than the actual cost of new construction for the four years next preceding that time. There was deducted in that year the sum of $15,577,359.92 by way of depreciation on the plant account; for the year 1919, $7,688,893.68; for the year 1918, $15,224,162.54. Similar deductions have been made in other accounts in order to make it appear that the company is earning only about 31 per cent upon the manufacture of bulbs in addition to the arbitrary allowances made to its distributing agents.

It is believed that a legitimate system of bookkeeping would show a manufacturing profit of 100 per cent or more on bulbs. Since the investigation by our committee, there has been slight reductions in price; the cost of current has been materially cheapened by improvements in the manufacture of bulbs under patents taken out or acquired by the General Electric Co., but the effect of this intolerable monopoly has been and is to paralyze and render impossible any independent effort to cheapen such cost.

A brief summary of the history of the method by which this monopoly has been fastened upon the people of this country will be instructive at this point:

The original Edison patents on bulbs, having expired in 1894, various illegal combinations were entered into for the express purpose and which had the effect of maintaining the monopoly. The conditions continued so oppressive that in April, 1911, the Government filed a bill in equity in the United States district court at Toledo against the General Electric Co., the Westinghouse Co., and a number of other corporations through which this monopoly was being maintained, in which numerous charges of gross fraud and misconduct of the most serious character were made.

Among other things, it was there charged that in 1894, when the carbon filament patents expired, the General Electric and the other defendants formed an association for the purpose of fixing and prescribing prices and allotting business and customers in the lamp business; that this combination was made effective by means of fines imposed on members for violating the price-fixing regulations and that it remained in effect by agreement for three years from August 4, 1896, and was continued thereafter until the form of the unlawful combination was changed; that prior to the formation of the combination the participating defendants had been active competitors; that in 1901 there were still certain active competitors of the lamp makers in the combination, and that in order to make their combination more permanent and enduring and to crush competition, present and future, the General Electric and other defendants carried out the following scheme:

The National Electric Lamp Co. was organized as a holding company and took over all of the members of the combination except the General Electric and its partner in the bulb business, the Westinghouse; that from time to time the National Electric Lamp Co. acquired the control of the independent competitors in the lamp business for the purposes of suppressing competition and continued this plan not only with respect to companies existing at the time of its organization but also with respect to competitors organized later; that in order to further monopolize the business unlawful agreements were entered into with companies not acquired by the National Co. whereby prices were maintained; that the General Electric in or about the year 1905, having acquired a virtual monopoly of the carbon filament lamps, acquired from time to time all of the inventions and patents covering the tantalum and tungsten filament lamps, which were lamps of types competing with the carbon filament lamp, and that by acquiring such patents the General Electric forestalled the possibility of any competition in the manufacture and sale of tungsten and tantalum lamps; that after acquiring such patents the General Electric refused to sell the improved tungsten filament lamps unless purchasers would buy all their carbon filament lamps from it; that further, in order to destroy competition the General Electric falsely represented itself as an active competitor of the National Electric Lamp Co., although it actually controlled that company; that for the like purpose of destroying competition of independents the General Electric sold inferior lamps under false brand names to the customers of such independents, made contracts (a) with the manufacturers of machinery and material necessary in the manufacture of lamps whereby lamp-making machinery makers refused to sell machinery to others than those designated by the unlawful combination; (b) whereby manufacturers of bulbs and tubing refused to sell to others, except at greatly increased prices; and (c) whereby manufacturers of bases in consideration of getting the entire business of the defendants charged excessive prices for lamp bases to the few remaining competitors.

The relief there asked was:

(1) A general injunction against the unlawful combination.

(2) A cancellation of the agreements between the General Electric, National Electric Lamp Co., and others.

(3) An injunction restraining the defendants from using their patents to suppress competition.

(4) An injunction restraining the defendants from imposing the condition in the sale of their tungsten and tantalum lamps, requiring the purchase of all carbon lamps from defendant.

(5) A dissolution of the contracts between the defendants and manufacturers of lamp bases, lamp-making machinery, glass bulbs.

At the time of the filing of this bill it was charged in the bill and admitted by the answer that the General Electric Co. monopolized at least 60 per cent of the business of the country. In June, 1911, a decree was entered by consent in favor of the Government in that action in which it was adjudged, among other things, as follows:

That the National Electric Lamp Co. and its subsidiaries be dissolved, and that the General Electric Co. be enjoined from conducting business except in its own name, and specifically that all factories now operated or owned by the General Electric be made known to the general public; that the General Electric be enjoined from making or carrying out any contracts with manufacturers of lamp-making machinery, tubing, or bulbs whereby such manufacturers were bound not to sell goods manufactured by them to others than the defendant, or were obligated to sell to the defendants at other prices than those to which they sold to other purchasers; that the defendants be enjoined from fixing prices at which any lamps, whether made or sold under patent or otherwise, should be sold or dealt in at wholesale or retail; that the General Electric be enjoined from enforcing any contract or arrangement whereby dealers or consumers buying tantalum or tungsten lamps were compelled to purchase all their carbon lamps from the defendants, and that the General Electric be enjoined from exercising an option to purchase the capital stock of the defendant Franklin Electric Manufacturing Co.

It will be observed that the decree carefully abstains from mentioning or granting relief against the main charge of the bill, to wit, that the monopoly was being maintained through the acquisition by the General Electric Co. of competing and potentially competing patents. The company now has in its archives more than 300 patents, many of which are competing, having purchased everything to be had in every direction.

Whilst the decree to which the companies consented is fierce and noisy in its denunciation of the monopoly and the frauds and oppression by which it was maintained and purports to order its dissolution, its significant omission to require the offending companies to dispose of the competing patents, by which the monopoly was accomplished, and other facts disclosed by the record that might be mentioned if space permitted, demonstrates that the Government was either hoodwinked into accepting the shadow for the substance, or that it knowingly permitted itself by this decree to encourage a monopoly still more complete than that which it was pretending to dissolve. It is but one more in the formidable array of object lessons of the futility of these decrees, and again demonstrates that criminal prosecutions and prison sentences are the only deterrents against the pernicious form of law violation.

Scant as was the protection intended to be granted by that decree, it has been, and is being, persistently violated by the General Electric Co., both in letter and spirit, in the following, among other, particulars:

(1) By operating companies controlled by it under their original names without announcing the General Electric Co.'s interest or control.

(2) By distributing lamps under agency or consignment agreements, which are but a cover for price fixing, in violation of the decree.

(3) By acquiring the Franklin Electric Co. in violation of the decree.

(4) By discriminating against dealers who failed to maintain its price-fixing program.

But, bad as is this situation, the main offending is found in the subsequent action of the company in acquiring still further competing patents, a few of which are in use, but most of which are held in its archives as a standing threat against competitors. It was also shown that competitor after competitor who had managed to struggle into existence was either driven out of business or, if he proved to be a good fighter, he was bought out. In that way $1,520,000 was paid to one competitor in 1918 and $3,700,000 to another in 1920. These and many more facts of an equally significant character were developed in the investigation by the committee that I represent.

In January, 1922, the mass of testimony taken by our committee was forwarded to the Attorney General of the United States with a request for immediate action. He was specifically asked to institute proceedings to punish the company and its officers for criminal contempt of that decree and to institute criminal prosecution for the violation of the antitrust laws in maintaining this monopoly through the acquisition of competing patents and the extermination of competitors. It was suggested that he instruct the United States district attorney at New York, in whose charge other prosecutions for other violations of the antitrust laws developed by the committee had been placed by him and who had shown a commendable disposition to press those cases. This the Attorney General declined to do.

After considerable delay and repeated further efforts to induce him to act, I offered to take over the prosecution on behalf of the committee represented by me without cost to the Government, in order to secure a prompt abatement of the extortion to which the public was being subjected, but have been unable to secure his assent.

It is now almost five months since those requests were made. This apparent unwillingness to act is quite in line with the history of the persistent but unsuccessful attempts that have been made by the committee to secure action in other cases, extending over a period of one year or more.

To be brutally frank about the business, I am satisfied that the overshadowing power of J. P. Morgan & Co., who are the financial managers of this company and who really control its destinies and one of whose members is a director in the company, will make it impossible ever to secure any sort of effective relief through the agency of the Department of Justice. Experience over the past two decades and upward has demonstrated that the great corporations under its guardianship somehow or other manage to do just about as they please and to remain above and beyond the law.

To get the protection of that great international banking firm seems to be equivalent to a policy of insurance against legal restraint. It matters not whether we happen to be under a Republican or a Democratic administration, their influence is apparently quite as potent with the latter as with the former and at times it has seemed as if it were a little more so. There is no difficulty in multiplying proof in support of this assertion. The history of the years of abortive litigation arising out of their mismanagement of the New Haven road and the flagrant violations of law that accompanied the debacle of that once great property is an apt illustration.

The last chapter opened a few days ago with the smashing of the wholesome safeguards against monopoly provided by the law against interlocking directorates of competing properties, where the court, on motion of the Attorney General, abrogated that restriction as between the New Haven and Boston & Maine roads. The ink had barely dried on the signature to the law, which was one of the most constructive results of the Money Trust investigation, when the law was so amended as to permit of this action.

My suggestions as to the way to meet this General Electric situation are: (1) That the patent law be so amended that if the owner of a patent directly or indirectly acquires a distinctly competing patent or an interest therein, the patent or patents held by him be thereby ipso facto invalidated; (2) that the Attorney General be directed to place the case in the hands of distinguished independent counsel with instructions to proceed forthwith if the testimony that we are prepared to submit to him justifies that course, as no doubt it does, unless he prefers to place it with our committee without cost to the Government.

There is something incongruous about a situation that permits an individual or a corporation to hold the country by the throat for almost 50 years, as the General Electric Co. has done, first under cover of patents that expired 20 years ago, and then by "scooping up" everything in this and other countries that makes its appearance in the way of new inventions, and to tighten this hold decade by decade until it seems to be impossible for the victimized public ever to escape from its grip.

In this case the bulb manufactured under an Austrian patent acquired by the General Electric Co. was in actual competition with it when that patent was purchased, whilst the process and product patented by another foreign inventor whose invention was also bought by the General Electric Co. was another powerful potential competitor.

I am herewith inclosing copies of letters from me to the Attorney General, of March 23 and 31, from which you will be able to learn more fully our position.

Yours very truly,

SAM'L UNTERMYER.

Mr. LA FOLLETTE. Mr. President, I now ask to have the copies of the letters addressed by Mr. Untermyer to the Attorney General read into the RECORD by the Secretary.

The VICE PRESIDENT. Without objection, the Secretary will read the letters.

Mr. HARRISON. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Frelinghuysen	McKinley	Sheppard
Brandegee	Gerry	McLean	Shortridge
Broussard	Glass	McNary	Simmons
Bursum	Gooding	Moses	Smith
Calder	Hale	Myers	Smoot
Capper	Harris	Nelson	Spencer
Caraway	Harrison	Newberry	Sterling
Colt	Heflin	Nicholson	Sutherland
Cummins	Johnson	Norris	Townsend
Curtis	Jones, N. Mex.	Oddie	Wadsworth
Dial	Jones, Wash.	Overman	Walsh, Mass.
Dillingham	Kellogg	Page	Warren
Edge	Kendrick	Pepper	Watson, Ga.
Elkins	Ladd	Phipps	Williams.
Ernst	La Follette	Pittman	
Fletcher	Lodge	Ransdell	
France	McCumber	Rawson	

Mr. MOSES. I wish to announce the absence of my colleague [Mr. KEYES] from the Senate to-day on account of illness. I ask that this announcement may stand for the day.

The VICE PRESIDENT. Sixty-five Senators have answered to their names. A quorum is present. The Secretary will read the letters sent to the desk by the Senator from Wisconsin.

The Assistant Secretary read as follows:

GENERAL ELECTRIC CO.

NEW YORK, *March 23, 1922.*

Hon. HARRY M. DAUGHERTY,
The Attorney General, Washington, D. C.

MY DEAR GENERAL: I understand you are familiar with the attitude of the Lockwood committee based upon the evidence taken by it and the exhibits, all of which have now been for some time in your possession.

You will doubtless have noted from the comprehensive statement of our attitude made by me at the session of the committee held on January 26, 1922, which is found on pages 6213–6219, that our contentions are:

(1) That there has been a glaring and continuous violation of the consent decree of October 12, 1911, made by the Federal court at Toledo, Ohio, in a number of particulars; and

(2) That the acquisition of the competing and potentially competing patents that were set forth in the bill of complaint on which the decree was entered, and the use of these patents that has been and is being made constitute a willful and persistent violation of the anti-trust laws, that should be the subject of immediate criminal prosecution.

If you have examined the record you will also take note of our contention that for years the figures have been juggled by excessive charges to depreciation and in other ways, with a view of absorbing the bulk of the exorbitant profits that have been exacted in this business, and that one competitor after another has either been bought out or driven out of the business under prosecutions based upon these potentially competing patents.

It would be difficult to imagine a more oppressive monopoly or one that is, to my mind, more flagrantly violative of the law. Whilst a patent may lawfully be made the basis of a legalized monopoly, owners of patents that are actually or potentially competing have no more right to combine and thus deprive the people of the benefit of that form of competition than if the particular commodity were unprotected by patents.

The story, as told in the bill of complaint filed by the Government in 1911, is one of the most amazing recitals of fraud and oppression in the history of the courts. At that time the company by direct ownership monopolized only 60 per cent of the business. Now it monopolizes about 98 per cent of the entire business of the country, the volume of which has meantime increased manyfold.

If you will direct your attention to the difference between the manufacturing cost of these bulbs and their uniform selling price, which is maintained through an agency system that is a thinly veiled violation of the consent decree of 1911, you will realize the extent to which the public is being unjustly taxed and the relief that could be secured by smashing this defiant, high-handed monopoly.

I realize the powerful financial and other influences that are behind this company and the clever legal minds that are guiding it through the labyrinth of evasions of the law so as to give it the appearance of legality, but am relying on the Department of Justice to strip bare the pretexts under which it is attempting to shield its operations.

I respectfully submit that there should be summary action in two directions: (1) By a motion to punish for contempt in the Federal court at Toledo for violation of the decree and (2) by criminal proceedings in the Federal court at New York.

I am hoping that you will place these prosecutions, as you placed the others, in the hands of the United States district attorney of New York, and will supply him with special counsel to conduct these important cases. Although the organization here is quite inadequate to cope with the violations already exposed by the Lockwood committee, the evidence of which has been handed over to the Federal district attorney here, I do not mean to imply that Colonel Hayward, with his able and untiring special deputy, Mr. Podell, and their staff are not exerting themselves to the utmost with the limited facilities at their command.

They are doing their utmost, but they have not the necessary assistance in the way of competent, expert trial lawyers, nor have they been able to secure the judges or the other legal machinery necessary to press these cases as rapidly as they should be prosecuted.

At the present rate of progress it will take years to present to grand juries and to bring to trial the many violations of law already brought to their attention that are contributing so largely to the maintenance of the high cost of living.

If in order to expedite action against these powerful offenders connected with the General Electric Co. you would prefer to deputize any member of the legal staff now connected with the State prosecutions that are being conducted on behalf of the Lockwood committee to take charge of these particular prosecutions, I will see to it that the proceedings are promptly undertaken and pressed to a conclusion without expense to the Federal authorities; but I would rather see it accomplished through your own agencies, with such assistance as we may be able to render whenever called upon to do so, provided this can be promptly done.

I assume you have estimated at its proper value the gesture of the General Electric Co. in applying to you to investigate these alleged violations of law after they had been exposed by the Lockwood committee and after it had been publicly announced that prosecutions would be demanded. The published statement made in connection with that gesture to the effect that the company had not been given a fair opportunity to present its side of the case is without the slightest basis, as you will observe by reference to the minutes of the proceedings before the committee.

You will there find that the company was invited to present any witnesses whom it saw fit to have called, and that each witness from the ranks of the company who was examined was urged at the conclusion of his examination by the counsel of the committee to read over his testimony and make such explanation as he cared to present, and that whilst several witnesses were not permitted to be examined by their own counsel—which would have been contrary to all the precedents of legislative investigations and would render such investigations impossible—the company was invited and availed itself of the opportunity of putting to the several witnesses such questions as it saw fit to submit through the counsel for the committee, and that all the questions requested to be asked of the witnesses were, in fact, asked. The committee went further in this direction than any investigation committee has ever gone.

Very respectfully yours,

SAM'L UNTERMYER.

GENERAL ELECTRIC CO.

NEW YORK, *March 31, 1922.*

Hon. HARRY M. DAUGHERTY,
Attorney General, Washington, D. C.

MY DEAR GENERAL: I have your letter of the 25th instant, from which I regret to learn of the serious handicaps in your department due to the illness of assistants and others upon whom you depend in the matter to which I refer in my letter to you of the 23d instant. I note also that I am to hear from you a little later.

It is now almost three months since the detailed disclosures of the offenses complained of against the General Electric Co. were made by the Lockwood committee, at which time the facts were doubtless brought to your attention through the United States district attorney at New York. Complaint is constantly being made against Federal and State public officials charged with the administration of the criminal laws that whilst there is ample time at the disposal of these officials for the punishing of small and helpless offenders there is great difficulty in putting the machinery of justice in motion against the men of power and influence.

That feeling is constantly growing on the community, and I am particularly anxious that this reproach shall not attach to the work of our committee, which accounts for my solicitude with respect to the

prosecution of the grave offenses that we believe have been established against the General Electric Co. and its officials. But for the fact that these are distinctly violations of interstate law and of a decree of the Federal court which is not enforceable by State process, our committee would have dealt very promptly with this situation with the machinery we have set up for the purpose and that operates very much more rapidly than the processes in the Federal courts in connection with these cases.

I regret that you have not been able to see your way clear to adopt my suggestion that this particular business be turned over to the Federal prosecuting officers of this district, but am hoping that you will soon be able to deal promptly and effectively with the situation.

I repeat our offer to furnish you with every assistance and facility within our reach of which the Department of Justice is willing to avail itself.

Very truly yours, SAMUEL UNTERMYER.

Mr. HARRISON. May I ask the Senator from Wisconsin if he is about to speak?

Mr. LA FOLLETTE. I want to say just a word.

Mr. HARRISON. What is the date of the letter from Mr. Untermyer to the Senator which was just read?

Mr. LA FOLLETTE. It was written yesterday and received to-day.

Mr. Untermyer's eminence in his profession and his distinguished services to the public, which he has freely rendered as a private citizen, extending over many years, are a sufficient warrant for bringing any communication from him to the attention of the Senate. Moreover, it relates to a subject which ought to be intensely interesting to the Senate at any time, and particularly at this time, when we are considering a bill which provides highly protective duties on the products manufactured by the General Electric Co.

This company, on its record, as shown in Mr. Untermyer's letter, is one of the most oppressive monopolies in the country. His letter will especially attract public attention at this time, because of the failure of the Department of Justice to respond to Mr. Untermyer's urgent and repeated appeals, addressed to the Attorney General himself, to prosecute this company under the Sherman antitrust law.

PROPOSED MERGER OF INDEPENDENT STEEL COMPANIES.

Mr. President, I am very glad to bring the communication to the attention of the Senate for another reason. I believe it is high time for the Senate to take account of the conduct of the head of the Department of Justice. The facts set forth in Mr. Untermyer's letter are highly important and opportune as bearing upon the failure of the Attorney General to forestall the organization of the independent steel corporations into a combination or trust.

Fifteen days ago the Senate passed a resolution calling upon the Attorney General for information and also for an official opinion as to the threatened formation of a new steel merger. I am informed by the Secretary of the Senate that the action of the Senate in passing that resolution directed to the Attorney General and the request which it makes upon him for an opinion have been entirely ignored by him.

I do not know how he has been occupied, but in the meantime, judging from the reports published in the press, the steel merger has been effected. I ask to have read into the RECORD at this point an article which appeared in the New York World on yesterday.

The VICE PRESIDENT. The Secretary will read as requested.

The Assistant Secretary read as follows:

SIX-COMPANY STEEL MERGER CLINCHED; EIGHT NOW LIKELY—BETHLEHEM AND LACKAWANNA EXPECTED TO JOIN GIANT COMBINE IN A FEW MONTHS—PAPERS SIGNED BY CHIEFS OF TWO CORPORATIONS—OTHERS WILL ACT SOON—MIDVALE HELPS BRING REPUBLIC IN—TRUMBULL CO. JOINS.

Thomas L. Chadbourne has guided the merger of independent steel companies over a rough road, and it is now practically an accomplished fact. Although no official announcement has been made, it is known that the Midvale Steel & Ordnance Co., the Inland Steel Co., and the Republic Iron & Steel Co. have come to terms.

To this three-company combination the Trumbull Steel Co. will be added this afternoon, according to good authority, and two days later the Brier Hill Steel Co. and the Steel & Tube Co. of America will come into the fold.

SIX-COMPANY AFFAIR AGAIN.

Trumbull had not been mentioned publicly before in connection with the merger. Its entrance, following the defection of Lackawanna to Bethlehem, again makes the project a six-company affair. Originally it was a three-company, then, under the inspiration of Mr. Chadbourne, a seven-company merger. Practical difficulties reduced the number to five, and for a while it appeared there would be no agreement among these.

Now it is likely that eventually there will be eight independents in the combination. Persons in close touch with the situation say that the Bethlehem Steel Corporation and Lackawanna, its newly adopted child, will join the group within a few months, thus forming a steel-producing organization that will be a formidable rival of the United States Steel Corporation.

Successful completion of the merger is a tribute to the persistence of Mr. Chadbourne. Although unable to persuade Lackawanna of the advantages of joining the group and unable to prevent the defection of the Youngstown Steel & Tube Co., which decided to steer an individual course, he kept the others in line successfully despite great difficulties in arranging terms satisfactory to all.

* * * * * * *

PARTICIPANTS JUBILANT.

The participants in the merger are jubilant at its successful completion because of the strong financial position of each company and because of the operating economies that can be effected.

The three companies now committed to the deal have a total ingot production of about 5,000,000 tons a year. Without Bethlehem and Lackawanna, the six-company group will be third in production in the country. If these two companies come in, as it now seems probable, the resultant organization would be little below the Steel Trust in size and importance.

Mr. LA FOLLETTE. Mr. President, the Attorney General thus far has given no more heed to the resolution of the Senate relating to the steel merger than he gave to Mr. Untermyer's appeal to prosecute the General Electric Co.

I take occasion, sir, to read the resolution of the Senate passed on May 12 regarding the merger:

Resolved, That the Attorney General of the United States and the Federal Trade Commission be requested to inform the Senate as soon as possible what steps they have taken or propose to take to ascertain the purposes and probable effects of the proposed merger; what have been the results of any investigations which they may have conducted; and what actions they have instituted to protect the public interests.

Resolved further, That the Attorney General be further requested to inform the Senate whether or not it is advisable, in his opinion, to proceed under the appropriate provisions of the Sherman law and the Clayton law to prevent and restrain this impending combination.

Mr. President, apparently the only notice which the Attorney General has thus far taken of this resolution is to be found in the newspapers. I can not say that the interview which I read was authorized. I know from experience that public officials are not always correctly quoted. But on the day following the passage of the Senate resolution on the steel merger, Attorney General Daugherty is reported as having given out an interview at Atlantic City as follows:

ATLANTIC CITY, N. J., May 12.—Attorney General Daugherty, who joined President Harding's party here this evening after arguing the New Haven Railroad case in New York for the Government, said, regarding the proposed merger of the seven independent steel companies, that should the matter come before him he would hold an open hearing.

Discussing Senator LA FOLLETTE'S resolution, the Attorney General said:

"Mind you, I do not say where [whether] I think I should or should not be called upon to give an opinion in this case. Should it become my duty, however, to hear the case, the hearings will be open to Mr. LA FOLLETTE, to the press, and to anyone else interested."

The interview, if it emanated from Attorney General Daugherty, is most unworthy of one in his high official position. It bespeaks very little conception of his duties as Attorney General. In the hope that it may be brought to his attention, I read into the RECORD a provision of existing law under which it is manifestly his duty to proceed in this case. I quote section 4 of the Sherman antitrust law, as follows:

SEC. 4. The several circuit courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this act; and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violations shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition, the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree, the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

Mr. President, I believe that the Attorney General should proceed to enjoin the formation of this merger of the steel companies, and that if he fails so to do it will be a suitable case for action on the part of Congress. That is all I care to say about the matter at this time.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 8086. An act to prohibit the shipment of filled milk in interstate or foreign commerce;

H. R. 11408. An act granting the consent of Congress to the county of Winnebago and the town of Rockton, in said county, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Rock River, in said town of Rockton; and

H. R. 11409. An act granting the consent of Congress to the city of Ottawa and the county of La Salle, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Fox River.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice President:

H. R. 6523. An act for the relief of John Burke, former Treasurer of the United States, for lost bonds without the fault or negligence on the part of said former Treasurer;

H. R. 6524. An act to permit the correction of the general account of John Burke, former Treasurer of the United States;

H. R. 10442. An act to amend an act entitled "An act to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for these islands," approved August 29, 1916, as amended by an act to amend said act approved July 21, 1921; and

H. R. 11065. An act making appropriations for the Departments of State and Justice and for the judiciary for the fiscal year ending June 30, 1923, and for other purposes.

PETITIONS AND MEMORIALS.

Mr. BALL presented a memorial of sundry citizens of Picher, Okla., remonstrating against the enactment of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of the congregation of the First Reformed Church of the District of Columbia praying for the prompt passage of House bill 6508, relating to the exclusion of fraudulent devices and lottery paraphernalia from the mails; and Senate Resolution 142, directing an investigation of the alleged political activities of the motion-picture industry, and also protesting against the passage of Senate bill 3577, allowing and regulating boxing and sparring matches in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. NICHOLSON presented petitions of sundry citizens of Denver, Colo., praying that only a moderate duty be imposed on kid gloves in the pending tariff bill, which were referred to the Committee on Finance.

Mr. COLT presented petitions signed by 180 citizens of the State of Rhode Island praying for the imposition of only a moderate duty on kid gloves in the pending tariff bill, which were ordered to lie on the table.

Mr. CAPPER presented resolutions of the Mozart Club and the Federation of Parent-Teacher Associations, of Kansas City, Kans., favoring the enactment of legislation creating a department of education, which were referred to the Committee on Education and Labor.

Mr. McLEAN presented a resolution adopted by Raymond W. Harris Post, No. 145, Veterans of Foreign Wars of the United States, at Bridgeport, Conn., protesting against the proposed removal of the United States Veterans' Bureau office from Bridgeport to New Haven, Conn., which was referred to the Committee on Finance.

He also presented a petition of sundry employees of the National Co., of Waterbury, Conn., praying for the prompt passage of the so-called Fordney tariff bill based on American valuations, which was ordered to lie on the table.

He also presented a resolution adopted by the Common Council of Hartford, Conn., favoring the anchoring and keeping of Admiral Farragut's historic flagship, the frigate *Hartford*, on the Connecticut River at Hartford, Conn., which was referred to the Committee on Naval Affairs.

He also presented a letter in the nature of a petition of Local No. 237, National Federation of Post Office Clerks, and the Connecticut Federation of Post Office Clerks, of New Haven, Conn., praying for the enactment of legislation providing retirement for Government employees 50 years of age or over, and also relative to the so-called case examinations of postal clerks, which was referred to the Committee on Civil Service.

He also presented petitions of B. F. Kidder, pastor Methodist Episcopal Church of New Canaan; W. B. Pruner, pastor First Methodist Episcopal Church, of Litchfield; and F. F. Vorhees, pastor South Park Methodist Episcopal Church, of Hartford, all in the State of Connecticut, praying for the granting of relief to the suffering peoples of Armenia, which were referred to the Committee on Foreign Relations.

He also presented telegrams in the nature of petitions from A. Krpata & Son and Joseph Pauer, of Middletown; Farra Bros., of South Wilmington; and Anton Hak & Co., of Willimantic, all in the State of Connecticut, praying on behalf of themselves and their employees for the prompt passage of the pending tariff bill and stating that they do not understand the reason for delay in the Senate, which were ordered to lie on the table.

He also presented a letter in the nature of a petition from the State Federation of Women's Clubs, signed by Mrs. L. S. Cummings, chairman legislative committee, of Southington, Conn., praying for the enactment of legislation creating a department of education, which was referred to the Committee on Education and Labor.

Mr. LODGE presented resolutions adopted by the Presbytery of Boston, Presbyterian Church, at Boston, Mass., favoring amendments to the Constitution prohibiting polygamy and providing for uniform marriage and divorce laws, which were referred to the Committee on the Judiciary.

He also presented a resolution adopted by the Presbytery of Boston, Presbyterian Church, at Boston, Mass., favoring the enactment of legislation providing for Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

RICHARD J. EASTON.

Mr. FRANCE, from the Committee on Naval Affairs, to which was referred the bill (H. R. 1949) for the relief of Richard J. Easton, reported it without amendment, and submitted a report (No. 724) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. DILLINGHAM:

A bill (S. 3642) granting a pension to Clara C. Loomis (with accompanying papers); to the Committee on Pensions.

By Mr. CALDER:

A bill (S. 3643) for the relief of James J. Meehan; to the Committee on Naval Affairs.

By Mr. FRELINGHUYSEN:

A bill (S. 3644) granting a pension to Frances B. Eaton; to the Committee on Pensions.

ADDRESS BY SECRETARY OF STATE HUGHES (S. DOC. NO. 206).

Mr. LODGE. I ask that the address of the Secretary of State, Mr. Hughes, before the Chamber of Commerce of the United States in regard to the work of the Department of State may be printed as a Senate document.

The VICE PRESIDENT. Without objection, it is so ordered.

EXAMINING DIVISION OF CIVIL SERVICE COMMISSION.

Mr. STERLING. Mr. President, I think the time allowed the special committee to act under Senate Resolution 199 expires to-day. The committee is not ready to report, and on its behalf I request that the time be extended for 60 days.

Mr. HARRISON. What is Senate Resolution 199?

Mr. STERLING. A resolution introduced by the Senator from Arkansas [Mr. ROBINSON] relative to an investigation of the proceedings of the examining division of the Civil Service Commission. I may say to the Senator from Mississippi that I spoke to the Senator from Arkansas in regard to this extension, and it is satisfactory to him.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President had approved and signed acts of the following titles:

On May 19, 1922:

S. 3505. An act to amend the Code of Law for the District of Columbia.

On May 22, 1922:

S. 2919. An act to extend for the period of two years the provisions of Title II of the food control and the District of Columbia rents act, approved October 22, 1919, as amended.

On May 24, 1922:

S. 1162. An act declaring Lake George, Yazoo County, Miss., to be a nonnavigable stream.

ACCOUNTS OF CONFERENCE ON LIMITATION OF ARMAMENT (S. DOC. NO. 205).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and, with the accompanying report, referred to the Committee on Appropriations and ordered to be printed:

To the Senate and House of Representatives:

In conformity with the proviso of the appropriation made in the urgency deficiency act approved August 24, 1921, for the Conference on the Limitation of Armament, I transmit here-

with a report by the Secretary of State, presenting the statements of the expenditures made under his direction on behalf of the conference.

WARREN G. HARDING.

THE WHITE HOUSE, *May 25, 1922.*

METHODS OF THE CIVIL SERVICE COMMISSION.

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on Civil Service:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, a report prepared by the United States Bureau of Efficiency in compliance with the provisions of the legislative, executive, and judicial appropriation act approved March 3, 1917, directing the Bureau of Efficiency to investigate the methods of the Civil Service Commission and to report its findings to Congress through the President.

WARREN G. HARDING.

THE WHITE HOUSE, *May 25, 1922.*

[NOTE.—Report accompanied similar message to the House of Representatives.]

HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred as indicated below:

H. R. 8086. An act to prohibit the shipment of filled milk in interstate or foreign commerce; to the Committee on Agriculture and Forestry.

H. R. 11408. An act granting the consent of Congress to the county of Winnebago and the town of Rockton, in said county, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Rock River in said town of Rockton; and

H. R. 11409. An act granting the consent of Congress to the city of Ottawa and the county of La Salle, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Fox River; to the Committee on Commerce.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, the pending question being on the amendment in paragraph 212, page 36, line 12.

Mr. FRELINGHUYSEN. Mr. President, the Senator from New Mexico [Mr. JONES] has very ably, from his standpoint, discussed the paragraph in the tariff bill now under consideration. Last night he presented in the course of his argument certain figures to show that the pottery industry in the year 1920 was making unusual profits. I ask that, prior to my remarks upon this question, the figures which the distinguished Senator from New Mexico procured from the Internal Revenue Department be placed in the RECORD, and I shall hope to refer to them before I finish my remarks.

The VICE PRESIDENT. Without objection, it is so ordered. The table referred to is as follows:

Manufacturers of chinaware and earthenware—Invested capital, net income, gross sales, and cost of goods reported in corporation returns for pre-war period (1911–1913) and 1918–1920.

Serial No.	Pre-war period (1911–1913).		1913				1919				1920			
	Average invested capital.	Average net income.	Invested capital.	Net income.	Gross sales.	Cost of goods.	Invested capital.	Net income.	Gross sales.	Cost of goods.	Invested capital.	Net income.	Gross sales.	Cost of goods.
1	$34,705	$3,923	$61,682	$3,174	$47,702	$36,835	$64,958	$12,989	$106,912	$84,095	$77,946	$32,876	$221,616	$173,041

[1] Loss.

Net income on capital invested 1911-1913 (average), 11.12 per cent; 1918, 25.59 per cent; 1919, 24.3 per cent; 1920, 32.76 per cent.

Mr. FRELINGHUYSEN. Mr. President, I represent a State which, I think, has as many varied industries as any other State in the Union. These industries have been prosperous. The manufacturing plants are scattered all over the State, employing nearly a million wage earners and their dependents. They have become prosperous by reason of the fact that they have been protected against European competition. As the representative in part of that sovereign State I feel it my duty, so far as I can, to represent faithfully those wage earners in my service in the United States Senate. I do so with no desire to create any monopoly or to place any unjust taxation or burden upon the consumers of my State. I shall continue to represent them in that manner and, as far as I am able, to protect the workers of my State and see that those industries are properly protected. If I am to be abused and villified for that position, I am perfectly willing to let the people judge as to the merit of my service.

I am as much opposed to monopoly, I am as much opposed to extortionate prices, as any other man. I shall go as far, or farther, to prosecute, to help prosecute, or to bring to justice

any combination or any monopoly that is guilty or may be shown to be guilty of placing any extortionate prices upon the people of my State.

New Jersey is a great industrial State, and the people of that State are interested in the maintenance of its industries. As a member of the Finance Committee it has been my duty to pass upon the tariff schedules affecting the various industries. The paragraph now under consideration, embracing pottery, is of vital importance to New Jersey. So far as I have been able I have tried to make a study of the industrial conditions surrounding the production of pottery, not only in New Jersey but in every other State in the Union where the industry is conducted; and I believe that in paragraphs 212 and 213 we have imposed fairly reasonable duties and that those duties are necessary. I may say that pottery manufacturing plants are located not only in my State but that such plants also are operated in New York, Pennsylvania, Ohio, West Virginia, Maryland, Indiana, North Carolina, Connecticut, New Hampshire, California, Illinois, Massachusetts, Michigan, Tennessee, Colorado, and Iowa. Those plants are dependent for their raw material on other States, namely, Maine, Delaware, North and South Carolina, Georgia, Florida, Kentucky, Missouri, and others.

The distinguished Senator from New Mexico [Mr. JONES] has made a very able argument from his viewpoint, and possibly from the viewpoint of the importers, who desire low rates of duty in order that they may compete with the American product and gain control of our market; possibly, also, an argument from the standpoint of the department stores, which very largely sell imported pottery and thereby make larger profits from the imported ware than upon the domestic. The Senator from New Mexico in his argument has made two or three points against the rates in the pending paragraphs which I, with the limited knowledge I possess on the subject—and I confess to limited knowledge, although I have made a very earnest effort to study these conditions—shall endeavor to controvert.

The Senator from New Mexico contends there is no competition; that the prices of the imported articles are practically on a level with the prices of our domestic articles; that the foreign product does not undersell the American product. I shall show that a very menacing competition does exist. I shall endeavor to make that showing, not from the Tariff Commission's surveys or from reports of the Department of Commerce, but from the actual import invoices and from analyses which are made by the customhouse appraisers who are familiar with these goods.

The Senator also attacks the duties proposed on the ground that the pottery industry in this country has enjoyed unusual profits and therefore needs no protection. In the course of my remarks I shall attempt to show that through the course of years, in the last decade, the profits of the pottery industry have not only been moderate, but that no great fortunes have been made by those who have invested in this great industry or by those who are officers of pottery concerns.

The pottery industry is age old and is intertwined more or less with the traditions of history throughout the years which have passed. From the famous Hispano Moresque, the product of the potteries of Spain 600 years ago, coming down through the past 150 years, we find the traditions of this industry existing on the Continent of Europe.

Everyone has heard of the great Sevres and Limoges pottery industry of France; everyone has heard of the famous Royal Worcester and Wedgewood pottery; everyone has heard of the Dresden pottery, the Meissen pottery, and the famous pottery which enjoyed the favor and patronage of the late Kaiser of Germany.

It has been the national policy of European countries to encourage and educate their workers in the craft. We find in the Kensington Museum, London, and the famous Wedgewood Institute of Staffordshire, a school of ceramics; we find similar schools in Holland, France, and in Germany; and this country within the past two decades has tried through its educational institutions to build up the craft and to improve the art. In Ohio, the Ohio State University, I believe, was the first to initiate this great educational branch. That action was followed by the University of Illinois, and my own State, where the people are very proud of this great industry and wish to encourage it, has appropriated $100,000 for a ceramic department at Rutgers College—an old institution of which I have the honor to be one of the trustees. There is also the Ceramic School of Arts at Trenton. Therefore we might assume in the beginning that the pottery industry is of interest to the Nation and should be encouraged, developed, and protected.

Now, let us see what the history of the industry in the United States has been and its progress since the year 1890 to the present time. The employees of the pottery industry in 1890 approximated 10,000, upon whom 50,000 persons were dependent. The latest Government figures show that in 1919 there were 27,537 wage earners in the pottery industry, who directly supported over 100,000 of our population.

As to capital investment and turnover, starting with the very insignificant capital of a few thousand dollars, the capital invested has increased from $10,000,000 in 1890 to approximately $25,000,000 to-day. I am referring to the investment in institutions producing the tableware, commonly known as dishes, covered only by paragraph 212 and paragraph 213.

The capital investment in the pottery industry is one of slow turnover, depending upon the character of the production, the ordinary grade of pottery having a turnover of from one and one-half to two times the capital invested; that is, with a capital investment of $200,000 goods can be produced of a selling value of from $300,000 to $400,000.

The industry has not been one of mushroom growth nor of large profits. Of the men who have made their money out of the pottery business no millionaires can be found, and the history of the industry shows more financial failures than successes. The industry is one of uncertainty and great risk, depending largely on the successful burning in the kilns.

DEVELOPMENT OF THE INDUSTRY.

Although sporadic attempts to establish the industry were made during the early part of the nineteenth century, it did not become a commercial factor until the outbreak of the Civil War. Under the protection afforded through the high premium on gold the industry secured a foothold. The development, however, was slow on account of the want of skilled labor and the continued foreign competition. The protection afforded the industry was only sufficient partially to equalize the difference in the foreign cost of the principal competitor, namely, Great Britain. But although the duty was increased from 24 per cent to 40 per cent, and again to 55 per cent, the American consumer secured a greater benefit than did the manufacturer, and actual facts and figures refute very clearly the statement so often made that the "tariff is a tax, and the consumer pays that tax." To illustrate: A given assortment of standard pottery ware, made in England in 1852 before the industry was established in this country, sold in a wholesale way for $95.30; the duty then being 24 per cent.

In 1864, with a duty of 40 per cent and the high premium on gold, the same assortment of imported ware sold for $210.75. The American industry began to develop in a very small way, but sufficient to reduce the selling price in 1872 to $143.08, and regular reductions through competition shown on a table before me. I will not read all the figures, but starting with 1852, under a duty of 24 per cent, the assortment sold for $95.30; in 1920, under a 35 per cent duty, it sold for $80.30; and in 1922, under the same rate of duty, it sold for $49.70.

I ask unanimous consent to insert in the RECORD at this point in my remarks the table to which I have referred.

The PRESIDING OFFICER (Mr. SHORTRIDGE in the chair). If there is no objection, it is so ordered.

The table referred to is as follows:

Selling prices of similar assortment of goods.

1852, with 24 per cent duty, sold for	$95.30
1864, with 40 per cent duty, sold for	210.75
1872, with 40 per cent duty, sold for	143.08
1875, with 40 per cent duty, sold for	129.61
1882, with 40 per cent duty, sold for	51.89
1890, with 55 per cent duty, sold for	46.30
1896, with 30 per cent duty, sold for	44.00
1900, with 55 per cent duty, sold for	41.67
1909, with 55 per cent duty, sold for	37.59
1913, with 55 per cent duty, sold for	35.72
1915, with 35 per cent duty, sold for	35.00
1920 (the high war prices are accounted for entirely by the increased cost of labor and materials), with 35 per cent duty, sold for (peak war prices)	80.30
1922 (the high war prices are accounted for entirely by the increased cost of labor and materials), 35 per cent duty, sold for	49.70

Mr. FRELINGHUYSEN. While the foregoing figures show a general advance in the duty rates, and, on the other hand, a great decrease in the wholesale selling price, another fact is worthy of note, namely, the greatly increased quality of the ware produced. Before, during, and for some time after the Civil War the pottery was of a heavy and coarser quality, known as ironstone china. Since that time the wares produced have steadily increased in quality, until to-day they are, to all outside appearance, equal to china—thin, well finished, and of a china-white color, known as semiporcelain ware.

From 1890 to 1897 the industry had a struggling existence, as I will show by a table a little later on. From that time, under the protection afforded by the Dingley law, the industry developed slowly, but steadily. The imports, however, continued to hold their own, but changed materially in character. The

products of Germany and Japan increased with great rapidity, while the importations from England declined, so that at the end of 1908 the English imports were approximately the same amount as in 1884, being only 5½ per cent greater than in 1884, whereas the imports of German china had increased during the same period 643 per cent; from Austria, 514 per cent; and from Japan, 2,569 per cent.

The Government statistical figures are confusing, as their methods of classifying have changed, and are, therefore, not comparable. Some of the census figures embrace goods of an entirely different character from those we are now considering, namely, white and decorated earthenware and white and decorated chinaware, including dinner, hotel, and ornamental wares. More recently the various classes of wares have been segregated and more exact data are available.

In comparing the domestic production with foreign importations we again meet with unfair comparisons. The domestic figures indicate the actual selling price in the United States of the American product to the American wholesale dealer, whereas the import figures are based presumably upon the wholesale "market value" of the goods in the country of origin and do not in any way indicate the actual wholesale selling price of the goods in the United States. There is no exact way of knowing the displacement value of these imported goods in this country, as they are sold for as high a value as can be secured from the trade. This additional value is, on an average, two and one-half times the foreign value. In many cases much higher prices are obtained. Thus, if the figures show that the domestic production was $10,000,000 and the import figures were, for a corresponding period, $5,000,000, the actual selling price of the foreign article in the United States would be, at the lowest estimate, $12,500,000, or a total consumption by the American people of $22,500,000, of which only $10,000,000 was produced in this country. This is an important fact to have in mind when considering any import figures under our present method of assessing duties.

Mr. President, at this point I should like to insert a comparison of domestic production and importations of china and earthenware, showing the foreign import value, the American selling and competitive price of imported merchandise, and the American production from 1890 down to date.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

Comparison of domestic production and importations, china and earthenware.

Year.	Foreign import value.	American selling and competitive price, imported merchandise.	American production.
1890	$7,030,985	$17,577,462	$8,479,519
1891	8,381,388	20,953,470	8,600,000
1892	8,708,588	21,771,470	8,800,000
1893	[1] 9,509,431	23,773,577	[1] 3,500,000
1894	[1] 6,879,437	17,198,592	[1] 4,200,000
1895	[1] 8,956,105	22,390,262	[1] 4,600,000
1896	[1] 10,605,861	26,514,652	[1] 4,824,554
1897	[1] 8,463,280	21,158,200	[1] 4,025,488
1898	6,907,938	17,269,845	6,553,936
1899	7,866,776	19,666,940	9,234,109
1900	8,676,908	21,692,270	6,070,602
1901	9,479,592	23,698,980	13,233,422
1902	9,511,608	23,779,020	13,862,788
1903	11,131,811	27,829,528	14,356,014
1904	11,188,290	27,970,725	13,777,944
1905	11,875,444	29,688,610	14,755,344
1906	13,134,702	32,836,755	15,940,279
1907	13,472,135	33,680,338	15,844,349
1908	10,452,162	26,130,405	13,055,167
1909	10,508,496	26,271,240	15,495,082
1910	10,976,544	27,441,360	16,743,105
1911	10,473,745	26,184,363	16,424,236
1912	9,403,364	23,508,410	17,006,736
1913	9,946,671	24,866,678	17,490,871
1914	8,045,111	20,112,778	17,352,757
1915	4,574,387	11,435,968	17,654,398
1916	3,467,217	8,668,043	21,669,762
1917	3,567,185	8,917,963	25,726,575
1918	3,469,336	8,673,340	31,613,275
1919	6,912,681	17,281,703	37,556,093
1920	10,431,373	26,078,433	49,665,473
1921	11,840,276	29,600,690	[2] 38,000,000

[1] Wilson law, Cleveland administration. [2] Estimate.

Mr. FRELINGHUYSEN. This table, therefore, indicates in the first column the foreign import values; in the second column, the American selling, competitive, and displacement value of the imported merchandise; and in the third column, the American production.

As in many other American industries, it is not universally known that the American potter can, and does, produce as fine wares as are made in any part of the world. Illustrative of this fact is the very beautiful dinner service now used at the White House, which was made in Trenton, N. J. From that quality wares of all varieties and grades are produced down to the ordinary kitchen ware.

The industry has suffered in the production of the finer grades of ware for two reasons, the first being the extremely low cost of European and Japanese chinawares—which are the superior grades of ware—and second, the almost universal prejudice of the consuming public in favor of anything that is "imported."

An international investigation made by the Department of Commerce just before the outbreak of the war indicated that cost of production, f. o. b. factory, per unit of production, was 129 per cent higher than it was in the best potteries of Austria and 197.4 per cent higher than the German china potteries. The labor cost in the manufacture of china was shown to be 73.3 per cent higher than the cost of producing American earthenware and 182.3 per cent higher than the labor cost of Austrian china and 314 per cent higher than that in the German potteries.

The pottery industry has always paid relatively high wages, and has worked under biennial agreements with the International Brotherhood of Potters, thus keeping in friendly relation with the wage earners. The wages have steadily increased, but have receded 17 per cent from the peak prices. Taking all classes of common and skilled labor, the American wages are approximately 65 cents an hour, as compared with Great Britain, 18 cents an hour; France, 15 cents an hour; Germany, 6 cents an hour; Japan, 5 to 6 cents an hour; that is, based on the American dollar's purchasing power of labor at home and abroad.

The earthenware end of the business has had a large development in this country, but not so with the chinaware, and unless additional protection be given this branch of the industry, as provided for in the House or Senate rates, it will not be able to compete with the principal low-priced china-producing countries, namely, Germany and Japan.

That brings me to the point which the Senator has made in reference to his statement that the industry does not need the protection accorded in this bill. He will note that in the Dingley bill the rates are high compared with other rates in that bill, and under those protective duties the industry was afforded a fair chance. These rates were continued until 1913, when they were reduced by the Underwood law. In addition to these reduced rates we are now confronted with an unusual condition. Europe has a cartel system, and under that cartel system there is an agreement among the industries—the dye industry, the chemical industry, and this industry—that the export selling price shall be higher than the domestic selling price; and on articles exported from Germany we find that there is a fixed percentage added to the cost of articles exported to the various world markets.

This is where the discrepancy exists between the Senator's figures and the actual menace in lowering this tariff as he desires. He will find that Germany has built up these prices through this added export percentage and that she is selling in this market at a figure closely approaching the American domestic selling price of the comparable article; but a comparison will show that the selling price of the same article in the American market is 238 per cent higher than in the German home market. Therefore if that great trade organization at any time finds it can not overcome the American tariff at the present export selling prices, it has a leeway of 238 per cent on this pottery, which it can reduce at any time to stifle American competition and capture our home market.

I was informed of that condition in a letter, and I doubted it. I said, "It can not be possible that this wide differential exists," and I was desirous of having actual figures. It was shown in the Reynolds report that these differentials in price were not so great and that this tariff would appear too high upon those figures. So, in order that I might have an investigation made of the articles in the Reynolds report which actually represents the invoices of the chinaware by the numbers of the invoices, identified in that way, I called in the aid of the men who appraised these articles and I asked them to make an analysis and an investigation of that situation. I submit for the RECORD their tabulation of this condition.

These tables are as follows:

China and earthenware.

TABULATION 1.

Item No.	1 Articles.	2 Country.	3 Unit of quantity.	4 Foreign value.	5 Landed charges.	6 Selling price of imported article in United States.	7 Selling price of comparable domestic article.	8 Rate required to equalize, allowing reasonable profit.	9 Senate rate	10 Actual overhead and profit on landed costs.	11 Profit and overhead allowed on landed costs.

TABULATION NO. 3.

RELATION OF GERMAN CHINA HOME MARKET VALUE AND EXPORT VALUE AS OF AUGUST 1, 1921.

The basis of comparison is the pre-war German mark at a fixed value of $0.25 to the mark, or 4 marks equal $1.

Home market value is 15 times the prewar mark value, or 15 times 4 marks equal 60 marks.

Export value is 150 per cent above prewar value, or $1 plus 150 per cent equals $2.50; therefore, 60 marks home value equal $2.50 export value.

Gold value of the mark as of Aug. 1, 1921	$0.01234
60 marks home value at	.01234
Equal	.74
Export value as of Aug. 1, 1921	2.50
Home gold value	.74
Difference	1.76

$1.76 divided by $0.74 equals 237.8 per cent.

Export value exceeds home value by 237.8 per cent.

TABULATION NO. 4.

1 Articles.	2 Country.	3 Manufacturer.	4 Consular invoice No.	5 Invoice date.	6 Invoiced export value.	7 Home value.	8 Export value exceeds home value.
							Per cent.
White china tableware	Germany	Hutschenreuter	1408	Mar. 20, 1922	$908.35	$218.00	316.5
Do	do	Gunthersfeld	1731	Mar. 30, 1922	273.05	60.07	354.5
Decorated china tableware	do	F. Thomas Zeb Schezer & Co.	2429	Mar. 18, 1922	383.61	88.23	335
Do	do	Kahla	1733	Mar. 30, 1922	605.19	151.29	300
Do	do	do	1929	Apr. 11, 1922	2,209.08	508.09	335
Do	do	Tirscheureuth		Mar. 29, 1922	3,628.70	762.03	376

Mr. FRELINGHUYSEN. Two of these tabulations are based upon the actual invoices in the Reynolds report of importations coming under paragraph 212 and also actual importations coming under paragraph 213, both of which are covered by these items.

Tabulation No. 1 shows averaged prices of imported earthenware and chinaware and similar competitive domestic ware taken from the Reynolds valuation report for each kind of ware in dozen lots and sets from various countries. These prices are of August 1, 1921. Column No. 11 shows overhead and profits importers should be allowed in arriving at a fair rate of duty to equalize the competitive differences between the foreign and domestic wares. After conferences with Examiner Tuescher, of New York, and Examiner Koch, of Baltimore, the overhead and profit was placed at 33⅓ per cent on landed costs, including duty, although the examiners believe that 40 per cent would be closer to the necessities of the import china business. Column No. 8 shows the rates of duty that would be required to equalize the competitive differences that existed at the time

the Reynolds investigation was made. While that profit is figured at 33 per cent, the actual overhead and profit runs as high as 91 per cent and the lowest is 20 per cent. Who gets it? The importers who sell these goods at these prices with these immense profits. Why did not the Senator, when he sent to the Internal Revenue Department, ask for the income-tax returns of the importers and the department stores who are making such extortionate profits?

Tabulation No. 2 represents items 3, 7, 9, 13, and 14 of tabulation No. 1. These prices are the home prices of the German wares of August 1, 1921. The export prices to the United States were 238 per cent higher than the German home prices.

In other words, the wares sold to the people of this country were at a price 238 per cent higher than they were sold for consumption in Germany.

In the tabulation "Earthenware," in paragraph 212, and "Decorated earthenware," in paragraph 212, we find column No. 7. This is compiled by the customs appraisers.

Rate required to equalize, allowing reasonable profit on white earthenware is 428 per cent. Senate rate, 45 per cent.

Decorated tableware: Rate required to equalize, 370 per cent. Senate rate, 50 per cent.

White china hotel ware, in paragraph 213: Rate required to equalize, 364 per cent. Senate rate, 60 per cent.

Decorated hotel ware: Rate required to equalize, 286 per cent. Senate rate, 70 per cent.

Decorated dinner ware: Rate required to equalize, 247 per cent. Senate rate, 70 per cent.

Tabulation No. 3 shows the formula in effect August 1, 1921, to arrive at the percentage differences between the home prices in Germany and the export prices to the United States.

This formula, which was fixed by the Germany pottery syndicate on December 21, 1919, is the basis upon which all goods are sold for export.

Tabulation No. 4 is very interesting. It gives a series of recent invoices, showing the actual differences now existing between the home prices and the export prices to the United States of German wares. It will be noted that the export prices to the United States are now between 300 and 400 per cent higher than the home prices.

I take just one, consular invoice 1408, white china tableware, from the Hutschenreuter factory in Germany. Invoice date, March 20, 1922. The invoice export value was $908.35. The home value, for which the article was sold to the consumers in Germany, was $218, or a difference of 316.5 per cent.

I will not enumerate them all, but I will take the other article covered in paragraph 213, decorated china tableware. Here is one from the Kahla factory. The invoice number is 1929, date April 11, 1922. Invoice export value, $2,209.08. Home value, $508.09, or 335 per cent above the home value.

Here is another where there is a still wider differential, the Tirschenreuth factory, decorated tableware, without number. Date, March 29, 1922. Invoice export value, $3,628.70. Home value, $762.03, or 376 per cent difference between the price the manufacturers ask for these goods at home and the price at which they export them to the United States. Yet they are below our prices here.

Let us now turn to Japanese china, which has been mentioned. The Senator from New Mexico has stated that the people prefer it in their homes for its beauty—that they want to buy it. I think he stated that it was not as durable as American china. I think it would be a good plan to educate the people to buy American china, because it would be more economical, being more durable. But imagine our putting Japanese china in the White House. We have the Lenox pottery there, the finest pottery in the world, made in this country, comparable with the best English china manufactured in those ancient potteries on the other side. Let us see what these customs appraisers found out about Japanese china:

JAPANESE CHINA.

Imports of Japanese china in 1921 far exceeded in value imports from any other country. In 1919 Japanese imports totaled $1,827,435, increasing to $3,877,020 in 1920, but declining to $3,121,765 in 1921. Total imports of Japanese china in 1914 were valued at $1,267,091, remaining fairly constant until 1918, when imports increased to $2,133,121.

In volume the imports in 1920 and 1921 slightly exceeded those of 1914. But a small proportion of chinaware from Japan is comparable to the wares manufactured in the United States, and its comparability exists only in regard to dinner ware and some hotel ware. I note that under these prices Japan and Germany have in many instances outfitted many of the hotels which buy china in large quantities. Under this tariff the American manufacturer has not been able to compete in the home market with Japanese and German china, and I have some illustrations of that.

Only four items of dinner ware and one item of table ware—cups and saucers—comparable to domestic ware are set forth in the report. These items were selected as typical, though one of them, the item marked with an asterisk in tabulation No. 1, is a second. Mr. Tuescher believes that only 15 to 20 per cent of the dinner ware imported from Japan is comparable to domestic ware. The balance of the Japanese wares are typical of the country, and while some of them may be competitive in a displacement sense, the greater portions are probably purchased in this country for their oriental qualities and effects. They do displace American china produced in American factories.

Considering the items alone in the Reynolds report, 70 per cent does not equalize the competitive differences, as shown in tabulation No. 1.

This information is from the customs appraisers' report, and I am referring to paragraph 213, covering item No. 11.

It would require 98 per cent to equalize the difference between the Japanese import price of cups and saucers and the American selling price.

It would require 73 per cent as to dinner ware.

It would require 130 per cent as to dinner ware, seconds.

That is the estimate and analysis made by the customs inspectors who pass on this. Now, let us see about Czechoslovakia.

Decorated china imported from Czechoslovakia totaled $194,170 in 1920, as compared with importations from the Bohemian pottery district, formerly a part of the Austrian Empire, amounting in 1914 to $532,000. Allowing for the advance in value over 1914 prices, the volume imported in 1921 is about 20 per cent of 1914 quantities. In regard to these importations it will be noted in tabulation No. 1 that the Senate rate of 50 per cent on decorated earthenware falls far short of equalizing the competitive difference; 118 per cent is necessary; while on decorated china the figures show that but 52 per cent would be required.

Imports of decorated German china for several years prior to the war averaged $3,000,000, declining to $2,352,970 in 1915 and $15,600 in 1917. It is true they were insignificant; but importations were resumed in 1919, reaching a total of $671,756. At the beginning of the year 1920 the export price on German china was established, but the statistical value of importations for this year, amounting to $799,750, was based on German home-market value, which was about 50 per cent of the export price. In 1921, however, total imports valued at $1,902,320 were based partly on home and partly on export value. They were steadily increasing. Of this amount approximately $430,000 was imported during the first five months of the year, and entered on the basis of the home-market value. The balance was entered at the export price, the equivalent home-market value of which was approximately from 25 per cent to 40 per cent of the export price, varying according to the fluctuations in the exchange value of the German mark. The volume of imports in 1921 was, therefore, about one-third the average annual pre-war imports.

The export price prior to August, 1921, was 150 per cent above pre-war values, subsequently reduced to 87½ per cent, which is at present from 300 to 400 per cent above home-market gold value. This reduction in export values enabled the German manufacturers to meet the change in the basis of valuation for dutiable purposes as embodied in the emergency act of May, 1921.

As the export value at the present time averages from 300 to 400 per cent above the home-market value, it is apparent that the rate of the Senate bill for china and earthenware could readily be met by a counter reduction in the export price, destroying our domestic market entirely if the Germans so desired.

Their export price is just under our domestic manufacturing prices but with a differential between the cost of production and the selling price over there; they can simply lower that export price and meet almost any competition and duties levied.

Mr. JONES of New Mexico. Mr. President, I should like to ask the Senator why it is that Germany is not sending more of that ware to this country if there is such a margin of profit in it.

Mr. FRELINGHUYSEN. I think she is. I think I have just read that she has gradually increased her imports. I think my previous figures show that she increased from $15,000 in 1917 to $1,902,000 in 1921.

Mr. JONES of New Mexico. Germany is not sending to the United States anything like the quantity she was sending here prior to the war.

Mr. FRELINGHUYSEN. Oh, no.

Mr. JONES of New Mexico. Why should she not send as much and a great deal more if there is such an enormous advantage in the present conditions over the pre-war conditions?

Mr. FRELINGHUYSEN. Mr. President, the history of these importations shows a progressive increase from 1917, and Germany is prepared, with this great power she has in this cartel agreement, whereby she simply keeps up prices above her home market prices and is enabled to flood this market, and I do not want her to do it. I want to protect the American products. That is what my argument is based on, and while the importations from Germany have not reached those prior to the war, they are gaining by leaps and bounds, and they have this differential export advantage. That is the point I am making in justifying these rates.

Should the German manufacturers reduce their export price to the present status of their home market value, it would necessitate the imposition of an ad valorem rate of from 300 per cent to 500 per cent. Tabulation No. 2 shows the rates that would have been required at the time the Reynolds investigation was made had the German wares been invoiced at their home prices. The export values at that time were 238 per cent higher than the home values.

Mr. JONES of New Mexico. Mr. President, will the Senator yield for a question?

Mr. FRELINGHUYSEN. I yield.

Mr. JONES of New Mexico. I ask the Senator how he expects to remedy that situation by an increase of the tariff to the amount which he is suggesting? If those conditions exist without the modification or limitations, why will an increase of this tariff above the present rate to that proposed affect the situation at all, so far as Germany is concerned?

Mr. FRELINGHUYSEN. I want to be fair about this. Undoubtedly the German production costs will increase. Germany will not continue to have these low protection costs, but I doubt whether 70 per cent—even when Germany gets back to normal—will be sufficient to protect the American manufacturer against German competition. But it is a rate that was fixed as the basis of a fair average, and it undoubtedly is not too high, judging from this very alarming record.

Now, Mr. President, there is a statement regarding English china and French china which I shall not read in detail, but which shows that the imports of decorated china in 1914 from England were valued at $1,181,000, and that they have decreased to $256,000 in 1919. As the 1919 values were practically 100 per cent higher than those of 1914, the actual volume in 1919 was but 10 per cent of the 1914 values. In 1920 the imports amounted to $567,424, indicating that the imports were about double those of 1919 and 20 per cent of those of 1914.

Imports of decorated English china in 1914 were valued at $1,181,000, declining to $484,225 in 1915 and $256,260 in 1919. As 1919 values were practically 100 per cent higher than those of 1914, the actual volume imported in 1919 was but 10 per cent of the 1914 quantities. In 1920 imports amounted to $567,424, indicating that the volume was about double that of 1919 and 20 per cent of 1914 imports. Imports in 1921, totaling $648,659, show a comparatively slight increase in values over 1920 imports. This shows an appreciable increase in volume, as the difference in value is attributable to the rise in sterling exchange, materially increasing the landed costs at the present time.

French china is considered fairly comparable with the vitrified china made in this country. Imports of decorated ware in 1914 were valued at $1,439,780, dropping to $879,820 in 1915, and remaining fairly constant to the year 1918, in which year imports amounted to but $572,884. Following this decline in value, imports in 1919 increased to $731,036, again followed by a decline in 1920 to $578,267, while in 1921 values increased to $861,462. The volume of French china imported in 1921, taking into consideration the increase in unit values over 1914 prices and the average exchange value of the French franc during that year, is approximately one-third that of shipments imported in 1914. Tabulation No. 1 shows that a 70 per cent rate on French china is justified.

The aim of a rate of duty should be to take care of the greatest competitive difference, not the smallest. These high competitive differences expressed in rates can be summed up as follows:

Tabulation No. 1.

	Per cent.
No. 8. Czechoslovakia: Decorated earthen tableware	118
No. 11. Japan: Decorated china tableware	98
No. 16. Japan: Decorated china (dinner ware, including "seconds")	81
No. 17. Japan: Decorated china (dinner ware, not including "seconds")	73
No. 18. Japan: Decorated china (dinner ware "seconds")	130
No. 19. France: Decorated china (dinner ware "seconds")	70

Tabulation No. 2.

If export prices fall to home level:	Per cent.
No. 3. Germany: White earthen tableware	428
No. 7. Germany: Decorated earthen tableware	370
No. 9. Germany: White china hotel ware	364
No. 13. Germany: Decorated china hotel ware	286
No. 14. Germany: Decorated china dinner ware	247

Mr. President, I was somewhat amazed last night when the Senator from New Mexico spoke of the enormous profit of the pottery industry and when he read that résumé of the income-tax report I thought that the profits were unusually large. But upon investigation I found that of the eighty-odd million dollars he mentioned $36,000,000 was the amount of the product represented under these two items. The Senator did read some income-tax return figures showing that the net income on the china and earthen ware business in 1920 amounted to 32 per cent. I was somewhat interested to know how those figures were compiled, and so I called this morning at the internal-revenue office and asked Mr. Blair upon what basis the figures were compiled. Mr. Blair sent for the income-tax statistician, Mr. White.

Mr. White stated that he had received a letter from the Senator from North Carolina [Mr. SIMMONS], in which certain figures were asked for, and I asked him to show me a copy of that letter. Of course, I felt that I had a right to secure it, inasmuch as the majority members of the committee had not been furnished with these figures. I think Mr. Blair has a right to reveal income-tax figures, although I understand there is a restriction against it in law. I understand there is some policy of giving the figures of industries grouped, and I intend to investigate that, because the Ways and Means Committee have steadily refused to allow industrial figures to be revealed that might be used in competition. However, I shall pass that by, because I feel the Senator was engaged in a sincere and honest endeavor to get at the truth.

But the statement submitted does not fairly represent the profits of the industry. Net income is not profits, and these figures were taken out of the maximum year. Other years have shown a loss and still other years small profits, and over the entire period I am informed that the average net earnings are about 10 per cent.

I do not believe the Senator from North Carolina will have any objection if I read the letter he wrote. I only desire to read the items which he requested. I do not believe I violate any privilege. May I ask the Senator if he has any objection to the letter being read?

Mr. SIMMONS. Oh, no; I have not. I do not recall the letter, but I have no objection to the Senator reading any letter I may have written.

Mr. FRELINGHUYSEN. It is in order to clarify the schedule. I read:

The following information is desired on the several industries mentioned below—

I call attention to this—

taking a representative number of the largest manufactures from each industry.

A representative number of the largest manufactures, but not all of them. This was presented last night as representing 340 industries in the country engaged in this business and every grade of pottery under the sun.

The names of the manufacturers, of course, need not be given. Capital invested, production, sales, and net profit for the following years: 1914, 1919, 1920, and 1921.

I asked the statistician to send to Mr. Blair, the commissioner, a statement of how this data was compiled and what portion of the industry it represented. I have received this letter from Mr. Blair to-day:

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER OF INTERNAL REVENUE,
Washington, May 25, 1922.

Hon. JOSEPH S. FRELINGHUYSEN,
United States Senate.

MY DEAR SENATOR: Relative to the data compiled in response to the request of the Hon. FURNIFOLD MCL. SIMMONS, copy of whose letter is attached hereto, I desire to say that the information submitted for the several industrial groups requested by him, among which is the chinaware and earthenware industry, was transcribed from the returns of net income filed by corporations for excess-profits tax purposes, and was limited to the following:

First. Those whose predominating business conformed to the industrial classification.

Second. Only those reporting net income.

Third. Only those whose returns were available for each of the years 1920, 1919, 1918, and the pre-war period (1911, 1912, 1913).

Fourth. No consolidated returns embracing subsidiaries engaged in diversified businesses.

The information gave the data as reported and before audit or adjustment, and as the amount of tax was not requested it was not furnished.

The tabulation respecting the chinaware and earthenware manufacturers embraced 36 concerns, whose total invested capital for 1920

amounted to $13,480,865 and whose net income aggregated $4,416,430. The total tax of these concerns was $1,331,929, the gross sales amounted to $27,294,995, and the cost of goods $18,124,615.

In other words, those who reported no net income, those who practically had no profits, were eliminated from these figures, and those are the ones we are trying to protect. It is claimed that 25 per cent is not an unusual profit in this industry. Why? It is because it has rapid annual fluctuations. It is a technical industry, highly technical, highly artistic. A mistake in the manufacturing process may cause a great loss. Therefore, with that hazard and that risk, it is conceded that 20 to 25 per cent is a fair profit, considering, too, the fact that they have the years of depression as well.

But, Mr. President, 32 per cent net income does not represent the average net income, because there are double the number of factories beyond those reported in these figures, and therefore, if the Senator had wished to be fair, he would have asked them to give a report on the entire industry and not eliminate half or more of the industries. I am told that this represents only one-tenth of the entire pottery industry and only those which reported excess profits. Is that fair? Is that accurate? Does it truly represent the condition of the entire industry? I claim that it does not.

Now, let us see what Mr. Blair said:

As stated above, the concerns listed were those which filed returns for excess-profits tax purposes; that is, their net income required the submission of data relative to their invested capital, and were limited to those for which comparative data were available for prior years, and contained, with a very few exceptions, no returns other than those reporting net income. The group in the chinaware and earthenware industry for 1920 did not contain any concerns other than those reporting net income.

Sincerely yours,

D. H. BLAIR, *Commissioner.*

Mr. President, the question of profits is one that leads us into a speculative realm and is confusing. I have discussed many figures this afternoon. I dislike to discuss them because they are confusing. These figures were compiled by men who have searched the actual records and the actual invoices, and I challenge anyone to show, with the present condition as it exists in regard to German export values, that 70 per cent is an excessive duty upon chinaware—with that condition menacing this great industry in the country, with 14 or 15 States concerned in its production, and over 100,000 people dependent upon its prosperity.

But let us look into the condition of the German factories. I have here a translation from the Berliner Morgenpost of May 7, 1922, which I wish to read:

TINKLING DIVIDENDS.

PROFITS IN POTTERY.

A noisy wedding-eve demonstration was at one time regarded, to a certain extent, as an essential preliminary to a happy marriage. Glass and broken porcelain, including undamaged pieces, were sacrificed to that end, and no account was taken of a few pieces of pottery, more or less, costing as they did only a few marks. But times have changed.

To-day a bridal couple is contented if they can provide themselves with the most necessary things in this line. Monstrous prices prevail. A table set, such as is beyond the means of the majority of those about to marry, demands many thousands, while few can entertain the idea of buying luxury articles. The pottery factories are to blame for this condition in completely neglecting domestic needs—

They are exporting the high-priced pottery—

Practically, only necessary goods are being turned out, the production of luxury articles for domestic use being reduced to a minimum.

The enormous outlays which must be incurred to-day in buying pottery find their explanation, in part, in the following table, showing a persistent advance in the dividends of the large pottery works:

Factory.	1921	1920	1919	1918
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*
Hutschenreuther	25+15	20	17	17
Kahla (t31+13)	33+13	35	25	20
Koenigszell	25+10	25	15	12
Rosenthal	50	30+20	30	25
Schomburg	48	20+20	20+20	20+15
Schoenwald	20	15	10	6
Volkstedter	24	18	16	12

Notwithstanding these beautiful returns, the pottery industry complains; it complains of impossible wages and of inadequate domestic profit. It has recently—perhaps because it regards the situation as altogether too sad—again increased prices by 33⅓ per cent. As a matter of fact, however, the pottery industry is doing splendidly. It has the advantage over other branches of industry of being dependent to a relatively small extent upon foreign raw material. The necessary quartz is obtained in Germany and only certain varieties of earth and feldspar have to be sought abroad, the former from Czechoslovakia, the latter from Sweden and Norway. The industry is very well occupied on domestic orders, but its chief interest is plainly devoted to foreign trade. This throws into its lap enormous exchange profits, seeing that, in accordance with a resolution of the association, only foreign currency can be applied to export-sale transactions. The sale of German pottery to northern countries, to the United States, and to South America has recently made great strides, and the large firms are devoting themselves more and more to establishing sales agencies abroad.

A careful study of the above table will lead many to inquire, not wholly without reason, whether it is unavoidably necessary to pour out dividends of 50 per cent to the stockholders. Should it not be possible for the pottery association, responsible as it is for the fixing of domestic and foreign prices, to maintain the former at a reasonable level in view of the large profits accruing from the latter?

Mr. President, we have here stated from the Berliner Morgenpost of May 7, 1922, the dividends of the German potteries, showing that the foreign business is developing and that they have made these huge profits out of it. I have no objection to Germany doing business here, but I first want the American market to be commanded by American factories. The committee has tried to fix the rates imposed in the pending bill on a fair basis, considering the prices of the imported article and the domestic selling prices of the American article. Pottery is one of the largest industries of my State, employing some 7,000 hands, and, as a representative of that State, I want the industry fairly and adequately protected. Under the figures I have presented it would be necessary to accord a protection of over 100 per cent, but I think, in the adjustments of time and the restoration of normal conditions, 70 per cent eventually may protect the industry. It will not do so now; but I claim that, with the low exchange values abroad and the present condition of the European market and the great danger of flooding the American market with these foreign goods, our first duty is to protect the American industry and not the foreign importer and the American retail department store.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a table showing landed cost, duty-paid, under the proposed rates of imported pottery ware.

The PRESIDING OFFICER. If there is no objection, it is so ordered.

The table referred to is as follows:

Actual landed cost, duty-paid, based on rates as proposed in the Senate bill of imported pottery ware, together with American wholesale selling price at factory of similar and competitive American goods.

[The German prices are actual sale prices in Germany and not the export price, which is 150 per cent higher.]

Country.	Description of foreign article.	Unit.	Foreign value in United States currency.	Amount of duty.	Freight, transportation, and insurance charges.	Total landed cost, duty-paid.	American factory selling price similar article.
	EARTHENWARE, UNDECORATED. (Proposed rate 45 per cent.)						
Holland	White cups and saucers	Dozen	$0.719	$0.323	$0.162	$1.204	$1.71
Germany	do	do	.192	.086	.18	.458	1.61
Holland	White plate, 9-inch actual	do	.563	.253	.126	.942	1.40

Mr. JONES of New Mexico. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SHORTRIDGE in the chair). The absence of a quorum is suggested. The Secretary will call the roll.

The principal legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Frelinghuysen	McKinley	Simmons
Ball	Gooding	McLean	Smith
Borah	Hale	McNary	Smoot
Brandegee	Harris	Moses	Spencer
Broussard	Harrison	Nelson	Sterling
Bursum	Johnson	New	Sutherland
Calder	Jones, N. Mex.	Newberry	Swanson
Capper	Jones, Wash.	Norris	Townsend
Cummins	Kellogg	Oddie	Underwood
Curtis	Kendrick	Overman	Wadsworth
Dillingham	Ladd	Pepper	Walsh, Mass.
Elkins	La Follette	Phipps	Warren
Ernst	Lenroot	Poindexter	Williams
Fletcher	Lodge	Sheppard	
France	McCumber	Shortridge	

The VICE PRESIDENT. Fifty-eight Senators have answered to their names. A quorum of the Senate is present.

Mr. JONES of New Mexico. Mr. President, I merely wish to say a word, and I hope that inside of two minutes, or not much longer than that, we may be able to get a vote on the amendments in the pending paragraph. With regard to the criticism by the Senator from New Jersey of the statement which was received from the Treasury Department as to the profits of the ceramic industry or that part of it engaged in producing earthenware and chinaware, I have only this to say, that the Senator from North Carolina made a request of the Treasury Department to select the representative concerns so as to portray the conditions in the industry. I think we had a perfect right to rely upon what the Treasury Department furnished in response to the request, and I do not believe that the criticisms of the Senator from New Jersey have met the situation at all. Of course, he mentioned some concerns that did not return any profits, but the Treasury Department was requested for returns of corporations representing the industry, and that was the information which was furnished. However, it is not contended that the industry is not in a prosperous condition.

Mr. President, there is only one other point attempted to be made by the Senator from New Jersey. He had some information, which does not appear in this record, to the effect that owing to the cost of wages, and so on, in Germany it would require a tariff ranging from 200 to 600 per cent to equalize the difference in the cost of production here and in Germany. I can simply reply to that by saying that if that is the situation

to be met this bill does not meet it at all, and there is no use in presenting an argument of that sort. It simply renders puerile any attempt of this kind to meet that situation if that is so; but I think that the competition from Germany should not be determined by any outside information as to the potentialities, but there are practical things to be considered—the question of quantity production, for example. How much of this can Germany produce? How much is Germany producing? She has her limitations on output, and the proof of that is in the amount of the wares arriving in the United States. If there were four, five, or six hundred per cent profit in sending those goods to the United States, and if there were no limitation upon the quantity of production, this country would be flooded with those goods at present prices.

The truth is that Germany is sending to this country to-day in money value only 60 per cent of what she sent here in 1913, and admittedly the prices to-day are two and a half times what they were in 1913; so Germany with all these advantages, theoretical or imaginary, is sending to us to-day only 60 per cent in value, and calculating that on the basis of 2½ to 1 we are bringing in from Germany of these wares just about one-fourth of what we were before the war. Where is the great menace from that practical side of the proposition?

There must be something beyond these figures which are stated here, factors to which I referred earlier in the day—a lack of fuel, a lack of something else—because, if I know the German character, if the German manufacturer saw a profit of 600 per cent, and had the facilities with which to produce the commodity, he would be flooding this market; but here, three and a half years after the war, he is only sending in 60 per cent in value and about one-fourth of the quantity of the wares he was sending over here in 1913.

Mr. President, it is admitted also that those wares are selling in the American market to-day, under existing law, for a higher price than the alleged comparable American article. Why should this duty be increased? If you accept the major premise, you want a duty here of three or four hundred per cent; but what you are going to do is to shut out England altogether, shut out France altogether, and turn the market over to Germany, what little will be left. That is what this means, because the English importations are decreasing, notwithstanding our high prices. The French importations are decreasing, notwithstanding these prices. The Senator referred to Japan. Japan is sending more ware in here to-day, measured in dollars, than prior to the war; but in quantity Japan is not sending in as much now as she was prior to the war.

Mr. President, the necessity for this increase of duty is not apparent.

The Senator from North Dakota [Mr. McCUMBER] the other day, in a very considerate statement, dismissed from his mind any apprehensions with regard to Germany. Talk about the cartel system in Europe. It relates only to Germany. I read an article this morning from the April 22 supplement to the London Times, showing that the costs in Germany now are just about on the world's level.

Wages have been increasing 20 and 30 and 40 per cent a month. All cost prices have been mounting, mounting, and it goes without saying that in any country in a short time the commodities must become stabilized with world conditions. When exchange is dropping, dropping, dropping—of course, measured in the currency of the particular country—there is an advantage; but when you stop somewhere, as the drop in German currency has stopped, you soon reach the world level of prices, and that is just what is being done in Germany to-day; and according to the statistics of the Federal Reserve Board, so far as textiles and leather goods are concerned, they are above world prices in Germany to-day with the low-value mark. In other words, the prices of those commodities in Germany to-day are 89 or 90 times the prices prior to the time when the mark became depreciated, whereas even at the present price of the mark the depreciation has been only about 70 to 1.

Mr. President, I do not care to detain the Senate any longer, but I want to say this:

The Reynolds report has been referred to here. I have had some calculations made upon that report showing the import value of these wares from these different countries, and I have figured out the necessary percentage of tariff which would be required to meet the differential in prices. Mark you, the goods are selling in the United States above the domestic price; but in the importation, and so on, and the prices on which duty is levied there is a difference in some instances, and I want to show just what it is, figuring the importer's overhead and profit at 33⅓ per cent of his landed cost. These figures are based upon that.

As to that I want to say that where the importation is of a staple kind and there is a quick turnover the importer's profit is very much less than where a specialty comes in and is kept in the warehouse or on the shelves for some period of time before it is turned over. If it is a novelty, the same thing may be said, and everybody as to such commodities as those charges a higher profit than otherwise. If they are fashionable or seasonable goods, the turnover is slow, and when the season is over what remains must be thrown away, and there must be a high overhead on such commodities as those; but the general level of charges for overhead and profit of the importer is 50 per cent on his landed cost or 33⅓ per cent of his selling cost. On that basis here is what I find, taking these various commodities from the Reynolds report.

First, take these things coming from France. There were 12 samples taken in the Reynolds report, and I have taken here the average of those 12 samples. I find that the foreign cost average was $22.50; the landing charges, $1.22; the landed cost without duty, $23.79; the average selling domestic price, $52.41. Deducting from that 33⅓ per cent as the overhead and profit for the importer leaves the value of the American ware at $34.94, a differential of $11.15, and in that case 50 per cent of duty is indicated.

In the next case—that is, a 100-piece dinner set——

Mr. FRELINGHUYSEN. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from New Jersey?

Mr. JONES of New Mexico. I yield to the Senator.

Mr. FRELINGHUYSEN. I know that the Senator wants to be accurate. I asked the appraiser to figure that item, and he claimed that a 25 per cent profit was a fairer profit on that class of goods, and the differential would be 65 per cent.

Mr. JONES of New Mexico. Mr. President, I do not know that the witness of the Senator from New Jersey is entitled to any more credence than my witness on a subject of that sort. At any rate, I have taken the evidence furnished to me by people engaged in the business, who tell me what it is, and I do not have to depend upon some customs official to tell me what it ought to be.

Mr. FRELINGHUYSEN. I will name my expert if the Senator will name his.

Mr. JONES of New Mexico. I have no objection to that, but I do not think we are testing here the credibility of witnesses; but I want to say that if the Senator from New Jersey is framing a tariff bill upon a foundation of that sort, if that is all that he has on which to base his claim for this increase in tax, I think he had better try to hunt up some other excuse.

Mr. FRELINGHUYSEN. Mr. President, I do not want to prolong the debate, but I think we can not get any better authority than the appraiser who knows the foreign selling price and the profits of the importers, as well as the domestic selling price, and whose duty it is to know those things.

Mr. JONES of New Mexico. I do not know of any better authority than the importer who has been in the business on a large scale for 25 or 30 years.

Mr. FRELINGHUYSEN. I am very glad that the Senator has mentioned the source of his information.

Mr. JONES of New Mexico. I am quite free to say that that is where it comes from, and I am quite free to say that I have talked with not only one of them but a number of them.

On a dozen plates, white china, not decorated, figuring on the same basis, indicates a duty of only 9 per cent to meet the differential. That is from France.

From Czechoslovakia, figuring in the same way, taking as a unit a 100-piece dinner set, the duty indicated is 35.5 per cent.

From Germany, on a unit of a 100-piece dinner set, it says that no duty is required. On a dozen plates, hotel ware, decorated, no duty is required. On a dozen china plates, not decorated, a duty of 21 per cent is all that is indicated. These figures are based on the prices on which the duties are levied and figured up, the actual transactions.

Let us take Japan: A duty of 57.7 per cent would be required on a 100-piece dinner set.

From England no duty would be required.

Those are all the countries from which it is claimed any ware is expected to come in. But I want to say this, in conclusion, to those Senators who were not here this afternoon, there is little, if any, of this ware actually comparable. The quality, as well as the design, differs with respect to the domestic ware, and the wares from the different foreign countries have their peculiarities. It is a matter of taste; it is a matter of choice.

In the Reynolds report, in order to find any so-called comparable article with which a comparison could be made, the investigator added the original 10 or 20 or 30 or 40 per cent, so

that in his judgment it would equalize the thing. You can not equalize taste and choice of the housewife in any such manner as that. She knows the kind of a decoration she wants and the quality of ware she wants, and in a commodity of this sort, where it involves the artistic temperament of the people in this country, the women particularly, do you want to try to regulate price by a tax?

I move, in paragraph 212, on page 36, line 12, to strike out the numerals "45" and insert "35." That is the present duty on that class of wares.

Mr. McCUMBER. Mr. President, I would especially like to have the attention of this side of the Chamber for about five minutes in presenting a situation which arises under the two paragraphs which have just been discussed, and which, I think, should have the attention especially of those Senators who think that in some instances we have made rates that were seemingly high.

I first want to call attention to the tariff rates in the three tariff bills in relation to these two particular paragraphs, and especially to call attention to the fact that although the cost of production in this country has enormously increased in proportion to the cost of production of our competitors, we have made very little difference in the matter of rates of duty.

We will take paragraph 212, covering earthenware. Under the Payne-Aldrich law the duty on the not decorated was 55 per cent. Under the Underwood law it is 35 per cent, and in the Finance Committee amendment the rate is 45 per cent. In other words, the committee rate is 10 per cent ad valorem less than the Payne-Aldrich rate and 10 per cent more than the Underwood rate. The Payne-Aldrich law levied a duty of 60 per cent on the decorated, the Underwood law 40 per cent, and the committee reports in this bill a rate of 50 per cent.

Mr. JONES of New Mexico. Mr. President, may I make the suggestion that under the Payne-Aldrich law these two paragraphs were combined, according to my recollection.

Mr. McCUMBER. But the rates were the same.

Mr. JONES of New Mexico. The rates were the same under both paragraphs in the Payne-Aldrich law.

Mr. McCUMBER. In other words, whether decorated or not decorated; and I am giving the rates.

Mr. JONES of New Mexico. Between the decorated and the nondecorated, or between the vitreous and the nonvitreous, there was no division in the Payne-Aldrich law.

Mr. McCUMBER. The Senator is mistaken when he says there was no division. There was a division, although they were all in one paragraph. Each one was described, and I am giving the Senate exactly what the rates were, if the Senator will now allow me to proceed.

Mr. JONES of New Mexico. The Senator is right about the rate. I am not undertaking to controvert that.

Mr. McCUMBER. That is what I am speaking of now.

Mr. JONES of New Mexico. What I meant to say was that on the cheaper wares the rate under the Payne-Aldrich law was as high as the rate on the more expensive articles.

Mr. McCUMBER. Yes. I will give the rates again. On earthenware, decorated, the Payne-Aldrich law levied a rate of 60 per cent and under the Underwood law it was 40 per cent. The committee now reports in this bill 60 per cent.

Let us take china, mentioned under paragraph 213. Under the Payne-Aldrich law the not decorated carried a duty of 55 per cent. Under the Underwood law it carries a duty of 50 per cent. Under the committee bill it carries a duty of 60 per cent, which is 5 per cent more than the Payne-Aldrich rate and 10 per cent more than the Underwood rate.

In the matter of the decorated the Payne-Aldrich law carried a duty of 60 per cent, the Underwood law a duty of 55 per cent, only 5 per cent difference, and the committee bill carries a rate of 70 per cent.

Thus it will be seen that the rates which we report range all the way from 45 to 70 per cent. Seventy per cent seems to be a rather high duty, but I want the Senators to look the situation squarely in the face. The Senator from New Mexico quoted the statement which I made a few days ago, and, of course, quoted it accurately, the substance of which was that in at least the matter that was under discussion I felt that Germany would not attempt to drive down the market to an extent that she would drive the American industry out of existence, because she would make more by unholding the high prices which she was receiving in that market.

Where the field is small and is capable of absorbing both the imports and the American products at these high prices, I do not think there will be a great deal of danger of driving the American product out of the market, even though the German may be able to do so. But where the field becomes very important, and one of the competitors can increase his product in such quantity that he could cover, if necessary, the entire field, and drive the other competitor out of that field, that might present an entirely different question.

This forenoon I started to ask the Senator from New Mexico a question, based on a certain state of facts, and get his reply to it. The Senator declined to yield at that time, and while it would not have been important to have presented the situation to the Democratic side, I want to present it to the Republican side.

Let us take such a business as we have here in the pottery and chinaware industry in the United States. Let us assume that Germany can manufacture and sell at home, with a reasonable profit, a dinner set, we will say of 100 or 150 pieces, for $100. American manufacturers can manufacture and sell practically the same set, at least of the same inherent value, for $400. Germany exports those to the United States, but the German Government says to the manufacturer, "You have got to put an export price on that article which will amount to 200 per cent, in addition, and sell that to the American market for at least $300, plus the duty"—which we will say, at 30 per cent, would be $90—"and that will give you the profit you are making on selling it for $100 and $10 in addition to that, and then you will divide with the Government this $210 profit."

The German Government, as I stated, wants the gold. She needs the money, and under the present situation I do not believe she is going to drive down the prices in the United States to such an extent that she will lose by it. But here is the situation we must meet. We are making this bill, not for the year 1922 but maybe two, three, or four years, and possibly longer. Here, then, is a situation to meet. The Senator from New Mexico said there was no such condition, and that therefore it was a waste of time to argue the matter upon any such hypothesis. Let us see about that.

The Senator from New Jersey has already read into the RECORD some of the facts and figures obtained but a few days ago from the appraisers of merchandise which had been imported into the United States, getting the selling price in Germany, the export price from Germany, and the price for the comparable American article.

I will refer to only one or two. Here is an article whose export invoice price is $908.36. The price at which it is sold in wholesale quantities at home was $218. The export price exceeds the home price by 316 per cent. Do you not see that the German merchant, if the Government will allow him, can reduce that 316 per cent and yet sell at the same profit at which he is selling to-day in the home market? Can you not see that it is in his power, if in a year or two it seems to the Government's advantage or his advantage to take off this export price, or one-half or one-fourth of it, to drive the American manufacturer out of his own country?

Now, let us take another—white china tableware. These figures are taken from actual invoices. This one was on March 30, 1922, and is $273.05. The same article sold in Germany at wholesale for $60.07. That means 354 per cent over the home price. The German merchant, if his Government should take off his export price, can reduce his price $254 and yet sell it at a profit to the American consumer.

What are we going to do in these cases? I admit that under the present situation the German perhaps will say, "I can better afford to get this big profit for my country and for myself, and I will sell up to the American price now, and I will sell even above the American price at the present time." But can you not see that we are absolutely at the mercy of those manufacturers? Do we want to say to all of the Americans engaged in this business, "We will place you in a position where at any time you can be undermined and destroyed," or shall we give him what we consider might possibly be a proper protection in case there is a considerable lowering in the export prices of the product from Germany? That is a question that the American who believes in a protective principle must meet. We have given but 70 per cent.

I have another table which shows the per cent that must be required in case the German should take off the export price and sell for the home price. Let us take the same table, No. 2: If the export price fell to the home level on this white earthern tableware it would require a duty of 422 per cent to meet the American price; on decorated ware it would require 370 per cent; on white china earthenware, 364 per cent; on decorated hotel ware, 286 per cent; on decorated dinner ware, 247 per cent. We have given a duty that ranges from 45 to 70 per cent.

I do not know how long it will be before these heavy export duties may be taken off. I simply know that if they are taken off, the German merchant can absolutely destroy the American manufacturer. The only question is whether we shall go this slight per cent, 10 or 15 per cent, higher than the Underwood

rates and at least give that protection. That is practically all there is to it.

Mr. JONES of New Mexico. Mr. President, I merely wish to say that I have not been able to gather any such figures as the Senator from North Dakota has produced. I do not know where they come from or on what they are based. I do not know what the surrounding circumstances are, and I do not know the date when the trades were made, the rate of exchange, or anything of that sort surrounding the transaction. But if that is the situation in Germany, and if that is the situation which we have to meet, it should be done by an embargo or something of that sort, if you are determined to meet it, because this little increase in duty will not begin to touch that situation if it is a true reflection of the real situation.

Mr. McCUMBER. Mr. President, the Senator said he did not know where my figures came from. May I tell him?

Mr. JONES of New Mexico. I shall be delighted.

Mr. McCUMBER. The figures which I gave came from the New York appraisers of chinaware and earthenware.

Mr. JONES of New Mexico. May I inquire when the transaction occurred?

Mr. McCUMBER. I have all the dates of the invoices which I read.

Mr. JONES of New Mexico. I mean when the trades were made—when the orders were given.

Mr. McCUMBER. The invoices show the times at which they were purchased in Germany, and all of them are after March, 1922.

Mr. JONES of New Mexico. The invoices, if I am correctly informed, simply show the date of the exportation. They do not show when the trades were made.

Mr. McCUMBER. The invoice shows when the sale was made. It is not the date on which the ship leaves, necessarily; it is the date of the sale.

Mr. JONES of New Mexico. It is the date of the exportation that the invoice gives.

Mr. McCUMBER. Our duties of course are levied as of the date of the exportation.

Mr. JONES of New Mexico. If this is the basis of the bill, I think we had better go out of business.

Mr. McCUMBER. That is the question for us to decide.

Mr. JONES of New Mexico. Yes; that is the question. If the bill is intended to meet that situation with Germany, I am glad to know it. The distinguished Senator from North Dakota presented absolutely nothing to those on whom he relies for votes except this situation in Germany. I may add that that situation is the one thing that is always presented to us in the discussion of the bill if there is a yard or an ounce of the product coming from Germany.

I think it is a pitiful situation. Imagine the great Congress of the United States dealing with this situation in Germany. Just think what a puerile thing we are doing. If that is the purpose of the bill, we need not tire ourselves out here day after day. Does anybody believe that that is dealing with the German situation? If that is a true picture of the trade situation in Germany, if that is what we are dealing with, do we want to do this thing? Just seriously think of that. We are told here in solemn terms that Germany can produce these things for 300 or 400 per cent less than they can be produced in the United States, and now we are going to equalize that situation, we are going to meet that situation, and we will raise our tariff wall about 12 or 15 per cent higher.

I do not know what others think about it, but as for myself I would be humiliated to assume any such position as that. That is the situation we are going to deal with. We are solemnly told by the chairman of the Finance Committee that we have to deal with the situation in Germany, the only country to which he referred. We are told solemnly and assured that they have the proof that the goods can be produced there three or four hundred per cent cheaper than here, and now the great Congress of the United States, assembled here in solemn conclave to deal with the situation, raises the tariff 10 or 12 or 15 per cent.

It is humiliating to me to be a party to such a thing. I do not intend to be a party to it. I am going to vote against it. I would rather leave things just where they are now. We are not being hurt now, because the goods are not coming in. I would wait until I could find some logical remedy for the situation. The goods are not coming in. Germany is exporting to the United States in value, as I said awhile ago, only about 60 per cent of what she was exporting prior to the war.

Would a man really acting on business principles and for a business purpose undertake to consider a potentiality of three or four hundred per cent? Would he think of dealing with that at all by simply raising the tariff 10 or 12 or 15 per cent higher? When you have done this thing, how proud will you feel over it? It will be a great thing to accomplish that, to deal with the German situation in that way, to write such a record as that for your children to read, perhaps, in years to come. Go home and tell it to your constituents, that here was a great problem with which the United States Congress was dealing, confronted with the great problem that Germany can produce these goods three or four hundred per cent less than the United States. Now, as business men, as representatives of the citizens of this great Republic, we take up the solemn task of dealing with this subject, and what do we do? We raise the tariff 10 or 12 or 15 per cent. Who wants a record of that kind behind him? It will do you no good as a politician, because you have not met the situation. You have not shut out the German imports. If that is what you want to do, you have not accomplished it. Then, why do this thing? Is that writing a record of statesmanship? I ask you just to ponder for a minute on what you are doing. Where is the man who is going to be proud of that record?

Mr. SIMMONS. Mr. President, it seems to me very remarkable that after we have discussed this measure for over a month and a half upon the theory that the rates provided would be sufficient to protect the American producer against Germany—all our discussions have been with reference to German products—we are now told that the rates in the bill are about 200 per cent lower than they ought to be; that in order adequately to protect the American against the German producer we ought to have, instead of a rate of 70 per cent upon earthenware a rate of at least 300 per cent. That, too, is after the committee has let the country know and let the Senate know that the rates that it has fixed in the pending bill have been designed to meet the German situation. Now we have a statement that the committee has come into the possession of startling information to the effect that the rates are at least 200 per cent lower than they ought to be.

Mr. President, we have this situation: It has now been quite a while since all impediments to interchange of products between this country and Germany have been removed; at least during the whole of the year 1921 there was no real impediment to interchange of goods between the two countries; and yet during that period of time there came to us from Germany only $88,000,000 worth of her products, as compared with the year before the war of nearly $400,000,000 worth of such products. If it be true that Germany can produce and is producing at 300 per cent less than we are, and that Germany is anxious to take advantage of our markets, that she has abundant products which we need, it is very remarkable to me that less than one-fourth of the amount of German goods have come into this market during the last year which came during the year before the war.

It is more remarkable to me, Mr. President, when I consider that during the period when Germany was shipping us between one-fifth and one-fourth of what she did before the war, namely, during the year 1921, we shipped to Germany and sold in the German market, as I now recall, $347,000,000 worth of American goods; and yet, according to the Senator from North Dakota, we can produce only at a cost of from three to four times the cost at which Germany can produce.

Mr. McCUMBER. Will the Senator from North Carolina allow me to correct him there?

Mr. SIMMONS. Yes.

Mr. McCUMBER. The Senator from North Dakota did not make the statement attributed to him by the Senator from North Carolina. I think that we can produce, that we have been producing, and that we will continue to produce at a less cost than the Senator has indicated. All I could give the Senator was the tabulated statement as to the difference between the American selling price and the foreign selling price, and I have held to that because, let me say to the Senator, the rate of from 45 per cent to 70 per cent would be no good on earth as a matter of protection in the event of the contest arising unless we could produce at a very much less cost than that.

Mr. SIMMONS. Mr. President, the Senator has contended that the article which we are now discussing, which sells in the American market for $400, could be produced in the German market for $100, or one-fourth of what it is selling for in this market. If that be true, as to that product, it must be true as to other products produced both in this country and in Germany. How, then, is it that we can sell in that country—and it has not been suggested that we are selling to Germany at a loss—that we can sell in that country and did sell in that country four times the quantity of products of American soil and American factories that we purchased from Germany?

Mr. President, I expect to be able to show that we are selling commodities in Germany to-day, which are produced on the American farm and in American factory, at a less price than Germany is selling the products of her factories in this country. If it be true that Germany can produce crockery and other commodities at one-fourth of what they can be produced for in America, then, Germany can produce crockery and other things at one-fourth of what they can be produced for in nearly all the industrial countries of the world. Nobody has contended here that there is any very great difference between the cost of production of manufactured products in Great Britain and Canada and in this country; nobody has contended here that there is any great difference between the cost of domestic production of this product and of many other products and the cost even in Italy and in the Scandinavian countries or in France; but in Germany it is said it costs only about from one-fourth to one-third what it costs here. If that be true as to the United States, I say it is true as to the other industrial countries of the world; and the only safety which mankind living on any part of the globe has against Germany is for all the nations of the earth to declare an embargo against German products.

To my mind, the argument which is now presented at the eleventh hour to excuse the exorbitant rates imposed by this bill is preposterous. Whatever the appraisers from whom the Senator got his information may have said, I do not believe that anybody in this country can be led to the conclusion that Germany can produce and sell the product we are now discussing or other products of the factory at practically one-third of what they can be produced and sold for in this country.

Mr. McCUMBER. Mr. President, if the Senator will allow me, does he claim that the appraiser has made a false report to the Senate?

Mr. SIMMONS. I am not attacking the veracity of the appraiser; I am merely saying that the information he has given the Senator is so incredible that I do not think it will be believed; I do not believe it.

Mr. McCUMBER. He has the invoices; he knows what they show; and he is a very trustworthy appraiser.

Mr. SIMMONS. The Senator's argument is not based upon invoices; his argument is based upon the German selling price in the German market, and not the invoice price at which it is imported into this country.

Mr. McCUMBER. The Senator is mistaken as to that; it is based on both.

Mr. SIMMONS. I have the invoice prices here furnished me by the Treasury Department.

Mr. McCUMBER. The Senator has not those which I quoted.

Mr. SIMMONS. No; I have not those which the Senator quoted, because the Treasury Department does not quote any such statistics.

The Senator argues that the German Government takes $200 out of the price at which the Germans sell in this country for the benefit of the German Government. I have heard that for some little while after the agreement between nations of Europe with reference to German reparations Germany imposed an export tax upon the products shipped from Germany, just as we impose an import tax in this country, and just as Brazil imposes an export tax on coffee; but I never yet heard that export tax estimated at more than 33⅓ per cent. I did hear at one time that it was 33⅓ per cent; then I heard that it was reduced to 25 per cent; and still later I heard that plan of raising German revenues had been very largely abandoned; but that Germany has ever taken $200 out of a $300 price at which the German product is exported is incredible, Mr. President.

I have here, in response to a letter which I addressed to the Treasury Department, a statement with reference to prices, based upon the Reynolds investigation. There was an investigation conducted by the Reynolds committee, inaugurated at the instance of the Finance Committee of the Senate. That investigation cost us $100,000. The purpose of the investigation was to secure data for use in the framing of the pending bill upon the principle upon which the committee had decided to frame it; that is, of raising the foreign price up to the domestic price. The Reynolds committee was to secure information particularly as to German prices, because the testimony which had been taken before the Finance Committee in the general hearings had been chiefly as to German prices. Nobody seemed to fear any other competition except German competition; and the Reynolds committee was raised by a resolution of Congress at the instance of the Finance Committee for the very purpose of ascertaining the necessary facts with reference to German selling prices at home and abroad, in order to enable the committee to frame tariff rates that would meet the situation. There is not a line or a syllable in the Reynolds report, which we have upon our tables here, that indicates that they found any such condition as the Senator from North Dakota has attempted to have the Senate believe exists. I want to ask Senators on the other side, if any such situation as that existed, how it escaped the attention of this committee, especially commissioned to ascertain these facts with reference not only to the invoice price at which these products were exported but with reference to the domestic price?

Our tariff laws heretofore have been based upon the domestic selling price in the foreign country. We have changed that in this law and made it either the domestic selling price or the export selling price, whichever is higher; and the Reynolds investigation was directed to ascertain both the home selling price and the export price, in order to give the committee the information which they needed. When they got that, having ascertained that in many instances the export price was a little above the domestic selling price in the country of exportation, they said: "Take one or the other in levying these duties, whichever happens to be the higher."

Mr. President, it would be a most remarkable thing if this great committee, that had hundreds of experts and appraisers, men whose business it was to familiarize themselves with all the conditions concerning our imports, and especially with reference to Germany, special attention being directed to that country at this time, should have permitted a situation like this to absolutely escape them; and it is still more strange that this condition, if it exists over there, has never come to light except through some particular appraiser who has advised the Senator from North Dakota, when he gets into serious trouble with reference to these rates, that he can get out of it in this way.

Mr. President, let me go back. I wrote the Secretary of the Treasury. I have not my letter here, but in his last reply—I wrote him twice—he refers to my letter. This letter is dated the 18th of May, and is addressed to me:

MY DEAR SENATOR: Referring to the department's letter of the 13th instant and previous correspondence, in which were transmitted certain reports covering information desired by you with respect to values of merchandise covered by the various schedules of the Reynolds investigation, I inclose herewith further reports from the appraiser of merchandise at the port of New York covering paragraphs 213 and 337.

This information given me by the Treasury Department is headed:

TYPICAL MERCHANDISE COVERED BY VALUATION INVESTIGATION REPORT SHOWING VALUES AS OF APRIL 1, 1922.

Foreign merchandise: Chinaware, plain white; hotel china; vitrified body; best selection one-quarter thick; roll-edge plates; 25 cm.

Then, in the first column:

Landed cost of imported article, including duty, $3.44.

In another column:

Actual selling price of comparable domestic article—

Actual selling price now—

$4.40.

That has the profit of the wholesaler in it. The other item has no profit of the wholesaler in it. Taking out for overhead and profit of the wholesaler 33⅓ per cent, which is the rule, you have the American selling price $2.94 as against the foreign selling price of $3.44.

The next item in this table sent me by the Treasury Department is:

Foreign merchandise: Bone china, decorated; 9-millimeter gold acid border over edge; gold shoulder line.

Landed cost of imported article, including duty—

This is the foreign article, with no importer's profit, and the importer is the wholesaler in the case of imports—

dozen, $46.46.

Another column:

Actual selling price of comparable domestic article, dozen, $37.80.

I do not know whether that particular article came from Germany or came from some other country. I assume from the argument of the Senator from North Dakota that practically all of this chinaware and crockery ware comes from Germany. No other country seems to be making it; but in this particular case the foreign article sold in our market for a very decidedly higher price than the domestic article sold in our market, including profits in the case of the domestic article, and no profits of the wholesaler in the case of the foreign article.

The next article we have is as follows:

Foreign merchandise: China, decorated; vitrified, hard glost-fired china; aerograph color fonds; transfer floral design, retouched—

And some other descriptive terms which I will not trouble the Senate to read—

Landed cost of imported article, including duty, dozen, $4.91.

No comparable article is produced in this country, so that they give the selling cost in this market of the foreign product. In that column are these words:

If no comparable article, give domestic selling price of imported article.

Then is given the domestic price of the imported foreign article. The landed cost with the duty added was $4.91.

The selling price of that same foreign article in this market was $5.58. That included the importer's profit. It did not meet any competition of a comparable domestic article. There was no comparable article in this market.

The next is in the same situation. It is:

Foreign merchandise: China, decorated—

And then descriptive terms.

Landed cost of imported article, including duty, dozen, $4.74.

There are no comparable articles in this market, so that it comes under the head:

If no comparable article, give domestic selling price of imported article.

The domestic selling price is $6.25, as compared with the landed cost of $4.74.

The same thing happens as to the next article given:

Foreign merchandise: China, decorated—

And some other additional descriptive terms. There is none produced in this country. The landed cost is given at $8.99, and the selling cost of the article in the American market is given at $10.08.

That runs on through the next schedule in the same way. There is no comparable article. The landed cost is $18.19. The selling cost of the same article in this market is $23.94.

In the case of the next—this is all china—the landed cost is $22.83; there is no comparable article, and it sold in this market at $36.

The next is china, decorated. There is no comparable article. The landed cost is $20.17, and the price at which it is sold in our market is $30, showing that the 33⅓ per cent is about the average selling profit.

The next is the same thing. There is no comparable article.

The next is the same thing. There is no comparable article.

The next is the same thing. There is no comparable article.

I ask to have this table printed in the RECORD as a part of my remarks.

The PRESIDING OFFICER (Mr. SUTHERLAND in the chair). Without objection, it is so ordered.

The table is as follows:

Typical merchandise covered by valuation investigation report showing values as of April 1, 1922.

INVESTIGATOR NO. 35.

PAGE NO. 35, PARAGRAPH 213, LINE 1.

	Landed cost of imported article, including duty.	If no comparable article, give domestic selling price of imported article.	Actual selling price of comparable domestic article.
Foreign merchandise: Chinaware, plain white; hotel china; vitrified body; best selection; ¼ thick; roll edge plates; 25 cm.....	$3.44	.....	.....

Domestic merchandise: None found.			

REMARKS.—Landed cost and selling price increased since Aug. 1, 1921.

Mr. SIMMONS. Mr. President, you can go on through this table, and you will find, wherever there is a comparable article in the American market, that when you take out the cost of overhead and profits on the American article the cost of the foreign article with the duty added is practically the same.

Mr. President, here is another table upon which the experts have made some figures, making the subtraction. This comes from the department and was transmitted to me in response to my letter.

The first article is chinaware, decorated, and so on, just like the other, with some variation in the trimmings, so to speak. There the landed cost of the foreign merchandise is given as $5.80 per dozen. The wholesale price in the domestic market of the domestic article is $7.95, but if you take out the profit you will find that the balance will be $5.30, or a little bit less than the foreign price plus the duty.

In the case of the next item, the landed cost is $21.09. There is a comparable domestic product, and that product is sold for $39.03. Take out the overhead and profit of the American wholesaler and you have $26.02 as against $21.09. The present duty is added there to the landed cost.

In the case of the next item, the landed cost plus the duty is $23.73. The comparable domestic product sells in our market for $42.93. Take out 33⅓ per cent for overhead and profit and you have $28.62.

In the case of the next item, the landed cost of the foreign article, plus duty, is $33.61. The price of the comparable domestic product is $46.88. Take out the wholesaler's profit and overhead and you have $31.26, or a little more than $2 less than the price of the foreign article.

In the case of the next item, the landed cost of the imported article, including duty, is $20.43. The price of the comparable domestic product is $39.52. Take out the wholesaler's profit and overhead and you have $26.35.

In the case of the next article, the landed cost of the foreign article, plus duty, is $18.68. The price of the comparable domestic product is $32.93. Take out the wholesaler's profit and overhead and you have $21.96.

The figures run on in that way, Mr. President, and I will ask that that table be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The table referred to is as follows:

Typical merchandise covered by valuation investigation report showing values as of April 1, 1922.

INVESTIGATOR NO. 35.

PAGE NO. 35, PARAGRAPH NO. 213, LINE NO. 13.

	Landed cost of imported article, including duty.	If no comparable article give domestic selling price of imported article.	Actual selling price of comparable domestic article.
Foreign merchandise: Chinaware, decorated; vitrified hotel china; roll edge; transfer border center of rim, between 2 gold lines; decoration broken; plain gold badge; 25-centimeter plates, dozen	$5.80		
Domestic merchandise: Chinaware, decorated; vitrified hotel china; roll edge (decoration same as foreign); 8¼-inch plates, dozen			$7.95

PAGE NO. 36, PARAGRAPH NO. 213, LINES NOS. 3, 5, AND 6.

Foreign merchandise: Decorated china; vitrified china; hard-glost fire; nonabsorbent dinner ware; decalcomania sprays, set	$21.09		
Domestic merchandise: Decorated china; vitrified china; soft-glost fire; nonabsorbent dinner ware; decalcomania sprays, set			$39.03
Foreign merchandise: Decorated china; vitrified china; hard-glost fire; nonabsorbent dinner ware, set	23.73		
Domestic merchandise: Decorated china; vitrified china; soft-glost fire; nonabsorbent dinner ware; decalcomania sprays, set			42.93
Foreign merchandise: Decorated china; decalcomania sprays; liquid gold egde; with one-half matched handles, set	33.61		
Domestic merchandise: Decorated china; decalcomania sprays; liquid gold edge; with detailed handles, set			46.88

REMARKS: No change in price of domestic articles since August, 1921. No reply received from domestic manufacturer. Information furnished by prominent New York dealer.

Typical merchandise covered by valuation investigation report, etc.—Con.

INVESTIGATOR NO. 35—CONTINUED.

PAGE NO. 36, PARAGRAPH NO 213, LINES NO 7, 8, AND 9.

	Landed cost of imported article, including duty.	If no comparable article give domestic selling price of imported article.	Actual selling price of comparable domestic article.
Foreign merchandise: Decorated china; decalcomania sprays; liquid gold edge; detailed handles, set	$20.43		
Domestic merchandise: Decorated china; decalcomania sprays; liquid gold edge; with detailed handles, set			$39.52
Foreign merchandise: Decorated china; decalcomania sprays; liquid gold edge; detailed handles, set	18.68		
Domestic merchandise: Decorated china; decalcomania sprays; liquid gold edge; with detailed handles, set			32.93
Foreign merchandise: Decorated china; decalcomania sprays; liquid gold edge; detailed handles, set	13.90		
Domestic merchandise: Decorated china; decalcomania sprays; liquid gold edge; with detailed handles, set			32.93

REMARKS.—No change in price of domestic articles since August, 1921. No reply received from domestic manufacturer. Information furnished by prominent New York dealer.

PAGE NO. 38, PARAGRAPH NO. 213, LINE NO. 13.

Foreign merchandise: China, decorated; vitrified china body; hard glost fire; nonabsorbent (short line or scheme trade china); very inferior quality; decalcomania border; liquid gold edge; tea cup and saucer, dozen	$1.43		
Domestic merchandise: China, decorated; vitrified china; body soft glost fire; nonabsorbent; dinnerware; decalcomania border; liquid gold edge; tea cup and saucer, dozen			$1.90

REMARKS: Landed cost and selling price of imported article increased since Aug. 1, 1921.
No change in price of domestic article.
Note typographical error in Reynolds report of Aug. 1, 1921, price whereby the selling price of domestic article reported comparable, reading $38.90, should read $1.90.

Mr. SIMMONS. I am advised by the experts, however, who have examined this for me, that some of the landed costs, as given in this letter, are decidedly lower than the prices fixed in the Reynolds report.

I do not wish to prolong this discussion, and I am perfectly willing that we shall have a vote.

Mr. McCUMBER. Mr. President, I wish to prolong it just one minute, and I want the Senator's attention, too, while I prolong it. I will see whether the Senator from North Dakota has difficulty in squeezing out of any hard position, or whether that can better be said of the Senator from North Carolina.

I have given here, and am going to give again, the report of the appraisers. The Senator from New Mexico [Mr. JONES] may ridicule the appraisers; the Senator from North Carolina may intimate that they have made a false report, or that they

do not know what they are doing; but let me tell the Senator that the committee asked these appraisers for an up-to-date report upon some of this china that is coming in, and has been coming in lately, not in August, 1921, but right up to date. Whom did we ask to look after that? We asked Mr. Davis. The Senator knows him. The Senator knows he is an honest man. The Senator knows he is a qualified man. The Senator had him as an assistant in making the Underwood-Simmons bill, and the Senator has often complimented him, and I think that he was a splendid man to get this matter for us.

Whom did we ask to make the reports which he reviewed, and reviewed carefully? Remember, Mr. Davis was in the customs valuation division, and has been there for a great many years. The men who gave us the data upon these importations are Max Teuscher, of New York, and Mr. Koch, of Baltimore, both experts in the matter of appraising chinaware and earthenware. Those people have not made a false report to the committee, and I have not presented figures here based upon any report that is not absolutely reliable and true to the penny.

Mr. SIMMONS. Let me ask the Senator a question. Did not your committee have Mr. Davis with you all the time when you were writing these schedules? Did he then give you any information that supports this statement?

Mr. McCUMBER. Remember that the bill was reported some time ago. We have the data right up to date. The Senator was reading from the Reynolds report, which he says is so ancient that it is not reliable. That statement has been made upon the floor again and again. So, since this debate began, we asked them to try to get us something right up to date upon this schedule, and that is what we have, and I am going to read it to the Senator. It does not make any difference whether we had it before or whether we have it now; the question is, is it true or false?

Mr. SIMMONS. Will the Senator permit an interruption?

Mr. McCUMBER. Certainly, if the Senator desires to ask me a question.

Mr. SIMMONS. The Senator says that the Reynolds report has been characterized as ancient. It was made last August, and I have said, and said repeatedly, and I say again, that the prices of the German products which are imported into this country have risen very materially since the Reynolds report was made. I got that information in the first instance from Mr. Davis.

Mr. McCUMBER. Yes; and I agree with him; but that does not change these figures

Mr. SIMMONS. The Senator is now contending, as I understand him, that German prices are less than they were last August.

Mr. McCUMBER. I am not contending anything of the kind. Do not try to squeeze out with that kind of an excuse. I am contending that these figures, furnished right up to date by the appraisers, are true, and they speak for themselves. I am contending that they are not false, and I am going to put them into the record now, one at a time, and let them soak in.

Mr. SIMMONS. I will ask the Senator, if he is satisfied that that is a true statement with reference to German imports, whether he does not think he had better rewrite his bill?

Mr. McCUMBER. I am satisfied with the bill as it now is, and I think the Senator from North Carolina ought to be satisfied with it when he compares the figures with those in his own bill.

I have stated who the appraisers were. I have given the Senator the name of Mr. Davis, the statistician and the expert upon this subject, whom we all trust. Here is the data with relation to white china tableware. He gives the manufacturer's name, which I will not try to pronounce. He gives the number of the consular invoice, which is 1408. He gives the date, which is March 20, 1922. He gives the invoice export price, which is $908.35. He gives the home price at that date, which was $218; and he shows that the export price exceeds the home price by 316 per cent.

If it was imported from Germany at 316 per cent above the German home price it was sold in this country for more than that, was it not? They did not bring it over here and give it away. It sold in this country for at least that much above the home price in Germany—that is, 316 per cent more than the profitable price in their home country. What does the Simmons-Underwood law ask of them in the shape of a duty? That law levies a duty of 50 per cent, and I want the Senator's attention to this. Is that all right? Is it proper that they should pay 50 per cent under the law fathered by the Senator from North Carolina?

When the importer makes 316 per cent, I contend that he ought to be willing to pay 50 per cent for the privilege of the American market, which gives him 316 per cent over his home market. The Senator says that is all right, because it is in his bill. We said, instead of 50 per cent, that they must pay 60 per cent, and now the Senator says that is monstrous. Fifty cents taken out of 316 cents is all right, a splendid provision, but 60 cents taken out of 316 cents is monstrous and ought to be condemned. I think the Senator ought to find something else besides that to criticize.

Let us consider decorated china. Here are some figures of a shipment by F. Thomas Zeb Schezer & Co. The consular invoice number is 2429. If the Senator thinks that the appraisers have made a false report, he can go and examine the consular invoice number. The invoice date is March 18, 1922. That was invoiced for export at $383.61. The home value was $88.23. That was 335 per cent in excess of the home value.

The Simmons bill levied a tax of 55 cents upon that 335 cents, and the Senator says that is all right; and it is. We would take 70 cents out of that 335 cents, and the Senator says that is monstrous. I do not think it is. I think both of them are all right, and if the Senator had known when he wrote his bill that conditions would so change that they could import into this country and make such enormous profits, then, from the standpoint of revenue only, he would have asked a bigger rate, just as we have done. I do not think either of the bills is subject to criticism because of that.

The point I want to make is that the statement is true; that they are coming in at this rate; and coming in at this rate, leaving protection out of consideration, for the privilege of such a splendid market for such a cheap product in the home country they ought to be willing to pay the revenue rate we have fixed in this bill, whether it means protection or not.

I have not stated what the Senator said I stated, that we could not produce this article in this country for less than four times what it costs in Germany. I will agree with the Senator that the German low cost of production can not possibly get any lower and human beings live. I believe it is going to rise. I further believe that ours will come down, and when they do come down and the other rises to more of a normal condition, probably this duty will fairly protect us.

Of course, there will be a great many articles coming in in great quantities, and that is what I am pleading for in regard to this. The Senator is mistaken when he assumes this is not true, because it comes from the very best source, and comes with a statement of the experts in valuation, and with the numbers of the invoices, and everything connected with it.

We have been a long time on this one little item—from 11 until 7 o'clock, eight hours—and we have not gotten one vote as yet.

Mr. SIMMONS. Mr. President, just a word. With reference to Mr. Davis. I would not say one word of criticism. I would only say that Mr. Davis was with the Finance Committee during all of its secret sessions, participating in the making of these rates, and I am sure that he did not disclose to the Finance Committee any such situation as the Senator now says exists. He came over to me and spent a couple of days with me after the Finance Committee had reported this bill, and the only information he gave me about the German situation was that the Reynolds report was based upon values of August, 1921, and that the selling prices of the German product in this market and in the German market since that time had greatly increased. My recollection is that he said in many instances it had increased as much as 50 per cent.

We had a report from the Federal Reserve Board, which I read into the record some time ago, which indicated that in one month—the month of February or March of this year—the German selling prices in foreign countries had advanced 20 per cent.

The Finance Committee gave the most thorough consideration to the Reynolds report. Most of its rates are based upon the Reynolds report, and now we are to understand that the Reynolds report is entirely wrong, that it does not reflect the prices of German products exported into this country at all, that the German domestic prices should have been stated as one-third or one-half of the prices stated in the Reynolds report and lower than the German prices upon which the committee fixed its rates.

I say it is a most remarkable situation, if credence is to be given to it. I know myself that there is some mistake about it. I do not attack Mr. Davis's credibility. I think every Senator on the other side of the Chamber knows that these figures do not reflect the situation.

The Senator says that the Underwood rate was 50 per cent on one class of this earthenware and that he only added 10 per cent, making it 60 per cent; that the other rate was 55 per cent in the Underwood bill, and they only increase that to 70 per cent; in other words, that an increase in duty adding 10

per cent and 15 per cent is not worthy of consideration by the American people, who have to pay the taxes.

This is a much more moderate increase than the ordinary increases in the bill over the rates in the Underwood law. This is a case where they have not increased the Underwood rates in very great amount compared with the increases they have made in their bill as a whole. Taking the bill as a whole, they have doubled the Underwood rates; in many instances they have trebled the Underwood rates, and in some instances they have even gone higher than that. Here we have a product, shown by the figures I gave a little while ago as furnished me by the Treasury Department, many grades of which are not produced in this country at all, with no comparable product at all in this country, and in some of the instances it is shown that by the addition of the Underwood duty to it the selling price of that product in the American market is higher than the selling price of the American product.

The data I gave related to some 25 or 30 articles. If anyone can take that data, furnished to me by the Treasury Department, and say there is any necessity for any higher rate than is proposed in the Underwood law, I would be glad to have him do it. If we have a present rate that is sufficient to bring about absolute parity in competitive conditions in this country between foreign and domestic products, why should that rate be raised? Is this a time when the people of the United States should be made to pay heavier taxes than are necessary to accomplish a policy, whether it be a policy of the Republican Party or a policy of the Democratic Party?

But, Mr. President, I want to say to the Senator from North Dakota, if he believed that the facts which he gave here to-day reflected the conditions of competition between this country and Germany, if Senators on the other side of the Chamber believed it, there is not one of them who would not say, "If we are to protect ourselves against German competition, assuming these conditions to exist, then our rates ought to be jacked up from 100 to 200 per cent or even as high as 300 per cent greater than they are now." I can not understand why the Senator presenting this argument and making this contention does not instantly say, "I believe to be true. Believing this to reflect conditions in the German market, believing this to be a true statement of the German cost of production, the bill which we have presented here, based upon the Reynolds report, has a false basis. It will not accomplish its purpose. It will not afford the relief that the industries of the country are demanding. It will not protect them from ruin by German importations. The bill must be withdrawn and rewritten."

I desire to ask the Senator from Kansas [Mr. CURTIS] if he wants to withdraw the bill to rewrite it in order to meet German conditions such as the Senator from North Dakota has said exists?

Mr. CURTIS. Mr. President, we shall stand by the bill as we reported it.

Mr. SIMMONS. Yes; and when you stand by the bill as you have reported it, you say in effect that you have no confidence in the figures which the Senator from North Dakota has given to the Senate. If you had confidence in them, if you believed they reflected a true situation, the clock would not strike another hour before your bill would be back in the Committee on Finance and your rates would be jacked up 100 or 200 or even 300 per cent.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from New Mexico [Mr. JONES] to the amendment of the committee.

Mr. SIMMONS. Let us have the yeas and nays.

The yeas and nays were ordered.

Mr. WALSH of Massachusetts. May we have the amendment to the amendment reported?

The VICE PRESIDENT. The amendment to the amendment will be read for the information of the Senate.

The READING CLERK. In paragraph 212, page 36, line 12, in the committee amendment strike out "45" and insert "35," so as to read:

Earthenware and crockery ware composed of a nonvitrified absorbent body, including white granite and semiporcelain earthenware, and cream-colored ware, and stoneware, including clock cases with or without movements, pill tiles, plaques, ornaments, toys, charms, vases, statues, statuettes, mugs, cups, steins, lamps, and all other articles composed wholly or in chief value of such ware; plain white, plain yellow, plain brown, plain red, or plain black, not painted, colored, tinted, stained, enameled, gilded, printed, ornamented, or decorated in any manner, and manufactures in chief value of such ware not specially provided for, 35 per cent ad valorem.

The reading clerk proceeded to call the roll.

Mr. MOSES (when Mr. KEYES's name was called). I am authorized by my colleague [Mr. KEYES], who is absent on account of illness, to state that if present he would vote "nay" on this amendment to the amendment.

Mr. LODGE (when his name was called). Transferring my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the senior Senator from Minnesota [Mr. NELSON], I vote "nay."

Mr. McCUMBER (when his name was called). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Maryland [Mr. WELLER], and vote "nay." I ask that this announcement of my transfer may stand for the balance of the day.

Mr. McKINLEY (when his name was called). I have a general pair with the junior Senator from Arkansas [Mr. CARAWAY]. I transfer that pair to the junior Senator from South Dakota [Mr. NORBECK], and vote "nay."

Mr. PHIPPS (when his name was called). I have a pair with the junior Senator from South Carolina [Mr. DIAL], which I transfer to the junior Senator from Delaware [Mr. DU PONT], and vote "nay."

Mr. SUTHERLAND (when his name was called). I transfer my pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Oklahoma [Mr. HARREL] and vote "nay."

Mr. CURTIS (when Mr. WILLIS's name was called). I was requested to announce that the junior Senator from Ohio [Mr. WILLIS] is paired with the senior Senator from Ohio [Mr. POMERENE].

The roll call was concluded.

Mr. JONES of Washington. The senior Senator from Virginia [Mr. SWANSON] is necessarily absent and asked me to take care of him with a pair for the evening. However, I find that I can transfer that pair to the junior Senator from New Hampshire [Mr. KEYES], which I do, and vote "nay."

Mr. FRELINGHUYSEN. I have a general pair with the senior Senator from Montana [Mr. WALSH]. I transfer that pair to the junior Senator from Idaho [Mr. GOODING] and vote "nay."

Mr. HALE (after having voted in the negative). I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Colorado [Mr. NICHOLSON] and allow my vote to stand.

Mr. BALL. I have a general pair with the senior Senator from Florida [Mr. FLETCHER]. I transfer that pair to the junior Senator from Washington [Mr. POINDEXTER] and vote "nay."

Mr. JONES of New Mexico. I desire to announce the transfer of my general pair with the Senator from Maine [Mr. FERNALD] to the senior Senator from Missouri [Mr. REED]. I ask that this announcement may stand for the remainder of the calendar day. On this question I vote "yea."

Mr. CURTIS. I was requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The junior Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 13, nays 39, as follows:

YEAS—13.

Ashurst	Jones, N. Mex.	Sheppard	Walsh, Mass.
Borah	La Follette	Simmons	
Harris	Overman	Smith	
Harrison	Pittman	Stanley	

NAYS—39.

Ball	France	McCumber	Rawson
Brandegee	Frelinghuysen	McKinley	Shortridge
Broussard	Hale	McLean	Smoot
Bursum	Johnson	McNary	Spencer
Calder	Jones, Wash.	Moses	Sterling
Capper	Kellogg	Newberry	Sutherland
Cummins	Kendrick	Oddie	Townsend
Curtis	Ladd	Page	Wadsworth
Elkins	Lenroot	Pepper	Warren
Ernst	Lodge	Phipps	

NOT VOTING—44.

Cameron	Gerry	Nelson	Shields
Caraway	Glass	New	Stanfield
Colt	Gooding	Nicholson	Swanson
Crow	Harreld	Norbeck	Trammell
Culberson	Heflin	Norris	Underwood
Dial	Hitchcock	Owen	Walsh, Mont.
Dillingham	Keyes	Poindexter	Watson, Ga.
du Pont	King	Pomerene	Watson, Ind.
Edge	McCormick	Ransdell	Weller
Fernald	McKellar	Reed	Williams
Fletcher	Myers	Robinson	Willis

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 36, line 12, to strike out the word "if."

The amendment was agreed to.

The next amendment was, on page 36, line 13, to strike out the words "or ornamented" and insert the word "ornamented" and a comma.

The amendment was agreed to.

The next amendment was, on page 36, line 15, to strike out "28" and insert "50," so as to read:

Painted, colored, tinted, stained, enameled, gilded, printed, ornamented, or decorated in any manner, and manufactures in chief value of such ware, not specially provided for, 50 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, in line 15 I move to strike out the numerals "50" and insert in lieu thereof "40."

The VICE PRESIDENT. The amendment will be stated.

The READING CLERK. On page 36, line 15, strike out of the committee amendment the numerals "50" and insert the numerals "40."

Mr. JONES of New Mexico. Upon that I ask for the yeas and nays.

The yeas and nays were ordered and the reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before as to my pair and its transfer, I vote "nay."

The PRESIDING OFFICER (when the name of Mr. JONES of Washington was called). The present occupant of the chair makes the same announcement as before with reference to his pair and its transfer, and votes "nay."

Mr. MOSES (when the name of Mr. KEYES was called). My colleague [Mr. KEYES] authorized me to state that, if present, he would vote "nay" upon this question.

Mr. LODGE (when his name was called). Making the same announcement as to the transfer of my pair as before, I vote "nay."

Mr. MCKINLEY (when his name was called). Making the same announcement as before in reference to my pair and its transfer, I vote "nay."

Mr. PHIPPS (when his name was called). Making the same announcement as before as to the transfer of my pair, I vote "nay."

The roll call was concluded.

Mr. SUTHERLAND. Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. BALL. Making the same announcement as heretofore with reference to my pair and its transfer, I vote "nay."

Mr. FRELINGHUYSEN. I transfer my general pair with the Senator from Montana [Mr. WALSH] to the Senator from Pennsylvania [Mr. CROW], and vote "nay."

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 10, nays 40, as follows:

YEAS—10.

Borah	Jones, N. Mex.	Sheppard	Walsh, Mass.
Harris	La Follette	Simmons	
Harrison	Pittman	Stanley	

NAYS—40.

Ball	France	Lodge	Phipps
Brandegee	Frelinghuysen	McCumber	Rawson
Broussard	Gooding	McKinley	Shortridge
Bursum	Hale	McLean	Smoot
Calder	Johnson	McNary	Spencer
Capper	Jones, Wash.	Moses	Sterling
Cummins	Kellogg	Newberry	Sutherland
Curtis	Kendrick	Oddie	Townsend
Elkins	Ladd	Page	Wadsworth
Ernst	Lenroot	Pepper	Warren

NOT VOTING—46.

Ashurst	Culberson	Fernald	Heflin
Cameron	Dial	Fletcher	Hitchcock
Caraway	Dillingham	Gerry	Keyes
Colt	du Pont	Glass	King
Crow	Edge	Harreld	McCormick
McKellar	Overman	Shields	Watson, Ga.
Myers	Owen	Smith	Watson, Ind.
Nelson	Poindexter	Stanfield	Weller
New	Pomerene	Swanson	Williams
Nicholson	Ransdell	Trammell	Willis
Norbeck	Reed	Underwood	
Norris	Robinson	Walsh, Mont.	

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

The PRESIDING OFFICER. The question is on the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment will be stated.

The next amendment of the Committee on Finance passed over was on page 36, line 22, after the word "plaques," to insert "pill tiles."

The amendment was agreed to.

The next amendment of the Committee on Finance was on page 37, line 1, before the word "plain," to strike out the word "if."

The amendment was agreed to.

The next amendment of the Committee on Finance was on page 37, line 4, before the words "per centum," to strike out the numerals "35" and to insert the numerals "60"; so as to read:

PAR. 213. China, porcelain, and other vitrified wares, including chemical porcelain ware and chemical stoneware, composed of a vitrified nonabsorbent body which when broken shows a vitrified or vitreous, or semivitrified or semivitreous fracture, and all bisque and parian wares, including clock cases with or without movements, plaques, pill tiles, ornaments, toys, charms, vases, statues, statuettes, mugs, cups, steins, lamps, and all other articles composed wholly or in chief value of such ware, plain white, or plain brown, not painted, colored, tinted, stained, enameled, gilded, printed, or ornamented or decorated in any manner, and manufactures in chief value of such ware not specially provided for, 60 per cent ad valorem.

Mr. JONES of New Mexico. I move to substitute the numerals "50" for the numerals "60" in the committee amendment, and upon the amendment to the amendment I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before in reference to my pair and its transfer, I vote "nay."

Mr. HALE (when his name was called). Transferring my pair to the Senator from Oregon [Mr. STANFIELD], I vote "nay."

The PRESIDING OFFICER (when the name of Mr. JONES of Washington was called). Making the same announcement as before with reference to his pair and its transfer, the present occupant of the chair votes "nay." The present occupant of the chair will let that announcement stand for the evening.

Mr. MOSES (when the name of Mr. KEYES was called). I am authorized by my colleague, the junior Senator from New Hampshire [Mr. KEYES], to state that if he were present, he would vote "nay" upon this amendment.

Mr. MCKINLEY (when his name was called). Making the same announcement as before with reference to my pair and its transfer, which announcement I ask may stand for the evening, I vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement with reference to the transfer of my pair as before, I vote "nay."

The roll call was concluded.

Mr. PHIPPS. Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. BALL. Making the same announcement as to the transfer of my pair as on the previous vote, I vote "nay."

Mr. LODGE. Making the same announcement with reference to my pair and its transfer as heretofore, I vote "nay."

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

Mr. OVERMAN (after having voted in the affirmative). I transfer my pair with the Senator from Wyoming [Mr. WARREN] to the Senator from Nebraska [Mr. HITCHCOCK], and allow my vote to stand.

The result was announced—yeas 11, nays 39, as follows:

YEAS—11.

Ashurst	Jones, N. Mex.	Sheppard	Stanley
Harris	Overman	Simmons	Walsh, Mass.
Harrison	Pittman	Smith	

NAYS—39.

Ball	France	McCumber	Phipps
Brandegee	Frelinghuysen	McKinley	Rawson
Broussard	Gooding	McLean	Shortridge
Bursum	Hale	McNary	Smoot
Calder	Jones, Wash.	Moses	Spencer
Capper	Kellogg	Newberry	Sterling
Cummins	Kendrick	Nicholson	Sutherland
Curtis	Ladd	Oddie	Townsend
Elkins	Lenroot	Page	Wadsworth
Ernst	Lodge	Pepper	

NOT VOTING—46.

Borah	Gerry	Nelson	Swanson
Cameron	Glass	New	Trammell
Caraway	Harreld	Norbeck	Underwood
Colt	Heflin	Norris	Walsh, Mont.
Crow	Hitchcock	Owen	Warren
Culberson	Johnson	Poindexter	Watson, Ga.
Dial	Keyes	Pomerene	Watson, Ind.
Dillingham	King	Ransdell	Weller
du Pont	La Follette	Reed	Williams
Edge	McCormick	Robinson	Willis
Fernald	McKellar	Shields	
Fletcher	Myers	Stanfield	

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment.

Mr. JONES of New Mexico. Mr. President, I am going to move to substitute the rate of the Payne-Aldrich bill. I move that the numerals "60," in line 4, page 37, be changed to "55."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. On page 37, line 4, in the committee amendment, it is proposed to strike out "60" and to insert in lieu thereof "55."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Mexico to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment of the committee.

The READING CLERK. On the same page, line 5, it is proposed to strike out the word "if."

The amendment was agreed to.

Mr. SIMMONS. Mr. President, I want to call attention to the fact that we did not spend an hour and a half in discussing the amendment to strike out "if," but that we agreed to it in less than a minute's time.

Mr. SMOOT. I want to call attention to the fact that we have had two days' discussion on it already.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The READING CLERK. On page 37, line 8, it is proposed to strike out "40" and insert "70," so as to read:

Painted, colored, tinted, stained, enameled, gilded, printed, or ornamented or decorated in any manner, and manufactures in chief value of such ware not specially provided for, 70 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I move to amend the committee amendment by striking out "70" and inserting "60."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Mexico to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment.

The amendment was agreed to.

Mr. JONES of New Mexico. Mr. President, as to paragraphs 212 and 213, I will ask for separate votes on these amendments when the bill gets into the Senate.

Mr. SMOOT. Mr. President, I understand, as to the glass schedules—both glass bottles and glassware and cylinder glass and polished glass and plate glass—that the Senator from New Mexico [Mr. JONES] desires that they go over until to-morrow.

Mr. JONES of New Mexico. Mr. President, I may say that the Senator from New Jersey [Mr. FRELINGHUYSEN] is interested in the glassware paragraphs, and he and I conferred about the matter, and I suppose that it may be considered as a joint request that they go over until next week.

Mr. SMOOT. The reason why I said what I did is that the Senator said that if we really wanted to go on with the glass schedules to-night, he would; and, as the Senator knows, it does not make any difference whether he wants to or not; I am going to respect the wishes of the Senator.

Mr. JONES of New Mexico. Very well. I should like myself to have the matter go over. I certainly would not care to take it up to-day.

Mr. SMOOT. Then I ask to take up paragraph 226—lenses.

Mr. JONES of New Mexico. May I ask whether paragraph 214 has been disposed of?

The PRESIDING OFFICER. The clerks at the desk inform the Chair that paragraph 214 has been agreed to.

Mr. SMOOT. The lens paragraph might as well go over with all the others. I will ask to take up the metal schedule, beginning with paragraph 301.

The PRESIDING OFFICER. The Senator from Utah asks that the Senate proceed to consider the metal schedule.

Mr. SIMMONS. Mr. President, I want to say that the Senator from Alabama [Mr. UNDERWOOD] is prepared to discuss the first six or seven or eight paragraphs of the metal schedule. He left here, saying that he would get back by 8 o'clock. I will have him telephoned for at once, but I should not like to have those paragraphs taken up in his absence, and I suggest to the Senator from Utah that if he wishes he can take up lenses.

Mr. SMOOT. I thought that paragraph would go in with the glass paragraphs, and a request has been made to let them all go over.

Mr. SIMMONS. Very well.

Mr. JONES of New Mexico. That paragraph will not involve the same questions which I care to discuss.

Mr. SMOOT. No; but if we are going to let any of them go over we ought to let them all go over, because I think the Senator from New Jersey is interested in this paragraph, being a special industry and a new industry in the country.

Mr. President, we can not proceed with paragraph 229, incandescent electric-light bulbs, until we take up paragraph 218, because incandescent electric-light bulbs have been transferred to that paragraph, and a request has been made that that go over. I do not know what else we can do.

Mr. FRELINGHUYSEN. Mr. President, I should like to ask the Senator from Utah or the chairman of the committee—he and the chairman are conferring on these questions—when they propose to take up the dye paragraph?

Mr. SMOOT. Mr. President, we can hardly do that until the junior Senator from Utah [Mr. KING] is well enough to come to the Chamber.

Mr. FRELINGHUYSEN. What report is there on the condition of health of the junior Senator from Utah?

Mr. SMOOT. I really have none.

The PRESIDING OFFICER. The Chair has no information on that subject.

Mr. SIMMONS. I am not able to answer the Senator definitely, but I was informed that the Senator from Utah expected to be in the Chamber on Friday.

Mr. FRELINGHUYSEN. Mr. President, that paragraph is of great interest to my State. It has been passed over in the chemical schedule, and my information is that the junior Senator from Utah has recovered. Is there any way of ascertaining when an agreement can be reached to take up that paragraph?

Mr. SIMMONS. I would suggest to the Senator that he call up the Senator from Utah and make inquiry, or I will do it if the Senator does not desire to do so.

Mr. FRELINGHUYSEN. If the Senator is willing to do that and can give me some assurance, I should like to know.

Mr. SIMMONS. I will do it immediately, and ascertain.

Mr. FRELINGHUYSEN. Will the Senator ask if the Senator from Utah is willing to take it up some fixed day next week, say Monday or Tuesday?

Mr. SIMMONS. I think there will be no trouble about taking it up some day next week. I think we can take it up to-morrow, if that will suit the convenience of the Senator from New Jersey. I think the Senator from Utah will be here to-morrow. I have been so advised.

Mr. FRELINGHUYSEN. I can not be here to-morrow.

Mr. SIMMONS. Then we can take it up next week, I think.

Mr. SMOOT. To-morrow we have cyanide and magnesite, and before we can dispose of fire brick we must dispose of magnesite.

Mr. LA FOLLETTE. Magnesite will take some time.

Mr. SMOOT. Some time.

Mr. SIMMONS. I assure the Senator from New Jersey that, so far as I am concerned, I am anxious to accommodate every Senator as far as possible. I have had no word from the Senator from Utah [Mr. KING], but I was told that he expected to be in the Chamber to-morrow. I think that paragraph has

been marked to be taken up to-morrow, but if the Senator from New Jersey is going to be away I can say to him that I am sure the Senator from Utah [Mr. KING], if he is present, will not take it up until he returns.

Mr. FRELINGHUYSEN. I should like, if it can be arranged, to have some definite understanding as to when it will be reached. The Senator asked for a postponement of three days. He was undoubtedly ill. I understood that it would be taken up immediately after his return, and that he would return in three days. In preparing for that the expert on dyes has been ready, and the papers are all here, and they are voluminous; and if we are to have a debate on it I should like to know when the Senator from Utah can definitely take it up. Of course, if he is not able to go on with it at present I do not want to take it up until he returns.

Mr. SIMMONS. I have requested the operator to call up the Senator from Utah.

Mr. SMOOT. Did I understand the Senator from New Jersey to say that he can not be here to-morrow?

Mr. FRELINGHUYSEN. No; I can not. I should like to take it up Monday morning.

Mr. SIMMONS. I think we can agree to take it up Monday morning.

Mr. SMOOT. Let it be understood that unless something unforeseen happens we will take up dyes on Monday morning.

Mr. SIMMONS. I wish to say that, of course, if the Senator from Utah [Mr. KING] is not ready at that time I should feel that it would be doing him a great injustice to take up the question in his absence.

Mr. SMOOT. Oh, the Senator knows that if he is ill there will be no doubt about its going over.

Mr. LA FOLLETTE. Certainly not.

Mr. SMOOT. I want to ask the Senator from North Carolina if there is any objection to taking up paragraph 319 or paragraph 320?

Mr. SIMMONS. What are they about?

Mr. SMOOT. Iron or steel anchors and parts thereof, and electric storage batteries and parts thereof. They are not the regular steel paragraphs, but they are special items in the iron and steel schedule.

Mr. SIMMONS. Mr. President, I should like to do anything I can to accommodate the Senator from Utah and facilitate action here, but I doubt very much whether there is anyone here who has given any consideration to that matter, because we were not expecting the metal schedule to be reached to-night.

Mr. SMOOT. Of course, we expected to take up magnesite to-day, but it is so late in the evening that the Senator from Washington [Mr. POINDEXTER], having just come out of a hospital, felt that it was unwise on his part to remain here and spend the evening in the discussion of this matter. I was wondering whether there was anyone else who can begin the discussion on magnesite. If there is, we will take it up to-night.

Mr. SIMMONS. I can not answer the Senator right now, but if the Senator wants to take it up I will do my best myself; but I thought we might take up lenses.

Mr. SMOOT. I do not want to force the Senator to take up the question merely in order to use up time.

Mr. SIMMONS. I have not examined it at all, and I am not able to tell the Senator in the absence of the Senator from New Mexico, who has charge of this schedule. Could not the Senator take up the matter of lenses that I spoke about? I shall take some little time to discuss that matter.

Mr. SMOOT. Then, Mr. President, until the Senator from New Mexico comes, the Senator from North Carolina can discuss lenses.

Mr. SIMMONS. What is the paragraph?

Mr. SMOOT. The paragraph is 226. I ask that paragraph 226 be taken up at this time.

The PRESIDING OFFICER. Without objection, paragraph 226 will be taken up. The Secretary will state the amendment of the committee.

The READING CLERK. On page 45, paragraph 226, line 12, it is proposed to strike out "40" and insert "60," so as to read:

Lenses of glass or pebble, molded or pressed, or ground and polished to a spherical, cylindrical, or prismatic form, and ground and polished plano or coquill glasses, wholly or partly manufactured, with the edges unground, 60 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. SIMMONS obtained the floor.

Mr. SMOOT. Mr. President, before the Senator proceeds to the consideration of the item, I want to give notice that the 60 per cent rate on lenses will be reduced somewhat to make it conform to the changes made in the optical glass provision the other night.

Mr. SIMMONS. What reduction will the Senator propose?

Mr. SMOOT. I think it will be 50 per cent instead of 60 per cent; but I will have to figure it out. I want to equalize it, and I think it will be 50 instead of 60; but the Senator can continue his remarks. I simply wanted to make that announcement at this time.

Mr. SIMMONS. The rate fixed on lenses of glass or pebble, molded or pressed, or ground and polished to a spherical, cylindrical, or prismatic form, and ground and polished plano, and so on, is 60 per cent, instead of 40 per cent, as provided in the present law. The Senator from Utah says that that rate may be reduced to 50 per cent.

Mr. SMOOT. I think that is the differential.

Mr. SIMMONS. On the same lenses, with the edges ground or beveled, the rate is 10 cents per dozen pairs and 55 per cent ad valorem; on strips of glass not more than 3 inches wide, ground or polished on one or both sides to a cylindrical or prismatic form, including those used in the construction of gauges, and glass slides for magic lanterns, 55 per cent ad valorem.

The highest rate is that with reference to lenses of glass with the edges ground or beveled, 10 cents per dozen pairs and 55 per cent ad valorem. I would like to ask the Senator from Utah if he can advise me what will be the ad valorem equivalent of the 10 cents per dozen pairs?

Mr. SMOOT. Is the Senator speaking of the Payne-Aldrich law or of this bill?

Mr. SIMMONS. Of this bill.

Mr. SMOOT. The equivalent will be about 47 per cent.

Mr. SIMMONS. That would make the total duty, then, 47 per cent plus 55 per cent?

Mr. SMOOT. No; the 10 cents is equivalent to only about 2 or 3 per cent ad valorem, so that it would bring the rate up to 51 per cent.

Mr. SIMMONS. You have fixed the rate at 10 cents a dozen pair, plus 55 per cent ad valorem.

Mr. SMOOT. Ten cents per dozen pair would amount to from 2 to 6 per cent ad valorem. In other words, the higher would be 6 and the lower 2, so it would be from 47 to 51 per cent.

Mr. SIMMONS. Mr. President, the Reynolds report and the reports of the Tariff Commission were somewhat discredited this afternoon in a discussion emanating from the other side of the Chamber; but I have no information about this matter except that which I can obtain from the Tariff Commission reports. They say:

Lenses of glass are fashioned from rough optical glass and used chiefly in the manufacture of scientific, professional, and optical instruments and goods.

A pebble lens is a spectacle lens made of rock crystal, which is harder than glass.

The Tariff Commission further says:

Production figures for the particular items in paragraph 226 are not available, because part or parts of each are reported under "Instruments, professional and scientific," and "Optical goods." Statistics for these industries are as follows—

I wish to call the attention of the Senate to these figures. They give the number of establishments making these professional and scientific instruments and the number of establishments making optical goods from 1914 to 1919. Then they give the value of these products.

In 1914 there were 307 establishments making professional and scientific instruments using these lenses, and there were in that year 314 establishments making optical goods. In 1919 the number of establishments making instruments, professional and scientific, had increased from 307 to 350, and the number making optical goods had increased from 314 to 506.

I especially desire the attention of the four Senators who are now on the Republican side to the value of the product.

Mr. SMOOT. And the four on the Democratic side.

Mr. SIMMONS. And the three besides myself on this side of the Chamber. In 1914 there were produced in this country professional and scientific instruments amounting to $17,495,000 in value. Of optical goods, in that year there were $18,188,000 worth produced. In 1919 there were produced in this country professional and scientific instruments of the value of $58,135,000. Of optical goods there were produced $53,718,000 worth. So that nearly $114,000,000 worth of these goods were produced in this country in 1919, and I call attention to the fact that the production seems to be increasing very rapidly. During the period elapsing between 1914 and 1919 the increase was between 200 and 300 per cent.

I desire to call especially the attention of the Senator from South Carolina [Mr. SMITH] and the Senator from Arizona [Mr. ASHURST] to what I am now stating. With a production in this country of these products in 1919 of $114,000,000, the imports for 1917, which is the last year for which figures are given,

amounted to only $40,971. In 1914 they amounted to $169,000, in round numbers; in 1915 they amounted to $120,000; in 1916 they amounted to $54,000; and in 1917, growing less all the time, they amounted to $40,971, against a production of $114,000,000.

This report says that exports are not recorded. I expect the exports are pretty heavy. With declining imports, with imports going down until they are $40,000, with a production of $114,000,000 in this country, I can not understand why we need from 50 to 60 per cent protection in order that the American producer may live.

I have said all I desire to say, and I invite the Senator from Utah to give the Senate and to give the country some reason why he thinks that with a production of $114,000,000 of these products and an importation constantly decreasing, only $40,000 in 1917, we ought to put a duty of 60 per cent on this in order to prevent these importations from destroying the American industry engaged in the production of these items.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. SIMMONS. Is the Senator from Utah ready to give that information? We might just as well get rid of this now while we are on it. It will take only a few minutes, if the Senator can enlighten the Senate about that.

Mr. SMOOT. I prefer now to take up paragraph 301, and I ask that we proceed to the consideration of that paragraph.

Mr. SIMMONS. Is the Senator proposing to drop this item just as we were about to conclude it?

Mr. SMOOT. I know it is very painful to the Senator, but I am going to ask that it shall go over.

Mr. SIMMONS. I am willing that the Senator may have time in order that he may get some information in order to justify this rate. In all kindness and frankness, it seems to me it is a case where it will be very difficult for the Senator to find the information to justify the rate. I think this probably was just an inadvertence or a mistake, Mr. President.

Mr. SMOOT. I now ask that we return to paragraph 301.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Secretary will report the amendment in paragraph 301.

The READING CLERK. On page 48, "Schedule 3, metals and manufactures of." The amendment of the committee is, in line 12, to strike out "per cent" and insert in lieu thereof "per centum."

The amendment was agreed to.

The next amendment of the committee was, on page 48, in line 12, after the word "carbon," to insert "$1.25 a ton," so as to read:

Iron in pigs, iron kentledge, spiegeleisen containing more than 1 per cent of carbon, $1.25 per ton.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

Mr. UNDERWOOD. Mr. President, this amendment in fact does not change the House rate on pig iron. The amendment is placed in the bill at this point evidently in order to make a discrimination between pig iron proper and wrought and scrap iron and scrap steel, which are reduced from $1.25 to $1 per ton. I do not intend in the end to resist the amendment, but I do not care to have the paragraph passed without making some comment on it.

Of course, if the policy of the bill is to make everybody believe that his industrial life is dependent upon a tariff of some kind levied at the customhouse, then there may be some justification for writing into the bill a tariff upon pig iron. But if that is not the case, then there is absolutely no justification for taking this article off the free list, where it is now, and putting it on the tax list.

We have had experts and experts testifying about the various commodities that come before the Congress. The only business that I know very much about, outside of my present business of representing the people of Alabama on the floor of the Senate, is making pig iron. My family were engaged in the business for many years and my wife's family for generations past. The Senate committee may bring their experts here, but I think I know what I am talking about when I say that in the manufacture of the heavy materials in the iron and steel schedule the industry of America has no competition in the world's markets which can stand against it.

This is an original base. Of course, I do not say that you are going to do much harm by putting this tax in your bill. You are certainly going to do no good, and, in my judgment, it is only camouflage or a smoke screen to deceive the American people, or one portion of them, into believing that industries in America can not survive without a tax. That is all there is in the proposition. Ten years ago I was not only chairman of the Ways and Means Committee of the House but I was on the subcommittee which wrote the metal schedule. I heard all of the testimony. I examined all of the details to the last degree. I will say that at that time I became thoroughly convinced that there were no furnaces in the world which were making pig iron cheaper than the up-to-date American furnace.

I say up-to-date American furnace advisedly, because we have some furnaces that can only run in exceedingly good weather when some abnormal condition or cause boosts the price of pig iron away above what is the ordinary price for it. Of course, if this tax is put on to take care of lame ducks, furnaces ill-advisedly built, furnaces in a broken-down condition, furnaces that have not adopted improved methods, then I will say to you candidly the tax is not high enough, because to take care of some of those furnaces you would probably need $10 or $15 a ton, because some of them can hardly run at all. I am discussing the question from the standpoint of the modern up-to-date American furnace.

The real competition at that time, if there were any, was not from the English furnaces, but from German production. But when we balanced the ocean freight rate against the cost of production, the modern up-to-date American furnace was able to compete not only in American markets but was able to compete in the markets of the world.

I shall not detain the Senate by going into the details of the cost of production. I would have to send to my office to get the data to give the cost of production 10 years ago, and I have not the cost of production to-day. But I do know that the large majority of the raw materials going to the English furnace in the way of iron ore come from Spain or Norway and are transported long distances overseas. The English coal mines are thousands of feet in the ground, where men can not work as advantageously in the production of coal, where they can not get out as much coal and bring it out per man per day, and where the cost of bringing it to the surface is in great excess of the cost in the American mines, only a few of which are any great distance beneath the earth's surface.

The efficiency of the labor in the furnaces of Europe is not equal to that in America. More than that, the up-to-date furnace in America has the advantage of every modern improvement. The real competitor of 10 years ago is gone so far as the production of heavy iron and steel is concerned. Why do I say that? I say it because under the treaty of Versailles Germany has lost a large portion of her iron mines and a large portion of her production of coal. She has to go into foreign countries to secure her raw materials and no longer controls them, and as long as the map remains as it was fixed at Versailles Germany no longer will be a competitor in America in the heavy production of iron and steel in the markets of the world.

Of course, the committee has very properly made some slight reduction in the schedule, and I admit that it is not a matter of any great importance, but I do not believe that you are going to benefit the industry by pretending that you are wet-nursing it. An old-time, broken-down furnace that was inadvisedly located must go out of business, and go out forever, just as the New England furnaces went out of commission more than half a century ago when the development of iron and coal fields around Pittsburgh supplanted them. So there are many ill-advised furnaces that are going to perish, not through any tariff or lack of tariff, not through anybody's hands, but because of new developments and new fields of developments that they can not meet.

It is from furnaces of that kind—I will not name them, because I do not care to reflect on them—that evidence was obtained before the committee. There is not a man on the committee who has studied the question who, I am sure, has not had that class of furnace man before him. I am not criticizing them. They come and want to be saved. They have just gone through the Great War. Probably most of their furnaces had been out of blast for many years before. The exigencies of the Great War and the pyramiding of prices of iron during the war put some of them back into commission, and they would like to have you stimulate them with a tariff so they can remain in commission. But the rate of $1.25 a ton would do them no more good and would be of no more service to them than if you left them on the free list.

I want to say another thing to the committee. I am talking about the modern, up-to-date furnace. The modern, up-to-date furnace is making by-product coke, and there have been times in recent years when the profit from the by-product coke amounted to more than the profits from the pig iron. I do not say that is the case to-day or that it will be in the immediate future, but they have a profitable business in by-product coke, and in this bill as to another industry you are proceeding to give them a monopoly of the American market, not by putting on a tariff but by putting an embargo upon the foreign prod-

ucts which come in to compete with products made out of by-product coke.

Mr. NICHOLSON. Mr. President, will the Senator yield for a question?

Mr. UNDERWOOD. I yield to the Senator.

Mr. NICHOLSON. The Senator has referred to the efficiency of the American furnace as compared with the European furnace, and our advantages as to raw material, and so forth. What is the difference in the cost of labor at home and abroad on the products to which he has made special reference?

Mr. UNDERWOOD. It will be very small. My recollection—and I am speaking only from recollection—is that 10 years ago the actual furnace cost of labor, not including, of course, the mining cost, in the production of a ton of pig iron was $1.25. Of course it costs something on the other side; in fact, I think on account of the efficiency of labor here the actual difference is not very great, because the Senator will understand that in the furnaces the principal charge after payment is made for the raw material is the cost of the investment in the plant—the interest charge. Comparatively few men are required to handle a furnace. To-day furnaces are run by machinery; machinery has taken the place of men around the furnaces as they were run 20 or 30 years ago.

Mr. NICHOLSON. But is it not a fact that the European laborers work longer hours than do the American laborers?

Mr. UNDERWOOD. I think not. If the Senator had read the newspaper the other day he would have seen that the President of the United States appealed to the iron producers of the country to put their labor on shorter hours than 12 hours a day. I should be very glad to see that done, if it were possible. Furnaces must work their men in shifts; they can not work them on an 8-hour day; they have got either to work on a 12-hour day or on an 8-hour day. The present practice is to work a 12-hour day. I do not know of any European furnaces that are working their men longer than 12 hours, for, as I have stated, they have to work in shifts. So the question of labor is simply a protection joke. When it comes to this industry it does not exist; it is immaterial. There may be some high-grade goods in the production of which labor counts for a great deal, but it is a very small question in this industry yet, as I have stated, it is proposed to give enormous protection through the by-products which are made out of coke to every man who runs a furnace. Of course, in the case of the man who operates the old-style furnace and makes beehive-oven coke and lets the by-products go up into the air, who has not put in automatic hoists and automatic tipples, I agree with the Senator that there is considerable difference; but American industry has passed that point. Of course, if it is desired to protect a back number, then you can write your tariff bill on the basis of the back numbers; but it is not true that the great American industry is conducted on that basis.

I am not going to take much further time in regard to this matter, except to say that long before the World War the furnaces in which I have an interest were exporting iron to Italy. Since the war has closed the thing which has brought the district in which my home is located back into industrial life—for the furnaces there were closed up pretty nearly tight for a year—has been the export of these iron and steel products to the Orient, to Japan and China, and also to Cuba. In my judgment, the same cause has revived the industry elsewhere, although not entirely so; but now when we can go across the seas and sell abroad, the Committee on Finance comes here and says the industry must be fostered by a protective tariff.

In speaking in this manner I desire to say that I myself am not making any sacrifices. It would not hurt the business in which I am engaged by so much as the snap of my finger if the article were put on the free list or if the duty were left where it now is. Senators on the other side in advocating the rates proposed are simply playing a little joke on the American people; that is all it amounts to.

Before the Great War, 10 years ago, when the present tariff law was written, and this article was put on the free list, the industry produced $25,000,000 or $30,000,000 worth of commodities, and the imports were under $50,000 a year, as I recollect.

There was some little iron imported; I think it was called "Scotch gray" iron, which, as I recall, was used as a mixture. It used to come across the border, and it comes now, because we do not make an iron of that kind, and for certain grades of iron it is needed. A very small quantity of it comes in, and it will always come. It is not a direct competitor with merchantable bar pig iron.

There are some figures which have been obtained by the Tariff Commission which I want to place into the record, and then I shall let the Senate do what they please in reference to the item. There is no use of my reading into the record the description and the uses of pig iron, because everybody knows them. I wish to say, though, in passing that pig iron is no longer used as pig for the manufacture of steel. The pig metal comes out of the modern up-to-date steel furnace in a molten shape and passes, without being cooled, into the steel converter and then into the roller. As a rule, the pig iron that we speak of to-day is the merchant bar pig that is used in foundries and machine plants and pipe works; of course, it is pig metal, but it is not converted into pig bars. Therefore there is practically no competition in that line at all. Of course, there are occasional cases where pig metal is heated over again and used, but they are exceptional cases.

Let us see what the production of pig is. The domestic production in 1913 was 30,966,152 long tons, out of an estimated world's total of 72,400,000 tons. So we find that nearly 10 years ago, when the present law was written, we were producing in this country nearly half of the entire world's production of pig. In 1918 that production had increased to 39,054,000 long tons, valued at $1,180,000,000 in round figures. In 1920, after conclusion of the war, the production had dropped to 33,925,000 long tons. We can say that, in round figures, America to-day has a production capacity of about 40,000,000 tons of pig. I do not mean that it is making that much, but I mean that it could make that much if the market were here to consume it.

In 1913 the pig production of Germany was 18,987,000 tons; in the United Kingdom it was 10,316,000 tons, and in France 5,227,000 tons. In 1917 the output of Germany was 12,932,000 gross tons and of the United Kingdom 9,640,000 tons, showing that both countries had fallen off in production, notwithstanding they were in the midst of a war.

The figures I have given represent practically the output of the world. There are furnaces elsewhere; there are furnaces in Belgium and some in Japan; but, practically speaking, the figures I have read represent the total output of the world; and the American iron manufacturer stands the master of the world; yet the committee comes here now and proposes to wet-nurse the ironmaster of the world.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Kentucky?

Mr. UNDERWOOD. I do.

Mr. STANLEY. I do not know whether the Senator touched upon the subject before I came into the Chamber; but I am under the impression—and the Senator from Alabama will correct me if I am wrong—that in the production of pig iron in the United States the natural conditions are such that no other country in the world can approach us in the cheapness or the facility with which the commodity is produced. In this country we find the ore, limestone, and coal, in Birmingham, for instance, adjacent, almost infinitely cheapening the assembling of the essential elements necessary to the operation of a blast furnace and to the production of the metal.

In Chicago, Pittsburgh, and other places the utilization of a peculiar formation of ore, which is almost like sand, instead of being found in hard banks or walls of taconite or jasper or other hard substances, and which is consequently produced very cheaply, puts us in an absolutely unique position so far as production of pig iron is concerned.

Mr. UNDERWOOD. Undoubtedly, in normal times that is true.

Before I take my seat I wish to say that unquestionably during the war there was an advance of wages in the pig-iron industry and in the iron and steel industry such as occurred in other industries; but, as in the case of other industries, wages are falling and will reach their natural level the same here as in other countries; but, as I have already said, the cost of labor in producing pig iron is not an essential element of importance, and the conditions to-day are such that the imports are going back to where they previously were.

Bear in mind that in 1920 we produced in America 36,925,000 long tons of pig iron, while the total importations were 107,547 tons. That was a very large importation, the largest, I think, in our history, because in the next year, 1921, for nine months the importations fell off to 20,000 tons, and in 1919 they were only 58,000 tons. So it will be seen that with a production and consumption of over 36,000,000 tons in 1920 the entire imports amounted to only 100,000 tons of strictly pig iron.

Mr. STANLEY. Mr. President, may I interrupt the Senator there? I should like to ask a question.

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Kentucky?

Mr. UNDERWOOD. I yield for a question.

Mr. STANLEY. It is my impression—and I will ask the Senator if it is not correct—that this little dribble of pig iron

which comes in reaches the Pacific coast, to which section, on account of the haul of several thousand miles from the producing centers of pig iron in this country, the freight rates are so great as to make the importations possible?

Mr. UNDERWOOD. I think that is more a theory than a fact, although it has been often asserted. Some pig is imported on the Pacific coast, but it must be borne in mind that Japan, the country from which such importations are supposed to come, has no real coking coal, but has to go to China to get coal. It must also be remembered that Japan has a very inferior grade of ore and is trying to increase her ore supply from a foreign country, and that the only way the product can be brought to the Pacific coast at all is by Japanese ships carrying it in ballast to a very limited area.

Mr. SMOOT. It comes from Belgium.

Mr. UNDERWOOD. Of course, the Belgian furnaces may send some around the Horn, but I have never heard in all my life that Belgium was a rival of this country in the production of pig.

Mr. SMOOT. Only on the Pacific coast.

Mr. UNDERWOOD. Of course, only on the Pacific coast, and why? Because certain vessels can sail from Belgium to the Pacific coast in ballast, and the small amount carried in the hold of a vessel in ballast can be carried practically without cost and dumped. To say that we must protect the American industry against such importations, when they can not amount to one-hundredth of 1 per cent of the American production, is simply absurd. It is one of those jokes around which tariff duties are sometimes written, but it is not a fact that on account of such importations our industry can be put in jeopardy.

Now listen to this. I have just pointed out the year of greatest importation, which was 1920, when 107,000 tons were imported, as compared with a domestic production of 36,900,000 tons. We exported that year to other countries 212,000 tons, valued at $9,000,000, against the importation of 107,000 tons, valued at $4,000,000; and in the year 1918 we exported 261,000 tons; in 1919, 316,000 tons. So it goes. For years the exportations of this article have far exceeded the importations.

As to the question of scrap, I have no objection to your putting scrap iron 25 cents cheaper than you do pig iron, if you want to put any tax on pig. Scrap iron is just waste iron that can be used for exactly the same purposes for which pig iron is used, and some people will ask a lower price for imports; others do not want it to compete with pig at all. When I had the writing of a bill I thought they both ought to go on the free list, and I put them there, but if you are going to put $1.25 on pig iron there is nothing out of the way, so far as the comparison is concerned, in putting a dollar on scrap, except that it is simply an idiotic, foolish performance on the part of the Congress of the United States.

Mr. McCUMBER. Mr. President, I should like to ask the Senator a question before he takes his seat. The Senator has considerable knowledge about this subject that is not possessed by some of the rest of us, and he can speak as an expert.

I want to ask the Senator whether or not the companies in his State are in any trust or combine with the other great producers of pig iron in the United States?

Mr. UNDERWOOD. If I answered the question technically, I should say "no." The United States Steel Corporation owns the Tennessee Coal & Iron Co., and that is the largest company in the Birmingham district or in Alabama; but ordinarily the Tennessee Coal & Iron Co. does not produce merchantable pig. It converts its pig into steel. It does make pig iron, but it converts its pig, as a rule, into steel and sells it as steel. Sometimes, when the steel market is not very good and there is a better demand for iron I think it does make merchantable pig. That is true of the Tennessee company. The other big companies in that district are the Republic Iron & Steel Co., which has connections throughout the country, but is not in the United States Steel Corporation—entirely independent of it. Then there is the Schloss-Sheffield Iron & Steel Co., which is entirely local to Alabama, and entirely independent; and then there is the Woodward Iron Co., which is entirely independent. These independent furnaces make practically all of the pig metal that is produced in Alabama that is sold as pig and not as steel.

Mr. McCUMBER. Then the Senator believes that there at least is the usual competition that you will find in any large industry?

Mr. UNDERWOOD. In pig?

Mr. McCUMBER. Yes; in the production of pig.

Mr. UNDERWOOD. In the production of pig—there is no question that that is a highly competitive article. The Steel Corporation produces very little pig in the market as pig iron to sell. The pig metal that is converted into pig iron is sold to foundries and pipe manufactories and independent iron-rolling mills, and is mostly sold to a class of trade that is independent of the Steel Corporation, and they are entirely independent plants.

Mr. McCUMBER. Does the Senator think, then, that the competition, taking into consideration the very small amount of imports and this tariff duty, would keep the prices down to about what they are now? In other words, the price in the United States will not be increased because of the $1.25 per ton?

Mr. UNDERWOOD. No; I do not think it will in pig iron. I agree with the Senator in pig iron. Except some special grades, or a little iron that may come in in the ballast of ships, I do not think any pig iron can get into this country at all; and there is a high degree of competition in the production of pig iron in the United States. I am not charging the Senator in this case—I would charge him with it in a minute if I thought he was guilty—with putting this $1.25 on pig iron and saying that it is going to affect the price. I think it is just a fool thing to do. I think that is all there is to it.

Mr. McCUMBER. Let us see, now, whether it is or not. The Senator made the statement just a short time ago that it would amount to an embargo.

Mr. UNDERWOOD. Oh, no; I have not said that.

Mr. McCUMBER. If $1.25 a ton would amount to an embargo, how does it happen that $2.50 a ton, which is double the amount, did not amount to an embargo?

Mr. UNDERWOOD. I will say to the Senator that I have not said that this would amount to an embargo.

Mr. McCUMBER. I so understood the Senator.

Mr. UNDERWOOD. I say that it is on the free list to-day, and the free list is practically an embargo on pig iron, except some little that can drift in as ballast, and some little special grades that are brought in here as Scotch gray; but, practically speaking, there is no importation of pig iron in comparison with the great American production. None comes in under the free list. None is going to come in under the $1.25, and very little came in under the $2.50.

There was a time when you had a five-dollar rate on pig iron, and there was importation; but that was back in the days before the American iron and steel business had grown to a point where it supplied the American market, and where it was strong enough and up-to-date enough and forceful enough to go out and fight its own battles in the markets of the world. There was a time in America when the normal price for pig iron was $40 a ton. Of course, sometimes they got $40 per ton during the late war, but only for a very short time. If I recollect aright—I have not recently looked at the figures—I think that pig iron in my home district has dropped down to something like $15 or $16 a ton, and probably at Pittsburgh it is somewhere in the neighborhood of $19 or $20 a ton to-day, and under normal conditions that is not a bad market if we could get a market and sell what we have. The difficulty that is confronting us is not a question of somebody on the outside fighting us; it is somebody on the inside fighting us and destroying the markets to which we want to sell our products.

Mr. McCUMBER. Mr. President, I will consider this, then, from the Senator's own standpoint—that is, that we do not need the protection—and we will assume that this is a tariff for revenue only. The Senator thinks that because the imports, as compared with the production, are light, therefore we should have no duty upon the imports. I do not think it is going to affect the price, and that is the reason why I asked the Senator, to get his expert knowledge upon that subject. He does not think that this duty is going to raise the price in the United States, but he objects to it and calls it foolish because it is only 2 or 3 per cent, or whatever it may be, on the enormous entire output of the United States. Why, we have levied duties here upon articles that will only bring us in a few hundred dollars; some of them a few thousand dollars; so, if it is not going to affect the price, it seems to me that from a purely revenue standpoint we ought not to object to a duty that would bring us in from half to three-quarters of a million dollars a year when we shall need a great many of those half-millions and three-quarter millions in the next year or two.

Mr. UNDERWOOD. The Senator knows perfectly well that he will never get anything like that out of this tax. In no average year will the importations amount to 50,000 tons, and at $1.25 a ton the tax would be somewhere about $60,000.

Mr. McCUMBER. Let us look at the statistics a minute.

Mr. UNDERWOOD. Here they are. There is one year, the highest year, when you had imports as shown by the figures of the Tariff Commission of 107,000 tons, and at the $1.25 a ton that you propose to levy your income would amount to $134,000.

Mr. McCUMBER. I take the Tariff Commission Summary of date 1921; and on page 53, under the pig-iron summary table,

I find that in 1910, when the duty was $2.50 a ton, the value of the imports for consumption was $6,723,946, and the amount of duty was $719,789.72. That, of course, took in all——

Mr. UNDERWOOD. No; I will tell the Senator what he is wading into. He is off on his figures.

Mr. McCUMBER. I am not off on the figures.

Mr. UNDERWOOD. I think the Senator will find out that there was not more than 200,000 tons, or not much over that; but, more than that——

Mr. McCUMBER. Mr. President——

Mr. UNDERWOOD. If the Senator will listen to me a moment, I will tell him the situation.

Mr. McCUMBER. I certainly will.

Mr. UNDERWOOD. At that time I think scrap was included in there; but, more than that, at that time practically all the ferro-alloys in the iron and steel business were included under that item, and continued to be included under that item until I took them out of the pig-iron schedule and made a special schedule for them myself; and of course the alloys were of very much greater value than the pig, and of course they were importations that came in in a very different way. I think you have put entirely too great a tax on the alloys now, but I discriminated between the alloys and the pig by putting a reasonable tax on the alloys and putting pig on the free list, and in your statistics at that time they were all classed as pig.

Mr. McCUMBER. This does include kentledge, ferromanganese, ferrosilicon, and spiegeleisen. It takes in everything.

Mr. UNDERWOOD. They are all included.

Mr. McCUMBER. It is all put in at $2.50 under the Payne-Aldrich bill, and we received $719,789 that year. Of course, as that includes all of them, I do not know just what the proper division is.

The next year we got $573,000.

In 1912 we got $329,000.

In 1913 we got $481,000.

In 1914 we got $138,000.

Then came the new bill, and in 1915 it dropped to $54,000; but if we can get even half of that or a quarter of that under this bill, and it is not going to change the price materially, the amount that we will secure from it is worth the revenue duty, irrespective of any matter of protection.

Mr. UNDERWOOD. Of course, if the Senator carries that out, he should advocate a duty on coffee and tea, and on everything else it is possible to raise revenue on, if he is going to carry out that theory of raising revenue.

Mr. McCUMBER. If we put a duty on coffee or tea, it would raise the price of the coffee or tea; but the Senator says it will not raise the price of this product.

Mr. UNDERWOOD. I shall not attempt to make a statement here which I can not justify. I know this is such a foolish proposition, and the competition is so little, that the only thing in the world you can do, and the only thing this is put in here for is to fool some lame-legged people who happen to be in the furnace business and are unfortunate, to make them think they are going to get some protection under this bill; and that is all there is to it. This $1.25 will not help them a particle. You will have it as an excuse, as you go along, and say that since you tax the raw material you must put compensatory duties as you climb the ladder into high protection.

Mr. SMOOT. Mr. President, in the main I agree with the Senator from Alabama, and I do not want the Senate to think for one minute that the committee did not recognize the fact that pig iron can be produced in the United States, under normal conditions, as cheaply as anywhere in all the world. There is no doubt about that at all. You ask why we put a duty of $1.25 a ton on pig iron, then. We did it for the very purpose of collecting revenue, because of the fact that the Pacific coast market is virtually controlled, not by Japan, as the Senator said, but by Belgium. Pig iron goes there from Belgium as ballast, and they get the market price there, no matter what that price may be. They take the foreign price, they figure what the freight is, and they charge the foreign price plus the freight. I feel that if they are going into that market, and have that market for themselves, they ought to pay the Government of the United States $1.25 a ton for having that market.

Mr. UNDERWOOD. If the Senator will allow me to interrupt him, they do not have that market to themselves. The Birmingham district is shipping its iron into that market through the Panama Canal right now. So you need not think that Belgium or any other country have that market to themselves. They may be able to get in to a small extent.

Mr. SMOOT. The fact is that in 1920 there were 107,000 tons of pig iron imported into the United States, and almost all of that went to the Pacific coast, and most all of it came from Belgium. With a rate of $1.25 a ton, we would have collected $134,000, and it would not have cost the California people one penny more, but the Belgians would have paid that amount of money into the Treasury of the United States.

Mr. UNDERWOOD. I am not sure it would not have cost the California people more, because people are practical. If pig from a competitive district, say, the Birmingham district, is going there and meeting the foreigner, and iron pipe is going there and meeting them now, and you put an embargo on that competitive point of $1.25 a ton, do you think the man who is going to sell out there will not take advantage of the $1.25 a ton?

Mr. SMOOT. Not at all.

Mr. UNDERWOOD. Why will he not?

Mr. SMOOT. Because, if there is an embargo, Birmingham, Ala., will get her pig iron in there just as cheaply as she possibly can.

Mr. UNDERWOOD. But she can sell it $1.25 a ton higher than she can now.

Mr. SMOOT. If the Senator thinks there is no competition, then he is right; but I have understood that there was competition.

Mr. UNDERWOOD. I was speaking to the Senator of general competition in the United States, but when you come to that particular market, there is no over-all rate for pig iron across the continent now, when it goes by rail.

Mr. SMOOT. Of course, there is a smelter in Colorado, too.

Mr. UNDERWOOD. It costs more for the smelter in Colorado to reach Seattle than it does by water from Alabama.

Mr. SMOOT. Yes; I agree that it would to Seattle.

Mr. CUMMINS. Mr. President, I would like to ask a question of the Senator from Utah, as this is one of the few schedules that I know something about. Is it true that in fixing the duties upon the manufactured forms of steel, the bars, and plates, and sheets, and all other forms of steel, no allowance has been given in this schedule for the $1.25 levied upon pig iron?

Mr. SMOOT. No compensatory duty whatever has been allowed, and the committee recognized the fact that they could make it as cheaply in the steel factories here, under normal conditions, as anywhere in the world. It is only a question of collecting money for the Treasury of the United States.

Mr. CUMMINS. I assumed it would be recognized that we did not need a duty on pig iron for competitive purposes, but I was a little curious to know how the committee justified some of the duties on the manufactured forms of steel which are found in this schedule, without the aid of the duty of $1.25 a ton on the raw material.

Mr. SMOOT. When we reach those items, we will discuss that. I assure the Senator that there is no compensatory duty given for the $1.25 a ton on pig iron.

Mr. CUMMINS. I am glad to hear that. I think it is logical.

Mr. SMOOT. As the Senator from North Dakota said, in 1910 we collected $235,806 on pig iron alone, and in 1917, with the duty of $1.25 a ton, we collected a little over $50,000. In 1909 we collected $58,000, and in 1920 we collected $107,000 on pig iron alone.

Mr. UNDERWOOD. As to 1920, that is a legitimate argument, but in 1910, as I called the Senator's attention to it, I know you have ferro-alloys in that schedule.

Mr. SMOOT. Not in the $235,806. In the seven hundred and odd thousand, of which the Senator spoke, we did.

Mr. UNDERWOOD. I am talking about that paragraph. They were in that paragraph.

Mr. SMOOT. But I am speaking of pig iron alone.

Mr. UNDERWOOD. Of course, the iron industry had not progressed to the point where it has now; and I do not say that some will not come in, but when you put the tax on pig, if you allow me to express it, it is foolish to say it aids. It does not help the broken-down furnace, and the good furnace does not need it. It is just a camouflage to hold up a line of industry where the products ought to be free. You ought to take the shackles off it. This is a grown man, and he wants to get out in the world and fight with the world instead of being shackled down with a tariff duty.

Mr. SMOOT. As far as the obsolete plants are concerned, I fully agree with the Senator that $1.25 a ton is no good to them whatever. We could put $5 a ton on this and it would not do the obsolete plants any good whatever. In fact, there was not one of them which even came before the committee and asked for a higher rate. Probably they knew very well they would not get it.

As far as our exports are concerned, they go to Canada and South America and the Far East, and it is a question of freight entirely. The whole question as to competition in pig iron is freight. Another thing to be considered is the fact that

we never export a pound of pig iron to any country where pig iron is made. That, of course, is another evidence that freight is the controlling factor.

Mr. UNDERWOOD. The Senator should not say we never export a pound of pig iron to any country.

Mr. SMOOT. Outside of Canada.

Mr. UNDERWOOD. The Senator should not say that, either. I do not think it has often been done, but I know pig iron has been exported from the Birmingham district to England—not recently, but it has been done.

Mr. SMOOT. When there was overproduction, it may have been shipped in ballast, a dumping proposition. Of course that may happen, but not in the regular order of business.

Mr. UNDERWOOD. I agree with the Senator that that is true, and that is just the reason why they do not send it in here in the ordinary course of business.

Mr. SMOOT. As far as the committee is concerned, they are only asking this for revenue purposes.

Mr. UNDERWOOD. Of course, if I move to strike out $1.25, which the committee has put in, under the rule by which we are operating it would fall under the basket clause and have a higher rate of duty, so we can not vote on it now; but when the committee amendments are disposed of and we can offer amendments from the floor, I hope the committee will propose an amendment to put it back where it is now—on the free list.

Mr. STANLEY. Mr. President, I hope at a later date to give the Senate some reasons for this apparently innocent duty of $1.25 a ton on pig iron. The Senator from North Dakota [Mr. MCCUMBER] asked the Senator from Alabama [Mr. UNDERWOOD] a very pertinent question—whether or not this duty of $1.25 a ton would have any effect on monopoly or the fixing of prices. I can say, I think authoritatively, that the whole fabric of steel prices, from top to bottom, is based upon the price of pig iron. It was until very recently—and from speaking with the Senator from Alabama I understand it is still the case—that if you buy, for future delivery, billets, beams, structural shapes, or rails, or any character of what they call semifinished steel, ship plates, ingots, or bars for the making of wire, horseshoes, or anything of that kind, you are not given a fixed price; you are given a price for future delivery based upon the price of pig iron, and the control of the price of pig iron is the key to the control of the price of every other fabrication of iron or steel.

This is so true that in an effort to control the price of steel products, theories as to a coal trust are found to be utterly without foundation. The price of coke is not controlled in this country. The price of coal is not fixed by an ironclad trust, as far as I can see, except at times. The prices of ores are competitive and in a way the prices of iron are competitive; that is, the great purchasers of pig iron let the little furnace man here and there and yonder think he is selling in a competitive market, but the great steel corporations' production of steel is greater—or was until very recently, and I think it is still—than its production of pig iron, although the ton of pig iron going into the furnace will not produce a ton of steel, of course. There is waste in the process. With a capacity more than sufficient to produce all the raw pig iron they can dispose of, they deliberately shut down their furnaces and tie up the pig iron of their competitors. The price of pig iron is absolutely controlled by the great producers of this commodity. Senators must understand that a man can produce coke, he can produce ore, but he can not produce pig iron without millions of investment.

I know of no apparatus as costly, as intricate, as difficult of operation as a great iron furnace. When you think of the rail facilities that are necessary to assemble the raw materials, of the cost of the furnace itself, it requires many millions. The producers of pig iron for years have been assured of a more regular market than those who produce and sell steel products in order to absolutely control the price of pig iron. When you place a duty upon pig iron, it amounts to a practical embargo except in a few ports, and you lend direct aid and comfort to the most powerful organization on the face of the globe. In the most delicate and intricate point in the whole arrangement of prices there is nothing that so assists the makers of steel in this country in the control of the price of their product as an absolute ironclad control of the price of pig iron and of pig metal.

In addition to that, as the Senator from Alabama has well said, and it is not necessary to repeat it, the duty is indefensible for another reason. There are a few communities on this continent, highly progressive, on the Pacific coast, that are under a tremendous handicap on account of the inordinate cost of iron and steel products, being removed thousands of miles in many instances from the production centers of iron and steel. With the exception of the Colorado blast furnaces, I know of no place west of Chicago or west of Duluth, between there and the Pacific Ocean, where iron and steel is produced in any great quantity for shipment abroad or for distribution over the country.

Mr. SMOOT. Mr. President, will the Senator yield?

Mr. STANLEY. I yield.

Mr. SMOOT. I want to say to the Senator, however, that within a very few years there will be another Pittsburgh in the southern part of Utah. We have there iron ore and coal sufficient to produce all the pig iron that will be needed in the United States for the next hundred years.

Mr. STANLEY. Yes; you have a great iron dike.

Mr. SMOOT. A mountain.

Mr. STANLEY. Yes; a mountain of iron, of almost pure iron. It runs almost like a dike, being, as I understand it, a solid wall of iron.

Mr. SMOOT. A range of mountains.

Mr. STANLEY. Yes; but the iron is such that if you can blast it out and crush it and get it to the furnace for the cost of producing pig iron you will have performed a miracle. How are you going to compete with the Mesabi Range, where they dip it up with a scoop shovel? More than that, you have never yet been able to get a coal that is free from ash and that will produce a coking coal that will bear the weight of a furnace.

Mr. SMOOT. We shall have it in a very few years.

Mr. STANLEY. That is a dream worthy of the genius of the Senator from Utah. You have never produced a pound of ore yet of merchantable quality, and I doubt if you ever will, although I am not such an expert as the Senator from Alabama [Mr. UNDERWOOD].

Under present conditions this vast area on the Pacific coast is entitled to get its iron as cheaply as it can. This tax will place an additional burden upon those great cities on the Pacific coast, in addition to the handicap they already bear. Owing to the impossibility of getting iron by rail, they are forced to get it by long, circuitous routes from Alabama, taking it down the Warrior River, through the Gulf of Mexico, through the canal, and up to the western coast for thousands of miles. So the placing of an additional tax is essentially unjust, and they are entitled to the little dribble of pig iron that they can get from India, China, Belgium, or from any other country that can afford to ship it into that section of our country.

But the worst of it all is this: It will not be denied by any man, with even a casual knowledge of the iron business, that the price of pig iron fixes the price of all steel products, and when you put this duty of $1.25 a ton on pig iron that duty will be reflected in the prices charged by those who control the pig-iron market. They will demand compensatory duties all the way up to razor blades, and it will be paid over and over again by the consumer, while so far as protection to the producer is concerned, so far as saving him from cheaper labor or a cheaper product anywhere in the world, it is a pure joke.

It can not help any manufacturer who is selling in a competitive market. It can only help the trust that fixes the price of this product, if it does fix it, and until recently it did.

There are many reasons why, from the trust standpoint and from the standpoint of those who wish to have an absolute control of this output, this duty should be fixed. There is none from any rational standpoint. There is no argument that can be made in favor of it as a revenue duty or an essential protection to the home producer, or any other reason that will justify the imposition of the duty.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 48, lines 13 and 14, to strike out "including scrap tin plate, $1.25," and insert in lieu thereof "$1," so as to read:

Wrought and cast scrap iron, and scrap steel, $1 per ton.

The amendment was agreed to.

The next amendment was, on page 48, line 16, to strike out "45" and insert "30," so as to read:

Provided, That spiegeleisen for the purposes of this act shall be an iron manganese alloy containing less than 30 per cent of manganese.

Mr. UNDERWOOD. That is substantially my recollection of the present law, and although I think it a full tax I shall not raise any question about it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, in paragraph 302, page 48, line 20, to strike out "manganese ore or concentrates containing in excess of 30 per cent of metallic manganese, 1 cent per pound

on the metalic manganese contained therein; molybdenum," and to insert the word "molybdenum."

Mr. SMOOT. Mr. President, at the request of a number of Senators I ask that paragraph 302 may go over to-night.

Mr. UNDERWOOD. I am not objecting to that, but I want to ask a question about the paragraph before it goes over. If we strike manganese ore out of the paragraph and do not do anything else with it, it will fall into the basket clause and be taxed a high rate. I want to ask the Senator where the committee sent manganese when they struck it out here?

Mr. SMOOT. It was sent to the free list.

The PRESIDING OFFICER. Without objection, paragraph 302 will go over. The next amendment will be stated.

The next amendment was, on page 50, after line 22, to strike out:

PAR. 303. Muck bars and bar iron, square iron, rolled or hammered, comprising flats not less than 1 inch wide nor less than three-eighths of 1 inch thick, round iron not less than seven-sixteenths of 1 inch in diameter, one-fourth of 1 cent per pound; round iron, in coils or rods, less than seven-sixteenths of 1 inch in diameter, and bars and shapes of rolled or hammered iron, not specially provided for, five-tenths of 1 cent per pound; iron in slabs, blooms, loops, or other forms less finished than iron in bars, and more advanced than pig iron, except castings, two-tenths of 1 cent per pound: *Provided*, That all iron bars, blooms, billets, slabs, or loops in the manufacture of which charcoal is used as fuel shall be subject to a duty of three-tenths of 1 cent per pound.

And in lieu thereof to insert:

PAR. 303. Muck bars, bar iron, and round iron in coils or rods, iron in slabs, blooms, loops, or other forms less finished than iron in bars and more advanced than pig iron, except castings; all of the foregoing, valued at not over 1 cent per pound, two-tenths of 1 cent per pound; valued above 1 cent and not above 1½ cents per pound, three-tenths of 1 cent per pound; valued above 1½ and not above 2½ cents per pound, five-tenths of 1 cent per pound; valued above 2½ and not above 3½ cents per pound, eight-tenths of 1 cent per pound; valued above 3½ cents and not above 5 cents per pound, 1 cent per pound; valued above 5 cents per pound, 1½ cents per pound.

Mr. UNDERWOOD. Mr. President, I desire to say a few words in reference to this paragraph. In the first place, I want the Senate to remember that we have already had it stated that the tax on pig iron was put in here purely for revenue and not for the purpose of protection, according to the viewpoint of the committee, and was not put here to carry a compensatory duty into other schedules. I take that as the basis on which the next grade of iron comes, namely:

Muck bars, bar iron, and round iron in coils or rods, iron in slabs, blooms, loops, or other forms less finished than iron in bars and more advanced than pig iron.

This is not steel. It is wrought iron. It is what the blacksmiths use and that grade of iron. The advancement over pig is merely a question of the rolling mill—of going through the roller. The cost of conversion is not very great. When the present law was written, this class of iron was put in this form:

Muck bars, bar iron, square iron, rolled or hammered, round iron, in coils or rods, bars or shapes of rolled or hammered iron not specially provided for in this section, 5 per cent ad valorem.

Then slabs, blooms, loops, and other forms of finished iron of that kind were put on the free list. I do not know that it seriously affected the industry whether it had the rate of 5 per cent ad valorem or whether it was on the free list, but in the bill which the Senate Committee on Finance now reports it must be borne in mind that this is the basic paragraph, according to the views of the committee, because they have said that they did not carry the tax on pig iron into compensatory duties and that the other paragraphs are to be considered just as if we had no tax on pig iron at all. I have not worked out all the details to make the illustration in this matter, but it will be understood that the Finance Committee in writing the new bill have put muck bars, bar iron, and that class of iron on a specific rate basis, whereas the present law puts it on an ad valorem rate basis. In other words, the tax under this bill will be so much a pound, while the tax under the present law is a certain per cent of the value.

Bar iron is wrought iron in the form of bars. The rough iron bloom coming from the puddling furnace is first rolled into a flat bar, known as a muck bar or puddle bar. It is then cut into short lengths and the pieces piled together to be reheated. After reheating and rerolling the material is known as refined iron, refined bars, or, more commonly, merchant bars.

The production of the merchant-bar iron in 1917 amounted to 983,926 gross tons; in 1920, when the depression came, the production fell off to 663,032 tons. The imports may be tabulated under three general heads—muck bars, bar iron, and slabs.

Bear in mind that the production in 1917 was nearly 1,000,000 gross tons, and that it was 663,032 gross tons in 1920. The imports of muck bars under the 5 per cent ad valorem duty in 1920 were only 717 tons. Of bar iron in 1920 the imports amounted to 3,900 tons, and the imports of blooms amounted to 401,000 tons, showing that outside of blooms there were practically no imports as compared to the American production of this article.

At the same time we exported abroad in 1918, 141,000,000 pounds of this article; in 1920 we imported 104,000,000 pounds, which amounted in short tons to about 52,000 tons. So that it is shown by the figures of the Tariff Commission that the imports were comparatively small, and that we were enabled to export large quantities of this iron to Japan, Canada, the United Kingdom, Brazil, and Cuba.

Now, I want to call attention to the difference in the tax. The first tax that appears in this bill on muck bars and bar iron, not less than 1 inch in width nor less than three-eighths of 1 inch in thickness, round iron not less than seven-sixteenths of 1 inch in diameter, the duty is one-fourth of 1 cent per pound.

That is twenty-five one-hundredths of 1 cent. The value of muck bars for 1921, the latest figures, was about 4.6 cents, which would make the duty at 5 per cent about twenty-three one-thousandths of 1 cent. So the first bracket is not very different from the present tax on the valuation of 1921; but in the next bracket, where the same classification prevails, the duty is increased from twenty-five one-hundredths of 1 cent to five-tenths of 1 cent. There is not a great deal of difference in these brackets, but as to certain classes of them the increase will amount to half a cent a pound; that is, the blacksmith or the farmer who uses this class of iron—and it is made into iron articles for use around the farm and around the house—will be taxed a half cent a pound, which will be about double the tax on that grade as compared to the tax levied under the present law.

This tax is just beginning to pyramid. The increases, as I have stated, in this particular schedule are not so very great; but I move to substitute for paragraph 303, which is entirely a Senate committee amendment, the paragraph of the present law, which reads as follows:

PAR. 103. Muck bars, bar iron, square iron, rolled or hammered, round iron, in coils or rods, bars or shapes of rolled or hammered iron not specially provided for in this section, 5 per cent ad valorem.

That does not take care of the blooms and the slabs, but if the Senate shall adopt this substitute for paragraph 303, I then shall offer a similar paragraph covering blooms and slabs. If the Senate rejects it—and I suppose it will do so, as it has heretofore done in reference to amendments offered to this bill—it would be unnecessary to offer an additional amendment proposing to provide for blooms and slabs. The amendment which I offer is to make this paragraph conform to the present law.

Mr. McCUMBER. Will the Senator yield to me to ask unanimous consent that when the Senate closes its session for the calendar day it take a recess until to-morrow at 11 o'clock a. m.?

Mr. UNDERWOOD. I should like to ask if the Senator from North Dakota desires to go further to-night than paragraph 306?

Mr. McCUMBER. No; if we can get through so far as that, I think we may then take a recess.

Mr. UNDERWOOD. Then I shall not object to the Senator's request. I asked the question because I did not care to go into paragraph 307 to-night.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Dakota? The Chair hears none, and it is so ordered.

Mr. SMOOT. Mr. President, I simply wish to say in reply to the Senator from Alabama that the rates provided for in the bill as a substitute for the House provision are the rates that will be found in paragraph 304 covering steel products of the same character. The only change between the two rates is to be found in the last item, of wrought iron valued above 5 cents per pound, on which a duty of 1½ cents per pound is imposed, while in the case of the steel product the duty is 1.7 cents per pound. Outside of that, the rates on wrought iron, muck bars and bar iron, and round iron are exactly the same as on the steel of the same size and value. Of course, of the product valued above 5 cents a pound very little comes into the United States, and that which does come over that value is Swedish bar iron.

Mr. President, wrought iron, so far as labor is concerned, is nearly twice as expensive to produce as is steel of the same character. The Tariff Commission in their report say:

The process commonly employed at the present time is called "hand puddling," in which the iron is heated on the working hearth until it becomes pasty but not liquid. In order to obtain effective oxidation fresh surfaces must be exposed to the hot gases and the oxidizing agents (mill scale and ore). The boiling of gases (oxides of carbon) in the mass is not sufficient, so the mass must be agitated with iron bars (rabbled) almost continuously after it begins to fuse and until all impurities are removed from the iron and the mixture of iron and slag is balled up and removed from the furnace to the squeezer. The intermediate steps are called "graining," "boil," and the "turn." The

work involves an enormous amount of heavy physical labor, combined with a high degree of skill on the part of the operators, in spite of all the care that can be given in the selection of raw materials and chemical control.

I will not take the time to read further, but the Tariff Commission impressed upon the committee and upon all who have read their report that the making of wrought iron is very much more difficult than the making of steel, and whatever rate there is upon steel certainly ought to be applied to wrought iron, because of the fact that a great element in the cost is labor. Wrought iron is not handled as steel is handled, by machinery, but the work has to be performed by manual labor, as the Tariff Commission report.

Mr. STANLEY. Mr. President, is the Senator under the impression that without the imposition of the duty suggested American labor would be at a disadvantage as compared to foreign labor?

Mr. SMOOT. There is no doubt of that at all, I will say to the Senator.

Mr. STANLEY. Does the Senator think merchant bars would be imported in any great quantity if there were no duty whatever on them?

Mr. SMOOT. They would be imported; they are the very things that would be imported if any commodity in this whole schedule should be imported. We could not produce them in this country without an adequate duty. In the case of the foreign article the labor is 19.23 per cent of the cost, while in this country it is a little over 45 per cent of the cost. In many items, such as pig iron, labor cuts not a great figure, because most of the work is done by machinery; but the kind of iron we are now discussing must be produced by labor, and skilled labor at that. If there is one item in this schedule that requires a productive duty it is wrought iron.

Mr. STANLEY. I have not the figures before me, but I was under the impression from what the Senator from Alabama said that the importation of merchant bars and bar iron were comparatively trifling as compared to our exports.

Mr. SMOOT. Of course, most of the exports go to Canada. They are right here at our door and they buy the commodity just as they want to, a little at a time, and do not have to wait to send over to Sweden for it.

Mr. STANLEY. What I wish to suggest to the Senator is that if the bar iron could be dug up like coal or produced like wheat, or something of that kind, the situation would be different, but that by reason of the fact that there is a considerable labor cost in its conversion, as the steel people call it, from iron into merchant bars, there would be danger of foreign competition; but the infinitely cheap methods by which we produce the molten iron in this country as against the methods by which they produce the iron coming from the furnaces in other countries render the importation of merchant bars practically impossible, I should say, without any duty of that kind.

Mr. SMOOT. No; if the Senator will read the report he will find out that the raw product here, as I may call it, is 50–50 as between Sweden and this country—just about the same.

Mr. STANLEY. What is the rate of duty on it?

Mr. SMOOT. The rate of duty on this product now is exactly the same as the rate of duty on steel of the same size—if valued at not over 1 cent per pound, two-tenths of 1 cent per pound; valued above 1 cent and not more than 1½ cents, three-tenths of a cent a pound; and then it is graded according to the size, of course, just the same as steel is. The House carried out the plan of having wrought iron carry a lower rate than steel, and they made a mistake, and we are simply correcting it.

Mr. STANLEY. I entirely concur with the Senator in the propriety, from his point of view, of a higher duty upon wrought iron than upon steel of the same quality.

Mr. SMOOT. Yes; and that is what we have done.

Mr. STANLEY. I do not think either duty is necessary.

Mr. SMOOT. Of course that is another question. That is a question of opinion. I do know this: If our steel schedule, the next schedule, 304, as agreed to in the House, is correct, then we must put this in here, because of the fact that this ought to carry in reality a little higher rate than the steel.

Mr. UNDERWOOD. Mr. President, I listened to the Senator's defense of this increased duty, and his defense is based on the fact that the House committee and the Finance Committee supporting it have taxed bar steel somewhat similar to this at a certain rate of duty, and therefore we must tax wrought iron at the same rate of duty, although up to this time the Senate has not passed on the steel schedule.

Mr. SMOOT. That is true.

Mr. UNDERWOOD. As far as the cost is concerned, of course, the Senator is right. It is generally known that in the case of most steel products now it is cheaper to make steel than it is to make iron, but that is no argument to justify this proposition. The argument I make is simply this—that you have a tax on a part of this item and the rest of it is on the free list, and the total importations coming in under this condition with a lower rate of tax are less than 1 per cent.

Mr. SMOOT. Does the Senator mean last year? I was going to call his attention to the importations back in 1910 and 1911, as compared with our exportations. Our importations during those years were twice what our exportations were.

Mr. UNDERWOOD. I understand that, but I am talking about it under the lower rate of duty. Of course, the Senator knows, and everybody else knows, that in the sixties and the seventies the iron and steel business had been growing and growing and growing, reducing costs by modern machinery, cutting down expense by modern methods, reducing costs of production in every direction; and to go back 20 years, or 10 years, to find a basis on which to justify a tax to-day is no better argument for the tax than to say that because you are going to fix a tax on slabs of steel you must now fix it on slabs of iron.

All I have to say is this: Under the present rate of duty the imports in 1920 amounted to less than 1 per cent of the American production, and if you raise it you are simply going to cut off your imports. If you are going to levy a tax, either for revenue or for protection, that is not going to let 1 per cent of imports come in, then why levy a tax at all? Why not just do what you do in the case of the dye schedule, and establish an embargo and stop fooling about it, and say that you are going to let nothing come in?

Of course, if less than 1 per cent will come in at the present rate of taxation, you will certainly bar out importations under the ad valorem rate. There is no justification for it on the ground of protection or revenue, either; but I am not trying to put it on the free list. I am leaving it in my motion at the rate that exists to-day, and I do not think any argument has been made showing why you should put a higher tax on it.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Alabama to the amendment of the committee.

Mr. UNDERWOOD. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. FRELINGHUYSEN (when his name was called). I transfer my general pair with the junior Senator from Montana [Mr. WALSH] to the junior Senator from Oregon [Mr. STANFIELD], and will vote. I vote "nay."

The PRESIDING OFFICER (when the name of Mr. JONES of Washington was called). The present occupant of the chair transfers his pair with the Senator from Virginia [Mr. SWANSON] to the Senator from Oklahoma [Mr. HARRELD], and votes "nay."

Mr. HALE (when his name was called). I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Delaware [Mr. DU PONT], and will vote. I vote "nay."

Mr. NEW (when his name was called). Transferring my general pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the junior Senator from New Hampshire [Mr. KEYES], I will vote. I vote "nay."

Mr. PHIPPS (when his name was called). Making the same announcement as before as to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. MOSES. I am authorized by my colleague [Mr. KEYES] to state that if present he would vote "nay."

Mr. COLT. Making the same announcement as before, I vote "nay."

Mr. EDGE. I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Vermont [Mr. PAGE], and will vote. I vote "nay."

Mr. SUTHERLAND. I transfer my general pair with the Senator from Arkansas [Mr. ROBINSON] to the Senator from Minnesota [Mr. NELSON], and will vote. I vote "nay."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The Senator from Ohio [Mr. WILLIS] with the Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 14, nays 43, as follows:

YEAS—14.

Dial	Heflin	Robinson	Stanley
Fletcher	La Follette	Sheppard	Underwood
Harris	Overman	Simmons	
Harrison	Pittman	Smith	

NAYS—43.

Ball	France	McKinley	Ransdell
Brandegee	Frelinghuysen	McLean	Rawson
Broussard	Gooding	McNary	Shortridge
Bursum	Hale	Moses	Smoot
Calder	Johnson	New	Spencer
Capper	Jones, Wash.	Newberry	Sterling
Colt	Kellogg	Nicholson	Sutherland
Curtis	Kendrick	Oddie	Townsend
Edge	Lenroot	Pepper	Wadsworth
Elkins	Lodge	Phipps	Warren
Ernst	McCumber	Poindexter	

NOT VOTING—39.

Ashurst	Gerry	Myers	Swanson
Borah	Glass	Nelson	Trammell
Cameron	Harreld	Norbeck	Walsh, Mass.
Caraway	Hitchcock	Norris	Walsh, Mont.
Crow	Jones, N. Mex.	Owen	Watson, Ga.
Culberson	Keyes	Page	Watson, Ind.
Cummins	King	Pomerene	Weller
Dillingham	Ladd	Reed	Williams
du Pont	McCormick	Shields	Willis
Fernald	McKellar	Stanfield	

So Mr. UNDERWOOD's amendment to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question now is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The READING CLERK. On page 52, line 1, it is proposed to strike out the word "bars" and insert "bars, whether solid or hollow," so as to read:

Steel ingots, cogged ingots, blooms and slabs, by whatever process made; die blocks or blanks; billets and bars, whether solid or hollow, and so forth.

Mr. UNDERWOOD. Mr. President, I should like to ask the chairman of the committee on what basis they changed that classification. Bars could not be anything but solid or hollow, and they make it read "bars, whether solid or hollow." What was the cause of the change of classification?

Mr. SMOOT. This is a new product, and it is Swedish drill steel, and that is the way the commission desired to have it.

Mr. UNDERWOOD. I know, but it is bars. It does not change the rate. It does not change the language materially. It originally read in the House "bars," and you only add there "whether solid or hollow." They could not be anything but solid or hollow.

I have no objection to the amendment, but I should like to find out, for my own information, why you amended the language. It seems to me it must mean the same thing, but if there is something new in the business I should like to learn it.

Mr. SMOOT. I will say to the Senator that I am informed, although I do not know whether this is the proper explanation or not, that this language was adopted in order to show definitely that this steel is meant, and it is not to be classed as pipe if it is hollow. I presume that is why it is worded in this way.

Mr. UNDERWOOD. I thank the Senator for the explanation, because if there is any possibility of its being classed as pipe, it would fall under a higher rate, and I thank the committee for this act of justice.

The amendment was agreed to.

The next amendment was, on page 52, line 17, to strike out "1½" and insert "1.7."

Mr. UNDERWOOD. As was explained by the Senator from Utah awhile ago, these steel ingots, blooms, and slabs correspond to the same thing we have just voted on in the other paragraph. I see no reason for the rate. When the opportunity affords itself, when Members of the Senate in their individual capacity can offer amendments, I shall suggest an amendment to reduce the rate provided in this paragraph, but I can not do it now under the rule which has been adopted by the Senate for the consideration of the bill. I shall content myself at the present time by merely voting against this increase, which I think is unnecessary. It probably makes it conform to the balance of the paragraph. I shall discuss the paragraph when I can really offer an amendment which is broad enough to cover it.

The amendment was agreed to.

The next amendment was, on page 52, in line 18, after the word "pound," to strike out the figure "2" and to insert "2½"; in line 20, before the word "cents," to strike out the figures "2½" and to insert "3½"; in the same line, after the words "above 16," to strike out "and not above 20 cents per pound, 3½ cents per pound; valued above 20 and not above 24 cents per pound, 4 cents per pound; valued above 24 and not above 32 cents per pound, 5 cents per pound; valued above 32 and not above 40 cents per pound, 6 cents per pound; valued above 40 cents per pound, 20" and to insert "cents per pound," so as to make the paragraph read:

PAR. 304. Steel ingots, cogged ingots, blooms and slabs, by whatever process made; die blocks or blanks; billets and bars, whether solid or hollow; shafting; pressed, sheared, or stamped shapes, not advanced in value or condition by any process or operation subsequent to the process of stamping; hammer molds or swaged steel; gun-barrel molds not in bars; alloys not specially provided for used as substitutes for steel in the manufacture of tools; all descriptions and shapes of dry sand, loam, or iron molded steel castings; sheets and plates and steel not specially provided for; all of the foregoing valued at not over 1 cent per pound, two-tenths of 1 cent per pound; valued above 1 cent and not above 1½ cents per pound, three-tenths of 1 cent per pound; valued above 1½ and not above 2½ cents per pound, five-tenths of 1 cent per pound; valued above 2½ and not above 3½ cents per pound, eight-tenths of 1 cent per pound; valued above 3½ and not above 5 cents per pound, 1 cent per pound; valued above 5 and not above 8 cents per pound, 1 7/10 cents per pound; valued above 8 and not above 12 cents per pound, 2½ cents per pound; valued above 12 and not above 16 cents per pound, 3½ cents per pound; valued above 16 cents per pound, 25 per cent ad valorem: *Provided*, That on steel circular saw plates there shall be levied, collected, and paid an additional duty of one-fourth of 1 cent per pound.

Mr. UNDERWOOD. Before the question is put on that amendment the language that was proposed to be stricken out of the bill by the committee is as follows:

and not above 20 cents per pound, 3½ cents per pound; valued above 20 and not above 24 cents per pound, 4 cents per pound; valued above 24 and not above 32 cents per pound, 5 cents per pound; valued above 32 and not above 40 cents per pound, 6 cents per pound; valued above 40 cents per pound, 20.

It will read then:

Valued above 16 cents per pound, 25 per cent ad valorem.

Which is clearly an increase in the rate.

Mr. SMOOT. It may be in one bracket, and very much less in another bracket. For instance, if the Senator will take the last bracket, valued above 32 cents per pound and not above 40 cents, he will see that the spread between those two is 8 cents a pound, and yet they all come in at 6 cents a pound duty. In other words, if they had a 31¾-cent value, see how much easier it would be to make it 32½ and get a 6-cent a pound duty instead of 5 cents—by the increase of a quarter of a cent.

Mr. UNDERWOOD. I see how it is very much easier to estimate the rate, but this is based very much on the same value as was employed in the preceding paragraph. There a half a cent a pound was equal to something like 10 per cent ad valorem, and when you put it at 25 per cent here, you have undoubtedly increased the rate, as far as I can see.

Mr. SMOOT. All crude steel, valued at above 30 or 40 cents, as provided for here, is alloy steel. It can not be otherwise.

Mr. UNDERWOOD. You provide for alloys in the next paragraph.

Mr. SMOOT. That is paragraph 305; but that has been decreased there from 15 to 10 per cent.

Mr. UNDERWOOD. But no alloys will fall in paragraph 304, because you have them specially provided for in another paragraph.

Mr. SMOOT. If the Senator will read paragraph 305, he will find that a surtax is provided in that paragraph.

Mr. UNDERWOOD. But it provides for alloys.

Mr. SMOOT. The Senator knows that all steels between 30 and 40 cents a pound have to be alloy steel.

Mr. UNDERWOOD. I do not see any reason for this increase, but I am not going to argue it to-night, because part of the paragraph I can not amend, according to the rule we are working under, and there is no use at this late hour going into a discussion of it, because when we come back to it a proper amendment can be offered to the whole paragraph. But I just want to say that, as I am satisfied this particular amendment pending before the Senate is a very considerable and unjustifiable raise, without wanting to delay the Senate at this time, I intend to vote against it.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, in paragraph 305, page 53, line 6, after the word "in" where it occurs the first time, to strike out "this title" and to insert "paragraph 304"; and in line 12, after the word "paid," to strike out the figures "15" and insert "10"; so as to read:

In addition to the rates of duty provided for in paragraph 304 on steel in all forms and shapes, by whatever process made, and by whatever name designated, whether cast, hot or cold rolled, forged, stamped,

or drawn, containing more than six-tenths of 1 per cent of nickel, cobalt, vanadium, chromium, tungsten, molybdenum, or any other metallic element used in alloying steel, there shall be levied, collected, and paid 10 per cent ad valorem.

Mr. UNDERWOOD. In this paragraph the rate provided is a little higher than the rate in the present law. I do not see any reason shown why it should be accomplished, but the amendment the committee offers in the first part of the paragraph is a reduction. Of course I think the Senate should agree to that reduction. We can not now offer a satisfactory amendment, and therefore will have to let the paragraph go until all the committee amendments are finished, and then we can propose a satisfactory amendment.

The amendment was agreed to.

The next amendment was, in paragraph 305, page 53, line 17, after the words "excess of," to strike out the figures "1½" and to insert "six-tenths of 1"; in line 19, after the words "excess of," to strike out the figures "1½" and to insert "six-tenths of 1"; in line 20, after the word "levied," to strike out "collected" and to insert "collected,"; and in the same line, after the word "any," to strike out "articles" and to insert "material provided for in paragraph 304," so as to make the additional proviso read:

Provided further, That an additional cumulative duty of $1.25 per pound on the molybdenum content in excess of six-tenths of 1 per cent, and 72 cents per pound on the tungsten content in excess of six-tenths of 1 per cent shall be levied, collected, and paid on any material provided for in paragraph 304 containing molybdenum and tungsten.

Mr. UNDERWOOD. The comment I just made would apply to the proposed changes in lines 17 and 19.

The amendment was agreed to.

Mr. UNDERWOOD. Now we have reached the point where we concluded that we would suspend for the day.

DUTIES ON EARTHEN, STONE, AND CHINA WARE.

Mr. FRELINGHUYSEN. I ask unanimous consent to have inserted in the RECORD a protest from the Trenton Chamber of Commerce against the statement of Mr. H. E. Miles, representing the Fair Tariff League, before the Committee on Finance. I also ask that the memorial be referred to the Committee on Finance.

There being no objection, the memorial was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

TRENTON CHAMBER OF COMMERCE,
STACY-TRENT HOTEL,
Trenton, N. J., April 14, 1922.

Hon. JOSEPH S. FRELINGHUYSEN,
United States Senate, Washington, D. C.

DEAR SENATOR FRELINGHUYSEN: We are just in receipt of "Part 58, Tariff H. R. 7456, Statement of Mr. H. E. Miles before the Committee on Finance, United States Senate, for a Just Tariff."

In behalf of Trenton's biggest industry we desire to register a very definite protest against Mr. Miles's reference to the pottery and chinaware industry, as quoted on pages 5252 and 5253 of this pamphlet. Particularly do we challenge the following statement:

"Pottery, earthen, stone, and china ware: Value of product in 1914, pre-war, $174,750,000; and in 1919, $292,116,000. Most of the increase in these figures is an increase in prices only, for the industry is close-knit and is believed to have indulged in price fixing in rather extreme measure.

"On plain sanitary ware the cost of production is as low here as anywhere in the world, while price fixing is so extreme that one not in the business can not buy for cash from the producers, who are tied in with local dealers and others, with final prices to the consumer bearing no relation to the cost of production.

"The protection given this industry amounted to $65,000,000 in 1914 and $94,000,000 in 1919, while the Fordney rates would give them $108,000,000, which this industry says is the least it can prosper under. All these figures would be doubled on reaching the consumer at retail. Against these great sums the Government collected in duties $5,600,000 in 1914, $3,400,000 in 1919, and $5,200,000 in 1920."

For the past five months representatives of the Department of Justice have off and on been investigating the local pottery industry, and as has been stated by one of these representatives instructions had been issued that they "must secure evidence of price fixing" within this industry. To date, however, no action against the industry has been forthcoming, undoubtedly because of the lack of evidence sufficient for conviction.

We should indeed appreciate to have you bring to the attention of the Finance Committee this criticism of Mr. Miles's statement, which, in fairness to Trenton's leading industry, could not go unchallenged.

Very respectfully yours,

TRENTON CHAMBER OF COMMERCE,
W. O. LOCHNER, *Secretary.*

TARIFF BILL AMENDMENT.

Mr. FLETCHER submitted an amendment intended to be proposed by him to House bill 7456, the tariff bill, which was referred to the Committee on Finance and ordered to be printed.

ESTATE OF CAPT. JOHN W. LOVELAND, JR., DECEASED.

Mr. FRELINGHUYSEN. I ask unanimous consent that the Committee on Finance be discharged from the further consideration of the bill (S. 3242) to provide for payment of the amount of a war-risk insurance policy to a beneficiary designated by Capt. John W. Loveland, jr., deceased, and that it be referred to the Committee on Claims. It is a claim that should go to the latter committee.

The PRESIDING OFFICER. Without objection, the Committee on Finance will be discharged from the further consideration of the bill and it will be referred to the Committee on Claims.

RECESS.

Mr. McCUMBER. I understand that there is no desire for an executive session, and I therefore move that the Senate take a recess, the recess being under the previous order until to-morrow at 11 o'clock.

The motion was agreed to, and (at 9 o'clock and 55 minutes p. m.) the Senate, under the order previously entered, took a recess until to-morrow, Friday, May 26, 1922, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

THURSDAY, *May 25, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Father in heaven, Thy name is love divine, hence we do not fear nor tremble in Thy presence. While the day is sending forth the tokens of Thy infinite power, Thou hast overlaid them with great gentleness. O make us strong by the sense of Thy strength, wise by the sense of Thy wisdom, and better by the sense of Thy goodness. Bless all institutions which nurture Thy truth and care for humanity. May they be united in faith, hope, and charity, and work in sympathy with men, their duties, and their needs. In Thy holy name. Amen.

The Journal of the proceedings of yesterday was read and approved.

PURCHASING VALUE OF THE DOLLAR—CHANGE OF REFERENCE.

Mr. GOLDSBOROUGH. Mr. Speaker, I ask unanimous consent that the bill (H. R. 4396) stabilizing the purchasing value of the dollar, heretofore referred to the Committee on Coinage, Weights, and Measures, be re-referred to the Committee on Banking and Currency.

The SPEAKER. Is this with the consent of the chairman of both committees?

Mr. GOLDSBOROUGH. Yes.

The SPEAKER. The gentleman from Maryland asks unanimous consent that H. R. 4396, stabilizing the purchasing value of the dollar, which was referred to the Committee on Coinage, Weights, and Measures, be re-referred to the Committee on Banking and Currency. Is there objection?

There was no objection.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 2263) to amend the Federal reserve act, approved December 23, 1913.

ENROLLED BILLS SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 6523. An act for the relief of John Burke, former Treasurer of the United States, for lost bonds without the fault or negligence on the part of said former Treasurer;

H. R. 6524. An act to permit the correction of the general account of John Burke, former Treasurer of the United States; and

H. R. 10442. An act to amend an act entitled "An act to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for these islands," approved August 29, 1916, as amended by an act to amend said act approved July 21, 1921.

ORDER OF BUSINESS.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent to address the House on a matter relating to the business of the House.

The SPEAKER. The gentleman from Wyoming [Mr. MONDELL] asks unanimous consent to address the House. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Speaker, Tuesday is Memorial Day and many Members expect to be away that day. In fact, they feel that it is rather essential that they should be. They are expected to be at home if their homes are near enough so that they can be reached without too great an amount of travel. Those who do go home will find it difficult to return in time for a session on Wednesday. With those matters in mind, it is my purpose to suggest an adjournment from Sunday—when we have a meeting for a memorial service—until Wednesday, with the understanding that when we meet on Wednesday there will be an immediate adjournment until the following day. That arrangement does not leave us with a Calendar Wednesday next week, and in order that Calendar Wednesday business may be considered, I shall also, not as a part of the first request but as a further request, ask that on Thursday of next week we may consider Calendar Wednesday business instead of considering it on Wednesday.

Mr. SNELL. Can the gentleman give us any further information as to when he expects we may possibly look forward to taking three-day recesses?

Mr. MONDELL. That depends very largely on when the Senate passes the Army and Navy bills.

Mr. MADDEN. Will the gentleman yield to me?

Mr. MONDELL. I yield to the gentleman from Illinois.

Mr. MADDEN. My information is that the Army bill will be passed by the Senate by the 1st of June. Of course, then it will have to go to conference. I do not know when they will be able to pass the naval bill, but, of course, it will have to go to conference. I should like to suggest the probability of those bills becoming laws about the 1st of July.

Mr. MONDELL. We have been very hopeful that they would become laws sooner than that.

Mr. SMITH of Michigan. Can the gentleman tell us whether we will be in session on Saturday?

Mr. MONDELL. An election case will be considered on Saturday.

Mr. SMITH of Michigan. The House will be in session then?

Mr. MONDELL. The House will be in session.

Mr. BEGG. Can the gentleman give us any idea when we will have a day for the Private Calendar?

Mr. MONDELL. I hope week after next.

Mr. GARNER. Let me ask the gentleman a question. If I understand the gentleman from Illinois [Mr. MADDEN], he virtually gives the House notice that so far as passing the appropriation bills is concerned, it will approach the 1st of July before the appropriation bills will become laws; and the result is, as we gathered from the gentleman from Wyoming some days ago, that there will be no recess until after the appropriation bills are laws. Is that correct?

Mr. MONDELL. That is correct.

Mr. GARNER. And that will wind up the little ball of yarn as far as getting a recess to go home before the 1st of July?

Mr. MONDELL. Of course, the House will have disposed of its essential program of matters now prepared, considerably earlier than that, but we can not control the action of the other body.

Mr. GARNER. If I understand the status, then, it is that the House will not undertake a recess until the appropriation bills become laws, and the gentleman from Illinois [Mr. MADDEN] thinks it will approach the 1st of July before those bills become laws, so we might just as well understand the situation now, that there is no hope of a recess 10 days from now or 20 days from now. I think the gentleman ought to be frank with the House and tell us that.

Mr. MONDELL. The gentleman from Wyoming is still in a hopeful state of mind.

Mr. GARNER. He exists in that state of mind all the time. [Laughter.]

Mr. MONDELL. It is a fact that so far as the House is concerned the entire program of our legislation might have been disposed of by the 1st of June.

Mr. GARNER. Oh, easy enough.

Mr. COOPER of Wisconsin. What appropriation bills are still out?

Mr. MONDELL. The Army and Navy bills have not been passed by the Senate.

Mr. COOPER of Wisconsin. Are those the only two?

Mr. GARNER. There are two appropriation bills in conference, the independent offices bill and the District of Columbia appropriation bill.

Mr. COOPER of Wisconsin. That makes four, then.

Mr. GARNER. I know there is not a complete report on the independent offices bill or on the District of Columbia appropriation bill.

Mr. COOPER of Wisconsin. That makes two, and the Army and Navy bills make two more, or four altogether. Are there any others?

Mr. GARNER. Not that I know of.

Mr. MADDEN. The Post Office appropriation bill has only one item in controversy, and that is the matter of roads.

Mr. COOPER of Wisconsin. How long has that been in conference?

Mr. MADDEN. We have not had any conference since the House authorized us to substitute the House bill for the Senate bill.

Mr. COOPER of Wisconsin. I ask that question because it does not seem to me that one item need hold up the intelligent conferees for more than six weeks.

Mr. MADDEN. We have not had a conference since then.

Mr. MONDELL. As a matter of fact there are only two appropriation bills that are in a situation likely to cause delay. The other two appropriation bills can be finally acted upon very shortly and will be.

Now, Mr. Speaker, I ask unanimous consent that when the House adjourns on Sunday it adjourn to meet on Wednesday next.

The SPEAKER. The gentleman from Wyoming asks unanimous consent that when the House adjourns on Sunday next it adjourn to meet on the following Wednesday. Is there objection?

Mr. WOODRUFF. Reserving the right to object, I should like to ask the gentleman from Wyoming if he can give the House any idea as to when the Rules Committee will report upon the Woodruff-Johnson resolution?

Mr. MONDELL. I am afraid I can not, Mr. Speaker.

Mr. WOODRUFF. In that event, Mr. Speaker, I object.

The SPEAKER. The gentleman from Michigan objects.

BUSINESS ON CALENDAR WEDNESDAY.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that business which would be in order on Calendar Wednesday next be in order on Thursday.

The SPEAKER. The gentleman from Wyoming asks unanimous consent that business of Calendar Wednesday next be in order on Thursday instead. Is there objection?

There was no objection.

FILLED MILK.

The SPEAKER. The unfinished business is the bill H. R. 8086, the filled milk bill. The gentleman from Massachusetts calls for the reading of the engrossed copy. Does the gentleman still desire the reading of the engrossed copy?

Mr. WALSH. I do.

The Clerk read the engrossed copy of the bill.

The SPEAKER. The question is on the passage of the bill.

The question was taken, and on a division (demanded by Mr. BLANTON) there were 85 ayes and 12 noes.

Mr. BLANTON. Mr. Speaker, I object to the vote because there is no quorum present, and I make the point that no quorum is present.

The SPEAKER. The gentleman from Texas makes the point that no quorum is present. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 250, nays 40, answered "present" 1, not voting 140, as follows:

YEAS—250.

So the bill was passed.

The following pairs were announced:

On this vote:

Mr. Hooker (for) with Mr. Tucker (against).

Mr. Rouse (for) with Mr. Brand (against).

Mr. A. P. Nelson (for) with Mr. Bankhead (against).

Mr. Cullen (for) with Mr. Rainey of Illinois (against).

General pairs:

Mr. Chandler of New York with Mr. Garrett of Tennessee.

Mr. Treadway with Mr. Cockran.

Mr. Langley with Mr. Clark of Florida.

Mr. Evans with Mr. Gallivan.

Mr. Connell with Mr. Kitchin.

Mr. Moore of Illinois with Mr. O'Brien.

Mr. Cooper of Ohio with Mr. Oldfield.

Mr. Coughlin with Mr. Fields.

Mr. Cramton with Mr. Carter.

Mr. Johnson of Washington with Mr. Sears.

Mr. Murphy with Mr. Riordan.

Mr. Kelley of Michigan with Mr. Ward of North Carolina.

Mr. Wason with Mr. Mansfield.

Mr. Kendall with Mr. Griffin.

Mr. Perlman with Mr. Drane.

Mr. Moore of Ohio with Mr. Tague.

Mr. Atkeson with Mr. Kindred.

Mr. Frothingham with Mr. Linthicum.

Mr. Ackerman with Mr. Park of Georgia.

Mr. Goodykoontz with Mr. Smithwick.

Mr. Dickinson with Mr. Barkley.

Mr. Knight with Mr. Stoll.

Mr. Reed of New York with Mr. Collins.

Mr. Beck with Mr. Driver.

Mr. Paige with Mr. Sullivan.

Mr. Bland of Indiana with Mr. Hayden.

Mr. Fess with Mr. Kunz.

Mr. Siegel with Mr. Taylor of Arkansas.

Mr. Bond with Mr. Hudspeth.

Mr. Snyder with Mr. Upshaw.

Mr. McFadden with Mr. Taylor of Colorado.

Mr. French with Mr. Rainey of Alabama.

Mr. TUCKER. Mr. Speaker, I voted "no," but I find I am paired with my colleague, Mr. HOOKER. I therefore withdraw my vote and answer "present."

Mr. ROSSDALE. Mr. Speaker, my colleague, Mr. PERLMAN, was called away on pressing business. If he were here, he would vote "aye."

Mr. CLARKE of New York. Mr. Speaker, I am requested by my colleague, Mr. REED of New York, to say that if he were present he would vote "aye."

Mr. MAPES. Mr. Speaker, my colleague, Mr. CRAMTON, authorized me to say that if he were here he would vote "aye."

The result of the vote was announced as above recorded.

On motion of Mr. VOIGT, a motion to reconsider the vote whereby the bill was passed was laid on the table.

DISPOSITION OF CERTAIN SUGAR IMPORTED FROM ARGENTINE REPUBLIC.

Mr. HAUGEN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of Senate Joint Resolution 12, authorizing the President to require the United States Sugar Equalization Board (Inc.) to take over and dispose of 13,902 tons of sugar imported from the Argentine Republic.

The SPEAKER. The gentleman from Iowa calls up a joint resolution, which the Clerk will report by title.

The Clerk read as follows:

Joint resolution (S. J. Res. 12) authorizing the President to require the United States Sugar Equalization Board (Inc.) to take over and dispose of 13,902 tons of sugar imported from the Argentine Republic.

Mr. GARNER. Will the gentleman yield for a question?

Mr. HAUGEN. Certainly.

Mr. GARNER. The gentleman will recall that yesterday morning I tried to get into the RECORD, for the purpose of informing the House, a list of the bills that he proposed to call up, and the order in which they were to be called up under the rule. I thought the House and the country were entitled to know just how the gentleman was going to proceed. The RECORD this morning shows that he intended to take them up as they were reported, and he then proceeded to enumerate just how they were reported, and that he was asked by his committee to take them up in that order. Why is he now varying from that order?

Mr. HAUGEN. The committee met this morning and directed the chairman to call up the two sugar claims first.

Mr. GARNER. What has been the cause since yesterday to change the program and take up a bill which they consider of more importance than others?

Mr. KINCHELOE. I will say a majority of the committee, not all of them.

Mr. GARNER. May I ask the gentleman a question? Does he contemplate the committee will change their attitude on the other bills, or will they continue in the order given yesterday after this bill is considered?

Mr. HAUGEN. The committee decided to take up the two sugar bills first, then the bird refuge bill, next the bee bill, next the bill defining crop failures, and after that the other bills on the calendar.

Mr. ASWELL. I would like to say to the gentleman from Texas that the Committee on Agriculture at no time until this morning had fixed any order for any of these bills under this rule.

Mr. JACOWAY. I will say further, for the information of the gentleman from Texas, that when the order of business was arranged about three weeks ago it was understood that the grain bill was not to be considered at this time, and when

we went back into the committee this morning the record was corrected to let the record recite the facts.

Mr. HAUGEN. I desire to ask the gentleman from Arkansas if an agreement may be reached as to limitation of the time for general debate?

Mr. JACOWAY. I understood the agreement was for an hour and a half on a side.

Mr. HAUGEN. I ask unanimous consent that debate be limited to three hours, the time to be controlled one-half by the gentleman from New York [Mr. WARD] and one-half by the gentleman from Kentucky [Mr. KINCHELOE].

The SPEAKER. The gentleman from Iowa asks unanimous consent that general debate be limited to three hours, one-half to be controlled by the gentleman from New York [Mr. WARD] and one-half by the gentleman from Kentucky [Mr. KINCHELOE]. Is there objection?

Mr. WALSH. Mr. Speaker, reserving the right to object, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WALSH. Is it too late to raise the question of whether this bill is on the proper calendar now?

The SPEAKER. The Chair thinks so. The Chair thinks the rule provides for the consideration of the bill.

Mr. WALSH. Well, if the committee has reported a bill and placed it upon the calendar of which it has no jurisdiction to place it, is that cured by the adoption of the rule which was brought in yesterday?

The SPEAKER. The rule was peculiar in its language and said "bills now on the Union or House Calendars." The Chair thinks under that——

Mr. KINCHELOE. Mr. Speaker, I will say to the gentleman from Massachusetts, to my surprise the gentleman from Kansas, as his remarks appeared this morning, says the Agricultural Committee has no right to report a bill on the Private Calendar.

The SPEAKER. Is there objection?

Mr. SUMMERS of Washington. Mr. Speaker, reserving the right to object, I desire to ask if this will permit me to have 20 minutes time on a matter?

Mr. HAUGEN. The gentleman from New York and the gentleman from Kentucky will control the time. It is understood the time will be divided equally between those in favor of the bill and those opposed to it.

Mr. SUMMERS of Washington. I will ask the gentleman from New York if it is possible for me to have 20 minutes?

Mr. WARD of New York. The time is all taken; the gentleman might ask the other side.

The SPEAKER. Is there objection?

Mr. STEENERSON. Mr. Speaker, reserving the right to object, I would like to inquire of the chairman if this order of calling up these bills was changed this morning by order of the committee?

Mr. HAUGEN. It was.

Mr. STEENERSON. And otherwise the grain grading bill would have come up?

Mr. HAUGEN. That is, if the bills had been taken up in the order in which they appear upon the calendar, but under the program which was decided upon this morning by the committee——

Mr. STEENERSON. But for this action this morning the grain grading bill would have been called up as understood yesterday?

Mr. HAUGEN. If they had been taken up in their order on the calendar; yes.

The SPEAKER. Is there objection?

Mr. STEENERSON. Reserving the right to object, I want some information about the change of the order. My information was that the grain grading bill would come up this morning, and now we are informed the committee has changed the rule so that the sugar bill comes up. I want to know if there is any prospect of the grain grading bill coming up and how soon?

Mr. HAUGEN. The committee has been granted three days. We have used one day. I take it that to-day will be used in the consideration of these sugar bills. Later we will have another day. We have quite a number of bills on the calendar—14 in all. We will try to dispose of most of them.

Mr. STEENERSON. Well, my constituents are very anxious in regard to it, and I want to do everything I can to get it up at an early day.

Mr. WALSH. Reserving the right to object, will the gentleman yield?

Mr. HAUGEN. I will.

Mr. WALSH. Will the gentleman from Iowa inform the House what measure would be taken up if the motion to go into the Committee of the Whole House on the state of the Union should be voted down? What bill would he then call up?

Mr. HAUGEN. According to the instructions of the committee, the next bill would be the other sugar bill, the next would be the bird refuge bill, then the bee importation bill, then the bill defining crop failures, and after that the other bills the committee has on the calendar.

Mr. WALSH. And the grain grades bill is not on the program at all?

Mr. HAUGEN. There are a number of them. The order in which they are to be called up has not been definitely decided by the committee.

Mr. JONES of Texas. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. JONES of Texas. What is the question up for consideration at this time?

The SPEAKER. The vote on going into the Committee of the Whole House on the state of the Union is the one under consideration. Is there objection to the division of time? [After a pause.] The Chair hears none. The gentleman from New York [Mr. WARD] has an hour and a half and the gentleman from Kentucky [Mr. KINCHELOE] an hour and a half.

The question now is, Shall the House resolve itself into the Committee of the Whole House on the state of the Union?

The question was taken, and the Speaker announced that the ayes seemed to have it.

On a division (demanded by Mr. WALSH and Mr. JONES of Texas) the House divided, and there were—ayes 103, noes 49.

Mr. JONES of Texas. Mr. Speaker, I object to the vote, and I raise the point that there is no quorum present.

The SPEAKER. The gentleman from Texas makes the point that there is no quorum present. Evidently no quorum is present. The Doorkeeper will close the doors, and the Sergeant at Arms will notify the absentees. Those in favor of the House resolving itself into the Committee of the Whole House on the state of the Union will, as their names are called, answer "yea," those opposed will answer "nay," and the Clerk will call the roll.

The question was taken; and there were—yeas 137, nays 136, answered "present" 2, not voting 156, as follows:

YEAS—137.

So the motion was agreed to.

The Clerk announced the following additional pairs:

On this vote:

Mr. Knutson (for) with Mr. Rucker (against).

Mr. Fess (for) with Mr. Hooker (against).

Mr. Rogers (for) with Mr. Cramton (against).

Mr. Murphy (for) with Mr. Perlman (against).

Mr. Rainey of Illinois (for) with Mr. Bland of Indiana (against).

Mr. Fairfield (for) with Mr. Andrews of Nebraska (against).

Until further notice:

Mr. Griest with Mr. Connally of Texas.

Mr. Radcliffe with Mr. Williams of Texas.

Mr. Sanders of Indiana with Mr. Goldsborough.

Mr. Volk with Mr. Johnson of Mississippi.

Mr. Maloney with Mr. Drane.

Mr. McArthur with Mr. Garner.

Mr. Kiess with Mr. Riordan.

Mr. McPherson with Mr. Kunz.

Mr. Stiness with Mr. Cullen.

Mr. Morin with Mr. Brand.

Mr. Chandler of Oklahoma with Mr. Sisson.

Mr. A. P. Nelson with Mr. Cantrill.

Mr. Michaelson with Mr. Humphreys.

The SPEAKER. On this vote the yeas are 137, nays 136, answering "present" 2, a quorum.

Mr. BLANTON. Mr. Speaker, I ask for a recapitulation of the vote.

The SPEAKER. The Chair thinks that is proper. The Clerk will recapitulate the vote.

The affirmative vote was recapitulated.

Mr. BLANTON. Mr. Speaker, did not the roll show Mr. LARSEN of Georgia as having voted "yea"?

The SPEAKER. The Clerk made the correction there. It was an inadvertence.

Mr. BLANTON. Mr. LARSEN voted "nay."

The SPEAKER. That has been corrected.

The negative vote was recapitulated.

So the motion was agreed to.

The SPEAKER. The "yeas" have it, and the House resolves itself into Committee of the Whole House on the state of the Union, and the gentleman from New York [Mr. HICKS] will please take the chair.

Thereupon the House resolved itself into Committee of the Whole House on the state of the Union for the consideration of the resolution (S. J. Res. 12), with Mr. HICKS in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of Senate Resolution 12, which the Clerk will report.

The Clerk read as follows:

Resolved, etc., That the President is authorized to require the United States Sugar Equalization Board (Inc.) to take over from the corporation, American Trading Co., and the copartnership, B. H. Howell, Son & Co., a certain transaction entered into and carried on by said corporation and copartnership at the request, under direction, and as agents of the Department of Justice and Department of State, which transaction involved the purchase in the Argentine Republic, between the 13th day of May, 1920, and the 22d day of May, 1920, of 13,902 tons of sugar, the importation thereof into the United States and the distribution of a portion of the same within the United States, and to require the said United States Sugar Equalization Board (Inc.) to dispose of any of said sugar so imported remaining undisposed of, and to liquidate and adjust the entire transaction in such manner as may be deemed by said board to be equitable and proper in the premises, paying to the corporation and copartnership aforesaid such sums as may be found by said board to represent the actual loss sustained by them, or either of them, in said transaction, and for this purpose the President is authorized to vote or use the stock of the corporation held by him, or otherwise exercise or use his control over the said United States Sugar Equalization Board and its directors, and to continue the said corporation for such time as may be necessary to carry out the intention of this joint resolution.

The CHAIRMAN. Under the agreement reached in the House for the control of the time of debate, 90 minutes is under the control of the gentleman from New York [Mr. WARD] and 90 minutes in the control of the gentleman from Kentucky [Mr. KINCHELOE]. The Chair will recognize the gentleman from New York for 90 minutes.

Mr. WARD of New York. Mr. Chairman, for the twin purposes of brevity and accuracy I have prepared a very concise statement setting forth the reasons that have made this resolution necessary, and also stating a few of the reasons why I believe it should receive your favorable consideration.

Early in April, 1920, the State Department learned of a surplus of sugar in Argentina, which information was communicated to the Department of Justice. An acute shortage existed in this country, with sugar retailing from 25 cents to 30 cents per pound. The Department of Justice, with the cooperation of the State Department, acting under authority of the Lever Act, arranged for the importation of a large part of this surplus sugar to relieve this situation and to break the price.

These departments lacked both funds and an organization to promptly carry out such an undertaking. Upon assurances by the State Department that the Argentine sugar embargo would be lifted on request of the United States Government, the American Trading Co., of New York, with a branch office in Buenos Aires for 30 years, was appointed purchasing agent of the Department of Justice to buy and import the sugar. The Department of Justice then asked B. H. Howell, Son & Co., of New York, to distribute the sugar to a list of purchasers approved by it. The commission fixed by the Department of Justice at 1 cent per pound for each company, the testimony shows, was very reasonable.

The Department of Justice, by letter dated May 11, 1920, instructed the American Trading Co. to immediately buy as much sugar as possible, and simultaneously requested, through the State Department, the lifting of the Argentine embargo. Through inability of these departments to secure the permit promptly, the company was delayed more than a month and a half in arranging the importation of the total purchase of 13,902 tons. Meantime much publicity was given the transaction, the market weakened, and when the sugar was offered in the United States only 5,000 tons could be sold.

To avoid any loss the companies urged the resale in Argentina of the unshipped sugar, but the State Department and Department of Justice refused this suggestion by letter of August 2, 1920, thus preventing such resale. On August 11, 1920, this Government officially offered the unshipped sugar to the Argentine Government at approximate cost, but this offer was declined. All of the sugar—13,902 tons—was brought to the United States and sold at a loss of approximately $2,500,000. The break in the market which this importation is acknowledged to have started saved hundreds of millions of dollars to the American people, and these two Government agents should not be required to stand the loss incurred in performing this service. This measure only provides reimbursement without compensation, and enables these agents to repay the money borrowed to finance the transaction.

This resolution passed the Senate during the last Congress and was favorably reported to the House a few days before adjournment, too late to be considered. It has again passed

the Senate, and the Agriculture Committee, after further hearings, has again reported it to the House. During the extensive hearings Attorney General Daugherty and Attorney General Palmer appeared and urged as a matter of equity and justice that relief should be granted these two companies, who acted merely as the agents of the Government. All of these facts were established in the hearings, by letters, official cables, and other documentary evidence.

This bill does not require an appropriation, but simply provides administrative authority for the liquidation of the transaction from the surplus funds of the United States Sugar Equalization Board. This board has examined this case and are unanimously in favor of relieving these companies.

The Sugar Equalization Board, I believe, have about $9,000,000 to-day in their treasury, and through the sale of sugar in 1919, which they prefer to call a saving rather than a profit, laid up $39,000,000. This is a gain on the difference between the price they paid for sugar and the price they sold it at, which is thirty-eight one-hundredths of a cent. They have turned $30,000,000 into the Treasury of the United States, and are now holding the balance in their treasury, pending certain litigation and legislation before they can close up the board.

Mr. NEWTON of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. WARD of New York. Yes.

Mr. NEWTON of Minnesota. The gentleman has made a very plain and concise statement of the facts. I wonder whether the statement of facts made by the gentleman is admitted or whether it is refuted in any way?

Mr. BUTLER. Yes. Is the agency admitted? Is that in dispute?

Mr. WARD of New York. The agency is not disputed by the Department of Justice or the Department of State. They both agreed to it.

Mr. NEWTON of Minnesota. Are the facts as stated by the gentleman practically without dispute in the record and in the hearings?

Mr. WARD of New York. The facts as stated are facts taken in the hearings.

Mr. JACOWAY. Mr. Chairman, will the gentleman yield?

Mr. WARD of New York. Yes.

Mr. JACOWAY. The agency is admitted by both Attorneys General?

Mr. WARD of New York. Yes; also by the ambassador in the Argentine.

Mr. NEWTON of Minnesota. Was anybody at the hearing who disputed any of the facts that the gentleman has given here?

Mr. WARD of New York. No.

Mr. RAKER. Mr. Chairman, will the gentleman yield for a question?

Mr. WARD of New York. Yes.

Mr. RAKER. The gentleman stated it, but did not make it quite plain. Why was not this sugar sold when it was brought into the United States, without holding?

Mr. WARD of New York. The market was down. That was what caused this terrible loss. It was sold at a great loss.

Mr. JACOWAY. Mr. Chairman, will the gentleman yield again?

Mr. WARD of New York. Yes.

Mr. JACOWAY. I want to state that the condition precedent to this was the agency conferred upon Howell and the American Trading Co., and the Federal Government, through this agency, stated that they would get a speedy lifting of the embargo in Argentina. Difficulty occurred in having that done, and, as I recall the record now, it was 1 month and 13 days before that was done. In the meantime sugar commenced to decline, and when it got to the port of New York sugar had declined and they were unable to sell it on the market.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. WARD of New York. I yield to the gentleman for a question.

Mr. WALSH. I want to ask this question of the gentleman from New York: By whom was this agency admitted? By the agent of the United States?

Mr. WARD of New York. It was confirmed by the Attorneys General, both Daugherty and Palmer.

Mr. WALSH. Attorney General Palmer acted in this matter, did he not?

Mr. WARD of New York. They were appointed agents of the Government under Attorney General Palmer when he was in office.

Mr. WALSH. So that it is really the agent of the United States that is admitting the agency?

Mr. WARD of New York. Yes; if you choose to term it so. It is a Cabinet officer.

Mr. TEMPLE. Mr. Chairman, will the gentleman yield right there?

Mr. WARD of New York. Yes.

Mr. TEMPLE. I would like to call attention to the cablegram from Mr. Polk to the American Embassy at Buenos Aires, Argentina, under date of May 13, 1920, in which the American ambassador is informed that the American Trading Co. has been appointed purchasing agent by the Department of Justice, and in the second paragraph of the cablegram the American ambassador is instructed to bring that matter to the attention of the Argentine Government. The decree of the Argentine Government, issued June 23, 1920, mentioned the American Trading Co. as the purchasing agent on the part of the United States.

Mr. WARD of New York. Yes. I am going to call on the gentleman from Kentucky [Mr. KINCHELOE] to make his statement, and I reserve the balance of my time. [Applause.]

The CHAIRMAN. The gentleman from New York reserves the balance of his time. He has used 11 minutes.

Mr. KINCHELOE. Mr. Chairman, I yield 15 minutes to the gentleman from Kansas [Mr. TINCHER].

The CHAIRMAN. The gentleman from Kansas is recognized for 15 minutes.

Mr. TINCHER. Mr. Chairman and gentlemen of the committee, of course there is a sharp difference of opinion in the Committee on Agriculture on this claim. I had the pleasure of signing the minority report in the last Congress, and the minority report in this Congress, and I still think we are right. To start with, I just want to show you how we can differ on matters that there can not be any difference about. The gentleman who just preceded me [Mr. WARD of New York] stated to this committee that the agency was admitted, that there was a legal agency of the Government created to buy this sugar. If that is true, if there was a legal agency, it is admitted by both the Attorney General and by every lawyer who has had anything to do with this case that it would be a matter presenting itself purely to the Court of Claims and we would not be here considering it. It is admitted that there was no legal agency and that there is no legal liability on the part of the Government to pay these claims; but on the other hand it is claimed by the most serious adherents of this resolution that there is a moral obligation on the part of the Government to pay the claims, and that is what you are here to consider.

Now let me tell you a little about how they got into the transaction. A gentleman by the name of Franklin was at the Department of State and told this Mr. Polk or some other gentleman at the Department of State of some sugar that existed in the Argentine. It was suggested to him that he ought to tell some one connected with the Department of Justice of that sugar. In a few days his business brought him in contact with the party at the Department of Justice, and he was telling them, and they said, "We are trying to get people to import sugar from the Argentine to break the price of sugar." But there was an embargo on sugar out of the Argentine at that time unless you would buy so many pounds of a certain kind of sugar and leave it in the Argentine, that you could not get out. By an arrangement made there this Government undertook to favor those gentlemen and to get that embargo raised in such a way that they could buy their sugar and have an advantage over any other man that was buying sugar and shipping it from the Argentine. And I want to say to you now that this Government fulfilled every obligation in that regard, and that these people could have sold every pound of sugar that they had at a big profit had they been willing to do so, but the only time this company ever offered any sugar——

Mr. WARD of New York. Will the gentleman yield?

Mr. TINCHER. No; I prefer to proceed with my argument. The hearings will disclose that the only time they ever offered any sugar to the people of the Argentine was at an enormous profit, even greater than in the United States.

Mr. JACOWAY. Will the gentleman yield? The gentleman does not want to misquote the testimony.

Mr. TINCHER. No; I do not intend to.

Mr. JACOWAY. I think one brief question will clear it up.

Mr. TINCHER. All right.

Mr. JACOWAY. I want to ask if the Department of State and the Department of Justice did not tell B. H. Howell & Co. and the American Trading Co. that under no conditions would they be permitted to sell this sugar in the Argentine, because to do so would break faith with that Government, and serious complications would be the result?

Mr. TINCHER. No; they told them first that they would not ask for leave to sell it in the Argentine. At that time they told the offer they wanted to make. A short time later, though, this Government, through its agents and the department men, got leave for them to sell it in the Argentine, something that was not contemplated when they undertook to help them get it out of the Argentine.

Now, about this 1-cent-a-pound profit. The object of having two companies in this was because under the Lever Act no company was permitted by the regulations of the Attorney General to make more than 1 cent a pound on sugar. But in order to get 2 cents a pound they had two companies here, and that is the only company in the United States that did that, and the only time that arrangement was made for that profit. I will tell you what they went into. They went into a deal to make over a million dollars out of the importing of sugar into the United States.

Who were they that went into this deal? If you pass this bill, to whom do you pay it? You will pay it to the biggest sugar raiser in the world, Mr. Post. Who is Mr. Post? He is the biggest sugar refiner in the world. He raises sugar in Cuba, as the hearings disclose, and is president of the biggest sugar-producing concern in the world. He ships his sugar to New Jersey and refines it and distributes it, and the hearings disclose that before this deal was made his company had sold to the people of this country more sugar than any other man in the world at a bigger price than was ever paid for sugar in the United States of America. That is the man for whose benefit you are taking money out of the Treasury. Oh, they say, one reason for voting for this bill is that the money has not got into the Treasury yet. They say that Mr. Glasgow is holding it until Congress gets through and he can give it to Post. Reilly, another one of these Deputy Attorney Generals, testified before the committee several times. He says Glasgow is doing that for a fee. I said, "Surely not an attorney for the Sugar Equalization Board, for a private fee, would not appear here and try to get us to pay this claim?" "Oh, yes," he said, "he does not care about that. Why, when he was attorney for the board he took a fee over in Pennsylvania to fight the law and question its constitutionality." That is in the record and undisputed.

Since that time we have invited the Sugar Equalization Board to come before the committee and tell us where they stand and what they were doing, and with reference to the other claims. Let me tell you something that happened the other day. A business man came down from New Jersey who has identically the same arrangement with the Government that these people had, only he got a lot of sugar into this country and sold it. He claims he had something to do with breaking the market. The gentleman from Kentucky [Mr. KINCHELOE] asked him why he did not file his claim with Congress a long time ago. Well, he said he had a talk with Post, and Post said, "You wait until I get my claim through, and then we can all get in." He said that he read in the hearings what Post said, that his was about the only claim, and he read what Glasgow said, and that that was the only claim, and he then went to Post and said, "I am going to file my claim in Washington." I heard a member of the Agricultural Committee say to another one, "If we don't hurry up there will be hundreds of these claims." There might as well be 5,000 with as much merit.

Let me tell you something. I am not going to claim that the lobby that has been here in behalf of this claim is corrupt; but what is the lobby? Post is a man of influence, a man of wealth, a man of standing, the biggest sugar dealer in the world. I got a letter from a wholesale sugar man in my district, and he wanted me to vote for the sugar claims. There he was, way out there in that district, and I wondered what he knew about it. I went home last February and dropped in, and I said, "John, how did you happen to write me a letter to vote for the sugar claims; you don't know anything about them?" He said, "I told the girl when I wrote the letter that you would have too much sense to pay any attention to it." He said, "I had to do it because it is necessary that I have my standing as long as I am in the wholesale business." That is the class of letters that you get asking you to vote for these claims. If you are going to pay moral obligations, some of them have a more moral backing than this. This is the worst claim in the bunch. Why is it the worst claim in the bunch? Because the man that imported this sugar made more money out of sugar in 1920 than any other organization or man in the world. Go home to your people and tell them that you paid that man that produced more sugar in 1920 than any man in the world, when you were paying 20 cents a pound, and you paid him three and a half million dollars, because on his last shipment he lost a little money—go home and tell them that and see how it sounds. Talk about moral obligation. I have pretty nearly reached the conclusion that war is what Sherman said it was. There is not a wholesale sugar man in the United States but that when the drop came had sugar on his hands and lost money. There is not a retail sugar man in the United States but that when the drop came had sugar on his hands and lost money on that sugar. There is not a sugar producer in the United States but what some time, when the deflation came, lost money. Reimburse them? Because somebody has written a letter from some little wholesale house in your district or he has dropped into your office and said, "Won't you vote for the sugar claims?" The boys that write on account of the lobby know that you know the reason they write them, and they know that the Congressmen are too big to be affected by them.

Mr. GRAHAM of Illinois. Will the gentleman yield?

Mr. TINCHER. Yes.

Mr. GRAHAM of Illinois. Is this another hold over from the last administration?

Mr. TINCHER. Yes; it is a hold over in a way, but it will not justify the Republican Party yielding to a holdup to get rid of a Democratic hold over. [Laughter and applause.]

Now, what happened? I can remember hundreds of farmers in my section of the country during the war that were ready to market their hogs. They started the fattening process. Along came an agent from the department from Washington and said to the local representative, "We have fixed the price of grain and hogs, and won't you raise fat and win the war? You can not lose anything; you will not only show your patriotism, but as we have fixed the price of feed and hogs, you will make money." They took them out and fattened them, and there is not a farmer but that will tell you that everyone he took out cost him a $10 bill. Suppose they all came in and said that there was a moral obligation and we must pay them out of the Treasury. We were after money. All we were after was money. Now, more than that, every grain dealer in the United States on a certain day in July, 1917, was informed by wire from Washington that while you are fixing the price of wheat for the next year it would not affect the price of 1917. Then, in order to win the war you would have no question about table products and about breadstuffs going too high for the consumption by common people. Overnight the administration in Washington reduced the price of that product a dollar a bushel. I introduced a bill to pay that moral obligation, and when we came to examine how much it would cost we found that it would cost $250,000,000. Think of it. That in the afternoon you hear your Government say they would not cut the price of $3 a bushel. The next morning you hear your Government say the price had been reduced a dollar. Not only that, but you must sell your wheat at once. Then compare this sugar proposition, this gigantic proposition that we were told is a moral obligation. When you come to analyze war, it is hell. No country can afford to select a class and attempt to recompense that moral obligation, and if my country does decide to do that, God forbid it shall pick out the sugar profiteers of America and start the compensation with them.

Mr. LONGWORTH. Will the gentleman yield?

Mr. TINCHER. I will.

Mr. LONGWORTH. I do not know that the gentleman has made it quite clear the connection of whom he is speaking with these particular companies; who are the beneficiaries of this legislation?

Mr. TINCHER. Well, the gentleman knows it is very clear in the hearings.

Mr. LONGWORTH. I do not understand it myself——

The CHAIRMAN. The time of the gentleman has expired.

Mr. KINCHELOE. I yield the gentleman two additional minutes.

Mr. TINCHER. If the gentleman will read the hearings, it tells us about who he is. Of course, this company is a very small partnership. He is president, the biggest landlord, of the biggest producing company in Cuba. He is president of the biggest sugar-refining company in the United States. In this company you are going to pay to if you pass this bill; he is only a partner with two other little fellows.

Mr. LONGWORTH. But I understand this is a payment to one of these companies and not to the other. Do I understand he has no connection with the other?

Mr. TINCHER. I think that is true. Both of these companies went into it to get the extra cent; they were not satisfied with the one cent. Let me tell you something: Post is the money, Post is the brains, Post is the business man and the man behind the gun in this connection. Franklin is a nice-looking and, as far as I know, a high-class gentleman, but he would not have gotten a claim through the committee without the superior brain power and ability of this distinguished gen-

tleman, Post. I have no personal grievance. He is an able man—a business man. If he can get the committee to report out a resolution paying a lot of money, all right. I am not criticizing him; but the ramifications of the sugar organization with which he is connected reach to every wholesale house in every district in the United States. I do not charge anything unlawful or corrupt; but I think it is only fair to suggest to Members of Congress that when the wholesale men drop you a letter, it is so that he may write Mr. Post that he has complied with his suggestion and request, and I am rather proud of my own wholesale man in my district who said to the girl to whom he dictated that he knew his Member of Congress would have sense enough not to pay any attention to it. Gentlemen, I thank you. [Applause.]

Mr. WARD of New York. Mr. Chairman, I yield 10 minutes to the gentleman from Louisiana [Mr. ASWELL]

Mr. ASWELL. Mr. Chairman and gentlemen of the committee, these two sugar claims are real obligations of a Democratic administration. There is no shadow of doubt as to the fact of that statement. A good many things have been said critically on my side of the Chamber of the rule brought in yesterday. There is ample justification for the rule and for its expediting this bill. The Sugar Equalization Board has $9,000,000 in its treasury and is uselessly continuing to exist. These years that have passed since this transaction and since the war are amply sufficient for the Sugar Equalization Board to disband and go out of existence. It is maintaining offices in New York and in Philadelphia; and on the 13th of April a resolution was passed by the Committee on Agriculture asking the Sugar Equalization Board to give an accounting of its present expenditures, and on the 19th of April the president of that company wrote the chairman of our committee and said he had the matter under consideration.

That is six weeks ago, and this Congress should settle these sugar claims now one way or the other and immediately disband that Sugar Equalization Board, for if we let it continue long enough it will expend the $9,000,000 in expenses. So I think it is necessary for the Congress to take some sort of action and take it now. I am for these bills for the simple reason that the Attorney General asked them to bring this sugar in to break down the high prices existing at that time. The records of the hearings show that one of the companies knew nothing about sugar. This company never handled a pound of sugar before or since, but it had a ship in Argentina and responded at once to the Department of Justice to bring in this sugar from Argentina to down the high prices. The publicity given when these gentlemen agreed to bring in the sugar, the publicity so extended and exaggerated, that the people who were holding sugar in this country became alarmed and sold out and broke the price down and down until it was 10 cents a pound down before the Argentine sugar arrived in this country.

Mr. BURTNESS. Will the gentleman yield?

Mr. ASWELL. I have not the time. The obligation, whether right or wrong, was made by a Democratic Attorney General. These gentlemen responded. They are not like the other claims. These are not private claims. These men represented the Government completely and in detail, and Attorney General Palmer testified to the fact before our committee, and all of his associates who came testified to that effect. Then came Attorney General Daugherty, the present Attorney General, who corroborates all that was said by the former Attorney General, and said that Congress was in honor bound to settle these claims. A Democratic Secretary of State made the same declarations.

These are the reasons why I believe they should be settled and settled now. At any rate, gentlemen, there is no justification, as I see it, for dillydallying and for criticism and reflections upon gentlemen who have come here honestly and sincerely. For weeks and weeks we have held hearings, and I have merely stated briefly what the hearings prove. There is no question about it. I want the Sugar Equalization Board to disband and cease spending the people's money, and take a part of the $9,000,000 out of its treasury and settle these claims.

It is a definite moral obligation on the part of the Government, entered into solemnly by our Government, and I believe it will be a sad day in this country when we come to face the fact that the Government of the United States fails to meet its obligations as it expects its citizens to meet theirs. If we are to have honesty in private life, how can the Government afford to be dishonest when its highest officials, who made the obligation, come and testify that we owe it? The Government should respond and respond now. I try to meet my obligations, and I want my Government to meet its well-established obligations to private citizens.

Mr. Chairman, I ask unanimous consent to print this correspondence to which I have referred.

I print the following to show the necessity of action by the Congress to close out the Sugar Equalization Board:

APRIL 17, 1922.

Mr. THOMAS HEADS,
Comptroller United States Sugar Equalization Board,
16 Beaver Street, New York City, N. Y.

MY DEAR MR. HEADS: During the hearing this morning before the Committee on Agriculture on House Joint Resolution 284, the Lamborn sugar claim, the United States Sugar Equalization Board came up for discussion. Mr. Aswell offered the following resolution:

"That the chairman request the head of the United States Sugar Equalization Board to report the names and salaries of all persons paid by the board and other expenses incurred by it during the past two years, and also the balance in the Treasury to the credit of the board."

This was adopted after considerable discussion.

The Washington office of your board advises me that you are the proper person to whom this request should be referred. I am therefore writing you pursuant to the instructions contained in the resolution.

Very truly yours,

———— ————, *Chairman.*

—

UNITED STATES SUGAR EQUALIZATION BOARD (INC.),
16 Beaver Street, New York City, April 19, 1922.

Hon. G. N. HAUGEN,
Chairman Committee on Agriculture,
House of Representatives, Washington, D. C.

DEAR SIR: This is to acknowledge receipt of your letter of the 17th, addressed to me, requesting certain information in regard to the United States Sugar Equalization Board, in accordance with a resolution adopted at the hearing before your committee on the Lamborn sugar claim.

I am having this data prepared and will forward same to you within the next few days.

Yours very truly,

THOMAS HEADS,
Comptroller United States Sugar Equalization Board (Inc.).

Mr. KINCHELOE. Mr. Chairman, I yield 15 minutes to the gentleman from Texas [Mr. JONES].

Mr. JONES of Texas. Mr. Chairman and gentlemen of the committee, at first blush, on reading the first evidence, I was inclined to think that there was some merit in these claims because of one or two communications that had passed, but on going into the matter thoroughly and hearing the different witnesses I came to the conclusion that it is the best organized raid on the United States Treasury that has ever come under my observation. I have read the testimony that was heard before the Senate committee and before the former Agricultural Committee. Let us see what the situation is and how it happened, how this American Trading Co. and B. H. Howell, Son & Co. happened to be at the State Department or the Department of Justice, and how the Department of Justice or the State Department happened to be involved in this matter at all. Now listen: Any company could take sugar out of the Argentine at any time after May 22, 1920, by depositing 30 per cent of pilet sugar in the Argentine, so that the Argentine might control the situation in the event the exportation of sugar from that country caused the price to go wild.

Mr. JACOWAY. Will the gentleman yield?

Mr. JONES of Texas. I regret that I have not the time.

Mr. JACOWAY. I do not think the gentleman wishes to make a misstatement.

Mr. JONES of Texas. Certainly not. I yield to the gentleman.

Mr. JACOWAY. The gentleman made a remark there that anybody could take sugar out of the Argentine by depositing 30 per cent of pilet sugar.

Mr. JONES of Texas. Under the general order in force at that time; that is, after May 22, 1920.

Mr. JACOWAY. Did not this embargo allow the 100,000 pounds to come out of the Argentine after this contract was entered into with B. H. Howell, Son & Co.?

Mr. JONES of Texas. The embargo was lifted after the contract was made, but these claimants did not want to comply with these restrictions, and their special permit was granted later, whereby they did not even have to deposit the 30 per cent required of the other companies.

Mr. KINCHELOE. Will the gentleman from Texas yield right there?

Mr. JONES of Texas. Yes.

Mr. KINCHELOE. Is it not a fact that the Argentine lifted the embargo the same day B. H. Howell, Son & Co. made the last purchase?

Mr. JONES of Texas. Yes; May 22.

Mr. JACOWAY. Will the gentleman yield?

Mr. JONES of Texas. The gentleman can get his own time. And I hope he will go into that.

A general order was issued on May 22, permitting any company to take sugar out of the Argentine into this country pro-

vided they deposited 30 per cent of pilet sugar. Lamborn & Co., a company which has a claim before the committee that has not been passed upon, deposited that sugar, brought the shipment in, and sold it before the market broke, to the extent that it had broken when these claimants brought this sugar in. The American Trading Co. and B. H. Howell, Son & Co. wanted to wait until they could get the United States Government to do away with the necessity of depositing 30 per cent pilet sugar.

Mr. WARD of New York. Will the gentleman yield?

Mr. JONES of Texas. I am sorry that I have not the time.

And in order to get that removed, in other words, to do away with the requirement of the depositing of that sugar, they delayed several weeks, and although they bought the sugar on or before May 22, although they had the conversation here in the State Department on May 7, the price of sugar did not break until July 13, long after the time within which it could have been brought in. So the Department of Justice and the Department of State gave them satisfactory favors and concessions which the other companies did not have the advantage of.

They talk about the limit of 1 cent per pound of profit on sugar. Every company in the United States, whether they were importing sugar or not, were required at that time under the Lever law to operate on a profit of 1 cent per pound. By some sort of a hocus-pocus the American Trading Co. and the Howell Co. got 1 cent a pound for bringing it in and another cent for distributing it. How they worked it I do not know, but they are big operators, and you know big operators have a way about them. Somehow they secured a double profit in addition to special concessions.

Now there has been a sort of strange working by various parties that are interested throughout the consideration of this measure—a sort of a lobby. You can hear the swish of their vanishing wings here, there, and anywhere. I heard it intimated that a certain politician from Ohio, for whom we created a position here, has gotten interested and has seen some of the Members. I do not know whether it is true or not, but I have heard it. All kinds of people have been around here in order to get somebody to see somebody else about these sugar claims.

There is no legal claim here. And this is not a party question. Both Attorneys General say it was a moral obligation, and both say there is no legal obligation. Nobody had authority to make any contract with these people. It is a pure question of an alleged moral obligation. I believe the sugar companies admit that. It is a question of adopting a policy. You heard the claims that were discussed by the gentleman from Kansas [Mr. TINCHER] that have a much more and a higher moral standard than these claims. The grain men, who before the price of grain was fixed bought wheat at $2.85 a bushel and the next day were required to sell at $2, lost money on the direct action of the Government after they had had a conference with Mr. Hoover beforehand in which he informed them that that price would not be fixed.

Such men have a sort of kick, it seems to me. Farmers and grain men all over the country had the price fixed upon them and thereby sustained heavy losses. And there are many others. There are claims involving untold amounts pending now before the Committee on Agriculture, to say nothing of what is pending before the Committee on Claims. If you are going to adopt a policy of paying claims of the character of the ones before us here, you would just as well construct a new Treasury Building and get another Bureau of Engraving to get out the necessary bonds. You can not make fish of one and fowl of the other and show consistency. My friends, there is not an intimation in any of these transactions that the United States was to get a cent of profit or stand a cent of loss anywhere. There is no agency. They were simply licensed like all other sugar dealers, and the same invitation extended to all. No matter what happened, the Government itself was not to get a profit. Therefore, no matter what happened, the Government should not stand the loss. Nothing was ever said in any of these communications about it, and I ask you to go through and read them. Every reference to loss was made as the company loss. The money was furnished by the American Trading Co. The sugar was purchased in the name of the American Trading Co. The American Trading Co. was to have whatever profit there was and should therefore stand any loss. They paid in Argentina between 13 cents and 14 cents per pound for this sugar. According to their own figures, the total cost of landing in New York, including ocean freight, was just above 19 cents per pound. They were to sell at about 21.3 cents per pound, so as to allow them 1 cent profit and the Howell Co. 1 cent per pound profit. They actually brought in 13,909 tons, which at 2,240 pounds per ton makes 31,156,000 pounds, which meant a profit of $311,560 to each company, or a total profit of $623,120 to the two companies. Where was Uncle Sam to come in on this deal? Oh, not at all until it was found there would be a sack to hold.

As a matter of fact, is it not plausible to assume that, in view of the interest which Mr. Post and others had in companies which were dealing in Cuban sugars, that when they found the market was about to break they might desire to let this sugar remain in the Argentine? In fact, is it unreasonable to assume that these companies might want to get into the Argentine deal so that they might, as nearly as possible, control the entire sugar situation and thus delay the shipment from Argentina until they were ready for it to come in?

They were to receive a double profit on all their transactions. At the same time they were to receive a concession from the Argentine Government whereby they were not required to make the 30 per cent deposit. That is one of the reasons why these companies happen to be here. They played the "cinch game" all along.

Now, listen. On May 7 they arranged to try to get this embargo lifted down there. On May 15, 18, and 22 they bought sugar; they bought the last sugar on May 22. On that very date the Argentine Government issued an order permitting sugar to be shipped out provided the 30 per cent were deposited. This sugar could have been shipped then, but the American Trading Co. wanted to wait until the last restrictions should be removed. They wanted to avoid depositing the 30 per cent of pilet sugar. So they waited until June 26, when the last restriction was removed. Even then the sugar market did not begin to break until July 13. In the meantime Lamborn & Co. and others had come in, but these people had not. It seems strange that these people who waited until all the restrictions were removed should stand on a better footing than those who went ahead and complied with the conditions.

Now, let me call attention to this fact, that these people at that time owned vast sugar estates in Cuba and were bringing in sugar from Cuba and from Java and from other places to sell at prices that they themselves practically fixed until the sugar market broke. They deliberately delayed the shipment of this Argentine sugar, and now they are attempting to saddle the loss on the United States Government. It appears that they might have held this back while they disposed of their other sugar.

Why, this man Post admitted here, on page 21 of the hearings, held on February 3, 1922, that he was a director in a number of different sugar companies, including the Cuba-American Sugar Co., and others that I have not the time to read. But I will ask you to look it over and see the different companies he is interested in. They did not actually ship this sugar until away along in August. Does it not seem plausible that the company's interest might be to hold this sugar back while they shipped in their other sugar on which they had no chance to recoup from the Government? Now, listen. The American people used 100,000 tons of sugar a week during this period of the year.

According to the testimony here, here were 13,000 tons shipped in. When they were finally pinned down they had to admit that they did not have anything like a week's supply that they actually brought in from down in Argentina. Yet when they first came up here in the hearings this company tried to assume the rôle of a company that was not interested in the sugar business. On page 27, the first hearing that I attended on this subject, I asked Mr. Franklin—

> Does your firm deal in sugar?

His answer was—

> No, sir; we simply export and import. We do not deal in sugar at all.

I asked him this question—

> You imported a great deal of other sugar besides this?

His answer was "No, sir." I asked him this question—

> This was all the sugar you imported in 1920?

His answer was—

> We imported three or four hundred tons of sugar from Java, which was placed as a firm order.

That is what he stated about dealing in sugar. He stated he did not deal in sugar at all. That is his own statement. Well, the company—his company—was associated in this deal, the B. H. Howell & Co. imported a great deal of sugar. Also Mr. Post, who has much to do with the management of B. H. Howell & Co., is a director in about 14 other companies, many of which are interested in the products of sugar companies dealing in Cuba, Java, and elsewhere.

This man Post, when he was presented with a copy of Who's Who, which shows his connection with these sugar companies, said, "Sure; I never tried to make anybody believe I was not." Yet the American Trading Co. was here trying to persuade the

committee that they shipped no sugar and were not interested in it in any way. His testimony was meant to inure to the benefit of both companies, or, at least, the resolution which he supported so provided. I say this would be an outrage upon this country to settle claims of this character, and in my judgment is an effort to unload on the United States Government.

Mr. WALSH. Mr. Chairman, will the gentleman yield there?

Mr. JONES of Texas. I can not yield. They say the agency is admitted. It is not admitted. There could be no legal agency. Nobody had authority to enter into such contracts as are here sought to be established. The principal place where the American Trading Co. is referred to as the purchasing agent of the United States Government is in this cablegram from Mr. Polk to the American Embassy at Buenos Aires. The other testimony shows clearly that they were not really the purchasing agents of the United States. The State Department did them certain favors, and they now seek to strike the hand that favored them. It is true the United States Government was anxious to have sugar brought in, and it did in this case just what was done on various propositions where an attempt was made to get people to obtain necessary commodities. Much has been said about the Government refusing to let these people resell in the Argentine. Of course, after the United States Government had asked the removal of restrictions by the Argentine Government for these people the State Department could not afford to let them resell without permission of the Argentine Government.

These claims should be defeated. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired. The Chair recognizes the gentleman from New York.

Mr. WARD of New York. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. HUSTED].

The CHAIRMAN. The gentleman from New York is recognized for five minutes.

Mr. HUSTED. Mr. Chairman, the speech of the gentleman from Kansas [Mr. TINCHER] was an appeal to passion and prejudice and not an appeal to reason. As an appeal to passion and prejudice it was a first-rate effort. But this is a question, I submit, that should be decided on the facts and in accordance with right and justice. This is, in a sense, a private claim for a large amount of money—$2,500,000. It is a claim which has been very closely scrutinized by the Congress, as every claim should be; but it is, I submit, a claim which will not only bear the closest scrutiny but which, as the result of that scrutiny, will appeal to the House as a claim which should not only be paid in full but paid without the delay of an unnecessary day.

Oh, it is a private claim, but it is not a private claim in the ordinary sense. It is not a claim for compensation for services rendered. It is not a contractor's claim for reimbursement on the ground that labor costs or the cost of materials had advanced as a result of the war. It is not a claim for losses incident to the ordinary conduct of business. It is not a claim for losses due to the fault or negligence of those companies in any way. It is a claim for reimbursement for losses incurred in a Government transaction which were solely and exclusively due to the action of the Government of the United States itself.

The Government of the United States, by its own specific action, created the condition which resulted in these losses, and that action was twofold: First, it failed to raise the embargo so that these sugars could be sold in the United States without loss, although that was the basic condition under which the work was undertaken by these companies; and, second, it refused absolutely to allow these companies to sell these sugars in the Argentine when they could have been sold not only without loss but with a splendid profit to the Government of the United States. Oh, the gentleman from Kentucky [Mr. KINCHELOE] said there was a lobby here. I have the highest respect and regard for the gentleman from Kentucky; but so far as this claim is concerned, of what does that lobby consist? It consists of one man, Mr. Walter S. Franklin, a vice president of the American Trading Co., the man who conducted all the negotiations with our Government. And who is Mr. Franklin? Mr. Franklin is the man who had charge of the transportation of our troops across the English Channel during the war, and after the armistice was signed he was the man who had entire charge of the bringing back of our troops from England and from France, so far as the Army transport service was concerned.

He was decorated by Field Marshal Haig and given the distinguished service order. He was decorated by France and given the cross of the legion of honor. He was decorated by the United States Government and given the distinguished service medal. He was a member and an officer of the American Expeditionary Forces; and when he has been here in Washington he has not practiced any deception upon anybody. He has been guilty of no subterfuge. He has made no misstatement. He has conducted himself in every way as a gentleman and as a man of honor. And that is the only lobby that has been here so far as this claim is concerned.

And who are these claimants? One is the American Trading Co. which was organized in 1857, one of the oldest, if not the oldest, trading company in the United States. It is a company of which every American may justly be proud, because it has a record of spotless business integrity. The other company, B. H. Howell & Co., are sugar men, of course. Why were they sugar men? Because they were selected, not by the American Trading Co. but by the Government of the United States to distribute these sugars in the United States. And who could distribute these sugars intelligently and efficiently for the benefit of the Government except a sugar company?

Mr. Post, of that company, on the very first day of the hearings, admitted frankly that he was a sugar man. Why should there be any reason for his concealing it? The Department of Justice would have failed in its duty if it had selected any kind of a company except a company with practical experience in the distribution of sugar to do this work for the United States. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. KINCHELOE. I yield five minutes to the gentleman from North Dakota [Mr. SINCLAIR].

Mr. SINCLAIR. Mr. Chairman, it is admitted by both sides of this controversy that the basis of this sugar claim is a moral one. No one has said that it is a legal claim that this company has against the Government. Now, I want to say that we would be going far afield if we attempted to pay all the moral claims growing out of the war. There are thousands and thousands of claims throughout the country everywhere in which people were induced by the agents of the Government to enter into different lines of activity and lost money thereby. If we start by taking care of one moral claim, we may as well go down the line and take care of all of them.

Mr. LINEBERGER. Will the gentleman yield?

Mr. SINCLAIR. Yes.

Mr. LINEBERGER. Does not the gentleman think it would be highly inopportune and unfortunate to start in adjusting a moral claim of this kind, assuming that this is a moral claim, before paying the moral claim of adjusted compensation to the soldiers?

Mr. SINCLAIR. I agree heartily with the gentleman. I believe the highest moral obligation this Nation owes is to the men who offered their lives in defense of their country. [Applause.]

Mr. WALSH. At $1.25 a day.

Mr. SINCLAIR. Now, regarding a statement on the first page of the majority report. It says:

> After this information had been given by that department—

Meaning the State Department—

> to the Department of Justice, the latter decided to import some of this surplus sugar into the United States.

This is hardly a fair statement. The testimony and the facts in the case do not show that the Government at any time decided to import sugar. Its entire activity was limited to interesting private concerns in that work.

I believe it was the duty of the Department of Justice all the time to endeavor to break the corner in sugar which existed. There was a widespread clamor for a reduction in the cost of sugar, and it was presumed that the Department of Justice was doing all it could to that end. The American Trading Co., in order to get sugar from the Argentine Government, invoked the aid of the State Department to have the embargo raised. While they were getting that embargo raised there was sugar coming out of the Argentine all the time, and we have the evidence before our committee that Lamborn & Co. and other companies were getting all the sugar they needed simply by complying with the regulations of the Argentine Government.

Then a strong argument is made for this claim because the State Department refused to permit the American Trading Co. to sell the sugar in the Argentine. Of course, the Government would necessarily have to do that after it had succeeded in inducing the Argentine Government to lift the embargo as a special favor to this company. It would then come with poor grace for the United States Government to permit the company to resell the sugar in the Argentine at an increased profit. Now, there is no evidence that I can find of any obligation of this Government to stand the loss in all of the negotiations between the Department of Justice and the various companies that were induced to bring in sugar. There was no thought of loss taken into consideration. From the testimony of Mr. Riley, one of the Assistant Attorney Generals, it was clearly evident that it was

FREE PUBLIC LIBRARY
N / CASTLE, PA.

merely an attempt to break the sugar price, and he was using moral suasion to induce this company, as well as others, to bring in sugar. That is about all there is in the case. I do not believe it to be the policy of the Government or Congress to consider as binding on the Government any inducement that the Department of Justice may have used at that time to bring in the sugar. The agents of the Government during the war were all through the country urging the people to produce more and more of the necessities. They went to the wheat growers of the Northwest, the stock raisers of the West and Southwest, urging them to put their products on the market, and to go beyond the usual and customary limit in seeding and planting, and the slaughtering of live stock, in order to create a surplus of food supplies with which to win the war. They have moral claims against this Government equally as valid as this one. In my opinion, it would take a billion dollars to pay the debt the Government owes the farmers. For that reason, looking at it as an unprejudiced and impartial juror, I can not see that there is any legal or moral obligation resting on the Government. [Applause.]

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. WARD of New York. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. CHALMERS].

Mr. CHALMERS. Mr. Chairman, it seems to me that the problem is simple. Some of the authorities who were principals in the deal differ with the gentleman from North Dakota, who last spoke. The Secretary of State under the former administration, Mr. Colby, the man who occupied the position now held by Charles Evans Hughes, says that this is a just claim. Let me read from the hearings, and I think if gentlemen of the House will follow the hearings as to the responsibility of the Government it will not matter what the amount is. We want to do the square thing as between man and man. Now, listen to what Mr. Colby said:

This Government would be glad to resell to the Argentine Government, if it so desires, or on the market under its supervision, such quantities of sugar which have not already been exported to the United States—

And so forth.

You notice he says:

This Government would be glad to resell.

That would indicate that this sugar belonged to the Government of the United States. Did the Secretary of State wish to mislead the Argentine Government in representing in this telegram that this was a State matter?

The Argentine Government came back with a telegram which will be found in the hearings, as follows:

MINISTRY OF HACIENDA OF THE ARGENTINE NATION,
(Exp. 2757 R–1920),
Buenos Aires, June 23, 1920.

Having seen the request of his excellency the ambassador of the United States of America regarding the necessary authorization for the American Trading Co., purchasing agent of the Department of Justice, to export 13,909 tons of sugar of national production; and

Considering that the Government is animated by the desire to fulfill satisfactorily the foregoing petition made direct by a sister nation, the executive power of the nation, in general agreement with the ministers, decrees:

"ARTICLE 1. That the necessary permission be given to the American Trading Co., purchasing agent for the Department of Justice of the United States of America, to export to the said country 13,909 tons of sugar of national production.

"ART. 2. That this be communicated, published, and filed.

"(Signed) IRIGOYEN.
"D. E. SALABERRY."

That is the way the Argentine Government regarded this; they were exporting it to the United States Government. Now, I want to give you the opinion of A. Mitchell Palmer, head of the Department of Justice. It is in the hearings:

I have no hesitation in saying, Mr. Chairman, I think this resolution is entirely proper; that it ought to pass; that it is absolutely just and fair to these parties who desire to cooperate with the Government for the relief of a very serious situation in the country.

That is the opinion of the former Attorney General. It was known also that his assistant, Mr. Howard Figg, was of the same opinion, and I wish I had time to read the hearings to show you what he said. Our present Attorney General, who came into the Government probably prejudiced against the claim, inasmuch as it was a problem of the former Government to work out, says that it is a just claim. I will say to you that our present Secretary of State, Mr. Hughes, and perhaps Attorney General Daugherty, came into the Government prejudiced against the claim, but after listening to the testimony and reading the evidence in the case, they came to the conclusion that it was a moral obligation of the Government. I am again reading from the testimony of Mr. Daugherty:

Mr. DAUGHERTY. Mr. Chairman and gentlemen of the committee, I have had an opportunity somewhat hurriedly to go over this matter. I think I have had two or three conferences, and I have gone over the record rather carefully. Of course, you know the record better than I do. I rather think the Government, using these two companies for the purpose they were used and under the circumstances they were used, is, I think, morally, and I am quite well convinced, legally, under obligation to take care of this loss, with the understanding that no profit is to be made by either of these companies; and from the record, and only from the record, I am rather impressed that while this is a distinctive loss to the Government, yet the action of the Government in this regard probably had quite a little to do with reducing the price of sugar which the whole people got the benefit of.

In the hearings another official of the Government stated that in all probability the consumers, the householders of the United States, were saved a billion dollars by the corner being broken in this way—the corner on sugar.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. KINCHELOE. Mr. Chairman I yield five minutes to the gentleman from Montana [Mr. RIDDICK].

Mr. RIDDICK. Mr. Chairman and gentlemen, the resolution before us, introduced by the gentleman from New York, is but one of several of the same character. They propose that certain sugar dealers shall be reimbursed with public funds for losses resulting from transactions they made at the suggestion of Government officials in 1919, in an effort to reduce the prices charged the American public for sugar at that time.

As a member of the Committee on Agriculture I have listened carefully to all the evidence presented to that committee in behalf of those claims, and I assure you that in my judgment a case has not been made.

Early in the hearings we were told by the lawyers who appeared in behalf of the claims and by the lawyers in Congress familiar with the facts, that this was not a legal claim, but that it was a moral claim. Of course, if it were a legal claim the sugar people would have had it in the courts long ago. But they know their claim has no standing in any court in the land. They did take it to the Department of Justice—first before Attorney General Palmer and later to Attorney General Daugherty. Then they went to the Sugar Equalization Board, which was one of the war-time agencies organized to look after sugar matters. This agency had ample funds, its members are lawyers and experienced sugar men, and knew the facts in this case. They refused relief. Now the sugar people come to Congress and ask us to dip our hands into the Public Treasury and hand out millions of dollars to recoup their losses in transactions they entered into of their own free will and accord, for the purpose of making large private gain, but which failed to pan out as they expected. We ought not to do it.

One of my colleagues has just quoted Attorney General Daugherty as saying in his testimony before the committee that in his judgment this appeared to be a moral claim against the Government. In Mr. Daugherty's testimony before the committee in June a year ago, he did say (see page 80 of the hearings) that he reached that opinion "from the records before him" at that time. That was a year ago. I will say in all frankness that upon the record as it appeared at that time it appeared to some of the rest of us that it might be a claim which the Government ought to pay. But since that time many new facts have been brought into the record. Now, after weighing all the evidence, my judgment as a plain farmer, and one who knows little of fine legal points, is that it is so far from being a moral claim that it is one of the most immoral, unconscionable attempts to grab the taxpayers' money I have ever heard of. [Applause.]

I listened to the evidence as a jury of farmers would listen to a case in court, and I repeat that in my judgment a case has not been made.

In 1919 the American sugar market was cornered by the sugar interests and prices soared to 25 cents and 30 cents a pound. Who were the people taking advantage of the war-time conditions and charging those profiteering prices and making those unreasonable profits off the American people? Was there any connection between those sugar profiteers and those who now ask millions of dollars of the taxpayers' money on the pretense that they have suffered sugar losses which the Government ought to make good to them? The record of testimony answers those questions and I will read it presently.

In a nutshell, the case of the sugar claimants is this: When sugar prices soared so high the Department of Justice asked certain persons to buy cheap sugar in Argentina, to ship it here, and to sell it with the restriction on their profit to 1 cent a pound. They bought the sugar in Argentina, an embargo which our State Department promised to have lifted was not lifted, and that prevented them from shipping their sugar to America before the price dropped. Our Government asked them not to resell in Argentina, and when they finally got rid of their sugar they suffered a loss of between $4,000,000 and $5,000,000.

It is true the Department of Justice did ask, not one but many sugar men, to bring cheap sugar to America to reduce the prices. The particular company referred to in this resolution purchased 14,000 tons of sugar, and claims it was to have sold it at not to exceed 1 cent a pound profit. That would be $280,000. Later investigation disclosed that two companies were to be involved, one to bring the sugar in and the other to distribute it, and each was to have 1 cent a pound profit. That would make a profit of twice $280,000. It was planned to purchase 70,000 tons, which would run the profit up to near the $3,000,000 mark. Investigation proved the alleged 1 cent a pound arraugement to be fiction, and that some of these companies were even then making profits of 5 cents and 7 cents a pound. Let me quote the testimony on that from the record—page 92 of the hearings. Mr. Figg, whom I quote, was the Government representative in the Department of Justice who made whatever arrangements were made on behalf of the Government:

Mr. RIDDICK. As to the profit that the American Trading Co. was to receive, was not the original arrangement with them that they were to go down there and buy the sugar and have a reasonable profit, nothing being said about 1 cent a pound profit?

Mr. FIGG. That is true; yes, sir.

Mr. RIDDICK. Is it not true that that company and other companies who were importing were making a profit of around 3 cents a pound?

Mr. FIGG. Some of them as high as 5 and 7 cents.

Mr. RIDDICK. When was the first suggestion that this company should receive 1 cent profit rather than 3 or 5 cents?

Mr. FIGG. It was after they had purchased considerable sugar; I am not sure of the date.

Mr. RIDDICK. As a matter of fact, was it not after they had a hint in their own minds that they might sustain a loss?

Mr. FIGG. That is possible.

And so forth.

Now, as to the embargo which the State Department agreed to have lifted. These sugar people could have shipped their sugar out of Argentina at any time if they had complied with certain reasonable rules that other companies were complying with. But in addition to the big profit they sought, they wanted a special advantage which the State Department promised to get for them but failed to get. Then this sugar company proposed to resell its sugar in Argentina, not at 1 cent a pound profit but at an unreasonable profit. Our representative there learned of this and cabled our State Department that because this sugar was purchased in Argentina to relieve the situation in America and because the announcement of large proposed purchases had raised sugar prices there, it would create a bad impression for the American company to resell its sugar at a profiteering price there. That was what the State Department objected to, and very properly.

Now, let these facts be kept closely in mind. These men who agreed to buy cheap sugar in Argentina to bring to America to reduce the cost of sugar for the American people were not novices in the sugar game. They were experienced business men and they knew everything about sugar from A to Z. They knew more about sugar than anybody connected with the Government. They decided they would try to bring in sugar, but before doing so they sought an arrangement whereby they would make a profit of at least 2 cents a pound and secure a special advantage over other companies with the aid of our State Department.

Mr. HUSTED. Will the gentleman yield?

Mr. RIDDICK. I can not yield.

Mr. HUSTED. I wanted to correct the gentleman's statement. I knew he would not like to make an incorrect statement.

Mr. RIDDICK. I ask not to be interrupted. These gentlemen had an arrangement with the Government whereby they would make tremendous profits on their transaction. As I say, they were not novices. In taking the evidence I asked the claimant myself the question if it was contemplated that the Government would take care of the loss if there were any loss, but they said, "Oh, no; they were sure that there would be no loss," and they admitted then that they did not expect at that time the Government would pay any loss.

Let me read from the record of the testimony, near the bottom of page 64:

Mr. PURNELL. What was said, if anything, about any loss which you might suffer?

Mr. POST. It did not occur that there would have been any loss possible, and there would not have been if the export license had been secured promptly. The grocers were ready for it, as were also the canners and manufacturers, and they had been asking the department to secure the sugar for them.

Mr. RIDDICK. As an experienced business man, do you not know that where there was room for profit there might also be room for loss?

Mr. POST. It seemed to be so well protected from the fact that there were so many who were so glad to take it——

Mr. RIDDICK. Is it not a well-known business axiom that where there is room for profit there might also be room for loss?

Mr. POST. It did not occur to us in this case; and we thought we would surely get expenses at least in doing the business.

Mr. RIDDICK. I can not see how an experienced business man would look at such a matter as having no possibility of a loss.

From this shrewd business man here is full admission from his own lips that it was never contemplated by either party that an arrangement was being made whereby anybody was to be safeguarded by the Government against loss.

A little further in the hearings I learned some things about high finance and interlocking companies that almost made me dizzy. I found some things about our sugar friends and their numerous companies and their methods of taking profits off the public all along the line. One man, a Mr. Post, who appeared before our committee, was president, as I recall, of over 40 different sugar companies of one kind or another, all doing business with the American people. One company owned about all the producing plantations in Cuba. Another handled the sugar in one way and another in some other way, and all added to the profits of the sugar interests.

I charge here that while these people did suffer a comparatively small loss through one of their companies, while appearing to be interested in finding cheap sugar in Argentina in order to relieve the American people from the sugar profiteering price charged by their other companies, that other of their companies were at the same time and before making tremendous profits by charging those enormous prices, which were breaking the backs of American home owners and housewives in every city, hamlet, and home in our land. I will show that fact from the lips of Mr. Post, the sugar king, by his own admissions. Let me read some of the questions that I asked him in regard to this matter and his answers.

Mr. WYANT. Will the gentleman yield?

Mr. RIDDICK. I can not; my time is limited.

Mr. MOORE of Virginia. What page of the hearings?

Mr. RIDDICK. Page 25:

Mr. RIDDICK. Let me ask you a question right there. Do I understand that some of your companies were selling sugar at the high profiteering prices, and at the same time your other companies sought to break the market and expected to make a good profit out of the transaction, and then when you did not make a profit you come in here and ask the Government to take care of your losses? Is not that the case?

Mr. POST. We were distributing sugar at that time at about 21 cents. This sugar was bought particularly for canners and preservers. A committee of the canners came to New York and urged us to help them get this sugar to keep their canneries going. It did have the effect of breaking the price, but we were all very willing to have the price lowered for sugar.

That was evasive. It did not answer my question, so I pressed him still further, as follows, and I read from the hearings:

Mr. RIDDICK. Were not your other companies selling sugar at the high prevailing prices?

Mr. POST. They were selling raw sugar at the market price, whatever it was; yes. And they were selling refined sugar at the market price, which was considerably lower than could have been secured for it.

Mr. RIDDICK. Then the fact is simply that your companies were selling sugar at profiteering prices, and at the same time you sought to break the market and expected to make a good profit out of that transaction?

Mr. POST. In the refined sugar business there was no profit at times, because the record shows millions of dollars were lost by all the companies in that year—1919.

Mr. RIDDICK. But at this particular time prices were extremely high?

Mr. POST. Oh, at that time the refiners were paying very high prices for raw sugar, bringing a great deal of it in from Java and anywhere else that they could get it, and their margin of profit was very small.

Mr. RIDDICK. But I understand that some of you people were connected with the production of sugar. They were getting tremendous prices, were they not?

Mr. POST. Only for a little of it, because most of the crop had been sold.

Mr. RIDDICK. But they were getting high prices for some of it?

Mr. POST. For a part of it; yes.

"Yes." He finally admitted it.

The American people were using 100,000 tons of sugar every week. During the profiteering period on sugar these same gentlemen who are asking us to vote them millions of dollars of the taxpayers' money raised and imported and sold hundreds of thousands of tons of sugar to the American people. On the sugar they raised and manufactured and brought from Cuba, for instance, there was never any limit to the price they could charge. No one will ever know how great their profits were during the war years on their many, many large transactions among all their companies, but on a measly 14,000 tons they figure a loss of some millions of dollars, which they ask Congress to pay out of public funds as a moral obligation due them. The claim is not a just one against the taxpayers of the Nation, and Congress must not authorize it. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. WARD of New York. Mr. Chairman, I yield 10 minutes to the gentleman from Nebraska [Mr. MCLAUGHLIN].

Mr. MCLAUGHLIN of Nebraska. Mr. Chairman and gentlemen of the committee, I was one of the members of the Committee on Agriculture who was at first naturally prejudiced against this claim. I voted several times to defer the claim and postpone final action on it from time to time, and even signed

the minority report in the Sixty-sixth Congress; not that the evidence at that time convinced me that the claim was not just, but certain members of the committee had said to me that they had something to disclose. They said, "You act with us and hold this matter back, because we have some testimony that can be brought in after a while to show that there is something underhanded—something crooked in this transaction." I waited until the final hearing was held before the committee, at which time a gentleman came before the committee and gave testimony on hearsay which he afterwards came in and asked to have stricken from the record because he admitted he knew nothing about it, and that what he said was utterly unfounded. This statement, which was withdrawn from the record, was all the adverse testimony that was presented in this entire case. You have heard here that the American Trading Co., which was not in the sugar-importing business, undertook to import sugar at the request of the Government to break the price of sugar in this country. The sugar was imported, the price dropped, and when the American Trading Co. applied to sell the sugar in the Argentine to save themselves the Government would not let them sell it back because the State Department feared it might interfere with our international relations. Within the past 24 hours I have gone over 100 pages of letters and cablegrams passing between the State Department of this country and the Argentine, in which it appears that the Secretary of State refers to the American Trading Co. as the purchasing agent of the United States Government.

Mr. JONES of Texas. Will the gentleman yield? Why did not the gentleman come before the committee?

Mr. McLAUGHLIN of Nebraska. There were copies of this correspondence made, and I have had access to them——

Mr. JONES of Texas. But the committee passed a resolution that all the papers be referred with reference to these matters——

Mr. HAUGEN. The gentleman will recall that the committee appointed a subcommittee, and that committee made investigation and report.

Mr. McLAUGHLIN of Nebraska. Yes, sir.

Mr. HAUGEN. And they failed to report what the gentleman is indicating.

Mr. McLAUGHLIN of Nebraska. The subcommittee did report their examination of these official documents. Two copies of these letters were placed in your office, and I obtained the correspondence from your office, 100 pages of it, and found it to contain exactly what I have stated.

Mr. McLAUGHLIN of Michigan. The gentleman from Iowa certainly can not say that. I was chairman of that subcommittee, and I reported, and I filed with your office the originals from the State Department, and they have all been in your possession for a long time.

Mr. McLAUGHLIN of Nebraska. One of the cablegrams sent by the Department of State to the Argentine Government contained these words:

> On the arrival in New York of these sugars they will be distributed by the United States Government to essential industries.

Phrases of that kind occur throughout the correspondence, and the American Trading Co. is referred to repeatedly as the "purchasing agent of the United States Government."

Something has been said here about this company being promised a profit of 2 cents a pound instead of 1 cent, as was authorized to other companies. Gentlemen who say this must know in their hearts that they are misrepresenting the case. When our Government conferred with the American Trading Co. and asked them to export this sugar Mr. Franklin, who conducted the negotiations for the American Trading Co., said they had no distributing agencies. They said, "We were not in the business of buying or distributing sugar, and if the company imported sugar it would be necessary for the Government to get somebody else to distribute it." This the Department of Justice agreed to do. They negotiated with and finally secured the B. H. Howell, Son & Co. The Department of Justice introduced these two companies to each other. They had no interlocking directorates and had never done business together before. They were introduced to each other by the Government, and the Government arranged to allow 1 cent per pound gross commission to the American Trading Co. for buying the sugar and 1 cent to B. H. Howell, Son & Co. for distributing. The American Trading Co. used its own credit in the purchase of this sugar, and they are the heavy losers in the transaction. I challenge any man, a member of the committee or otherwise, to find any testimony in the record by anybody that appeared before the committee that denies the facts that I have set forth here. These people were acting as the agents of the Department of Justice. They went ahead in good faith, and because of the failure of the Government to live up to its agreement sustained this loss. Like the gentleman from Louisiana [Mr. ASWELL], I say, for one, that it will be a sad time in this country when the United States Government breaks faith with its citizens in a transaction like this.

Mr. RAKER. Will the gentleman yield for a question right there?

Mr. McLAUGHLIN of Nebraska. Not now, thank you.

I want to emphasize the fact, gentlemen, that the American Trading Co. had not prior to this time dealt in sugar, and that they entered into this transaction at the suggestion and request of the State Department and the Department of Justice, and when they discovered that through the advertisement of these Government departments and the publicity given by the newspapers, to the effect that vast stores of sugar were coming in from the Argentine, the price broke, they asked permission to sell the sugar back to the Argentine Government for just enough to save themselves. As the gentleman from Ohio said, when sugar had risen in the Argentine to 20 to 25 cents a pound, the State Department offered to sell the sugar still remaining down there for 16 cents a pound, when it had been bought at about an average of 13½ cents a pound, which would have barely saved these companies. But they were denied that privilege. So they came before us with this loss, a loss which every member of the Sugar Equalization Board says should be paid. Every member of the board now says, and has said, that this company should be reimbursed. Owing to the fact that the board had ceased to function, they voted by a vote of 5 to 4 that they did not believe they had the authority to pay the claim without an act of Congress. That is why the claim is here. They said it should be paid by all manner of means, but they did not believe they could pay it without authority of Congress.

And the statement put in the RECORD by the gentleman from Kansas [Mr. TINCHER], on hearsay of someone, that Mr. Glasgow might be getting a fee from somebody, is absolutely preposterous. Mr. Glasgow was the fifth one of that majority of four that voted not to allow this claim until there was action by Congress. And if he had had any thought of not playing square in the matter, if there was anything in it for him, does not everyone here know that he would have settled the claim then and there, without referring it to Congress for authority?

Reference has been made to a certain Mr. Riley, who at a late hour appeared before the committee—a successor, I believe, to Mr. Figg. Mr. Riley was peeved over something, and while he had all the records in the Department of Justice and could see all the records in the Department of State—as I have seen them and others have seen them—instead of looking them over, he went up to New York and asked the American Trading Co. to turn over all the copies of their records, when he had them down here and could refer to them every day. Because it was suggested that he look over the records in Washington, he came before the committee and put in some adverse testimony by mere inference and not based on fact. So that everything that has been said here this afternoon directly or by way to the effect that something might be dark or underhanded in this transaction is absolutely without foundation. Mr. Chairman, no more just claim has ever been considered by any Congress than the one now before the House, and the resolution should pass unanimously.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. KINCHELOE. Mr. Chairman, I yield to the gentleman from Missouri [Mr. HAYS].

Mr. HAYS. Mr. Chairman, the object to this resolution is to reimburse certain sugar companies for losses sustained in 1920 upon sugar they were holding when the break came in the high prices that had obtained for some months previous. The amount of loss the Government is asked to meet approximates $2,250,000, and is based upon a transaction involving between 13,000 and 14,000 tons of sugar. In April, 1920, and for some months earlier sugar was retailing in this country for prices ranging from 25 to 30 cents per pound. In that month the Department of State and the Department of Justice learned of a large surplus sugar supply in Argentina, but at that time there was an Argentine sugar embargo which prevented sugar from being shipped out of that country.

In April of that year the United States Government invited the American Trading Co., of New York, to purchase a large quantity of Argentine sugar for shipment to this country, and authorized it to take a profit of 1 cent per pound. At the same time it invited the B. H. Howell Son & Co. to distribute the sugar to the American dealers at a profit of 1 cent per pound. Our State Department was negotiating with the Argentine Government to have the embargo lifted, and it agreed with these two concerns to secure a concession whereby the sugar

in question could be brought out of Argentina and shipped to the United States. Thereupon the American Trading Co. and the Howell Co. undertook the enterprise of bringing in this sugar to our markets. Some delay occurred in getting the embargo lifted, but on May 22, 1920, a concession was obtained by our Government whereby these concerns might purchase sugar and bring it out of Argentina within the 90 days following. Other delays occurred which were the fault of the sugar dealers themselves, and it was not until late in August that the sugar was shipped. In the meantime the sugar market in this country had declined so that the sugar in question was sold at a price whereby the claimants under this resolution sustained a loss on the shipment amounting to $2,225,000, and it is for this sum that they are asking reimbursement.

The first question that naturally arises is, Do they have a legal claim, or do they have only a moral claim, or do they have a claim without any justification whatever? When this resolution for relief first came before our Committee on Agriculture for consideration Attorney General Palmer testified before the Committee on Agriculture. More recently Attorney General Daugherty has appeared before the committee. Representatives of the State Department have also been heard, as well as numerous witnesses offered by the claimants.

It is not contended by the claimants nor by any representative of the Department of Justice or the Department of State that our Government assumed any obligation to meet any loss these claimants might sustain in the transaction. No thought of loss seems to have occurred to any of the parties involved when the arrangement was made. Not only did the Government fail to guarantee against loss but it does not appear that either of the departments possessed any authority to make such a guaranty. The claimants themselves concede in fact that the Government is not legally liable for their losses. They are proceeding solely on the ground of a moral obligation. If legal liability did exist, these claimants would not seek recovery through a bill in Congress, but would seek their proper remedy by suit against the Government in the Court of Claims.

Then, since both proponents and opponents of this resolution agree that there is no legal liability on the part of the Government, the next inquiry is whether there is a moral obligation. The transaction between the Government and these claimants was not a contract whereby the claimants were to become agents of the Government. Under any consideration whatever the Government did not stand to reap a penny of profit from the deal. The Government, desiring to see a reduction in sugar prices, merely invited these men to undertake the transaction and offered to aid them by securing a removal of the Argentine embargo. The claimants were to take the profits if any should accrue. Even in their testimony before our committee the claimants did not pretend that this engagement was undertaken in a spirit of altruism or public charity. They assumed the job solely for the money they expected to make.

Along about the same time the farmers of the country were invited to plant crops to capacity limit. The factories were invited to increase their output. But in that same year of 1920 many farmers sold their crops for less than the cost of production. Many mills and factories and other lines of endeavor had a similar experience. These farmers and other business men who responded to the call of the Government for an increase in output and who sustained loss as a result have precisely the same right to ask for reimbursement for their losses as do these sugar companies.

Then, too, how about the wholesale houses and the retail dealers who were trying to accommodate their trade when the sugar market was at its peak? They stocked up with sugar, as far as they were able to buy it, in order to meet the demands of their customers; and when the bottom fell out of the market they sustained heavy losses on the sugar they held in stock. If the claimants under this resolution are allowed to recover, then every other dealer who sustained a loss might with equal propriety ask for relief.

But there is yet another angle to this question. I do not know the complete personnel of these claimant firms, but the two outstanding figures in the Howell Co. are James H. Post and B. H. Howell. These two men, as appears from the evidence given by Mr. Post before our committee, had been long engaged in the sugar business and were members and officers in other sugar concerns. Mr. Post had been for 20 years an officer in the Cuban-American Sugar Co. This company owns six sugar producing estates in Cuba. Mr. Howell is vice president of the company. Mr. Post is president of the National Sugar Refining Co. of New Jersey, and Mr. Howell is a member of the firm. Both of them are interested in the Constantina sugar estate in Cuba and also a refinery in Louisiana. The evidence showed their connection with numerous other sugar plantations and sugar refining companies. Their great prominence in the sugar field had given them tremendous power in the determination of prevailing sugar prices.

On September 8, 1920, I called on the Federal Trade Commission for information as to the per capita consumption of sugar and was furnished a written statement by that body showing the average per capita consumption for a period of 10 years. It showed that the average use of sugar per individual in the United States for 10 years past had been 81.23 pounds each year. Mr. Post testified that the weekly consumption of sugar in the United States amounted to 100,000 tons of 2,240 pounds per ton. That means 224,000,000 pounds per week, or 32,000,000 pounds per day. For weeks and months during 1920 the housewives of America were paying from 25 to 30 cents per pound for sugar, and on all they bought at that price the sugar profiteers were robbing them of at least 15 cents per pound. A simple calculation in arithmetic will show that during the peak of sugar prices the sugar profiteers were robbing the American public of from $3,000,000 to $4,000,000 every day. I do not know how much of this went into the pockets of Mr. Post and Mr. Howell and their associates, but I do know that good conscience and good Americanism on their part should have saved the buying public immense sums of money.

And now, when these people come to Congress asking relief for a loss sustained in this one transaction, which was made at the invitation of the Government, I think we are justified in considering the whole course of their dealings with the people whom the Government represents. That they do not have a legal claim is conceded; and from the four corners of the evidence I am not of the opinion that they have a moral claim. They do not come to court with clean hands and their claim is without equity. When this resolution comes to a vote I will vote against it.

Mr. KINCHELOE. Mr. Chairman, I yield one minute to the gentleman from New York [Mr. LONDON].

Mr. LONDON. Mr. Chairman, I desire to ask the chairman what were the functions of the Sugar Equalization Board and why did that board act as the agent of this concession?

Mr. WARD of New York. Because they had no authority and no funds.

Mr. LONDON. No funds?

Mr. WARD of New York. And no organization.

Mr. LONDON. What were their functions?

Mr. WARD of New York. To control the distribution of sugar.

Mr. LONDON. And they could not make a purchase?

Mr. WARD of New York. They had no funds or no organization by which to purchase.

Mr. PURNELL. Let me state as a further reason why they required prompt action. The Sugar Equalization Board, even though it might have had the authority—and that is the question—had no organization in the Argentine with which to purchase the sugar. It took quick action to bring it back here and break the market.

The CHAIRMAN. The time of the gentleman from New York [Mr. LONDON] has expired.

Mr. WARD of New York. Mr. Chairman, I yield five minutes to the gentleman from Wisconsin [Mr. VOIGT].

The CHAIRMAN. The gentleman from Wisconsin is recognized for five minutes.

Mr. VOIGT. Mr. Chairman and gentlemen of the committee, as a member of the Committee on Agriculture I have given very careful consideration to the claim involved in this resolution, and I have come to the undoubted conclusion that this claim is a highly meritorious one and should be allowed.

I want to state briefly the salient facts in this case. In the spring of 1920 there was a serious sugar shortage in the United States. You will recall that at that time sugar went to 25 and 30 cents a pound. President Wilson had transferred the authority under the Lever Act exercised theretofore by the Food Administration to the Department of Justice. The Attorney General appointed several special assistants for the purpose of exercising the authority that had been transferred to that department by the proclamation of the President. Yet sugar soared up to 25 and 30 cents a pound. The Attorney General learned, through the State Department, that there were something like 150,000 tons of sugar in the Argentine that could be obtained at a reasonable price. The Attorney General, through his special assistants, then got into communication with the American Trading Co., one of the claimants involved in this resolution, and requested them to import this sugar, or some of it, from the Argentine. The American Trading Co. had never dealt in sugar. They were novices in the sugar business. They at first refused to go into the business. The testimony shows that Howell & Co., who were asked

to distribute the sugar, when brought into the proposition, refused to do it, and they finally agreed to do it only as a patriotic duty, and they were limited in their compensation. They had to put in their money; they had to furnish the ships; they had to furnish the insurance, and they had to furnish the men in the Argentine to buy this sugar, and they agreed to limit themselves in their profit to 1 cent a pound gross, which probably gave them one-half a cent a pound profit.

Now these men are held out to the House of Representatives as profiteers. I submit to you, genetlemen, that if anybody in this country at that time in that situation would import sugar to this country from Argentina and invest in that transaction $6,000,000 of his own money, and netted only half a cent a pound profit, he could not be classed as a profiteer. That is what the evidence shows in this case.

At that time there was an embargo on sugar exports levied by the Argentine Government. These people could go down there and buy that sugar, but the Argentine Government would not let it go out because there was a threatened sugar shortage in the Argentine. Our State Department told these people, through the Department of Justice, to go on and buy this sugar and said to these people, "You buy the sugar and we will have this embargo removed. We will guarantee that you can get that sugar out of Argentina. We have the promise from the Argentine Government." The Argentine Government treated this as an importation of sugar for the Government of the United States. You will find it in the record.

Our own Government, our own State Department, fell down on the raising of that embargo. These men bought the sugar at the then existing market price, and instead of the department, as promised the claimants, having this embargo speedily removed in Argentina, it took our State Department a month and a half to have this embargo removed. In the meantime the price of sugar fell, and these men could not get the sugar out of the Argentine, although they had the assurance of the State Department of the United States that this embargo could be released.

They shipped some of that sugar up here. While it was on the way the price of sugar began to fall. The Attorney General's department spread information in this country, when sugar was up to 25 and 30 cents a pound, that the Government was taking means to import 150,000 tons of sugar from the Argentine. The effect of that was to break the market in the United States, and that fact alone inured to the benefit of the people of the United States, I think, in the sum of several hundred million dollars.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. VOIGT. Mr. Chairman, may I have one or two minutes more?

Mr. McLAUGHLIN of Nebraska. I yield to the gentleman one minute.

The CHAIRMAN. The gentleman from Wisconsin is recognized for one minute more.

Mr. LONDON. On what basis——

Mr. VOIGT. I regret I can not answer a question in one minute.

So that these people, these claimants, were prejudiced by the conduct and by the promise of the State Department of the United States to raise this embargo. They lost their money. Then these people, when they had part of the sugar down in Argentina and the price dropped in the United States—the price in Argentina was at that time 26 cents a pound—offered to sell this sugar that they had left in Argentina to the Argentine Government at 16 cents a pound, which would leave them out, without making a dollar and without losing a dollar, and our State Department refused to let them resell that sugar. They lost their money because our State Department failed to make good on raising the embargo and refused to allow them to resell the sugar down there. I will hold the Government to the same rule of conduct as an individual making good a moral obligation. It is the conduct of the Government of the United States that has caused this loss to these people, and there never was a more honorable and equitable claim presented to this Government. [Applause.]

The CHAIRMAN. The time of the gentleman has expired. As the time now stands the gentleman from New York [Mr. WARD] has 44 minutes remaining and the gentleman from Kentucky [Mr. KINCHELOE] has 46 minutes remaining.

Mr. KINCHELOE. I yield one minute to the gentleman from Pennsylvania [Mr. KIRKPATRICK].

Mr. KIRKPATRICK. Mr. Chairman, I should like to ask the gentleman from Wisconsin [Mr. VOIGT] this question, whether he agrees to the statement made by the gentleman from Montana [Mr. RIDDICK] that at the time they entered into this arrangement these parties did not expect to be reimbursed in case of loss?

Mr. VOIGT. I will say this, that at that time sugar could be bought in the Argentine for 14 cents a pound and the price in this country was between 25 and 30 cents, and naturally there was no talk and nobody ever thought of any loss. There was no conversation on the subject. But our own State Department told these people, "You buy the sugar and you can get it up here. We have the promise of the Argentine Government to raise the embargo so you can get it up here." Our State Department did not have the promise of the Argentine Government, and it took a month and a half to release the embargo, and in the meantime these people lost money.

Mr. KIRKPATRICK. The gentleman has not answered my question.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. KIRKPATRICK. May I have one minute more?

Mr. KINCHELOE. I yield to the gentleman from Pennsylvania one minute more.

Mr. KIRKPATRICK. The gentleman has not answered my question. The gentleman from Montana [Mr. RIDDICK] stated definitely that these parties testified that they did not expect to be reimbursed in case of loss. Is that a fact? Does the gentleman agree to that?

Mr. VOIGT. There was not any talk about any expectation, and they never testified to any such state of facts.

Mr. KIRKPATRICK. Does not the gentleman think that the total omission of that fact from the arrangement amounts to an understanding that these parties were taking the risk of loss in return for the profit that they expected to make?

Mr. VOIGT. I do not think they took the risk, because from start to finish they were the agents of the United States Government. They were in the hands of the Government in the purchase, and in the agreement for the sale of this sugar. They were practically Government agents or factors, investing their money on the faith of the Department of State and the Department of Justice.

Mr. KIRKPATRICK. In the hearing the gentleman from Montana asked this question:

> Mr. RIDDICK. As experienced business men did you not know that where there was room for profit there might also be loss?

Mr. Post replied—

> It did not occur to us in this case, and we thought we would surely get expenses, at least, in this case.

In other words, if it did not occur to them that there was going to be any loss, it certainly did not occur to them to expect the Government to reimburse them for the loss, and therefore they did not expect to be reimbursed in case of loss.

The CHAIRMAN. The time of the gentleman has expired.

Mr. KINCHELOE. I yield 10 minutes to the gentleman from Iowa [Mr. HAUGEN], chairman of the Committee on Agriculture.

Mr. HAUGEN. Mr. Chairman, it is not my purpose to make an extended argument against the bill under consideration, the bill to reimburse the American Trading Co. and B. H. Howell & Sons over $2,000,000 lost by them in importing sugar from the Argentine. It seems to me that the facts stated in the hearings are sufficient to convince any unbiased mind that the bill should not pass.

The gentleman from Wisconsin [Mr. VOIGT] says that the Government appealed to these people as patriotic men to handle the sugar. The Government also appealed to millions of other patriotic men. It appealed to practically every farmer and every good American citizen to aid in carrying on the war. One can not claim that there is anything more than a moral obligation here. The Government owes that same moral obligation to every farmer who raised wheat and sold it at the price fixed by the Government, which price was probably half what it would have been had the Government not interfered.

One contention is that the purchase of the 13,902 tons of sugar was made in the name of the Government, and if so, the Government should be held liable for the loss. We had some statements touching on that, and the evidence is that nobody claims to have a contract with the Government and that nobody representing the Government had authority to enter into a contract. I refer you to page 95:

> The CHAIRMAN. What authority did that proclamation give you to buy or sell or to guarantee any profit?
> Mr. FIGG. We did not at any point have the power to guarantee against loss by that act.
> The CHAIRMAN. Did you have the power to buy?
> Mr. FIGG. No; we did not; not as the Department of Justice.

The CHAIRMAN. Then you agree with Mr. Palmer and Mr. Glasgow that there was no power granted anywhere to purchase or to guarantee against loss?
Mr. FIGG. I think that is probably true.
The CHAIRMAN. Did the Government have any power to purchase or to guarantee against loss?
Mr. FIGG. I think not; no, sir (p. 95).

One contention is that the American Trading Co. was prevented by the Government from selling the sugar in the Argentine, and for that reason the Government should make up the loss.

Mr. Franklin was asked this question:

Why were you prohibited from selling the sugar in the Argentine?
Mr. FRANKLIN. Because the ambassador and the State Department told us, through the Department of Justice, that it would be impossible to sell down there without causing difficulties.

Certainly no one will contend that the department should have aided these people at the expense of possible trouble.

Mr. Armstrong, their attorney, said:

May I interrupt to say that this sugar was bought in the name of the United States Government, and it was the question of the United States Government directly selling back to the Argentine Government. It was a Government transaction.

Now, what has the Attorney General to say about it? The testimony of Attorney General Palmer is—

I think it is very questionable whether the purchase was made in the name of the Government.

So much for that.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. HAUGEN. I prefer to finish my statement.

Mr. VOIGT. Will the gentleman yield for just a brief question?

Mr. HAUGEN. Yes.

Mr. VOIGT. Just one question. I call your attention, on page 6 of the report, to a telegram from our State Department to the American Embassy at Buenos Aires—

Mr. HAUGEN. I am going to clear that up.

Mr. VOIGT. One second.

Mr. HAUGEN. Go ahead.

Mr. VOIGT. It says:

The American Trading Co. has been appointed purchasing agent by the Department of State.

Mr. HAUGEN. Yes. I will refer to that. And let me quote you another statement by Mr. Glasgow, attorney of the Sugar Equalization Board:

Mr. GLASGOW. And let me ask you another thing. It has been a long time since this transaction, and any claims ought to have appeared a long time ago; but if you pass any other do not leave any discretion with the board, if you want it paid, because I have told you the board will never pay out a cent other than this claim as long as it is not directed absolutely to do it by Congress.

Now, these claims, the claim of the American Trading Co. and B. H. Howell & Sons, and the claim of De Ronde are on a par with thousands of other claims. Who called attention to this supply of sugar first? Was it the department, as alleged, that called attention to it? Let us take Mr. Franklin's statement of it. He is a member of the American Trading Co. and one of the claimants. What does he say about it? Mr. MCLAUGHLIN of Michigan asked him how did this thing start and how did it develop? Mr. Franklin replied:

Well, it started exactly as I have told you. In April I told the Department of Justice that this sugar was there in the course of a conversation had with the State Department.

Evidently Mr. Franklin made the first move and not the department, as has been suggested.

Now, how about the guarantee? Take the testimony of Mr. Figg. Mr. Figg is a special attorney in the Department of Justice. He had charge of these transactions and was the only one connected with it. What has Mr. Figg to say about it? He was asked what authority the proclamation gave, referring to the proclamation of the President, to buy or sell or guarantee any profit?

Mr. Figg replied:

We did not at any point have any power to guarantee against loss by that act.

He was asked, "Did you have the power to buy?" He said:

No; we did not; not as to the Department of Justice.

Then the question was asked:

You agree with Mr. Palmer and Mr. Glasgow there was no power to purchase anywhere or guarantee against loss?

He said:

I think that is probably true.

He was asked:

Did the Government have any power to purchase or guarantee against loss?

His answer was:

I think not; no, sir.
The CHAIRMAN. Mr. Figg, you stated you had no intention of buying the sugar?
Mr. FIGG. That is right.
The CHAIRMAN. You do not claim you had any authority to enter into any agreement to buy or guarantee against loss?
Mr. FIGG. That is right (p. 96).

How can it be stated any more definitely than that? Mr. Figg was acting for the Department of Justice, and should know.

There has been much said about delay. It is alleged that the $2,500,000 claim is due to the delay in lifting the embargo. Here is the testimony.

The CHAIRMAN. I understood you to say that no agency of the Government or department of the Government was in any way derelict, but that they all did everything they could to assist these people.
Mr. FIGG. I think the Government was trying in every way possible. If there was any failure anywhere on the part of the Government, it was through the American ambassador in Argentina.
The CHAIRMAN. Did not the American ambassador assist them as far as he could?
Mr. FIGG. It was the result of his telegrams, or cablegrams, which were misleading.
The CHAIRMAN. In what way was it misleading?
Mr. FIGG. He had cabled the Department of State that the permit would be issued by the Argentine Government on the naming of the firm or firms to which it should be issued by the United States Government. When that request was made it was found that it could not be issued except with these restrictions, which were impossible of fulfillment (p. 97).

What were the restrictions which were impossible of fulfillment? Exactly what was required of others—nothing more nor nothing less. De Ronde and others imported under the restrictions without any inconvenience. Had the American Trading Co. made the required deposits of 30 per cent it would have had no trouble in importing its sugar.

The American Trading Co. and the B. H. Howell Co. were not satisfied with a 2 per cent profit, or twice the profit made by others, but also desired to be relieved from the requirement of depositing 30 per cent. Who were responsible for the delay?

Mr. Figg said in his letter to Mr. Franklin:

After talking over with your representatives, Mr. Lynn and Mr. Giddings, it was deemed that your agent already on the ground should be advised to contract for or buy as much of the entire surplus as possible before any further request was made that the embargo be lifted, as, of course, upon the general knowledge that this has been done will create a speculative market.

It is clear that it was at the suggestion of the American Trading Co. and B. H. Howell & Sons that the delay occurred, and not the fault of the department.

Mr. BEGG. Will the gentleman yield?

Mr. HAUGEN. Yes.

Mr. BEGG. This House has passed bills for the relief of miners who did not have as much of a contract as these people have. Is not that true?

Mr. HAUGEN. Oh, Congress has passed bills to pay other claims. Some have merit.

Mr. BEGG. Will the gentleman stick to the question? We undertook to compensate for monetary loss men who had implied contracts working for the Government during the war. Will the gentleman admit that statement?

Mr. HAUGEN. Congress has passed claims that it ought never to have passed.

Mr. BEGG. I do not think the gentleman could dig up his own votes too closely when it comes to that. Now, let me ask another question. If these people were trying to perform a service for the general public in breaking the price of sugar from 29 cents wholesale down to 17 cents wholesale, if these people were bona fide trying to do that, and then if the price broke before they could get to cover, does not the gentleman feel that there could not be a more binding contract in the face of the letters that have been written? The gentleman is a lawyer and he knows that all contracts do not have to be in contract form.

Mr. HAUGEN. The gentleman is taking up my time. I am not responsible for the bills the gentleman has in mind.

Mr. BEGG. That is about the only way you can get time on this bill. [Laughter.] Will not the gentleman admit that I am right?

Mr. HAUGEN. Let me answer the question. These people bought sugar and were to have a profit of 2 cents a pound, while others who bought it were to have only 1 cent a pound. They also wanted the special privilege of being relieved from making a deposit of 30 per cent, which others were required to make; in addition they were to get 2 cents a pound, while others were required to make the 30 per cent deposit and get 1 cent a pound. If it broke the price of sugar, it also bankrupted thousands of others. Are we under any moral obligation there?

Mr. BEGG. Will the gentleman let me ask him a question about that?

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. KINCHELOE. I will yield to the gentleman five minutes more.

Mr. RAKER. Will the gentleman yield?

Mr. HAUGEN. For a brief question.

Mr. RAKER. In relation to the embargo, from what source did the gentleman state the fact that the American Trading Co. and Howell were responsible for the embargo being continued?

Mr. HAUGEN. First let me clear up the matter of agreements and profits.

Mr. PURNELL asked:

Was there anything said to you by Mr. Figg or any other representative of the Department of Justice that would lead you to believe that the Government would take care of you in case there was a loss sustained?

Mr. FRANKLIN. No, sir.

The CHAIRMAN. I understand you to state that so far as the Sugar Equalization Board is concerned, that no obligation has been incurred?

Mr. GLASGOW. None, sir.

The CHAIRMAN. And that there is no legal obligation anywhere, though there may be a moral obligation?

Mr. GLASGOW. That is my judgment. I would not want to commit anybody else to that.

The CHAIRMAN. You are more familiar, I think, with the Food Administration than any other man.

Mr. GLASGOW. However that may be, that is my judgment (p. 32).

Mr. GLASGOW. In my judgment there is no contract in the commercial sense of an enforcible contract at law against the Government.

That is what he said, gentlemen. Now, there is another question that I put:

The CHAIRMAN. I understand you to state that so far as the Sugar Equalization Board is concerned no obligation has been incurred?

Mr. GLASGOW. None, sir.

The CHAIRMAN. And there is no legal obligation anywhere, though there may be a moral obligation?

Mr. GLASGOW. That is my judgment.

Mr. PURNELL (to the Attorney General). * * * Do you know whether there was any arrangement of any kind made whereby they were to be protected against any loss?

The ATTORNEY GENERAL. No, sir (p. 49).

* * * * * * *

Mr. TINCHER. There was no different arrangements concerning the profits that these importers would have on this sugar with the Department of Justice than the Department of Justice's effort to regulate all transactions in sugar—it was all the same profit?

The ATTORNEY GENERAL. It was the same profit.

Mr. TINCHER. So they were to have the same profit other men were to have in handling sugar, so far as you are able to enforce your ideas of the Lever food control law?

The ATTORNEY GENERAL. That is correct. Of course, we could not control all (p. 50).

* * * * * * *

Mr. TINCHER. You never guaranteed these gentlemen against any loss?

The ATTORNEY GENERAL. Certainly not (p. 52).

* * * * * * *

I asked Mr. Franklin:

The CHAIRMAN. Have you a contract with the Government guaranteeing you against loss?

Mr. FRANKLIN. No, sir (p. 22).

The CHAIRMAN. Do you claim to have a contract with the Government made by any official authorized to make a contract?

Mr. ARMSTRONG. Only as the facts show which I am developing before you at this time.

The CHAIRMAN. Do you claim to have a contract with the Government?

Mr. ARMSTRONG. That is rather a difficult question to answer.

* * * * * * *

Mr. WARD. Didn't you have an agreement specifying in some way the remuneration for your services?

Mr. ARMSTRONG. At the time we undertook the purchase of these sugars no arrangement had been made for compensation for our services. * * *

That is the testimony. I yield to the gentleman from California.

Mr. RAKER. The gentleman stated this embargo was not raised earlier because of the fact that the American Trading Co. and Howell were perfectly willing for the embargo to remain?

Mr. HAUGEN. Exactly. Here is Mr. Figg's letter to Mr. Franklin.

Mr. JACOWAY. The chairman does not mean to answer the way he did; I think the chairman is wrong.

Mr. HAUGEN. I have here Mr. Figg's letter to Mr. Franklin, notifying him that Argentina would lift the embargo. He also says:

After talking this over with your representatives, Mr. Lynn and Mr. Giddings, it was deemed advisable that your agent already on the ground should—

What?

should be advised to contract for or buy as much of the entire surplus as possible before any further request was made that the embargo be lifted.

Mr. RAKER. Then, according to that the American Trading Co. and their agent wanted the embargo released, so as to get more sugar at a cheaper price?

Mr. HAUGEN. Certainly; and enable them to buy sugar at a low price.

Mr. RAKER. Did the American people get the benefit of the cheaper price; did not the speculator get any?

Mr. HAUGEN. Now, Mr. Chairman, in conclusion I desire to say that in the absence of any agreement or authority to buy or sell sugar on the part of the Government, or to guarantee against any losses, and in the absence of any legal liability on the part of the Government to pay these claims, I see no just reason for paying out of the Federal Treasury the two and one-half million dollars carried in this resolution or the $2,000,000 carried in the other two resolutions. If these three claims are to be paid, it goes without saying that every groceryman, every merchant—yes, every sugar-beet grower—who lost money on sugar should be reimbursed. If these moral obligations are to be redeemed, hundreds of thousands of others with equal if not greater merit certainly should be redeemed. The committee has a bill before it to reimburse the farmers who lost money on the wheat crop in 1917 through the Government fixing the price. The farmers were appealed to in my State and other States to raise hogs and supply the country with fats. If these three claimants are entitled to reimbursement, then I submit to you that every moral claim, great or small, on a par with these should be satisfied.

The CHAIRMAN. The time of the gentleman has expired.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. WALSH, having taken the chair as Speaker pro tempore, sundry messages in writing from the President of the United States by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills of the following titles:

On May 15, 1922:

H. R. 4382. An act to provide for the application of the reclamation law to irrigation districts.

On May 20, 1922:

H. R. 4069. An act authorizing the Secretary of the Interior to sell certain lands on the Wind River Reservation, Wyo.

On May 22, 1922:

H. R. 11645. An act making an appropriation to enable the Department of Justice to investigate and prosecute war frauds.

On May 24, 1922:

H. R. 10329. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1923, and for other purposes.

On May 25, 1922:

H. R. 9951. An act to amend section 22 of an act approved February 14, 1920, entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes," for the fiscal year ending June 30, 1921; and

H. R. 11152. An act to authorize the Bear Mountain Hudson River Bridge Co. to construct and maintain a bridge across the Hudson River near the village of Peekskill, State of New York.

DISPOSITION OF CERTAIN SUGAR IMPORTED FROM ARGENTINE REPUBLIC.

The committee resumed its session.

Mr. KINCHELOE. How many more speeches does the gentleman from New York expect to have?

Mr. WARD of New York. I will use one more speech now. I yield five minutes to the gentleman from Indiana [Mr. PURNELL]. [Applause.]

Mr. PURNELL. Mr. Chairman and gentlemen of the committee, I think I can say as one member of this committee that I have given as careful consideration to this bill as any member of it. I have tried as hard as it is possible for me to do with my limited powers to find some sufficient reason to be against this bill. I signed the first minority report. I did it because it was whispered around this Chamber and elsewhere that we as members of the Committee on Agriculture had not yet gone into the facts in connection with this case. It was said if a little more time was granted they could dig up the facts and it would disclose clearly that this is a graft, that these men stand in the same relation as every other American stood then who was asked to do something to help win the war, and I worked as hard as any member of the committee to prevent this bill being considered, because I believed there was something yet that the members of the Committee on Agriculture ought to find out. When we had exhausted every opportunity, when Chairman MCLAUGHLIN of Michigan and

the distinguished gentleman from Arkansas [Mr. JACOWAY] and another member of the subcommittee went through every paper of the files from the State Department and the Department of Justice and finally reported I was absolutely convinced that this is a strong moral if not a legal obligation upon the part of the Government. [Applause.] Now stripped of all extraneous matters that have been brought into it, let me state briefly what this involves. The United States Government by and through its representatives in the State Department and in the Department of Justice, for the purpose of breaking the price of sugar in this country in order that it might result to the benefit of the people of the United States, sent the American Trading Co. down into the Argentine Republic to buy sugar, not for themselves but on behalf of the Government of the United States, and they went as agents for the Government. Here is an excerpt from a cablegram from the Acting Secretary of State, Mr. Polk, to the American Embassy at Buenos Aires. How do you square this with the contention that these people were not acting for the Government? Let me read:

The American Trading Co. has been appointed purchasing agent by the Department of Justice, and it is being instructed by that department to obtain quietly as many options as possible before the market is aware that the embargo has been lifted in order to avoid unduly high prices, otherwise it will be impossible to buy Argentine sugar.

Mr. RAKER. What is the gentleman reading from?

Mr. PURNELL. From an official communication sent by the State Department to our representatives in Argentina. I prefer not to be interrupted. The Department of Justice and the Department of State exercised supervision over this transaction. They not only told the American Trading Co. and B. H. Howell what they were to do in the Argentine Republic, but they also told them to whom they must sell the sugar when it was brought back. They fixed the amount of the profit they should have, and when the news was spread throughout this country that something like 100,000 tons of sugar had been bought from Argentina—which was a mistake, notwithstanding the press carried the report—the price of sugar began to fall in this country, and as a result hundreds of millions of dollars were saved to the consumers of sugar. Immediately when the American Trading Co. saw they could not bring the sugar back to the United States and sell it at a profit they asked the Department of Justice and the Department of State, who had exercised every control over this transaction, for permission to sell that sugar to Argentina or in Argentina and thus save a great deal of money. This was certainly a very reasonable request, but the Department of Justice and the Department of State said they could not sell it but must hold it.

Now, a great deal has been said in this debate to-day of other people in this country who were asked to do things for the Government and lost money. This bill will not be popular in my district, I am sure. Many of my farmers lost money, thousands and thousands of dollars, on hogs and grain trying in a big patriotic way to follow the lead of those who were directly charged with the conduct of the war. They, too, may have moral or legal claims; if so, we will meet them when they are brought before us. We must decide now what we are to do with this one. I regard it as a meritorious proposition. If the Government of the United States owes to any individual or group in this country or elsewhere any money, I want to see it paid. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. KINCHELOE. Mr. Chairman, I yield five minutes to the gentleman from Tennessee [Mr. CLOUSE].

Mr. CLOUSE. Mr. Chairman and gentlemen of the committee, when the question of going into the committee this morning arose the matter was somewhat doubtful as to whether we would go into the committee for the consideration of this bill. On the original vote I cast my vote against going into the committee, because of the limited investigation that I have made of this question I was opposed to the legislation. But feeling that every American citizen should have the right to be heard by the Congress of the country, before the vote was announced I decided to change from nay to aye and go into the Committee of the Whole, in order that both sides of this controversy might be presented to the membership of the House.

Since the hearings have been discussed both pro and con I have gone back to the original views that I entertained on this proposition, although I am not exactly in accord with any of the gentlemen, either the proponents of the bill or those in opposition to it. I have heard some say that perhaps there is a legal obligation attached to this. Well, I deny that, and I think any man who will construe the correspondence, the language, the contract that led up to inducing these gentlemen to go to the Argentine and buy this sugar will be convinced that there is absolutely no legal obligation. I do not think that they were agents of the Goveriment of the United States in this transaction, but that they were rather brokers, dealing with the United States, and I want to try to make myself clear upon that proposition.

Mr. HARDY of Texas. Will the gentleman yield for a short question?

Mr. CLOUSE. Yes.

Mr. HARDY of Texas. If they were agents of the United States, then there is a legal obligation?

Mr. CLOUSE. I would not concede that to be true, but they were not the agents of the United States, because they contracted for this material from the Argentine sugar growers in their own name and not in the name of the United States. And had they been the agents of this Government they could not have contracted in their individual names.

Mr. HUSTED. Will the gentleman yield for a brief question?

Mr. CLOUSE. In just a moment.

Another reason why I say they were not the agents of the Government is because they did not believe they were, for what became of this sugar? Why, if they had been the agents of the United States to purchase this sugar for and on behalf of it the title to the sugar would have been in the United States Government. But these gentlemen did not so regard it, or otherwise they converted the property in violation of such an agreement. If they were agents of the United States Government, as is said by some, why did they sell the sugar themselves without the consent of the Government?

Now, let us see, Mr. Chairman, another thing: I believe in this Congress carrying out every moral obligation that this administration or any preceding administration made. But is there a moral obligation attached to this? Well, I do not think there is. The whole theory of the transactions appears to me to be a scheme whereby they intended to protect the sugar industries then operating in the United States and at the same time make money off of the Federal Government in connection with the contract that they were trying to execute in the Argentine Republic. Who are these gentlemen? I turn to the hearings, and I find that Mr. Post appeared before the committee, and, though very reluctantly, he did finally say that he was connected with the Cuban-American Sugar Co., and that this company owned six vast estates in Cuba, which were being used for the growing of sugar.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CLOUSE. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HAUGEN. Mr. Chairman, I make the same request.

The CHAIRMAN. The gentleman from Iowa makes the same request. Is there objection? [After a pause.] The Chair hears none.

Mr. KINCHELOE. Mr. Chairman, I yield five minutes to the gentleman from Mississippi [Mr. QUIN].

Mr. QUIN. Mr. Chairman, let us understand each other. The committee has brought in a bill to allow some rich, plutocratic speculators, who pretended to be patriotic to help the Government at this late day, rob the American people. These big concerns had sugar up to 32 cents a pound within 15 yards of a sugar plantation. These two big concerns that you are claiming helped the United States Government were holding the purchasers of sugar, the poor people, up for 32 cents a pound, and they had them limited to the purchase of 2 pounds at a time. How can you in good conscience reach into the Treasury of the United States and take out of it the taxpayers' money and give it to these men who were getting double commissions, and in the same breath will not give the cotton farmer a dime when you reduced his cotton, the short-staple, if you please, from 48 cents down to 9; when you reduced the price of wheat from $2.25 down to 90 cents; and the price of hogs, sheep, and beef cattle; when you reduced the price of wool in the same proportion? How is it that Congress can come up at this late hour and help these great, rich companies that need no help from any source and pretend that you do it under the guise that they were helping the United States Government? I never did indorse what the Attorney General did, although he was a member of my own party, when he fixed it that certain sugar raisers should get 18 cents a pound. They were all under his sanction getting 18, and the speculators getting a big rake-off by the time it reached the retailer, who sold sugar to the consumer for 28 to 32 cents a pound, and you now pretend in good conscience and morality that B. H. Howell & Co., and the American Trading Co., and one other big concern are entitled to all this money out of the pockets of the people. According to the evidence you are fixing to give them $4,000,000. Gentlemen, you can not afford to pass such a bill as this. Who will indorse you in this sort of a move? Will it be the plain

people who toil from early morning until dark at night? Will it be the man back on the farm who begins work at daylight and works as long as he can see? Will it be the man or woman in the factory? Will it be the man in the sawmill? Will it be the man in railroad shops and the operators of railroad trains? Will it be the man in the coal mine? Will it be the people in the office or the citizens in moderate circumstances? No. You will be indorsed by a few great big bankers interested in these three big sugar trading companies. You will be indorsed by these fellows that prey and trade on the people in a time of stress and war and who in peace come and ask you to further rob the people and assist the rich. That is what your resolution does. I hope you will vote it down. You know they have no legal contract or they would be in a court. The Attorney General and Secretary of State have no authority to bind this Government. It is no moral obligation on us. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. QUIN. Mr. Chairman, I do not think there is a quorum present, and I raise the point of no quorum.

The CHAIRMAN. The gentleman from Mississippi makes the point of no quorum, and the Chair will count. [After counting.] One hundred and six Members present, a quorum.

Mr. KINCHELOE. I will ask the gentleman from New York if he has more than one speech remaining?

Mr. WARD of New York. I have only one more.

Mr. KINCHELOE. Mr. Chairman, I yield to myself the balance of my time.

The CHAIRMAN. The gentleman from Kentucky has 21 minutes.

Mr. WARD of New York. How much time have I remaining, Mr. Chairman?

The CHAIRMAN. The gentleman has 24 minutes.

Mr. KINCHELOE. Mr. Chairman and gentlemen of the committee, I am sure, being a member of the Agricultural Committee, that I entered the hearings with an unbiased mind and with the sole purpose of seeking information. I am sure that I sat as a member of the committee and acted in the capacity of a juror during the hearings, and after having heard a great deal of it and reading the balance I have come to my own conclusion about the matter, and in the time I have I will try to present it to you in the same way that I would as an attorney presenting a case. I never saw any member of the firm of B. H. Howell & Co. or the American Trading Co. or the Lamborn people until the hearings began. I am frank to say that if this claim is allowed I think in fairness and justice the rest of the claims ought to be allowed.

This is going to take two and one-half million dollars out of the Treasury. The De Ronde claim will take $1,700,000 out of the Treasury, the Lamborn claim will take $570,000 out of the Treasury, or, in other words, you will take practically $4,000,000 of the people's money out of the Treasury of the United States to reimburse some people who entered into this scheme to buy up sugar from Argentina for their own individual profit.

Now, I want to separate the State Department proposition from the American Trading Co., B. H. Howell & Sons, and show you where they come in. Why, to hear some gentlemen you would think that the Department of Justice absolutely conscripted these three companies to buy this sugar. Now, let me show you Mr. Franklin's testimony on that proposition.

Mr. Franklin was down at the State Department attending to some other private business. While he was there Mr. Franklin mentioned to the State Department—Mr. Franklin, mind you, said to the State Department that there was some surplus sugar in Argentina and in Java; and when he told the State Department about it they said, "If that is true, you go over to the Department of Justice and tell them." Now turn to the hearings, page 20, dated January, 1921:

Mr. MCLAUGHLIN of Michigan. Who first brought up the subject of sugar from the Argentine?

Mr. FRANKLIN. I am unable to say that. It was in connection with a discussion in the State Department as to duties, and we were asking about export and import duties, and the question came up then. I do not know but what I may have said that there were sugars in the Argentine and sugars in Java, etc., and so on. They suggested that we tell the Department of Justice about it. We told the Department of Justice about that transaction in April, and then heard nothing more from it at all until May 7, at which time we were called down here to the meeting. It was about April 20, as I remember it, when I was in Washington in connection with other matters.

In other words, after Franklin had given the information the State Department requested him to tell the Department of Justice about it. The State Department did not telephone over to say that Mr. Franklin was coming.

Mr. MCLAUGHLIN of Michigan. How did this thing start and how did it develop?

Mr. FRANKLIN. Well, it started exactly as I have told you. In April we told the Department of Justice that this sugar was there, because of a conversation that was had with the State Department.

So on May 7 the representatives of the American Trading Co. came down here and saw the Department of Justice—not Mr. Palmer—Mr. Figg had control of it. There was an agreement. The American Trading Co. and the B. H. Howell Co. went in together and were to receive, not 1 cent a pound like De Ronde, or to receive 1 cent a pound like Lamborn, but they were to receive a cent a pound above each to go into this proposition. They went into it. I asked every witness who came on the stand during the weeks we were in session—and I challenge gentlemen on the other side to contradict it—I asked the representatives of the American Trading Co., the representatives of B. H. Howell Co., the De Ronde people, Lamborn, was there ever a word said between you and any representative of the Government, either the Department of Justice or the State Department, whether you were to be reimbursed if you suffered any loss in this transaction, and every one of them said that there was not a word ever said.

Mr. JONES of Texas. If the gentleman will permit me to suggest that the testimony of Mr. Franklin is that they paid between 13 and 14 cents for the sugar in Argentina, and the total cost brought it up to 19, and the 2 cents a pound was profit to the two companies.

Mr. KINCHELOE. Absolutely, and not one-fourth of a cent. They were to get 1 cent each when the others were getting a cent. Now let us see how the State Department came into this matter. They did not make this agreement. They talk about an agency of the Department of Justice and these people. Why, an agency would involve a guaranty of some sort of profit, and if there was a loss some guaranty of reimbursement. They were licensees, if anything, of the Government. But they did go into it, this American Trading Co. and B. H. Howell & Co. Then on May 14 they bought 7,900 tons in Argentina, on the 15th and 18th 3,300 more, and on May 27 1,000 tons, making a total of 13,200 tons. On May 22, on that very day the Argentine Government, of its own initiation, lifted the embargo on sugar and told every dealer in sugar, no matter from America or the Fiji Islands, you have the privilege of coming here and buying as much as 100,000 tons of sugar, provided you deposit 30 per cent of what is known as pilet sugar in the Argentine Republic, so that if the price of sugar started up by reason of the exportation out of Argentina the Argentine Government could protect itself. Lamborn took advantage of that and De Ronde took advantage of that. On the 22d of May—the same day, as I say, when the last purchase of sugar was made—the American Trading Co. and Howell & Co. stood together and said, "No, we will not do that. We can go and get the State Department of our own Government"—they knew they could not do it themselves—"and get an absolute embargo raised," so that they could take all their sugar out of Argentina at once and sell it for a profit and make millions. Now, then, on May 22, when they lifted this embargo, the price of sugar at that time and up to July 13 in this country was selling at 26 cents a pound, and then it began to fall July 13. The American Trading Co. and Howell & Co. had from the 22d of May to the 13th of July to get their sugar out of the Argentine and could have sold the pilet sugar at a profit practically all of that time.

Mr. MOORE of Virginia. If the gentleman will permit, there was shipping available at that time?

Mr. KINCHELOE. Certainly it was available, but they would not ship because they wanted the State Department to come in and——

Mr. JACOWAY. One month and thirteen days elapsed from the time the embargo was raised before the State Department——

Mr. KINCHELOE. Absolutely, but there was not any time elapsed between the time the American Trading Co. bought their last pound there and the time the Argentine Government raised its embargo——

Mr. JACOWAY. That is the 100,000 tons.

Mr. KINCHELOE. No—when they could have brought it out of there, 100,000 tons, by the deposit of 30 per cent of pilet sugar. But they did not do it; oh, no.

Mr. JACOWAY. Will the gentleman yield again?

Mr. KINCHELOE. I have not the time. What did they do? They said, "We will not abide by the Argentine embargo. We will just go down to the State Department of the Government and get them to get the Argentine Republic to lift the embargo entirely and do away with it." They bought the last

pound of sugar on May 22, and it was in August before they got any of the sugar to the port of New York, and now they come here and say that this Government ought to reimburse them, and after the sugar began to take a tumble on the 13th day of July, after they had gotten the State Department on their own initiative, of their own act, to raise the embargo entirely, then, in order to get under cover after they had stayed around and would not take advantage of the embargo that was raised by the Argentine Government, they went to the State Department and asked if it would not ask the Argentine Republic to let them resell that sugar down there.

Would not the State Department have been in a ridiculous position, after the Argentine Government had recognized the State Department and said, "Yes; we will raise the embargo," and then after the price of sugar began to fall, if these fellows had gone to the State Department and said, "Let us sell the sugar back there." What would you have thought of the State Department?

Mr. HARDY of Texas. Was there anything to prevent these companies selling at least 70 per cent of their sugar between the 23d of May and the 13th of July?

Mr. KINCHELOE. Not anything on earth.

Mr. HARDY of Texas. They could have brought out 70 per cent?

Mr. KINCHELOE. They could have brought out 70 per cent of 100,000 tons if they had wanted to.

Mr. MONTAGUE. Will the gentleman permit me to ask a question in explanation of what this means? Mr. Figg wrote a letter on July 29, 1920, in which he says:

I am very sorry to inform you that under no circumstances could the Government concur in the thought of even allowing any portion of this sugar to be sold in the Argentine.

What authority did he have to prevent the sale of sugar in the Argentine? Was he in the Department of Justice?

Mr. KINCHELOE. He was in the Department of Justice.

Mr. MONTAGUE. You do not think that he had the authority to prevent it?

Mr. KINCHELOE. I would not think the State Department would go and take back, at the instance of a private individual, what they said they were going to do.

Mr. MONTAGUE. Here is something which says they would not allow them to do it.

Mr. KINCHELOE. I can not answer for Mr. Figg on that proposition.

Mr. MONTAGUE. Was there any power in the State Department to prevent anybody who controlled the sugar situation as stated from selling sugar, or could the department tell them where to sell it?

Mr. ASWELL. In reply to the gentleman from Virginia, that position was assumed because those parties were agents of the Government for the Department of Justice.

Mr. KINCHELOE. Now they come and tell you that by reason of the fact that these people wanted to bring the 13,209 tons of sugar here that they broke the sugar market and it went down. Why, the people of this country at that time were consuming 100,000 tons of sugar a day, and yet they say to bring 13,209 tons of sugar in here absolutely scared everybody to death, and that it therefore broke the market. You take this fellow, Mr. Post, who is one of the copartners of the B. H. Howell people; he made the most peculiar witness that I ever heard. He is a good man, I presume. He is identified with 14 sugar companies in Cuba, in this country, and in Java. He and his associates had been bringing this sugar from Java, Cuba, and everywhere else, and selling it at the enormous price of 21 cents a pound, profiteering upon the American people, and yet he would have made you believe that he went into this for the patriotic reason of breaking the price of sugar and breaking down the profits of the 13 other companies with which he is associated. I asked him this question:

Mr. KINCHELOE. Mr. Post, I want to try to get your viewpoint as a business man, if I can, of this transaction. I am frank to say I do not understand it. Of course, the purpose of the purchase of this Argentine sugar to bring to this country was to break the market. That is conceded here. That was the purpose of it, to break the market for the benefit of the consumers of America. You, of course, knew that?

Mr. POST. That was the purpose of it; yes.

Mr. KINCHELOE. Now, with your holdings of sugar in Cuba, and with the war over, eliminating the patriotic end of it, knowing that the purpose of buying this Argentine sugar was to break the market, I can not understand your viewpoint as a business man. I can not understand why you should go into an arrangement of that kind unless you felt that the profits you would get out of this Argentine purchase would yield a greater dividend than you would get from your sugar in Cuba. What was really your purpose in it?

Mr. POST. In the first place B. H. Howell & Sons Co. never owned any sugar; we are commission merchants.

Mr. KINCHELOE. But the more sugar you handle the more you make?

Mr. POST. We get a commission; yes. We had not got over the feeling of loyalty to the Government that we had in the war, and the feeling that we ought to cooperate in every way we possibly could. That may seem very strange to you, but that was our purpose.

I confess it does seem strange. [Laughter.] Here is a man who is associated with 14 sugar companies, with sugar retailing at 35 cents, with Java, Cuba, and every other country scoured to get every possible bit of sugar that they could in order to sell it to a helpless public at an enormous price, and yet it was a patriotic motive that prompted Mr. Post to go into this to get only 1 cent a pound profit, and in order to break the market and kill the business of the 13 other companies with which he was associated. That is a question for you to determine. I have not any more responsibility in this matter than you have. There has been no politics, absolutely, in this. Talk about patriotic motives, why, when a war comes in any country it is a conglomeration of inequalities. You talk about the sacrifices of war.

I stood on the battle field of Chateau-Thierry in 1918 and saw that drive. I saw the American boys with arms shot off and legs cut off and eyes shot out brought back to the temporary hospital for treatment prior to sending them to Paris. Sacrifices? There are 50,000 firesides in this country to-day around which there is a vacant chair, showing a sacrifice of some father and some mother. There are thousands more in this country who are maimed for life. This Government spent $24,000,000,000 to win this war. And I thought that when the gentleman from New York [Mr. HUSTED] was praising Mr. Franklin that I would not pluck one laurel from his brow for his services to his country. But I will say that thousands of those that he brought back had empty sleeves and made a greater sacrifice than Mr. Franklin did in this war. [Applause.] You are forgetting that same American father and mother who to-day are grieved by reason of a vacant chair around the fireside. These people were feasting on 21 cents a pound for sugar and were making their millions, and then, not satisfied with that, they want this same sugar-consuming public to come and dig deeper down into their pockets and reimburse them to the tune of about $4,000,000 more. For me, as a responsible Representative to my constituency, I will never vote under those circumstances to take one dollar out of the Treasury that is put there by the sweat and toil of the sugar-consuming public in this country in order to reimburse these fellows who went in to win, when nothing was said about loss, and lost. [Applause.]

Mr. HUSTED. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from New York makes the point of order that there is no quorum present. [After counting.] One hundred and three gentlemen are present—a quorum.

All time has expired. The Clerk will read the joint resolution.

Mr. WALSH. Mr. Chairman, I move that the committee do now rise.

The question was taken; and on a division (demanded by Mr. KINCHELOE) there were—ayes 61, noes 52.

Mr. KINCHELOE. I demand tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. WARD of New York and Mr. KINCHELOE.

The committee again divided; and there were—ayes 74, noes 54.

So the motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HICKS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration Senate Joint Resolution No. 12, had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, Mr. FITZGERALD was granted leave of absence for two weeks on account of business in home district.

UNITED STATES BUREAU OF EFFICIENCY.

The SPEAKER laid before the House the following message from the President of the United States.

The Clerk read as follows:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, a report prepared by the United States Bureau of Efficiency in compliance with the provisions of the legislative, executive, and judicial appropriation act approved March 3, 1917, directing the Bureau of Efficiency to investigate the methods of the Civil Service Commission and to report its findings to Congress through the President.

WARREN G. HARDING.

THE WHITE HOUSE, *May 25, 1922.*

The SPEAKER. Referred to the Committee on Reform in the Civil Service.

CONFERENCE ON LIMITATION OF ARMAMENT.

The SPEAKER also laid before the House the following message from the President.

The Clerk read as follows:

To the Senate and House of Representatives:

In conformity with the proviso of the appropriation made in the urgency deficiency act approved August 24, 1921, for the Conference on the Limitation of Armament, I transmit herewith a report of the Secretary of State, presenting the statements of the expenditures made under his direction on behalf of the conference.

WARREN G. HARDING.

THE WHITE HOUSE, *May 25, 1922.*

The SPEAKER. Referred to the Committee on Expenditures in the Department of State.

ADJOURNMENT FROM SUNDAY UNTIL WEDNESDAY.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that when the House adjourns on Sunday next it adjourn until Wednesday next.

The SPEAKER. The gentleman from Wyoming asks unanimous consent that when the House adjourns Sunday next it adjourn to meet on Wednesday. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

EXTENSION OF REMARKS.

Mr. JONES of Texas. Mr. Speaker, I ask unanimous consent to revise and extend my remarks on the joint resolution under consideration to-day.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. EDMONDS. Mr. Speaker, I would like to ask unanimous consent to extend my remarks by publishing a report from Mr. E. E. Plummer, United States Shipping Board, on "Aids to shipping by the maritime nations."

The SPEAKER. Is there objection to the gentleman from Pennsylvania extending his remarks in the manner indicated?

Mr. WALSH. Mr. Speaker, reserving the right to object, what is it? On the ship subsidy bill?

Mr. EDMONDS. It is on the subject of aids to shipping by maritime nations.

Mr. WALSH. Is it in the hearings of the joint committee?

Mr. EDMONDS. No; it is not.

The SPEAKER. Is there objection?

Mr. GARNER. Is it to be printed in the RECORD or to be printed as a public document?

Mr. EDMONDS. No; it is to be printed in the RECORD in an extension of remarks; it is only a small article.

Mr. WALSH. Better have it in 8-point type or no one will read it.

Mr. EDMONDS. Yes.

Mr. BANKHEAD. Mr. Speaker, I could not hear the request of the gentleman from Pennsylvania.

Mr. EDMONDS. It is an article by Commissioner Plummer on the aids to shipping by the maritime nations. It is an historical article, to be printed in 8-point type.

Mr. BANKHEAD. Will it not go into the joint hearings on this proposition?

Mr. EDMONDS. It did not go into the hearings. It is only a small article and will not take up much space in the RECORD.

Mr. BANKHEAD. Well, it seems to me, I will say to the gentleman, if it is in line with these other statements that they have had after an extensive hearing that it ought to be incorporated in the hearings before the joint committee.

Mr. EDMONDS. It is simply an historical statement of aids given by different nations to shipping. It is not in the hearings and has not been published anywhere.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The article is as follows:

AIDS TO SHIPPING BY THE MARITIME NATIONS.

[By Commissioner E. C. Plummer, United States Shipping Board.]

From the time that the Lynch Commission, created by Congress in 1870, began its work of investigating the problem of American shipping the fact that through national legislation alone could our merchant marine in the foreign trade be restored has been recognized, but so much conflicting testimony has been forced upon Congress whenever it has really taken hold of the problem for the purpose of finding a comprehensive solution that prior to 1920 no general shipping bill reported ever has become law.

In deciding upon a course of action at this time it is of interest to note what other maritime nations have done to assist the establishment of their merchant fleets; and the memorandum here presented contains only the statements of recognized authorities; the data regarding England's subsidies, particularly the subsidies paid by Queen Elizabeth, which "resulted in large building of ships," and "in every direction English influence penetrated," is furnished by Douglas Owen, lecturer at Royal Naval War College, Portsmouth, England, lecturer at London School of Economics and secretary of British Society of Nautical Research, whose statements no one will challenge.

ENGLAND.

The history of Great Britain's modern merchant marine starts with the reign of Elizabeth. Prior to that time England's influence upon the sea was negligible. Spain far surpassed her in merchant tonnage, and, says Lindsay, the great British historian of shipping:

"While England was fighting for political freedom the Dutch became the real masters of the sea. They (the Dutch) were now at the height of their maritime glory; their merchant ships penetrated to every quarter of the globe, and they were able to grasp and keep to themselves large and valuable portions of the carrying trade (of England), thus laying the foundations for their wealth and greatness."

At that time (Elizabeth's) most English ships of burden were obtained by purchase at the south Baltic ports, and Raleigh immediately called attention to the fact that while Holland, "without a single tree within its own borders," was building ships for them the great oaks of England were rotting to the ground.

"When the English," says the Encyclopedia Britannica, "were at last awakened by the advice of Sir Walter Raleigh and other writers who followed him to a full consciousness of their own strength and of their previous legislative errors, they, with characteristic energy, resolved to adopt the most effective measures then in their power to remedy existing evils.

First came the direct subsidy act of Elizabeth, which provided a bounty of 5s. per ton to encourage the building of merchant ships of 100 tons and upward, and for the development of her fisheries, and the training of seamen the eating of flesh upon Wednesdays and Saturdays was prohibited. The effect of these laws is thus concisely stated by the Britannica:

"In the time of Elizabeth England began to achieve commercial independence. Great building of ships took place, for which bounties were granted by the Queen, and Elizabeth set herself against the Hanseatic League. In every direction English influence penetrated, and Englishmen before 1603 might be found in every quarter of the globe.

No sooner had Charles ascended the throne than there came the law of 1626, which increased the size of merchant ships that should be eligible for the bounty which Elizabeth had authorized, making the minimum 200 tons, and 1646 brought the law that none of the (English) plantations might permit their goods to be exported to foreign places except in English ships.

Then came the great navigation act of 1651. Of this the Britannica says: "Under this far-reaching act the trade between England and her colonies and the British coasting trade was strictly confined to English bottoms, English owned, and manned substantially by English seamen. The act contained further provisions in support of British shipping, the effect of which was greatly to prejudice foreign shipping in its competition for the British carrying trade. From the point of view of the Dutch, indeed, it was a 'vile act and order' to be resisted at all costs."

Says Lindsay: "The unequivocal object of this clause (quoted from the navigation act) was to secure to England, without, however, considering the interests of her colonies, the whole carrying trade of the world, Europe alone excepted. England had now asserted the practical right to carry on her own oversea trade in her own ships and to obtain as much foreign trade as she could by her own industry and energy."

Then, as a special inducement for vessels to strive for the carrying of those cargoes which were coming from foreign countries to England, Parliament enacted the law of 1662, which provided that 10 per cent of the customs duties collected on the vessel's cargo should be paid to English-built ships of two and one-half or three decks carrying 30 guns, armed merchantmen being in those days the only ships that could venture with safety into distant seas.

Says Meeker in his History of Subsidies: "The effect upon the Dutch, who were at that time the carriers of the sea, was immediate and disastrous. There is no means of learning how much it cost Great Britain to take possession of her foreign and colonial trade in this manner. Directly or indirectly the costs were enormous, but the results were tremendous, and no one can maintain that the end did not justify the means."

Says Lindsay: "It is undeniable that from the date of these laws the merchant navy of England steadily increased, and that

soon afterwards the power over the seas previously claimed by the Dutch was permanently transferred to the English."

Says the Britannica: "As a result of the navigation act and its successful maintenance a great increase had taken place in English tonnage, which in 1688 was said to be nearly double that of 1666."

Thus England became the commercial mistress of the seas, a position she has maintained to this day.

GERMANY.

No sooner had the German Empire become firmly established than the need of a German merchant marine became obvious to her statesmen, and Bismarck made these declarations: "The merchant service is the handmaid of all other industries, of agriculture, manufactures, and commerce," and "on the day when the freight trade is given over to foreigners a mortal blow will be struck at all the industries of the country."

Says the Britannica: "Unwilling that the profit of carrying her great and increasing trade should be reached by foreign bottoms, Germany turned herself to shipowning and shipbuilding, and with remarkable success. So great, indeed, was this success that important lines of German steamships rapidly grew up as competitors with British and other lines in foreign trades. Both in bringing home raw materials and in enabling German manufacturers to send their products to foreign consumers at low rates of freight, the German shipping was now greatly increasing the national prosperity. In return the State neglected nothing which would promote the success of its industrial centers in their competition for foreign markets or which would assist the development of the national shipping. Rates of carriage from inland centers to the shipping ports were, in the case of goods intended for shipment by German vessels, considerably reduced by the State railways; and whereas in Great Britain shipping subsidies or subvention are granted essentially if not solely for services to be rendered, in Germany the granting of subsidies has also in view the development of the national shipping. The notable growth in Germany's trade and shipping is, in fact, believed to be in no small degree attributable to a system of subsidies in conjunction with preferential railway rates on German goods dispatched for shipment under 'through' bills of lading under the national flag."

The thoroughness with which every Government regulation was employed to force business into German vessels, even to what was practically the forcing not only of emigrants from the Empire but any emigrants who happened to pass through Germany to travel on German ships, was typical of that people, and an idea of the differing rates of duties and transportation charges favoring those ships may be obtained from the tables appearing in the Further Reports of Her Majesty's Representatives of July, 1898.

The result was that within a generation Germany developed a magnificent steam fleet of more than 5,000,000 gross tons.

JAPAN.

In 1885 the statesmen of Japan began their study of the problem. Japan had labor far cheaper than any other nation attemping maritime activities; and she had a great field open to her operations in the Pacific, because American ships had at that time been largely driven from the sea; yet those Japanese statesmen found, after 11 years of investigation, that in order to establish their shipping they must give a Government subsidy to assist in building the hulls of their ocean-going steamships, another subsidy to help build the engines for those subsidy-aided hulls, and then pay a per mileage bounty on specified lines to help operate those subsidy-assisted ships.

The result is history. In 18 years Japan established herself in the foreign trade and created a fleet of which she is justly proud.

Of course, there is always an opportunity for those who wish to argue to say that Japan could have acquired her shipping in some other way, but the fact remains that she never did acquire it in any other way, and that this way was the one way which her statesmen decided, after 11 years of investigation and tentative legislation, was the only effective one.

How that final act of 1896 came into being and its general nature is thus stated by the Britannica: "Determined that when the crucial moment came she should not be found without ample means for transporting her enemies, the Government, under the leadership of Prince Ito and with the consent of the diet, enacted, in March, 1896, laws liberally encouraging shipbuilding and navigation. Under the navigation law 'any Japanese subject or any commercial company whose partners or shareholders were all Japanese subjects, engaged in carrying passengers and cargo between Japan and foreign countries or between foreign ports in their own vessels, which must be of at least 1,000 tons and registered in the shipping list of the Empire, became entitled to subsidies proportionate to the distance run and the tonnage of the vessels'; and under the shipbuilding law bounties were granted for the construction of iron or steel vessels of not less than 700 tons gross by any Japanese subjects or any commercial company whose partners and shareholders were all Japanese."

FRANCE.

It was in 1881 that French statesmen approached the problem of building up a merchant marine for their country. In some respects their shipping problem was more difficult than that which their chief competitors faced. Says the Britannica: "Being in the main a self-supporting country, France carries on most of her trade within her own borders and ranks below Great Britain, Germany, and the United States in volume of exterior trading. The prosperity of French shipping trade is hampered by the costliness of shipbuilding and by the scarcity of outward-bound cargoes."

Accompanying that statement this authority presents two tables showing the nations from which France at the time referred to (1905) received the bulk of her imports and to which she sent the bulk of her exports, and these tables show that Germany, Belgium, the United Kingdom, and Spain—all practically contiguous countries—furnished more than two-thirds of her imports, and that Germany, Belgium, and England received some three-fourths of her exports. The total of her ocean-borne commerce was but one-third that of the United States.

Yet the table presented in the report of the Commissioner of Navigation for 1920 shows that from 1890—the first year given in this table—up to the outbreak of the World War there was a steady and notably regular increase in the steam tonnage of France—an obviously healthy growth.

From the table appearing in the annual report of the Commissioner of Navigation for 1915 (p. 9), where the ocean-going steamers of from 3,000 to 10,000 tons and over are classified, it appears that up to September, 1914, France had a total of 228 of these great steamers, and the United States, including 90 foreign ships sent under our flag by the World War, had 305. Deducting these 90 foreign steamers, as suggested by the Commissioner of Navigation when presenting this table, we find that the United States is left with but 215 of these steamers to the 228 which France possessed; and of steamers of 10,000 tons or over, France had 16 while the United States had 14, several of which were owned by the International Mercantile Marine. France, therefore, with but a fraction of our ocean commerce, had more great ocean steamers than the United States, until the World War began to send foreign-built ships under our flag.

But the full significance of these facts will not be appreciated without the following analysis: In 1890 the average size of the French ocean-going steamship was 1,711 gross tons (p. 107, Report of the Commissioner of Navigation for 1915), that of American ships registered in the foreign trade but 848 gross tons (p. 186), or less than one-half; in 1900 the French average had risen to 1,945 gross tons per ship, and the United States average 1,009 gross tons; 1910 showed a still further increase in the average size of the French steamers, which reached 2,325 gross tons per ship, while that of the American steamers had reached 1,120 gross tons. In 1913 France, still progressing, showed an average of 2,513 gross tons per steamer, and the United States had dropped to 811 gross tons per ship registered in the foreign trade.

It will be noted that from the time selected by the Commissioner of Navigation in making these comparisons between the steam fleets of the world—namely, 1890 and 1913—that the steam fleet of France shows an unbroken and regular growth. Every year shows an increase in the total of her steam tonnage, as every year shows an increase in the average size of the ships she built.

In 1914 her steam fleet numbered 1,025 with a gross tonnage of 1,922,286 gross tons, as against the 1,103 steamers of Japan with a tonnage of but 1,708,386 gross tons, although the subsidies of Japan applied to foreign-built ships. Yet Japan is an island empire and France—to quote again from the Britannica—is a self-supporting country, carrying on most of her trade within her own borders.

While the Commissioner of Navigation in his report of 1921 shows that in 1916, the last year for which figures are given, the steam tonnage of Japan was 1,847,453 tons to 1,851,120 tons for France, France was still ahead despite the war losses, which are shown in the table. he had gone from 809,598 tons in 1890 to 1,922,286 tons in 1914—an increase of more than 1,000,000 tons.

Even as early as May, 1896, British Consul O'Neil, at Rouen, wrote as follows: "How often has it been said in England that the French shipbuilding interest has gained nothing by the

bounties of construction and navigation? Writing from Rouen I can but doubt the truth of such statements. We have seen here a shipbuilding plant established whose slips are two deep—for no sooner is one vessel launched than another takes its place—and not a rivet would be driven, nor a plank laid, nor a workman employed were it not for the construction and navigation bounties granted by the Government."

Now, the statement that the French subsidies proved a failure is not one of deliberate misrepresentation. Enthusiastic Frenchmen believed and predicted that with these bounties they could acquire a merchant marine comparable to that of England. For the reasons heretofore cited such an ambition could not possibly be realized. One important obstacle is that, so tersely stated by the Britannica, of her lack of outward-bound cargo, and here comes the fact which must be borne in mind by those who are inclined to expect too much from any shipping legislation that the Congress of the United States could enact for the purpose of developing an American merchant marine in the foreign trade.

Next to world-wide possessions which call her ships into every quarter of the globe, and which neither we nor France possess, the tremendous exports of coal from Great Britain have been a controlling factor in building up the freighting fleet of England. Prior to the World War coal constituted, in tons, fully 75 per cent of the cargoes she sent abroad. According to a report made to the Shipping Board under date of September 1, 1919, England's average exports of coal during the three years preceding the World War was 67,000,000 tons, "more than half of which was used for the bunkering of steamships." To continue this quotation: "For many years English coal alone was available for steamship fuel on the principal trade routes. The development of the coal fields of North America, Australasia, India, South Africa, China, and Japan, however, has resulted in the placing of cheaper coal than the English in many trade regions, and has consequently curtailed the market for the latter. Nevertheless, the exports of coal from the United Kingdom have steadily increased except during the period of the European war, and English coals to-day are still by far the best known, the most highly esteemed, and the most widely used steamship fuel in the world. This is due chiefly to the excellent quality of the coal, its careful handling and grading at the mine, and to the enterprise of British dealers in establishing coaling depots in the most important foreign ports."

When it is recalled that England's exports of coal alone as here given exceed the total amount of freight exported from the United States last year by 15,000,000 tons, the importance of this business as a shipbuilder becomes apparent; and especially significant is the fact that, scattered all over the world, are 324 of these English coaling stations, 12 of them in the Caribbean, 9 in Brazil, 3 in Uruguay, 8 in Argentina, and 7 in Chile. The effect is obvious; the English freighter supplying any one of these South American stations has a cargo which takes her down to those ports where American shipping is especially interested in securing business. Arriving loaded at these ports, the English freighter takes on a cargo for the United States, and in the United States loads again for her homeward voyage. She has a paying cargo all the way, her coal exports taking her to the points where return cargoes are to be obtained. This is one of the practical advantages which English shipping hitherto has possessed, and which will be lost only as oil stations supplant those supplying coal or as Americans institute effective competition.

Such facts clarify the statements of Professor Borchard, contained in his study previously presented, that "France's difficulty is primarily economic, having no iron industry, and being industrially less developed than Germany, England, or the United States. Even subsidies, which have been given since 1881, have not cured the economic deficiency." And "in the particular case, such as that of France, for example, other economic conditions entered to interfere with success. Different policies, moreover, are pursued by different countries according to their own needs, so that it is not possible to pass a general opinion on the subsidy policy as a whole, as it might operate under new conditions in a new service."

The question is often and naturally asked why, if some American ships can exist in the foreign trade, all American ships can not exist there. The answer is to be found in the evidence taken by the Merchant Marine Committee of the House of Representatives in 1914, where it appears that whenever a serious competitor entered a field the commercial use of which those European steamship companies, through combinations, had arrogated to themselves, and the rebate systems there in vogue were not sufficient to drive him out of business, the combined foreign lines furnished fighting ships to take the freight and passengers at any price and thus prevented the intruder's securing cargo. The loss thus incurred by the fighting ships was then jointly borne by the combined lines.

Of course, it would not be good business for this foreign combine to cut the general freight rates to such a point that no American ship could live in the trade, since it would be better business for them to lose the carriage of a few cargoes than to reduce the rates on all their millions of tons of freight. For that reason a few shipping firms have been able at times to secure employment in the foreign trade, but only to the extent that the foreign combination permitted.

The above are but modernized forms of the obstacles which were shutting out American shipping from foreign trade at the time when the First Congress, under the fearless leadership of Washington and Jefferson, placed the power of the National Government behind our commercial fleets, and the words of Madison, spoken in Congress in 1796, when, through the Jay treaty, the British were striving to have that national assistance withdrawn—and it later was withdrawn—may be read and pondered to-day. Said Madison: "It is well known that when our Government came into operation, the tonnage of America, employed in the British trade, bore a very inconsiderable proportion to the British tonnage. There being nothing on our side to counteract the influence of capital and other circumstances on the British side, that disproportion was the natural state of things. As some small balance to the British advantages our laws have made several regulations in favor of our shipping, among which is the important encouragement resulting from a difference of 10 per cent in the duties paid by American and foreign vessels. Under this encouragement the American tonnage has increased in a very respectable proportion to the British tonnage, and Great Britain has never deemed it prudent to frustrate or diminish the effect of this by attempting any countervailing measures for her shipping; being aware, no doubt, that we could easily preserve the difference by further measures on our side; but under this treaty she has reserved to herself the right to take such countervailing measures and we have surrendered the right to pursue further defensive action. It is justly to be apprehended, therefore, that under a restoration of things to their former state the American tonnage will relapse into its former disproportion to the British tonnage."

The condition of American shipping at the time Congress enacted the laws thus referred to by Madison is shown by the words of Edmund Randolph in his appeal for this legislation: "Cast your eyes to your seaports. See how commerce languishes. This country, with every advantage that can render commerce profitable, through defective legislation is deprived of all these benefits. As it is the spirit of all commercial nations to engross the carrying trade, this makes it necessary to defend our commerce."

On July 4, 1789, Washington signed the law which allowed a discount of 10 per cent on all tariff duties imposed upon cargoes brought to the United States in American vessels. Sixteen days later came the law assessing a tax of 6 cents per ton upon each American vessel when entering a United States port from a foreign country and 50 cents per ton on each foreign vessel so entered—in effect, a cash bounty of 44 cents per ton.

A year later, August 10, 1790, the 10 per cent discount law was superseded by a law making an additional tariff charge of 10 per cent upon cargoes brought from foreign countries to the United States in foreign vessels—the act commonly referred to as the discriminating duty law.

The effect of these laws, advocated by both Washington and Jefferson, was tremendous. Our exports for 1791 were but $17,571,551; for 1796 they were $67,064,097; for 1801 they were $93,020,513; and for 1806 they were $103,787,000—a gain of 500 per cent in 15 years.

The increase in the amount of our foreign commerce carried in American vessels from the years 1789 to and including 1796, when Madison spoke as above, is very significant. In 1789 we had 123,893 tons of shipping in the foreign trade, and we carried but 17.5 per cent of our imports and 30 per cent of our exports.

One argument upon which a discriminating duty law rests is that as the exports of a country exceed in bulk its imports, that country must adopt laws which will induce incoming cargoes to patronize its vessels and thus tend to equalize the number of cargoes going and coming so that vessels may be earning on each leg of the voyage; and that this theory of the forefathers was correct was at once demonstrated by our shipping records.

In 1790, with 346,254 tons of shipping in the foreign trade, we carried 41 per cent of our imports and 40 per cent of our exports—a very marked change from the record of the preceding year. The year 1791 showed 363,110 tons of United States shipping in the foreign trade, carrying 58 per cent of our imports and 52 per cent of our exports—and this growth continued until

in 1796, the year Madison made his protest, Americans were carrying 94 per cent of their imports and 90 per cent of their exports—the total value of our foreign commerce then being $140,010,789, of which our ships carried, going and coming, 92 per cent.

These early laws developed a great foreign commerce for the United States, and with it came that striking character in the commercial world, the American merchant shipmaster. He was a picked man who received his training in the counting rooms, where he learned business and foreign exchange; how, when, and where to buy and sell; conditions controlling trade in the foreign lands; and he received expert training on the sea; so that when, as captain, he left an American port he carried with him a knowledge which enabled him in foreign lands to act intelligently and on the instant. He was an owner as well as a master, and he took an intense pride in his ship.

The leading shipbuilders of this country were peerless, and their development of the clipper ship and the discriminating duty on tea which existed until the fifties took them into the Orient with the assurance that there would be a cargo to bring home.

The great superiority of American officers over British was so marked as to call for parliamentary action in 1837; the ability of American ships with American masters to make quick passages gave these vessels their choice of cargoes, and Americans built up a great world trade.

But the cable, iron, and the coming of steam changed all this. Ocean sailing became a sort of ferry service. Our Government, failing to appreciate the comprehensive character of its chief competitors' plans, ignored the lessons taught by our experience with the subsidy-aided Cunard and other lines, refused our ships the needed aid, and the prophecy of Madison became a reality.

And be it remembered that while we, in 1828, exposed our ships to world competition, England retained up to 1850 controlling privileges for her vessels (Lindsay, vol. 3, p. 107 et seq., extracted on attached sheet), with the result that she always had more tonnage than we could show, though we counted everything afloat, even including our coastwise craft (Report of Commissioner of Navigation for 1901, p. 471); that she never failed to retain for her ships far more than one-half of her foreign commerce (p. 483); and, even, when in 1855 we were at the pinnacle of our shipping glory, when the finest types of all vessels—both steam and sail—were flying our flag, the most that we and all other nations combined could get away from her was the carriage of 41 per cent of her foreign commerce; and that little island alone then had more than 3,000,000 tons of shipping engaged exclusively in foreign trade to the 2,500,000 tons that we had registered for that service (p. 480).

During the second Cleveland administration an attempt was made to ascertain the condition of seamen aboard American vessels, and the reasons why Americans were leaving the sea. Questionnaires were sent to shipping commissioners at the several ports of the United States, and a summary of the answers received appears in the report of the Commissioner of Navigation for 1894. They all agree that higher wages are paid and better food and better quarters furnished upon American vessels, and that the treatment thereon is better than upon foreign vessels. The answers may be typified in the following from Boston:

"The seamen shipped at this port prefer American vessels; the advantages, they claim, are many. Wages are always somewhat higher, the discipline not quite so severe, and the food on American vessels far superior to that of other nations, and the sailors' quarters, or forecastle, is larger, more comfortable, and more desirable in all its appointments."

This superiority of American ships is incidentally confirmed by the statement of Andrew Furuseth (p. 1985, Hearings, Merchant Marine Act of 1920) that he "came to the United States as a sailor in 1880 and sailed steadily in American ships after that for seven years."

Yet this was when American sailors were most rapidly leaving the sea.

In the same volume appear the tables showing that between 1875 and 1890 the number of American vessels, including both coastwise and foreign going, decreased 10,304 in number, or more than one-third of the total number of vessels that were flying the American flag in 1875. This reduction meant 10,000 less positions for captains, 10,000 less for first mates, 7,500 less for second mates, and 2,500 less for third mates—30,000 less positions for officers and some 75,000 less positions for seamen—all of which reductions took place in 15 years.

"And," says the Commissioner of Navigation, "the discouragement of yearly narrowing chances for employment at sea and the inducements on land * * * have almost extinguished the race of American seamen."

The fate of American firms, which during the past 60 years have tried to engage in the foreign trade of this country, is typified by that of the well-known house of Arthur Sewall & Co., of Bath, Me. This family had been steadily engaged in the business of building and sailing ships for nearly a century. Keeping step with improvements, it had fitted its yard for building steel ships. Having ample capital and its house flag being known in every important port of the world it was in a position to meet any fair competition. Building and repairing its own ships, it secured and maintained its fleet at the lowest possible cost under American conditions.

But the higher cost of operating ships under the American flag was too great to be overcome by this strongly established firm. Its experience was told to the Gallinger commission by Mr. Sewall (p. 103, Hearings of 1905), and the end, unless Government aid should be given, clearly foretold. That aid was not given, and in a few years this firm, like so many others who had attempted to keep the American flag flying in the foreign trade of the United States, was compelled to sacrifice its magnificent ships, give up a business that had been in the family for generations, and allow the junk man to strip that yard of its complete equipment for building steel ships. It still lies idle, abandoned, utilized for no purpose whatever.

Men do not make sacrifices like those needlessly or through obstinacy, despite the silly statements so often made by theorists or those who have no practical knowledge of the problem, that there is no reason why American ships can not engage in the foreign trade.

SPECIAL PRIVILEGES OF BRITISH VESSELS.

Up to 1850 British vessels, under the British navigation acts, enjoyed many exclusive privileges. These are summarized in Lindsay's History of Merchant Shipping (vol. 3, p. 107, et seq.), as follows: * * *

"First. Certain enumerated articles of European produce could only be imported into the United Kingdom for consumption in British ships, or in ships of the country of which the goods were the produce, or in ships of the country from which they were usually imported.

"Second. No produce of Asia, Africa, or America could be imported for consumption into the United Kingdom from Europe in any ships, and such produce could only be imported from any other place in British ships or in ships of the country of which the goods were the produce and from which they were usually imported.

"Third. No goods could be carried coastwise from one part of the United Kingdom to another in any but British ships.

"Fourth. No goods could be exported from the United Kingdom to any of the British possessions in Asia, Africa, or America (with some exceptions with regard to India) in any but British ships.

"Fifth. No goods could be carried from any one British possession in Asia, Africa, or America to another, nor from one part of such possession to another part of the same, in any but British ships.

"Sixth. No goods could be imported into any British possession in Asia, Africa, or America in any but British ships or in ships of the country of which the goods were the produce; provided, also, in such case that such ships brought the goods from that country.

"Seventh. No foreign ships were allowed to trade with any of the British possessions unless they had been specially authorized to do so by order in council; and

"Eighth. Powers were given to the Queen in council which enabled her to impose differential duties on the ships of any foreign country which did the same with reference to British ships; and also to place restrictions on importations from any foreign countries which placed restrictions on British importations into such countries.

"It will be remarked that in the regulations respecting the trade of Europe the restrictions only applied to imports. Exports were not affected. In fact, so far as the navigation act was concerned, foreign ships might export any goods from this country."

These privileges were abolished by the repeal of the navigation acts in 1849, taking effect in 1850. The restrictions on the coasting trade of the United Kingdom were not abolished, however, until 1854. In 1869 restrictions on the coasting trade of the colonies were relaxed to the extent that each colony was left free to deal with that subject as it chose. The Dominion of Canada, for example, now opens its coasting trade to the vessels of any nation which opens its coasting trade to British vessels.

ORDER OF BUSINESS.

Mr. KINCHELOE. Mr. Speaker, I ask unanimous consent to proceed for two minutes for the purpose of asking the gentleman from Wyoming a question.

The SPEAKER. Is there objection to the gentleman from Kentucky speaking for two minutes? [After a pause.] The Chair hears none.

Mr. KINCHELOE. I would like to know of the gentleman from Wyoming under this rule giving the Agricultural Committee right of way for three days—of course we have consumed two—if he can tell us when the Committee on Agriculture will have the other day, and if so, what business will come up? Will this joint resolution be the unfinished business?

Mr. MONDELL. I do not know, Mr. Speaker, just at this time when the Committee on Agriculture will have its next day. I can say to the gentleman I shall talk with the chairman of the committee about it. I have already talked with him and tried to arrange that to suit the convenience of the chairman and members of the committee, but can not say just at this time.

Mr. KINCHELOE. Would these sugar resolutions be the unfinished business at that time?

Mr. MONDELL. That is not for me to decide.

Mr. KINCHELOE. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. KINCHELOE. I would like to ask the Speaker if these sugar resolutions, in view of the situation of this Joint Resolution No. 12 here now, would be the unfinished business?

The SPEAKER. It is not unfinished business but is business which has simply been considered by the committee. The chairman of the committee can bring it up again if he wishes, but it is not unfinished business.

EXTENSION OF REMARKS.

Mr. KINCHELOE. Mr. Speaker, I ask unanimous consent to extend and revise my remarks on the joint resolution under consideration to-day.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 57 minutes p. m.) the House adjourned until to-morrow, Friday, May 26, 1922, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. O'CONNOR: Committee on Naval Affairs. H. R. 9053. A bill to provide for leasing of the floating dry dock at the naval station, New Orleans, La.; without amendment (Rept. No. 1031). Referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 10585) granting a pension to Curtis E. Cook; Committee on Pensions discharged, and referred to the Committee on Interstate and Foreign Commerce.

A bill (H. R. 11751) granting an increase of pension to Margarett Davy; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

The bill (H. R. 11771) granting a pension to Lillian Rowley; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. GOLDSBOROUGH: A bill (H. R. 11788) to stabilize the purchasing power of money; to the Committee on Banking and Currency.

By Mr. RAKER: A bill (H. R. 11789) to provide compensation in lieu of taxes for the several States with respect to certain lands of the United States within the borders of said States, and for other purposes; to the Committee on the Public Lands.

By Mr. ZIHLMAN: A bill (H. R. 11790) changing the name of Hiatt Place, in the city of Washington, D. C., to Fifteenth Street; to the Committee on the District of Columbia.

By Mr. TEMPLE: A bill (H. R. 11791) providing for purchase of site and for erection of a public building at Canonsburg, Pa.; to the Committee on Public Buildings and Grounds.

By Mr. SWING: Joint resolution (H. J. Res. 333) appropriating $200,000 for protecting the lands and property in the Palo Verde Valley and elsewhere along the Colorado River within the limits of the United States; to the Committee on Appropriations.

By Mr. NOLAN: Joint resolution (H. J. Res. 334) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. DALLINGER: Joint resolution (H. J. Res. 335) proposing an amendment to the Constitution of the United States relative to corrupt practices; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FAIRCHILD: A bill (H. R. 11792) for the relief of James J. Meehan; to the Committee on Naval Affairs.

By Mr. LINTHICUM: A bill (H. R. 11793) granting a pension to Jerome P. Murphy; to the Committee on Invalid Pensions.

By Mr. PRINGEY: A bill (H. R. 11794) granting a pension to Frederick J. Dunscombe; to the Committee on Pensions.

By Mr. SMITH of Michigan: A bill (H. R. 11795) granting a pension to Albert Newman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11796) granting a pension to Mary L. Cornell; to the Committee on Invalid Pensions.

By Mr. WINSLOW: A bill (H. R. 11797) for the relief of Michael Coye; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5774. By Mr. BARBOUR: Petition of the Civic Commercial Association of Bakersfield, Calif., in opposition to Senate bill 1150 and House bill 6861, amending the transportation act of 1920; to the Committee on Interstate and Foreign Commerce.

5775. Also, petition of the Exeter (Calif.) Chamber of Commerce, opposing Senate bill 1150 and House bill 6861, amending the transportation act of 1920; to the Committee on Interstate and Foreign Commerce.

5776. By Mr. GRAHAM of Pennsylvania (by request): Petition of Max Myers and 14 other citizens of Philadelphia, opposing the enactment of Sunday rest legislation; to the Committee on the District if Columbia.

5777. By Mr. HICKEY: Petition of H. P. Waldo and sundry citizens of South Bend, Ind., protesting against the passage of House bill 9753, House bill 4388, and Senate bill 1948, and other Sunday legislation; to the Committee on the District of Columbia.

5778. By Mr. KAHN: Resolution passed by the San Francisco Post No. 1, the American Legion, San Francisco, Calif., urging that the United States Government recognize the Government of Mexico; to the Committee on Foreign Affairs.

5779. Also, resolution by the National Society, United States Daughters of 1812, urging that all conditions agreed to by the recent Conference on Limitation of Armament be carried out; to the Committee on Foreign Affairs.

5780. Also, resolution by Corporal Harold W. Roberts Post, No. 466, Veterans of Foreign Wars of the United States, urging that the United States Army be maintained at a proper and adequate strength; to the Committee on Appropriations.

5781. Also, petition of Corporal Harold W. Roberts Post, No. 466, Veterans of Foreign Wars of the United States, protesting against two clauses contained in House bill 10871, affecting commissaries; to the Committee on Appropriations.

5782. Also, resolution by the Federated Council of the Churches of Christ in America, protesting against any drastic cut in the number of chaplains in the United States Army; to the Committee on Appropriations.

5783. Also, resolution by the Women's National Republican Club (Inc.), urging that the United States Army be maintained at a proper and adequate strength; to the Committee on Appropriations.

5784. By Mr. KISSEL: Petition of the president of the Submarine Signal Co., Boston, Mass., relative to German property in this country; to the Committee on Foreign Affairs.

5785. Also, petition of Oliver Bros. (Inc.), New York, N. Y., relative to the prevention of traffic in narcotics; to the Committee on Ways and Means.

5786. By Mr. LEA of California: Petition of 55 citizens of Oakland, Calif., protesting against the enactment of pending Sunday legislation bills; to the Committee on the District of Columbia.

5787. By Mr. SUMMERS of Washington: Petition of numerous citizens of Walla Walla and College Place, Wash., protesting against the passage of H. R. 9753, S. 1948, or H. R. 4388; to the Committee on the District of Columbia.

SENATE.

FRIDAY, *May 26, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hale	McLean	Rawson
Ball	Harris	McNary	Robinson
Borah	Harrison	Moses	Sheppard
Brandegee	Heflin	Myers	Shortridge
Bursum	Hitchcock	Nelson	Simmons
Capper	Johnson	New	Smith
Culberson	Jones, Wash.	Newberry	Smoot
Cummins	Kellogg	Nicholson	Spencer
Curtis	Kendrick	Norbeck	Sterling
Dial	Ladd	Oddie	Sutherland
Dillingham	La Follette	Overman	Townsend
Elkins	Lodge	Page	Underwood
Fletcher	McCormick	Phipps	Walsh, Mass.
France	McCumber	Poindexter	Watson, Ga.
Gooding	McKinley	Ransdell	Williams

Mr. CURTIS. I was requested to announce the absence of the junior Senator from New Hampshire [Mr. KEYES] on account of illness. I ask that this announcement may stand for the day.

The VICE PRESIDENT. Sixty Senators have answered to their names. A quorum is present.

TRADE WITH CHINA.

Mr. CUMMINS. Mr. President, I desire to give notice that to-morrow morning I shall endeavor to secure unanimous consent for the consideration of the conference report upon the disagreeing votes of the two Houses upon the amendments of the Senate to what is known as the China trade act, the bill (H. R. 4810) to authorize the incorporation of companies to promote trade in China. I give the notice so that those who are interested in the measure may be prepared.

Mr. UNDERWOOD. I did not hear the Senator. At what time does he desire to call up the conference report?

Mr. CUMMINS. To-morrow morning. I recognize that I can not bring it up unless I can secure unanimous consent, and I shall ask for it to-morrow morning.

Mr. UNDERWOOD. So far as I know, there is no objection to the Senator calling up the conference report for consideration if he will do it in the morning hour.

Mr. CUMMINS. We have no morning hour now.

Mr. UNDERWOOD. I mean at the time when there ordinarily would be a morning hour.

Mr. CUMMINS. That is my purpose.

Mr. UNDERWOOD. The reason why I say that is because many Senators are away in the afternoon. They may so adjust their engagements and business outside of the Chamber that if a matter of importance is taken up later in the evening Senators who are interested will be away. Under those circumstances I merely ask that if matters come up by unanimous consent they shall be called up in the morning hour so that a quorum call will give an opportunity for those Senators who are interested to be present.

Mr. CUMMINS. That is what I propose to do to-morrow morning.

PETITIONS.

Mr. CAPPER presented a petition of the Thirty-eighth Department Convention of the Woman's Relief Corps, of Parsons, Kans., praying for the enactment of legislation creating a department of education, which was referred to the Committee on Education and Labor.

He also presented resolutions adopted by the Ladies' Aid Society of the Washington Avenue Methodist Episcopal Church; James Ross Chapter, Daughters of the American Revolution; the Parent-Teachers' Association of the Bryant School; and the congregation of the First Congregational Church, all of Kansas City, Kans., favoring the enactment of legislation creating a department of education, which were referred to the Committee on Education and Labor.

He also presented a resolution adopted at the Thirty-eighth Annual Convention, Department of Kansas, Woman's Relief Corps, of Parsons, Kans., favoring the passage of House bill 7213, providing increased pensions for veterans of the Civil War and their widows, which was referred to the Committee on Pensions.

Mr. NEWBERRY presented petitions of sundry citizens of Gaines, Duffield, Swartz Creek, Bannister, Ashley, and Elsie, all in the State of Michigan, praying for the imposition in the pending tariff bill of a duty of $2 per 100 pounds on Cuban sugar, which were referred to the Committee on Finance.

Mr. HARRIS presented a memorial of sundry citizens of Dublin, Ga., remonstrating against the present high price of gasoline, which was referred to the Committee on Manufactures.

He also presented resolutions adopted at a mass meeting of members of the Cane Growers' Cooperative Association of Grady, Thomas, Lowndes, Brooks, and Decatur Counties, in the State of Georgia, favoring extension of the agricultural-credit powers of the War Finance Corporation, passage of the so-called Norbeck-King bill creating the national farmers' finance union for the purpose of financing dependable farm associations, and requesting the aid of the State and Federal departments of agriculture in marketing the products of the cane growers, which were referred to the Committee on Agriculture and Forestry.

ST. LAWRENCE RIVER IMPROVEMENT.

Mr. MOSES, from the Committee on Printing, to which was referred the concurrent resolution (S. Con. Res. 24), reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That there shall be printed 5,000 additional copies of Senate Document No. 179, Sixty-seventh Congress, entitled "Report of the United States and Canadian Government Engineers on the Improvement of the St. Lawrence River from Montreal to Lake Ontario," of which 3,000 copies shall be for the use of the Senate document room and 2,000 copies for the House document room.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. FRANCE:

A bill (S. 3645) granting a pension to Jerome P. Murphy; and

A bill (S. 3646) granting a pension to Joshua M. Ash; to the Committee on Pensions.

By Mr. McNARY:

A bill (S. 3647) for the reimbursement of Virgil L. Parker for the loss of property; to the Committee on Claims.

By Mr. ELKINS:

A bill (S. 3648) granting a pension to William Lowery; to the Committee on Pensions.

By Mr. DILLINGHAM:

A bill (S. 3649) granting a pension to Sabra Cross (with accompanying papers); to the Committee on Pensions.

By Mr. MOSES:

A bill (S. 3650) granting a pension to Mary Cannon (with accompanying papers); to the Committee on Pensions.

By Mr. McNARY:

A joint resolution (S. J. Res. 201) requesting the President of the United States to propose an international conference for the suppression of the use of certain narcotic drugs; to the Committee on Foreign Relations.

AMENDMENTS TO HOUSE RIVER AND HARBOR BILL.

Mr. TOWNSEND submitted an amendment providing for the improvement of Petoskey Harbor, Mich., intended to be proposed by him to the bill (H. R. 10766) authorizing appropriations for the prosecution and maintenance of public works on canals, rivers, and harbors, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

Mr. LODGE submitted an amendment ratifying a contract dated July 29, 1921, executed by the Boston, Cape Cod & New York Canal Co., on condition that said company consent to a certain amendment thereof, intended to be proposed by him to the bill (H. R. 10766) authorizing appropriations for the prosecution and maintenance of public works on canals, rivers, and harbors, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

EFFICIENCY RATINGS.

Mr. STERLING. Mr. President, there has recently come to my notice general circular No. 4 of the United States Bureau of Efficiency relating to efficiency ratings. I ask that it may be referred to the Committee on Civil Service for consideration in connection with the statute relating to the Bureau of Efficiency and executive orders, and in connection, too, with reclassification.

The VICE PRESIDENT. Without objection, it is so ordered.

DAYLIGHT SAVING.

Mr. DIAL. Mr. President, the other day I had something to say upon the proposed daylight saving plan. I feel that the President was imposed upon when he signed the order putting it into effect in the Government departments in this District. It has proved, I think, distinctly unsatisfactory, and I hope that the order putting it in operation will be rescinded quickly. I notice there has been some attempt in the House of Representatives to pass a bill on the subject, but that the effort dismally failed. I do not think there is much support of the proposition in the Senate. On yesterday in the Washington Star a straw vote on the question shows very conclusively that the people in the District of Columbia do not favor the plan now in vogue. I ask that the figures on this subject as published in the Star be inserted as a part of my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The figures referred to are as follows:

The vote on daylight saving.

TO-DAY'S VOTE.

	Present system.		Moving clocks ahead.	
	For.	Against.	For.	Against.
Government employees	84	958	92	645
Others	54	881	240	707
To-day's totals	138	1,839	332	1,352
PREVIOUSLY RECORDED.				
Government employees	24	618	184	444
Others	133	900	367	578
Grand totals	295	3,357	1,083	2,374

Mr. DIAL. Mr. President, whenever man undertakes to interfere with the laws of nature he always fails; and it does seem to me that it is time for us to go back to normal conditions and to exercise good common sense in the everyday affairs of life.

I took this question up with the superintendent of schools. Perhaps it would not be well to repeat what the school management had to say about the matter, but I do not find that the so-called daylight-saving system is supported by individuals or by any body of people to any great extent. My information is that the man who presented the request for the order to the President has already put his own business back on the old time; and I seriously hope that the Committee on the District of Columbia of the Senate will intercede in the matter to the end that we may revert to our long-established system of measuring time.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, I would like to state to Senators that, beginning with next Monday, I am going to ask them to be here so that we shall not have to pass over item after item on account of the absence of Senators. I have tried to be just as accommodating as possible, but Senators recognize that passing over one single item, like magnesite, for instance, will necessitate passing over a number of other items, like fire brick, for instance, in which we use that article. We can not pass on the latter item until we have passed upon the former. It makes it very difficult to carry on in any logical order the consideration of the schedules if we are continually passing one over and then another on account of the absence of Senators. I hope that there will be no further request after the beginning of next week to pass items over.

Now, Mr. President, I ask that we may go back to one item in the glass schedule, page 45, paragraph 226. I shall ask the Senate to disagree to the three committee amendments in that paragraph.

The VICE PRESIDENT. The first amendment of the committee in that paragraph will be stated.

The READING CLERK. In paragraph 226, "Lenses of glass or pebble," page 45, line 12, the committee proposes to strike out "40" and insert "60" before the words "per cent ad valorem."

Mr. McCUMBER. I ask that the committee amendment be disagreed to.

Mr. SIMMONS. Mr. President——

Mr. McCUMBER. I am going to ask that in each of these instances the rate as fixed by the House, of course not on the American valuation, but upon the foreign valuation, be the rate adopted.

Mr. SIMMONS. I understand. I desire merely to express my gratification that the committee has decided to disagree to its amendments to this paragraph. We discussed the matter here last night and I think we clearly developed that neither the 40 per cent rate of the House nor the 60 per cent rate of the Senate committee is warranted, but I shall not make any objection, of course, to disagreeing to the amendment of the committee.

The amendment was rejected.

The next amendment of the Committee on Finance was, on page 45, line 12, before the words "per cent," to strike out the numerals "35" and to insert the numerals "55."

The amendment was rejected.

The next amendment was, on page 45, line 17, before the words "per cent," to strike out "35" and to insert "55."

The amendment was rejected.

Mr. McCUMBER. Mr. President, I should like to return to paragraph 307, which, I think, is the paragraph we had under consideration when the Senate took a recess last evening. That is the paragraph relative to "boiler or other plate iron or steel," and so forth.

The VICE PRESIDENT. The Secretary will state the committee amendment in that paragraph.

The next amendment of the Committee on Finance was, on page 54, line 13, after the word "and," to strike out "forty" and to insert "nine," so as to read:

PAR. 307. Boiler or other plate iron or steel, except crucible plate steel and saw plate steel, not thinner than one hundred and nine one-thousandths of 1 inch, cut or sheared to shape or otherwise, or unsheared, and skelp iron or steel sheared or rolled in grooves, valued at 1 cent per pound or less, seven-twentieths of 1 cent per pound; valued 1 cent per pound; valued at over 3 cents per pound, 20 per cent ad valorem.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

Mr. SIMMONS. Mr. President, I understand that amendment in effect is merely to strike out the words "forty-one thousandths of an inch" and to insert "nine one-thousandths of an inch," so as to read "one hundred and nine one-thousandths of an inch."

Mr. SMOOT. Yes; that is the form in which it is known to the trade.

Mr. SIMMONS. I have no objection to that amendment.

The amendment was agreed to.

The next amendment was, on page 54, at the beginning of line 21, to strike out the word "forty" and insert "nine," so as to make the proviso read:

Provided, That all sheets or plates of iron or steel thinner than one hundred and nine one-thousandths of 1 inch shall pay duty as iron or steel sheets.

The amendment was agreed to.

The next amendment was, on page 54, line 25, after the word "and," to strike out "forty" and to insert "nine," so as to read:

PAR. 308. Sheets of iron or steel, common or black, of whatever dimensions, and skelp iron or steel, valued at 3 cents per pound or less, thinner than one hundred and nine one-thousandths and not thinner than thirty-eight one-thousandths of a inch, forty-five one-hundredths of 1 cent per pound; thinner than thirty-eight one-thousandths and not thinner than twenty-two one-thousandths of an inch, fifty-five one-hundredths of 1 cent per pound; thinner than twenty-two one-thousandths and not thinner than ten one-thousandths of an inch, seventy-five one-hundredths of 1 cent per pound; thinner than ten one-thousandths of an inch, eighty-five one-hundredths of a cent per pound; corrugated or crimped, seventy-five one-hundredths of 1 cent per pound; all the foregoing when valued at more than 3 cents per pound, 20 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 55, line 14, after the word "and," to strike out "forty" and to insert "nine," so as to make the proviso read:

Provided, That all sheets or plates of common or black iron or steel not thinner than one hundred and nine one-thousandths of an inch shall pay duty as plate iron or plate steel.

The amendment was agreed to.

The next amendment was, on page 55, line 25, before the words "per cent," to strike out the figures "28" and to insert "30," so as to read:

PAR. 309. All iron or steel sheets, plates, bars, and rods, and all hoop, band, or scroll iron or steel, excepting what are known commercially as tin plates, terneplates, and taggers tin, when galvanized or coated with zinc, spelter, or other metals, or any alloy of those metals, shall pay two-tenths of 1 cent per pound more duty than if the same was not so galvanized or coated; sheets or plates composed of iron, steel, copper, nickel, or other metal with layers of other metal or metals imposed thereon by forging, hammering, rolling, or welding, 30 per cent ad valorem.

Mr. SIMMONS. Mr. President, with reference to that amendment, I wish to inquire of the Senator in charge of the schedule whether he has any information touching the necessity for an increase in this rate? I find very meager, in fact, practically no information in the report of the Tariff Commission, and the experts who have been looking up this matter for me say they are not able to obtain any information of importance with reference to it. All the information I now have is that the imports of this commodity for 1920 were 650 pounds, and that in 1921 they were 6,796 pounds. Can the Senator from Utah, if he is in charge of this schedule, give us any information as to the production and the consumption in this country?

Mr. SMOOT. The Senator will find that in the Summary of Tariff Information.

Mr. SIMMONS. I think not. There is some general information, but nothing that applies specifically to this item. This ought really to have been a separate paragraph; it deals with an entirely different subject; but it is separated from the remainder of the paragraph only by a semicolon.

Mr. SMOOT. Does the Senator have reference to the amendment inserting the words "thermostatic metal in sheets, plates, or other forms, 50 per cent ad valorem"?

Mr. SIMMONS. Exactly.

Mr. McCUMBER. If I may have the attention of the Senator, there is an amendment just before that. I was going to ask that the second amendment go over because the Senator from New Jersey desires to be heard on it.

Mr. SIMMONS. Does the Senator mean in paragraph 309?

Mr. McCUMBER. Yes; the amendment in regard to thermostatic metals; but the amendment in line 25, striking out "28" and inserting "30," I should like to have acted upon.

Mr. SIMMONS. That only seems to apply to "sheets or plates, composed of iron, steel," and so forth.

Mr. McCUMBER. That is all.

Mr. SIMMONS. I am saying that I can get no information as to the production or consumption in this country. The only information furnished in the Tariff Commission report is as to the imports, and the imports are negligible.

Mr. SMOOT. It is stated in the Summary of Tariff Information that the country's output of iron and steel, galvanized sheets, in 1920 amounted to 889,668 long tons.

Mr. SIMMONS. I see that we imported in 1920 only 650 pounds.

Mr. SMOOT. In nine months of 1921 there were 3,649,125 pounds imported.

Mr. SIMMONS. No; that is not the item to which I have reference.

Mr. SMOOT. The figures I have read cover "galvanized sheets, plates, hoops," and so forth.

Mr. SIMMONS. I call the attention of the Senator to page 394 of the summary and to the table headed:

Sheets or plates composed of iron, steel, copper, nickel, with layers of other metal or metals imposed thereon by forging, hammering, or welding.

The imports under that heading for nine months of 1921 are given at 6,796 pounds.

Mr. McCUMBER. The clause covering that class of material I desire to go over. The amendment just preceding strikes out "28 per cent ad valorem" and inserts "30 per cent ad valorem."

Mr. SMOOT. In other words, the House gave a 28 per cent ad valorem rate on the American valuation as compared to the 40 per cent ad valorem duty provided under the Payne-Aldrich bill. Under the plan adopted by the committee of basing the rates on the foreign valuation, the committee has recommended 30 per cent ad valorem.

Mr. SIMMONS. The Senator desires that amendment to go over.

Mr. SMOOT. We want that amendment to be agreed to, but the next amendment in regard to thermostatic metals to be passed over.

Mr. SIMMONS. I was not talking about the amendment concerning thermostatic metals. We have not reached that as yet. I was talking about the amendment striking out "28" and inserting "30." It appears from the manner in which the paragraph is written that that rate only applies to sheet or plates, and so forth, as described in the clause.

Mr. SMOOT. Certainly; "sheets, plates, bars, and rods, and all hoop, band, or scroll iron or steel, excepting what are known commercially as tin plates, terneplates, and taggers tin, when galvanized or coated with zinc, spelter, or other metals," bear a higher rate of duty than when not so coated; but the Senator asked me what the importations were under the particular item referred to by him, and I said that the importations of that commodity for nine months of 1921 was 3,649,125 pounds.

Mr. SIMMONS. Where does the Senator find that?

Mr. SMOOT. At the bottom of page 393 of the Tariff Information Summary, under the heading "Galvanized sheets, plates, hoops, and so forth."

Mr. LA FOLLETTE. That includes all the sheets covered by the entire paragraph.

Mr. SIMMONS. The Senator will notice that after the words "not galvanized or coated," there is a semicolon, and then the following words:

sheets or plates composed of iron, steel, copper, nickel, or other metal with layers of other metal or metals imposed thereon by forging, hammering, rolling, or welding.

The House provided a duty on those products of 28 per cent ad valorem, and the Finance Committee report a duty of 30 per cent.

I am calling attention to the fact that as the paragraph has been written the 30 per cent rate applies only to sheets and plates.

Mr. SMOOT. Oh, yes; we did not want it to apply to the ungalvanized products.

Mr. SIMMONS. Very well. The statistics which the Senator gave a little while ago relate to galvanized sheets, plates, and hoops, and the importations of that kind of material was 3,600,000 pounds; but if the Senator will turn over to page 394 he will see the table given with reference to "sheets or plates composed of iron, steel, copper, nickel, with layers of other metal or metals imposed thereon by forging, hammering, or welding," and the imports in 1920 are given as 650 pounds, and for nine months of 1921, 6,796 pounds.

Mr. SMOOT. Mr. President, of course, that is only one of them, because plates and sheets, cold rolled and smooth only, fall under that, and then there are plates of iron or steel pickled or cleaned by acid or by any other process.

Mr. SIMMONS. But the Senator will see that those other tables refer to metals treated differently.

Mr. SMOOT. The first one treats of galvanized sheets.

Mr. SIMMONS. And this rate does not apply to that. That is provided for in the preceding paragraph.

Mr. SMOOT. No; the first rate of two-tenths of a cent a pound——

Mr. SIMMONS. All I wish to say is this: I ask the Senator if he will read this carefully and see whether this rate as he has the provision punctuated does not apply solely to sheets or plates not galvanized.

Mr. SMOOT. No, Mr. President; that semicolon means that the "two-tenths of 1 cent per pound more duty than if the same was not so galvanized or coated" applies to all of the items above. Then, when the semicolon occurs, that is another paragraph, and it means that sheets or plates composed of iron, steel, copper, nickel, or other metal with layers of other metal or metals imposed thereon by forging, hammering, rolling, or welding shall pay a duty of 30 per cent ad valorem.

Mr. SIMMONS. In addition to the other?

Mr. SMOOT. No, Mr. President; it does not say in addition to it. That is a separate and distinct paragraph, carrying its own duty.

Mr. SIMMONS. Very well. If the Senator is satisfied with that construction after he has examined it more carefully, I shall make no further contention about it. I say, however, that according to my construction the rate is entirely too high. According to my construction of that, you have imposed a 30 per cent rate upon a product of which the imports into this country are absolutely negligible, only a few pounds—a third of a ton—and the Senator has told us what the production was. How many thousand tons did the Senator say were produced?

Mr. SMOOT. The whole production of iron and steel galvanized sheets in 1920 amounted to 889,668 long tons.

Mr. SIMMONS. Whatever the production is, Mr. President; I do not know. I am leaving that to the Senator. He has told us that it was very considerable, running up into thousands of tons, while there was imported of that article in 1920 650 pounds and in nine months of 1921 only 6,700 pounds, or a little over 3 tons. I can not see any reason why we should be imposing a 30 per cent duty to protect a domestic production of thousands of tons because of the importation into this country of 3½ tons. I should be glad if the Senator can furnish more satisfactory information about it. I confess that I have none, except what has been stated.

Mr. SMOOT. The statement I made was that the production of all iron and steel galvanized sheets in 1920 was 889,668 long tons. What the Senator is talking about now is the sheets or plates composed of iron, steel, copper, or nickel with layers of other metal or metals imposed thereon by forging, hammering, or welding. It is true that there was only 6,796 pounds imported in the nine months of 1921, but they are all luxuries. There is nothing there that goes into the ordinary commerce of this country or any other country. If we had a detailed statement of these things we would find that not one of the importations goes into anything outside of luxuries. To-day thermostatic metal in sheets or plates forms a part of this. Thermostatic metal is two metals welded together.

Mr. HITCHCOCK. That is another provision. Can not the Senator give us the figures?

Mr. SMOOT. That is what the Senator was talking about, and that is what this rate applies to.

Mr. HITCHCOCK. That is not thermostatic metal. That comes next.

Mr. SMOOT. That is going to be disagreed to by the committee, and then it will fall under that paragraph.

Mr. HITCHCOCK. Can we not find out exactly what are the imports and the production of this?

Mr. SMOOT. I want to say to the Senator that in the case of these particular items, outside of the thermostatic metal, there is no production in the United States. We have not any of these metals here that are hammered and rolled with layers of other metal, as provided for here. The consumption in the United States is so small that there has been no industry in it, outside of the starting up of a thermostatic-metal industry here during the war. The reason why the committee took that out and put it by itself was because of the fact that during the war this industry was established in this country, and I suppose the Senator knows what it is. Two metals are welded together, and the heat has an effect upon one quite different from the effect upon the other metal. It is used in regulators, such as I suppose the Senator has in his heater at home, where he sets it to 70 if he wants the heat of his house at 70° continuously. If the fire gets too hot and makes it rise above 70, it bends the metal and closes the draft; if it gets below 70, it bends the other way and opens the draft; and with this metal you can keep the heat of your house just whatever you desire during the day or during the night. The production of it in the United States is very small as to quantity. It is growing in the United States, and that is a great part of the production covered by this paragraph to which the Senator has reference.

Mr. HITCHCOCK. That does not satisfy me at all. Perhaps the Senator from North Carolina can understand it; but let me call to the Senator's attention exactly what he has done. We have not gotten to thermostatic metal yet.

Mr. SMOOT. I have told the Senator that we are going to disagree to that amendment.

Mr. HITCHCOCK. I know; but the Senator insists on talking about something else. I ask him to pay attention to these lines:

> On sheets or plates composed of iron, steel, copper, nickel, or other metal with layers of other metal or metals imposed thereon by forging, hammering, rolling, or welding, the tariff under the present law is 15 per cent.

Mr. SMOOT. Yes.

Mr. HITCHCOCK. The House raised it to 28 per cent. I suppose it had a reason for raising it.

Mr. SMOOT. Yes.

Mr. HITCHCOCK. The Senate committee raised it to 30 per cent. We are unable to find what the reason was. What is the production in the United States? What are the imports? We can not get figures on either one.

Mr. SMOOT. There are no figures here as to the production, because there has been no production, outside of that of the thermostatic metal, in the United States.

Mr. HITCHCOCK. Let us leave out the thermostatic metal. What are the imports, then?

Mr. SMOOT. Very small, indeed, because they are all luxuries.

Mr. HITCHCOCK. Then what was the evidence upon which the tariff was doubled?

Mr. SMOOT. Does the Senator mean from the present law?

Mr. HITCHCOCK. Yes. It is not because there is any great import that is ruining a local industry.

Mr. SMOOT. Absolutely; but we will get that much more money out of it for the Treasury of the United States.

Mr. HITCHCOCK. But the Senator says there are no imports.

Mr. SMOOT. I did not say there were no imports.

Mr. HITCHCOCK. Can the Senator tell what the imports are?

Mr. SMOOT. Yes. For 1920 there were 650 pounds imported, valued at $10 a pound, and in 1921 in 9 months there were 6,796 pounds imported, valued at $816. That is all there is to it; and they are all luxuries. There are not enough of them used in the United States to establish a business, outside of the thermostatic metal, and only one little concern up in New Jersey is making that.

Mr. HITCHCOCK. Mr. President, I realize that we are laying tariffs here for the benefit of one little concern here and another little concern there; but in the aggregate the result of these thousands of increases that are made is going to be that the American people will have to pay the piper.

Mr. SMOOT. The result of the establishment during the war of the thermostatic metal manufacturing industry in the United States has been that the German manufacturer has not had it his own way and charged whatever price he wished.

Mr. HITCHCOCK. Mr. President, if the Senator from North Carolina will permit me in his time, I should like to add to the collection of editorial comments from Republican newspapers which he has heretofore had put into the RECORD for the edification of the public and Senators; and I will read now, not from one of the metropolitan papers which the Senator from North Dakota says are seduced or bribed into antagonism of this bill by reason of any patronage; I will read from the leading Republican paper of Nebraska—the Lincoln State Journal. Its editorial comment on the speech made by the Senator from North Dakota [Mr. MCCUMBER] was as follows:

> Senator MCCUMBER'S preface to the tariff bill, as he introduces it in the Senate, is a remarkable affair. It will open the way to prosperity, he tells the country, but only in case certain other things are done. Among these other things are reductions of prices to consumers whose incomes are not now enough to furnish them the goods they need. Manufacturers must reduce their prices, says Senator MCCUMBER, and confine themselves to meager profits until the consumer gets on his feet again. The people, on the other hand, must work harder and produce more. This done, the new tariff will be a success, and we shall fly with the geese.
>
> This is as if the doctor told us to dig hard in our garden, eat only wholesome food, drink plenty of water, and keep our mind calm, and he would guarantee his pills to cure our alimentary disorders. Which, then, is the cure? If we should all go to producing at our level best, and all profiteering were stopped, would not the country hum with prosperity though the tariff remain as it is or even lower?
>
> There is even a touch of the pathetic in the Senator's plea. He is introducing a measure which, if it performs according to its professed purpose, will enable the manufacturers to increase their prices. There its supposed benefits lie. And the introducer tells the manufacturers, whom he is empowering to raise their prices, that prosperity depends upon their not raising prices.
>
> His bill is intended to increase the cost of living. It fails of its purpose if it doesn't do that. And its introducer announces, as he introduces it, that the cost of living is already too high to permit the farmers and the laboring classes to be the adequate consumers upon whom prosperity ultimately depends. The manufacturers are to hang their clothes on a hickory limb and not go near the water.

Mr. President, I desired to have this editorial incorporated in the RECORD not only because it is from a Republican newspaper but it is a Republican newspaper in an agricultural State and the leading Republican newspaper, and it deprives the Senator from North Dakota, who also comes from an agricultural State in the West, of the contention that only certain Republican newspapers in the East are condemning his bill.

Mr. SIMMONS. Mr. President, I shall have to discuss and will discuss this from the standpoint of the statements of facts made by the Senator from Utah. I want this item understood. Paragraph 309 reads:

> All iron or steel sheets, plates, bars, and rods, and all hoop, band, or scroll iron or steel, excepting what are known commercially as tin plates, terneplates, and taggers tin, when galvanized or coated with zinc, spelter, or other metals, or any alloy of those metals, shall pay two-tenths of 1 cent per pound more duty than if the same was not so galvanized or coated.

There we start on a new subject.

Mr. SMOOT. Does the Senator really want to know what that means?

Mr. SIMMONS. I am not discussing that now.

Mr. SMOOT. The Senator asked whether it had any reference to sheets or plate composed of iron, steel, and so forth, and whether it bore an additional duty. Paragraph 308 covers "Sheets of iron or steel, common or black, of whatever dimensions, and skelp iron or steel, valued at 3 cents per pound or less, thinner than one hundred and nine one-thousandths and not thinner than thirty-eight one-thousandths of an inch, forty-five one-hundredths of 1 cent per pound." That refers to the sheet made of steel.

When you take a sheet and galvanize it, there is an additional duty of two-tenths of a cent a pound over and above the duty imposed on the plain steel, iron, or steel sheet, but it has

nothing whatever to do with the items following the semicolon in this paragraph.

Mr. SIMMONS. Exactly; and the committee amendment raising the rate from 28 to 30 per cent applies to that part of the paragraph beginning on line 22?

Mr. SMOOT. That is true, after the semicolon.

Mr. SIMMONS. That is what I said a little while ago. Now, I want to read the language beginning in line 22:

Sheets or plates composed of iron, steel, copper, nickel, or other metal with layers of other metal or metals imposed thereon by forging, hammering, rolling, or welding.

Now, I want to read from the Tariff Commission's report under this head:

Sheets or plates composed of iron, steel, copper, nickel, or other metal with layers of other metal or metals imposed thereon by forging, hammering, rolling, or welding.

That is the identical language, word for word. Having given the subject matter of the statistics, the summary proceeds to give the imports:

For 1920 the imports were 650 pounds; for 1921, nine months, they were 6,796 pounds.

Mr. McCUMBER. This is an article not produced in the United States at all.

Mr. SIMMONS. That is what I wanted to get at a little while ago. I asked the sponsors of the bill to give me some data.

Mr. McCUMBER. Therefore, this particular matter covered by the 28 per cent or the 30 per cent ad valorem does not come in competition. They are little molds for making chocolates, for instance, which we purchase, and the use is exceedingly limited. Therefore the importations are exceedingly light. They are used only for little special purposes, such as making the molds into which you run chocolate to make the chocolate cakes which are sold, and for some few other light purposes. It is a revenue duty upon those particular articles.

Mr. SIMMONS. The question I asked the Senator from Utah, after I read that, at the beginning of my remarks, was, What is the extent of the production or consumption in this country? The Senator gave me some figures which were very large, and my argument has been that if there was any such production as that, there could be no justification for this duty.

Mr. SMOOT. The Senator ought to be fair. He asked me the production, and I gave the production in the United States of all the articles in that paragraph.

Mr. SIMMONS. The Senator doubtless misunderstood me.

Mr. SMOOT. I have already told the Senator they were luxuries, pure and simple, and the only metal we are making to-day falling under that paragraph is, as I said, thermostatic metal, and that is made by one concern in New Jersey.

Mr. SIMMONS. Then I understand this duty is imposed as a revenue duty?

Mr. McCUMBER. Pure and simple.

Mr. SIMMONS. Am I right about that?

Mr. McCUMBER. If we do not produce it in the United States, of course, it must be for revenue and for revenue only.

Mr. SIMMONS. That is what I assumed. Now, the balance of that paragraph, which imposes an additional duty of two-tenths of 1 cent per pound, is the subject I wish to discuss for a few moments, and I shall give the Senator some information upon that.

We have some data about it. I read now from the summary as to paragraph 309. It gives the production of the articles covered in the whole paragraph, and, of course, includes the little item we have just discussed, of which it now appears the production and importations are small. In reading I shall give only the round numbers. The summary states:

The country's output of iron and steel galvanized sheets in 1920 amounted to 889,668 long tons, or 2,000,000,000 pounds.

Again it says:

The production of galvanized sheets in 1914 amounted to 1,939,000,000 pounds, of which 130,000,000 pounds consisted of galvanized formed products.

So we have a production in this country, of these two items, of practically 4,000,000,000 pounds.

The figures of imports follow immediately after that. In 1913 the importation of plates, sheets, and so forth, covered by this paragraph, amounted to 28,000,000 pounds, valued at $973,000, and in 1914 to 49,000,000 pounds, valued at $1,000,000, in round numbers. It will be observed that in 1913 and 1914, respectively, we had imports of 28,000,000 pounds, and of 49,000,000 pounds, as against a 4,000,000,000-pound production. Let us go a little further.

In 1918 the imports fell off very materially, and they were, as given by the Senator, 649,000 pounds, valued at $206,000, a tremendous falling off since 1914. That falling off continued through the war.

What about the exports? Let me again say that for the nine months of 1921, as against a 4,000,000,000-pound production, we had an importation of only 3,640,000 pounds. Nobody could say for a minute that that quantity of importations, insignificant when compared with our domestic production, could possibly affect the price of the American product.

If that were all, it would not be quite so bad. Let us see about the exports of that product. The Tariff Commission summary states:

Exports greatly exceed imports. During the calendar years 1918–1921 the exports of galvanized iron and steel sheets and plates have been as follows:

	1918	1919	1920	1921 (9 months).
Quantity.....pounds..	153,982,456	227,669,237	242,745,308	102,074,891
Value.....	$12,609,628	$15,223,289	$16,727,590	$6,709,611

Which is many times the imports. There is your problem, 4,000,000,000 pounds production, imports of about 4,000,000 pounds during nine months of 1921, probably amounting to 5,500,000 for the year, though I have not calculated it closely, with exportations many times the quantity of importations.

If Senators think that those facts justify increasing the rate of the present law, or if they think they justify increasing the rate adopted by the House, I can not understand the theory upon which they are proceeding, and I quit the subject so that the Senator from Utah may have an opportunity, if he wants it, to tell the Senate and tell the country upon what rule or reason, with this state of facts, they impose this rate. The facts I have stated come from the record; they are the result of the investigations and findings of the Tariff Commission, not the statements of persons who are opposed or persons who are in favor of the bill, but supposed to be the statements of a non-partisan and impartial board. If he can explain to the country the reason for the rate, upon that basis of facts, I should be delighted to have him do it. If he can show that the Tariff Commission have misrepresented the facts, and that these are not the facts, but that there are other facts which would justify this rate, I would be happy to have him give those facts.

Mr. SMOOT. Mr. President, I do not know that I have anything more to say than I have already said, except that I want to refer now to the exportations for the years to which the Senator referred. The Senator referred to the pre-war exportations as being very small. When the war began, or beginning with the year 1914, our exports, of course, greatly exceeded the exports before that time. England could not ship any of this to Cuba and to Canada and to Argentina and to Mexico. The whole thing was thrown on the United States and they had to furnish it.

Mr. SIMMONS. If the Senator will pardon me, he must have misunderstood me. The exports I read were for the years 1918 to 1920, inclusive. There was nothing then in the way of England exporting to Canada.

Mr. SMOOT. I am not talking about that. Everybody knows they could not do that. I will say to the Senator that he did not call attention to 1921. The exports in 1921 were not half what they were in 1920.

Mr. SIMMONS. If I did not call attention to 1921, it was a mere inadvertence.

Mr. SMOOT. Those exports went to Canada, Cuba, Argentina, and Mexico.

Mr. SIMMONS. But the Senator called my attention to the first nine months of 1921.

Mr. SMOOT. It was only 102,000.

Mr. SIMMONS. For nine months, and for the year it would be a little more than that. But I called the attention of the Senator that that is many times the imports.

Mr. SMOOT. Yes; it is greater than the imports.

Mr. SIMMONS. It is probably twenty-five or thirty times greater.

Mr. SMOOT. But Canada is right at our door, Mexico is right at our door, South America is close to us, and we always export to those countries. We always will, I think. I do not think there is any question about it at all. The whole paragraph is built on paragraph 308, that we have just passed, giving two-tenths of 1 cent. The 30 per cent that the Senator speaks of has nothing whatever to do with the exports. The 30 per cent referred to by the Senator is for items that we do not make in this country. They are luxuries of the highest type, as I have already said.

Mr. SIMMONS. The Senator probably is correct about that, and probably I was incorrect when I referred to the 20 and 30 per cent, but the same thing applies to the other rate, and that is the additional rate of two-tenths of 1 cent a pound.

Mr. SMOOT. Certainly, as between 15 per cent and the two-tenths of 1 cent per pound. I am aware of that. I simply wanted to make the correction as to the 15 and 30 per cent on the items to which the Senator referred. That only refers to importations here of about 6,000 pounds of luxuries which we do not make in this country, with one possible exception that is made by one concern located in New Jersey.

Mr. SIMMONS. The Senator did not understand me as intending to discuss it. I was not discussing it. I was discussing the other part of it. I stated that the production of that article was very small and the imports negligible and that it was now claimed the duty was imposed as a revenue duty. I was discussing the additional duty of two-tenths of 1 cent, and I stated that the production of articles subject to that duty in this paragraph amounted to $4,000,000,000, while the imports are negligible and many times less than the exports.

Mr. CUMMINS. Mr. President, I wish to ask the Senator from Utah a question purely for information. I do not care anything about the duty upon the superimposed metals, but I am speaking of paragraphs 308 and 309, down to line 22. The duty imposed upon ordinary steel sheets is about $10 a ton or a little bit less than $10 a ton. That is a great article of commerce. Does the Senator from Utah believe that it costs in the United States $10 a ton more to produce an ordinary steel sheet than it costs in England?

Mr. SMOOT. I can not say whether it would or would not. That is the reason why I did not want to discuss the question involved in paragraph 309. As I said, the basis of this rate, outside of the luxuries, is found in paragraph 308. When the committee amendments are agreed to then I have not any doubt these matters will be discussed, and if they are changed of course we shall have to change paragraph 309 accordingly.

Mr. CUMMINS. We know that it costs in England, generally speaking, more for the raw material out of which the steel plate is made than it costs in the United States. It costs England a great deal more for coal and, therefore, for coke. I do not know of a single material that enters into the composition of a steel sheet, save labor—if you may call that an element—that costs in the United States more than it costs in England. I do not know anything about Germany. That is my difficulty in coming to any conclusion whatever about these duties.

I would like to vote for protection and I intend to vote for protection, but my judgment is—without specific information, and it seems to be inaccessible—that the United States can make steel sheets cheaper than they can make the same article in any other country in the world, unless it is in Germany under present conditions. I do not know what may be the labor costs in Germany and the coal costs in Germany and the cost of other materials that are necessary in the production of this article. I am under very great difficulty with respect to voting upon these duties. The highly fabricated articles, such as we find in many parts of the bill, I care little about, but the real volume of the production of steel in the United States, the steel sheets, the girders, and joists, all the building steel, is produced cheaper than they produce it anywhere else in the world, and, in my judgment, no duty whatever is required for the protection of the American industry.

Mr. HITCHCOCK. Mr. President, will the Senator permit an inquiry?

The PRESIDING OFFICER (Mr. STERLING in the chair). Does the Senator from Iowa yield to the Senator from Nebraska?

Mr. CUMMINS. I yield.

Mr. HITCHCOCK. Referring to the statement of the Senator from Iowa that we have not any knowledge as to the cost of production abroad compared with the cost of production at home, I would like to ask whether, in the absence of that information, we are not safe in taking the statistics of imports, and if the imports show a decline over a long course of years can we not safely judge that there is no danger of any destructive importations?

Mr. CUMMINS. If we were normal, I would regard the imports as secondary evidence, in the absence of the primary showing upon which I mainly rely, but I do not regard prices as of any value whatever in determining what the duties ought to be.

Mr. HITCHCOCK. Let me call the Senator's attention to the paragraph of which he is speaking, 308, which is very important, and which we shall take up later, I suppose. I notice that the imports in 1910 were considerable; that is, they were 13,000,000 pounds. Since that time they have been on an almost steady decline until in 1919 they were only about 2,500,000 pounds, showing that imports are becoming negligible in the items to which the Senator is now referring.

Mr. CUMMINS. The reason the imports are not a good guide, or not an accurate guide, at any rate, is that Europe is not normal. Europe is in a state of reconstruction.

Mr. HITCHCOCK. I ask the Senator not to reach that conclusion without bearing in mind the fact that I go back to 1910, when Europe was normal, and when the imports fell off in 1911. They were about the same in 1912. They fell off again in 1913, which was prior to the war, showing that the tendency was that their competition was failing as against the American output, even though the tariff duty under the Underwood law was only 12 per cent.

Mr. CUMMINS. In 1909 I examined the metal schedule with a great deal of care, and proposed a substitute for the schedule which expressed my views with regard to the duties which should be imposed at that time. But I do not know anything about the cost now there or here, and even if we knew what the cost there is to-day and knew what it is here to-day, we would not know what it would be to-morrow, because commercial conditions are shifting and changing so rapidly and so radically that I do not see my way clear to establish duties upon that basis. I am wondering whether there will not be found, before we are through with the bill, some other reasonable basis upon which we may proceed.

Paragraphs 308, 309, and 312 comprise a very large part of the production of steel, not only in our own country but in other countries as well. I hope that before we have finished the consideration of this particular schedule the members of the Finance Committee, who have examined the question as carefully and as thoroughly, I am sure, as it can be examined, will give us a little more information than we now have with regard to present costs and probable future costs in the competing countries of the world. I can only repeat that my general information has been that in the great heavy productions of steel which comprise probably ninety-nine one-hundredths in volume of the entire production, we have reached a position in which we produce as cheaply as others produce anywhere. That may be disturbed, that may not be true in the present moment. I do not know. I have not been able to find out.

But we ought to be careful with regard to the metal schedule, especially careful about it, because 50 per cent of our production comes from one corporation and it is perfectly well known that it for years has fixed the price of substantially all the commodities which it produced and in which it deals, and that the less favorably situated industries are glad to follow that price. They go up if the Steel Corporation permits them to go up, and they come down when the Steel Corporation compels them to come down. I do not regard that as effective competition. It is not what the country is entitled to in order to make competition an influential force in fixing prices. Now we are confronted with a situation in which it may be that all of the other steel companies of the country will combine, and then we shall have two great corporations, at the most three, producing these articles. It is idle to expect that under such circumstances there will be any effective competition, because the intimacy is so great that we shall have to depend upon something else than the competitive course in order to fix the price of the great bulk of the steel products. I myself do not want to go to the point toward which we are being driven every day at which the Government will be compelled to fix prices and to limit profits. That to me is an abhorrent suggestion. It may be that we must reach it and will reach it, but I do not want to see that policy established in the United States if it is possible to avoid it. Therefore I am in favor of adjusting these schedules upon the basis of affording whatever fair competition we may expect from abroad. I do not know that that will be effective, but it is one of the things that we ought to bear in mind, and that I intend to bear in mind when I come to vote on schedules like this one.

Mr. STANLEY. Mr. President, will the Senator from Iowa yield to me?

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Kentucky?

Mr. CUMMINS. I yield.

Mr. STANLEY. In connection with what the Senator from Iowa has so pertinently observed, I call his attention to paragraph 312 of this bill as illustrating the vice of an excessive duty. That paragraph covers—

> Beams, girders, joists, angles, channels, car-truck channels, tees, columns and posts, or parts or sections of columns and posts, deck and bulb beams, and building forms, together with all other structural shapes of iron or steel.

Mr. President, the principal item there is structural steel, although there may be a few other things included. Structural shapes are, as the Senator from Iowa has so wisely said, more and more essential to every phase of our industrial life. With the perfection of the use of cement and other like materials in connection with structural shapes, residences, business houses, hotels, warehouses are all now built, to a greater or less extent, of steel. Our bridges, our culverts, and our highways are also all dependent upon these essential articles. No less an authority than Mr. Carnegie himself has stated that there is no competition whatever between the American producer and the foreign manufacturer. According to Carnegie himself, you may put structural shapes on the free list and yet not a beam, a girder, or any other form of a structural shape will be imported, for the reason that such shapes are standardized just as building materials of wood are standardized. We have 2 by 4's of the 10 and 12 foot lengths. The structural shapes on the continent of Europe are standardized on the metric system; so that the French manufacturer and the German manufacturer do not make the identical length that we need. If the builders of skyscrapers or bridges should attempt to import structural shapes, they would have to get a foreign expert to figure out just what they would need in meters and kilometers and the like instead of in inches and in feet.

The import statistics show how true that it. While a few structural shapes, which include many articles such as bulb beams or columns, or something of that sort, may have been imported into the United States, yet in 1920 we imported only $284,167 worth of structural shapes—about 3,000,000 pounds. In the same year we exported $28,956,819 worth of structural shapes. Our exports are 100 to 1—yes, 200 to 1—over our imports. The imports are absolutely negligible; they are not one-half of 1 per cent; and yet this bill proposes to place a duty of 30 per cent on every I-beam or every girder or every joist that goes into any character of building in this country, because Senators will notice the same old joker is in this bill, for its framers have provided first a duty of 1 cent per pound.

Mr. CUMMINS. The proposed duty is seven-twentieths of 1 cent per pound.

Mr. STANLEY. The Senator from Iowa informs me that it is seven-twentieths of 1 cent per pound duty. Then there is an additional provision which reads:

any of the foregoing machined, drilled, punched, assembled, fitted, fabricated for use, or otherwise advanced beyond hammering, rolling, or casting, 30 per cent.

Senators have noticed that in the construction of buildings the materials are assembled and then the pieces are riveted together. All they have to do is to punch one hole in a beam or a girder and it falls under the phrase "fabricated," and there is an additional duty of 30 per cent. So there is an additional 30 per cent duty on the most essential material for construction purposes which is known in this country, when not one cent is necessary, and, as the Senator from Iowa has well observed, it can only operate as a guaranty against any possible competition invited by inordinate home prices.

Mr. CUMMINS. Mr. President, the Senator from Kentucky probably has later information than I have, because I have not studied this subject for several years; but there was some structural steel imported along in 1909 and 1910. Of course, it could only be used in the seacoast cities. There were several large buildings in New York along in those years constructed out of imported structural steel, simply because the contractor believed that the home producer was charging too much for it, and he got it a little cheaper abroad than he could get it at home; but no part of the imported structural steel could get 50 miles away from the seacoast. The transportation charges, even upon equal terms, would forbid the English manufacturer getting his structural steel to Pittsburgh or Chicago. The steel that is manufactured at Chicago, at Pittsburgh, and other interior places would have so tremendous an advantage over any imported steel that no large volume could be imported or could be used except at the very seaboard.

I am saying this because I feel perfectly helpless with regard to this bill. I have a view with regard to the doctrine of protection, and I have not changed my opinion in any degree since I did what little I could to secure fair rates in 1909 and in 1913; but the whole basis upon which we acted at that time has disappeared, apparently, and we are not able to compare the costs so as to introduce a competitive system.

I had greatly hoped at one time that the Senator from Alabama [Mr. UNDERWOOD] would abandon the delusion of a tariff for revenue only, which has never been enacted in the United States and never will be, with any accuracy or fidelity, and would enlarge upon what he called in 1913 a competitive tariff. I can not see very much difference between a competitive tariff or a tariff levied upon competitive principles and a tariff for protection. However, my Democratic friends still insist upon harboring the delusion that we can enact a tariff for revenue only. There is no such thing; that is, no such thing that would be adopted by the people of the United States. A tariff for revenue only and free trade are synonymous terms in the terminology of political economy, and political economists generally use them as synonymous terms. Free trade does not preclude levying duties upon articles which the country levying the duties does not produce, and a tariff for revenue only, when it is properly applied, permits the levying of duties only upon articles which the country levying the duties does not produce, as is evident from a moment's consideration of the subject.

The great objection which our Democratic friends have to a tariff for protection is that it increases the price not only of the imported article but of the domestic article as well, and, unless that objection is overcome by corresponding benefits and advantages growing out of a tariff for protection, the argument is perfectly sound. The notion that we have a right to levy a tax for the benefit of one man or one producer or a dozen producers is obnoxious to every man who loves justice. We do not levy protective duties in order to make a producer rich or in order to give him profits; that is not the purpose of levying protective duties; but we levy them because we believe that they are just as advantageous to the consumer as they are to the producer. If they are not as advantageous to the consumer as they are to the producer we ought to abolish and abandon the notion of protective duties. The fundamental idea of protective tariff is to keep the people of the country which levies it at work; it is to give them employment and to enable them at least to supply themselves with the articles which they consume.

I know that mathematically it can not be accurately applied; but that is my notion, at least, of a protective tariff. It is to make our country as nearly as possible autonomous, self-sustaining; and every workingman who does not receive advantage or benefit from the levying of a protective tariff has just cause for complaint against it. We can not keep our people at work if we resort to the old plan of producing only those things that we can produce more cheaply than they can be produced in any other country in the world. We can neither develop our country, nor, having it developed, can we keep in employment our men and our women upon any such principle as that. If we had been devoted to free trade or the principle of a tariff for revenue only, we would have been an agricultural country alone, because I suppose that we can produce many kinds at least of products of agriculture cheaper than they can be produced anywhere else.

But that is all aside. I have waited for this opportunity to say just a word with regard to this particular matter. I have waited until the metal schedule was before the Seante, because I know more about the metal schedule than I know about any other schedule, unless it is one or two rather unimportant schedules that come later. I hope I shall be able to sustain the committee. My desire is to sustain the committee. I think that this is the most inopportune time of all the times I have ever known to enact a general revision of the tariff law, and in that respect I agree with the Senator from North Dakota [Mr. MCCUMBER], who expressed the same general idea the other day. I would not have entered upon a general revision of the tariff. The time has not come for it. The information that is necessary is not at hand, and even if it were at hand for this moment we could not depend upon it as a basis for action to-morrow, or next month, or six months hence.

If I could have had my way—and I have urged this upon my associates with all the strength I had—if I could have had my way about it, I would have allowed the existing tariff law to remain as the general law upon the subject, including the emergency tariffs which have been enacted since the revision in 1913. I would have then given the President or the Tariff Commission, preferably the latter, the authority to ascertain from time to time the difference between the cost of production in competitive products at home and abroad; and having ascertained that difference I would have had the President proclaim that difference, and then, by the law itself, I would have levied upon the products so examined the difference between the cost of production at home and abroad so ascertained, whatever it might be.

That, it seems to me, would have relieved the country of the disturbance through which we are now passing. It would have afforded reasonable guaranties to our producers that whenever they were unable to meet the competition from abroad by reason of comparative cost of production the duties would be raised to measure that difference. I think we have the authority under

the Constitution to clothe the President or the Tariff Commission with that power. I think the questions which arise with regard to the constitutionality of the present bill upon that subject would be entirely absent if the plan that I have suggested were employed. That is what I would have liked to do; but, inasmuch as I was powerless to affect the situation, I intend, whenever I am not clearly convinced that the committee has made a mistake, to follow the committee; but whenever I feel well convinced that the duties which it has imposed are too high, I intend to vote my own sentiments with regard to the question, handicapped as I am by inability to ascertain what the difference in the cost of production in this country and in other countries is at the present time.

Mr. HITCHCOCK. Mr. President——

Mr. CUMMINS. I yield.

Mr. HITCHCOCK. From the Senator's closer relations with the committee, has he been able to learn what emergency requires the introduction and consideration of this bill at the present time?

Mr. CUMMINS. I know—I think I know—that the Republicans generally do not believe that the Underwood-Simmons bill protects the industries of the United States, and I share that belief in very many respects, and I assume that the Republicans believed that the sooner the law was brought into harmony with the Republican doctrine rather than the Democratc doctrine the better it would be for the people of the United States; and that reasoning would have been absolutely sound had it not been for the disturbed, chaotic condition of the world that renders it impossible to ascertain just what duties ought to be levied in order to embody and to carry out what I understand to be our doctrine of protection.

Mr. HITCHCOCK. Will the Senator state in what the evidence consists that the existing law does not adequately protect, or in any way endangers, existing industries? What would be the evidence of it?

Mr. CUMMINS. That question I can not answer abstractly.

Mr. HITCHCOCK. Would it not inevitably be the evidence of imports coming in here in increasing volume?

Mr. CUMMINS. As I have remarked before, I do not look upon imports, under the present circumstances, as a reliable guide to the future.

Mr. HITCHCOCK. No; I was not asking that. What would be the evidence of danger? Would it not necessarily be excessive imports?

Mr. CUMMINS. It would be evidence of danger.

Mr. HITCHCOCK. In the absence of excessive imports—and we have shown that in one schedule after another—how can it be claimed that there is an inadequacy of tariff?

Mr. CUMMINS. This law, I take it, is being enacted to care for the future; and the committee, I believe, has done the best it could to peer into the future, and to predict or assume what the conditions of the future will be; and they must have done that, because there was no other basis upon which to proceed. I do not criticize the committee in any respect, but I particularly do not criticize the committee for refusing to accept as conclusive the fact that the imports of a particular article or commodity may have been very negligible, because, if the committee believed that to-morrow or next month or next year the imports would very greatly increase, from the standpoint that the committee was occupying I think it was entirely proper to provide duties upon that hypothesis.

Mr. HITCHCOCK. The Senator will recall that we have had before us the tariffs on such articles as cement and ink and wood alcohol, and others in which the United States manufactures half of all the product of the world, and in which it has a great export trade. Does the Senator think that taking those articles from the free list, or increasing the existing duties, is justified by peering into the future and making a tariff based on fears?

Mr. CUMMINS. I am not going to criticize or condemn the committee. I can only say what I think about that subject. So far as I am concerned, I think that to put a duty on Portland cement is little less than absurd. That is my judgment, but that is an individual judgment.

Mr. HITCHCOCK. It is a very wise judgment; I will say that to the Senator.

Mr. CUMMINS. And it, I understand, is justified only by the suggestion that there are certain small manufacturers of Portland cement along the border, and that there may be competition between Canadian cement and cement manufactured in our own country. I do not regard that as sufficient to warrant a duty. Save in those limited communities, the duty will have no effect. It will neither increase nor decrease the price of cement. That may be affected by combinations and understandings between American mnaufacturers; but the price of cement in Omaha, where the Senator lives, or in Des Moines, where I live, will not be in any respect affected by the duty which is put upon it. I know nothing about ink.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. CUMMINS. I yield.

Mr. ROBINSON. If it should appear conclusively, as I believe it does, that the cement industry is controlled by a trust, in violation of the provisions of the Sherman antitrust law, and the proper authorities of the Government should institute and prosecute successfully proceedings to dissolve the trust, it might result that from a low tariff competition would permit the people who use cement and the industries that use cement to obtain it at a lower price, might it not? The Senator does not mean to say that because of the price control that unquestionably exists in the cement industry that control should be fastened upon the public and made more secure by an increase of the duty on cement importations?

Mr. CUMMINS. No. On the contrary, I have just said that I was not in favor of a duty on Portland cement; but I repeat that the possibility of any competition preventing an increase in prices is so remote that I can not believe that, even assuming that there is a combination that controls the price, the combination could increase the price to the point of competition. It could not do that, because it would destroy the market for cement before it would reach the point at which the foreigner can import any considerable quantity of cement.

Mr. ROBINSON. Will the Senator be good enough to yield to me for a further statement?

Mr. CUMMINS. I yield.

Mr. ROBINSON. In view of the price history of this commodity extending over a period of the last five years, and in view of the complete control which the combinations in the industry now exercise over the price, any price may be charged that the industry will bear—that is, short of a suspension of the use of cement in the United States. If there is any virtue in the antitrust law, and that statute should be invoked and the trust dissolved, it is entirely possible, in my opinion, that the cement industry could be conducted profitably in this country upon the basis of two-thirds or one-half the price that is now being charged. In that event a diminution rather than an increase in the tariff might expedite and facilitate price reductions in this necessary commodity.

Mr. CUMMINS. I do not see the connection between the statements of the Senator from Arkansas. It may be that the proceedings which are now in progress will result in a dissolution of what is called the Cement Trust. I know nothing about the merits of that controversy, but my observations of the dissolutions which have taken place do not justify a belief that competition will be effectively restored by the dissolution.

What I mean to say is that before a combination, as it exists now, or as it may be hereafter, would be able to raise its price to a point that would enable manufacturers of cement in foreign countries to reach the United States, or any considerable part of the United States, it would have reached a price which would have been more than the traffic could bear, if I may use that expression.

Mr. ROBINSON. That price has almost been reached now, and there are substantially no importations, as the Senator states.

With respect to the effect of dissolutions of trusts, I presume the Senator means, epigrammatically speaking, that a dissolution does not dissolve; that the experience of the country, under the operation of the antitrust law, is that actions which have apparently been successful in efforts to dissolve trusts have resulted in the reorganization of the trusts, and their proceeding under other forms. If there is any virtue in the antitrust law at all, it must be admitted, particularly under the circumstances shown to exist in connection with the cement industry, that the dissolution of the trust would result in price reduction. If it does not, we would just as well submit to the power of this organization to fix any price it chooses, which, I think, in the end, would mean any price which the industry will bear, the highest price which can be charged without suspending the businesses which are conducted by reason of the production of cement.

Mr. CUMMINS. I sincerely hope that our experience in the future will be more fortunate, as far as the dissolution of trusts is concerned, than it has been in the past.

Mr. ROBINSON. I concur in that hope.

Mr. CUMMINS. My belief is that when these great combinations are dissolved, there is some one company producing the commodity a little more cheaply than any other company, and it controls the price, and every other producer is very glad to

go to that price. That is the reason we have had no great reduction brought about by the dissolution of the Standard Oil Co.

I suppose the United States Steel Corporation can still continue to exercise the influence it can and does wield over production and the price of steel. On an average I venture to say it can produce the heavier forms of steel for $10 or $12 a ton cheaper than its competitors can produce those same forms. It has allowed its competitors to live because it regarded it as for its interest to do so, but there has not been a time in 15 years in which within six months the United States Steel Corporation could not have bankrupted every independent organization in the land, or at least reduced its profits so that the continuance of the industry would have become impossible.

Those are conditions we have to deal with in some way or other. No man has yet been genius enough to present a plan which will deal with these situations short of the Government undertaking to fix prices or limit profits, and we are shrinking from that course now, and I think we may very well shrink from it. It is one of the problems we have yet to solve, and the man who does solve it successfully, or the Congress which is able to introduce and carry into effect a plan which will restore and preserve reasonable, fair competition, in the production of the United States, will be entitled to a great deal more than the plaudits of his fellow men. He will be entitled to a very secure and permanent seat in the heavenly land. While that has something to do with the tariff, its connection is somewhat remote. We have always to consider transportation when fixing tariff duties.

This bill in my judgment lacks an essential element, in not providing against the dangers which are always present of enabling carriers to neutralize the duties which are imposed upon a given product by the adjustment of rates of transportation. We were debating here yesterday the earthenware schedule. Some years ago I had occasion to look into that, and at that time the producers of earthenware in England, in France, and in Germany as well, could reach the interior points of the United States, as far west as Chicago, at a rate which absolutely destroyed the protection or the advantage which was attempted to be conferred by the levying of the duties. If one brings in a shipment of earthenware to New York, and if that importer can reach Chicago for one-half the rate which his rival in New Jersey must pay in order to reach Chicago, the effect of your duty is gone, and I think the consideration of that question is a part of the consideration of every tariff inquiry.

At one time I introduced a bill to cure that evil, but unfortunately, I could not secure consideration of it. The importer in New York, when he seeks to reach an interior point, ought to be required to pay the same rate of transportation that the producer in New Jersey or in New York pays. Simply because a part of the carriage is over the ocean, he ought not to be able to use the land lines of the United States in a way which discriminates against the home producer.

But I must suspend. I had no notion of going into this subject generally when I arose, but I wanted the opportunity, of which I have availed myself, to state in a general way my attitude toward this bill.

Mr. McCUMBER obtained the floor.

Mr. NORRIS. Before the Senator from Iowa leaves the floor, I want to ask him a question.

Mr. McCUMBER. That means several questions and answers, back and forth, and I shall not take more than five minutes myself.

Mr. CUMMINS. I yield to the Senator from Nebraska.

Mr. NORRIS. I think the Senator has just now stated a very interesting proposition, one which he knows about, too. He has said that a man over in London or Paris or Berlin could ship his goods from that place to Chicago at a lower rate than the rate at which the manufacturer of the same article could ship from New York, let us say. If that is the condition, it is to my mind intolerable. As I look at it, however, it is entirely a question of transportation. Does the Senator think that we can remedy that situation by a provision in a tariff bill? Should we not meet it in another way, and do we not have to meet it in another way?

Mr. CUMMINS. Naturally, we would have to meet it in another way, by an independent measure; but when we are endeavoring to levy duties which will protect American producers, and when we know that the foreign competitors secure an advantage, in the way I have suggested, which goes far to destroy the benefits of the duty, I think it would be entirely proper to put it into the tariff bill.

Mr. NORRIS. In that case, you make the consumers of the article pay an exorbitant price, because of transportation charges; and if that is wrong, if they ought not to be required to do it; in other words, if the thing itself is wrong, it does not seem to me the attempt to meet it in this indirect way would be a remedy.

Mr. CUMMINS. But the thing is not wrong. It costs so much to transport an article from New York to Chicago, and the rate is based in a general way on the cost of the service. It costs as much to take a car which has been loaded with goods coming from Europe as it costs to carry a carload of goods from New York or New England or New Jersey.

Mr. NORRIS. Mr. President——

Mr. McCUMBER. I yield to the Senator from Nebraska to ask another question.

Mr. NORRIS. I am not asking the Senator from North Dakota to yield.

Mr. McCUMBER. Then I decline to yield, as I have the floor.

Mr. NORRIS. I asked the Senator from Iowa if he would yield, and he has yielded.

Mr. McCUMBER. Mr. President, I was recognized, and I decline to yield if the Senator is not courteous enough to ask me to yield to him.

Mr. NORRIS. I make the point of order that the Senator from Iowa had the floor, and not the Senator from North Dakota.

Mr. McCUMBER. The Senator from Iowa had completed his speech, and the Senator from North Dakota obtained recognition, and started to make a statement when the Senator from Nebraska turned to me and asked if I would yield to allow him to ask a question of the Senator from Iowa.

Mr. NORRIS. I did not. The Senator is entirely mistaken.

Mr. McCUMBER. Then, if he did not, I have not yielded.

Mr. NORRIS. If the Senator has not the floor, of course, I have a right to ask the question.

The VICE PRESIDENT. The Chair understood that the Senator from Iowa had completed his discussion and had yielded the floor, and the Senator from North Dakota was recognized.

Mr. NORRIS. Then we will not get any information on that subject.

Mr. McCUMBER. Possibly the Senator will get some information if he will be a little patient.

Mr. President, I want the attention of the Senator from Iowa, because the Senator from Iowa has presented a sort of a rule which he thinks should be enacted into law, and which would authorize the President, or preferably, he says, the Tariff Commission, to fix these rates. The rule which the Senator from Iowa would adopt is that the President or the Tariff Commission should ascertain the cost of production of a certain foreign product in the foreign country, and ascertain the cost of production of the like article in the United States, and then apply a duty which would measure this difference.

As a general rule, or at least to some extent in some instances, that rule might work, but I think generally it would not work, and I will tell the Senator why. The Senator has already modified his rule himself, because, he says, we must take into consideration the question of freight rates. That means how we can get an article in competition with another article in a given territory.

That is all right if we stop right there and if we wish to divide 50–50 with the foreigner. But let us suppose that we have factories in the United States which are capable of producing all of a given commodity that we require for consumption in the United States at a reasonable price. Here is a foreign country that can produce the same article, we will say, at a lower price. The Senator would add to the cost of bringing that article into this country a duty which would equalize the two. Now what would be the result?

The result would be, other conditions being equal, that the producers in the United States who can produce all of a commodity at a fair compensation will share with the foreigner one-half of the market if both are able to fill that market. Would that be a good thing for the people in the United States? I do not think it would. We now, perhaps, produce very close to 95 per cent of all the articles we use in the United States. If we were to surrender 40 per cent of our trade and bring it down to about a 50 per cent basis, we certainly would be in a most precarious condition.

I would adopt the Senator's rule with this modification: I would give some advantages to the American producer beyond the mere advantage of equalizing the cost of placing an article in the market at any given point. I think the Americans should have a preference. Of course they have some advantage in being organized, and organized in their own country; but just remember that with American capital going into foreign countries, as it has been of late years, and American machinery,

too, there will be just as good an organization on the part of the importer to reach the American consumer as there will be on the part of the American producer.

So I would give an advantage to the American producer, but always keeping in mind that I would not have the rate so high that it would shut out importations entirely, because I believe there should always be a sufficient amount of importations to prevent any rise in price that would be an injustice to the American people. It is difficult to ascertain just what that should always be. Nevertheless we ought to come just as near to it as possible.

Take a case of the kind which the Senator from Iowa has just mentioned. Here is a product that is made in England and costs $1 per unit. Here is a like product that is made in San Francisco and costs $1.50 per unit. The Senator's rule, if there were no other modification, would simply add 50 per cent to the foreign unit and then they would equalize each other so far as the cost of production is concerned. But we will suppose that the consumption is all east of the Allegheny Mountains. Then we have to bring the American product from California to the eastern market at a freight cost, perhaps, of two or three dollars per unit. Immediately the American would be out of business.

So I agree that we must take into consideration the question of what the freight rates are, where the article is produced in the United States, the field of consumption, the importance of that field of consumption, and then determine what rate would give a fair competitive condition in that field of consumption. That means rates of duties which will take into consideration the matter of the freight rates as well.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER (Mr. LENROOT in the chair). Does the Senator from North Dakota yield to the Senator from Iowa?

Mr. McCUMBER. I yield.

Mr. CUMMINS. There is no difference substantially between the rule stated by the Senator from North Dakota and the one that I stated. I did not amplify it as he has done. I stated the rule laid down in the Republican platform many times, especially the Republican platform on which I came to the Senate of the United States, and to which I still give my loyal adhesion.

The real difference between the cost of production at home and abroad can not be mathematically applied. It must be applied with good reasonable sense so as to produce exactly the condition named by the Senator from North Dakota. When the foreign article comes into the United States it lands upon one coast or the other. The center of population in the United States is just a little east of Chicago. In distributing the American product as compared with the distribution of the foreign product the American producer must necessarily have an advantage. It is his by virtue of the situation. No one can take it away from him unless, as I said, in the adjustment of freight rates the importer who ships from the coast to the interior has an advantage over the American producer who ships from the coast to the interior.

Mr. McCUMBER. I agree with the Senator there, and I think we can amplify it in another direction. I am doing this for the purpose of drawing to the Senator's attention the fact that I think in the administrative provision which we have recommended we can iron out many of these inequalities and differences. After all, if we should adopt a different rule or standard and say the duty should be such as would equalize competitive conditions, then I think we would have it very much nearer what we want. That would take into consideration a great many different elements which enter into the question of competition in the American market.

But I do not entirely agree with the Senator's rule, if applied in some other respects. Here is one situation: We have to take into consideration not only the interests of the producer but the interests of the consuming public. If we find an article produced in the Rocky Mountain region that has its consumptive demand in the Allegheny region we have to take into consideration whether the thing produced is of such importance as that we can justify a protective rate at all. In some instances we have had to say that it is so unimportant as compared with the importance of the consumptive demand that we can not afford to develop that industry in the United States.

Then we find another situation. Sometimes the freight rates are such that it is impossible, without imposing upon the public, to give a rate that will allow the producer in the Rocky Mountain section to reach the consumer along the eastern coast. So we have given rates in some instances that will allow the western producer to reach, say, as far east as Chicago and have the western market, but have not given him a rate on which he can possibly compete with the foreigner along the eastern coast. In that way we have tried to protect the American industry and at the same time prevent such a high charge against the consumer in the eastern section of the country. So here again we would have to modify the rule laid down by the Senator from Iowa.

I will give one instance in which I think we could not apply the rule. Suppose a product is produced in Canada at the same cost for which it is produced in the United States. The Canadian can bring it over here freely. There is no difference in the cost of production, therefore there will be no duty at all. But let us take wheat, for instance. Let us suppose that the American producer, while it costs him no more to produce than it costs the Canadian producer, must purchase everything that he buys to live upon on a higher scale and standard of living, and pay for everything that he buys on the higher cost basis. I do not mean merely the implements necessary to run his farm; I mean other things that do not enter into the question of raising his crop. He pays a higher price because he lives on a higher standard of living, and, therefore, I would give him a protection as against the foreign product so as not to drive our product down to the price of the foreign product in a country where the cost of living is less than in this country. So the rule would not work in that particular case, if we are believers in the principle of protection.

I simply wanted to call attention, Mr. President, to the fact that while I agree with the Senator from Iowa as to what should practically be the rate of duty, I can see that the rule which he enunciates would require a great many modifications, as he himself says, to meet each particular case.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. NORRIS. I suppose it will now be conceded that I have the floor; and I suppose also that the Senator from North Dakota will let me ask the Senator from Iowa a question.

Mr. McCUMBER. In the Senator's own time, with pleasure.

Mr. NORRIS. I want to call attention to the fact, as the Senator did a while ago, that if he wants to interrupt when I have the floor he must get permission to do so. If he wants to interrupt me, he may look into the rules and find out how to do it.

Mr. President, I did what I have seen done a thousand times in the Senate. When the Senator from Iowa had announced that he was through, before he took his seat, I addressed the Chair and asked if I could ask him a question, and the Senator from Iowa consented. It seems that at the time when the Senator from Iowa announced that he was going to conclude the Senator from North Dakota addressed the Chair, and the Chair said that he had recognized the Senator from North Dakota. Of course, I had to accept the word of the Chair. It has been a custom hitherto, to which there has been no exception in this Chamber, when a Senator was addressing the Senate and concluded his remarks and was about to stop and some Senator wanted to ask him a question pertaining to what he had been discussing, that the Senator still held the floor, even though some other Senator had addressed the Chair. I have never known an exception of that kind until to-day. It seems that there is now a new rule.

If the Senator from North Dakota were as anxious to get information as he is to take advantage of a favorable ruling of the Chair, and a technical ruling at that, to shut some other Senator off who is trying to get information, he would get along with his bill a great deal better than he is doing.

Mr. President, the Senator from Iowa has told us of a very interesting situation, one which in the past at various times has been discussed to quite an extent. The Senator called attention to the fact that under former conditions it was possible for the manufacturer in Europe to ship his goods to Chicago under a combined freight rate from the place of manufacture in Europe to Chicago, which was less than his American competitor had to pay who was manufacturing his goods on the seacoast, or near to it; in other words, that a person in London could ship, let us say crockery, from London to Chicago and land it, of course, in New York from the boat, unload it from the boat and put in on the train, fill a car with it, while in the same train perhaps the next car to it might be loaded with the same product manufactured right there in New York or close by. The two lots of goods would go to Chicago in the same train, and yet the freight on the foreigner's product would be very much less from London to Chicago than the freight on the American product from New York to Chicago, and the foreigner could not only undersell the American on an equal market but that he could overcome the tariff that was imposed for the benefit of the American producer.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Iowa?

Mr. NORRIS. I yield.

Mr. CUMMINS. I think I did not state just what the Senator from Nebraska understood me to say. I did not say that I knew of any case in which the freight rate from London to Chicago was less than the rate from New York to Chicago; but what I did say was that the rate from London to Chicago was a great deal less proportionately, considered from the standpoint of the cost of service, than the rate from New York to Chicago.

I can not recall just what the differences were, but I know that I examined the question very carefully and introduced a bill to correct that practice. That was some years ago. I do not know what the rates now are, but I do know that the railroads were carrying imported goods from New York to Chicago for a great deal less than they were carrying domestic goods.

Mr. NORRIS. I think I have not misunderstood the Senator from Iowa. I did not mean to say that the Senator from Iowa had used London, for instance, as a place. I myself was merely illustrating the proposition that the Senator had laid down. I have looked into it, Mr. President, not so extensively, perhaps, as has the Senator from Iowa, but I know in a general way that what I am stating is true. I have investigated the matter; I have come in personal contact with it a good many times in the investigations which I have made. The Senator from Iowa, however, is an authority on rates, and I use his statement, illustrating it by a statement of my own. I do not want to misstate the Senator's position.

Mr. CUMMINS. I am sure that the Senator does not. I may have made my statement somewhat awkwardly. I do not remember whether the rate from London or any other foreign point to Chicago was absolutely less than the rate from New York to Chicago, but I know that what the railroad got for transporting the foreign goods from New York to Chicago was less than the railroad got for transporting the domestic product.

Mr. NORRIS. I very gladly accept what might be considered a slight modification of what I understood the Senator's original statement to be; but, Mr. President, I will make the statement on my own responsibility.

Mr. SMOOT. Will the Senator yield to me?

Mr. NORRIS. Yes.

Mr. SMOOT. I wish to state to the Senator from Nebraska that I can tell him that on crockery made in Germany and purchased by merchants in Salt Lake the freight rate from Germany to Salt Lake City was a little less than from Ohio to Salt Lake City.

Mr. NORRIS. I am glad to have the corroboration of the Senator from Utah for a statement I am about to make. I do not remember now, Mr. President, the particular place, but from a town on the main line of the Pennsylvania Railroad Co., somewhere between Chicago and New York, I think, in Ohio, although it may have been east of there, the freight rate on a shipment of crockery to a point in the West—I can not now state where; it may have been Chicago or it may have been farther west than Chicago; it might have been Omaha; but it was some place in the western part of the country, or the Middle West, as most people would understand it—was greater over that road from the particular point of manufacture to the destination of the shipment than the freight rate on a similar article from Europe passing through the same town over the same railroad to the same destination. There is no question about that being true. The records will show, Mr. President, that several years ago a carload of sugar was shipped from San Francisco to Kearney, Nebr., over the Union Pacific Railway. The freight rate charged on that carload of sugar was the rate from San Francisco to Omaha plus the local rate from Omaha back to Kearney. The train going to Omaha ran through Kearney. When the train reached Kearney the men who had purchased the sugar tendered the freight from San Francisco to Omaha. It was refused and they replevined the sugar. There is no question that such rate schedules existed; but I do not believe the Congress of the United States ought to try to remedy a situation of that kind in a tariff bill by levying a tariff duty. To my mind, it is illogical, it is foolish, to think of doing such a thing in a tariff bill. A condition of that kind, in my judgment, can not logically be defended on any ground whatever; but we ought not to levy a tariff high enough to compensate for that dishonest freight manipulation. What we ought to do is to remedy the freight situation, because it applies not only to commodities that come from abroad but to shipments that originate in our own country.

Mr. CUMMINS. Mr. President, will the Senator yield again?

Mr. NORRIS. I yield to the Senator from Iowa.

Mr. CUMMINS. I am afraid I was again misunderstood. I did not propose to change the tariff duties on account of the disparity in freight rates. What I suggested was that in a section of this bill it should be declared that the freight rate upon an imported article over the American railroads should not be less than the freight rate upon the similar domestic article. I had no thought, of course, of dealing with the situation through the medium of a duty levied upon commodities.

Mr. NORRIS. I entirely agree with the Senator in the statement that we ought not to try to rectify that situation by the levying of a tariff duty; we ought not in a tariff bill attempt to levy rates to equalize that kind of a situation; but, regardless of the kind of a bill to which a provision such as the Senator from Iowa has suggested may be attached, I should be glad to support it.

Mr. SMITH. Mr. President——

Mr. NORRIS. I yield to the Senator from South Carolina.

Mr. SMITH. Mr. President, I do not know why the particular phase of the situation to which reference has been made has escaped me, but nevertheless it has. I should like to ask either or both Senators, how does it come about that in our adjustment of freight rates a foreign shipper, say from New York to an interior town, is called upon to pay a less freight rate upon his shipment than the American shipper of similar domestic goods is called upon to pay? Is that on account of any international arrangement?

Mr. CUMMINS. I do not think it is on account of any international arrangement, but I think we have a foolish notion with regard to transportation in some respects. For instance, the Senator knows perfectly well that a lower rate is given from the West to the seaboard upon grain that is to be exported than is given to the same commodity to be consumed in the United States.

Mr. SMITH. Yes; I am aware of that.

Mr. CUMMINS. I do not believe at all in any such adjustment. I think that when the railroads are engaged in service of that sort which ends with the ocean line the rate for similar service should be the same.

Mr. SMITH. Since the Senator has mentioned it, I remember we have a lower rate on certain articles for export. It will be remembered that we had quite a controversy about the eastern division and the southern division; but I did not know that the practice was applied to imports as well. It certainly seems to me that, if such a practice is being kept up, as the Senator from Nebraska is showing, we are levying a tariff on certain goods for the benefit of the railroads and not for the benefit of the producers.

Mr. NORRIS. Certainly.

Mr. JONES of Washington. The great benefit comes to the foreign shippers.

Mr. NORRIS. Mr. President, if the railroad makes a profit on carrying a foreign shipment from New York to Chicago, then it ought to take similar freight belonging here and carry it from New York to Chicago at the same price. If it does not make a profit on the foreign shipment, then it ought to increase the rate so that it will. Nobody can expect the railroad to haul goods at a loss or for nothing.

Mr. JONES of Washington. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Washington?

Mr. NORRIS. I yield to the Senator from Washington.

Mr. JONES of Washington. If the Senator will permit me, I wish to suggest that the exercise of that power has brought more benefit to foreign ships than it has to the American railroads.

Mr. NORRIS. That is probable. I am not sure but that sometimes the railroads carry the foreign freight at a loss and make the local shipper pay the difference, because by that means in the aggregate they make more money, but if they do transport the foreign shipment at a loss, then the people here have to pay exorbitant freight rates on some other commodity to make up that loss.

Mr. JONES of Washington. That is true.

Mr. NORRIS. And if the railroads are carrying such shipments at a profit, then they ought to be able to haul American products at the same rate and get along all right.

Mr. JONES of Washington. And heretofore we have had exclusive contracts between railroads and foreign shipping lines by which the foreign shipping lines largely got the benefit of that reduced freight rate.

Mr. NORRIS. I remember that the Senator from Washington not very long ago introduced a resolution of investigation, in the discussion of which it was disclosed that at a time

when we were trying to build up a merchant marine some of the trunk-line railroads of the United States had secret contracts with foreign shipping companies by which they turned over to them at the seaports whatever foreign shipments they had. When the railroads were taken over by the Government, as I remember the correspondence that was disclosed at the time the Senator from Washington had the matter up, they were a little afraid that the people would catch on to that, and they knew that that did not look very well to Americans who were patriotic, and they suspended operations until the war was over and until they had gotten back again. I will ask the Senator from Washington if they are doing that now?

Mr. JONES of Washington. Some of these contracts are still in force, but most of the railroads have voluntarily—probably public opinion had a good deal to do with it—canceled those contracts, or they are not in force now. On a couple of the railroads we hope to have them abrogated and canceled by the 1st of July, but they are still in force.

Mr. NORRIS. Are they not illegal, as a matter of fact? What is the Interstate Commerce Commission doing about them?

Mr. CUMMINS. The Interstate Commerce Commission has no jurisdiction over the matter.

Mr. NORRIS. Then we ought to give them jurisdiction. We ought to give somebody jurisdiction, and declare it illegal.

Mr. CUMMINS. It is the old controversy with regard to who shall control a transportation rate that is partly by land and partly by water. None of our tribunals can control foreign ships.

Mr. NORRIS. No; but they can control the freight when it once gets into this country, whether it comes by a foreign ship or not.

Mr. CUMMINS. To be sure, and that is what we ought to do. We ought to consider the coast as the end of the journey.

Mr. JONES of Washington. As I understand, this preference on imports and exports lies within the discretion of the Interstate Commerce Commission as to whether or not it shall be granted.

Mr. CUMMINS. No.

Mr. JONES of Washington. Not by express, positive provision of law, except as the law leaves it in the discretion of the Interstate Commerce Commission.

Mr. CUMMINS. Only under that provision of the law which forbids discrimination.

Mr. JONES of Washington. The Interstate Commerce Commission, as I understand, could stop these rebates on imports and exports if they saw fit to do it. They could refuse to allow the railroads to give a preference on imports and exports.

Mr. NORRIS. If they can, I will say to the Senator, I can not conceive the frame of mind of anybody occupying a position to-day where he has a right to stop it who will permit it to go on. If they have not the right to stop it, then the fault lies here.

Mr. JONES of Washington. There has been a tremendous influence between the shipping lines of this country and foreign steamship lines in the past, and it has been very far-reaching in the country.

Mr. NORRIS. To my mind that kind of a contract is not only unpatriotic, it is disgraceful.

Mr. SIMMONS. Mr. President, I think there can be no question about the Interstate Commerce Commission having jurisdiction over these differentials allowed on imports and exports. I remember that only a year or two ago we had up the question of whether the Interstate Commerce Commission had the right to make a distinction in the export or import rate to one port as against another port. The southern ports were then complaining that they had discriminated against them and not given them the benefit of the lower rates that they had extended to imports and exports to and from New York and other North Atlantic ports, and that evil was corrected.

Mr. NORRIS. Mr. President, when I interrupted the Senator from Iowa when as a matter of fact he had the floor, and the Senator from North Dakota objected, and the Chair sustained him, I had just one question to ask him, and I will ask that now, although I think the Senator has really answered it in some things he has said.

The question that I wanted to ask the Senator, and have been kept from asking for nearly an hour, thus delaying the passage of this bill that much, was this: Does the condition that he describes about the freight rates giving preference to the importer over the American manufacturer still exist?

Mr. CUMMINS. I do not know, Mr. President. I have not examined the question for two or three years—not since the roads passed back into the hands of their owners—and I am not able to answer it. I know that it continued up to the time that the Government took possession on January 1, 1918, and so far as imports are concerned I do not know whether it is in existence now or not; but it is in existence so far as exports are concerned, as the Senator from Washington knows.

Mr. JONES of Washington. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Washington?

Mr. NORRIS. I yield to the Senator from Washington.

Mr. JONES of Washington. I have not gotten it from the commission; I have not inquired there; but I have been informed that the preferential on imports has not been put into effect since the war, and that it is not in effect now.

Mr. NORRIS. I am glad to get that information.

Mr. JONES of Washington. I am not positive that that is correct, but that is the information I have.

Mr. NORRIS. Now, Mr. President, having secured the information that I wanted to get when I tried to interrupt the Senator, I will close my remarks. Since the Senator from North Dakota left the Chamber immediately when I took the floor, he can be sent for now and told that I have quit.

Mr. ROBINSON. Mr. President, the pending question relates to the tariff on galvanized iron and certain other manufactures. The Senator from North Carolina [Mr. SIMMONS], who opened the discussion on this subject, has been very anxious to dispose of that paragraph. While he has not taken the floor and expressed himself in violent language, he has been constantly protesting to those about him the delay that has occurred while this subject has been pending, which delay comes entirely from the other side of the Chamber.

From the beginning of the debate on this bill, impatience to a degree approaching violence has been manifested by Senators directly in charge of the bill. They have repeatedly declared that proper procedure in this body requires Senators to confine themselves literally to the discussion of pending questions. So great has been the annoyance of Senators who are charged with responsibility for this bill over the delays that have heretofore occurred in the passage or disposal of items submitted to the Senate that on yesterday a caucus or conference of the majority party of the Senate was held, and at that conference, according to press reports and current information, a resolution bitterly condemning the majority Members of the Senate for absenteeism was adopted and a resolution contemplating cloture was proposed.

The New York Tribune of this date contains a statement relative to the subject of the conference which I believe is accurate. The headlines are:

SENATE TARIFF TRUANTS FACE BIG ROUND-UP—REPUBLICANS IN CONFERENCE DEMAND ABSENTEES RETURN TO CAPITAL AND HELP PASS THE MEASURE—THREATEN TO CALL SERGEANT AT ARMS—PARTY WHIP CHARGES SOME WON'T ATTEND ROLL CALLS OR ANSWER TELEPHONES.

The press story from the Tribune's Washington bureau in part is as follows:

WASHINGTON, May 25.—Troubles of the Senate Republican leaders who are intent upon passing the tariff bill came to a head to-day in a conference of Republican Senators. The conference was called especially for the purpose of considering absenteeism of Republican Members who, as Senator CURTIS, Republican whip, says, have come to a state where they not only do not appear at roll calls but will not even answer the telephone when summoned to the Senate.

The conference adopted a resolution by Senator CURTIS against absenteeism, instructing the chairman, Senator LODGE, to summon absentees back to Washington, and in favor of having the Sergeant at Arms compel attendance of absentees who fail or refuse to report for duty.

Senator KELLOGG also introduced a new cloture rule intended to apply drastic cloture to appropriation and revenue bills. This was discussed but not acted on.

Senator CURTIS, Republican whip, lectured his colleagues sharply about absenteeism. He said that from May 15 to May 20, on an average of 30 Republican Senators were absent at each roll call. On one day 49 were absent at each of two roll calls and 50 at another. He urged the necessity of maintaining a good attendance if the tariff bill is to be passed and other needed legislation enacted. Senator MCCUMBER, in charge of the tariff bill, joined in condemning absenteeism.

Then follows the resolution, which with the permission of the Senate I will have inserted in the RECORD.

In a subsequent portion of the article the Senator from North Dakota is reported as saying:

"Not one word in fifty uttered on the floor had direct relation to the particular tariff items under consideration.". He said, however, the Republicans, not the Democrats, were responsible for the passage of the tariff bill.

"All that we are asking is to stick to our text," said Senator MCCUMBER.

He expressed regret that the rooms leading from the Senate chamber had been made so comfortable as to influence Senators to leave the chamber and stay in those rooms reading the newspapers rather than in the Senate.

Senator UNDERWOOD, Democratic leader, denied there was a filibuster. He said debate could not be limited to the absolute details of an item under consideration and asserted that there was ample opportunity to filibuster if the Democratic Senators desired. He said there were 2,000 amendments to the tariff bill, that a quorum call and a roll call could be forced on each one and calculated that 2,000 hours, or 200 days,

could be consumed in roll calls if the Democrats wanted to do it. He said there was no such purpose and all that the Democrats would insist on was a thorough discussion.

Mr. President, the indictment of majority Senators in the resolution adopted by the conference and by the Republican whip in his statement at the conference yesterday is, when given its natural force and effect, an indictment against the pending bill. It shows that Senators who belong to the majority have so little faith in its provisions that they are not willing to furnish a quorum to make possible its prompt consideration and passage.

The debates which have occurred this morning unquestionably disclose that in the consideration of a bill involving 2,000 or more amendments, all intimately related to one general subject, it is a mental impossibility intelligently to confine the discussion to the immediate, pending question. Notwithstanding the fact that the Senator from North Carolina [Mr. SIMMONS], who, in a sense, has charge of paragraph 309 on this side of the Chamber, has been ready for a vote on this particular item for two hours, the vote has been deferred by a debate on general questions, by discussions of the relation of freight rates to the tariff and other kindred questions, and that debate has come almost entirely from the other side of the Chamber.

If we on this side felt the same irritation and annoyance which characterizes those who advocate the bill, we would be justified in describing the course of the debate this morning as a filibuster. It had no more relation to the question immediately before the Senate than many other discussions which have heretofore occurred at the instance of Members of the minority. But in fairness and in good faith, I must say that the debates which have occurred this morning have been illuminating.

If the Senator from North Dakota [Mr. MCCUMBER] was correct in his characterization of the debates heretofore as filibusters, I ask him how he characterizes his own conduct this morning when he spoke at great length in reply to the Senator from Iowa [Mr. CUMMINS] on general topics, rather than on the pending paragraph.

Mr. SIMMONS. I want to call the attention of the Senator to the fact that the debate we had here yesterday, which they complained of as delaying action for about two hours, was precipitated by the Senator from North Dakota.

Mr. ROBINSON. Which means that by some mysterious mental process the Senator from North Dakota and others associated with him in the conduct of the bill before the Senate assume to themselves a right in the advocacy of the legislation which they deny to those who oppose the bill.

This one fact stands out before the country, before every man in Washington representing the press of the Nation in these debates, that the bill as a whole does not command the respect, the confidence, or the good-faith support of the majority Members of the Senate; that they are so indifferent to it that they are unwilling to attend, even when the party whip is lashed above their backs.

The Senator from Idaho [Mr. BORAH] some weeks ago expressed his dissatisfaction with the bill because the committee report is not accompanied by sufficient information. The same attitude on the part of the Senator from Wisconsin [Mr. LA FOLLETTE] may be inferred from his votes.

The debate this morning discloses that great Senators on the other side of the Chamber, Senators like the Senator from Iowa [Mr. CUMMINS] and the Senator from Nebraska [Mr. NORRIS], are in doubt as to the value of the bill; and I have not the slightest doubt that a large number of other Senators would occupy the same attitude if they chose to give attention to the proceedings of the Senate, wherein the iniquities of this bill are being disclosed and made apparent to everyone who has sufficient intelligence to comprehend them.

The attitude of these Senators may be assumed to be fairly definitive and expressive of the position of all those Senators who think so little of the pending bill in its relation to the business and to the people of the country that they are unwilling to stay here and help work out the problems which it involves.

In addition to that, the abandonment of any effort at cloture and the resort to processes of debate upon the other side which have heretofore been characterized as filibustering disclose the fact that if this bill is intelligently discussed by the Senate, and if what it contains is made known to the public, it will not become a law in anything like the form in which the Finance Committee has presented it.

I reveal no secret when I say that Senators prominent in the management of the tariff bill before the Senate now, Senators in the Chamber at present, familiar with tariff history, connected with the passage of many important measures relating to the tariff, at heart in fact know that many of the proposed increases in tariff rates embodied in the report of the Finance Committee are unconscionable, unreasonable, and unjust.

With that condition existing, no one participates from the other side of the Chamber in the debates on the bill except the Senator from North Dakota [Mr. MCCUMBER] and the Senator from Utah [Mr. SMOOT]. Other Senators take part only when the items which affect the industries in their own States are involved. The mass of Republican Senators are disgusted, wearied, and unable to find justification for the enormous burdens of taxation which the Finance Committee's report contemplates. They take no part and make no effort to vindicate this outrageous, inexcusable, indefensible effort to impose high tariff rates at a time when there is less justification for tariff walls and artificial barriers to restrict and prevent the expansion of American commerce than at any other period in the history of the country. The Senators on the other side sit idly by and leave to two Senators the explanation of items which they do not understand—the vindication of rates which have received criticism from the most conservative business interests of the country.

This is the first time during the six weeks this bill has been before the Senate that I have done other than address myself to the paragraph immediately under consideration. In no instance heretofore has the necessity presented itself to me to consume the time of the State in discussing other than the pending question; but I affirm that the debates on the whole have been wholesome and enlightening, and they have revealed the fact that the proponents of this measure, the Senate Finance Committee, either know little about it or are unwilling or unable to furnish the Senate and the country accurate and detailed information concerning its most important provisions.

No wonder they talked about cloture. It is not surprising that the majority thought of limiting debate on the bill, its provisions being unjustifiable even from the standpoint of a large number of the majority Senators; it is not surprising that impatience to the point of irritation should be manifested by those charged with the responsibility of carrying out the will of the Republican Party. No wonder there should be talk of cloture, of stifling the voice of the American people in protest against the highest tariff rates, on the whole, ever proposed in the economic history of the country. But with Republican Senators unwilling to attend, out of sympathy with the bill, taking no part in its consideration, secreting themselves, as the Senator from Kansas is quoted as saying, when called by telephone to help make a quorum, it is no wonder that all thought of a cloture should be abandoned and the friends of the bill themselves be driven at once to an apparent effort to delay its consideration.

With the minority seeking a prompt vote on the pending paragraph, the majority Senators are discussing general topics, failing to "stick to their text," as the Senator from North Dakota is reported to have characterized it in yesterday's conference. We are now confronted with a change of attitude. This morning general debate, discussion of freight rates, ocean transportation, rail transportation, and kindred subjects, which naturally and logically are related and inseparably related to the question affecting the justice or the injustice, the reasonableness or the excessiveness of the tariff sought to be imposed, are taking the time of the Senate away from the tariff and away from the paragraph immediately under consideration.

I know it may be said that in making these remarks I myself have departed from the rule which I have heretofore pursued, namely, confining myself to a discussion of the question immediately pending, but in justification I say that the conduct of the chairman of the committee in charge of the bill and others on the other side of the Chamber this morning shows the mental and moral impossibility of confining discussion while considering this bill to a single item with no regard to those provisions related to it.

Mr. President, I ask permission to have inserted in the RECORD the article from which I quoted in part, namely, that article in the New York Tribune of May 26 relating to the majority conference.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Tribune, Friday, May 26, 1922.]

SENATE TARIFF TRUANTS FACE BIG ROUND-UP—REPUBLICANS IN CONFERENCE DEMAND ABSENTEES RETURN TO CAPITAL AND HELP PASS THE MEASURE—THREATEN TO CALL SERGEANT AT ARMS—PARTY WHIP CHARGES SOME WON'T ATTEND ROLL CALLS OR ANSWER TELEPHONES.

(From the Tribune's Washington Bureau.)

WASHINGTON, May 25.—Troubles of the Senate Republican leaders who are intent upon passing the tariff bill came to a head to-day in a conference of Republican Senators. The conference was called especially for the purpose of considering absenteeism of Republican Mem-

bers who, as Senator CURTIS, Republican whip, says, have come to a state where they not only do not appear at roll calls, but will not even answer the telephone when summoned to the Senate.

The conference adopted a resolution by Senator CURTIS against absenteeism, instructing the chairman, Senator LODGE, to summon absentees back to Washington, and in favor of having the Sergeant at Arms compel attendance of absentees who fail or refuse to report for duty.

NEW CLOTURE RULE DISCUSSED.

Senator KELLOGG also introduced a new cloture rule intended to apply drastic cloture to appropriation and revenue bills. This was discussed, but not acted on.

Senator CURTIS, Republican whip, lectured his colleagues sharply about absenteeism. He said that from May 15 to May 25 an average of 30 Republican Senators were absent at each roll call. On one day 49 were absent at each of two roll calls and 50 at another. He urged the necessity of maintaining a good attendance if the tariff bill is to be passed and other needed legislation enacted. Senator MCCUMBER, in charge of the tariff bill, joined in condemning absenteeism.

The following resolution was submitted by Senator CURTIS and adopted:

"Whereas the Republicans have a membership of 60 in the United States Senate, which gives them a majority of 24 in the Senate; and

"Whereas there is and has been a much larger absenteeism than is justified under existing circumstances, and it is important that all Senators whose health will permit should be present at all sessions of the Senate: Therefore be it

"*Resolved by this conference of Republican Senators*, That it is the sense of this conference that the chairman be, and he is hereby, instructed to notify all Republican Senators who are absent from Washington and those who are in the city but have been missing roll calls of the Senate that it is important that absentees at once return to their duties, and that those who are in the city be requested to remain within call of the Senate during its sessions; be it further

"*Resolved*, That if the absentees fail or refuse to report for duty at once, proper steps be taken to have the Sergeant at Arms of the Senate compel the attendance of such Senators."

After the matter of absenteeism had been thrashed over, Senator KELLOGG, acting for a group of Republicans who recently conferred at the instance of Senator TOWNSEND, introduced the resolution for cloture on appropriation and revenue bills.

SIXTEEN COULD ENFORCE CLOTURE.

The proposed rule provides that any time after a revenue bill or an appropriation bill has been before the Senate five calendar days, 16 Senators may offer a motion to limit debate. This would prevail by vote of a majority. Thereafter no Senator would be entitled to speak more than 1 hour on the bill or more than 10 minutes on any amendment or debatable motion affecting the bill.

The conference did not get far on the discussion of this proposed rule and then adjourned until to-morrow.

After the Senate opened Senator HARRISON stirred up a discussion of absenteeism and of cloture in connection with the tariff bill. He appealed to Republican Senators "to stay in their seats and help pass this bill." He declared if this were done there would be no occasion for cloture.

Senator LENROOT inquired how long it would take to pass the tariff bill at the present rate of procedure.

"If it took a hundred years," said Senator HARRISON, "it would be a good thing, because if ever a bill will increase the burden on the backs of the people it is the iniquitous tariff measure now before the Senate."

Senator HARRISON denied there was a Democratic filibuster and said he did not wonder that the Republicans were seeking cloture "to force this bill through without debate."

Senator CURTIS said there had been more absenteeism on the Democratic side than on the Republican.

Senator MCCUMBER said "not one word in fifty uttered on the floor" had direct relation to the particular tariff items under consideration. He said, however, the Republicans, not the Democrats, were responsible for the passage of the tariff bill.

"All we are asking is to stick to our text," said Senator MCCUMBER.

He expressed regret that the rooms leading from the Senate Chamber had been made so comfortable as to influence Senators to leave the Chamber and stay in those rooms reading the newspapers rather than in the Senate.

Senator UNDERWOOD, Democratic leader, denied there was a filibuster. He said debate could not be limited to the absolute details of an item under consideration and asserted that there was ample opportunity to filibuster if the Democratic Senators desired. He said there were 2,000 amendments to the tariff bill, that a quorum call and a roll call could be forced on each one, and calculated that 2,000 hours, or 200 days, could be consumed in roll calls if the Democrats wanted to do it. He said there was no such purpose and all that the Democrats would insist on was a thorough discussion.

Mr. WALSH of Massachusetts. Mr. President, the indifference of the majority toward the bill as pointed out by the Senator from Arkansas can be explained. The majority are hearing from home. They are receiving letters, and the letters and the resolutions which they are receiving are like those introduced the other day by the Senator from Nebraska [Mr. HITCHCOCK]. They are receiving letters from home tending to prove the Democratic contention here that this bill is going to increase the cost of living, and that this bill is going to continue high prices in this country.

I have before me a letter from one of the leading wholesale and retail clothing merchants in the city of Boston. It is a letter similar to many others which I have received. I did not think it was possible for the Democrats to prove conclusively, before the bill went into operation, what the effect of it was going to be upon prices in this country, but here is a letter from a merchant, not a statistician, not a theorist, not a Treasury expert, but a hard-headed business man, who states what is already happening in regard to the increased price of clothing as the result of the tariff agitation.

The letter is from the Leopold Morse Co., written by Mr. Julius C. Morse, of Boston. Mr. Leopold Morse, who was the founder of this firm, was at one time a Member of Congress. Mr. Morse says:

LEOPOLD MORSE CO.,
Boston, May 25, 1922.

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SIR: About six months ago Attorney General Daugherty started an investigation on retail prices throughout the country, and the National Association of Retail Clothiers, numbering about 6,000, of which I happen to be vice president, were very much exercised over the reports that were sent out stating that the retailer was to blame for high prices in existence, and that he should be investigated, as there might be evidence of profiteering.

Financial statements showing the retail business during the year of 1921, of course, went a great way to prove that this was a fallacy, and that the retailers were suffering from a loss of sales and a lower gross and net profit.

Even under these conditions, however, in order to meet the consumers' demand for lower-priced clothing, the retailers have done everything in their power to make prices more attractive, yet the public still demands a further reduction, and as a result the retail clothing business throughout this country is not in a good condition.

I should say offhand that the price of clothing is about 1.65 over pre-war prices, and at this mark the profit is very small and almost at the danger point. Doing a wholesale business as well as a retail business, we find that where retailers sell their clothing at a close mark collections are slow and failures have increased.

However, this is not the point of this letter. Owing to the agitation relative to the high tariff on wool and the embargo caused by the emergency tariff, cloths have risen by leaps and bounds within the last 60 days, and although the mills made very attractive prices when showing their goods the 1st of March, yet to-day we are obliged to pay all the way from 25 cents to 50 cents per yard more on the prices made by the mills when they opened their lines for fall during the month of March.

In consideration of the fact that it takes about 3½ yards of cloth to make a suit of clothes, you can readily see that there is an advance to-day of from $1 to $2 per suit on the cost of the cloth alone, caused by this advance, and I really feel that unless careful attention is paid to the tariff on wool that the retail consumer, instead of being able to get clothing for less than the fall of 1922 over the fall of 1921, will perhaps be obliged to pay the same price, if not more, because the reduction in labor has hardly overcome the advance in the price of cloth.

I am not an advocate for low tariffs and for the importation of foreign cloths and clothing, but feel that the situation as it confronts us to-day is very serious on account of the fact of the steadily rising price on one side and the consumers' demand for lower prices on the other.

With best regards to you, I remain,
Very truly yours,

JULIUS C. MORSE.

Mr. Morse is vice president of the National Association of Retail Clothiers, an organization comprised of 6,000 members.

Now we can understand why there is indifference on the part of the majority toward this bill. For one letter in favor of high tariff rates I have received five from the merchants and manufacturers of my State protesting against the various rates named in the bill.

Hardly a word has been said on the floor of the Senate during the debate upon the other side of the Chamber in regard to the rights of the consumers of the country. While we have been crying out to deflate war prices, while our people have been anxiously waiting to see the prices of the necessities of life come down, they have seen their wages come down—we have seen in the New England mills the wages reduced from 40 to 60 per cent—and now we have presented here a tariff bill which proposes to keep up excessive war prices, and, in some instances, to increase the war prices.

At the very time wages are being cut we are preparing to levy tariff duties that will increase the prices of those commodities our working people must have in order to exist.

Does anyone wonder that there is indifference? The sentiment that is being reflected in letters like the one which I have read must be reaching the Members on the other side of the Chamber, and they must be beginning to realize that the consuming public of the country are no longer interested in high tariff duties for a few industries when it means extortion from the consumers, when it means that though the laboring man may appear to receive a good wage, it is going to cost him twice as much to live as when he had a low wage. Our laboring people are possessed of intelligence, and they can not longer be fooled by a system that makes their cost of living disproportionate to their wage.

Mr. President, let us hear more about the consumer. Let us hear more about how these rates will be reflected in prices after the bill is passed and to what extent the burdens of this tariff bill are to be passed over to the consumer.

The principal trouble with the bill is that when the committee began to draft the chemical schedules and the schedules upon other raw materials they made a rate about 3 feet high instead of about 1 foot high, and they have builded up compensatory rate after rate, until a price level will be reached on the finished product that will require the consumers who buy the finished

manufactured product to pay even higher prices than during the war period.

Mr. President, I hope before we finish the debate we shall give some consideration to letters of the character which I have just read, which show that already the prices are beginning to increase and already the effect of the rates named in the bill is being reflected by demands upon the consuming public for increased prices for clothing. But the same story will be repeated when we come to the other schedules in this bill, particularly food and other necessaries of life.

Mr. UNDERWOOD. Mr. President, this morning we had quite an illuminating debate between two veteran Senators on the Republican side of the Chamber representing great agricultural States. From the general principles which they defined one would believe that the guiding star which would shape their course in the building of tariff legislation would be reasonable competition at the customhouse.

The distinguished Senator from North Dakota [Mr. McCUMBER], in charge of the bill, has repeatedly said in the course of the debate, and he repeated the statement this morning that he did not believe in the enactment of tariff rates that would cut off competition at the customhouse, but that he believed that a reasonable amount of imports should be allowed to come into the country, from which the Government could derive revenue. Mr. President, that was not a free-trade speech, but approached very closely to a speech that might be made by one who favored a tariff which was levied primarily for revenue. The Senator from Iowa [Mr. CUMMINS] this morning repeated, to a large extent, the same assertion, that he was not in favor of a prohibitive tariff, that he wanted some competition at the customhouse, and that, although he desired to follow the committee, he expected to exercise his own individual judgment. However, although the Senator from Iowa stated to the Senate that he was better informed on the iron and steel schedule than on any other schedule of the bill, he refused to say that he would vote against the rates in that schedule now presented by the committee to the Senate.

Mr. President, when I sat in my seat this morning and listened to the discussion, I drifted back in memory to more than a dozen years ago, when I saw the able Senator from Iowa stand side by side with the late lamented Senator Dolliver from Iowa and denounce the prohibitory duties in the Payne-Aldrich bill and back up his denunciation with his vote; and I could but question in my own mind as to where the senior Senator from Iowa of 12 years ago had disappeared when he is willing to-day to advocate the principle but bow in humble submission to the prohibitive rates in this bill, and especially in the iron and steel schedule, which he announced to the Senate he knew more about than he did about anything else in the bill.

Mr. President, I do not believe that the agricultural masses of the people are going to stand for a tariff bill which proposes to put prohibitive taxes on the raw materials from which their plows, their trace chains, their agricultural implements, in fact, practically all of iron and steel products which they use are made and to mulct them in heavy taxes for the benefit of somebody else. I do not believe that anybody is going to be able to fool the farmer of the Middle West about this tariff bill.

Ten years ago when the present law was written I realized then, as I realize now, that as to the heavy commodities in the iron and steel schedule the great American industry was full grown and could fight in the markets of the world its own battles. We are the master iron makers of the world, and I may say of all time.

In framing the act of 1913 I put some of the articles embraced in these paragraphs on the free list. There was but one reason why the remainder of them did not follow, and that was that I realized the tariff house had been built on stilts and that it had been on stilts for so many years if I had brought it down by cutting the timber from underneath with an ax and letting it drop I might shock the business sentiment of the American people and force a reaction on what I intended to do. Therefore I attempted to reduce these rates by lowering the tariff with a jackscrew, hoping that time would justify the course I had taken and that at a later date the entire list of heavy iron and steel commodities and other similar articles covered by the the bill might be put on the free list, when the people of America might understand that this country could get along without tariffs on everything, and that the American consumer could not be mulcted behind a tariff wall.

Now we have come to these paragraphs. Under the peculiar parliamentary conditions under which the bill is being now considered, when according to the unanimous-consent agreement only committee amendments may be considered, it is practically impossible to move an amendment that will cover the subject correctly, but that will be done in the end. However, I want to put the acid test right now to those Senators who occupy the position announced on the floor of the Senate this morning by the distinguished chairman of the Finance Committee [Mr. McCUMBER] and also by the Senator from Iowa [Mr. CUMMINS] that they believe in writing a tariff bill that is competitive at the customhouse. The Senator from Iowa said he regretted that I had abandoned that position. I have not abandoned it. A revenue tariff bill must be competitive. A tariff for revenue bill must imply reasonable competition at the customhouse, because if there is not reasonable competition in goods coming through there can not be reasonable revenue raised. I do not mean by competition at the customhouse that one tin can should be allowed to come through the customhouse when 100,000,000 tin cans are manufactured behind the tariff wall. I contend that no competition is reasonable as a basis for taxation unless at least 3 per cent, 5 per cent, or 10 per cent of foreign imports are allowed to come into the country. Any industry that can not stand 3 per cent of competition from abroad, or pretends it can not stand 3 per cent or 5 per cent of competition from abroad, in order that the Government may receive revenue and that there may be some imports coming in to adjust prices is an industry which is demanding monopoly for itself. There is no escape from that conclusion.

I will not take the time of the Senate to go through all of these items. I discussed pig iron last night with the distinguished chairman of the committee, and at that time he admitted that there was practically no pig iron coming into the country, and none would come in. He admitted also that we were the masters of the world in the production of pig iron. The same thing is true of all the heavier grades of steel and iron products.

However, I wish to call the attention of the Senate and the country to one paragraph embracing certain heavy iron and steel products. The Finance Committee have recommended that the rates on the products referred to be largely increased over those in the present law, and I want to know how the rates in this paragraph square with the declarations of the chairman of the committee in favor of reasonable competition at the customhouse and reasonable imports.

Take the paragraph that relates to iron and steel sheet plates. They constitute one of the important items of so-called raw material in the iron and steel schedule. They constitute the base material out of which plows are made, the base material out of which wagons are manufactured, the base material out of which ships are constructed, the base material out of which are built the freight cars for carrying the commodities of the country to market, the base material for almost everything found in the blacksmith shop, and the base material even for the iron roofs of our houses. On these commodities the schedule is built.

We find that the committee has largely increased the rates on iron and steel plates, and yet in 1920 under the lower rates of the present law—and the same thing is relatively true of other years, but I take 1920 for convenience—the production of plates and sheets covered by the paragraph to which I am now referring amounted to 9,337,680 gross tons. Please bear in mind the fact that 9,337,680 gross tons was what the mills of America produced and it was consumed either here or abroad. Now, what did the imports amount to for that year—the year 1920? They are given in pounds. I presume the man who prepared these figures was ashamed to give them in tons and so he gave them in pounds. He gives the imports in pounds for 1920 as 58,620, which reduced to gross tons is less than 29 gross tons. Think of it! Twenty-nine gross tons of imports as compared to over 9,000,000 tons of production! And in the same year we exported to foreign markets 2,062,947,743 pounds of sheets and plates, which, reduced to tons, is something like 1,000,000 gross tons. We produced over 9,000,000 gross tons of sheets and plates. We exported and sold in the open markets of the world over 1,000,000 gross tons of sheets and plates, and the imports amounted to 29 tons—29 tons—and on the basis of that, when the paragraph itself was pending before the Senate, the chairman of this committee announced that he was in favor, not of levying a prohibitive tariff at the customhouse, but of levying rates that would allow some importation to come through. Twenty-nine tons, under those circumstances, is not much—some importation!

Mr. FLETCHER. Mr. President, if I may interrupt the Senator, what is the rate under the Underwood law under which 29 tons came in?

Mr. UNDERWOOD. The rate at that time was 12 per cent ad valorem.

Mr. FLETCHER. And what is the proposed rate?

Mr. UNDERWOOD. They increase it by making it a specific rate from a cent a pound up to 20 per cent ad valorem.

Mr. FLETCHER. A cent a pound would be equivalent to how much?

Mr. UNDERWOOD. It is a higher rate than the 12 per cent ad valorem, and then they go up to 20 per cent ad valorem, in the open face of the declaration that the Senator stands for a tariff that will admit importations at the customhouse; and the distinguished Senator from Iowa [Mr. CUMMINS], who knows this schedule better than any other in the bill, is not in favor of a prohibitive tariff, and yet would not announce that he would vote against that paragraph, and did not. It has already been agreed to by the Senate.

Mr. President, the truth about the matter is this: I have had to fight this question out a good many times. For many years I represented an iron and steel constituency. I am in the business myself. As I said before, I would not willingly harm a people that I represented; but neither would I willingly betray a people that I represented by taxing them unjustly for special interests. I know this schedule and I know that that rate is a shame and a fraud on the American people. I know that it is not in the interest of this great industry in the end. It is very much better for this great industry to take the shackles of a tariff off its limbs. It is able to compete in the world by free competition. Let it sell to the mills at home, to the blacksmith, the carriage maker, the roof maker, at reasonable profits and develop a home market for its own products, and stand a giant in the world rather than being wet-nursed in a baby's crib when it is a full-grown industry.

Why, Mr. President, this idle talk about the labor involved in this schedule is as ancient as the grave. Thirty, forty, fifty years ago, when men stood with their brawny arms and handled the slabs and the billets as they went through the rolls, reducing them to plates or bars, the question of labor might be involved; but that argument will not appeal to a man to-day who goes to a modern mill and sees the whole machinery worked by steam or electricity—and the modern mill is worked by electricity—with one man sitting in the roof with his levers in his hands and sees the great ingots that roll out and go into one roll after another, untouched by human hands, entirely handled by machinery controlled by a man sitting in a lofty roof, until they come out in the form of plates for shipbuilding or steel rails to carry your freight on. Labor has become infinitesimal in this problem. The question really involved is that of the cost of the plant, the capital cost, the interest you must pay on capital for this production; and it is absurd to tell me now that in America, with all the gold in the world, with all the securities in the world, with the world begging on bended knees at our doors for the loan of money, we have to protect American manufacturers because they can not secure as cheap capital in America as they can secure abroad.

Take the very paragraph that I am talking about. The report of the Tariff Commission, which I hold in my hand, shows that in addition to the exports of iron and steel plates that I read awhile ago there were 72,000,000 pounds exported to Japan, Canada, and the United Kingdom—to the United Kingdom! We have been carrying coal to Newcastle, sheets and plates to Great Britain, to compete with the British mills; and then the Committee on Finance thinks it must raise an ad valorem rate from 12 per cent ad valorem to 20 per cent ad valorem! I suppose that is for the sake of raising revenue on 29 tons imported.

No, Mr. President; nobody is going to be fooled about this proposition. I do not reflect on my colleagues or intend to reflect on them when I say that I have not a fair jury to which to argue this case. It is not that your minds can not be convinced on this proposition, and not that your minds are not convinced on it; but I know how a tariff bill is written. Some of your constituents expect that you will get rates on certain products for them. Some of those rates may be justified and some may not; but in order that you can get what you want you have gotten aboard the tariff ship and are going to ride through with it, regardless of cost. If this were the only paragraph presented to the Senate at this hour I would have no more doubt that 90 per cent of the Senate would reject the paragraph than that I am speaking here; but it is in the bill and it must ride through.

They talk about German competition. As I pointed out last night, the raw material of Germany is destroyed. This is not a question of labor, because in the case of these great, heavy iron and steel products it is machinery that does the work now. The labor cost is infinitesimal; and Germany, without raw material in iron and coal, is out of the world's market as a competitor of America. So, Mr. President, I am only referring to one of these paragraphs. There are 10 or 15 of them where the same argument that I have made for sheets and plates can apply with equal force.

It is idle, however, for me to talk. I realize that in the Senate I am going up against a jury that has made up its mind. The verdict has been written; but I am taking your time because there is a court to which I can appeal. This injustice will not remain on the statute books of America unless you modify your position so that you do not construe a protective tariff to mean a prohibitive tariff, written in the interest of monopoly.

Mr. McCUMBER. Mr. President, I apologize to the Senator from Arkansas for having deviated from my usual course and what I have been preaching for some time by taking three minutes to answer the Senator from Iowa. I admit that I got off the track of holding close every minute to the particular subject.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. McCUMBER. Certainly.

Mr. ROBINSON. The Senator, like a good many other Senators when they address the Senate, evidently was unconscious of the passing of time. Instead of taking 3 minutes he actually took 30 minutes or more. I find no fault with the Senator's doing that, because, as I said during the course of my remarks, his discussion was illuminating but not convincing.

Mr. McCUMBER. I will increase it to 5 minutes if the Senator wants me to, but not to 30 minutes.

Mr. President, I realize that I ought to be a shining example of brevity in what I may say, but also a shining example of never crossing a bridge until you come to it. The Senator from Alabama has taken considerable of the time this morning in discussing the same subject that he discussed yesterday, and making many of the assertions that he made yesterday, with the usual force with which the Senator makes those assertions; but I am going to invite the Senator now to go right back to the real subject under discussion. We have offered an amendment to the House bill, on the bottom of page 55, line 25, to strike out the figures "28" and to insert in lieu thereof the figures "30," a difference of 2 cents.

This covers "sheets or plates composed of iron, steel, copper, nickel, or other metal with layers of other metal or metals imposed thereon by forging, hammering, rolling, or welding," and, as we would have it, it would be 30 per cent ad valorem. As the House wrote it, it was 28 per cent ad valorem.

Mr. UNDERWOOD. Will the Senator let me ask him if the present law, which he is now proposing to change, does not make the rate 15 per cent?

Mr. McCUMBER. I was just going to state that. That is exactly what it does. The Senator's whole argument seemed to indicate that where the importations were small there should be no duty whatever levied. One would draw that from the arguments he makes day after day, that we do not need the protection, and why, then, raise this duty? I am going to answer that part of the Senator's argument.

Mr. UNDERWOOD. I hope the Senator will.

Mr. McCUMBER. I shall do so.

Mr. UNDERWOOD. But I hope the Senator will bear in mind, at the time he is answering it, that the present rate was written at the other end of the Capitol by a committee of which I was chairman, and my committee put a rate of 15 per cent ad valorem on this article, which was agreed to by the Senate, which does not indicate that I thought it all ought to be cut off. I am free to say now that I think the rate was too high, but knowing that there are practically no importations even with the present low rate I am challenging the Senator to know why you are doubling the rate. That is the real issue.

Mr. McCUMBER. First, the importations are about the same; they are very small, anyway. I could ask the Senator why he put a rate of 15 per cent ad valorem on this article. We did not make any in the United States. Every pound of it was imported. It was not in competition with anything in this country. It is not in competition to-day with anything we produce. Why did the Senator from Alabama put 15 per cent ad valorem duty upon an article which we do not produce at all in the United States?

Mr. UNDERWOOD rose.

Mr. McCUMBER. I know what the Senator's answer will be—that it was for revenue purposes.

Mr. UNDERWOOD. Of course, Mr. President, this particular item is not the one I was discussing a moment ago; but we reduced the rate on this particular item, if I remember correctly, from that of the Payne-Aldrich law by more than a half. This is a basic material out of which many important things are made which the American people must consume. Why should I not have reduced the rate on the basic material and allow the other manufactories the benefit of a lower rate? I said a

while ago that I thought most of these heavy materials of iron and steel should be put on the free list for the benefit of the small industries, but I believe in approaching it gradually and not with an ax.

Mr. McCUMBER. But I am speaking of this particular item. The Senator put upon this particular item a duty of 15 per cent ad valorem in his bill. He put it upon that article for revenue. He wanted a 15 per cent duty upon that item for revenue only, at a time when we were operating the Government at a cost of less than a billion dollars a year. We double that duty at a time when the annual expenses of the Government are more than four and a half billion dollars a year. We have to get revenue. You can not appropriate four and a half billion dollars in the year 1922 unless you provide some means to get the money to pay it, and you have to increase many of the revenue rates in order to secure the necessary revenue.

What are these articles? They are articles which are used, as I stated before, to make the molds in which chocolates and chocolate candies are made. They are all imported. When you get one of those it lasts a lifetime. It is used for that purpose, and only in a very limited degree. It is not manufactured in the United States. I think the chocolate maker and the candy maker are probably getting a sufficient profit to enable them to pay the 15 per cent ad valorem duty once in a lifetime upon this little article.

That is all there is to that item. I will discuss the other items in the schedule when we reach them, but I do not want to waste the time to do it now. The question is, Should this rate be 30 per cent ad valorem or 15 per cent, or somewhere between the two? I am asking the Senate to support the committee upon the ground that there will be just as much imported whether it is 15 per cent ad valorem or 30 per cent or 40 per cent or 50 per cent, because we do not produce it in the United States, and it is not going to add a penny to the cost of chocolate or of some chocolate candies.

Mr. UNDERWOOD. Mr. President, I congratulate my friend from North Dakota on being a very artful dodger. With all due respect to him, and in a kindly spirit, I attempted to indict his position on these heavy materials of iron and steel.

Mr. McCUMBER. If the Senator will allow me, I told him that I would answer him when we come to those, but I am not going to take the time now.

Mr. UNDERWOOD. I am going to let the RECORD show where we stand. Of course we can not now offer amendments as to the heavier articles under the rule adopted by the Senate. Although we had a paragraph pending before us, and have now, which relates to a great many heavy articles, there is one section of that paragraph which relates to some materials of which very little, if any, is made in the United States. This paragraph as a whole is before the Senate, because you can not consider the bill just on the items which do not affect the people, you have to consider it on its entire contents, and I will read the paragraph.

Mr. McCUMBER. Will the Senator allow me to ask him a question in all good faith?

Mr. UNDERWOOD. Certainly.

Mr. McCUMBER. As I understand the Senator, he intends to offer an amendment to that paragraph at the time when individual amendments can be received.

Mr. UNDERWOOD. I will, if the Senator in charge of the bill on this side does not. I presume he will, and I will vote for his amendment.

Mr. McCUMBER. I was going to say that when the Senator offers that amendment he will then explain it, and at that time he will make the same argument he would make now, and I would probably make substantially the same answer I would make now if I were going to make it now, and thus we would have made it twice. I think that excuses me for not attempting to go into it at this time.

Mr. UNDERWOOD. The Senator, of course, can elect how he will argue. I am going to show that he said he would answer the question by applying his debate to the pending item. I want the RECORD to show that he does not answer the indictment I bring against his committee in reference to this iron and steel schedule.

Paragraph 309, now under consideration, reads:

> All iron or steel sheets, plates, bars, and rods, and all hoop, band, or scroll iron or steel, excepting what are known commercially as tin plates, terneplates, and taggers tin, when galvanized or coated with zinc, spelter, or other metals, or any alloy of those metals, shall pay two-tenths of 1 cent per pound more duty than if the same was not so galvanized or coated.

That is an increase in rate over the present law, which provides a tax of 15 per cent ad valorem, increasing the general schedule, just as in the case of the schedule I referred to a half an hour ago. The same thing applies to this schedule. We make those products in this country. We make them in vast quantities. In 1920 we manufactured 4,582,547 gross tons and we imported 217,621 pounds, or about 109 tons, as compared to 4,500,000 tons.

We exported in 1920 of iron plates and sheets 72,000,000 pounds and of steel sheets 379,000,000 pounds. So that the proposition on the general paragraph is just as it was on the paragraph I referred to about plates and sheets. The rate is practically prohibitive now. Instead of being raised, it should be reduced; but the Senator, in reporting this bill, has raised the rate in this paragraph. That is done because in the latter part of the paragraph there is a provision that "sheets or plates composed of iron, steel, copper, nickel, or other metal with layers of other metal or metals imposed thereon by forging, hammering, rolling, or welding, 30 per cent ad valorem." Because practically none of that is made here he would leave the impression that the entire paragraph was no tax on the American people.

That is no answer to the indictment I bring against the Finance Committee; and what I say is with entire respect to Senators on the other side. I do say that in the tribunal of public opinion the Finance Committee must stand indicted before the conscience of the American people when they attempt to largely increase the rates on the great, heavy products of the iron and steel schedule, when the present rates of duty are practically prohibitive, when there is no labor cost involved, and the American producer has a monopoly of the American market to-day.

I say that is a political indictment. I feel that I am entirely justified in making that statement, and although the Senator may not feel that this is the time for him to answer the indictment I bring as to the rates on these heavy products, he does not pass away from it by referring to the simple item that is to be voted on in a moment. What I am charging is that you have a dozen paragraphs here covering heavy iron and steel commodities in which you are not justified in any way in raising the rates, and I intend to continue the pronouncement of this indictment until the American people understand what you are doing, or you justify your position far better than you have done up to this time.

Mr. McCUMBER. I wish the Senator would quit trying me on his indictment until the case is called on the calendar, when I will have an opportunity to answer.

Mr. UNDERWOOD. The Senator can answer in his own time.

The VICE PRESIDENT. The question is on agreeing to the committee amendment, on page 55, line 25, to strike out "28" and insert "30" before the words "per cent."

Mr. UNDERWOOD. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. MOSES (when Mr. KEYES's name was called). I am authorized by my colleague [Mr. KEYES], who is absent because of illness, to state that if present he would vote "yea" on this amendment.

Mr. NEW (when his name was called). Transferring my pair with the junior Senator from Tennessee [Mr. McKELLAR] to the junior Senator from Pennsylvania [Mr. PEPPER], I vote "yea."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the junior Senator from Arizona [Mr. CAMERON]. I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

The roll call was concluded.

Mr. HALE. I transfer my pair from the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Delaware [Mr. DU PONT] and vote "yea."

Mr. DILLINGHAM. I have a general pair with the junior Senator from Virginia [Mr. GLASS]. I observe that he has not voted. I transfer that pair to the junior Senator from Oregon [Mr. STANFIELD] and vote "yea."

Mr. COLT. I transfer my general pair with the junior Senator from Florida [Mr. TRAMMELL] to the senior Senator from Pennsylvania [Mr. CROW] and vote "yea."

Mr. McCUMBER (after having voted in the affirmative). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Maryland [Mr. WELLER] and allow my vote to stand. I ask that this announcement of the transfer of my pair may stand for the day.

Mr. CURTIS. I wish to announce the following pairs:

The junior Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The senior Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—years 45, nays 21, as follows:

YEAS—45.

Ball	France	McKinley	Ransdell
Brandegee	Gooding	McLean	Rawson
Broussard	Hale	McNary	Shortridge
Bursum	Johnson	Moses	Smoot
Calder	Jones, Wash.	Nelson	Spencer
Capper	Kellogg	New	Sterling
Colt	Kendrick	Newberry	Townsend
Cummins	Ladd	Norbeck	Wadsworth
Curtis	Lenroot	Oddie	Warren
Dillingham	Lodge	Page	
Elkins	McCormick	Phipps	
Ernst	McCumber	Poindexter	

NAYS—21.

Ashurst	Harrison	Robinson	Underwood
Borah	Heflin	Sheppard	Walsh, Mass.
Caraway	La Follette	Simmons	Watson, Ga.
Dial	Norris	Smith	
Fletcher	Overman	Stanley	
Harris	Pittman	Swanson	

NOT VOTING—30.

Cameron	Glass	Nicholson	Trammell
Crow	Harreld	Owen	Walsh, Mont.
Culberson	Hitchcock	Pepper	Watson, Ind.
du Pont	Jones, N. Mex.	Pomerene	Weller
Edge	Keyes	Reed	Williams
Fernald	King	Shields	Willis
Frelinghuysen	McKellar	Stanfield	
Gerry	Myers	Sutherland	

So the committee amendment was agreed to.

The next amendment of the committee was, on page 55, line 25, to insert "thermostatic metal in sheets, plates, or other forms, 50 per cent ad valorem."

Mr. McCUMBER. Mr. President, on account of the absence of the senior Senator from New Jersey [Mr. FRELINGHUYSEN] I ask that the amendment just stated may be passed over.

The VICE PRESIDENT. Without objection, it is so ordered.

The ASSISTANT SECRETARY. The next amendment of the Committee on Finance is, on page 56, line 16, to strike out "tinplates" and insert "tin plates."

Mr. SIMMONS. There is no objection to that amendment.

The amendment was agreed to.

The ASSISTANT SECRETARY. The same amendment occurs in paragraph 311, lines 19, 21, and 24, striking out "tinplate" and inserting "tin plate."

The VICE PRESIDENT. Without objection, these amendments will be agreed to.

The next amendment was, on page 56, in line 16, after the words "taggers tin," to strike out "1.1 cents" and to insert "1 cent," so as to make that paragraph read:

PAR. 310. Sheets or plates of iron or steel, or taggers iron or steel, coated with tin or lead, or with a mixture of which these metals, or either of them, is a component part, by the dipping or any other process, and commercially known as tin plates, terneplates, and taggers tin, 1 cent per pound.

Mr. SIMMONS. Mr. President, I have no objection to a reduction from the House rate of 1.1 cents per pound to 1 cent per pound. I am willing to vote upon that amendment without offering any amendment, with the statement that later, when the committee amendments shall have been concluded, I shall probably offer an amendment to the paragraph.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 56, in line 20, before the word "sheet," to strike out "the," so as to make the paragraph read:

PAR. 311. No article not specially provided for which is wholly or partly manufactured from tin plate, terneplate, or sheet, plate, hoop, band, or scroll iron or steel, or of which such tin plate, terneplate, sheet, plate, hoop, band, or scroll iron or steel shall be the material of chief value, shall pay a lower rate of duty than that imposed on the tin plate, terneplate, or sheet, plate, hoop, band, or scroll iron or steel from which it is made, or of which it shall be the component thereof of chief value.

The amendment was agreed to.

ATTORNEY GENERAL DAUGHERTY—THE MORSE CASE.

Mr. LENROOT. Mr. President, this morning I was given possession of a copy of a letter written by Attorney General Daugherty to the senior Senator from Indiana [Mr. WATSON] relative to his connection with the Morse case. A little while ago I received a telegram from the Senator from Indiana, who is absent in Indiana, stating that it would be agreeable to him to have the letter placed in the RECORD. I therefore send the letter to the desk and ask unanimous consent to have it read.

The VICE PRESIDENT. Without objection, the letter will be read.

The Assistant Secretary read as follows:

OFFICE OF THE ATTORNEY GENERAL,
Washington, D. C., May 22, 1922.

Hon. JAMES E. WATSON,
United States Senate, Washington, D. C.

MY DEAR SENATOR: To-day for the first time I have had an opportunity to read the CONGRESSIONAL RECORD of May 12, page 6175, relative to the colloquy in the Senate regarding my connection with the Morse case. I have read newspaper comment on this discussion, but it was of a general character, and I thought it required no particular attention on my part.

I remember very well a general discussion we had some time ago regarding the Morse case. I certainly did not in that discussion make the statement to you that I had no connection with the Morse cases, civil and criminal. My connection with these cases was well known throughout the country, because of extended publicity some years ago. I never denied it, and I have no disposition to deny it now. Nothing was done by me or anybody else in connection with these cases that could not be known to the whole world without reflection upon anyone.

Morse was released upon the recommendation of Attorney General Wickersham, who based his recommendation upon the reports of eminent physicians of the Government, including the Surgeon General of the Army, and the records in the department show all the facts pertaining to the physical condition of Morse when he was released, which was the sole ground for Executive clemency.

As for compensation, I never received anything from Mr. Morse personally. All I ever received from anybody in connection with the Morse cases, both civil and criminal, was about $4,000 advanced to me by Mr. Felder, and was about half enough to pay my necessary expenses and disbursements connected with over a year's active investigation, preparation, and service in the cases.

I regret, Senator, if you misunderstood me.

Sincerely yours,

H. M. DAUGHERTY,
Attorney General.

Mr. CARAWAY. Mr. President, I have before me a copy of the RECORD of May 12. I wish to read from it the statement then made by the Senator from Indiana [Mr. WATSON]. It is not a question of misunderstanding, because there can be none. Either the Senator from Indiana told the exact truth and reported just exactly what Daugherty said—that is, that he, Daugherty, had nothing to do with the Morse case—or he knowingly misrepresented the Attorney General. There can be no question of misunderstanding. There is also another Republican Senator—whom I do not see here now—who told the Senator from Georgia [Mr. WATSON] and myself that the Attorney General made exactly the same statement to him as the one reported detailed by the Senator from Indiana [Mr. WATSON].

May I ask the Secretary to give me the number of the volume and the page of the RECORD as mentioned by the Attorney General.

The VICE PRESIDENT. The number of the page of the RECORD as given in the letter is 6175, of date May 12.

Mr. CARAWAY. That is a mistake, Mr. President. That page does not appear in the RECORD of May 12 at all. I will find the right RECORD in a moment. I am going to be charitable and presume that the Attorney General never read the RECORD, since he can not even give the day of the month and the page of the RECORD where the colloquy occurred. He still evidently has not had the opportunity to read it as he suggested that he had not had until just now.

Mr. President, the colloquy to which I refer occurred on May 2 and not on May 12, but I think that whenever the Attorney General is within 10 days of being correct he is very accurate for him, and no question will be raised about that. However, this is what occurred:

Mr. WATSON of Indiana. Mr. President, will the Senator permit an interruption?

Mr. CARAWAY. I have the floor and will permit an interruption, although I do not intend to lose the floor.

Mr. STANLEY. If the Senator from Indiana will permit me, I shall be through in about a minute.

Mr. WATSON of Indiana. Certainly.

Now, I shall skip what the Senator from Kentucky [Mr. STANLEY] said. Then, on page 6175, the following colloquy occurred:

Mr. WATSON of Indiana. Mr. President, will the Senator pardon an interruption?

Mr. CARAWAY. I will.

Mr. WATSON of Indiana. We did not hear over on this side what it was that the Senator said about the Attorney General. Will he kindly repeat it?

Mr. CARAWAY. I know the Senator did not hear it, because all the Senators over there got busy in order not to hear what was being said. I said that I understood that the greatest achievement of the Attorney General was that he got a pardon for a criminal, and got a fee of $25,000 for doing it.

Mr. WATSON of Indiana. Does the Senator mean since he became Attorney General?

Mr. CARAWAY. Oh, no.

Mr. WATSON of Indiana. May I further question the Senator?

Mr. CARAWAY. Yes, sir.

Mr. WATSON of Indiana. To what case does the Senator refer?

Mr. CARAWAY. The Morse case.

Mr. WATSON of Indiana. Does the Senator charge on his responsibility as a Senator that Mr. Daugherty, even before he was Attorney General, received a fee for helping to get Mr. Morse out of the penitentiary?

Mr. CARAWAY. I charged that that was a matter of public information. I was not, of course, present when any contract was made. I will say that I have heard it so often that I think it is true, without question.

Mr. WATSON of Indiana. The Senator, then, accepts a rumor as true, and charges it on the floor of the Senate?

Mr. CARAWAY. Does the Senator from Indiana say that it is not true?

Mr. WATSON of Indiana. I do.

Mr. CARAWAY. On the Senator's own personal knowledge?

Mr. WATSON of Indiana. I do.

Mr. CARAWAY. That Mr. Daugherty did not represent Morse?

Mr. WATSON of Indiana. I did not say that he did not represent Morse; but I say on my knowledge of the situation that he received no fee for the service rendered, nor did he represent Morse directly, according to my understanding.

Mr. CARAWAY. Did he indirectly represent him?

Mr. WATSON of Indiana. No.

Mr. CARAWAY. Why did the Senator say, then, that he did not directly represent him?

Mr. WATSON of Indiana. I meant by that that my understanding of the situation is that he was representing his client, and that the testimony of Mr. Morse was necessary, and that in that way he had contact with Mr. Morse; but he did not get him out of the penitentiary; he had not anything to do with getting him out of the penitentiary; and he received no fee for getting him out of the penitentiary.

Mr. CARAWAY. How does the Senator know that?

Mr. WATSON of Indiana. I know it from the language of the Attorney General.

Mr. CARAWAY. Did he tell the Senator that he did not?

Mr. WATSON of Indiana. He did.

Mr. CARAWAY. That he never got a cent for it?

Mr. WATSON of Indiana. Not for that.

Mr. CARAWAY. For what did he get his fee, then?

Mr. WATSON of Indiana. He did not get any fee from Morse.

Mr. CARAWAY. Why does the Senator say "Not for that"? Why does the Senator juggle with language? Why does he not say that he did or did not get a cent?

Mr. WATSON of Indiana. That is the thing that the Senator is charging here. I say that for that he did not get a fee.

Mr. CARAWAY. For what did he get his fee?

Mr. WATSON of Indiana. I do not know whether he ever got a fee from Morse for another purpose or not.

Mr. CARAWAY. I did not think the Senator knew.

Mr. WATSON of Indiana. But I do know that what the Senator says here is not true.

Mr. CARAWAY. What is that?

Mr. WATSON of Indiana. Of course, I am not charging——

Mr. CARAWAY. What is it that the Senator says he knows is not true?

Mr. WATSON of Indiana. I am not charging that the Senator said anything he knew not to be true, of course.

Mr. CARAWAY. Oh, well, then, let the Senator be a little bit plain about his language.

Mr. WATSON of Indiana. I am charging that Mr. Daugherty did not get a fee from Mr. Morse for getting him out of the penitentiary or helping to get him out of the penitentiary.

Mr. CARAWAY. For what did he get his fee?

Mr. WATSON of Indiana. I do not know whether he ever got a fee or not.

Mr. CARAWAY. Oh, well, if the Senator does not know, how does he know that he did not get it for that?

Mr. WATSON of Indiana. I do not know whether he ever got a fee from Morse for some other purpose or not.

Mr. CARAWAY. If that is all the information the Senator has——

Mr. WATSON of Indiana. No; I have information on this matter that the Senator is talking about, and that is what he is charging.

Mr. CARAWAY. I ask the Senator, then, what he did get his fee for?

Mr. WATSON of Indiana. So far as I know, he never got any fee.

Mr. CARAWAY. Does the Senator know that he did not get any?

Mr. WATSON of Indiana. I know that he did not get any fee from Morse for getting him out of the penitentiary or helping to get him out.

Mr. CARAWAY. Did he get any fee at all from Morse?

Mr. WATSON of Indiana. He may have gotten one 10 years ago. I do not know anything about that. Whether he was ever Morse's attorney or not is a different proposition. As to that I do not know, but I know that in this instance he got nothing.

Mr. CARAWAY. When did the Senator discuss this matter with the Attorney General?

Mr. WATSON of Indiana. On various occasions.

Now, just to show that there can be no kind of misunderstanding between the Attorney General and the Senator from Indiana:

Mr. CARAWAY. How came the Senator to discuss it with the Attorney General?

Mr. WATSON of Indiana. Because I had heard the rumor.

Mr. CARAWAY. Did the Senator believe it?

Mr. WATSON of Indiana. The rumor?

Mr. CARAWAY. Yes.

Mr. WATSON of Indiana. I did not.

Mr. CARAWAY. Then why did the Senator go to the Attorney General with it if he did not believe it?

Mr. WATSON of Indiana. Because I am the kind of a man that if any one of my friends is involved in any trouble I go and talk to my friend about it.

Mr. CARAWAY. And the Attorney General told the Senator it was not true?

Mr. WATSON of Indiana. It was not true.

Mr. CARAWAY. Did the Senator then ask him what he did get the fee for?

Mr. WATSON of Indiana. I never asked him about any fee, of course, because he said he did not get any.

Mr. CARAWAY. Let me ask the Senator whether this was the truth, then—that he tried to get that fee, and it was so large that the prisoner would not pay it?

Mr. WATSON of Indiana. Oh, no; nothing of that kind, of course.

Mr. CARAWAY. All right.

That is a colloquy which does not admit of any explanation. It is either true or it is not true. It has been in the RECORD from the 2d of May until now; it has been a matter of controversy. The Attorney General has said nothing until the contract was produced in which it was shown that he did represent Morse; and he said nothing then until the letter of Felder was produced in which it is shown that he did get a fee of $6,000. None of those things is susceptible of explanation by merely saying somebody misunderstood him. I know that unless the Senator from Indiana was intentionally misrepresenting the Attorney General—and I do not believe he would misrepresent him—the Attorney General told him what he has stated; and there is another Senator sitting on the floor who told the Senator from Georgia [Mr. WATSON] and myself that the Attorney General told him that at a dinner. He said to him, "How is it that you got Morse out of the penitentiary and are now trying to get him back?" And the Attorney General replied, "I had nothing to do with that." That is a question for the Attorney General and his friends. If they are willing to bear the imputation that they willfully and deliberately misrepresented him in order to relieve him of a lack of veracity, I shall certainly let them do it.

Mr. CARAWAY subsequently said:

I ask permission to insert in the RECORD some editorials which appeared yesterday and the day before in various newspapers demanding that the Attorney General clear this question of veracity or resign, and he thus attempts to clear it up by asking his friend to admit he misrepresented him. The country will not accept such a statement.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

[From the New York Times, Thursday, May 25, 1922.]

ATTORNEY GENERAL DAUGHERTY.

Mr. Daugherty is a busy man. Doubtless investigation and preparation of the war-fraud cases and the regular duties of his office leave him scant time to read the newspapers or even numbers of the CONGRESSIONAL RECORD that contain matter calculated to interest him. Apparently he has just read the RECORD of May 5, for he has reprinted in his statement letters written by Mr. Taft and Mr. Wickersham in 1915. He says nothing of the curious correspondence which Senator CARAWAY has inserted in the RECORD of May 22 and published by the press generally. Perhaps there was no need that he should take that up. The real essential charge against him appears in the RECORD of May 2. On that day in the Senate Mr. CARAWAY charged that it "was a matter of public information" that Mr. Daugherty, before he was Attorney General, got a fee for helping to get Mr. Morse out of the penitentiary. Mr. CARAWAY "understood that the greatest achievement of the Attorney General was that he got a pardon for a criminal, and got a fee for doing it."

We needn't bother about Mr. CARAWAY'S sneer or Mr. STANLEY'S imputation of "unprofessional conduct." As a private citizen practicing law, Mr. Daugherty had a perfect right to try to get Mr. Morse or any other convict released and to charge a fee for it and collect it if he could. Not a question of professional ethics, but a question of Mr. Daugherty's personal veracity emerges from Mr. WATSON'S remark. Mr. WATSON said that he had discussed the matter of the Morse case with Mr. Daugherty "on various occasions." To avoid the possible unfairness of a summary we reprint the essential part of the dialogue between the two Senators:

"Mr. WATSON. The Senator, then, accepts a rumor as true and charges it on the floor of the Senate?

"Mr. CARAWAY. Does the Senator from Indiana say that it is not true?

"Mr. WATSON. I do.

"Mr. CARAWAY. On the Senator's own personal knowledge?

"Mr. WATSON. I do.

"Mr. CARAWAY. That Mr. Daugherty did not represent Morse?

"Mr. WATSON. I did not say that he did not represent Morse; but I say on my knowledge of the situation that he received no fee for the service rendered, nor did he represent Morse directly, according to my understanding.

"Mr. CARAWAY. Did he indirectly represent him?

"Mr. WATSON. No.

"Mr. CARAWAY. Why did the Senator say, then, that he did not directly represent him?

"Mr. WATSON. I meant by that that my understanding of the situation is that he was representing his client, and that the testimony of Mr. Morse was necessary, and that in that way he had contact with Mr. Morse; but he did not get him out of the penitentiary; he had not anything to do with getting him out of the penitentiary, and he received no fee for getting him out of the penitentiary.

"Mr. CARAWAY. How does the Senator know that?

"Mr. WATSON. I know it from the language of the Attorney General.

"Mr. CARAWAY. Did he tell the Senator that he did not?

"Mr. WATSON. He did."

Mr. WATSON repeated several times in one form or another that Mr. Daugherty "did not get any fee from Morse." That is a mere quibble, though, of course, not so meant by Mr. WATSON. What services did Mr. Daugherty render to Mr. Morse, no matter what fee was charged or expected or uncollected? Mr. WATSON'S "understanding of the situation," purporting to be derived from Mr. Daugherty, is absolutely incorrect. The charitable supposition is that Mr. WATSON'S memory was inaccurate. Mr. Daugherty owes it to his reputation to clear up this misunderstanding and to correct these misstatements. This is a duty he owes also to Mr. Harding and to the American people. Not a violation of professional but of personal ethics seems to be disclosed. Mr. Daugherty's imputation of motives to his adversaries is beside the point. He is his own worst adversary so long as he lets the Watsonian apologia go uncontradicted.

[From the New York World, May 22, 1922.]

"EMBARRASSING THE ADMINISTRATION."

Presenting some striking exhibits in the Morse case to the Senate, Mr. CARAWAY, of Arkansas, says that "there is only one decent thing for the Attorney General to do—that is to resign and not embarrass the administration any further."

If normalcy were more than an iridescent and fleeting hope, no doubt Mr. Daugherty would prove most embarrassing. The unaccountable slowness of the Department of Justice in prosecuting building profiteers is irritating to builders and rent payers; the Attorney General has been strongly attacked from the Republican side of the House in connection with war fraud prosecutions; and the sensational disclosures of Senator CARAWAY in the ancient and odorous Morse case raise new doubts as to the wisdom of inviting political lawyers in general, and Mr. Daugherty in particular, into the Cabinet. But conditions are not normal. Mr. Daugherty may well ask why he should be singled out for attack when sources of embarrassment are so many and so grave.

It is embarrassing to Mr. Harding to have to say that he does not "know of a nation in the world that ever maintained eminence in trade without it was eminent as a carrier of trade" as if he had never heard of the United States. But the interests behind ship subsidy have a bigger mortgage upon the G. O. P. than any individual, even from Ohio.

The bonus proposal in Congress has so embarrassed Mr. Harding that he has repeatedly given notice that he will not accept it unless means are at the same time provided for meeting the cost, and it will be even more embarrassing if he is obliged to change his mind.

It is embarrassing to the administration to have the dominant party in the Senate confirm TRUMAN NEWBERRY in the seat that was bought for him, although such practices are "harmful to the honor and dignity of the Senate," according to its own resolution, "and dangerous to the perpetuity of free government." But NEWBERRY was used to help organize the Senate against the League of Nations, and that gave him also a mortgage to foreclose.

It is embarrassing to the administration to have to frame a tariff of abominations and impose it upon a protesting country. Everybody understands the political danger. The "woman with the market basket" wrecked one Republican Congress, and "the shopping woman" another, for tariff exactions. It is the same woman; she is older now and has a vote. But the party is committed. Nothing short of the farm bloc could stop it on the road to party ruin for private profit, and the farm bloc has been squared.

It is embarrassing to the administration to have its candidates for the Senate go down to defeat in primary contests in Indiana and even rock-ribbed Pennsylvania; so embarrassing that the President repents of the kind words he said for Senator FRELINGHUYSEN, and the White House intimates that there will be no more for anybody seeking renomination. Gifford Pinchot is trying to make the rebuke in Pennsylvania as easy for the President as he can by insisting that his own unexpected victory "is not a repudiation of President Harding." All the same, the people will continue to think what they think, and other old guard Senators must take their medicine, be it sweet or bitter.

It is embarrassing to the administration pledged to an honest observance of civil-service reform when employees of public offices are shoveled out in batches and the President himself is forced to say that there are "no charges" against them. It is embarrassing to have men with memories ask what has become of the League of Nations, which the 31 Republicans said we could best arrange to join by electing Mr. Harding; or even of the President's substitute association of nations. Either might be useful now to world peace and world solvency.

In fact, sources of embarrassment are so many that G. O. P. leaders—those who do not have to face an election this year—must sometimes be tempted to wish there might be a reversal at the polls in November. Then Congress would be unable to do anything, good or bad, and the G. O. P. could go to the people in 1924 on the issue that it saved the Union in 1861. Failing that, the embarrassments of the administration threaten to grow in number and in gravity. The letter and contract linking Attorney General Daugherty with the release of Charles W. Morse from prison 10 years ago, in spite of the strong denial of Senator WATSON of Indiana as an administration spokesman, is not the least of these.

—

[From the Philadelphia Record.]

DAUGHERTY SHOULD RESIGN.

"We will give $2,500 in gold," remarked that blithesome Republican sheet, the Ohio State Journal, the other day, "for every grafting war contractor put in jail by Harry Daugherty, with an extra prize of a genuine Packard Single-Six in every case where said grafting war contractor so placed in jail is a Republican.

Not to be outdone in generosity we would be disposed to offer a Rolls-Royce if the said Harry Daugherty, who happens to be the Attorney General of the United States by the grace of Warren G. Harding, would state under oath his full and frank opinion of one Charles W. Morse, with whom he was on terms of great personal and professional intimacy 10 years ago. It was Daugherty who was instrumental in inducing President Taft to pardon Morse and free him from the Atlanta Penitentiary, for which, as Senator CARAWAY proves by the copies of letters read in the Senate, he was to receive a fee of $25,000. Daugherty has denied this, but now the letters, apparently given out by Morse himself, bob up to refute him.

If our amiable President is politically wise he will not seek to follow the example of General Grant, who, whenever one of his friends was attacked, refused obstinately to believe that he was capable of any wrongdoing. This trait, commendable as it is in some ways, brought great discredit upon the Grant administration, and Mr. Harding will find that a mistaken sense of loyalty will be equally disastrous to his administration if he persists too far in it.

Mr. Daugherty's record was such that he ought never to have been appointed Attorney General, and now that he has held office nearly 15 months he has confirmed the general impression that his selection was a great blunder. These latest charges are the most serious yet preferred against him. He ought to resign, as Senator CARAWAY says, to save the administration from further reproach.

—

[From the Sun, Baltimore, Wednesday, May 24, 1922.]

PROSECUTION OF WAR FRAUDS.

Probably the public soon is going to know what it has a right to know—whether there are sufficiently powerful underground influences at work in Washington to prevent the Government from prosecuting certain well-known and well-defined war-fraud cases. The issue is squarely up to Attorney General Daugherty. Congress has granted him the $500,000 which he asked to pay the expenses of conducting the work. Certain excuses offered for the continued delay are becoming somewhat frayed about the edges. Unless the Attorney General acts, he is going to have a heap of trouble on his hands—unless he resigns in the meantime because of the storm clouds that are sweeping down upon him.

There has been a vast amount of loose and promiscuous talk about the extent to which the Government was mulcted during the war by unscrupulous contractors, but not until two fighting World War veterans now serving in the House began to badger the Attorney General with a number of unpleasant facts they had unearthed did the issue begin to assume tangible form. When Mr. Daugherty discharged two special investigators of the Department of Justice because of "disloyalty" in conveying information to these Congressmen, the public began to be interested. When it was further alleged that the Attorney General himself, apparently, had tempted one of these investigators to enter the employ of one of the concerns involved in the Bosch Magneto case, a concern against which this investigator had uncovered incriminating evidence, a sinister turn was given to the matter.

The Attorney General selected this evil hour in which to do a very foolish thing. He "inspired" the newspapers to print reports that he was going to turn his heavy artillery against certain unnamed officials and influential personages in the Wilson administration, because they were the prime movers in the various war-fraud cases. If Mr. Daugherty has any remote plan of carrying out this threat, let him tell the world all he knows. Unfortunately for him, however, circumstantial evidence seems to indicate that these threats were merely a political maneuver, intended to intimidate certain men who were in the possession of documents which the Attorney General desired to keep from the public for highly personal reasons.

The intimidation failed. Documents placing Mr. Daugherty in the most humiliating position that any Cabinet officer has been placed since Richard Achilles Ballinger was forced to resign are being published and many more are coming. The Daugherty-Felder-Morse correspondence constitutes one of the most shocking incidents in recent American political history. But they are merely a side issue to the problem confronting the Department of Justice, which is, Are the war-fraud cases to be prosecuted or are they not? Can political influence not only retard but absolutely block the processes of the law?

Taunts are being thrown at the Attorney General which must rivet the public gaze upon him. Samuel Untermyer, himself an investigator and prosecutor of eminence, ridicules the idea that Mr. Daugherty "means business." An Ohio newspaper in Mr. Daugherty's home town offers a prize of $2,500 for every convicted contractor placed in the penitentiary through his efforts, with a costly automobile thrown in as an "extra" if the contractor in question be of the Republican persuasion. This may seem frivolous and offensive, but it aptly characterizes a cynical attitude toward the Attorney General, which is expressed in Washington more and more frequently regardless of party lines. It has been some time since bald and open discussion of the manipulation of the Department of Justice through political influence has been heard so insistently. The President owes it to himself not to permit the situation to become more ugly and menacing than it is now.

—

[From the New York Tribune, Wednesday, May 24, 1922.]

TIME TO RESIGN.

Unless Attorney General Daugherty has a better defense of his relation to the unsavory Morse pardon than thus far has come from him or his friends, he should relieve President Harding of embarrassment by a prompt resignation.

It is not necessary to go into extensive argument. Facts which are so far not effectively contradicted speak for themselves. It is surely an amazing thing that when the conspiracy to get Morse out of prison was hatched it happened that the conspirators went to Ohio and hired a lawyer, without prior connection with the case, who happened to be a friend of the pardoning power.

Mr. Daugherty should never have been named as Attorney General. The appointment was one of the few mistakes President Harding has made. It was a personal selection, and such for high office are seldom happy. The only way to rectify the blunder, if the documents published in the CONGRESSIONAL RECORD are genuine and accurate, is to ask for a speedy resignation if one is not tendered. Granted that Mr. Daugherty was one of those who were fooled, he is manifestly in that event too gullible to be at the head of the Department of Justice.

—

[From the World.]

A DAUGHERTY INVESTIGATION.

The judges of the Federal courts of the United States take a solemn oath to "administer justice without respect to persons and do equal right to the poor and to the rich."

They can not fulfill this oath, however, no matter how sincere they may be, unless the Attorney General of the United States is devoting himself single-mindedly to the task of administering justice without respect to persons and doing equal right to the poor and to the rich.

The Attorney General is the Government's minister of justice, and quality of justice will be determined mainly by his attitude toward the duties and responsibilities of his great office. In the circumstances, therefore, Congress owes it to the country to make a searching and impartial investigation of the various charges that have been made against Harry M. Daugherty.

The Morse pardon necessarily has a direct relation to such an inquiry, for although the scandal was history long before Mr. Daugherty became a member of President Harding's Cabinet, all the sensational accusations and all the rumors in regard to his activities in behalf of Morse have a bearing on the degree of public confidence that can be attached to his services as Attorney General.

Nevertheless, the Morse pardon is not the whole of the case. Two Representatives in Congress, Mr. JOHNSON and Mr. WOODRUFF, have made sensational charges against the Department of Justice in respect to the prosecution of the so-called war frauds. Mr. Untermyer has been no less specific in his charges against the Attorney General in the prosecutions growing out of the work of the Lockwood committee. One of the special agents of the department has been dismissed by Mr. Daugherty for "disloyalty," because he gave information to Members of Congress.

Thus far there have been only ex parte statements on both sides of the controversy; but neither President Harding, Mr. Daugherty, nor Congress can afford to let it rest there. Mr. Daugherty is either fit to be Attorney General of the United States or he is not. He is either entitled to the full confidence of the American people or he is entitled to no confidence at all and should be compelled to resign. Only Congress has power to establish the facts and make possible an intelligent decision before the court of public opinion.

The ordinary citizen has no partisan interest in the matter. He would be quite as well pleased to have the Attorney General vindicated as to have him proved unworthy of his high office, and more so, because few Americans are capable of deriving personal satisfaction from a scandal

in the administration of the Government of the United States. It must be apparent even to Mr. Harding that in the midst of all the charges and countercharges there can be no public confidence in the administration of justice in Washington until the accusations against Mr. Daugherty are disposed of by a fair investigation or there is a new Attorney General of the United States. Nor can it be said that those who favor an inquiry are seeking to make political capital against the administration, for if Mr. Daugherty is sustained by an investigation the chief beneficiary will be the Harding administration.

There was a Daugherty issue long before Senator CARAWAY made his speech on the Morse pardon and there will be a Daugherty issue in increasingly acute form until the fitness or unfitness of Mr. Daugherty to be Attorney General of the United States is definitely established by a committee of Congress.

—

[From the New York Herald, Friday, May 26, 1922.]

A POLITICAL BLUNDER.

The New York Herald sees no political wisdom in the purpose of Representative CAMPBELL to shield Attorney General Daugherty from the investigation called for by the Woodruff resolution, introduced in the House April 11. It sees it as a distinct political blunder.

This resolution proposes an inquiry as to the failure of the Attorney General to prosecute, civilly and criminally, persons and corporations alleged to have defrauded the Government in war contracts.

The Rules Committee of the House voted 6 to 5 on May 3 to report the resolution favorably. Mr. CAMPBELL is chairman of the Rules Committee. He recorded his vote on May 3 with the majority for favorable consideration of the Woodruff resolution. Now he comes out in opposition to it, and in this opposition it is reported he has the powerful support of Floor Leader MONDELL.

Since the Woodruff resolution was introduced April 11 the position of Attorney General Daugherty before the public has very materially changed. If there was justifiable cause on May 3 for the Rules Committee to report the Woodruff resolution favorably there is more cause now for putting it through. The question then was confined to the Attorney General's alleged failure to handle these war fraud cases with the vigor and the decision that the Nation demanded.

The question now, just or unjust, is whether Mr. Daugherty is a fit man for Attorney General of the United States. This is what the public wants to know. The facts in respect of the Morse pardon from the Atlanta Penitentiary by President Taft and Mr. Daugherty's connection with the case were so bungled by Senator WATSON in his defense of the Attorney General against Senator CARAWAY'S charges in the Senate that the public got an unpleasant picture of the whole matter.

What Mr. Daugherty needs more than anything else right now is a thorough, fair discussion of all the charges against him. He should not permit himself to become the storm center of politicians on either side of the Chamber. He should not permit his party to smoke screen him, for smoke screening by one's party serves only to give wings to suspicion.

In this awkward situation the only thing for Mr. Daugherty is to draw the fire of the men attacking him. His fitness or unfitness for the great office he holds in the Harding administration should be determined on the facts justly and fairly considered. Any other way of considering them would not give Mr. Daugherty a square deal. His fitness for Attorney General of the United States is a question of fact, not a question for partisan heat.

Harry Daugherty, with his warm human instincts and kindly feeling, has a world of devoted friends. That a situation should have developed that makes for Congress consideration of his management of the office of Attorney General and makes as well for consideration of his connection with the Morse case is distressing to his friends and to his party.

But the situation having developed, the way to meet the issue is the way his friends would have him meet it, by asking himself for the investigation and insisting on getting it. The New York Herald sees no other course open to Harry Daugherty if he wishes to retain the office of Attorney General with full public confidence. It is either this or surrender the office to his great chief and get out from under the burden of public service, get away from public jealousies and public criticisms.

—

[From the Public Ledger, Philadelphia, Friday morning, May 26, 1922.]

MR. DAUGHERTY.

What has now come to pass is precisely what informed political opinion and intelligence feared would happen when Harry M. Daugherty was named Attorney General in Mr. Harding's Cabinet. We say "feared" would happen advisedly, for any scandal or threatened scandal in the President's official family is of necessity a matter of national regret and concern, regardless of politics and partisanship.

The plight in which Mr. Daugherty now finds himself is one that threatens and affects the integrity of the Federal administration. It is clearly a case that Congress should investigate impartially, promptly, and thoroughly, not as a political move, but as a matter of justice to clear away or confirm a public suspicion and public charges that now are directed against the Attorney General.

Mr. Daugherty's fitness for the high office he holds should not be questionable. It should be known and established. So long as it is a matter of doubt and a question of fact, it is bound to become a topic of political discussion. When the integrity, veracity, and the general qualifications of the Attorney General of the United States threaten to become a "campaign issue," the administration of Federal justice is embarrassed, impeded, and clouded.

Mr. Daugherty owes it to the President who has reposed confidence in him, he owes it to a suspended but questioning public opinion, and he owes it to his party to ask from Congress a full and exhaustive inquiry into the charges against him and the revelations about his activities that have been made on the Senate floor. The issues that have been raised against him should not be evaded. They should not be and can not be hushed up by inaction on the part of the Attorney General.

If the whole business is not cleared up now, it will go into the coming political campaign, and neither Mr. Daugherty nor his political and official associates will be the gainer. In his present estate and situation the Attorney General is a public liability and embarrassment.

—

[From the New York World, Friday, May 26, 1922.]

DAUGHERTY AS AN ISSUE.

The Republican leaders of the House make no concealment of their intention to block the Woodruff-Johnson resolution providing for an investigation of Attorney General Daugherty and the Department of Justice.

Mr. MONDELL, the Republican floor leader, pleads that the proposed inquiry would be "a reflection on the President." Representative CAMPBELL, chairman of the Committee on Rules, who is holding back the resolution, adopts Mr. Daugherty's disingenious defense and pretends that an investigation would aid the war grafters that the Attorney General "is indicting and prosecuting."

The Woodruff-Johnson resolution was introduced by two Republican Members of the House, both of whom made specific charges that Mr. Daugherty had personally intervened to prevent the prosecution of men who had defrauded the Government. It had nothing to do with the subsequent revelations in regard to Mr. Daugherty's part in the Morse pardon scandal. It is in no sense "a reflection on the President," except as the President chooses to intervene in behalf of his Attorney General. In that case he must share both the political and the moral responsibility for the partisan decision to smother these proceedings.

Mr. Daugherty himself could relieve the President of embarrassment either by resigning or by demanding a searching investigation. That is what most of his predecessors in office would have done in similar circumstances. The more the issue is discussed in the House and the Senate the more inevitable it is that the Attorney General must soon come into the open and face his accusers. Senator NORRIS, of Nebraska, who is a Republican, summed up the situation concisely when he said that "there is no reason or sense in trying to head off this investigation. The men in the Republican Party who attempt to do it will be repudiated in the end."

Mr. Harding may not see this, but he can not keep his eyes closed indefinitely. He must be aware of the fact that Mr. Daugherty finds few apologists and no outright defenders among the leading Republican newspapers, and those Republicans who speak for him in Congress have never undertaken to meet any of the accusations against him. All they do is to set up the hollow and hypocritical claim that he is the victim of war-fraud beneficiaries who are seeking to prevent prosecution. Not one of them believes it, but they can think of nothing else to say, and Mr. Daugherty himself is of no assistance to them.

The most shocking part of this scandal is the moral obtuseness shown by the Republican leaders from the President down. Their attitude is that of men who are determined that the Attorney General must be shielded from investigation by a Republican committee of a Republican Congress, not because there is nothing to investigate but because he is the President's friend and is the managing politician who brought about Mr. Harding's nomination at Chicago. Even in the worst days of corruption under the Grant administration there was nothing so flagrantly impudent and defiant as that.

Mr. Daugherty has become the moral test of the Harding administration. He is now one of the issues on which the administration will have to go before the country in the fall, and while the President can possibly keep his Attorney General out of the rooms of an investigating committee, he will not be able to keep him out of the ballot box in November.

—

[From the Philadelphia Record, May 24, 1922.]

Some one in an idle moment suggested, possibly as diversion for the early summer months, a straw vote as to the most unpopular man appointed to high office by President Harding. Quickly the contest has narrowed down to Ambassador Harvey and Attorney General Daugherty. Much is to be said as to the unpopularity of each of these beneficiaries of the President's well-known amiability, but the Record does not feel obliged to express an opinion as to who should or is likely to win in this rivalry and who is to get the consolation or booby prize. A disinterested observer would say that while Harvey had an early lead, Daugherty has been gaining.

—

[From the Louisville Times.]

RAISING THE OLD HARRY.

The important thing about the charges of Senator CARAWAY against the Attorney General of the United States is not that Mr. Daugherty helped get Charles W. Morse out of prison on a fake illness but that Mr. Daugherty authorized his friends in the Senate to deny the connection.

Mr. Daugherty up to the time he was so signally honored by the presidential candidate he had managed was known as a lawyer largely engaged in cases like that of Morse. He made good fees, and his activities extended just as far as the abodes of people who got into trouble with the law. Mr. Daugherty was the sort of useful chap who could make a good deal of progress toward getting them out of trouble. He was known to have "influence" at Columbus and at Washington. So that if the name of Harry M. Daugherty did not figure in the Supreme Court record of great cases he was the counsel in many successful settlements out of court, and he found it very profitable.

Being engaged in so quiet, albeit so satisfactory, a practice, Mr. Daugherty was not as well known professionally as his talents entitled him to be when he was selected by President Harding to be the Attorney General. The Times on that occasion said that, because of the nature of his practice, it were better that Mr. Daugbetry had been made something other than Attorney General. This newspaper conceded that he was entitled to a place in the Cabinet, because the Presidency was his individual surprise party for Mr. Harding. But it feared that some of the liberal incidents of the Attorney General's practice would rise up to plague him, just as the Morse case has done.

Mr. CARAWAY has proved that Mr. Daugherty was very definitely engaged in the Morse case. He has produced photostatic proof of the contract in which the Attorney General and Tom Felder, of Atlanta, agreed to work for the pardon for a consideration of $25,000.

Tom Felder says in defense of Mr. Daugherty that the present Attorney General did not receive any part of the $25,000 fee. But he contracted to receive it, and the fact that he declined to accept the steamship stock which Morse gave to Tom Felder is more of a proof of Mr. Daugherty's business acumen than of any pang of conscience. The stock turned out to be worthless.

The employment, as was said before, is not astonishing. But for an old hand and a cool one like the Attorney General to authorize his friend, JIM WATSON, to deny the connection makes it appear as if the distinguished Cabinet Minister is losing the only two qualities he ever had—his boldness and his judgment.

Mr. Daugherty, so far as his connection with the Morse case is concerned, is just as fit to be Attorney General as he ever was. The President and the Republican Party leaders knew all about him and his type of practice when he was selected. But if Mr. Daugherty really made the political blunder of having WATSON deny a truth that was bound to come out he has disqualified himself as a wise politician. And that is the only reason he ever was made Attorney General.

[From the Courier-Journal, Wednesday, May 24, 1922.]

THE MORSE MYSTERY.

The chief interest in the charges which Senator CARAWAY is making against Attorney General Daugherty is not so much in the charges themselves as in the proof of them which the Arkansas Senator is producing. And the chief interest in Mr. Daugherty's present attitude in the matter is not his silence, but the fact that he has allowed his misinformed friends in the Senate to deny the charges which are now proven.

The character of Mr. Daugherty's practice as an attorney was pretty well known when Mr. Harding placed him in the Cabinet. The fact that it was so well known created a storm of protest when Mr. Harding's consideration of the appointment was reported. That protest was by no means partisan, for it was participated in by the better elements of the Republicans, as well as the legal fraternity, everywhere.

But Mr. Harding was obdurate. He even declared that the country's objections to the appointment merely strengthened his determination to make it. That appointment and the appointment of George Harvey to the British ambassadorship, in the face of the public clamor against them, constitute the two outstanding demonstrations which the President has furnished that, contrary to the popular estimate, he has a "backbone" when he chooses to stiffen it.

With the exception of Mr. Daugherty's victimizing of his friends in the Senate, his record as exposed by Mr. CARAWAY does not appear as materially different from what it was known to be when he was made Attorney General of the United States.

Who among those who aided in the fraud by which the convict Morse got out of the Atlanta prison were tarred with the same stick is of less interest to the public than would be a solution of the mystery of how the fraud was accomplished.

There is no popular desire to see the Attorney General proved a conspirator. It would add only a little to popular chagrin. Mr. Daugherty has no advocates among those who feel that none but a great lawyer should occupy the office he received as a political reward. But the irritation which arose from the appointment caused nobody to feel the slightest enmity toward Mr. Daugherty.

The President bore the brunt of the criticism that was occasioned by his calling Mr. Daugherty to the Cabinet. He caused it to be announced at the White House long afterwards, in connection with the intolerable Goldstein appointment, that he never boasts of an appointment or apologizes for one.

Fraud got Morse out of prison. Possibly he may be put in prison again as a result of fraud. In the meantime, who the conspirators were and how they did their work is a question which a vast number of Americans would like to see answered.

The resentment of President Harding's appointment of Mr. Daugherty would continue if it should be shown that he had nothing to do with the Morse fraud. It would not be intensified very greatly if it should be proved that Mr. Daugherty hatched the scheme to dose the convict into a state in which the diagnosis of Bright's disease could be presented as a means of persuading President Taft to turn out of prison a felon able to do handsomely by those who got him out, or willing to promise to do well for those who should get him out.

Mr. WATSON of Georgia. Mr. President, if I caught the wording of the Attorney General's letter correctly, he evades the issue as to whether or not he was paid. He says he was not paid "directly" by Morse. The natural inference to be drawn from that language is that somebody paid him for Morse. It is a very suspicious equivocation. Coming from a high official of the Government it is a statement that does not carry conviction.

In all of the metropolitan papers the utmost prominence is being given to these charges made against the Department of Justice. In the other House two Republican Representatives, against whom nothing can be said, have repeatedly attacked the Attorney General and demanded that he prosecute in specific cases; and Representative WOODRUFF has said that if the Attorney General does not prosecute in the cases mentioned he will impeach the Attorney General. Assuming that Representative WOODRUFF is in earnest, the Attorney General is steering himself up against a serious situation. He can not afford to ignore what has been said against him by such papers as the New York Herald, the New York Times, the New York Tribune, and the New York World. He can not afford to ignore the fact that prominence is given to these charges on the front pages of such papers as the Baltimore Sun and the Philadelphia North American.

Why, Mr. President, the News of this city carried the contracts which Senator CARAWAY introduced in the Senate, showing photostatic copies thereof, and on the front page of the News there was reproduced the colloquy between Senator JAMES WATSON, of Indiana, and Senator CARAWAY, of Arkansas. Does the Attorney General think that the Senate and the public believe that he does not read any newspapers at all? Does he think that the Senate and the country will believe that he has been so long in ignorance of what passed here between Senators CARAWAY and JAMES WATSON, of Indiana? Perhaps a month from now he will read what was put into the RECORD yesterday and what was in all the newspapers this morning.

I have this typewritten statement from the same gentleman who put me in possession of what I placed in the RECORD yesterday:

Add to what you have already said that the district attorney's office in New York recommended criminal prosecution and confiscation of cargo, yet Daugherty wired to release ship *J. M. Young* is a matter of record in the district attorney's office, and it might be a good idea to ask Major Clark, who is handling the case in the district attorney's office, for the facts in the congressional inquiry.

2. Wine seizure: The case referred to is the Continental Wine Co., of which Nathan Musher has been indicted only last Saturday in Philadelphia for conspiracy to violate the national prohibition act. Why did Mr. Daugherty cause the $200,000 worth of wine to be released?

This was one of the first acts of Mr. Daugherty when he came into office.

3. Director Harold H. Hart, Thomas Ready, and Michall Lynch, in New York, in the Federal prohibition department there, were indicted last November for a conspiracy to violate the Volstead Act. They released illegally 2,000,000 gallons of liquor.

When they were arraigned in court, Felder appeared for them. Since this time there has been nothing heard of the case, and criminal prosecution has come to a stop.

4. There seems to be a good bit of discussion about the George Myers pardon, multimillionaire of Ohio, who was sent to Atlanta for violation of the Mann Act.

Violation of the Mann Act—a multimillionaire of Ohio!

After the judge and district attorney recommended that he be kept in jail, Daugherty recommended to the President that he be pardoned.

One can hardly imagine a crime involving greater moral turpitude than for an intelligent, educated multimillionaire, moving in the highest circles, deliberately committing such a crime as is named and penalized in the Mann Act.

Mr. President, the Attorney General says there was nothing wrong in his conduct of the Morse case. The wrong consisted in this—in practicing a fraud upon the pardoning power. Fraud vitiates all things, a pardon as well as a deed or a contract. In the eyes of the law Morse is not pardoned. His sentence has not been served out. He was sentenced to serve 16 years, according to my recollection. He did not serve a year of it, or not much more, if that much. Why should he have had a pardon just because he was sick? Is there an unwritten law which grants pardons because felons are sick? Are there no sick men in jail now? Are none of those men sick who were convicted under the espionage act of saying something imprudent during the war and given harsh terms, which they are now serving out? They have languished in prisons year after year for merely a few words displeasing to the Government. When did sickness in a prison become a ground for a pardon?

This man Morse pretended to be dying when he was not even sick. His lawyers pretended that he was dying when they knew he was not. They claimed and he claimed that all he wanted to do was to escape the disgrace of dying in the penitentiary; he could live but a few days if pardoned, but he wanted to die a free man so that his family would not be disgraced. How did he use the clemency which the President extended to him? By keeping himself and his boys out of the war, and devoting their energies and his energies to robbing the people whose boys were on the firing line.

Mr. President, if the proper course were pursued, in my judgment, it would be this: For President Harding to have an independent investigation in Atlanta, in that penitentiary, as to what took place there while the case was being worked up in Morse's favor. He can readily secure testimony to show that the whole thing on the part of Daugherty, Felder, and the doctors that Felder selected was a willful, deliberate, consummate fraud; the pardon should be set aside, and United States marshals should be sent to Maine to bring Morse back and put him where he belongs.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. The question is upon the amendment of the committee, which will be stated.

The ASSISTANT SECRETARY. On page 56, line 20, it is proposed to strike out the word "the" before the word "sheet."

The amendment was agreed to.

The ASSISTANT SECRETARY. In paragraph 312, page 57, line 7, it is proposed to strike out the word "manufactured" and the comma, and insert the same word, "manufactured," without a comma.

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 9, it is proposed to strike out the word "if."

The amendment was agreed to.

The next amendment was, in paragraph 312, page 57, line 12, before the words "per cent," to strike out "25" and insert "30," and, after the words "per cent," to strike out "ad valorem" and insert "ad valorem; sashes, frames, and building forms, of iron or steel, 40 per cent ad valorem."

Mr. ROBINSON. Mr. President——

Mr. McCUMBER. Mr. President, if the Senator will yield to me a moment, I was about to suggest that the Senate disagree

to the amendment on lines 12, 13, and 14, commencing with the words "ad valorem" on line 12. That will leave the duty at 30 per cent ad valorem.

Mr. ROBINSON. Mr. President, I shall not, of course, object to the proposition now submitted by the Senator from North Dakota. I had intended to discuss the committee amendments at length. I will merely take occasion to put into the RECORD as briefly as I can some of the reasons why I think this increase contemplated in the committee amendment should not be granted, and therefore the motion of the Senator from North Dakota, now submitted, should be agreed to.

I ask the Senator from North Dakota, for my information and guidance in the discussion of these amendments, to say whether it is his expectation to make any concession on the next amendment, the one in line 13, proposing an ad valorem rate of 40 per cent on sashes, frames, and building forms of iron or steel?

Mr. McCUMBER. Mr. President, I do not think I correctly stated the change proposed by the committee. The committee will ask a disagreement to the entire proposed committee amendments on lines 12, 13, and 14. That will simply leave the rate 25 per cent ad valorem, just as the House left it. It strikes out all the rest and puts it all on a 25 per cent ad valorem basis.

Mr. ROBINSON. Very well, Mr. President. The rates proposed by the House, and which for the present will remain in the bill if the proposal now submitted by the Senator from North Dakota is agreed to, are, in my opinion, very much more reasonable than the rates reported by the committee. It may become advisable hereafter to submit an amendment covering those two items; but for the present I shall content myself with a discussion of the proposal of the Senator from North Dakota.

This paragraph relates to structural shapes. They are divided by the trade into "heavy" and "light," and they bear certain commercial names—beams, channels, joists, girders, angles, tees, and zees—which are said to be largely descriptive of their cross-section appearance. The heavy shapes are used in the construction of bridges, ships, cars, and similar structures. The light shapes are used in the manufacture of agricultural implements, fences, safes, automobiles, and related manufactures.

The conditions relating to competition in this industry are very well set forth in the Survey of the Tariff Commission, at page 7 of C-3. I shall not take the time of the Senate to read this paragraph of the Tariff Commission Survey, but I will ask that it be inserted in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

At the present time (1921) American producers have almost entire control of the home market and are able to export from 5 to 15 per cent of the country's output. For several years, however, European producers were able to market this product on the Pacific coast, the cost of transporting structural shapes from Europe to the Pacific coast being less than the cost of shipping the domestic product from Pittsburgh by rail across the continent. The war in Europe, however, brought about a lessened importation of structural shapes, and the high ocean freight rates have largely done away with any competitive advantage which foreign producers may have had with reference to cheaper transportation rates to the Pacific coast.

Mr. ROBINSON. Mr. President, the production relating to these commodities is the subject matter of considerable discussion in the Lockwood report, the intermediate report to which I have heretofore referred in connection with manufactures of brick and cement; and I ask unanimous consent to insert in the RECORD a paragraph on page 21, down to and including the bottom of page 22 of the intermediate report of the Lockwood committee.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

From 1910 to 1917 an average of 24,922 new apartments were built each year. From 1918 to July 1, 1921, the following construction in dwellings took place:

	Number of apartments.
1918	5,706
1919	1,624
1920	4,882
July 1, 1921	1,183

This shows an average of 3,642 new apartments constructed in the post-war period, so that the gross construction fell behind 73,832 apartments. The gross construction in three and a half years fell behind 4,034 more than the net construction, which, as above stated, fell behind 69,797. All these calculations are based on official figures showing a shortage of nearly 70,000 houses on July 1, 1921.

(3) Abnormal cost of construction of building.

With this astounding shortage in dwellings, there is a correspondingly astounding increase in the cost of the essential materials of building construction. The statistics of wholesale prices of building materials from January, 1917, to October 1, 1921, compiled by the Federal Bureau of Labor, show how greatly such prices have increased. Retail prices have more than correspondingly increased.

The United States Government uses 100 as a unit to indicate wholesale prices of commodities. In April, 1920, building materials reached a maximum of 341, while general commodities, notwithstanding the extent to which they, too, have been exploited in every direction, were at their highest point at 272. In December, 1920, building materials fell to 266, while general commodities fell to 189. In February, 1921, while general commodities were at 177 building materials were still at 222.

The following statistics are from the Bureau of Labor Statistics of the United States Department of Labor. They show the index numbers of wholesale prices of lumber and building materials and of commodities in general by months from 1917 to October, 1921:

Year and month.	Lumber and building materials.	All commodities.
1917.

Mr. ROBINSON. I also call attention to two paragraphs on page 30, as follows. They are brief, and I will read them:

The total number of apartments—

That is, in New York City—

The total number of apartments, therefore, provided in new tenements erected during the past five years is only 29,120, or approximately 17 per cent more than the normal annual production before 1914.

Differently stated, there have been provided in the past five years 29,120 apartments, as against 125,000 apartments that were provided during the five years preceding the war; so that even if there had been no cessation of building the present rate of construction, taking the year 1920 or 1921, is equal to a trifle over one-fifth of the normal construction.

I also ask leave to insert in the RECORD the information furnished by the Tariff Commission in survey C-3, at page 26, being the first two tables printed on that page.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Structural iron and steel—Domestic exports (calendar years).

Exported to—	1918		1919		1920	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.

Mr. ROBINSON subsequently said:

In connection with the remarks which I made respecting paragraph 312, I ask leave to insert in the RECORD, in addition to the matter which I then had inserted, pages 128, 129, and 130 of the Lockwood report, which relate directly to combinations among the manufacturers and dealers in structural shapes.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

(35) THE IRON LEAGUE.

The struggle of the United States Steel Co., the Bethlehem Steel Co., and other manufacturers of steel throughout the United States to enforce the recognition of the so-called "open-shop" principle not only in their own plants but in every building job in which structural steel is used, has led to many pernicious results. The proof put before your committee establishes that the so-called "open shop," as enforced by the steel companies in all their ramifications, is neither more nor less than a nonunion shop.

The union men claim that all the foremen of the steel plants are required to be nonunion men. The foremen have an association of their own into which union men say they are not admitted, and that no union man is eligible as foreman in any of the great steel works of the United States Steel or in any of their affiliated industries. A vast spying system is maintained both in the steel companies and in the unions, as a result of which men who are found to be active in the unions are discovered and deprived of work. Some of these men were witnesses before the committee. The methods by which they were detected and discharged were disclosed by their testimony.

It was in effect a black-listing system. Whether it still exists your committee is unable to determine, but intends to make further inquiry.

As before stated, it was largely because of the power of the men in the steel industry to enforce this so-called "open-shop" policy in the erection of structural steel in the city of New York that Brindell was able to blackmail many builders in the city of New York. When the pretext of calling a strike upon a building that the house wreckers of his "wreckers" union were not employed, failed him, he invariably resorted to the excuse that the builder was employing nonunion men in the steel erection.

In 1919 the labor unions made an effort to organize the great steel fabricators of the country on a union basis, but they failed. In furtherance of the struggle of the fabricators to maintain the open shop, they insisted that all steel be erected upon a nonunion basis. Officials of these corporations openly claimed on the witness stand that this interference with union labor in New York City was a necessary move on their part to prevent union conditions in their shops.

To carry this policy into effect the iron and steel industry is held in a country-wide network of organizations. Manufacturers, erectors, fabricators, and employers are interlocked in this network of organization.

Among the important members of this group are:
The National Erectors' Association.
The National Steel Fabricators' Association.
The Bridge Builders and Structural Society.
The Structural Steel Society.
The American Erectors' Association.
The above are all national associations.

In and about New York City, and organized on a similar basis and for a like purpose, there is the Iron League of New York.

Manufacturers and dealers associated in these organizations refused to deliver steel f. o. b. to any owner or builder who was under obligation to employ union labor or who independently of any such obligation operated on a union basis. He could not get his structural steel f. o. b. He was obliged to contract for it erected in place, which meant that it must be erected by what these gentlemen describe as "open-shop" labor, but which is in effect nonunion labor.

The president of the Bethlehem Steel Co. frankly admitted that the combinations referred to have been effective in maintaining the open-shop principle in connection with the erection of structural steel by refusing to sell steel to builders unless they unhesitatingly subscribed to that principle.

It appears from the testimony of Eugene G. Grace, president of the Bethlehem Steel Co., on pages 3625–3630 of the testimony, that at a meeting of the Steel Fabricators' Association held on November 28, 1919, a resolution was passed putting into operation the policy of selling fabricating material for erection only on the open-shop principle.

"Our company refused to sell fabricated steel to any builder or contractor in the New York district who will not erect it on what we call the open-shop principle.

"I do not know of any builder who can get any fabricated steel for construction in the city of New York without subscribing to that resolution. I do not know of any place where he can get it.

"The policy of selling to open-shop erectors has been the policy since September, 1919, when the American Federation of Labor attempted to organize our plants.

"Q. You deny your employees, don't you, the right of acting jointly with the employees of other concerns in dealing with you and your association?—A. We would not recognize it.

"If 95 per cent of my men belonged to a union, I would not recognize them as union men or as members of the union. I think that is better for the men."

The organizations above mentioned combine within their membership almost all the manufacturers, dealers, and erectors throughout the country, and although the open-shop policy was applied at the time of our inquiry only in the vicinity of New York, Philadelphia, and some other parts of the East it was admitted that it was intended to extend the principle throughout the country. The various associations have adopted resolutions directing their members to "adjust their business" so that the open-shop principle shall be maintained on all erection jobs.

Manifestly, this is an indirect way of excluding from the privilege of purchasing structural steel any builder who does not subscribe to the open-shop principle. Expert evidence on this subject shows the extent to which the maintenance of this policy is reflected in the cost of construction. Officers of the Fuller Construction Co. and the Thompson-Starrett Co. testified that by doing their steel-erection work themselves by skilled union labor, which is more efficient than nonunion labor, they could save large sums in the cost of construction.

Because of their inability to buy steel f. o. b. these important operators have been compelled to keep their expensive erecting equipment idle and to sublet the steel erection to a member of the Iron League, to whom alone the fabricators would sell the steel for erection in the city of New York and through whom alone they will permit it to be erected.

Since the exposures of your committee we are informed—although we have not yet had the opportunity to take proof on this subject—that the policy has been so far changed that the steel manufacturers will estimate for the furnishing of structural steel, either f. o. b. or erected in place, at the option of the builder, but this new order, it is claimed, amounts in practical effect to the same prohibition as heretofore existed.

Mr. ROBINSON. The commodities embraced in this schedule are primary structural material. It is doubtful, in my opinion, whether any tariff whatever is justified under the conditions that now exist. On page 7 of the Tariff Commission's Survey C–3 are contained figures relating to domestic production and consumption, imports, and statements relating also to the tariff history, which I ask to insert in the RECORD in connection with my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Domestic production and consumption: During the years 1910 to 1919, inclusive, the domestic production per annum has varied from 1,912,367 gross tons in 1911 to 3,110,000 gross tons in 1917. About 90 per cent of the country's output consists of heavy shapes. The consumption is about 85 to 95 per cent of the domestic production. Just prior to the war there was a marked tendency for exports to increase.

Imports: Imports are less than 1 per cent of the home production. Since 1915 Canada has been the leading contributor of the foreign supply, but during the years immediately preceding the outbreak of hostilities in Europe the greater part of the imported material came from Germany. During the years 1910–1915 over half the imported structural shapes entered the United States through the customs districts of the Pacific coast, from a third to over a half entering through the customs district of San Francisco.

Tariff: Prior to the act of 1913 specific duties were imposed on imported iron and steel beams, girders, etc. During the preceding 30 years these duties were gradually reduced from 1¼ cents to three-tenths and four-tenths cent per pound, depending on value. The law of 1913 imposed an ad valorem duty of 10 per cent, which, with the price then prevailing, was equivalent to a 60 per cent reduction in rates from those imposed by the act of 1909. The high prices resulting from the war, however, have made this ad valorem duty nearly equivalent to the specific duties imposed by the law of 1909.

Mr. ROBINSON. Under the parliamentary situation I am constrained to approve of the proposal of the Senator from

North Dakota which very materially reduces both of these items if amendments which I shall propose are rejected. I desire a vote on an amendment to the provision in line 12. I will not ask for a record vote on that amendment unless some reason develops hereafter for requiring it.

I move to strike out "30" in line 12 and insert "10" in lieu thereof, so that it will read "10 per cent ad valorem."

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The question is on agreeing to the amendment offered by the Senator from Arkansas to the committee amendment.

The amendment to the amendment was rejected.

The next amendment was, on page 57, line 13, after the words "per cent," to insert "sashes, frames, and building forms, of iron or steel, 40 per cent ad valorem," so as to make the paragraph read:

PAR. 312. Beams, girders, joists, angles, channels, car-truck channels, tees, columns and posts, or parts or sections of columns and posts, deck and bulb beams, and building forms, together with all other structural shapes of iron or steel, not assembled, manufactured or advanced beyond hammering, rolling, or casting, seven-twentieths of 1 cent per pound; any of the foregoing machined, drilled, punched, assembled, fitted, fabricated for use, or otherwise advanced beyond hammering, rolling, or casting, 30 per cent ad valorem; sashes, frames, and building forms, of iron or steel, 40 per cent ad valorem.

Mr. ROBINSON. There are no separate figures on exports and imports relating to sashes, frames, and building forms, of iron or steel, but nothing brought to my attention justifies any increase in the existing rate. I much prefer the House rate to the committee rate, and I therefore will support the proposal of the Senator from North Dakota that the Senate Finance Committee amendment be not agreed to; but before taking a vote on that I submit the following amendment: In line 13, page 57, to strike out "40" and insert in lieu thereof "15."

The PRESIDING OFFICER. The Chair suggests that the amendment striking out "25" and inserting "30" is an independent amendment, and probably should be voted on first.

Mr. ROBINSON. That is true, and I think that ought to be voted on first.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 57, line 12, to strike out "25" and insert in lieu thereof "30."

Mr. McCUMBER. I ask that that be disagreed to.

The amendment was rejected.

The PRESIDING OFFICER. The Secretary will state the next amendment to the amendment.

The ASSISTANT SECRETARY. The Senator from Arkansas proposes, on line 13, page 57, to amend the committee amendment by striking out "40" and inserting in lieu thereof "15."

Mr. ROBINSON. I think I have made a sufficiently full statement on that and put into the RECORD the reasons for offering this amendment, and I will content myself with a brief addition to my former amendment. No necessity or justification exists for even the rate proposed in the House provision. Under the parliamentary situation I am at liberty to offer a lower rate, which I do, and I am ready for a vote on it.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arkansas to the committee amendment.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. McCUMBER. I move to strike out "40" and insert in lieu thereof the figures "25."

Mr. ROBINSON. As heretofore stated, I am in accord with that motion, since my own amendment did not prevail.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 57, line 18, after the word "and" where it occurs the second time, to strike out "forty" and to insert "nine"; and in line 20, after the word "and," to strike out "forty" and to insert "nine"; so as to read:

PAR. 313. Hoop, band, and scrool iron or steel, not specially provided for, valued at 3 cents per pound or less, 8 inches or less in width, and thinner than three-eighths and not thinner than one hundred and nine one-thousandths of 1 inch, twenty-five one-hundredths of 1 cent per pound; thinner than one hundred and nine one-thousandths and not thinner than thirty-eight one-thousandths of 1 inch, thirty-five one-hundredths of 1 cent per pound; thinner than thirty-eight one-thousandths of 1 inch, fifty-five one-hundredths of 1 cent per pound.

Mr. ROBINSON. I make no objection to that.

The amendment was agreed to.

The next amendment was, on page 58, line 3, after the word "are," to strike out "made," and to insert "made:".

The amendment was agreed to.

The next amendment of the committee was, on page 58, line 5, before the words "per cent," to strike out "20" and to insert "35"; so as to make the proviso read:

Provided, That barrel hoops of iron or steel, and hoop or band iron, or hoop or band steel, flared, splayed, or punched, with or without buckles or fastenings, shall pay no more duty than that imposed on the hoop or band iron or steel from which they are made; bands and strips of iron or steel, whether in long or short lengths, not specially provided for, 35 per cent ad valorem.

Mr. ROBINSON. I do not believe this amendment ought to be agreed to.

Mr. SMOOT. Mr. President, before the Senator concludes what he has to say, I want to give notice now that the committee desires to make that 25 per cent instead of 35.

Mr. FLETCHER. That is better.

Mr. ROBINSON. The Senator from Utah has just informed me that the Finance Committee, in lieu of the amendment which it has heretofore reported, namely, to strike out "20" and to insert "35," will propose another amendment, striking out "20" and inserting in lieu thereof "25." Of course, the latter amendment is much more acceptable, from my standpoint, than the pending committee amendment, and while I think the rate would still be high and that the committee might very well afford to disagree to its amendment and thus leave in force the rate reported by the House, which, in my opinion, also would be higher than is necessary or justifiable, I would, of course, much prefer the amendment which the Senator from Utah says will be proposed to the one which is now pending.

This paragraph applies to barrel hoops, or such other hoops as are not otherwise provided for. The present rates are 10 and 12 per cent, respectively. The House inserted an ad valorem rate of 20 per cent, which I think is adequate, if not too high, in view of the information furnished the Senate respecting this item. The production is great, and the imports are small.

Mr. CUMMINS. May I ask the Senator from Arkansas a question in order to determine how I will vote on this question?

Mr. ROBINSON. I yield to the Senator.

Mr. CUMMINS. If the duty the Senator now mentions is reduced to 25 per cent ad valorem, would that be a higher or a lower duty than the House provides?

Mr. ROBINSON. The House having adopted its rate on the basis of the American valuation, and this rate being based on the foreign valuation, the practical effect of it would be a lower rate; but not only is the House rate based on the American valuation too high, in my opinion, but the proposed Senate rate would be too high.

Mr. CUMMINS. I have been wondering whether, if I voted to increase the rate from 20 per cent to 25 per cent, I would be voting for a higher or a lower rate.

Mr. ROBINSON. I can not answer that question any more than the Senator himself can, for the reason that the chairman of the Ways and Means Committee of the House, if I may be permitted to mention him, has announced that the American valuation will stay in this bill; that he proposes to persist in the attitude taken by the House on that subject until the snow flies, or the "cows come home," or some such characteristic statement. Of course, if we agree to a rate based upon the theory that the American valuation is not going to apply, and then the Senate conferees in the conference are compelled to recede from their position sustaining the foreign valuation, and the American valuation finally is adopted, the rate would be enormously high. In any event, even if the foreign valuation applies, I propose to show the Senate, in a very few words, that the rate proposed is too high.

On page 400 of the Summary of Information, furnished by the Tariff Commission, is contained the following statement:

Production figures of hoops and bands described in paragraph 313 are not available. In 1917 the entire output of hoops amounted to 347,186 gross tons; of bands and cotton ties to 490,893 gross tons. In 1920 the output of these products aggregated 333,440 and 388,862 gross tons, respectively.

Imports: Imports of hoop, band, and scroll iron and steel are small. In 1913 they amounted to 2,004 gross tons, valued at $300,161. These figures include some galvanized material. Since 1917 imports have been as follows:

HOOP, BAND, AND SCROLL IRON OR STEEL, N. S. P. F.

Calendar year.	Quantity.	Value.	Duty.	Ad valorem rate.
	Pounds.			*Per cent.*
1918	26,667	$2,086	$209	10
1919	55,207	5,399	540	10
1920	5,410	718	72	10
1921 (9 months)	153,719	6,995		

STRIPS OF IRON OR STEEL, N. S. P. F.

1918	81,085	$22,478	$2,697	12
1919	40,312	7,823	939	12
1920	315,293	64,430	7,735	12
1921 (9 months)	272,129	85,778		

In addition to this imported material there was a small amount of barrel hoops, fully or partly manufactured, coming into the country.

Exports of hoop, band, and scroll iron and steel in 1913 amounted to 41,019,908 pounds (6,259 gross tons), valued at $798,974. Exports in later calendar years have been as follows:

	1918	1919	1920	1921 (9 months).
Quantity .....pounds..	113,508,597	113,871,668	119,725,535	35,376,925
Value.....	$7,711,195	$6,875,586	$6,445,155	$1,656,892

With this statement and with these matters in the RECORD, and the announcement by the committee or its representatives on the floor that there is a purpose to offer, in lieu of the pending amendment, an amendment providing 25 per cent ad valorem, I shall discontinue further remarks.

Mr. SMOOT. Does the Senator want to offer his amendment to the 35 per cent rate now, or shall I offer my amendment proposing to reduce it to 25 per cent?

Mr. ROBINSON. I think I had better offer my amendment now because that in the parliamentary situation would be the proper procedure. On page 58, in line 5, I move to strike out "35" in the committee amendment and insert in lieu thereof "10," so as to read:

Bands and strips of iron or steel, whether in long or short lengths, not specially provided for, 10 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. SMOOT. Mr. President, on page 58, line 5, I move to amend the committee amendment by striking out "35" and inserting in lieu thereof "25," so it will read "25 per cent ad valorem."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. STANLEY. Mr. President, I was prepared to introduce an amendment to paragraph 312 and I was under the impression that the Senator from Arkansas [Mr. ROBINSON] was still discussing that paragraph after the amendment offered by the Senator from North Dakota [Mr. MCCUMBER] had been agreed to. I ask unanimous consent to return to that paragraph.

The PRESIDING OFFICER. The Senator from Kentucky asks unanimous consent to return to paragraph 312 for the purpose of offering an amendment. Is there objection? The Chair hears none, and it is so ordered.

Mr. STANLEY. As I understand, the Senator from North Dakota has already suggested an amendment to this paragraph striking out 30 per cent ad valorem in the case of steel "fabricated for use or otherwise advanced beyond hammering, rolling, or casting."

The PRESIDING OFFICER. The Secretary will state the parliamentary situation with respect to the amendments in paragraph 312.

The ASSISTANT SECRETARY. In line 12 the committee amendment was disagreed to, proposing to strike out "25" and insert "30," leaving 25 as the rate per cent ad valorem; in line 13, the numerals "40" were stricken out and "25" inserted in lieu thereof, leaving the rest of the amendment as it now reads.

Mr. ROBINSON. I myself offered amendments reducing 30 per cent, in the first instance, in line 12, to 10 per cent, and reducing 40 per cent, in line 13, to 15 per cent, and those were both voted down.

Mr. STANLEY. As it now stands it is 25 per cent ad valorem in each case?

Mr. MCCUMBER. That is correct.

Mr. STANLEY. Mr. President, the rescission from the position previously taken by the committee is indicative of a lack of confidence in the duties formerly proposed. This reduction should be infinitely more sweeping than it is.

It has been said that steel is the vertebræ of our industrial life. If there is any part of that steel which is essentially the very backbone of the steel industry it is the steel girder and the steel beam. One-tenth of all the pig iron produced—and we produce more pig iron than all the rest of the world—is converted into girders, I-beams, or other structural shapes. From one-seventh to one-tenth of all the steel made in the United States finds its market ultimately in some form of structural shapes.

The Tariff Commission in its report on structural shapes, says:

Structural shapes vary in size, weight, and form, according to the uses to which they are to be put, but they are broadly classified into heavy and light. Those classified as heavy have a leg or web of 3 inches or over and are used in the construction of buildings, bridges, cars, ships, etc. Light structural shapes have a leg or web less than 3 inches and are used in the manufacture of agricultural implements, bedsteads, fences, safes, automobiles, and other articles requiring light section.

This form of steel meets the eye wherever it is turned—upon a culvert or bridge, at every lofty structure, an agricultural implement of any complexity, and retiring to your bed at night, if it is an iron bed, you find some sort of steel fabricated into a structural shape.

Three million tons of steel are fabricated into these shapes, and there is absolutely no necessity from any point of view for one single solitary cent of protection. We could take off the 30 per cent duty, and that is practically what the committee have proposed, because it does not make any difference whether it is 25 or 30 per cent specific duty, or whether you propose seven-twentieths of a cent per pound, for that is 28 per cent of the cost of production.

A duty of 25 per cent on structural shapes guarantees to the steel corporation, which produces more than 50 per cent of the $60,000,000 worth of structural shapes, the right to extort 25 per cent more from every edifice that is constructed, from every road that is built, from every baby buggy or bed that is made, from every agricultural implement used in tilling the field or harvesting the grain.

The plants of the Old World are small, pitiful, and obsolete compared with the magnificant structures erected in this country for the fabrication of steel from the bloom and the billet. When you have finished steel, when you reach the point where you are making razor blades and knives and roller skates and articles of cutlery and things of that sort, they are made all over the country in little inexpensive establishments. But the concerns which are rolling steel must have from $20,000,000 investment up.

It must be remembered that steel is never touched by a man's hand in a properly operated mill from the time the ore leaves the mine or the range until it comes out complete and is lifted by a bar magnet upon the cars to be shipped to its ultimate destination. The iron comes from the blast furnaces in a great ladle, which is nothing more nor less than a moving car; several tons are dumped into a steel converter in an open-hearth furnace, and is poured from that furnace into a mold five feet high, and a great crane that can lift that mold as lightly as if it were a feather, handling it with absolute accuracy, drops it upon the rolls and then half a dozen men, as the Senator from Alabama [Mr. UNDERWOOD] has said, operate those rolls from their lofty perches near the roof of the building, and direct those mightly cranes and start them in motion, and the bloom is transformed into a plate of whatever shape it is desired and is cut ready for use.

The labor cost in producing a ton of pig iron is 71 cents, according to the authentic figures given by the Tariff Commission. The labor cost in producing a ton of structural shapes is two dollars and a few cents, and the great majority of the laborers who work on that are foreign born and were brought here a few years ago. There is no basis here for the argument you must pay American labor more than you pay the labor of France or England or Germany. Three-fourths of the men who handle the material up to this time, whether they are digging coal or the ore or operating the blast furnaces, with the exception of a few skilled men, are in the main foreign born. Be that as it may, the labor cost is but a fraction of the duty imposed.

Were you to place all structural shapes on the free list, the Senator from Utah or the Senator from North Dakota can not show me one spot in this country where they could establish the business of selling structural shapes outside of the Pacific coast. It would be impossible, unless the difference in the price charged by a monopoly here and by the producer abroad would overcome those handicaps which Mr. Carnegie himself said are prohibitive. It must be remembered that the man who made more structural shapes than any other man in the world was Andrew Carnegie. He started out with a concern that was making a few thousands tons of it, and he multiplied the production 1,000 per cent. If Andrew Carnegie had never stopped making structural shapes, in my opinion, we would have had no World War. There would have been no rivalry between England and Germany for a place in the sun. He would have been the ironmaster of the world.

A few years ago I discussed the necessity for a tariff upon these various structural shapes that are the backbone and vitals

of the industry. I venture the assertion that outside of steel rails there is nothing that enters so essentially into the industrial life of America as do the structural shapes which are covered by paragraph 212. The chairman of the Committee on Interstate Commerce [Mr. CUMMINS] honors me by his attention here this afternoon. He knows that the vital question now is, How can we reduce the rates charged by the railway carriers for the transportation of agricultural products without bankrupting the railroads? The question of economy of railroad construction is involved. The only difference between a steel girder or beam and a steel rail is that, as a rule, the beam or girder has the same flange on the top and bottom, whereas in the rail there is a little difference in the flanges; but the same construction applies. Railroad cars are in the main made from these structural shapes; ships are made from them. Why guarantee to the United States Steel Corporation the right to charge 25 per cent more than a foreign competitor would charge who can not enter the American market anywhere except, perhaps, on the Pacific coast?

I desire to read into the record some of the testimony of Mr. Carnegie, given January 11, 1912, when he testified here in the city of Washington on this subject, as appears on page 2446 of the hearings before the committee investigating the Steel Corporation. He had referred to the fact that at one time he had advocated a duty on steel. Mr. STERLING asked Mr. Carnegie:

The day of infancy has passed with the steel industry in this country, has it not?

Mr. CARNEGIE. Long ago.

Mr. STERLING. What do you think about it now?

Mr. CARNEGIE. Was I not before you in Congress two years ago, and did I not tell you that you need not have any duty on steel?

Mr. STERLING. I believe you did.

Mr. CARNEGIE. And I wish to confirm it. A gentleman on the New York Times—Mr. Smith, ex-president of the Chamber of Commerce of New York—a personal friend, when I had said to President McKinley when he went up to make his reciprocity speech at Buffalo, came out, saying, "I wish to corroborate what Mr. Carnegie has said." I was present and heard him tell President McKinley that there was no need for a tariff on steel.

I have never appeared before Congress without urging reductions. It was $28, and got down to $4—

He is speaking about rails now—

and there is no more use of keeping that $4 a ton on in the tariff than that you should protect your grain.

Mr. GARDNER. Are you speaking of steel rails entirely?

Mr. CARNEGIE. That is what he asked me about—steel rails.

Mr. GARDNER. I think he asked you a little more, generally, than that.

Mr. STERLING. Would you say the same thing with reference to all steel manufactures?

Mr. CARNEGIE. Yes; with reference to all steel manufactures, unless, unknown to me, for instance, there might be such a case as needles. I do not know whether we make any needles yet in this country. Do you?

Mr. STERLING. I do not.

Mr. CARNEGIE. Do you know, Judge?

Mr. REED, Sr. No.

Mr. CARNEGIE. It is a great business. If the men came to me and I was in Congress as you are, and said: "We want to go into making needles in America, and none are made now, and we need a tariff"; and if I looked into it and satisfied myself that they did, I would consider it statesmanship to give those men protection in the infancy of that manufacture.

Mr. STERLING. Are we manufacturing heavy steel, steel rails, and other steel, as cheaply now as they do in Germany?

Mr. CARNEGIE. I think so; except for a small concern in Germany that has a small deposit of ore that justifies two little furnaces only being built. That is very often quoted in connection with the statement that Germany can make steel so cheap. But the product is so small that it is a negligible quantity.

I believe if you had free trade for steel of all kinds throughout this Republic the amount imported would be trifling.

Mr. STERLING. We are paying higher wages, are we not, for steel workers than they do in Germany?

Mr. CARNEGIE. Higher per man; but the product per man is another thing.

You can not compare the machinery that we have for steel and the machinery that older countries have. They have not the market for the steel that justifies these enormous mills.

Mr. REED. Is Judge Sterling asking about Mr. Carnegie's knowledge of conditions when he left the steel business, or about the conditions of to-day?

Mr. STERLING. I am asking about the conditions now, at the present time. That is the way I put my question.

Mr. GARDNER. He testified that he did not know in regard to the last 10 years. I am giving you my opinion, remember, Judge.

Mr. WATSON of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from Georgia?

Mr. STANLEY. Certainly.

Mr. WATSON of Georgia. The Senator from Kentucky no doubt remembers that when they were building the Manchurian railway American steel companies underbid England and Germany for the rail contract and furnished steel rails for those Manchurian railways.

Mr. STANLEY. Mr. President, Canada imposes a preferential in favor of Great Britain of 27 per cent on structural shapes and a general tariff of 42½ per cent, yet the Jones-Laughlin Co. testified that they overcame that differential and sold at a profit in Canada and are doing it right now. We can lay steel rails down in England cheaper than they can produce them there; we can put structural shapes in London cheaper than they can be produced at home.

It must be remembered that when it comes to talking about the labor costs in the iron and steel and coal business it is mere moonshine. We pay 40 per cent more to a coal miner in the United States than a miner receives in Wales, but the output of the American coal miner is 300 per cent as great as that of the Welsh miner. To-day we are producing coal at $1.50 a ton less than it is being produced at Cardiff, in Wales, at starvation wages. We are digging ore cheaper than it is dug anywhere in the world; we are producing coal cheaper than it can be produced anywhere in the world; we can produce pig iron cheaper in Pittsburgh than it can be produced anywhere in the world. Julian, the greatest expert on the production of blast furnaces that civilization ever saw, who is to his business what Edison is to electricity, who built the Lucy furnace for Carnegie, who built the great furnaces at Gary, Ind., and who has built furnaces in Great Britain and India, has said that OSCAR UNDERWOOD'S people in Birmingham, Ala., could produce pig iron $3 cheaper than they can produce it even in Pittsburgh.

Mr. WATSON of Georgia. They have a monopoly of the open-hearth process, as I understand.

Mr. STANLEY. Exactly. Now, to get down to structural shapes. Mr. STERLING asked Mr. Carnegie—

Do you think we could compete in structural iron and steel now with foreign countries without a tariff?

Mr. CARNEGIE. I do; I do.

The CHAIRMAN. I would like to have you amplify that statement, Mr. Carnegie. Why should not the Germans ship structural iron and steel here to build skyscrapers in Chicago and New York and Washington?

Mr. CARNEGIE. Because the United States Steel Co. would not let them.

Gentlemen, let me say one word about a protective tariff: It does not put the foreigner on the same basis as it does the native when the duty is removed. We are a community here.

If you want to build a house, Mr. Chairman, on Fifth Avenue, and you need steel beams, and you are living in New York, you want to buy them from your neighbors, do you not? Because some day your neighbor will be wanting something that you are interested in.

The CHAIRMAN. When I build my palace on Fifth Avenue, I am going to get a steel home.

Mr. CARNEGIE. Then, besides, you are patriotic. I never knew an American who was not, and I do not know what I would not do to an American that was not patriotic, with such a grand country as this, the land of triumphant democracy.

Then this very practical man, who had made and sold more structural shapes than any other man since Adam, goes on to tell of the disadvantage under which the foreign manufacturer labors in selling structural steel shapes in the American market:

Gentlemen, the foreigner who supplies this market must have an agency in New York and pay commissions. He must pay freight rates to the seaboard. He must pay freight rates inland. But, mark you, you give an order for steel, and you want to be mighty sure that the steel will be delivered, and if there is a mistake in the specifications and a lot of bars are wrong and do not fit and your edifice is delayed—you do not want to run that risk. If you are a wise man, you will get your steel from Charlie Schwab, at Bethlehem.

* * * * * * *

Mr. CARNEGIE. Then to do any effective business the foreigner must have a big yard here, with all the sizes that he can deliver for a prompt job—everything that is wanted.

Gentlemen, the difficulties, the disadvantages of buying foreign material to use in this country, positively none of you can grasp. You have to experience them to fully understand them.

Therefore we have a tariff against foreign steel, even if there was no rate of duty imposed. The foreigner labors under severe disadvantages, and you need have no fear on that score.

Take this from me: Don't you be alarmed. The foreigner will not send steel to this country.

Reference has been made here to some imports of steel amounting to a few hundred thousand dollars coming into this country. As bearing upon that question I desire to quote the following from Mr. Carnegie's testimony:

Mr. STERLING. Is it not true that the foreign manufacturer has controlled the iron and steel market on the Pacific coast, and is doing so now largely?

Mr. CARNEGIE. Let me show how you come into a different atmosphere there.

Mr. STERLING. That is true, is it not?

Mr. CARNEGIE. Well, yes. I think the Pacific coast is entitled to get foreign steel in there. You have 3,000 miles, you might say, in round numbers, 2,500 miles even from Pittsburgh, 2,000 from Chicago, and very high rail freights, and there your purchaser in San Francisco is at the same disadvantage, so far as American products are concerned, as is the eastern purchaser or the purchaser in other portions of the country away from the Pacific coast if he purchases from Britain, because he is far away from the source of supplies and mistakes can not be rectified, and so on.

Ships going away from San Francisco are loaded with produce, etc., but they come over here empty, and they are willing to take steel at excessively low rates. I think that no manufacturer on the Atlantic seaboard should deny the Pacific seaboard access to material that they need for building there.

But let us assume for the sake of the argument, Mr. President, that it is the policy of this country not only to equalize the cost of production at home and abroad but to equalize the cost of transportation, too, and to say that if any foreigner can ship to San Francisco a ton of steel for less than the manufacturer in Pittsburgh can send it 3,000 miles, then every other market in the United States must be artificially boosted until that manufacturer can charge in New York, and in New Orleans, and in Chicago, and in Louisville, and in Memphis a sufficient profit to enable him to pay a 2,500-mile rate and sell at a profit in San Francisco. What is the fact? How much is coming in at San Francisco? One-half of all the structural shapes that come into the United States come into the port of San Francisco, less than 7,000 tons; and if the chairman wants my figures I have them here and will put them in the record—less than 7,000 tons. As compared with our production of these vital things that make beds, and houses, and farming implements, and roads, and bridges, and warehouses, and ships, and cars, less than 1 per cent comes in. Less than $800,000 worth is the most that has ever come in during the last 10 years in any one year, and our exports amount to from 10 to 15 per cent of our entire production. In 1918 more than $23,000,000 worth were shipped abroad; and while we are building cars and erecting bridges and structures in Canada, in Quebec, in Rio de Janeiro, in Buenos Aires, around the world, while we are shipping to Canada and to Japan, while great merchantmen loaded with our steel products are landing them in the Land of the Midnight Sun at less than they get for them here at home, you say, in the face of such testimony as that: "If the Steel Corporation want to have their profits insured, we will guarantee them that no competition shall come in from abroad without paying 25 per cent on the value of the product to do it."

I am amazed, utterly amazed, at the brazen, callous unconcern that is exhibited. "Whom the gods would destroy, they first make mad." Do you think that the intelligent purchaser in this country is asleep, or dumb, or stupid? Do you dream that the purchaser of $60,000,000 worth of structural shapes will never know what you have done to him? There is a demand for economy.

Railroads are attempting to get the advantage of a cheaper market. The makers of these same structural shapes, I will say to the chairman of the committee, took this Government by the throat when it fought yonder at Verdun and at Sedan for its life, and your War Department secured a modification of the law by which they could secure competition and buy structural shapes for the construction of the works on the Panama Canal and for the construction of their ships. But yesterday the Senator from Wisconsin [Mr. LA FOLLETTE] introduced here a resolution to investigate the legality of another titanic combine that designed to share the enormous earnings of this concern. To-day the cost of producing these same structural shapes, according to your own figures, prepared by your own Tariff Commission, is about $25 a ton, taking one year with another. They are selling this stuff at over $30 a ton. They are making now from 20 to 30 per cent, and you guarantee them 25 more. "Walk blindfold on; behind thee stalks the headsman!"

There is nothing in all the ingenuity of the fallacy of protection; there was never a sophism invented to defend or to extenuate the despicable policy that applies to this schedule. The cost of production is admittedly lower here than abroad. We are producing structural shapes from $2 to $5 a ton cheaper than they are produced at this hour in Belgium or Germany or Great Britain, or anywhere else on the reeling earth.

You say you want to protect American labor, when American labor has as little to do with it as the single man driving one of these tractors with 10 plows behind it has to do with the labor cost of fallowing a field. I defy the chairman of this committee, with all his expert knowledge, to go through the thousands of pages in these reports and show me one industry to-day between Cape May and the Golden Gate where human labor is represented by as little cost as in the production of pig iron and semifinished steel.

The labor cost of producing a ton of pig iron, according to your own figures, is 71 cents; and do you know what happens in this great furnace? From the time the ore was dug on the Mesaba Range until it finds its gleaming, molten way into a great ladle it costs 71 cents a ton. When that ladle is full, an operative, as the Senator from Alabama has well said, touches a button, and a steam locomotive, with perhaps 20 cars spilling the gleaming, spitting stuff, roars into a great mill, and these cars are automatically dumped into open-hearth furnaces holding many tons, and there they boil and seethe like a caldron; and then that furnace is tapped and it is poured into another mold, and in that mold it cools until it has the consistency of pitch, and it is lifted white hot onto a set of rolls, and when it comes out it is structural shapes; and maybe a dozen men have had charge of it—an operation of an hour or two, a few cents of human labor, and 3,000 per cent added to its value! The labor cost is negligible.

They have not the same kind of machinery in the Old World. They are not comparable. There is no question of equalizing labor costs; no question of cost of production; no question of dumping. All the cartels of Germany can not dump a ton of structural shapes in the United States unless the Steel Corporation is willing to have it done. More than that, you can not sell structural shapes like you sell cotton or corn or wheat. You produce your wheat, and anybody can sell wheat. It sells itself. You sell it in the open market of the world.

We produce tobacco. We sell it in the open market of the world. We produce corn. It is sold in the open market of the world. You can not sell structural shapes in that way. Those shapes are sold, as the Senator from Alabama knows, before they are made, as a rule. They are sold on contract. They must be of a certain tensile strength, of certain dimensions, and then they go to jobbers who are controlled by the great corporations, who are part of the great corporations, like a great lumber yard, and these contractors contract with this jobber for so many girders of such a length.

Why, the other day I went down here to Ironton, Ohio, to the dedication of a bridge spanning the Ohio River that cost nearly $1,000,000; and every piece of iron or steel in that bridge was sold before the white-hot metal ever left the furnace. Every piece came there ticketed and numbered, a few carloads at a time; and when they finished the structure of that bridge you could carry off in a wheelbarrow everything that was left. The same thing is true of your buildings here. What fool, what driveling industrial ass, would construct a great depot or hotel or bridge and expect to convert specifications in the metric system into feet and inches and to supply his orders from Antwerp or Brussels or London?

I ask the chairman of this committee or any other champions of a protected Steel Trust, of a subsidized monopoly that is now under indictment for being a monopoly and in combination with the Brick Trust and the Cement Trust as well, to show me where one great single structure has ever been built in the last 10 years between the North Woods and the Gulf of Mexico out of imported steel. There is no excuse for it, except that the people that you love, and who love you, and who make 50 per cent or more of this stuff—the richest, the greatest monopoly that the world ever saw or ever will see, with two billions and over of wealth—have said, "We want our pound of flesh; we want to maintain our schedules; we want this guaranty of immunity from any possible competition"; and docilely, unquestioningly, and stupidly you will give it.

Mr. President, I wish to offer an amendment providing for one one-thousandth of 1 cent a ton on these various articles in place of 25 per cent ad valorem.

Mr. McCUMBER. I do not understand that there is any agreement to reconsider this section at the present time. We passed some time ago the section about which the Senator has been talking, and have passed another paragraph since then.

Mr. STANLEY. The Senator agreed to return to it, I understand.

Mr. McCUMBER. The Senator said he would return to it, and the Senator has returned to it.

Mr. ROBINSON. I suggest to the Senator from North Dakota that he permit a vote to be taken upon the amendment of the Senator from Kentucky.

Mr. McCUMBER. If the Senator will ask that the vote by which the amendment was agreed to may be reconsidered, so that he may offer an amendment, I will gladly consent.

The PRESIDING OFFICER. As to which amendment does the Senator desire the vote reconsidered?

Mr. STANLEY. I offer this amendment, in place of seven-twentieths of 1 cent a pound, to insert one one-thousandths of 1 cent a pound.

The PRESIDING OFFICER. That is an amendment to the text of the bill, and under the unanimous-consent agreement it will not be in order until the Senate committee amendments are completed.

Mr. ROBINSON. I call the attention of the Senator from Kentucky to the fact that, as I think I suggested in my remarks, the provision is not now subject to amendment under the rule under which we are operating.

Mr. STANLEY. I can not offer an amendment?

Mr. ROBINSON. The Senator can not offer an amendment at this time. After the committee amendments have been disposed of the Senator's amendment would be in order.

Mr. STANLEY. I understood Senators had been offering amendments to lower the rates in the bill.

Mr. McCUMBER. Only affecting committee amendments.

Mr. CUMMINS. Let me understand. When the time comes to offer an amendment on the floor, I expect to have some to offer to this schedule; but the duty of seven-twentieths of a cent per pound has not been changed by the committee, as I understand it, and there is no committee amendment pending.

Mr. McCUMBER. There is not.

Mr. CUMMINS. Therefore that could not be dealt with at this time?

Mr. ROBINSON. Not until all the committee amendments have been disposed of.

Mr. CUMMINS. Precisely. I wanted to keep the matter in order.

Mr. FLETCHER. I call the Senator's attention to the fact that it is in order to amend in line 12, where 30 per cent is provided for, so as to make that whatever he likes, and, in line 13, to change "40 per cent" to whatever he likes.

Mr. STANLEY. I thank the Senator. I will then offer an amendment——

The PRESIDING OFFICER. Those amendments have already been agreed to. Has the Senator asked that the vote by which they were agreed to be reconsidered?

Mr. STANLEY. I ask that the vote by which the last-mentioned amendment was agreed to be reconsidered.

Mr. SMOOT. I want to say to the Senator that his discussion had nothing whatever to do with the articles the rates on which he is now undertaking to amend.

Mr. STANLEY. I am talking about paragraph 312.

Mr. SMOOT. But the ad valorem rates, which have already been agreed to and reduced, have nothing whatever to do with the structural shapes of iron or steel.

Mr. STANLEY. Wherever there is a hole in them, wheresoever they are fabricated in any way, this new rate would apply.

Mr. SMOOT. The Senator does not think the foreigner would put a hole in them and pay a higher rate?

Mr. STANLEY. No; but the producer would cut a hole in them and get a better rate.

Mr. SMOOT. But whenever the hole is in it there is a higher rate, and no fool would put a hole in it and have to pay a higher rate.

Mr. STANLEY. I want to stop the fool from putting a hole in it and getting a better rate.

Mr. SMOOT. That is not the question. That story of people putting holes in these things was exploded in 1909.

Mr. McCUMBER. Allow me to suggest to the Senator from Kentucky that the amendment he wants to make would apply to the other portion of that paragraph, and it seems to me that inasmuch as that will come up again, he had better defer his amendment until general amendments are in order.

Mr. STANLEY. I am perfectly willing to defer it until it can be offered, but I wished to get a vote on it at this time if possible.

Mr. FLETCHER. Let me ask the Senator if he does not want to reduce the duty on this fabricated product?

Mr. ROBINSON. I offered an amendment myself reducing that.

Mr. SMOOT. And that has been voted on.

Mr. McCUMBER. I will say to the Senator from Florida that the Senator from Arkansas offered two amendments there, and they were voted on.

Mr. FLETCHER. I remember that, but I did not know that the Senator from Kentucky proposed to make the rate still less.

Mr. McCUMBER. I assume that the Senator from Arkansas made it as low as he thought it ought to be.

Mr. ROBINSON. The amendments I offered would not have made the rates as low as I thought they should be.

Mr. McCUMBER. Mr. President, the Senator from Kentucky has several times sent his defy across the aisle to the Senator from North Dakota, and I want to say to the Senator just now that that probably will be accepted some time later. I stated to the Senator from Alabama a short time ago that I did not desire to cross a bridge until I came to it, and I will say to the Senator from Kentucky that I do not wish to go back to a bridge which I have already crossed, especially as I am certain that in the cycle of events I shall get back to that bridge anyway, when I shall discuss that part of it.

The next amendment of the committee was, in paragraph 315, page 58, line 17, after the word "valued," to insert the word "at," so as to read "valued at over 4 cents per pound, six-tenths of 1 cent per pound."

The amendment was agreed to.

Mr. FLETCHER. Have we disposed of the amendment on page 58, line 5?

The PRESIDING OFFICER. That amendment has been disposed of.

Mr. ROBINSON. Mr. President, before proceeding to paragraph 315, I wish to make a brief statement respecting paragraph 314. No committee amendment to that paragraph is proposed, and therefore no amendment reducing the rate on cotton ties would be in order at this time. However, as the question will undoubtedly arise hereafter in connection with an amendment when the same is in order, I want to put into the RECORD a very brief statement relative to this subject.

The production of cotton ties, which are now on the free list, in the United States is limited to 6 plants—4 in Pennsylvania, 1 in Georgia, and 1 in Alabama. The total output of these factories is between 2,000,000 and 3,000,000 bundles annually, each bundle weighing 45 pounds, making, upon the maximum product, 135,000,000 pounds.

Under the rate imposed in the bill, line 11, page 58, there would be approximately $405,000 added to the cost of the producers of cotton in marketing the same by reason of the tax on ties if this provision prevails, and the amount of the tariff should be reflected in the price of the ties.

The imports, as appears from page 403, are almost negligible. I ask leave to insert in the RECORD a paragraph relating to imports found on page 402 of the Compilation of Surveys made by the Tariff Commission, and also the paragraph relating to exports, which shows that the exports considerably exceed imports of this commodity.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

Imports of hoop or band iron, etc., in 1915 were 1,416,538 pounds, valued at $22,552. Later statistics follow:

Calendar year	Quantity.	Value.
	Pounds.	
1920	131,370	$5,952
1921 (9 months)	1,055,365	32,883

Exports are irregular; they depend almost entirely upon the cotton crop and English competition. It is roughly estimated that in recent years they have ranged somewhat over 1,500,000 pounds annually.

Important changes in classification: Hoop or band iron or steel used for baling cotton or any other commodity has been transferred from the free list of the act of 1913 (par. 509).

Mr. FLETCHER. Mr. President, before passing by these various paragraphs, I wish to read a copy of a letter which was written by the Cleveland Twist Drill Co., of Cleveland, Ohio, with reference to the duties in schedule 3 as affecting high-speed drill steel. In that letter the writer states:

CLEVELAND, OHIO, *April 18, 1922.*

Mr. JAMES L. BRUFF,
Counsel the Drill & Reamer Society,
116–120 West Thirty-second Street, New York City.

DEAR MR. BRUFF: There has just come to hand a copy of the Fordney tariff bill as reported to the Senate with the McCumber amendments. In this amended bill as now before the Senate we note that the duties on tungsten, tungsten products, and steels containing tungsten have been increased considerably as compared with the duties in the original bill. There has also been a slight increase in the "basket" clause, which we assume is the one that covers small tools, i. e., drills, reamers, taps, milling cutters, etc.

In "Schedule 3, metals and manufactures of," the bill, as reported to the Senate, provides in paragraph 304 that steels valued above 16 cents a pound pay an ad valorem duty of 25 per cent. In paragraph 305, on all steel containing more than 0.6 of 1 per cent of tungsten an additional 10 per cent ad valorem is levied, and also an additional cumulative duty of 72 cents a pound on the tungsten content in excess of 0.6 of 1 per cent. In paragraph 393, which is the "basket" clause, articles composed wholly or chiefly of iron, steel, etc., are assessed a duty of 40 per cent ad valorem.

Assuming "high-speed" drill steel to have a foreign value of 50 cents a pound and to contain 18.6 per cent of tungsten, we calculate the duty, under the Senate bill, on this steel as follows:

Under paragraph 304, 25 per cent of 50 cents equals	$0.125
Under paragraph 305, 10 per cent of 50 cents equals	.05
Under paragraph 305, 18 per cent of 72 cents equals	.1396
Total	.3146

This duty is equivalent to 62.9 per cent of the foreign values, and is more than one and one-half times the duty on "high-speed" drills under the "basket" clause.

The high-speed steel manufacturing interests will undoubtedly take advantage of the high duties on their products to raise the price of high-speed steel to their customers. Foreign small tools similar to what we manufacture will pay a duty less than two-thirds the duty on the raw steel itself. These tools, which can be made in Germany and England by labor receiving a lower scale of wages than American labor, thus enjoy a double advantage over American-made tools; that is, they have an advantage in a lower labor cost to convert the steel into tools, and also a lower import duty on the tools themselves when compared to the steel from which they are made.

In the past we have always purchased "high-speed" steel from American makers and are not now looking for foreign sources of supply to the detriment of American steel producers. However, we believe that a tariff which places higher duties on tungsten and tungsten steels than on finished tools containing tungsten will injure the producers of these products as well as the industries which use materials containing tungsten. Foreign manufacturers can buy tungsten from Burma and China without paying the 60 cents a pound plus 25 per cent ad valorem duty demanded by this bill. They can make this tungsten into low-cost steel and convert this steel into "high-speed" tools which will have a relatively low value. These low-priced tools, when sold in the American market, will deprive American steel makers of just that much of their market for the steels which they manufacture.

In normal times the Cleveland Twist Drill Co. employs over 1,200 workmen, of which about one-quarter produce tools for export. By reason of the slump in foreign exchange we have lost practically all of our export trade. With the recent improvement in foreign exchanges we are regaining this export business. However, if the cost of our raw material will be raised by means of this tariff until it is much higher than the price which foreign manufacturers must pay for their steels, we can not hope to recapture our old export business and again give employment to our workmen who made tools for export.

We feel that the economic unsoundness of a high "raw-material" duty versus a low "finished-product" duty should be pointed out to those who will be responsible for safeguarding the livelihood of American workmen in the basic and highly technical industries of tool production. "High-speed" tools made of tungsten are essential to the low-cost production of iron and steel products of every description. Every increase in the cost of "high-speed" tools will be reflected in increases in the articles which are produced by their means. Unreasonably high duties on the basic raw materials entering into the production of "high-speed" tools therefore add to the handicap which American machinery and equipment will have to carry in the struggle for foreign trade.

Yours very truly,

THE CLEVELAND TWIST DRILL CO.,
L. B. WEBSTER, *Assistant to President.*

I want to refer to another letter, written to me by the Poldi Steel Corporation of America, in which they say:

As American citizens we protest vigorously against the destruction of our business, particularly in view of the fact that our Government will not benefit from the standpoint of revenue, but, indeed, will lose the substantial revenue now obtaining.

The first letter refers to paragraphs 301 and 305. This letter refers to all the paragraphs, 304 to 316, inclusive. I am reading it now because we are dealing with paragraph 315. I have not referred to these matters before because they would not have affected the vote as to any of these amendments in any case, but they ought to appear in the RECORD as throwing light on this whole situation.

The letter to which I now refer, dated August 18, 1921, I ask to have inserted in the RECORD.

There being no objection, the letter referred to was ordered to be printed in the RECORD, as follows:

NEW YORK, N. Y., *August 18, 1921.*

Hon. DUNCAN U. FLETCHER,
Senate Office Building, Washington, D. C.

DEAR SIR: Annexed to this letter you will find a pamphlet submitted by the "American Importers of Fine Steels," which association includes practically all of the American concerns engaged in the business of importing "fine steels" from Europe.

The pamphlet treats the subject in a liberal business way. Details are available to substantiate all claims set forth.

We do not believe it to be the intention of Congress to impose a barrier to the importation of "fine steels" to the extent that such importation will be eliminated and consumers of "fine steels" in this country left to the mercy of domestic manufacturers and a monopoly thereby created.

As American citizens we protest vigorously against the destruction of our business, particularly in view of the fact that our Government will not benefit from the standpoint of revenue, but, indeed, will lose the substantial revenue now obtaining.

The "American Importers of Fine Steels" has applied for a hearing before the Senate Finance Committee, and at this hearing will be prepared to substantiate the following claims made by us:

1. That with the passage of the proposed Fordney bill with respect to the tariff on "fine steels" (secs. 304–316), a substantial revenue now accruing to our Government will be cut off.

2. That the small quantity of "fine steels" now imported into this country (2 per cent of the total consumption here) can not be considered competitive, as the imported "fine steels" do not undersell similar grades of American steels because the imported product commands higher prices, due to their quality; therefore it can not be claimed that American industry is threatened, hence the proposed increased duty will only result in the creation of a monopoly which will have the American purchaser at its mercy.

3. That the proposed duty, in addition to causing loss of revenue and creating a monopoly, will invite retaliation from foreign Governments whose citizens export "fine steels" into this market. This power of retaliation is far more serious than ever before, inasmuch as the war has taught foreign countries to use substitutes for our products. These substitutes they will undoubtedly resort to if the necessity occasions.

Surely an industry where 98 per cent of the consumption is manufactured domestically, and which has been developed in this country for more than 40 years, can not be seriously interfered with by foreign imports to the extent of 2 per cent.

A monopoly that the proposed duty confers upon the American manufacturer will force the consumer to pay higher prices and thereby disappoint a public who looks to the present administration to restore "normalcy."

We urge upon you that we have overproduction in almost every line of manufacture; that an outlet must be found for our surplus, and that the few things which we can import go only a small way toward paying for our exports; that the unemployment, doubt, distress, and anxiety which are present in America are surpassed by the rest of the world. This condition is reflected by our fast disappearing foreign trade, which automatically drags down with it our internal commerce, leaving in its wake idleness and discontent in our body politic.

Yours very truly,

POLDI STEEL CORPORATION OF AMERICA,
JOHN B. SMILEY, *President.*

The next amendment of the Committee on Finance was, in paragraph 315, page 58, line 20, after the words "shall be," to strike out "classed" and to insert "classified," so as to make the proviso read:

Provided, That all round iron or steel rods smaller than twenty one-hundredths of 1 inch in diameter shall be classified and dutiable as wire.

Mr. ROBINSON. Mr. President, I have no objection to this amendment, but inasmuch as the Finance Committee has not proposed an amendment to the paragraph and for that reason amendments from the floor are not now in order, I wish to discuss briefly the subject of the paragraph, namely, wire rods. This has a great variety of uses, including horseshoe nails, which are now on the free list. Imports have grown very much smaller since the beginning of the war and are practically negligible now. In 1913, when I think the imports were higher than at any other time, there were 17,000 tons imported and during the same year 74,000 tons exported. While I think the rate should be very materially reduced, no amendment can be offered at this time. Further discussion will therefore be reserved until the parliamentary status permits the offering of amendments from the floor.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The READING CLERK. The next amendment of the committee is in paragraph 316, page 59, round iron or steel wire, in line 22, where the committee proposes to strike out "20" and insert "35," so that it will read "35 per centum ad valorem."

Mr. McCUMBER. Mr. President, the Senator from Missouri [Mr. SPENCER] and the Senator from Pennsylvania [Mr. PEPPER] are both interested in this paragraph and both are absent from the Chamber. I think the Senator from Pennsylvania is absent from the city. Therefore I will ask that the paragraph be passed over.

Mr. ROBINSON. If the Senator will ask that it be passed over for the day I shall make no objection.

Mr. McCUMBER. I ask that the paragraph be passed over for the day.

Mr. ROBINSON. I will, however, offer an amendment and have it pending.

Mr. SMOOT. I will say to the Senator that in order to conform to the amendments which we have passed, the committee no doubt will make some changes from these rates.

Mr. ROBINSON. Very well. I move to amend, on page 59, in line 22, by striking out "35" and inserting "15," so it will read "15 per centum ad valorem." However, I have no disposition to ask for action on the amendment to the committee amendment now, in view of the request just made by the Senator from North Dakota.

The PRESIDING OFFICER. Does the Senator from North Dakota ask that the paragraph go over or merely the amendment?

Mr. McCUMBER. The entire paragraph.

The PRESIDING OFFICER. Without objection, the paragraph will be passed over.

Paragraph 317 was read, as follows:

PAR. 317. All galvanized wire not specially provided for, not larger than twenty one-hundredths and not smaller than eight one-hundredths of 1 inch in diameter, of the kind commonly used for fencing purposes, galvanized wire fencing composed of wires not larger than twenty one-hundredths and not smaller than eight one-hundredths of 1 inch in diameter; and all wire commonly used for baling hay or other commodities, one-half of 1 cent per pound.

Mr. ROBINSON. With respect to the paragraph 317, no amendments, it appears, have been proposed by the Finance Committee, and therefore amendments to the paragraph or the rates carried in it are not in order. I wish, however, to submit for the RECORD, in view of the fact that subsequently amendments will be proposed when they are in order, a short statement.

This paragraph includes wire commonly used for fencing and for baling hay. The production is set forth in the volume submitted as a condensation of the surveys of the Tariff Commission at page 411, as follows:

The country's output of woven-wire fencing and poultry netting, plain and coated, in 1919 amounted to 312,150 tons, valued at $30,527,000. In 1914 the corresponding figures were 411,460 tons, and $19,795,800.

I ask leave to insert in the RECORD the paragraph on page 411 of the volume referred to, relating to exports and imports.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

Imports: Imports of wire included in this paragraph have been, since 1917, by calendar years, as follows:

	1918	1919	1920	1921 (9 months).
Galvanized wire:				
Quantity ..... pounds..	63,645	392,526	392,978	500
Value.....	$4,839	$17,989	$23,222	$31
Galvanized-wire fencing:				
Quantity ..... pounds..	62,657	78,733	140,095	7,200
Value.....	$3,368	$3,366	$6,865	$510
Baling wire:				
Quantity ..... pounds..	3,050	85,175	421,849	13,790
Value.....	$185	$5,069	$25,532	$1,022

Exports: Exports of woven-wire fencing since 1917 by calendar years have been as follows: 1918, $1,036,730; 1919, $933,143; 1920, $903,272; 1921 (9 months), $451,823. The principal destinations of this exported material were Cuba, Canada, Mexico, Argentina, and New Zealand.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The READING CLERK. On page 61, paragraph 318, woven-wire cloth——

Mr. SMOOT. Mr. President, this paragraph relates to woven-wire cloth. I ask that it may go over until action is had upon the other wire paragraph, which was referred to just a moment ago. Then I ask, at the request of the Senator from North Dakota [Mr. MCCUMBER], that we proceed to the consideration of paragraph 327, on page 63.

Mr. ROBINSON. I shall make no objection to paragraph 318 going over for the day, with the other wire paragraph, namely, paragraph 316.

Mr. SMOOT. That is satisfactory.

The PRESIDING OFFICER. The Senator from Utah asks that paragraph 327 be taken up. The amendment in that paragraph will be stated.

The READING CLERK. On page 63, in line 15, the committee proposes to strike out "or" and insert in lieu thereof the word "and."

The amendment was agreed to.

The next amendment of the committee was, in line 16, to strike out "10" and insert in lieu thereof "20," so as to make the paragraph read:

PAR. 327. Cast-iron pipe of every description, cast-iron andirons, plates, stove plates, sadirons, tailors' irons, hatters' irons, but not including electric irons, and castings and vessels wholly of cast iron, including all castings of iron or cast-iron plates which have been chiseled, drilled, machined, or otherwise advanced in condition by processes or operations subsequent to the casting process but not made up into articles, or parts thereof, or finished machine parts; castings of malleable iron not specially provided for; cast hollow ware, coated, glazed, or tinned, but not including enameled ware and hollow ware containing electrical elements, 20 per cent ad valorem.

Mr. FLETCHER. Mr. President, with regard to this paragraph and the proposal of the committee to make the duty 20 per cent ad valorem, increasing it from 10 per cent, the rate in the bill as it originally came from the House, I desire to submit a few facts.

The duty under the act of 1913 was 10 per cent ad valorem. It is now proposed to make it 20 per cent ad valorem; in other words, just twice the duty as it now exists and twice the figure proposed in the House bill. Of course, the House bill, as we understand, was based upon the American valuation.

These articles include a variety of familiar commodities made of cast iron, castings of malleable iron, and cast hollow ware, coated, glazed, or tinned. Malleable cast iron is a crude form of wrought iron obtained by decarbonization. The castings are made in the ordinary way from low silicon iron with little phosphorus and sulphur. They are embedded in oxide of iron or peroxide of manganese and heated to a red heat until most of the carbon is removed from the surface.

The production in this country of the cast-iron pipes, including fittings, is stated to be as follows: In 1913, 1,266,245 net tons; in 1916, 1,215,433 tons; in 1918, 619,673 tons; in 1920, 886,515 tons.

Imports: During the fiscal year 1918 the imports of iron castings amounted to 3,324,002 pounds, or 1,662 short tons, valued at $181,258. More than one-half of this imported material consisted of cast-iron plates, stove plates and irons, sadirons, tailors' irons, hatters' irons and castings, and vessels wholly of cast iron. Only a little over 10 per cent consisted of cast-iron pipe and about 25 per cent of malleable-iron castings, n. s. p. f.

The latest statistics show that as to cast-iron pipe there were imported in 1918, 269,364 pounds, of a value of $5,074. The duty was 10 per cent, yielding a revenue of $507. In 1919 the imports were 164,945 pounds, valued at $6,225, and the amount of revenue yielded was $623. In 1920 the imports were 670,224 pounds, valued at $41,074, yielding a revenue of $4,107. In 1921, for nine months, the imports were 27,294 pounds, valued at $2,052.

Cast-iron andirons, plates, stove plates, and so forth, yielded a larger revenue and the importations were greater in value. In 1918 they were $103,309; in 1919, $147,607; in 1920, $225,863; and for the nine months of 1921, $61,719. The duty on these items is 10 per cent under the present law.

Iron or cast-iron plates, chiseled, drilled, and so forth, show the following importations: In 1918 there were importations amounting in value to $24,844; 1919, $4,307; 1920, $13,147; and in 1921, $860; all with a duty of 10 per cent.

On cast-iron hollow ware, coated, glazed, or tinned, the statistics show importations almost negligible. In 1918 they were of a value of $461 and the duty was $46. In 1919 the value was $425, and for 1920 the value was $15,066, and in 1921 for nine months was $1,702.

In castings of malleable iron the importations were larger. In 1918 the total value of the importations was $71,235; in 1919, $107,163; in 1920, $658,331; and for nine months of 1921 were $186,416. These imports all bore a duty under the act of 1913 of 10 per cent.

The exports, a large proportion of which is in the form of cast-iron pipe and fittings, are much greater than imports. Statistics for the calendar years 1918 to 1921 are as follows:

	1918	1919	1920	1921 (9 months).
Cast-iron pipe fittings:				
Quantity..... pounds..	125,352,066	88,379,704	153,254,227	96,080,663
Value.....	$6,665,597	$5,177,752	$9,753,446	$5,617,832
Iron and steel castings, n. e. s..	$4,535,553	$4,508,044	$6,810,511	$3,414,253

At present we are exporting of this cast-iron pipe and fittings between $8,000,000 and $10,000,000 worth annually, and we are importing less than $50,000 worth. The duty at present is 10 per cent. It is proposed to make it 20 per cent. The result of that will be to shut out all imports, it seems to me. It is doubling the duty, and in that case we lose all the revenue. Here is an industry which evidently is not in any sore need of protection, because the importations amount practically to nothing now.

For that reason I can see no justification for the proposed increase. I think the act of 1913 was liberal enough and will afford all the revenue that we can expect from importations under this paragraph, and that if we increase the duty to 20 per cent we shall reduce revenues because we shall close out importations.

There is certainly no need of protection. The exportations as to all of the items embodied in this paragraph exceeded many times the importations; in fact, the importations do not amount to 10 per cent of the exportations, and do not amount to 2 per cent of the production. There is consequently nothing to be accomplished here except to give an opportunity to increase the price of this product to the public.

Therefore, without further comment on the matter, I simply submit that the committee amendment should be disagreed to and that the provision of the House bill for a 10 per cent ad valorem duty, which is the same as that of the act of 1913, should stand.

Mr. SMOOT. Mr. President, just a word for the RECORD. This is what may be termed the basket clause of this schedule. The House imposed a duty at 10 per cent on the American valuation and the Senate Finance Committee recommended a duty of 20 per cent on the foreign valuation.

The last clause of the paragraph, as to "cast hollow ware, coated, glazed, or tinned, but not including enameled ware and hollow ware containing electrical elements," amounts to hardly anything at all.

Malleable iron is the item of importance in this paragraph. Let me advise the Senator from Florida where malleable iron goes and who uses it, and see if he will not admit that so far as the 20 per cent duty is concerned it will come into this country anyway. Then why not collect the money which will be derived from the article as revenue?

The Tariff Commission says:

Cast iron imports are apparently not influenced to any appreciable extent by the tariff. Imports of malleable-iron castings increased from 810,305 pounds in 1908, valued at 5.31 cents a pound and dutiable at an average ad valorem rate of 17.55 per cent, to 1,873,047 pounds in 1913, valued at 4.2 cents per pound and dutiable at 16.62 per cent ad valorem. In the calendar year 1919 imports declined to 1,319,233 pounds, valued at 8.1 cents a pound, dutiable at 10 per cent ad valorem. The largest imports were 6,696,068 pounds during 1920. Imports of cast-iron plates, stove plates, and castings and vessels wholly of iron decreased from 2,304,999 pounds in 1909, with an average ad valorem rate of 10.83 per cent, to 830,984 pounds in the calendar year 1921, dutiable at 10 per cent.

Now:

Steel castings, the principal substitute, are included with ingots in the figures of commerce and navigation and are not comparable.

Imports of malleable-iron castings are relatively important. These are specialties used in automotive and other industries requiring material to resist strain and shock. The demand for such commodities has grown rapidly, and imports about equal exports. Imports are small compared with domestic production.

That is why malleable-iron castings are shipped into this country. I do not see, Mr. President, why we should not collect from them the duty proposed. That is the only item in this paragraph that amounts to anything, and the committee thought that it was just to impose a duty of 20 per cent.

The PRESIDING OFFICER. The question is on the committee amendment.

The amendment was agreed to.

The next amendment was, in paragraph 328, on page 63, line 19, before the word "stays," to strike out "and" and to insert "or," so as to read:

PAR. 328. Lap-welded, butt-welded, seamed, or jointed iron or steel tubes, pipes, flues, or stays, not thinner than sixty-five one-thousandths of an inch, if not less than three-eighths of an inch in diameter, three-fourths of 1 cent per pound; if less than three-eighths and not less than one-fourth of an inch in diameter, 1¼ cents per pound; if less than one-fourth of an inch in diameter, 1¾ cents per pound.

The amendment was agreed to.

The next amendment was, on page 64, line 4, after the word "tubes," to strike out the word "and" and to insert "or."

The amendment was agreed to.

The next amendment was, on page 64, line 7, before the words "per cent," to strike out "20" and to insert "30," so as to read:

Provided, That no tubes, pipes, flues, or stays made of charcoal iron shall pay a less rate of duty than 1¼ cents per pound; cylindrical and tubular tanks or vessels, for holding gas, liquids, or other material, whether full or empty; welded cylindrical furnaces, tubes or flues made from plate metal, whether corrugated, ribbed, or otherwise reinforced against collapsing pressure, and all other finished or unfinished iron or steel tubes not specially provided for, 30 per cent ad valorem.

Mr. FLETCHER. Mr. President, I do not think the increased rate provided for in that amendment should be agreed to. In paragraph 328 it will be seen that the duties are fixed at so much a pound, but I am unable to determine—and I have had the matter looked into to some extent—and the experts to whom I have had access can not determine, just what the equivalent ad valorem duty would amount to.

Mr. SMOOT. The items which fall under this clause which have a 30 per cent ad valorem rate are such articles as the containers for chemicals, chemical flasks, and items such as that.

Mr. FLETCHER. I was referring more particularly to the tubes, pipes, flues, and stays, and so forth, on which the duties range from three-fourths cent to 1¾ cents a pound.

Mr. SMOOT. There is no committee amendment to those rates.

Mr. FLETCHER. There is no amendment to those rates, but I should like to learn, if I can, about what the ad valorem equivalent would be, if the Senator can advise me as to that by way of information. Of course, I can offer an amendment as to those rates; but it will be seen that a large portion of the paragraph provides for specific duties, and I am not able to figure out just what the ad valorem equivalents would be. Can the Senator from Utah tell me what the average ad valorem equivalent would be?

Mr. SMOOT. In this paragraph the Payne law rates are reduced a quarter of a cent a pound. I will advise the Senator now as to the equivalent ad valorem rates under the Payne-Aldrich law. In 1910 the equivalent ad valorem rate would be 16.81 per cent; in 1911, 19.84 per cent; in 1912, 23.14 per cent; in 1914, 20.40 per cent. Assuming the prices to be the same, the duty now proposed being three-fourths of a cent a pound, which is a quarter of a cent a pound less than the Payne-Aldrich rate, the equivalent ad valorems under the pending bill would be 25 per cent less. In 1910 the equivalent ad valorem being 16.81 per cent, under the proposed rate 4.20 per cent would be deducted from 16.81 per cent, which would leave 12.61 per cent. If the price is higher, of course, the equivalent ad valorem would be even less than that. So the Senator can see that the equivalent ad valorem rate as provided for in the specific duties is very low.

Mr. FLETCHER. As I gather, under the Underwood Act of 1913, if the calculations were made on the basis of the average imports of the value of 1914, for instance, the duty would be about 20 per cent, and under the Payne-Aldrich bill of 1909 about 31¼ per cent.

Mr. SMOOT. If the Senator speaks of the first part of paragraph 328, there is no 30 per cent rate therein imposed. I have given the Senator the equivalent ad valorems. Even under existing law the duty is 20 per cent; so that the proposed specific duty on "lap-welded, butt-welded, seamed, jointed iron or steel tubes, pipes," and so forth, is even less than the rate to-day.

Mr. FLETCHER. I will read facts regarding these articles as furnished by the Summary of Tariff Information. They are described as follows:

Description: This paragraph covers pipes, tubes, cylinders, tanks, etc., made of iron and steel, excepting cast-iron pipes. While cast-iron pipes are cast in molds and the center is cored out, welded pipes are made from narrow plates of steel or wrought iron called skelp, which is rolled into shape and the edges welded together. When the edges simply come together the welding is called butt welding, and when they overlap, lap welding. Riveted pipe, ordinarily made only in large sizes, is frequently formed in spirals of sheet iron or steel or by simply curling the sheet so as to make a horizontal joint, the overlapping edges, in either case, being riveted together.

Production: The domestic output of wrought iron and steel pipe and boiler tubes in 1916 amounted to 2,651,058 gross tons and in 1920 to 3,002,725 gross tons. In 1914 there were 36 establishments engaged in the manufacture of wrought-iron pipe alone, with an aggregate capital of $39,407,625, employing 8,745 wage earners, whose output was valued at $37,655,229. In 1919 there were 51 establishments, with an output valued at $84,011,000. Other great iron and steel producing countries, like Great Britain and Germany, also have a large output.

Those figures show the growth of the industry under the present rate of duty, which is 20 per cent. The rate which is now proposed is 30 per cent throughout the paragraph.

Mr. SMOOT. No; the 30 per cent rate does not apply to the whole paragraph. It applies only to—

cylindrical and tubular tanks or vessels, for holding gas, liquids, or other material, whether full or empty; welded cylindrical furnaces, tubes or flues made from plate metal, whether corrugated, ribbed, or otherwise reinforced against collapsing pressure, and all other finished or unfinished iron or steel tubes not specially provided for.

On the other items the duties are specific. I have called the attention of the Senator to what the equivalent ad valorem was in 1910, 1911, 1912, and 1913, when the specific rate was one-fourth of a cent higher than is provided in this paragraph.

Mr. FLETCHER. What was the ad valorem equivalent given by the Senator for those years?

Mr. SMOOT. I will tell the Senator again. On articles not less than three-fourths inch in diameter, except those made of charcoal iron, in 1910 the equivalent ad valorem was 16.81 per cent; in 1911, 19.84 per cent; in 1912, 23.14 per cent; in 1914, 29.40 per cent.

The proposed specific duty of three-fourths of a cent a pound is less than the rate in 1910, which was 1 cent a pound. The equivalent ad valorem in 1910 being 16.81 per cent and the proposed duty being three-fourths of a cent, or 25 per cent less than the duty of 1 cent; and deducting 25 per cent from 16.81—and 25 per cent of 16.81 per cent would be 4.20 per cent—would leave 12.61 per cent as the ad valorem equivalent under the proposed rate, providing the prices in 1910 and to-day are the same. Of course, if the prices to-day are higher than they were then, the equivalent ad valorem would be less.

Mr. FLETCHER. We are not now dealing with these specific duties, because they are not before us.

Mr. SMOOT. That is what I stated to the Senator; but he asked the question, and I simply answered it.

Mr. FLETCHER. I was trying to get, if I could, a sort of an average of the ad valorem rate of the whole paragraph; but, speaking now with reference to the particular matter before us, which is—

welded cylindrical furnaces, tubes or flues made from plate metal, whether corrugated, ribbed, or otherwise reinforced against collapsing pressure, and all other finished or unfinished iron or steel tubes not specially provided for, 30 per cent ad valorem.

That rate now is 20 per cent under the law of 1913.

Mr. SMOOT. Yes.

Mr. FLETCHER. And it is proposed to make it 30 per cent. The House had it in the bill at 20 per cent, based, I realize, on the American valuation; but the importations of those goods have amounted to very little.

In 1918 we imported 103,474 pounds, valued at $15,237.

In 1919 we imported 92,806 pounds, valued at $17,103.

In 1920 we imported 59,580 pounds, valued at $8,777.

For nine months of 1921 we imported only 6,793 pounds, valued at $2,035.

The imports are insignificant compared with production and exports.

Mr. SMOOT. Mr. President, I call the Senator's attention to the fact that there is no way of telling what the production of these items is, and the imports are mostly quicksilver flasks. The flasks that we import here under this provision are imported here for the holding of quicksilver, and that is the great bulk of the importations.

Mr. FLETCHER. I was reading from only that portion of the statistics which refers to "furnaces, welded, cylindrical," and so forth, which would be the part of the bill which we are now considering, I think; but even taking the whole paragraph, the

statement is made by the people who prepared this Summary of Tariff Information under the head of "Imports":

Imports are insignificant compared with production and exports.

That is made with reference to the whole paragraph, all the items mentioned, and I do not see that there can be any criticism of that.

Exports in the form of boiler tubes have been since 1917 as follows:

Then it gives the exports of pipe fittings, and so forth.

Mr. President, I simply feel about this particular item as I did about the other, that there is no occasion to increase this duty above the present rate, which is yielding some revenue—not very much, because the importations are very slight. The exportations are considerable and the production is entirely satisfactory. The number of establishments has increased, and the production has increased under the present rates of duty. The industry is prosperous. We are getting a little revenue and it seems to me that if you double this duty now you are going to cut off the revenue that we have.

Mr. SMOOT. I think the Senator is wrong. If he will look at the importation there under "Tanks or vessels, cylindrical or tubular," and so forth, he will see that they were $535,156 in 1920 and $162,054 in the first nine months of 1921. Most of the latter are quicksilver flasks. The price of the flasks themselves is $1 each, and the duty is 10 cents. Each of those flasks holds $50 worth of quicksilver, and those flasks are imported in greater number than they are made in this country, and the value of importations, with the exception of about $1,716 in the year 1921, consisted of quicksilver flasks.

Mr. FLETCHER. Does not what the Senator is talking about come under the 1¼-cent duty?

Mr. SMOOT. If the Senator will read on page 64, line 2, "cylindrical and tubular tanks or vessels for holding gas, liquids, or other material," and then if he will look at the imports, there is where the imports fall, under that very part of the paragraph, with the exception of the amount I have stated.

Mr. FLETCHER. I think that is true. There is a larger amount of imports under that head than under the others, probably.

Mr. SMOOT. Oh, yes; it is 10 times more than all the others put together.

Mr. FLETCHER. How about the exports of that class of goods?

Mr. SMOOT. Of course, the exports are all put in here with lap-welded pipe, and they run into the millions of dollars.

Mr. FLETCHER. Yes; that is true. The whole thing is together there, and I am unable to separate the imports of the particular kind of article to which the Senator refers; but the exports under this whole paragraph are very considerable, amounting in 1918 to $14,993,957; in 1919 to $35,229,750; in 1920 to $43,774,296; and in nine months of 1921 to $44,889,023. Those are very considerable exports, as compared even to the imports of every item under the paragraph.

Mr. SMOOT. Yes; but that is pipe and fittings. I suppose 99½ or 99¾ per cent of that is pipe and fittings.

Mr. FLETCHER. Undoubtedly a large portion of it is of that kind; but I think, Mr. President, that the present rate of duty is high enough for all purposes and will yield us very much more revenue than this proposed increase would yield, and that our production and the state of the industry, which has flourished under the present rate, do not require that it should be raised at all.

I have no amendment to offer. The question will come on the adoption of the committee amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The VICE PRESIDENT. The next amendment of the committee will be stated.

The READING CLERK. On page 64, line 13, after the words "electrical conductors," it is proposed to strike out "25" and insert "35," so as to read:

flexible metal tubing or hose, whether covered with wire or other material, including any appliances or attachments affixed thereto, not specially provided for, and rigid iron or steel tubes or pipes prepared and lined or coated in any manner suitable for use as conduits for electrical conductors, 35 per cent ad valorem.

Mr. FLETCHER. Mr. President, all I have to say on that amendment is covered in what I have already stated.

Mr. SMOOT. It is just a differential of 5 per cent on this over the rate that we have just adopted.

Mr. FLETCHER. I see. I simply ask for a vote on the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The READING CLERK. On page 64, in paragraph 329, it is proposed to strike out of lines 21 and 22 the following words:

chain and chains of all kinds, of iron or steel, not specially provided for, 25 per cent ad valorem.

Mr. SMOOT. Mr. President, I ask that paragraph 329 go over until the Senator from Pennsylvania [Mr. PEPPER] returns. He was compelled to leave the city to-day.

The VICE PRESIDENT. Without objection, the paragraph will be passed over.

The READING CLERK. On page 65, line 12, it is proposed to strike out "30" and insert "40," so as to make the paragraph read:

PAR. 330. Nuts, nut blanks, and washers, of wrought iron or steel, six-tenths of 1 cent per pound; bolts, with or without threads or nuts, and bolt blanks, of iron or steel, 1 cent per pound; spiral nut locks, and lock washers, of iron or steel, 40 per cent ad valorem.

Mr. FLETCHER. Mr. President, I can not agree to that amendment. We are now dealing with paragraph 330, and the House bill carries a provision for 30 per cent ad valorem. The committee proposes to make that 40 per cent.

Mr. SMOOT. I want to say to the Senator that that 40 per cent, however, applies only to spiral-nut locks and lock washers of iron or steel. The duties on the nuts and nut blanks and washers are all specific duties; but when it comes to spiral-nut locks or lock washers of iron or steel, the prices vary so greatly that it would be impossible to put a specific duty upon those special items, and, therefore, we have to give them an ad valorem duty. Being of the highest type of manufacture in some cases, the committee did not think it would be right to have a rate upon that highly specialized article that would be lower than the basket clause of the whole schedule, and therefore they put it at 40 per cent.

Mr. FLETCHER. What does the Senator estimate would be the specific rates reduced to ad valorem equivalents?

Mr. SMOOT. That would be an absolute impossibility to tell, because the prices are so varied. That is why it is an ad valorem duty. If it were possible to put a specific duty on it, we would have done it; but it was impossible.

Mr. FLETCHER. Under the present law, the duty on nuts, nut blanks, and washers is 5 per cent ad valorem; on bolts of iron or steel, with or without threads or nuts, or bolt blanks, 10 per cent ad valorem; on spiral-nut locks and lock washers, whether of iron or steel, 30 per cent ad valorem.

Mr. SMOOT. Even the Underwood bill gave them 30 per cent duty.

Mr. FLETCHER. Yes; that I understand.

Mr. SMOOT. All that we are doing in this paragraph is to give them the basket-clause rate.

Mr. FLETCHER. In the case of the first part of the paragraph, nuts or nut blanks, under the Underwood law there was only a 5 per cent ad valorem duty.

Mr. SMOOT. Oh, yes.

Mr. FLETCHER. And this is a specific duty of six-tenths of 1 cent per pound. I do not know what that would be. I should estimate that at about 40 per cent.

Mr. SMOOT. Did the Senator ask me what would be the equivalent ad valorem of these rates?

Mr. FLETCHER. Yes; I asked what this six-tenths of 1 cent would be.

Mr. SMOOT. I will tell the Senator in just a moment. In 1908, under the Payne-Aldrich law, we had 1 cent a pound on nuts and washers. In this we have fixed six-tenths of a cent. In 1908 the equivalent ad valorem was 5.86 per cent. We have only six-tenths of that amount in the specific duty. So it would be less than 5 per cent, providing the prices of the nuts are the same to-day as they were in 1908. If they are higher priced than they were in 1908, then we have even a lower ad valorem than that. In 1909 the equivalent ad valorem was 5.29 per cent. In 1910 it was 6.31 per cent. In 1911 it was 10.76 per cent. In 1912 it was 6 per cent. In 1913 it was 5.44 per cent.

I call the Senator's attention to the fact that the specific rates upon these items are lower than those in the Payne-Aldrich law, and the equivalent ad valorem rates I have already stated to the Senator.

Mr. FLETCHER. It would seem that perhaps those specific rates are very much like the rates in the act of 1913; in other words, 5 per cent and 10 per cent and 30 per cent in the different classifications.

The production in 1914 of bolts, nuts, rivets, and washers was valued at $23,403,000. In addition to that there was builders' hardware which was valued at $24,288,000.

The imports are small compared with the exports, and since 1917 have been as follows:

NUTS, NUT BLANKS, AND WASHERS OF WROUGHT IRON OR STEEL.

Calendar year.	Quantity.	Value.	Duty.	Ad valorem rate.
	Pounds.			*Per cent.*
1918	36,338	$11,512	$576	5
1919	65,399	15,207	760	5
1920	78,924	12,601	630	5
1921 (9 months)	147,734	9,075	.....	.....

BOLTS, WITH OR WITHOUT THREADS OR NUTS, OR BOLT BLANKS, AND FINISHED HINGES OR HINGE BLANKS, ETC.

1918	110,306	$8,253	$825	10
1919	147,369	17,433	1,743	10
1920	618,444	57,761	5,776	10
1921 (9 months)	310,205	32,194	.....	.....

SPIRAL NUT LOCKS AND LOCK WASHERS.

1918	200	$18	$5	30
1919	700	28	8	30
1920	1,566	761	228	30
1921 (9 months)	816	219	.....	.....

Exports of bolts, nuts, rivets, and washers have been, since 1917, by calendar years, as follows:

	1918	1919	1920	1921 (9 months).
Quantity.....pounds..	63,465,111	89,023,056	87,235,028	47,974,367
Value	$5,687,998	$7,769,893	$7,274,411	$4,468,912

The principal countries of destination were Canada, the United Kingdom, Cuba, Argentina, Mexico, and British India.

I think that the present rate of duty on these nuts and nut lock washers, 30 per cent, is all that ought to be levied.

Referring to the statistics regarding that particular portion of the paragraph where the 30 per cent ad valorem is named as the duty, the summary says:

The imports of 1918 were 200 pounds, valued at $18, and yielded a duty of $5. In 1919 they were 700 pounds, valued at $28, and yielded $8. In 1920 they were 1,566 pounds, valued at $761, and yielded a duty of $228. In 1921, nine months, there were only 816 pounds imported, yielding a duty of $219.

So that the importations of this particular kind of material, namely, the spiral nut locks and nut washers of iron and steel, are almost inconsequential.

In 1918 they got $5 in duty, in 1919 only $8, in 1920 $228, under a rate of 30 per cent. It is now proposed to increase that to 40 per cent. I ask Senators to think of that just a moment, and be a little reasonable about it. The 30 per cent duty now levied on this commodity yields us from $5 to $200 a year, and that is all. It is proposed to increase that 10 per cent, and what is expected in the way of revenue? The exportations are enormous. The production is enormous. The industry is growing. There is no need of a duty for the sake of an infant industry. The industry does not need any protection. Ten per cent is added simply to make it possible for the producers to charge that much more for the products. I can not see any reason for it at all. If there was any indication that it would produce more revenue, I would say to go ahead and try it; I would not make much complaint about it, although I think it will just enable the manufacturers to increase the price of this article to the consumers in this country. I certainly can not see any hope that the revenues of the Government will be increased, and there is certainly nothing to indicate that the industry needs this increase in the duty. I therefore hope that the committee amendment will not be agreed to.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. FLETCHER. Will the Senator make any suggestion regarding paragraph 331?

Mr. SMOOT. I will have to ask that 331 go over to-day.

Mr. FLETCHER. How about paragraph 332?

Mr. SMOOT. I will ask that paragraphs 332 and 333 go over also. The Senator from Pennsylvania is deeply interested in this, although I do not quite agree with what he wants, I think he ought to have an opportunity to present his views.

Mr. FLETCHER. I have no particular objection. I am prepared to discuss the paragraphs down to paragraph 336.

Mr. SMOOT. I understand the junior Senator from Arkansas will take paragraph 331 up for consideration on behalf of the minority, and then I would like to take up paragraph 334, on steel wool, 335, on grit, shot, and so forth, and paragraph 336, which the Senator has just mentioned.

Mr. CARAWAY. Was the Senator discussing paragraph 321?

Mr. SMOOT. Yes.

Mr. CARAWAY. Paragraphs 319, 320, and 321 were assigned to me. Have 319 and 320 been disposed of?

Mr. SMOOT. Paragraph 319 has not been disposed of, as I understood that the Senator at the time it was reached was not prepared to take it up, and the Senator from North Carolina asked me if I would not pass it and take up the paragraphs in charge of the Senator from Florida. I understand the Senator from Arkansas has come in and would just as lief take up paragraph 321 at this time as not, although if he is not prepared I shall not ask that.

Mr. CARAWAY. I have no objection to taking up paragraphs 319 and 320.

Mr. SMOOT. The Senator from Connecticut [Mr. MCLEAN] is here now, and I desire to have paragraph 321 taken up while he is in the Chamber, although he is generally here. If there is no objection, I ask that paragraph 321 be taken up.

The VICE PRESIDENT. The Secretary will state the amendment.

The READING CLERK. On page 61, line 25, the committee proposes to strike out "35" and insert in lieu thereof "55," so as to read:

PAR. 321. Antifriction balls and rollers, metal balls and rollers commonly used in ball or roller bearings, metal ball or roller bearings, and parts thereof, whether finished or unfinished, for whatever use intended, 10 cents per pound and 55 per cent ad valorem.

Mr. CARAWAY. Paragraph 321 deals with antifriction balls and rollers, metal balls and rollers commonly used in ball or roller bearings. There is an increase in duty to 55 per cent ad valorem proposed by the Senate committee. The Senator from Utah will doubtless tell me what the present duty is.

Mr. SMOOT. Thirty-five per cent.

Mr. CARAWAY. And that was the duty adopted by the House.

Mr. SMOOT. No; the House added 10 cents a pound.

Mr. CARAWAY. Now, the Senate committee proposes to leave the 10 cents a pound, but strike out "35 per cent" and insert "55 per cent ad valorem."

This affects very vitally a large and growing industry in this country. All the automobiles and trucks and a great many machines are dependent for their bearings upon antifriction balls or rollers and metal balls, and this tends to increase the cost, as I said, from the prevailing price about 100 per cent or a little bit more.

The present imports are only about 23 per cent of the total number used. About 67 per cent are now manufactured in this country. To show something of the importance of these things, in 1917 there were more than $6,630,000 worth of these accessories manufactured. Possibly now it will be nearly ten times that amount. The total investment in the business in 1913 was $9,000,000, confined to 7 firms, and these 7 firms were located in 5 States.

The consumption in 1912 was $9,759,000 worth, of which the United States produced $6,631,000 worth, or approximately 70 per cent.

The Tariff Information Survey says:

The exports are not specified in the statistics of commerce and navigation.

The imports have constantly sunk, until they fell to $973,100, out of a business that is possibly close to $100,000,000.

This is practically a closed market now. The American manufacturer is producing practically every bit of these accessories consumed here, and this raise of 100 per cent means only that they may charge almost twice as much for the products, as there is no importation worth while. There can be none. The present rate practically excludes importations, and if that be true the only reason for increasing the duty would be to enable the manufacturers to charge the American user practically twice what he now pays for this very necessary accessory, because the foreign producer is not going to interfere with this market with the present rate of duty. When you increase that practically 100 per cent, it means for all practical purposes an embargo.

I am curious to know by what process of reasoning the committee reached this conclusion about one of the very essential elements of one of the very greatest industries in America, one that is no longer a matter of luxury, but is a matter of necessity, because automobiles have ceased to be luxuries and are now necessities. Every farmer has one, and you are fixing to make the farmer pay to the American producer a horizontal rise of

practically 100 per cent on the cost of the articles he is going to use in connection with his automobile; that is, accessories in the way of ball bearings, rollers, and things of that kind. I am curious to know, and would be glad if some one on the other side of the aisle would tell me why this increase is made in the duty. If there is to be no explanation, I wish to move an amendment.

Mr. McLEAN. Mr. President, I think if the Senator had investigated the Reynolds report he would have found the rate more than justified. It is shown that there is very active competition. The disinterested experts who were assigned to secure information with regard to the articles were able to find the foreign values on nearly all of the articles produced in this country. If the Senator had read the report he would have seen, for instance, the foreign valuation of the first item was $4.44 per 1,000 in the foreign countries and $9.60 in this country. The next item is $4.44 abroad and $14.40 in this country, and so on through the list.

Mr. CARAWAY. If the Senator from Connecticut will permit me, I notice on page 35 of the little pamphlet furnished by the Tariff Survey there are two or three paragraphs relating to the matter, from which it appears that formerly these articles as imported were very much superior to those manufactured in this country, and while the price was practically the same, as I gather from other statements, the quality was better than the domestic quality. But the statement says that war conditions resulted in a complete change and that the European product is not now any better than the American product. The price seems to have been as high as the American product, and the only reason that heretofore importations came in rather large amounts was that the European product was the best. Now, conceding that it is no better, and under the present tariff duty of 35 per cent the American is going to control the market—and the European imports have fallen off constantly—it seems to me unreasonable now that you should propose a horizontal increase of 100 per cent.

Mr. McLEAN. This is not a large increase in the rate. If we can place any reliance upon the information secured and printed in the Reynolds report, these rates are justified and more, too.

Mr. CARAWAY. What is the difference in the price of the European product and the American product now?

Mr. McLEAN. I just gave it to the Senator.

Mr. CARAWAY. I did not understand the Senator.

Mr. McLEAN. On the first item stated in the Reynolds report the foreign price is $4.40 per thousand and the American price $9.60. On the next item the foreign price is $4.44 and the American price $14.40. If the Senator will read the long list of the different varieties of these antifriction balls contained in the Reynolds report, he will see that, as I stated, the rates are entirely justified if we wish to equalize the difference in the cost.

Mr. CARAWAY. Is it true that there has been a great increase in the cost of manufacturing in Europe recently?

Mr. McLEAN. On the contrary, I think the latest report from the Department of Commerce shows that wages are certainly no more and in some instances are less now than they were when the report was made.

Mr. CARAWAY. What is the latest report the Senator has before him from the Department of Commerce touching the cost of production in Europe and here?

Mr. McLEAN. It is very recent. It was the last week in March.

Mr. CARAWAY. There has been a very great increase in wages in Germany, from whence most of the importations came.

Mr. McLEAN. I do not agree to that. I think the wages in Germany to-day have not increased, if measured in gold.

Mr. CARAWAY. What are the imports now? Does the Senator have any recent data?

Mr. McLEAN. I will call the attention of the Senator to a communication that I have from one of the concerns which manufacture this product in America. It is signed by the president of the Rand Steel Co., of New York, large importers, and the writer says:

> The writer is very sorry to have missed both your Mr. Heim and Mr. Roth when recently in your city. I am, therefore, writing you on the subject which I was going to take up with you personally in regard to ball-bearing tubing and steel balls.
>
> You will recall the writer's name from prior to the war, when he was the exclusive representative of the Krefeld Steel Works Co., of Krefeld, Germany.
>
> The above company has been formed for the importation of ball-bearing tubing, steel balls, precision tubing, and other European products. Mr. W. A. Steinback, for many years general manager of the Eisman Magneto Co., of Brooklyn, N. Y., is president of the company.
>
> We are the exclusive representatives in this country for the Siegen-Solinger Gusstahl-Aktien-Verein, Solingen, Germany, largest manufacturers of ball-bearing steel in bars and tubes, and the Fries & Hoepflinger Steel Ball Factories, of Schweinfurt, Germany.
>
> You will note from this that the writer is intimately acquainted with the requirements of the domestic manufacturers of ball bearings. We can, therefore, speak with some authority on the subject of ball-bearing steel, and especially on tubes, which you use in large quantities.
>
> It will be of interest to you to know that the Siegen-Solinger factory installed during the war a large tube equipment, and is now, with no exception, the best equipped plant for the manufacture of ball-bearing tubing.

Then he goes on to state the character of the work which is done there, and how superior it is, which I will not take the time to read. He closes by saying:

> We can quote you under the present tariff about 20 cents per pound f. o. b. New York, duty paid.

That is very much less than the price which was secured by the Reynolds investigation.

Mr. CARAWAY. What does it cost to manufacture them in this country?

Mr. McLEAN. I have a very complete brief on this subject, which was submitted by——

Mr. CARAWAY. Yes; but will the Senator give me the cost of manufacture per pound in this country?

Mr. McLEAN. It probably varies somewhat, of course, with regard to the quality and the size of the ball.

Mr. CARAWAY. There are just three kinds—the light, medium, and heavy.

Mr. McLEAN. I will say to the Senator that the labor cost in these articles is very high. As the Senator knows, they are highly specialized in the process of manufacture, and the labor cost runs from 75 to 80 per cent.

Mr. CARAWAY. What do they cost per pound? That is what I want to know. What does it cost per pound to turn them out?

Mr. McLEAN. That is stated in the Reynolds report. The selling price of the American article is given, and if the Senator will deduct about 20 or 25 per cent from that price he will probably get the cost.

Mr. CARAWAY. Will the Senator tell me about what the cost is, because there was so much conversation going on in the Chamber that I could not hear what he said? I want the cost per pound.

Mr. McLEAN. They are, of course, sold in numbers and sizes which differ, and so they differ in cost per pound. If the Senator will turn to the Reynolds report and pick out any particular size and deduct 20 or 25 per cent he will probably get the cost.

Mr. CARAWAY. The Senator has the Reynolds report before him, and I have not the report before me. Will the Senator tell me?

Mr. McLEAN. Take the first one; the American selling price is $14.40.

Mr. CARAWAY. Per what?

Mr. McLEAN. Per thousand. There are 12½ pounds to the thousand. According to the foreign valuation of $4.44 that would be about 37½ cents per pound, and the American would be 80 cents per pound. On the next item the foreign would be the same, 37½ cents per pound, and the American $1.20 per pound.

Mr. CARAWAY. Even with those figures, is not the Senator proposing a prohibitive duty here?

Mr. McLEAN. I do not hear the Senator.

Mr. CARAWAY. Even granting that figure is correct—and the Reynolds report is nearly a year old—does not the Senator think the duty proposed is prohibitive?

Mr. McLEAN. Not at all. It does not begin to cover the conversion cost if these estimates are correct, because the Senator must bear in mind that the article requires highly skilled mechanics and the compensation in this country is $5 per day, while in Germany it is not more than 80 or 90 cents per day.

Mr. CARAWAY. Going back to the cost which the Senator gave per pound, we have now a specific duty of 10 cents per pound and the committee proposes an ad valorem duty of 55 per cent, and if you take those two you have a prohibitive duty.

Mr. McLEAN. The Senator, I think, has not made his estimate with much accuracy, because if he would add 10 cents to 37½ cents he would get 47½ cents. Then figuring the ad valorem duty on that basis it would not have been equal to the figure he stated.

Mr. CARAWAY. But on the $1.20 American price it is more than 40 cents.

Mr. McLEAN. But that would not equal the difference.

Mr. CARAWAY. I did not hear the Senator's figures, but I shall study them with some interest, because I was not able to follow him. Under the present rate of 35 per cent, importations have fallen off until they are practically negligible, and yet it is proposed now to give a specific duty of 10 cents per pound and an ad valorem duty of 55 per cent, which simply means a practical embargo. The industry has been thriving

and expanding. Under a 35 per cent ad valorem duty it has been able to develop from a very small beginning in 1910, when it was a collapsed business and one firm owned it all. It has all grown up under this lower duty until now it amounts to one of the biggest industries of the country. Only a very small per cent of the ball bearings and rollers used in this country are imported under the present duty. Yet the committee proposes now to more than double that rate with an ad valorem and specific duty as well, which could have but one effect, and that is to give to the home manufacturer a protected market with a horizontal rise of nearly 100 per cent in cost of the articles to the consumer.

Mr. McLEAN. Oh, no; it is nearer an increase of 40 per cent, I think, than 100 per cent. If the Senator from Arkansas has read the summary of information furnished by the Tariff Commission he will see that the imports of this commodity are not negligible. In 1920 there were considerably over a million dollars' worth imported, but the imports have fallen off somewhat during the last nine months. However, the letter which I have read to the Senator indicated very clearly, if this importer's statement is correct—and I think we may assume that it is—that the potential competition in Germany is ruinous because the Germans offer these articles of the highest quality at 20 cents a pound. If the Senator from Arkansas will read the briefs filed by the competing firms in this country—and there are 15 such concerns in this country, located in Connecticut, New York, New Jersey, Ohio, and Illinois—he will find that the competition is very active. The Senator knows that an importation of 5 or 10 per cent at the price indicated would demoralize the trade in this country.

I will say to the Senator that my information is—and I know it is true with regard to Connecticut concerns—that they are working on very short time; that they have a large quantity of goods stored up for which there is no market. When they write to their customers to find out why they are not receiving their usual orders, their customers reply that they are getting these offers from abroad. If the Senator from Arkansas had a pay roll of a thousand dollars a week or 10 times that amount, he would understand what that competition means. All that they have asked will fall short of equalizing the difference in the labor costs, provided the Reynolds report is accurate. When we do not have information from the Reynolds report, we are accused of not having sufficient outside information to support the rate proposed, and when we have a complete statement made by these investigators, then, apparently, the Senators on the other side of the Chamber neglect to examine them.

Mr. CARAWAY. I am not intentionally neglecting to examine the statements, but I have in my hand here the Summary of Tariff Information, the figures in which are as late as those in the Reynolds report. In 1921, for nine months of that year, the total imports of this commodity were only $9,638, although evidently many millions of dollars' worth of the product are being consumed; so that there are practically no imports; they will not amount to 10 per cent under the present duty of 35 per cent ad valorem. The imports for 1921—which is the latest information given—did not amount to 1 per cent of the value of the article used. Then to impose a duty which represents practically a 100 per cent horizontal increase can mean nothing else, if it is the policy of the party in power to make that condition prevail, than to provide a zone of safety to the home industry to enable it to increase to the home consumer by 100 per cent the cost of this very necessary accessory. It means that every farmer and every business man, in fact, everybody, must, in order to benefit a few manufacturers, go into his pocket for 100 per cent increase in the cost of this necessity.

Mr. President, I move that the duty of 35 per cent, as provided in the bill as it came from the other House, be retained, and that the specific duty of 10 per cent be stricken out.

Mr. McLEAN. I desire to call the attention of the Senator from Arkansas to the fact that the importations of these articles during the past three months are increasing. That is the information I have.

The VICE PRESIDENT. The amendment proposed by the Senator from Arkansas [Mr. CARAWAY] to the amendment of the committee will be stated.

The READING CLERK. On page 61, line 24, it is proposed to strike out "10 cents per pound," and in the committee amendment to strike out "55" and to insert "35."

The VICE PRESIDENT. The question is on the amendment to the amendment.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question recurs on the committee amendment.

The amendment was agreed to.

Mr. SMOOT. I ask that the Senate now take up paragraph 334.

The VICE PRESIDENT. The Secretary will report the amendment of the Committee on Finance in paragraph 334.

The amendment of the Committee on Finance was, on page 66, line 13, after the words "ad valorem," to strike out "*Provided*, That in computing the duty the weight and value of the package shall be included and the net weight of the contents shall be plainly marked upon each package," so as to make the paragraph read:

PAR. 334. Steel wool, 10 cents per pound; steel shavings, 5 cents per pound; and in addition thereto, on all of the foregoing, 30 per cent ad valorem.

Mr. FLETCHER. I desire to inquire of the Senator from Utah what the effect of striking out the proviso will be? I judge that it will really amount to an increase in the rate if the proviso be stricken out.

Mr. SMOOT. No. Striking out the proviso will have the effect of decreasing the rate. The bill as it comes from the House contains the following proviso:

Provided, That in computing the duty the weight and value of the package shall be included and the net weight of the contents shall be plainly marked upon each package.

In other words, under the bill as it passed the House a duty of 10 cents a pound would also be levied on the weight of the package itself.

Mr. FLETCHER. The proviso eliminates the duty on the package?

Mr. SMOOT. Yes; that is proposed to be eliminated, and it ought to be eliminated.

Mr. FLETCHER. The effect of that will be to decrease the number of pounds.

Mr. SMOOT. Yes; and to decrease the duty.

Mr. FLETCHER. I think the duty as carried by the paragraph is excessive. Of course, I realize we can not reach that now. The only matter to which we can give attention, so far as action at this time is concerned, is the committee amendment, which I believe helps the bill, and I have no disposition to oppose the adoption of the committee amendment. I think it should be adopted. However, in this connection I may say a word regarding the entire paragraph, for it seems to me it seeks to impose an excessive duty.

Under the act of 1913 steel wool or steel shavings carried a duty of 20 per cent ad valorem. Under the act of 1909 steel wool or steel shavings carried a duty of 40 per cent ad valorem. The pending bill proposes to place a duty of 10 cents a pound on steel wool and 5 cents a pound on steel shavings, and in addition proposes to impose in both instances a duty of 30 per cent ad valorem. In the Summary of Tariff Information it is stated:

Description and use: Steel wool consists of long steel fibers resembling curled hair. The fibers are of triangular cross section and are graded according to fineness from coarse shavings to wool. Steel wool is used as an abrasive and is a substitute for sandpaper and emery cloth or pumice stone, being regarded as superior to them for certain purposes. It is used in shipbuilding, in other building, in factories, and in the household.

Production: No accurate figures of production are available. In 1917 the yearly consumption was estimated at between 1,000,000 and 1,500,000 pounds, which (imports being cut off) virtually represented domestic production. Germany and Switzerland are also producers.

With respect to imports it is said:

During the war very little steel wool was imported. In 1913 imports were 41,436 pounds, valued at $5,177, and in 1914, 27,113 pounds, valued at $3,698.

Those were the imports under the act of 1913, which carried a duty on steel wool and steel shavings of 20 per cent ad valorem. The pending bill separates the two, classifies steel wool as one item, and imposes a duty on it of 10 cents a pound plus 30 per cent ad valorem, and steel shavings as another item, and provides for a duty of 5 cents a pound plus 30 per cent ad valorem.

Under the duty of 20 per cent ad valorem there were imported only 41,436 pounds in 1913 and in 1914 only 27,113 pounds.

During recent years there have been no importations of steel wool, with the exception of a small amount, valued at $116, which was imported during the first nine months of 1921.

Consequently the levying of this duty will simply greatly increase the duty over that of the present law under which importations are almost negligible. The present law carries a duty of 20 per cent, the Payne-Aldrich law carried a duty of 40 per cent, and now under this paragraph the duty on steel wool would be from 55 to 60 per cent ad valorem, and on shavings it would be about 65 per cent ad valorem. The importations

now under the 20 per cent rate are of no consequence at all. I can not see any sort of justification for the high duties proposed; but, as I have said, that is a matter that will have to be attended to by an amendment when individual amendments are in order. At present I have no objection to agreeing to the committee amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 335 on page 66, line 18, after the word "form," to insert "three-fourths of," so as to read:

PAR. 335. Grit, shot, and sand of iron or steel, in any form, three-fourths of 1 cent per pound.

Mr. FLETCHER. With reference to that item the description and uses set forth in the Summary of Tariff Information are as follows:

Description and uses: Grit, shot, and iron sand are chilled iron shot made by heating scrap or pig iron to a fluid state and spraying it with steam as it runs into a large vat of water. The grit is used in grinding rough surfaces of granite, marble, and other stones.

Production figures are not available. Before the war domestic consumption was estimated at 3,200 tons. England is an important producer of these abrasives.

Imports of grit, shot, and sand in 1914 amounted to 228,454 pounds. Since 1917 they have been as follows:

Calendar year.	Quantity.	Value.	Duty.	Ad valorem rate.
	Pounds.			*Per cent.*
1918	489,015	$13,389	$4,017	30
1919	1,020,804	17,718	5,315	30
1920	893,804	16,320	4,896	30
1921 (9 months)	192,800	4,774	.....	30

The present rate of duty is 30 per cent ad valorem. Under the act of 1909, the Payne-Aldrich law, the duty was 1 cent per pound. That would be about 75 per cent. It is proposed now to make the duty about 30 per cent. The importations are so slight that it seems to me that that really is an excessive rate of duty. I am not able to state what the production amounts to, but the importations certainly are not very heavy; and I think, as nearly as I can get at it, that the proposal to make the duty three-fourths of 1 cent per pound amounts to about an equivalent ad valorem of 30 per cent. I move that it be reduced to one-fourth of 1 cent instead of three-fourths of 1 cent a pound. I offer that amendment.

Mr. SMOOT. Mr. President, just for the record, the House gave a rate of 1 cent a pound on this commodity, and it was based upon the testimony that was given by Mr. Kann, in which he says:

I saw last week a quantity of this material from Germany, at a factory in Elkton, Md. They bought the very material which costs us $92 a net ton to make at $60 a net ton New York City.

The Senate committee reported a rate of three-fourths of 1 cent instead of 1 cent. The equivalent ad valorem duty would be about 37 per cent on the price at which the article is sold to-day.

The advantage of shipping in grit, shot, and sand of iron or steel is described by Mr. Kann, perhaps as well as I could describe it, in an answer that he gave to the committee:

Mr. GREEN. That is called crushed steel?

Mr. KANN. Yes, sir; crushed grit, crushed steel—chiefly crushed grit—that is, our fine sizes, which we formerly had great difficulty in getting rid of. We have just developed this market, and this particular material is being offered at $60 a ton by Germany.

Grit is made in very fine grit and coarser grit. It is always an advantage to any company if they can get rid of their fine grit. American manufacturers have to make it all sizes—fine, medium, and coarse. Where Germany manufactures it she takes the fine part, that does not cost her nearly as much as the larger-size grit, and she dumps it into this country, and then sells the medium and large size to the rest of the world at a higher price. If they can take the market in America for the fine grit away from the American manufacturer—and this market is the only place where she can sell it at all—then the cost of the medium and the higher grade of grit advances materially, because of the fact that it is almost a by-product, and the only way the American manufacturer can maintain a market at all is to sell all three grades as they are made. He must sell his fine grade in the American market, and the three-fourths of 1 cent will no more than protect him on that.

I will say to the Senator that if it were only the medium grade and the coarse grade, and they could make it all of those grades, and no fine grade with it, there would be no necessity for this rate, and the rate that the Senator proposes would perhaps be sufficient; but if the fine grade is taken away from the manufacturer, and he can not sell it because of the foreign countries importing that which they want to get rid of, then the Senator can see what would happen to the American manufacturer. That is why we asked that three-fourths of a cent be given, and we lowered the House rate 25 per cent.

Mr. Kann also says:

In making up our production we make 12 sizes; 14 sizes, really.

I did not go into each one, because the medium has a certain number, and the coarse a certain number, and the fine a certain number.

There is no way that we can make any particular amount of any one size. In producing shot we blow the molten metal into the air by steam pressure. It then drops into a tank of water and is chilled. We dry, remove this metal, then screen it; we get out these 12 sizes. We make more of the very coarse and the very fine, but we can not make more of the intermediate sizes for which there is the greatest demand. The foreign market uses different sizes than we do. Their offsizes are the sizes that are most in the demand in the United States.

Of course, the Senator can see that if they take the small sizes away from the trade, or, in other words, skim the cream off the American trade, and leave the skim milk here, they can not live on it very long.

Mr. FLETCHER. Can the Senator state what our exports have been? I have no figures on that point.

Mr. SMOOT. I do not think the exports are given. In fact, I do not think they amount to anything, unless it should be just over the border here in Canada.

Mr. FLETCHER. It seems to me that there was a very considerable reduction made in the act of 1913 from the duty under the act of 1909. Under the act of 1909, according to the experts who figured the ad valorem equivalent, that duty amounted to 75 per cent ad valorem. Under the act of 1913 it came down to 30 per cent, and under the 30 per cent duty the industry has prospered. The manufacturer does not seem to need any particular protection beyond what that gives.

Mr. SMOOT. I will say to the Senator that three-fourths of 1 cent, as I said before, amounts to about 37 per cent ad valorem.

Mr. FLETCHER. That is higher than 30 per cent.

Mr. SMOOT. I am aware of that; but the American manufacturer estimates his cost over all grades that may be produced. If you allow the fine grade to come in here, and take that market away from him, then, of course, his cost upon the other articles will be increased. We can not ship our fine stuff to a foreign market and take their market away, but they can send it in here and take our market away on the fine product which they have to make, of which they can not help but make a certain proportion. If it were possible in the process to make only one grade and have all of it an intermediate grade, then, of course, this would be too high a rate; but it is not too high a rate, taking into consideration the conditions of the industry.

I will say to the Senator that there are very few industries of that kind. Generally, in the case of a manufactured product, they can make just what they want to make, and nothing else; but in the case of this product they can not.

Mr. FLETCHER. The Senator's comment and argument prompt me to change my amendment from "one-fourth" to "one-half." I ask to modify the amendment so as to move to change "three-fourths of 1 cent" in line 18 to "one-half of 1 cent."

The PRESIDING OFFICER (Mr. SHORTRIDGE in the chair). The question is on the amendment proposed by the Senator from Florida to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question reverts to the amendment proposed by the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The PRINCIPAL LEGISLATIVE CLERK. The next amendment will be found on page 66, line 21, where it is proposed to strike out "25" and insert "35," so as to make the paragraph read:

PAR. 336. Corset clasps, corset steels, and dress steels, whether plain or covered with cotton, silk, or other material, 35 per cent ad valorem.

Mr. FLETCHER. Mr. President, I desire to submit just a few observations regarding that paragraph.

Under the act of 1909, corset clasps, corset steels, and dress steels paid a duty of not less than 35 per cent ad valorem. Under the act of 1913, corset clasps, corset steels, and dress steels paid a duty of 15 per cent ad valorem. The House bill provides for 25 per cent ad valorem, and the committee proposes to change "25" to "35" per cent ad valorem.

A corset clasp consists of two short pieces of flat steel, one having a flat metal eyelet and the other having firmly affixed a small metal post so arranged that the eyelet can be hooked over it. Corset steels and dress steels are short strips of flat steel wire covered with cotton gauze or other material.

Approximately 15 establishments manufacture these products. The large industrial centers of New York, Pennsylvania, Connecticut, and Massachusetts are the important producers.

The imports for the fiscal year 1918 were valued at $17,238; they were over four and one-half times that amount in 1914. Later statistics follow:

In 1918 the value of the imports was $206,389. The duty of 15 per cent yielded a revenue of $30,958.

For the calendar year 1919 the value of the imports was $159,190 and the duty was $23,878.

In 1920 the imports were valued at $809,745 and the duty was $121,462.

In 1921, for the first nine months, the value of the imports was $450,069. There are no recorded exports; but the present rate of duty, as I say, is 15 per cent ad valorem. If this amendment is agreed to, you will see that the duty is more than doubled. It is made 35 per cent ad valorem.

The importations are not such now as would give cause for any apprehension that they are interfering with the industry in this country. We are getting some revenue out of the importations, and it seems to me that to increase the duty to more than double will more than likely reduce importations, if not absolutely prohibit importations.

In that case we would lose the revenue. The industry here is in a flourishing condition under the present law, and I can not see what the effect of this would be except possibly to reduce our revenues and simply enable the manufacturers to raise the prices of this product to the consumers. I will be glad to have the Senator from Utah explain this further, and give some reason for the rate fixed.

I move as an amendment that "35" be changed to "15," so that it would read "15 per cent ad valorem."

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Florida to the committee amendment.

Mr. SMOOT. Mr. President, I call attention to the fact that this is one of the items in this schedule which really needs protection, and I think the Senator from Florida himself will admit it. The imports for the fiscal year 1918 were $17,938. Let us see what has happened and what is happening to this industry. It is only a little industry, small compared with larger industries in the steel business.

In 1919 the value of the imports was $159,190. In 1920, in this small industry, they jumped to $809,745. For the nine months of 1921 they were $450,069.

When the imports in an industry as small as this are over $800,000 in a year, jumping from almost nothing in the pre-war period, with the same rate of duty—because the Payne-Aldrich rate was 35 per cent—there is some reason for it. I think, perhaps, the committee has this rate a little too low to make it possible even for the domestic producers to compete with the foreign producers. We were asked for a higher rate than this, but the committee decided we would not give them any more than they had during the pre-war period, and therefore we kept the rate 35 per cent, and I think the industry is entitled to it.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Florida to the committee amendment.

Mr. FLETCHER. I ask for the yeas and nays.

Mr. BURSUM. Let the question be stated, Mr. President.

The PRESIDING OFFICER. The amendment proposed by the Senator from Florida to the amendment of the committee will be read.

The READING CLERK. On page 66, line 21, the Senator from Florida moves to amend the committee amendment by striking out "35" and inserting in lieu thereof "15."

The yeas and nays were ordered, and the principal legislative clerk proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED] and vote "yea." I ask that the same transfer may stand for the day.

Mr. MOSES (when Mr. KEYES's name was called). My colleague [Mr. KEYES] authorized me to state that if present he would vote "nay" on this question.

Mr. PHIPPS (when his name was called). Transferring my pair with the junior Senator from South Carolina [Mr. DIAL] to the junior Senator from New Hampshire [Mr. KEYES], I vote "nay."

The roll call was concluded.

Mr. JONES of Washington (after having voted in the negative). I understand the senior Senator from Virginia [Mr. SWANSON] has not voted. I am paired with that Senator for the evening, as he had to be away. I find I can transfer my pair to the senior Senator from Minnesota [Mr. NELSON]. I do so, and let my vote stand.

Mr. LODGE (after having voted in the negative). I transfer my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the Senator from Oregon [Mr. STANFIELD] and allow my vote to stand.

Mr. STERLING. I find that my pair has not voted, and I therefore transfer my pair with the senior Senator from South Carolina [Mr. SMITH] to the junior Senator from Washington [Mr. POINDEXTER] and vote "nay."

Mr. CURTIS. I desire to announce that the Senator from Indiana [Mr. NEW] is absent on official business. He is paired with the Senator from Tennessee [Mr. MCKELLAR]. I also desire to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 14, nays 38, as follows:

YEAS—14.

Borah	Harrison	Pittman	Stanley
Caraway	Jones, N. Mex.	Robinson	Walsh, Mass.
Fletcher	La Follette	Sheppard	
Harris	Overman	Simmons	

NAYS—38.

Ball	Hale	McCumber	Phipps
Brandegee	Harreld	McKinley	Shortridge
Bursum	Johnson	McLean	Smoot
Calder	Jones, Wash.	McNary	Sterling
Capper	Kellogg	Moses	Sutherland
Curtis	Kendrick	Newberry	Townsend
Elkins	Ladd	Nicholson	Wadsworth
Ernst	Lenroot	Norbeck	Warren
France	Lodge	Oddie	
Gooding	McCormick	Page	

NOT VOTING—44.

Ashurst	Fernald	New	Spencer
Broussard	Frelinghuysen	Norris	Stanfield
Cameron	Gerry	Owen	Swanson
Colt	Glass	Pepper	Trammell
Crow	Heflin	Poindexter	Underwood
Culberson	Hitchcock	Pomerene	Walsh, Mont.
Cummins	Keyes	Ransdell	Watson, Ga.
Dial	King	Rawson	Watson, Ind.
Dillingham	McKellar	Reed	Weller
du Pont	Myers	Shields	Williams
Edge	Nelson	Smith	Willis

So Mr. FLETCHER's amendment to the committee amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

CONTINUATION OF LAND OFFICES.

Mr. STERLING. Mr. President, at this time, with the consent of the chairman of the Committee on Finance, I desire to ask unanimous consent for the present consideration of the bill (S. 3425) to continue the land offices at Bellefourche, Timber Lake, and Lemmon, in the State of South Dakota, and for other purposes.

Mr. SIMMONS. What is the purpose of the bill?

Mr. STERLING. It is a bill to continue the land offices at Bellefourche, Timber Lake, and Lemmon, in the State of South Dakota, a Senate bill amended by the Senate Committee on Public Lands and Surveys by adding the land office at the town of Waterville, in the State of Washington.

Mr. SIMMONS. Does the Senator think it will lead to much debate?

Mr. STERLING. I do not think it will, I will say to the Senator from North Carolina.

Mr. SMOOT. I doubt very much whether it will lead to any debate, because the committee intend to report a general bill of like character just as soon as we can. This comes about by

virtue of the abolishment of land offices in certain States where there is not the business necessary to require the office.

Mr. OVERMAN. The matter was before the Committee on Appropriations, as Senators know, and we all agreed that there was a mistake made in the abolishment of many of these offices.

Mr. STERLING. I will say that House Members as well as Senate Members did not know that the effect of the bill would be to abolish many of the offices.

Mr. OVERMAN. There was a mistake made; there is no doubt about it.

Mr. CARAWAY. Mr. President, may I ask the Senator from South Dakota a question? I did not hear him when he read the names of the offices. I am very much interested in the office at Harrison, Ark., which falls well within the proposition.

Mr. SMOOT. That will be covered by the general bill. Instead of taking the matter up piecemeal, the committee intends to report a general bill.

Mr. CARAWAY. Would the Senator object to having Harrison, Ark., included in this bill? May I ask him first whether there was some report of the Harrison, Ark., office before the committee?

Mr. STERLING. I do not know that there was.

Mr. CARAWAY. The Secretary of the Interior told me that he did not think that office ought to have been abolished.

Mr. STERLING. I think the Senator will have an opportunity to take care of that office.

Mr. CARAWAY. Would the Senator object to including that office in this bill?

Mr. STERLING. I shall not object to including it in the bill. There are other Senators who have asked to amend the bill by including other offices, Senators who did not know, as I did not know, of the wholesale elimination of land offices without inquiry and without notice to Senators or Members of the House, either.

Mr. CARAWAY. I did not know of it, and I would be glad to include Harrison, Ark., in the bill.

Mr. STERLING. I shall not object, I will say to the Senator from Arkansas.

Mr. FLETCHER. May I inquire whether the purpose of the bill is to continue certain land offices?

Mr. STERLING. To continue or reinstate land offices that were eliminated by the act making appropriations for the Department of the Interior. These land offices were eliminated, and of course they will go out of existence the 1st of July next; hence the necessity for speedy action in regard to the legislation in order that it may be considered by the House.

Mr. FLETCHER. Will it continue them indefinitely or just for one year?

Mr. BURSUM. Just for one year.

Mr. SMOOT. I want to say to the Senator from South Dakota that I do not believe this will hasten the result one minute. The House intend to pass a general bill. They may pass it before we can present a general bill, and if they do, then, we will pass the House bill. If we pass a general bill before the House, then they will take the Senate bill, but the House will pass a general bill first, I believe.

Mr. STERLING. I think this action probably will hasten the matter. It is an urgent matter in the State of South Dakota. I am primarily interested, of course, in the land offices in that State. It is not absolutely certain that the House will pass the bill.

Mr. McCUMBER. Mr. President, if the Senator will allow me, I agree with him that the bill to which reference has been made came over and none of us knew that a law which we had passed only a few months ago had been entirely changed. We provided that a number of the land offices in North Dakota, South Dakota, Washington, and other States should be consolidated, so that there would be only the one office instead of having both receiver and a register where the business was light, and that we were to have simply a register or receiver and have but the one office. No sooner had we put that bill through and enacted the law and were arranging for appointments, and so forth, than it was ascertained that a bill which came through without the knowledge of anyone had abolished a great many of the land offices. For that reason I agree with the Senator that the change ought to be made immediately, and I consent that the tariff bill, the unfinished business, may be temporarily laid aside for the consideration of the bill which the Senator from South Dakota desires to call up.

The PRESIDING OFFICER. Is there objection to the request of the Senator from South Dakota for the immediate consideration of the bill (S. 3425).

There being no objection, the Senate as in Committee of the Whole, proceeded to consider the bill which had been reported from the Committee on Public Lands and Surveys with an amendment, in section 1, page 1, line 5, after the name "Dakota," to insert "and Waterville, in the State of Washington," so as to make the bill read:

Be it enacted, etc., That the land offices now located, respectively, at Bellefourche, Timber Lake, and Lemmon in the State of South Dakota, and Waterville in the State of Washington, are hereby continued for and during the fiscal year commencing July 1, 1922, and thereafter, in the discretion of the President, as long as the public business at such offices shall warrant: *Provided, however*, That the President may consolidate the offices of register and receiver in any of said offices whenever he may deem it in the public interest.

SEC. 2. That such appropriations as are sufficient to maintain said offices are hereby authorized to be made from time to time as conditions may require.

Mr. PITTMAN. Mr. President, I will ask the Senator if in examining the data he ascertained whether the land office at Elko, Nev., was also eliminated? My recollection is that it was, but I would like to be sure of it.

Mr. STERLING. I do not think so, but I am not sure, I will say to the Senator. I find continued under the bill the following land offices: Eureka, Calif.; Lamar, Colo.; Lewiston, Idaho; Duluth, Minn.; Burns, Oreg.; Seattle, Wash.; and Vancouver, Wash. All those offices were continued under the bill. I suppose it follows that the others not named as continued under the bill are eliminated. I will say this, and I thank Senators sitting near me for calling my attention to it, that if the offices do not meet the requirements of the law as interpreted by the department as to acreage yet to be entered and the receipts of the office, they will be eliminated.

Mr. PITTMAN. I remember the bill now. I did not remember it at the time the matter was first suggested.

Mr. OVERMAN. When the Appropriations Committee had the matter up we had Members of the House and Members of the Senate before the committee, and we came to the conclusion that the land offices in the Senator's State were dropped by mistake. I think nothing was said about the others. The other land offices were wiped out by the appropriation bill. I remember, instead of putting towns in the Senator's State back in that bill, we suggested to him to take care of it in a separate bill. So I think the Senator's bill is all right.

Mr. STERLING. That is what I have sought to do.

Mr. OVERMAN. I have no objection to it. I do not know about the other land offices which were not provided for.

Mr. STERLING. In agreeing not to object to any amendment here which may be offered by other Senators, I take into consideration the circumstances under which the bill is passed, so far as the State of South Dakota is concerned. I think House Members and Senators from the State of South Dakota were similarly treated in not being consulted as to the needs of their States and the need for the office and the needs of the people. They are undoubtedly entitled to have their offices included.

Mr. PITTMAN. I did not know to what bill the Senator from South Dakota referred. I remember the bill now, and I know it does not affect the land offices in Nevada. Of course, I have no objection to the bill. I simply wanted to offer an amendment if the Nevada offices had been affected in any way.

Mr. McCUMBER. In section 1, on page 1, line 5, I move, before the word "are," to insert "Williston, Minot, and Dickinson, in the State of North Dakota."

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from North Dakota to the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. PHIPPS. I offer the following amendment.

The PRESIDING OFFICER. The Senator from Colorado offers the following amendment, which will be stated.

The ASSISTANT SECRETARY. After the amendment just agreed to insert "Del Norte, in the State of Colorado."

The amendment to the amendment was agreed to.

Mr. BURSUM. I offer the following amendment to be inserted after the amendment just agreed to.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. After the amendment just agreed to insert "Clayton and Fort Sumner, in the State of New Mexico."

The amendment to the amendment was agreed to.

Mr. CARAWAY. There were two offices dropped in my State, Harrison and Camden. I move to insert those.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. After the amendment last agreed to insert:

Harrison and Camden, in the State of Arkansas.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question is on the committee amendment as amended.

The amendment as amended was agreed to.

Mr. PHIPPS. I offer the following amendment covering a different class of offices; that is to say, where the action will be a little different. This is simply to retain one of the officials in place where the offices were not slated to be discontinued.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. At the end of section 1 insert a new section, as follows:

SEC. 2. That the land office now located at Durango, Colo., is also hereby continued for and during said fiscal year, but the provisions of the act entitled "An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1923, and for other purposes," approved May 25, 1922, shall not apply to the said land office in so far as they relate to the consolidation of the offices of register and receiver of such land office.

So as to make the bill read:

Be it enacted, etc., That the land offices now located, respectively, at Bellefourche, Timber Lake, and Lemmon, in the State of South Dakota; Waterville, in the State of Washington; Williston, Minot, and Dickinson, in the State of North Dakota; Del Norte, in the State of Colorado; Clayton and Fort Sumner, in the State of New Mexico; and Harrison and Camden, in the State of Arkansas, are hereby continued for and during the fiscal year commencing July 1, 1922, and thereafter, in the discretion of the President, as long as the public business at such offices shall warrant: *Provided, however*, That the President may consolidate the offices of register and receiver in any of said offices whenever he may deem it in the public interest.

SEC. 2. That the land office now located at Durango, Colo., is also hereby continued for and during said fiscal year, but the provisions of the act entitled "An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1923, and for other purposes," approved May 25, 1922, shall not apply to the said land office in so far as they relate to the consolidation of the offices of register and receiver of such land office.

SEC. 3. That such appropriations as are sufficient to maintain said offices are hereby authorized to be made from time to time as conditions may require.

Mr. PITTMAN. What is the effect of the amendment?

Mr. PHIPPS. The effect is simply this: The office was not slated to be discontinued, but it was slated to have the positions of receiver and register consolidated. The fact is that it would automatically do that under the regulation of the department that the expenditures can not exceed 33⅓ per cent of the receipts. In this case the office gets no credit whatever for the Indian-lands money which is handled, and the business of the office requires the services of both the register and receiver.

Mr. OVERMAN. We passed an appropriation bill taking care of all these things and it was agreed to in conference and became the law. Senators now come here to undo what we have done. However, I do not suppose the House will consider it for a moment, so I will not object to it.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Colorado.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to continue certain land offices, and for other purposes."

DOMESTIC PRICE OF BONE BLACK.

Mr. WALSH of Massachusetts. Mr. President, before the next amendment to the pending tariff bill is taken up, I ask unanimous consent to have inserted in the RECORD some communications which I have received with reference to the domestic price of bone black.

In the discussion of this question the other night the Senator from North Dakota [Mr. MCCUMBER] quoted some prices from the Oil, Paint, and Drug Reporter, which were inaccurate and which did not relate to the kind of bone black under discussion at that time. These communications are from various dealers in this country and tend to show that the price is, as I claimed at that time, 4 cents per pound. They refute the opposing contention and explain the statement heretofore made by me on this matter.

There being no objection, the communications were ordered to be printed in the RECORD, as follows:

SAVANNAH SUGAR REFINING CORPORATION,
Savannah, Ga., May 22, 1922.

Messrs. POMEROY & FISCHER,
95 Madison Avenue, New York, N. Y.

GENTLEMEN: For your information, we have bought what you might say will be our requirements in domestic bone black for 1922 at 4 cents per pound f. o. b. our refinery, Port Wentworth.

Yours very truly,

W. S. PARDONNER.

POMEROY & FISCHER,
New York, May 25, 1922.

Hon. DAVID I. WALSH,
Senate Finance Committee, Washington, D. C.

(Subject: Tariff on bone black, par. 66, Schedule 1.)

MY DEAR MR. WALSH: I fear you will be weary with my continued letters on bone black, but I now write merely to transmit a letter received this morning from the Oil, Paint, and Drug Reporter. Added to the evidence previously submitted, it should prove to Senator MCCUMBER that beyond question the market for bone black at this time is 4 cents per pound and not 5 to 7 cents, as maintained by him in the debate. I remain,

Yours very truly,

CHAS. B. GRIMES.

—

NEW YORK, *May 24, 1922.*

POMEROY & FISCHER,
95 Madison Avenue, New York, N. Y.

GENTLEMEN: In answer to your question concerning the quotation on bone black as it appears in the Reporter, the quoted price is, as is stated in the prices current, upon powdered of the sort that is used in the paint industry. It does not cover the price of granular, as used in the sugar industry. This, according to our information, is considerably lower. For instance, one prominent handler who considered our inside price of 5½ cents rather low, quoted granular for decolorizing purposes at 4½ cents. We hope this gives you the information you desired.

Very truly yours,

OIL, PAINT, AND DRUG REPORTER (INC.),
H. CRAIG, *Managing Editor.*

—

THE NATIONAL SUGAR REFINING CO. OF NEW JERSEY,
New York, May 18, 1922.

Messrs. POMEROY & FISCHER,
95 Madison Avenue, New York City.

GENTLEMEN: Referring to the telegram which you submitted to us quoting domestic bone black at 5 cents to 7 cents per pound, we beg to say that this price is entirely too high. We are not in the market at the moment for bone black, but its value ranges from 4 cents to 4½ cents.

Yours very truly,

THE NATIONAL SUGAR REFINING CO. OF NEW JERSEY,
GEO. R. BUNKER, *Secretary.*

—

WARNER SUGAR REFINING CO.,
New York, May 23, 1922.

Messrs. POMEROY & FISCHER,
No. 95 Madison Avenue, New York, N. Y.

GENTLEMEN: Replying to your inquiry as to whether we have made purchases of bone black under $100 per ton f. o. b. New York, I beg to say that we made several purchases the early part of this year from domestic bone-black manufacturers at a price not exceeding 4 cents per pound. I understand that I could make purchases to-day of new 12 by 28 American bone black from both eastern and western manufactures at 4 cents per pound delivered New York.

I trust the above information will be of value to you in your endeavors to obtain, if possible, a reversal of the action of Congress to place an import tariff on foreign bone black.

Yours very truly,

J. R. PELS,
Purchasing Agent.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The ASSISTANT SECRETARY. The pending amendment is on page 67, line 2, paragraph 337——

Mr. SIMMONS. Mr. President——

Mr. MCCUMBER. I yield to the Senator from North Carolina.

Mr. SIMMONS. I desire to ask the Senator from North Dakota if he would not be willing now to take up paragraph 346?

Mr. MCCUMBER. And to proceed from that paragraph?

Mr. SIMMONS. To proceed from that paragraph.

Mr. MCCUMBER. That is satisfactory to me, Mr. President.

The PRESIDING OFFICER. The amendment of the Committee on Finance to paragraph 346 will be stated.

The next amendment of the Committee on Finance was, in paragraph 346, on page 69, line 21, after the words "partly of," to strike out "iron or steel" and to insert "iron, steel, or other base metal"; so as to make the paragraph read:

PAR. 346. Belt buckles, trouser buckles, and waistcoat buckles, shoe or slipper buckles, and parts thereof, made wholly or partly of iron, steel, or other base metal, valued at not more than 20 cents per hundred, 5 cents per hundred; valued at more than 20 and not more than 50 cents per hundred, 10 cents per hundred; valued at more than 50 cents per hundred, 15 cents per hundred; and in addition thereto, on all of the foregoing, 20 per cent ad valorem.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. SHEPPARD. Mr. President——

Mr. SIMMONS. I yield the floor to the Senator from Texas.

Mr. MCCUMBER. If the Senator from Texas will yield to me, I desire to suggest that I presume he does not object to the particular amendment of the committee which has been stated being acted on?

Mr. SHEPPARD. I desire briefly to discuss the paragraph.

Mr. McCUMBER. But I suggest that the Senator from Texas would not object to having acted upon that particular amendment, which is simply a designation of the class?

Mr. SHEPPARD. I do not; but I thought the discussion should properly proceed under the amendment, and then we could vote on the amendment. However, I am willing to take any course which the Senator from North Dakota suggests.

Mr. McCUMBER. The amendment which has been stated, I understand, is the only amendment to the paragraph?

Mr. SHEPPARD. It is, and therefore I thought it was best to deliver my remarks on the only pending amendment.

Mr. McCUMBER. Very well. I understand the situation.

Mr. SHEPPARD. Mr. President, the paragraph of the bill under consideration reads as follows:

PAR. 346. Belt buckles, trouser buckles, and waistcoat buckles, shoe or slipper buckles, and parts thereof, made wholly or partly of iron, steel, or other base metal, valued at not more than 20 cents per hundred, 5 cents per hundred; valued at more than 20 and not more than 50 cents per hundred, 10 cents per hundred; valued at more than 50 cents per hundred, 15 cents per hundred; and in addition thereto on all of the foregoing 20 per cent ad valorem.

Translated in terms of ad valorem these rates range from 45 to 55 per cent.

The only change this makes in the bill as it passed the House is to add the words "or other base metal" after the words "iron or steel." The rates are the same as in the House bill and are slightly higher than most of the corresponding rates in the Payne-Aldrich Act of 1909.

The rates on these articles in the existing Democratic tariff act are 15 per cent ad valorem, except as to shoe and slipper buckles, which are 20 per cent ad valorem.

It will be seen, therefore, that the proposed bill increases about three times the prevailing tariff rates on these necessary articles of human wear.

Imports in 1919 had a value of $17,880; in 1920, $7,349; in the first nine months of 1921, $793. They came principally from Germany, Austria, and France. Home production has an annual value of a million dollars or more, according to the tariff commission. Do these figures afford any possible basis for the fear of foreign competition? Do they afford any justification for an increase in tariff rates of 300 per cent?

Evidently differences in exchange and wages are not resulting in any appreciable danger to this American industry. Evidently American skill and experience enable us to make these articles in such volume and at such cost per unit that foreign competition can not damage us. Evidently duties on these articles are useless for protection and almost equally ineffective for revenue. The enormous increases proposed in the pending paragraph can only serve as a basis or excuse for extortion in the home market.

At the proper time I shall move to substitute the existing Democratic rates for those in the pending bill. The American industry is making satisfactory progress under them and they will afford a small revenue.

I quote here from the survey of the Tariff Commission:

The act of 1913 reduced the tariff approximately 70 per cent. But even with this large reduction the contention of domestic manufacturers to the effect that foreign producers are destructive competitors in the American market is not substantiated by statistics of imports, which, compared with domestic production, are very small. The annual importation—computed on values—has never been much over 2 per cent of the total available supply, and from 1908 to 1919 it was much less.

I understand that under the rule adopted for the consideration of the pending bill, where there is no change in the rate which has been fixed by the other House we may not for the present offer an amendment changing the rate. I have no objection, therefore, to the amendment proposed by the committee, which does not involve a rate change by the Senate.

The PRESIDING OFFICER (Mr. BROUSSARD in the chair). The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment reported by the Committee on Finance will be stated.

The next amendment of the Committee on Finance was in paragraph 347, on page 70, line 6, before the words "per centum," to strike out the figures "15" and to insert "25"; so as to make the paragraph read:

PAR. 347. Hooks and eyes, wholly or in chief value of metal, whether loose, carded, or otherwise, including weight of cards, cartons, and immediate wrappings and labels, 4½ cents per pound and 25 per cent ad valorem.

Mr. SHEPPARD. Mr. President, paragraph 347 of the bill before the Senate is as follows:

Hooks and eyes, wholly or in chief value of metal, whether loose, carded, or otherwise, including weight of cards, cartons, and immediate wrappings and labels, 4½ cents per pound and 15 per cent ad valorem.

This is the form in which the paragraph passed the House, and in which it appeared in the Payne-Aldrich Act.

The existing Democratic tariff law places a rate of 15 per cent ad valorem on these items.

Domestic production in 1919 was valued at $2,354,000, importation at only $50. The value of imports in 1920 was $3,401, in the first nine months of 1921, $3,533. Home production continued on a scale adequate to supply the home demand.

It is evident, therefore, that importations are not endangering home production, and that the proposed duty increase of about 100 per cent is without reason.

I shall move, at the proper time, to retain the prevailing rate, to wit, 15 per cent ad valorem, under which the industry produces a sufficient supply for domestic needs. So small are the importations that the question of revenue is insignificant.

Hooks and eyes are a crude, unsatisfactory, baffling, and bedeviling means of fastening dresses, as most married men will testify. It is an industry that should not be encouraged. Let us hope that modern progress, having furnished us wireless telegraphy, heatless cookery, and the horseless carriage, will next discover the hookless and eyeless dress. Hooks and eyes are made of brass, plated with tin, coated with japan, located with difficulty, and connected with the most strenuous and agonizing endeavor. They are made by automatic machinery; would they could be fastened, Mr. President, in the same way.

Mr. President, I move to amend the committee amendment by striking out "25" and inserting "15."

Mr. McCUMBER. Mr. President, may I ask the Senator a question?

Mr. SHEPPARD. Certainly, sir.

Mr. McCUMBER. As an expert, will the Senator inform me how many dresses a pound of hooks and eyes will supply?

Mr. SHEPPARD. From the experience I have had, it seems to me that the number of hooks and eyes on each dress is almost infinite and that they are hopelessly invisible.

Mr. McCUMBER. If I should venture a guess, I should say that one pound would perhaps be sufficient to furnish all the hooks and eyes a lady would use in a lifetime.

Mr. SHEPPARD. I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER (Mr. BROUSSARD in the chair). The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. In paragraph 347, page 70, line 6, before the words "per centum," it is proposed to strike out "25" and to insert "14."

Mr. McLEAN. Mr. President, the remarks of the Senator from Texas in opposition to the paragraph have been very interesting, but it does not seem to me that he could have investigated the subject very thoroughly. The Reynolds report goes into this item in detail, and the conclusion of the commission is that to equalize the difference in conversion cost of this article would require 274 per cent. The committee has given it 25 per cent. Under the circumstances I do not think it is necessary to debate the question any longer.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Texas to the amendment reported by the committee, and on which the yeas and nays are demanded.

The yeas and nays were not ordered.

Mr. SHEPPARD. I make the point of no quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Ball	Hale	McCormick	Pittman
Borah	Harreld	McCumber	Sheppard
Brandegee	Harris	McKinley	Shortridge
Broussard	Harrison	McLean	Simmons
Bursum	Johnson	McNary	Smith
Calder	Jones, N. Mex.	Moses	Smoot
Capper	Jones, Wash.	Newberry	Sterling
Curtis	Kellogg	Nicholson	Sutherland
Elkins	Kendrick	Oddie	Townsend
Ernst	La Follette	Overman	Wadsworth
France	Lenroot	Page	Warren
Gooding	Lodge	Phipps	

The PRESIDING OFFICER. Forty-seven Senators have answered to their names—not a quorum. The Secretary will call the names of the absentees.

The Assistant Secretary called the names of the absent Senators, and Mr. HEFLIN and Mr. LADD answered to their names when called.

The PRESIDING OFFICER. Forty-nine Senators have answered to their names. There is a quorum present. The question is on the amendment offered by the Senator from Texas [Mr. SHEPPARD] to the amendment of the committee.

Mr. SHEPPARD. Mr. President, I want to say to the Senator from Connecticut that I took the figures I quoted from the Summary of Tariff Information furnished us by the Tariff Commission, and I desire to have the vote taken on the committee amendment. Later on I shall move to strike out the specific rate of 4½ cents a pound, when we return to the unchanged text of the bill.

The PRESIDING OFFICER. The question is on the amendment proposed by the committee, which will be stated.

The ASSISTANT SECRETARY. On page 70, line 6, in the paragraph relative to hooks and eyes, the committee proposes to strike out "15" and to insert "25."

Mr. SHEPPARD. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. BALL (when his name was called). I transfer my pair with the Senator from Florida [Mr. FLETCHER] to the Senator from Pennsylvania [Mr. CROW], and will vote. I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. MOSES (when Mr. KEYES's name was called). My colleague [Mr. KEYES] is absent on account of illness. I am authorized to state that if he were present he would vote "yea" on this question.

Mr. LODGE (when his name was called). Making the same announcement as before as to the transfer of my pair, I vote "yea."

Mr. PHIPPS (when his name was called). Making the same announcement as to my pair and its transfer, I vote "yea."

Mr. SUTHERLAND (when his name was called). Transferring my general pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Washington [Mr. POINDEXTER], I vote "yea."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

Mr. ERNST (after having voted in the affirmative). I transfer my pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Missouri [Mr. SPENCER] and allow my vote to stand.

The result was announced—yeas 40, nays 10, as follows:

YEAS—40.

Ball	Gooding	Lodge	Page
Brandegee	Hale	McCormick	Pepper
Broussard	Harreld	McCumber	Phipps
Bursum	Johnson	McKinley	Shortridge
Calder	Jones, Wash.	McLean	Smoot
Capper	Kellogg	McNary	Sterling
Curtis	Kendrick	Moses	Sutherland
Elkins	Ladd	Newberry	Townsend
Ernst	La Follette	Nicholson	Wadsworth
France	Lenroot	Oddie	Warren

NAYS—10.

Borah	Harrison	Pittman	Smith
Caraway	Heflin	Sheppard	
Harris	Overman	Simmons	

NOT VOTING—46.

Ashurst	Frelinghuysen	Norris	Swanson
Cameron	Gerry	Owen	Trammell
Colt	Glass	Poindexter	Underwood
Crow	Hitchcock	Pomerene	Walsh, Mass.
Culberson	Jones, N. Mex.	Ransdell	Walsh, Mont.
Cummins	Keyes	Rawson	Watson, Ga.
Dial	King	Reed	Watson, Ind.
Dillingham	McKellar	Robinson	Weller
du Pont	Myers	Shields	Williams
Edge	Nelson	Spencer	Willis
Fernald	New	Stanfield	
Fletcher	Norbeck	Stanley	

So the committee amendment was agreed to.

The next amendment was, in paragraph 348, on page 70, line 10, before the words "per centum," to strike out "40" and insert "55," so as to read:

Snap fasteners and clasps, and parts thereof, by whatever name known, or of whatever material composed, not plated with gold, silver, or platinum, and not mounted on tape, 55 per cent ad valorem.

Mr. SHEPPARD. Paragraph 348 of the bill under consideration provides, as reported to the Senate, that snap fasteners and clasps, and parts thereof, by whatever name known, or of whatever material composed, not plated with gold, silver, or platinum, and not mounted on tape, 55 per cent ad valorem; mounted on tape, 60 per cent ad valorem. This represents an increase over corresponding rates in the bill as it passed the House of about 25 per cent, the House rates being 40 per cent ad valorem and 45 per cent ad valorem, respectively. It presents an increase of 5 to 10 per cent over the Payne rates of 1909 and an increase of 200 per cent and upward over the existing Democratic rates, which are 15 per cent ad valorem for snap fasteners and clasps made wholly or in chief value of iron and steel, and 20 per cent ad valorem on the said fasteners and clasps composed of metal other than iron or steel.

These articles are a decided improvement over the exasperating hooks and eyes as devices for fastening clothing, and are used as substitutes for them, as well as for buttons, buckles, and pins.

Annual production in the United States is valued at about $6,000,000, while imports in 1920 had a value of $26,351, and during the first nine months of 1921 a value of $7,000.

There is nothing in these figures calling for the large increases in the House bill and still larger increases in the bill as reported to the Senate. There is nothing to show that the moderate duties in the current Democratic law are not sufficient for all legitimate purposes, and I move to substitute 15 per cent for 55 in the pending paragraph.

The VICE PRESIDENT. The Secretary will state the amendment to the amendment.

The ASSISTANT SECRETARY. On page 70, line 10, strike out "55" and insert in lieu thereof "15," so as to read:

Not mounted on tape, 15 per cent ad valorem.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

Mr. LODGE. Mr. President, I do not know whether an amendment I desire to offer is strictly in order at this time. The committee amendment in line 11 is "mounted on tape, 60 per cent ad valorem." I want to add another classification, and I suppose it would come properly as an individual amendment and not as an amendment to the committee amendment. I want to add the words, "except, however, that on sew-on fasteners there shall be a specific duty of 20 cents a single gross."

Mr. MCCUMBER. The Senator is not offering that now, I understand?

Mr. LODGE. No; I believe it is not in order.

Mr. MCCUMBER. That is correct.

Mr. LODGE. I give notice that I shall offer that amendment.

Mr. MCCUMBER. Mr. President, I want to read into the RECORD at this time some of the testimony which was given in reference to the cost of these fasteners. This was the statement of Mr. Waldes, of Waldes & Co., and I ask Senators on the other side of the Chamber who get startled at some of our tariff rates to consider what we would have to pay if we should attempt to import any of these articles into some of these other countries. The rates of duty in the different countries are as follows:

Belgium, about 75 per cent; Czechoslovakia, 40 per cent; France, 80 per cent; Italy, 90 per cent; Poland, 300 per cent; Spain, 90 per cent; while in Germany and Austria the importation is prohibited.

He testified further, as follows:

In the past five years five manufacturers of snap fasteners have gone into bankruptcy, and this condition shows no sign of improvement so long as the German-made articles are admitted on present rate of duty. The manufacture of snap fasteners can be continued and imported into this country at cheaper rates than they can be produced in the United States.

He further said:

Since 1918 our losses in the manufacture in this country amount to almost $700,000. We shall be glad to continue in the business, and for certain reasons hope to increase and extend our business here so that the bulk of the manufacture can be concentrated in this country. To enable us to do this the rate of import duty on snap fasteners and clasps, in our opinion and based upon our experience in manufacturing in this country and while trying to meet the German competition, should be made at least 60 per cent ad valorem, not mounted on tape or cardboard, and 65 per cent ad valorem when mounted on tape or cardboard.

This was on the American valuation basis. We have made it very much less than this, and on the foreign valuation basis, so I think, if we want to continue the business in this country at all, we will have to give at least the rate of duty we have recommended.

Mr. SHEPPARD. As long as the importations are only $26,000, and the home production is something like $6,000,000, there can not be much of occasion for protection. The domestic manufacturers must give some other reason than the danger of increased importations for failure in business, if some of them do occasionally fail.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the committee was, on page 70, line 11, to strike out "45" at the end of the line and insert in lieu thereof "60," so as to read:

Mounted on tape, 60 per cent ad valorem.

Mr. SHEPPARD. I move to strike out 60 and insert in lieu thereof 20, and I want to add that with the diminutive volume of importations the domestic demand is being substantially and satisfactorily met under the existing tariff conditions. I ask for a vote.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, in paragraph 349, page 70, line 12, where the committee proposed to strike out the word "buttons" and the comma, and the words "except steel," and insert in lieu thereof the same words without the comma and with the words "except steel" inclosed in parentheses.

The amendment was agreed to.

The next amendment of the committee was, on page 70, line 17, to strike out "10" and insert in lieu thereof "20."

Mr. SHEPPARD. Mr. President, paragraph 349 of the pending bill is now before us, and deals with buttons—buttons of all kinds—simple but essential devices, which do more perhaps to hold civilization together than all the more pretentious agencies of social existence combined. They are in a supreme sense necessities of civilized life and should not be heavily taxed. On a single suspender button may at times rest more responsibility and more possibility than may well be measured.

The paragraph as amended by the Senate committee reads as follows:

Metal trousers buttons (except steel) and nickel bar buttons, one-twelfth of 1 cent per line per gross; steel trousers buttons one-fourth of 1 cent per line per gross; buttons of metal, not specially provided for, three-fourths of 1 cent per line per gross; and, in addition thereto, on all of the foregoing, 20 per cent ad valorem; metal buttons embossed with a design, device, pattern, or lettering, 45 per cent ad valorem: *Provided*, That the term "line" as used in this paragraph shall mean the line button measure of one-fortieth of 1 inch.

The language of the paragraph remains as it passed the House, the only change being an increase of the ad valorem rates from 10 to 20 and from 35 to 45, respectively. This is practically the scale of rates contained in the Payne bill on buttons, except that the 20 per cent ad valorem rate of the Senate committee bill was 15 per cent ad valorem in the Payne bill.

The rate on buttons in the Simmons-Underwood law—the Democratic law—now in operation is 15 per cent ad valorem.

Buttons are of such universal necessity and use that there can be no excuse for high tariff taxes except on one type—namely, bachelor buttons. Bachelor buttons made abroad ought to have so high an import tax and those made at home so high an internal-revenue tax that all bachelors would be compelled to forsake single cussedness or remain in hiding forever. In fact, buttons for bachelors should be made so inaccessible that the bachelor hymn of the Republic would be "Button, button, who's got the button?"

It developed at the hearings that the annual domestic output of buttons is valued at $25,000,000, while imports in 1920 were valued at $27,684; in the first nine months of 1921, $17,765. Asked why, in the face of such conditions, he desired an increase of 200 to 300 per cent in the tariff taxes on buttons, one of the representatives of a great American button factory said at the hearings:

We are in the class of what's going to happen. We are fearful for the future.

On so flimsy a foundation rests the tremendous advances in the bill before us on one of the necessary items of civilized life.

I shall move to strike out the words "20 per cent," then to strike out the words "45 per cent," and insert in lieu of the latter the language of existing law, "15 per cent ad valorem."

If these amendments prevail I shall at the proper time move to strike out all the specific rates in the pending paragraph. This will leave buttons under the existing rate—15 per cent ad valorem—the duty under which the American button industry practically commands the American market.

I move to strike out the numerals "20" and insert in lieu thereof the numerals "15."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 70, line 17, the Senator from Texas moves to strike out "20" and insert in lieu thereof "15."

The yeas and nays were ordered.

Mr. McLEAN. Mr. President, I wish to call attention to the fact that on this article of metal buttons the Reynolds report shows the American manufacturer is entitled to 145 per cent. We have given him 20 per cent. If the Senator from Texas will move to amend the bill to include bachelor buttons and follow that with a motion to raise the rate on those buttons, I think he would get some votes on this side. However, it is apparent from his discussion of the paragraph that he is more familiar with the needs for protection on bachelor buttons than he is for protection on metal buttons.

Mr. SHEPPARD. Mr. President, I desire to withdraw the amendments which I have offered in order that the vote may be on the committee amendment.

The VICE PRESIDENT. The Senator from Texas withdraws his amendment to the amendment. The question is on the committee amendment, which will be stated.

The ASSISTANT SECRETARY. The committee amendment is, on line 17, to strike out "10" and insert "20," so as to read:

PAR. 349. Metal trouser buttons (except steel) and nickel bar buttons, one-twelfth of 1 cent per line per gross; steel trouser buttons, one-fourth of 1 cent per line per gross; buttons of metal, not specially provided for, three-fourths of 1 cent per line per gross; and in addition thereto, on all of the foregoing, 20 per cent ad valorem.

Mr. SHEPPARD. On the committee amendment I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. MOSES (when Mr. KEYES's name was called). I am authorized by my colleague [Mr. KEYES], who is absent on account of illness, to state that if present he would vote "yea" on this amendment.

Mr. LODGE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. NEW (when his name was called). I transfer my pair with the Senator from Tennessee [Mr. MCKELLAR] to the Senator from Iowa [Mr. RAWSON] and vote "yea."

Mr. PHIPPS (when his name was called). Making the same announcement as before, I vote "yea."

Mr. SUTHERLAND (when his name was called). Making the same announcement as on the previous vote, I vote "yea."

Mr. WALSH of Montana (when his name was called). I inquire if the senior Senator from New Jersey [Mr. FRELINGHUYSEN] has voted?

The VICE PRESIDENT. He has not voted.

Mr. WALSH of Montana. I have a pair with the senior Senator from New Jersey. I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

The roll call was concluded.

Mr. HALE. Making the same announcement as before, I vote "yea."

Mr. BALL (after having voted in the affirmative). Has the senior Senator from Florida [Mr. FLETCHER] voted?

The VICE PRESIDENT. He has not voted.

Mr. BALL. I have a general pair with that Senator. I transfer that pair to the senior Senator from Minnesota [Mr. NELSON] and allow my vote to stand.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS];

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS].

The result was announced—yeas 42, nays 14, not voting 40, as follows:

YEAS—42.

Ball	Calder	Ernst	Harreld
Brandegee	Capper	France	Johnson
Broussard	Curtis	Gooding	Jones, Wash.
Bursum	Elkins	Hale	Kellogg

Kendrick	McKinley	Oddie	Sterling
Ladd	McLean	Page	Sutherland
La Follette	McNary	Pepper	Townsend
Lenroot	Moses	Phipps	Wadsworth
Lodge	New	Ransdell	Warren
McCormick	Newberry	Shortridge	
McCumber	Norbeck	Smoot	

NAYS—14.

Ashurst	Heflin	Sheppard	Swanson
Cummins	Jones, N. Mex.	Simmons	Walsh, Mont.
Harris	Overman	Smith	
Harrison	Pittman	Stanley	

NOT VOTING—40.

Borah	Fernald	Nelson	Spencer
Cameron	Fletcher	Nicholson	Stanfield
Caraway	Frelinghuysen	Norris	Trammell
Colt	Gerry	Owen	Underwood
Crow	Glass	Poindexter	Walsh, Mass.
Culberson	Hitchcock	Pomerene	Watson, Ga.
Dial	Keyes	Rawson	Watson, Ind.
Dillingham	King	Reed	Weller
du Pont	McKellar	Robinson	Williams
Edge	Myers	Shields	Willis

So the amendment of the committee was agreed to.

The next amendment of the committee was, on page 70, at the beginning of line 19, before the words "per cent," to strike out "35" and to insert "45," so as to read:

PAR. 349. Metal trouser buttons (except steel) and nickel bar buttons, one-twelfth of 1 cent per line per gross; steel trouser buttons, one-fourth of 1 cent per line per gross; buttons of metal, not specially provided for, three-fourths of 1 cent per line per gross; and in addition thereto, on all of the foregoing, 20 per cent ad valorem; metal buttons embossed with a design, device, pattern, or lettering, 45 per cent ad valorem: *Provided*, That the term "line" as used in this paragraph shall mean the line button measure of one-fortieth of 1 inch.

Mr. SHEPPARD. Mr. President, I move in the committee amendment to strike out "45" and insert in lieu thereof "20."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. In the amendment of the committee the Senator from Texas moves to strike out "45" and insert "20," so as to read "20 per cent ad valorem."

The VICE PRESIDENT. The question is on the amendment to the amendment.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 70, line 24, after the word "other," to strike out "basic" and to insert "base"; and on page 71, line 2, before the words "per cent," to strike out "28" and insert "40," so as to make the paragraph read:

PAR. 350. Pins with solid heads, without ornamentation, including hair, safety, hat, bonnet, and shawl pins; and brass, copper, iron, steel, or other base metal pins, with heads of glass, paste, or fusible enamel; all the foregoing not plated with gold or silver, and not commonly known as jewelry, 40 per cent ad valorem.

Mr. SHEPPARD. Mr. President——

Mr. SMOOT. Mr. President, I wish to say to the Senator from Texas that it is the intention of the committee to ask that "40" be stricken out and that in lieu thereof "35" be inserted, so whatever he wants to say with reference to the rate he can say with the suggestion in mind that the committee desires to have the rate reduced to 35 per cent ad valorem.

Mr. SHEPPARD. That modifies the situation to some extent, but I think the rate is still inexcusable.

Mr. President, we now reach one of the superlative iniquities of the Republican tariff bill, an increase of 100 per cent in the tariff tax on the ordinary, common safety pin, the first implement used by human beings as they alight upon this mortal shore, at once the symbol and the guard of infancy, necessary to rich and poor, to humble and to proud, whether palace or hovel house, the newborn glory of a babe. Why, Mr. President, as notice of this characteristic infamy reaches the multitudes of fresh arrivals on the stork express, the cry with which they greet the light of earth and time will deepen into a chorus of denunciation before which the Republican Party will retire in hopeless and disordered flight. More than this, it is proposed in the same paragraph to double the tariff charges on ordinary, common hairpins, so essential to every American woman, and on ordinary, common pins with which the mothers of the land use with their bonnets and their shawls. What fatuity possesses these 7,000,000-majority bloated men? Do they not know that once there was an Aldrich and a Payne who brooked the justice of the Almighty to keep their tariff State in Washington, and will they fail to profit by their fate? Mother's bonnet, auntie's shawl, baby's safety pin laid under tribute to the money barons and the profiteers!

Angels and ministers of grace, defend us!

The paragraph in question—paragraph 350—provides as follows:

Pins with solid heads, without ornamentation, including hair, safety, hat, bonnet, and shawl pins; and brass, copper, iron, steel, or other base metal pins, with heads of glass, paste, or fusible enamel; all the foregoing not plated with gold or silver and not commonly known as jewelry, 40 per cent ad valorem.

The rate adopted by the House was 28 per cent ad valorem.

Under the low Democratic rate of 20 per cent ad valorem this industry has grown from a total domestic production valued at $2,713,782 in 1914 to $7,248,000 in 1919, while the value of competing imports was only $130,165. Imports in 1920 were valued at $161,142; in the first nine months of 1921, $156,175, while home production continued to supply almost the entire home market—even making some exportations.

There is no reason for a higher duty than the moderate rate of the Democracy.

I move to strike out "40" in the pending paragraph and to insert in lieu thereof "35." Has there been a vote taken on the motion to make the rate 35 per cent?

Mr. SMOOT. No.

Mr. SHEPPARD. Then I will ask that a vote be taken first on the amendment of the Senator from Utah, and then I will move to reduce the rate.

The VICE PRESIDENT. The Senator from Texas must make his motion now.

Mr. SHEPPARD. Then, I move to insert "20" in lieu of "40," and on that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. McLEAN obtained the floor.

Mr. JONES of New Mexico. Mr. President——

Mr. McLEAN. Does the Senator from New Mexico wish to address himself to this paragraph?

Mr. JONES of New Mexico. I merely wish to make a statement regarding conditions of the trade in the kind of products covered by the paragraph.

Mr. McLEAN. I yield to the Senator from New Mexico.

Mr. JONES of New Mexico. Mr. President, this is one of those paragraphs which are illustrative of the pending bill. According to the information which we have, the production of common pins, hairpins, and safety pins in 1914 amounted to $2,713,792 worth, and in 1919 it was $7,248,000 worth. The imports of all pins covered by this paragraph amounted to $235,571 worth in 1914. That was prior to the World War. Subsequent to war, although business is becoming somewhat normal, as evidencing the deplorable condition in which the foreign manufacturers find themselves, the importations are much less than prior to the war. When the factories of Europe are trying to export all that they can, when they are trying to secure American dollars, when supposedly the cost of production is cheaper than ever in the history of the world, we find that the importations are much less than they were prior to the war. Those importations in 1918 amounted to $104,000—I give simply the round figures—in 1919 to $130,000; in 1920 to $161,000; in 1921 to $156,000. We were importing prior to the war $235,000 worth, and the value of those pins as produced in this country in 1919 was over $7,000,000. These importations are under existing law. They are infinitesimal in amount compared with the home production. Now, the Committee on Finance proposes to increase the tax on these articles by 100 per cent.

I should like to learn from some Senator on the other side of the Chamber how he can justify any such proposal as that. The importations amount to only a fraction of 1 per cent of the domestic production; we produce over $7,000,000 worth of the commodities mentioned in that paragraph; we are importing less than $200,000 worth of hairpins, safety pins, and all the other kinds of pins, and it is now proposed to increase the tariff duty by 100 per cent.

Will some Senator on the other side of the Chamber arise and attempt to justify this proposition upon any principle of tariff legislation, whether propounded by Democrats or Republicans? Not a word has been said on the other side of the Chamber to justify this proposed rate. No one has risen and attempted to announce any principle which would justify this increase of 100 per cent tax upon those commodities which go into every home in the land. There is no competition of consequence. Then, why do Senators want to do this?

There can be only one explanation, and that is that the majority of the Finance Committee who propose these increased duties are simply determined to raise the taxes on everything which the homes of this land consume. They are determined that where any amount of any commodity is coming into this country they are going to shut it out; that they are going to increase the taxes so as to enable the American producers to

increase their prices, to create monopolies in these commodities, to control prices, and thereby levy tribute upon every home in the land. If some Senator can justify this outrage, I trust he will rise from his seat and attempt to do so.

Mr. President, these are times calling for statesmanship. We have a great problem to solve. The farmers of the country who produce a surplus of their commodities must find a market abroad; the steel factories of the country, which have been dependent more and more upon finding a foreign market for their surplus products, want some method provided whereby they may sell their wares; but take the bill as we have thus far considered it and whenever there is anything that is being brought into this country Senators on the other side of the Chamber are raising the taxes so as to shut it out.

I understand that there are Senators upon the other side of the Chamber who profess to be in sympathy at least with the farmers of the country, and who profess to be in sympathy with the laborers of the country who are working in the factories. We have been building up an export trade for years. The President of the United States only recently came before the Congress and insisted that we should pass a ship subsidy bill in order to foster our export trade; but here comes the Finance Committee of the Senate and builds up this tariff wall, with the inevitable result of destroying our export trade.

This may be a little item, but it is only one of the thousands of items in the bill. It is proposed to raise this duty 100 per cent, and yet not a Senator on the other side of the Chamber has attempted to justify doing so, but when the roll is called the Republican Members of the Senate will flock into the Chamber and follow their leader without asking why, without stopping to consider the effect upon the people of this country.

Do Senators want to be mere puppets here in the hands of those who would increase the duty upon everything that comes into this country from abroad and even upon those things which do not come in here in any considerable quantity?

Here we have a fair illustration: Seven million dollars' worth of these articles are produced in this country; the importations have been less than $200,000 worth; but it is now desired to raise the tax 100 per cent above the present law for the purpose of shutting out the $200,000 of importations and to enable the manufacturers in the country to control the prices and to charge what they will.

I have spoken in this Chamber time and again upon various items of the bill. It does seem to me, with these stern facts staring us in the face, that sometimes Senators on the other side of the Chamber would feel that they are called upon to justify their action before the American people; but no Senator has risen here to say one word in justification of this procedure. No word, in my judgment, can be said except that Republican Senators want absolutely to put a stone tariff wall around the United States in order to prevent any importations and at the same time to prevent any exportations.

In the first speech that was delivered on the floor of this Chamber by the distinguished chairman of the Finance Committee he outlined this procedure, but I imagine it was not understood by the Senate or the country. He said that we wanted to build up these American industries. He said if the wheat farmer of the country could not find a market for his surplus, let him grow flax; and that is what we are told with respect to every industry in this land which produces a surplus. If the wheat grower can not find a market for his surplus, let him grow flax. If the cattle grower or the pork producer can not find a market for his meat product, let him grow flax; and so with the cotton grower, who must find a market abroad for 60 per cent of his produce.

If he can not find that market, let him grow flax; and so with the producer of copper, who must export 60 per cent of his commodity. If he can not find a market for it abroad, let him grow flax. That is the message which the Senate will send to the producers of this country; and so to the steel producers, who manufacture a surplus of their commodities, and steel products have been exported at the rate of about a billion dollars a year: If you can not find a market abroad for that, stop producing steel and go to raising flax.

That is the message you send to the people of this country. Looking at this bill as a whole, you are proposing absolutely to destroy the market for any surplus which we may produce. It is supposed that when the great Finance Committee of this body undertakes to deal with financial conditions in this country it will consider the various factors entering into the situation. We have two extraordinary problems with which to deal. We have the question of competition from abroad; we have the question of finding a market abroad for our surplus products. The Finance Committee attempts to deal with one only. It ignores the other great problem of finding a market for the surplus products of this country; and how anybody on the other side of the Chamber who pretends to be in sympathy with the producer of farm products, who pretends to be in sympathy with anybody who produces a surplus of any product, can vote for these measures is beyond my comprehension.

You are deliberately destroying the market for these surplus products of the country. It is as much your duty to legislate for the producers who have a surplus of commodities in this country as it is to legislate for those who would seek to control absolutely the American market. Do you want to say to the surplus producers of this country that they are of no concern to you? That is what you are saying by this bill.

The wheat growers of Minnesota, of North Dakota, of Kansas, of Nebraska, of New Mexico, of Oklahoma, of Texas, of Ohio, of Illinois, are going to have something to say to you when the reckoning day comes. They are going to tell you that you have deliberately destroyed their market—that you did not care for them. They constitute about 50 per cent of the people of this Republic. Upon their prosperity depends the prosperity of the land; but you deliberately destroy their prosperity. You say to the wheat grower: "We do not care whether you find a market or not." You say the same thing to the pork producer, to the cattle raiser, to the cotton grower, and to the hundreds and thousands of other industries which produce a surplus to send abroad: "We do not care whether you find a market or not, but we are determined that the producers of pins shall have a complete monopoly of the American market."

The producers of cottonseed oil have felt the heavy weight of what has been done. You have closed the markets of Italy for 25,000,000 gallons of cottonseed oil per annum, and you are doing nothing to find another market to take their place.

I hope that some of you will ponder on what you are doing. You are dealing with only half the problem, and in this case you are complacently following blind leadership. Out of a domestic production of over $7,000,000, with importations of less than $200,000, you raise this rate 100 per cent in order to shut out the infinitesimal amount which is being brought into this country.

That little amount will not affect your American prices, but it will find a market for a few bushels of wheat, a market for a few pounds of meat, a market for a few pounds of copper, and a market for a few pounds of cotton.

But you do not stop to consider these things. You are dealing with only one side of the question. I know that you love your country; but, if you do, I ask you not to sell your country for a little profit to be made by these few manufacturing concerns. I do not want you to levy tribute upon the great masses of this country and turn the money over to a few concerns who may make a few more pins.

Mr. President, in my judgment this procedure can not be justified. If there is any justification, it ought to be forthcoming.

Mr. McLEAN. Mr. President, I quite agree with the Senator from New Mexico when he remarks that the proceedings to which we have been listening for the last half hour can not be justified. If the Senator had taken the trouble to investigate this question, he would have realized that the rate in the bill as recommended by the Finance Committee will not begin to cover the difference in the labor cost of producing these articles here and in foreign countries.

I wonder if the Senator from New Mexico is willing to grant a rate that would equalize the difference in labor cost in these articles, and I will ask him that question.

Mr. JONES of New Mexico. Mr. President, I submit that the Senator from Connecticut does not know the difference.

Mr. McLEAN. Let us assume that somebody knows; can we also assume that the Senator from New Mexico knows whether he is willing to grant a rate that will equalize the cost of production at home and abroad? If he does, I should like to have him answer my question.

Mr. JONES of New Mexico. Mr. President, I will state that since we began the consideration of this question I have never proposed any rate which under normal conditions would not do just what the Senator from Connecticut suggests. We have abnormal temporary conditions in one or two countries in the world; but you can not by this bill, which is to remain in effect for some years to come—or, rather, which the opposite side of the Chamber hopes will remain in effect for some years to come—foresee what the conditions are going to be. I wish to suggest to the distinguished Senator from Connecticut, however, that the old adage is that "The proof of the pudding is in the eating." Here we are, three and a half years after the war. If there is any nation on earth which can produce these things cheaper than the United States, plus the present tariff duty, why do they not come in here?

Mr. McLEAN. Mr. President, I yielded the floor hoping that the Senator from New Mexico would answer my question as to whether or not he believes in a protective tariff that would equal the difference in the cost of production here and abroad. He has not answered my question, and therefore I hope that he will surrender the floor to me.

Mr. JONES of New Mexico. I will do that.

Mr. McLEAN. I did not anticipate that the Senator would answer the question. He says, "The proof of the pudding is in the eating," and that is true. I think the fact that in the last 61 years the Democratic Party has had full power in this Government 8 years comes pretty near demonstrating the fact that the American people know that the proof of the pudding is in the eating. In every single instance when we have revised the tariff the opposition has had filibusterers—perhaps not with the ability of the Senator from New Mexico, because I think he is unsurpassed in that line, but they have done pretty well—and up to date apparently the American people have preferred to base their judgment upon existing conditions and facts and necessities rather than the declamations of the gentlemen who under no circumstances believe in a protective tariff, and have so announced in their platform year after year.

Mr. President, I will undertake to indicate to the Senator from New Mexico in a sentence the reason why the Finance Committee recommended this rate on these articles. It is a low rate, much lower than the House rate.

We have the result of the investigation made by experts, disinterested, chosen for that purpose, who spent three months in the task, and, I think, brought to the Finance Committee information which no other committee has had in the history of this country when it has undertaken to revise the tariff. This committee reports with regard to these articles. First let us take hairpins. In England the foreign value by the bundle, which seems to be the unit, is 3 cents; in this country it is something above 8 cents. If we gave the rate of duty to which this article is entitled, we would have to exceed 75 per cent certainly, because the rate required to equalize the difference in the selling price is 115 per cent.

Now we come to safety pins. In Germany, by the gross, the price is 3 cents; in this country the selling price is 32 cents. Subtracting a reasonable profit, we find we would have to give this article a rate above 500 per cent. The importations are constant, and they are increasing, as the latest information bears conclusive evidence.

The domestic competition in this article is so fierce that my impression is the exporter would have to level his price to the competitive price here, and probably all we would get would be a revenue duty.

I want to call attention to just one paragraph in the testimony taken in the hearings before the Ways and Means Committee on this bill. This, to be sure, is in a brief submitted by an American manufacturer, and for that reason I assume it will be discredited by the gentlemen on the other side of the Chamber.

They have taken the ground from the start, apparently, that anybody who is in business in this country, and who makes a profit, is to be criticized sharply, if not thoroughly discredited, when he comes before a committee asking for a reasonable protection. The foreign producer, no matter whether it is a complete monopoly or not, must be given the benefit of the doubt in every instance.

Mr. WALSH of Montana. Mr. President——

Mr. McLEAN. If the Senator will allow me to read one paragraph before he interrupts, I shall be glad to yield to him then. This witness testified as follows:

> Wire hairpins are included under Schedule C, paragraph 158, in which are included many items that we do not manufacture or know anything about. The wire-hairpin industry is not of large importance from a standpoint of dollars and cents. The number of people employed is approximately 500, of which about 80 per cent are women and 20 per cent are men. The competition with foreign manufacturers in this line was so keen, even under the Dingley or Payne tariff of 35 per cent—

That is the rate which we propose to give here. I continue reading—

> that it was with much difficulty that the machinery then owned in this country was kept fairly well employed. After the duty was reduced in 1913 to 20 per cent, the output of American-made wire hairpins commenced rapidly to fall off, and had it not been for the war conditions, which prevented further importations, the manufacturers of wire hairpins in this country would have had to close their plants long before this.
>
> The wire-hairpin industry is now on the verge of facing the above-stated condition, unless immediate relief is granted by a return to the Dingley or Payne duties of 35 per cent on this particular item.

Mr. President, inasmuch as the data which the committee has secured with regard to these articles authorized rates extending anywhere from 75 to 125 per cent, if we are to equalize the difference in the production costs, it does seem to me that we should not occupy any more time in discussing the proposal.

Mr. HEFLIN. Mr. President, the Senator from Connecticut [Mr. McLEAN], commenting upon the testimony given before the tariff committee by interested parties, forgets the rule which applies in a civil or a criminal case in court. The court naturally wants to know what interest the witness has in the case which is to be tried, and the court will take into consideration the interest the witness has in considering just what weight should be given to his testimony.

The Senator, it seems to me, would have the Senate lose sight of that principle. The witnesses to whom he refers were down here testifying about things that will put money into their pockets and take money out of the pockets of the American people. The consumers of this country are not here, nor were they permitted to testify against the testimony produced by these interested witnesses, and the Senator from Connecticut would have us accept the testimony of those witnesses simply because they are American citizens. How much weight will he give to the position of American citizens who protest by the hundreds and the thousands and the millions against the schedules listed in this bill?

The Senator asks if the Senator from New Mexico [Mr. JONES], the able and distinguished Senator who has fought so faithfully to protect the great army of American consumers, is willing to accept the proposition of figuring into a tariff bill the difference between the cost of production here and the cost of production abroad.

The Senator from Connecticut does not even intimate in his argument the watered stock put into the calculations by these specially favored American manufacturers. For instance, when he has invested only $50,000 in the industry he capitalizes his stock at a half million, and counts the cost of production on that much money invested, and he has falsified the record to the extent of $450,000. No American citizen should be compelled to pay tariff taxes upon such a thieving basis. We want the cost of production figured upon an honest basis. I do not intend at all to reflect upon the Senator from Connecticut, or to intimate that he would do such a thing, but I am suggesting what some do who ask that the cost of production be figured upon this basis.

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER (Mr. BALL in the chair). Does the Senator from Alabama yield to the Senator from Connecticut?

Mr. HEFLIN. I gladly yield to the Senator.

Mr. McLEAN. These rates are based on the difference in cost of labor, and still they are not adequate, if the Reynolds report is correct; and the gentlemen who secured this report were all disinterested parties.

I understood the Senator from Alabama to say night before last, and perhaps the night before that, and I am not sure he did not say it the night preceding the one I last mentioned, when the subject of graphite was up, that he was willing that the poor laborer in this country should have a wage which would equalize the difference in the cost to the American and to his competitor abroad.

Mr. HEFLIN. Mr. President, I do not intend that the Senator shall get away from the issue here. The situation I presented was that of a closed industry in America, dying on the hands of the Republican Party, and where a foreign graphite industry had taken charge of the American market and was pouring its graphite into our country by the thousands of tons, and the Government not deriving one cent of revenue from such traffic. In that case the interest of American industry and American labor both justified my contention for a tariff for revenue.

I want to say to the Senator on this other proposition just this: He suggests the difference between the cost of labor here and abroad. They have not such labor-saving devices as we have. We have machinery which puts thousands and hundreds of thousands of men out of employment, and those machines operate each day, and you have to consider them in counting the cost of production. We have eliminated in many of these big plants hundreds and thousands of laboring men who by their daily toil provided for their families. The Senator would forget all that in his calculations. But let us get back to the issue. It frequently happens that with these labor-saving devices one man operating a machine will do the work formerly done by 25 or 30 men.

I do not intend that they shall figure in the watered stock, and they do figure it in, and then calculate all of that into the situation, and say, "The cost of production over there is so much and the cost over here is so much, therefore we will tax the American consumer to give us a profit on imaginary stock." The consumer comes up and says, "You taxed me and I have

not had a hearing. I did not even know you were going to do it. You never summoned me to your committee hearing. I am a consumer of cement. I am a consumer of salt. I am a consumer of potash. I am a consumer of hundreds and thousands of things you have in this bill, and you have raised the tax on all of them without giving me a hearing."

Talk about taxation without representation. The Democrats in the Senate, with a few Republicans joining them, are fighting this thing, and the leaders stand up over there each day and criticize and scold us for trying to make you give enough of the facts to the Senate and the country so the people will know what you are doing here.

The Senator from Connecticut seems to forget there is anybody in this country except certain favored manufacturers, and seems to think they ought to have a license to pillage and plunder the American people through high protective tariff taxes.

I denounce such a system. What about the American consumer? What about the man and the woman who work out yonder, far removed from your favored manufacturing establishment? You do not consult them about how far their means will go in purchasing the common necessities of life. But the manufacturing magnate comes down here and says: "I would like to have this schedule increased so much and that one so much. That will bring to me so many thousand dollars and I will be very grateful. I am a good contributor to the campaign fund of the Republican Party. I would like to have some consideration now. I was told when you were candidates in 1920 that my wishes would be recognized, respected, and responded to, and I am here now to present my claims. I would like to have these things put in."

When I read the bill that you have written, with 4,000 items in it, I said: How well they have responded to his wishes. Four thousand manufacturers would tax the American consumers, 100,000,000 strong, and make them pay tribute money to their concerns. I do not wonder that they support the Republican Party. I do not wonder that they contribute liberally to your campaign fund. But what will the 100,000,000 of people do at the coming election? What will these men and women do who can walk up and deposit their will in the ark of the covenant in our civic affairs, the ballot box of America?

You know what a man does when he selects an agent. He selects an agent to do a certain thing, to look after his interests. When he goes to perform that duty and fails, what does the man do who sent him as his agent? He discharges him. Suppose that agent violates his trust and serves another man's purpose and interest, instead of the purpose and interest of the man who sent him as his agent. What does he do? He discharges him. What are the American people going to do with you? They sent you here not to write a robber tariff bill in these distressing times, when millions and millions of people are hard pressed to buy the actual necessities of life.

What do you suppose they are going to do to you in the fall election? They sent you here to look out for the common weal. They sent you here to represent the American masses. They sent you here to do that which was for the highest and best interest of the country. They find you in this temple at the Capitol, this historic legislative hall, writing a tariff measure that benefits nobody but four thousand and more trusts and combines in America. What are they going to do to you? Unless all signs fail, they are going to do to you what Jesus did to those who tried to pervert the temple at Jerusalem from the purpose for which it was created. They are going to drive you out. That is what they should do.

Mr. President, I have mentioned heretofore that you put a tax on table salt and every other kind of salt. I want to get that into the head of every American citizen, that this Republican Senate has raised the price of salt by a tax of 40 cents a sack, $4 for every 10 sacks used in the United States.

I heard the distinguished senior Senator from Iowa [Mr. CUMMINS], an able man, protesting to-day against your tax on cement, but, among other things, I understood him to say that he did not think the tariff on cement would affect the price out in Nebraska and the other States in the interior. Mr. President, I do not think there is another Senator in this body who would contend that that is the correct position, unless it be those who advocate it on the other side of the Chamber.

The idea of placing a tax on cement that comes into the United States, not affecting the whole American people who buy cement, is utterly ridiculous. What will happen when it goes out to the people that you have placed a tax on cement? I will tell you what will happen. Every man who already has cement on hand that he bought at a low price, and every man who buys it later, when the consumer comes in and says: "I want a sack of cement," will say to him: "You know the price has gone up." "Why is that?" "They have put a tax on it. The Republicans have put a tariff tax on cement and the price has advanced." The seller will take advantage of that tax. They want the excuse to raise their price, and they raise it, and the consumer pays every tax, and every suggestion that will raise a tax is laid upon him and taken from him over the counter. Everybody knows that who knows anything. So you have raised the tax on cement.

Not only that—I do not know where you Republicans are going to stop—but you have a tax on horseshoes and on horseshoe nails. Think of that, Mr. President. The good old family horse, pulling and tugging away under a Republican administration, trying to help provide a livelihood, wears his hoofs out to the hair, and the owner suggests: "I had better go down and have him shod." When he goes to buy his nails and shoes they tell him the price has been raised because the Republicans have put a tariff tax on horseshoe nails and shoes. Then he says: "Well, I can not use him. I am not able to buy shoes and nails. I will turn him out in the pasture. I want to buy some wire fence to put around the pasture where he can graze on the grass.

They tell him that the Republicans have put a tax on wire fencing, and the farmer is at his row's end under the tax-gouging process of the Republican Party.

If the farmers knew just what you were doing here, if they could hear such an eloquent speech as was made to-night by the distinguished Senator from Connecticut [Mr. MCLEAN], pleading for those 4,000 people who want to tax the whole American people for the purpose of increasing their profits and their fortunes, they would say, "The Republican Party has been weighed in the balance and found wanting."

Mr. President, they exhibit impatience at those of us on this side and those few on the other side of the Chamber who dare to oppose the hog combine. They do not even treat them courteously. They make it hard for them in every way they can. Of course, they know that the time-honored Democratic Party has never yet lowered her arms in battling for the cause of the people, has never yet bowed the knee to predatory interests. They know that their criticisms will fall on deaf ears over here. We are crusaders in the cause of the people. But for our kind the Republic would perish.

Think of the doctrine announced to-night by the Senator from Connecticut, figuring only in the interests of the men who manufacture, 4,000 and more of them, whose items are in this bill. The whole American people marching, in an attempt to get back upon the road of progress and prosperity, along which they used to march under Democratic rule, are halted, while 4,000 captains of industry lift the black flag with skull and crossbones on it and say, "We are going to tax you and increase our fortunes before you proceed further."

The question is, Will the American people submit to such a process of pillage and plunder?

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Texas [Mr. SHEPPARD] to the committee amendment, which will be stated.

The ASSISTANT SECRETARY. On page 71, line 2, strike out of the committee amendment the numerals "40" and insert in lieu thereof the numerals "20," so as to read "20 per cent ad valorem."

The VICE PRESIDENT. The yeas and nays have been ordered, and the Secretary will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. MOSES (when Mr. KEYES's name was called). My colleague [Mr. KEYES], who is absent on account of illness, authorizes me to announce that if he were present he would vote "nay" on this amendment.

Mr. LODGE (when his name was called). Making the same announcement of the transfer of my pair as before, I vote "nay."

Mr. NEW (when his name was called). Transferring my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the junior Senator from New Hampshire [Mr. KEYES], I vote "nay."

Mr. WALSH of Montana (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Texas [Mr. CULBERSON] and vote "yea."

The roll call was concluded.

Mr. BALL. Making the same announcement as heretofore with reference to my pair and its transfer, I vote "nay."

Mr. HALE. Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. SUTHERLAND. I transfer my pair with the senior Senator from Arkansas [Mr. ROBINSON] to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay."

Mr. ERNST. I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Iowa [Mr. RAWSON] and vote "nay."

Mr. MCKINLEY (after having voted in the negative). I transfer my pair with the junior Senator from Arkansas [Mr. CARAWAY] to the junior Senator from Vermont [Mr. PAGE] and allow my vote to stand.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 13, nays 39, as follows:

YEAS—13.

Ashurst	Heflin	Sheppard	Walsh, Mont.
Dial	Jones, N. Mex.	Simmons	
Harris	La Follette	Smith	
Harrison	Overman	Swanson	

NAYS—39.

Ball	Hale	McKinley	Ransdell
Brandegee	Johnson	McLean	Shortridge
Bursum	Jones, Wash.	McNary	Smoot
Calder	Kellogg	Moses	Spencer
Capper	Kendrick	New	Sterling
Cummins	Ladd	Newberry	Sutherland
Curtis	Lenroot	Oddie	Townsend
Elkins	Lodge	Pepper	Wadsworth
Ernst	McCormick	Phipps	Warren
France	McCumber	Poindexter	

NOT VOTING—44.

Borah	Fletcher	Nelson	Shields
Broussard	Frelinghuysen	Nicholson	Stanfield
Cameron	Gerry	Norbeck	Stanley
Caraway	Glass	Norris	Trammell
Colt	Gooding	Owen	Underwood
Crow	Harreld	Page	Walsh, Mass.
Culberson	Hitchcock	Pittman	Watson, Ga.
Dillingham	Keyes	Pomerene	Watson, Ind.
du Pont	King	Rawson	Weller
Edge	McKellar	Reed	Williams
Fernald	Myers	Robinson	Willis

So Mr. SHEPPARD'S amendment to the amendment reported by the committee was rejected.

Mr. McCUMBER. I ask unanimous consent at this time that when the Senate closes its business for this calendar day it recess until to-morrow at 11 o'clock a. m.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. SMOOT. On line 2, page 71, I move to strike out "40" and insert "35."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 71, line 2, before the words "per cent" it is proposed to strike out "40" and insert "35."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

EXECUTIVE SESSION.

Mr. McCUMBER. Mr. President, that makes 42 amendments we have disposed of to-day. I desire to show my appreciation of the courtesy of those who have allowed us to dispose of so many amendments by not asking them to remain in session longer to-night. A short executive session is desired, however, and, therefore, I take the opportunity to move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

PITTSBURGH (PA.) STORAGE SUPPLY DEPOT.

Mr. WADSWORTH. Mr. President, I ask unanimous consent for the present consideration of the bill (H. R. 10925) to authorize the Secretary of War to sell real property known as the Pittsburgh Storage Supply Depot, at Pittsburgh, Pa.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read as follows:

Be it enacted, etc., That the Secretary of War be, and he hereby is, authorized to sell at either public or private sale, upon terms and conditions deemed advisable by him, the land and improvements thereon erected, situated in the city of Pittsburgh, State of Pennsylvania, lying between Thirty-ninth Street, Fortieth Street, Butler Street, and the Allegheny River in said city, comprising an area of approximately 19¾ acres, and also a certain parcel of land in said city of Pittsburgh located at the northwest corner of Geneva Street and Forty-fourth Street, comprising approximately one-half acre, together with easements and rights of way leading thereto, all of which said property is generally known as the Pittsburgh Storage and Supply Depot, and to sell the same as a whole or in parcels, as the Secretary of War may determine, and to execute and deliver in the name of the United States and in its behalf any and all deeds or other instruments necessary to effect such sale.

SEC. 2. That all moneys received as the proceeds of such sale, after deducting the necessary expenses connected therewith, shall be deposited in the Treasury of the United States to the credit of miscellaneous receipts.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RECESS.

Mr. CURTIS. I move that the Senate take a recess, the recess being, under the previous order, until to-morrow morning at 11 o'clock.

The motion was agreed to; and (at 9 o'clock and 25 minutes p. m.) the Senate, under the order previously entered, took a recess until to-morrow, Saturday, May 27, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate May 26 (legislative day of April 20), 1922.

RECEIVER OF PUBLIC MONEYS.

Harmon Hayward Schwoob, of Wyoming, to be receiver of public moneys at Lander, Wyo., vice William H. Edley, term expired. Nominated under date of May 8, 1922, and confirmed May 11, 1922, as "Hayward H. Schwoob."

REGISTER OF THE LAND OFFICE.

George C. Jackman, of Michigan, to be register of the land office at Marquette, Mich., effective upon completion of consolidation under the act of October 28, 1921.

PROMOTIONS IN THE NAVY.

The following-named midshipmen to be second lieutenants in the Marine Corps from the 3d day of June, 1921:

Frederick Wagner Biehl.	Clayton Charles Jerome.
Frank Burroughs Birthright.	Emery Ellsworth Larson.
Charles Campbell Brown.	James Marshall McHugh.
Raymond Paul Coffman.	Lyman Gano Miller.
Pierson Ellsworth Conradt.	William Montgomery Mitchell.
Charles Frederick Crisp.	William Willard Orr.
Rupert Riley Deese.	George Joseph O'Shea.
Ralph Birchard DeWitt.	Eugene Hayden Price.
John Curling Donehoo, jr.	James Profit Riseley.
Harry Edward Dunkelberger.	Robert Louis Skidmore.
Ralph Edward Forsyth.	Edward Dickinson Taylor.
Richard James Godin.	John Buxton Weaver.
Howard Reid Huff.	

POSTMASTERS.

CALIFORNIA.

Francis C. Harvey to be postmaster at Rivera, Calif. Office became presidential January 1, 1921.

Herman C. Lewis to be postmaster at Artesia, Calif., in place of W. E. Perry, resigned.

Cynthia P. Griffith to be postmaster at Wheatland, Calif., in place of A. G. Griffith, deceased.

GEORGIA.

William D. Lynn to be postmaster at Collins, Ga. Office became presidential January 1, 1920.

Jett M. Potts to be postmaster at West Point, Ga., in place of M. P. Dixon. Incumbent's commission expired March 21, 1922.

INDIANA.

William J. DeVerter to be postmaster at Cayuga, Ind., in place of G. T. Ritter. Incumbent's commission expired May 25, 1922.

KANSAS.

Harry R. Markham to be postmaster at Alton, Kans., in place of J. C. Cordill, resigned.

MAINE.

Cynthia R. Clement to be postmaster at Seal Harbor, Me., in place of F. H. Macomber, deceased.

MICHIGAN.

William Florian to be postmaster at Grand Junction, Mich. Office became presidential October 1, 1920.

MISSISSIPPI.

Ellen V. Montgomery to be postmaster at Potts Camp, Miss., in place of M. L. Hancock. Incumbent's commission expired January 24, 1922.

MISSOURI.

George Thayer to be postmaster at Flemington, Mo. Office became presidential January 1, 1922.

Paul V. Martin to be postmaster at Sarcoxie, Mo., in place of C. L. Wilson, deceased.

NEBRASKA.

Andrew E. Stanley to be postmaster at Loomis, Nebr. Office became presidential January 1, 1921.

Mamie L. Reams to be postmaster at Naponee, Nebr. Office became presidential April 1, 1921.

NEW MEXICO.

John H. Doyle, jr., to be postmaster at Mountainair, N. Mex., in place of J. A. Beal, resigned.

NEW JERSEY.

Matilda M. Hodapp to be postmaster at Spotswood, N. J. Office became presidential January 1, 1921.

NEW YORK.

Clarence M. Herrington to be postmaster at Johnsonville, N. Y. Office became presidential January 1, 1922.

Frederick Theall to be postmaster at Hartsdale, N. Y., in place of Frederick Theall. Incumbent's commission expired April 6, 1922.

Fannie E. Rooney to be postmaster at Schroon Lake, N. Y., in place of C. A. Lockwood, resigned.

NORTH CAROLINA.

Orin R. York to be postmaster at High Point, N. C., in place of J. J. Farriss, resigned.

PENNSYLVANIA.

William H. Scholl to be postmaster at Hellertown, Pa., in place of F. C. Harwi, resigned.

Leon M. Cobb to be postmaster at Mount Pocono, Pa., in place of C. H. Carter. Incumbent's commission expired February 4, 1922.

SOUTH CAROLINA.

George F. Wilson to be postmaster at Darlington, S. C., in place of C. W. Milling, deceased.

TENNESSEE.

John B. Elliott to be postmaster at Athens, Tenn., in place of C. M. Reed, removed.

TEXAS.

Charley R. Jamison to be postmaster at Boyd, Tex. Office became presidential January 1, 1921.

Fred C. Davis to be postmaster at Harrisburg, Tex. Office became presidential July 1, 1919.

VIRGINIA.

Annie G. Davey to be postmaster at Evington, Va. Office became presidential January 1, 1921.

Missouri S. Harmon to be postmaster at Melfa, Va. Office became presidential January 1, 1921.

Mollie H. Gettle to be postmaster at Rustburg, Va. Office became presidential April 1, 1920.

Miriam S. Yates to be postmaster at Brookneal, Va., in place of J. R. Williams. Incumbent's commission expired July 21, 1921.

Rufus P. Custis to be postmaster at Eastville, Va., in place of L. J. Nottingham. Incumbent's commission expired January 24, 1922.

Ethel V. Vaughan to be postmaster at Timberville, Va., in place of E. V. Vaughan. Incumbent's commission expired March 8, 1922.

WISCONSIN.

George S. Eklund to be postmaster at Gillett, Wis., in place of J. M. Melchior. Incumbent's commission expired January 24, 1922.

John A. Haddow to be postmaster at River Falls, Wis., in place of F. X. Knobel, resigned.

WYOMING.

Ralph R. Long to be postmaster at Gillette, Wyo., in place of E. H. Schrick, resigned.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 26 (legislative day of April 20), 1922.

RECEIVER OF PUBLIC MONEYS.

Harmon Hayward Schwoob to be receiver of public moneys at Lander, Wyo.

POSTMASTERS.

MINNESOTA.

Jason Weatherhead, Ada.
Ernest W. Nobbs, Bellingham.
William Perbix, Hopkins.
Hans C. Pedersen, Ruthton.

MISSISSIPPI.

Edgar D. Chapman, Coffeeville.
Ira I. Massey, Ethel.
Herbert B. Miller, Gloster.
Herbert O. Roberts, Holly Springs.
Earl E. Royals, Mize.
Joseph R. Weathersby, Taylorsville.
James S. Andrews, Vosburg.

MISSOURI.

Jessie F. Huff, Des Arc.
Berry Crow, Licking.

MONTANA.

Dakota L. Martin, Oswego.
Burr A. Davison, Roundup.

PENNSYLVANIA.

Alex L. Carlier, Point Marion.
Charles H. Myers, Wrightsville.

WASHINGTON.

Sylvester G. Buell, Arlington.
Charles O. Merideth, Kent.
Jacob Vercler, Opportunity.

WISCONSIN.

Nora G. Egan, Highland.

HOUSE OF REPRESENTATIVES.

FRIDAY, *May 26, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Blessed Lord, Thy testimonies are wonderful and Thy mercy endureth forever. Thy infinite abundance transcends all human thought and human need. We thank Thee for such bountiful provisions which are bestowed with all tenderness and ministration of life. Graciously help us to understand all problems which are uppermost in the minds of the people. In all our service may nothing be omitted that will build up the great and traditional institutions of our Republic. To the frail, magnify Thy strength; to the erring, turn Thy eye of pity and compassion; and with us all may weakness go and strength come. At the close of the day, when we sit alone with our thoughts, grant us great peace. In the name of Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

QUESTION OF PRIVILEGE.

The SPEAKER. This is Calendar Wednesday.

Mr. JOHNSON of South Dakota. Mr. Speaker, I rise to a question of privilege and desire to be heard.

The SPEAKER. Does the gentleman think it is in order on Calendar Wednesday?

Mr. JOHNSON of South Dakota. I think it is entirely in order to rise to a question of privilege at any time. It happens to be Friday, and the order making it Calendar Wednesday would not make it impossible for anyone to rise to a question of privilege.

The SPEAKER. The Chair is not certain whether it is in order or not. If it is an urgency, the Chair would not raise the question. The Chair would suggest that if the gentleman will wait until to-morrow it would avoid the question of Calendar Wednesday. The Chair might rule it out on that ground.

Mr. JOHNSON of South Dakota. I will say to the Chair that it is purely a matter of whether or not a Member may rise in his place and raise this question of privilege, and I should not desire to delay the matter until to-morrow, because I think it is a matter that ought to be presented to the House at the present time.

The SPEAKER. The Chair will point out to the gentleman that if he waited until to-morrow he would avoid the question of Calendar Wednesday.

Mr. JOHNSON of South Dakota. I desire also to advise the Speaker that if I did not raise the question to-day the entire parliamentary situation might possibly change because of a reconsideration of the rule by the Rules Committee.

The SPEAKER. The Chair will hear the gentleman.

Mr. WALSH. Mr. Speaker, I desire to ask the gentleman whether he is rising to a question of personal privilege or a question of privileges affecting the House

Mr. JOHNSON of South Dakota. I would say to the gentleman that it is a question of privileges affecting the House.

Mr. Speaker, on April 11, 1922, there was introduced in the House House Resolution 323 by the gentleman from Michigan [Mr. WOODRUFF], and as that resolution will have great bearing on the question of privilege I would like to have it read by the Clerk.

The SPEAKER. The Chair is familiar with it. The gentleman can have it printed. The Chair does not think it necessary to take up the time with it.

Mr. JOHNSON of South Dakota. Mr. Speaker, I ask unanimous consent to have it printed.

The SPEAKER. Without objection it will be printed.

There was no objection.

The following is the resolution referred to:

House Resolution 323.

Resolved, That the Speaker of the House of Representatives be, and he is hereby, directed to appoint from the membership of this House a select committee of 15 Members for the Sixty-seventh Congress, and which said committee is hereby authorized to fully investigate all contracts and expenditures made by the War Department, or under its directions, the Navy Department, or under its directions, and the Alien Property Custodian, or under his direction, during and since the late war with Germany, and the settlement of any of such contracts by any officer or agent or department of the Government, and to investigate the criminal and civil prosecution, or lack of prosecution, of any or all of the claims of the Government arising out of such contracts, or the settlement thereof, by the Attorney General, the Alien Property Custodian, the Secretary of War, or the Secretary of the Navy, and in addition to the powers herein conferred shall have the same powers and authority as are now conferred by the rules of this House upon the standing Committee on Expenditures in the War Department. Said committee is hereby authorized to send for persons and papers, to administer oaths and affirmations, to take testimony, to sit during the sessions of the House and during any recess which may occur during its sessions, and may meet at such places as said committee deems advisable. Said committee is also hereby authorized and empowered to appoint such subcommittees as it may deem advisable, and such subcommittees, when so appointed, are hereby authorized to send for persons and papers, to administer oaths and take testimony, and to meet at such times and places as said committee shall from time to time direct.

Resolved further, That said select committee shall report to the House, in one or more reports, as it may deem advisable, the result of its investigations, with such recommendations as it may care to make.

Resolved further, That the Speaker of the House is hereby authorized to issue subpœnas to witnesses, upon the request of said committee or any subcommittee thereof, during any recess of Congress during the sessions.

Resolved further, That the Sergeant at Arms of the House be directed to serve all subpœnas and other process put into his hands by said committee or any subcommittee thereof.

Mr. JOHNSON of South Dakota. Mr. Speaker, that resolution was sent to the Rules Committee, and on May 3 of this year it was ordered to be reported out by the Rules Committee on a motion which I made that the chairman of the committee be instructed to bring it before the House at the earliest possible moment.

Mr. CAMPBELL of Kansas. Mr. Speaker, no such language was contained in the motion. I think the gentleman should state that. The only motion was that the resolution should be reported out. There was not anything stated to us as to when it should be reported out; nothing of that kind.

Mr. JOHNSON of South Dakota. I would say to the gentleman, who, I know, desires to be accurate, that I made the motion myself, and perhaps he may not have clearly understood what I said, and I do not know what the minutes may show. I am talking from my own personal recollection, and I feel as confident that I made that statement as the gentleman is that he did not hear it. There will be no question of veracity involved.

The SPEAKER. The Chair must say, of course, that it is not in order to repeat what occurs in the committee. The records of the committee will show what occurred.

Mr. JOHNSON of South Dakota. I will say to the Speaker that the precedent on which I am relying, and which is absolutely in point, is a case wherein the same question was raised, and the Speaker at that time—Speaker Reed—permitted the Member of the House who stated the question of privilege to state the facts. Otherwise there was nothing on which the Speaker could rule.

In any event, this Resolution 323 was ordered to be reported by the Rules Committee.

Mr. WALSH. Mr. Speaker, I raise the point of order before any other discussion is indulged in that the gentleman should state the question of privilege involving the rights of the House. What is the question the gentleman is raising?

Mr. JOHNSON of South Dakota. I will say to the gentleman from Massachusetts that I think the Speaker understands full well what I am trying to present, and he has not raised any question but that I am coming to it in proper order.

Mr. WALSH. That is all right; but the Speaker is not the only one involved. There are others involved.

Mr. JOHNSON of South Dakota. Of course, every Member of Congress is interested.

The SPEAKER. The gentleman has the right to ask that the gentleman proceed in the regular order.

Mr. JOHNSON of South Dakota. I will say that I am coming to the point now.

This resolution was not reported by the chairman of the Rules Committee, but it has been resting in his pocket since May 3, and it is very evident there is no intention on the part of the chairman of the Rules Committee to report it. I do not question the motive of the chairman of the Rules Committee. I will say that if this statement is out of order, I hope the gentleman from Massachusetts will not make a point of order. I know that the chairman of the Rules Committee is just as anxious as any citizen of the United States to see that anyone who wrongfully took money from the Government on war contracts during the late war should be prosecuted.

Mr. MONDELL. Mr. Speaker, I must make the point of order that the gentleman address himself to the question of privilege.

The SPEAKER. The gentleman from Wyoming is, of course, correct. The gentleman is right in insisting that the gentleman from South Dakota shall address himself to the question of privilege.

Mr. MONDELL. I suggest that a great deal of conversation and argument might be made on general questions and problems, but the case before the House is a question of privilege.

Mr. JOHNSON of South Dakota. I am very sorry that the gentleman from Wyoming will not allow me to give my high opinion of the integrity and statesmanship of the gentleman from Kansas, the chairman of the Rules Committee. It is not my fault if I am not allowed to do so.

Mr. MONDELL. It is not within the province of the gentleman from South Dakota to do so. We all know the high character and statesmanship of the gentleman from Kansas [Mr. CAMPBELL]. That has not been questioned by anyone.

Mr. JOHNSON of South Dakota. And ought to be stated at all times. In any event, this resolution was never reported to the House, but is still quietly resting and reposing in the pocket of the chairman of the Rules Committee.

Mr. GARNER. Mr. Speaker, will the gentleman yield for a question in that particular?

Mr. JOHNSON of South Dakota. I yield.

Mr. GARNER. I did not understand how the gentleman comes to the conclusion that the gentleman from Kansas [Mr. CAMPBELL] is such a great statesman, when he says he has still got the rule in his pocket. [Laughter.]

The SPEAKER. The Chair desires to state to the gentleman that he wishes the debate to be confined to the point of order.

Mr. JOHNSON of South Dakota. The question of privilege, Mr. Speaker, is this: Whenever a resolution is ordered reported by a committee of the House, and that committee has spoken, the House is entitled to have the action of that committee translated into action and the report of the committee given to the House. If that were not true, Mr. Speaker, to use this illustration, suppose, for instance, the great Committee on Interstate and Foreign Commerce should by practically a unanimous vote report a bill repealing the Esch-Cummins law, and then suppose the chairman of the Committee on Interstate and Foreign Commerce should refuse to report that out.

The SPEAKER. The Chair recognizes that.

Mr. JOHNSON of South Dakota. That would impede the business of the House. This is impeding the business of the House. A case identical with this came before the House on January 23, 1891.

The SPEAKER. The Chair has read that decision and is perfectly familiar with it.

Mr. JOHNSON of South Dakota. May I say to the Speaker that while undoubtedly the Chair is familiar with this case, because I discussed it with the House parliamentarian some time ago, the membership of the House is not. It might come to the point where an appeal might be taken from the decision of the Chair, and the House, when it passes upon the question, should be familiar with the facts in this case and the prior decision of the Speaker of the House.

The SPEAKER. The Chair will hear the gentleman briefly.

Mr. JOHNSON of South Dakota. This identical case came up, I say, on January 23, 1891, when a resolution came up to investigate the Commissioner of Pensions for fraud in real estate deals in the District of Columbia, and the committee to which it was referred decided that that resolution of investigation should be reported to the House. The chairman of the committee, Mr. Morrill, claimed that he had filed the report,

but it could never be found, and Mr. Cooper of Indiana rose and made the identical motion I make to-day and raised this same question of privilege. There was a good deal of debate pro and con. A Member of this House, William McKinley, jr., of Ohio, made the same point of order that is to-day made by the gentleman from Massachusetts [Mr. WALSH]. At that time Speaker Reed was Speaker of the House, and he made the following ruling. He said:

The statement made by the gentleman from Indiana [Mr. Cooper] is that a committee of this House adopted a resolution to report, for rereference by the House under the twenty-second rule, resolutions which had been referred to that committee in regular order. He states that a considerable length of time has elapsed since that action was taken by the committee to which the original resolution was referred, and he claims that this is a question of privilege involving the rights of the House and its method of doing business. The Chair thinks it is plainly so; that, the committee having ordered a report of that kind, it should have been made in a reasonable time, and that the House has a right to make inquiry into the matter and to decide what ought to be done under the circumstances.

That is exactly this situation. It has been stated by the majority leader—it was so stated yesterday and the day before—that the House is very soon going to have three-day recesses. If the question of the adoption of this resolution is to come before the House it must come now. If it is postponed even for a few days it will mean the membership of the House will never have an opportunity to vote upon it. Therefore the construction of the word "reasonable," which is the only point upon which the postponement of this resolution can be based—an interpretation of that—is that it must be immediately brought to the attention of the House.

Mr. MOORE of Virginia. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of South Dakota. Yes.

Mr. MOORE of Virginia. A point that bears, it seems to me, strictly upon the question that we have here is that recently the matter of this resolution was brought before the House by some interrogation of the chairman of the Committee on Rules and the chairman of the Committee on Rules gave the House to understand that he did not propose to report the resolution.

The question was put to him as to whether he intended to report the resolution, and he indicated reasons why he did not think it desirable, and then when the question was further asked as to whether it was his right to decline to report the resolution, he said he was answerable only to his committee——

Mr. CAMPBELL of Kansas. And to the majority of the House.

Mr. MOORE of Virginia. No, sir; simply answerable to his committee.

Mr. CAMPBELL of Kansas. I think the record will show otherwise.

Mr. MOORE of Virginia. No. The record is here. The gentleman has declined in substance to report, and, in fact, has said that he did not intend to report.

Mr. JOHNSON of South Dakota. I think that question can be settled very easily. The chairman of the Committee on Rules is here. He can say in one moment whether or not he intends to report it. By silence he can convey the idea that he never does intend to report it.

The SPEAKER. The Chair would like to ask the gentleman one question. Is this the earliest rule that is now in the hands of the Committee on Rules?

Mr. JOHNSON of South Dakota. I do not know how many rules, Mr. Speaker, the chairman of the Committee on Rules has in his pocket. I am not saying that in any spirit of levity or desire to criticize. I remember that there were a number of rules reported by the Committee on Rules, all reported on the same day, May 3. The fact that one may have come up before the other would make no difference, because we have had no meeting of the committee since May 3.

Mr. MONDELL. I think at least one, or perhaps two, rules were voted by the committee long before this that have not been presented to the House so far, because the business of the House has not been such as to make it possible. The report on the Senate bill 539, the railroad valuation bill, we have been trying to reach for some time. It is now set down for next Friday. That report was made some weeks before the report on the bill in question.

Now, will the gentleman from South Dakota yield for a question?

Mr. JOHNSON of South Dakota. I would like to answer that before I yield for a question. The gentleman from Wyoming brings up the question that there are several of these other rules now pending. Now, I would like to ask the gentleman while he is on the floor if it is not his intention to kill this resolution and never bring it up?

Mr. MONDELL. I do not think the gentleman from South Dakota has the right to ask me that question. I do not think I am under any obligations to answer it. However, if it is a matter of interest to the gentleman I will say I do not approve the resolution of the gentleman.

Mr. JOHNSON of South Dakota. I have no objection to hearing the statement of the gentleman.

Mr. MONDELL. I do not approve it, and I never have approved it. I do not think the passage of the resolution would expedite, but rather would delay, the prosecution of those who may have defrauded the Government.

Mr. CAMPBELL of Kansas. Mr. Speaker, may I have the floor for a moment?

Mr. MONDELL. However, my opinion in regard to the matter does not necessarily affect its consideration. There have been matters considered before now in the House—I have, in fact, assisted in helping to secure consideration of matters that I did not wholly approve. I am not necessarily called upon to approve the action of a committee, and I did not approve its action in this particular case. Now, will the gentleman answer my question with regard to a statement that he made just a moment ago? He made a statement to the effect that the case that he had cited was on all fours with this case. In that case there was a select committee, not a standing committee but a select committee of the House that had made a certain report or authorized the making of a certain report. That was an investigating committee. This case is not at all on all fours with that case. Here is a standing committee of the House, to wit, the Committee on Rules, and yet I understood the gentleman from South Dakota to say that the cases were identical. They are far from being identical.

Mr. JOHNSON of South Dakota. May I ask the gentleman right there to point out any precedent in this House where a different rule has been applied to a standing committee and a select committee?

Mr. MONDELL. There are many cases.

Mr. JOHNSON of South Dakota. I would like to have the gentleman point out one.

Mr. MONDELL. The same rules do not necessarily apply by any manner of means. I do not want to interrupt the gentleman's discussion, but may I make this suggestion, that if it be held that the moment the Committee on Rules authorizes a rule for the consideration of business the matter becomes a question of privilege of the House which any Member may demand consideration of, we shall have some difficulty first in securing rules from the Committee on Rules, and we will have very much more difficulty in the transaction of the business of the House in an orderly way. If a report from the Committee on Rules must be submitted instanter, forthwith, and in advance of other reports from the Committee on Rules because some gentleman sees fit to demand it, then we shall be confronted with a situation under which it will be impossible to have the orderly consideration of business in the House.

Mr. JOHNSON of South Dakota. I will say to the gentleman that that is easily answerable. The Rules Committee as it passes each rule can determine absolutely in what order that rule shall be brought up. It has not been done heretofore, but it can be done at any time, providing that the rules adopted by the Rules Committee be brought up in a certain order. The Rules Committee can always control that.

Mr. MONDELL. It is utterly impossible to adopt any such rule as that. The Committee on Rules can not in the nature of things know how much time will be consumed in the consideration of privileged business. Committees having legislation that is privileged may occupy the time of the House for days and weeks, making it utterly impossible to bring in a special rule.

Mr. JOHNSON of South Dakota. I will say to the gentleman that that is easily answerable, because the Rules Committee in one provision of the rule could say, "This shall be brought out at the discretion of the chairman of the Rules Committee," and the committee can make the order discretionary with the chairman.

Mr. WALSH. Will the gentleman yield?

Mr. JOHNSON of South Dakota. I yield to the gentleman from Massachusetts.

Mr. WALSH. Is the gentleman's question of privilege directed to the fact that the chairman of the Rules Committee has not attempted to secure recognition from the Speaker to bring this resolution before the House, or to the fact that the chairman of the Rules Committee has not reported a resolution which was passed by the committee?

Mr. JOHNSON of South Dakota. It goes to both. In the first place, I will say it goes further than the gentleman from Massachusetts has stated the question. The question is brought before

the House because I am firmly of the conviction that the chairman of the Rules Committee intends never to report the resolution.

Mr. WALSH. What he intends to do has nothing to do with the point the gentleman is raising. The question I have asked is, Whether the question of privilege affecting the rights of the House goes to the fact that the chairman of the Rules Committee has not risen in his place upon the floor and asked recognition of the Speaker to bring up that resolution, or whether it is directed to the failure of the chairman of the Rules Committee to report the resolution that the committee had authorized him to report?

Mr. JOHNSON of South Dakota. I will say to the gentleman from Massachusetts that my objection is taken to both. But for the purpose of the decision of the Chair in this case it is not necessary to enter into that discussion, because I have raised both questions, the failure to report——

Mr. WALSH. Then I make the point of order——

Mr. JOHNSON of South Dakota. Let me finish. The failure to report and the failure to rise in his place and bring it up. It is upon both those points.

Mr. WALSH. Mr. Speaker, I make the point of order that the gentleman from South Dakota has not stated a question of privilege affecting the rights of the House.

Mr. MOORE of Virginia. Will the gentleman permit me to make just one observation?

Mr. WALSH. Certainly.

Mr. MOORE of Virginia. I stated a moment ago that the gentleman from Kansas, at the time when he indicated that he did not intend to report the resolution, pleaded, as I understood him, that he was accountable only to his committee. I find that he did add the words "and to the majority of the House." Now, I conceive that the effort is now being made, presumably and probably by the majority of the House, to require him to report that resolution.

Mr. CRISP. Will the gentleman yield?

Mr. JOHNSON of South Dakota. I yield to the gentleman from Georgia.

Mr. CRISP. Mr. Speaker, if I may, I just want to address the Chair for a moment or two.

Mr. Speaker, I have no interest in this controversy between my good friends on the other side, and I am frank to say that I am not concerned about whether this special investigating committee is authorized or not; but I am profoundly interested, and every Member of this House is interested, in the honor and dignity and rights of the House collectively being preserved and maintained. As I understand it, that is the question presented by the point of order raised by the gentleman from South Dakota. I have read section 2609 of Hinds' Precedents, which is the precedent cited by the gentleman. That case arose when Mr. Reed was Speaker of the House. I think it is universally conceded that this House has never had an abler parliamentarian in the chair than Mr. Reed. Now, the Speaker occupies to some extent the position and performs to some extent the functions of a court. A court can take judicial cognizance of what happens in the presence of the court, and the Speaker can take cognizance of what transpires in this body. It seems to be conceded that the question that is presented to the Speaker is that the Committee on Rules has directed its chairman to present to the House a rule providing for the consideration of the Woodruff resolution. The precedent cited ruled by Speaker Reed held that when there has been a reasonable time for the committee chairman to present a rule that he has been directed to report, and he has not done it, it presents a question of privilege, for, said he in that decision, if that is not true one Member of the House can absolutely thwart and undo the action of his committee. Now, it seems to me, Mr. Speaker, that if the committee direct one of its members to report a resolution providing an order of business, unless that committee rescinds its action by reconsidering its action, taking away or withdrawing the instructions to the member to report it, that member is obligated to do it within a reasonable time; and if he fails to do it I think the House is interested, because certainly the agent is not the equal of his principal, and certainly no one member of the committee should be given the power to block the action of a majority of his committee.

Now, Mr. Speaker, the rule provides that it shall always be in order to report a rule from the Committee on Rules providing for order of business, except possibly on Calendar Wednesday. If a member of the Committee on Rules makes a report to the House it does not follow necessarily that the House is going to adopt it or consider the resolution.

It is a privileged report, and the gentleman can not make a report of this character by dropping it in the basket; he must present it from the floor, and if the House does not want to consider it, the House can refuse to consider the resolution, and that is the end of it. As I said at the outset, I am not interested in this controversy between my friends on the other side, but I do think, admitting the facts which seem to be conceded, that it is undoubtedly a privileged motion that the gentleman from South Dakota makes.

Mr. WALSH. Will the gentleman permit an inquiry?

Mr. CRISP. I will.

Mr. WALSH. Has the Committee on Rules any jurisdiction as to directing its chairman or other member authorized to report a resolution when he shall call it up?

Mr. CRISP. I think it comes down to the good faith. I think the Committee on Rules could direct a member to report a rule instanter, or the very first time that the Speaker would recognize him, but that is not involved here.

Mr. WALSH. That is involved in the gentleman's argument.

Mr. CRISP. In this case, there being no specific instructions when the report should be made, I think it should be reported in a reasonable time, and whether the chairman of the committee is trying in good faith to carry out the instructions of the committee is the controlling question.

Mr. WALSH. Will the gentleman state if the Committee on Rules had instructed the chairman to seek recognition at 2 o'clock on a certain day, if he did not do it, would that involve a question of privilege?

Mr. CRISP. I do not think so; I do not think that is a reasonable time. But if I were the chairman of the committee I would make a strenuous effort to get recognition at 2 o'clock.

Mr. WALSH. Suppose the Speaker would not recognize him.

Mr. CRISP. Well, I would have done all I could, and I could do no more.

Mr. WALSH. Does the gentleman think that would be a basis for a privileged question?

Mr. CRISP. No; I do not think it would be a reasonable time. I admit that it has got to be a reasonable time, but I think the Chair in passing on the question can take cognizance of everything that has transpired within this body in determining whether the member who is directed to report the rule is acting in good faith and is seeking to carry out the instructions of his committee.

Mr. JOHNSON of South Dakota. Mr. Speaker, in relation to what is a reasonable time, if the Committee on Rules orders the chairman to report the resolution, and within 20 minutes he says he will not report it, says so directly or by inference, then the reasonable time has expired. That is the exact case in this particular case, because the chairman of the Committee on Rules does not intend to report the resolution. If he would say definitely at this time that he expects to report it and move its adoption, then the question of reasonable time might come in.

The SPEAKER. The Chair is ready to rule. The gentleman from Georgia has stated explicitly and clearly the purpose and bearing of the rule, and the only decision the Chair is aware of is the one cited by the gentleman from North Dakota of Mr. Reed, whose reputation and intellect entitle it to great weight. The Chair thinks, according to that authority, the question is whether the chairman of the Committee on Rules makes his report in a reasonable time. There is a question whether this can come up on Calendar Wednesday, but the Chair waives that. In the case decided by Mr. Reed the committee had waited from September until January without making any report. It appears that in this case the Committee on Rules has adopted within the last month a number of rules, including this, and has instructed the chairman to report them. There is at least one that is much older than this still pending, and there are others which are a little older. According to the argument made by the gentleman from North Dakota, if he is correct, if he has the right to raise the question of privilege, then anybody interested in the adoption of any one of the rules which were adopted by the Committee on Rules previous to this one has still more right to come forward and demand its consideration. If we should adopt the doctrine that when the Committee on Rules had adopted several rules any individual interested in one of these rules had the right, as a matter of the privilege of the House, to rise and claim that that rule should immediately be reported, and that it was unreasonable for the chairman to withhold it, the business of the House would be in confusion. Mr. Reed decided that it is a question of reasonable time. For some time the business of the House has been mostly on rules which have been reported by the chairman of the Committee on Rules. They are all of them in their time older than the one which the gentleman claims to call up.

If he could make that claim now, he could have made it at any time in the last weeks when we have been transacting business under the leadership and orders of the Committee on Rules, and any other Member interested in one of the other rules could

have insisted on his rule. That would occasion interminable confusion. Therefore it seems to the Chair that, inasmuch as the House has been largely occupied with these rules, at least until the Committee on Rules has disposed of the rules that are older than this one it is preposterous to claim that a gentleman can rise as a matter of privilege and say that the chairman of the Committee on Rules is unreasonable in not bringing up this junior rule. Of course, this is under the complete control of the Committee on Rules, which can at any time instruct its chairman in what order to bring up its bills. The Chair, therefore, sustains the point of order, without considering the question of whether Calendar Wednesday business should be interrupted by this matter or not.

Mr. MOORE of Virginia. Mr. Speaker, a parliamentary inquiry?

The SPEAKER. The gentleman will state it.

Mr. MOORE of Virginia. Take a case in which a committee has directed a report to be made, and it appears from the proceedings had in the House, in the presence of the Speaker, that it is not the purpose of the chairman of the committee to make the report, or let us suppose that the Speaker otherwise has knowledge of the fact that there is no intention to make a report, then in such case is the House helpless?

The SPEAKER. It seems to the Chair it is not reasonable to bring that question up until the other rules which are older than this one in point of time have been disposed of.

Mr. JOHNSON of South Dakota. Mr. Speaker, I respectfully appeal from the decision of the Chair.

Mr. MONDELL. Mr. Speaker, I move to lay that appeal on the table.

The SPEAKER. The gentleman from South Dakota appeals from the decision of the Chair. The gentleman from Wyoming moves to lay that appeal on the table. The question is on laying the appeal on the table.

The question was taken; and on a division (demanded by Mr. JOHNSON of South Dakota) there were—ayes 69, noes 48.

Mr. JOHNSON of South Dakota. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from South Dakota makes the point of order that there is no quorum present. It is clear that there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in absentees, and the Clerk will call the roll. The question is on the motion of the gentleman from Wyoming to lay on the table the appeal of the gentleman from South Dakota from the decision of the Chair.

The question was taken, and there were—yeas 149, nays 114, not voting 168, as follows:

So the motion to lay on the table was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Goodykoontz (for) with Mr. Garrett of Tennessee (against).

Mr. Snyder (for) with Mr. Oldfield (against).

Mr. Fess (for) with Mr. Knight (against).

Mr. Atkeson (for) with Mr. Gallivan (against).

Mr. McArthur (for) with Mr. O'Brien (against).

Mr. Knutson (for) with Mr. Jones of Texas (against).

Mr. McPherson (for) with Mr. Rainey of Illinois (against).

Mr. Treadway (for) with Mr. Cockran (against).

Mr. Langley (for) with Mr. Clark of Florida (against).

Mr. Paige (for) with Mr. Sullivan (against).

Mr. Bland of Indiana (for) with Mr. Brand (against).

Mr. Kendall (for) with Mr. Driver (against).

Mr. Moore of Ohio (for) with Mr. Hayden (against).

Mr. Nelson, A. P. (for) with Mr. Lee of Georgia (against).

Mr. Perkins (for) with Mr. Rouse (against).

Mr. Michaelson (for) with Mr. Cantrill (against).

Mr. Johnson of Washington (for) with Mr. Kitchin (against).

Mr. Butler (for) with Mr. Sisson (against).

Mr. Appleby (for) with Mr. Tague (against).

Mr. Kennedy (for) with Mr. Riordan (against).

Mr. Maloney (for) with Mr. Goldsborough (against).

Mr. Henry (for) with Mr. Barkley (against).

Mr. Griest (for) with Mr. Rayburn (against).

Mr. Coughlin (for) with Mr. Ten Eyck (against).

Mr. Bond (for) with Mr. Jeffers of Alabama (against).

Mr. Kiess (for) with Mr. Kincheloe (against).

Mr. Olpp (for) with Mr. Sears (against).

Mr. Perlman (for) with Mr. Taylor of Colorado (against).

Mr. Kreider (for) with Mr. Kunz (against).

Mr. Fitzgerald (for) with Mr. Collins (against).

Mr. Volk (for) with Mr. Kindred (against).

Mr. Radcliffe (for) with Mr. Jeffers of Alabama (against).

Mr. Dickinson (for) with Mr. Sabath (against).
Mr. Lehlbach (for) with Mr. Linthicum (against).
Mr. Sanders of Indiana (for) with Mr. Drane (against).
Mr. Frothingham (for) with Mr. Stoll (against).
Mr. Vare (for) with Mr. Taylor of Arkansas (against).
Mr. Evans (for) with Mr. Smithwick (against).
Mr. Murphy (for) with Mr. Fields (against).
Mr. Graham of Pennsylvania (for) with Mr. Griffin (against).
Mr. Siegel (for) with Mr. Hudspeth (against).
Mr. Chandler of Oklahoma (for) with Mr. Mansfield (against).
Mr. Stiness (for) with Mr. Rainey of Alabama (against).
General pair:
Mr. Dowell with Mr. Padgett.
The result of the vote was announced as above recorded.
The SPEAKER. A quorum is present. The Doorkeeper will open the doors.

EXTENSION OF REMARKS.

Mr. STEENERSON. Mr. Speaker, I ask unanimous consent to extend my remarks on the pending grain grades bill with a short article included by Doctor Palmer, chief inspector of grain in North Dakota.

Mr. GARNER. Mr. Speaker, it will facilitate the transaction of business if the gentleman would speak so that we could hear him, and then he would not have to repeat what he says.

Mr. STEENERSON. I ask unanimous consent to extend my remarks on the pending grain grades bill with a short article therein contained from Doctor Palmer, chief inspector of grain, North Dakota, to be printed in 8-point type, the same as the other.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to extend his remarks in the RECORD on the grain grades bill with an article by Doctor Palmer, to be printed as part of his remarks in 8-point type. Is there objection?

Mr. GARNER. Reserving the right to object, I do not have any objection to the extension of these remarks, but it has been the policy of the gentleman from Massachusetts to object to these extensions of articles by outside people and that it ought to be presented to the committee having charge. I think it is a good policy, but I do not want to take up the policy myself and be responsible, and I merely call attention, and, not seeing the gentleman from Massachusetts on the floor of the House, I will ask the gentleman if he does not desire to withdraw the request until he can see the gentleman from Massachusetts?

Mr. WALSH. Oh, well, the gentleman from Massachusetts is always on the floor. The gentleman from Texas has become so active and alert in reference to these matters of late that all I have had to do is to keep silent and let the gentleman from Texas take care of the situation. I have no objection to this extension, because it is an article incorporated in the remarks of a Member and pertinent to a bill under consideration.

Mr. GARNER. Do I understand the gentleman to say all a Member has to do is to incorporate an article of somebody else in remarks of his own?

Mr. WALSH. I did not say any such thing.

Mr. GARNER. The gentleman said he was incorporating an article in his own remarks; that all that you have to do is to incorporate an article of a man from Massachusetts or some other part of the country in his own remarks and that he can put those in. There ought to be some definite policy with regard to this matter——

Mr. WALSH. Why does not the gentleman start a policy and follow it?

Mr. GARNER. I want to follow the policy of the gentleman from Massachusetts, but I can not tell which way the gentleman is going.

The SPEAKER. Is there objection to the request? [After a pause.] The Chair hears none.

Mr. STEENERSON. Mr. Speaker, under the grain standards act of August 11, 1916, the Secretary of Agriculture was authorized to fix standards and grades of grain. In 1917 he proceeded to fix standards and grades for wheat, including spring wheat. The farmers of the spring-wheat States objected, and numerous hearings were held on the proposed regulations, but they were adopted substantially as first proposed by the Bureau of Markets and promulgated by the Secretary and put into operation. Experience proved that the objections of the wheat growers were well founded, and during the war these objections were accentuated by the fact that the Food Administration took control of all buying and fixed all prices according to grade, so that sale by sample, where the milling value of the wheat would be taken into account, was done away with.

As soon as the war was over the spring-wheat farmers renewed their applications for modification, first before Secretary Meredith without result, and then a year ago before Secretary Wallace, who promised to make an investigation by experts. He appointed Dr. John Lee Coulter, now of the North Dakota Agricultural College, and Mr. Fitz, in charge of milling operations at the University of Kansas. They spent several months in the field and made a report recommending changes. This report was made public last month. The principal changes they recommended were the elimination of moisture and foreign material as grade factors. This corresponds exactly with the provisions of the Steenerson grain grading bill which was introduced nearly a year ago—H. R. 7401—and reintroduced with Committee amendments and ammendments correcting some typographical errors, and is now H. R. 9668.

Elaborate hearings were held on the first-mentioned bill, which resulted in the committee favorably reporting the bill. A supplemental hearing was held, at which the millers and the representatives of the grain trade were heard. Two things should be borne in mind: The present regulations classify foreign material in wheat as separable and inseparable—that which can readily be separated in ordinary warehouses and fanning mills is classed as dockage, and that is deducted from the total weight and is not paid for by the purchaser. The other foreign material is classed as inseparable and consists chiefly of weed seeds, such as cockle, wild peas, and kinghead. These can be separated in terminal elevators and mills where they have suitable machinery at an expense of not more than 5 cents per bushel. It is not necessary to take out all of this material, for the rules permit 1 per cent even in No. 1. The evidence shows that to that extent all foreign material can readily be removed. The presence of so-called inseparable material in wheat is now regarded as a grading factor, and more than one-half of 1 per cent reduces the grade from No. 1 to No. 2, and so on, until No. 5, the lowest grade except sample, may contain 5 per cent of inseparable foreign material.

The grade is determined on samples taken from each car on arrival at terminal market, and the dockage and inseparable matter is ascertained by running the same twice over the sieves. In many instances by running it over the sieves three times all foreign material down to 1 per cent or less is taken out. The Bureau of Markets, however, has issued orders to all inspection officers in the spring-wheat region not to run samples over the sieves more than twice, and if it is not then clear of excessive foreign matter it is graded down. This probably accounts for the conflict of evidence as to practicability of cleaning wheat that appeared in the testimony at the hearings. The fact remains that a third or even a fourth cleaning might raise the grade from 3 to 1 and the price 20 cents, at a cost of not exceeding 4 cents.

There is no question but that all weed seeds in excess of the 1 per cent allowed can be readily cleaned out, but for grading purposes the Federal authority forbids this, unless it can be done by two cleanings.

Moisture is also regarded as a grading factor and 14 per cent is the maximum allowed in No. 1, 14½ per cent in No. 2, 15 per cent in No. 3, and 16 per cent in Nos. 4 and 5. The other grading factors are principally test weight, 58 pounds being required for No. 1, 57 pounds for No. 2, 55 pounds for No. 3, 53 pounds for No. 4, and 50 pounds for No. 5. No. 1 may contain 2 per cent of damaged kernels, with one-tenth of 1 per cent heat-damaged kernels; No. 2 may contain 4 per cent damaged kernels, with two-tenths of 1 per cent heat-damaged kernels; No. 3 may contain 7 per cent damaged kernels, with five-tenths of 1 per cent heat-damaged kernels; No. 4 may contain 10 per cent damaged kernels, with 1 per cent heat-damaged kernels; and No. 5 may contain 15 per cent damaged kernels, with 3 per cent heat-damaged kernels.

It will be noted that the other grading factors, the principal one of which is test weight, are permanent merits or defects which can not be changed by manipulation, but excessive moisture and foreign material can be removed by handling in the mill elevators. In the administration of the regulations one of these defects, for instance 15 per cent moisture, puts the wheat down to No. 3, although it is perfect in every other respect and its value is within 4 or 5 cents of the same kind of wheat with 14 per cent moisture. The same can be said of 16 per cent moisture, which puts it down to grades 4 and 5. This operates against the farmer who sells or delivers his wheat to the local elevator, because there they must grade according to the written rules and no credit is given for the fact that it is perfect wheat outside of the one defect. But the requirements for No. 2 permits more inseparable foreign material, more damaged kernels, and test weight of only 57 pounds, and so on through the list. If this perfect wheat graded down for excessive foreign material having more than 1 per cent to No. 3, it would be sold on arrival at the terminal in Minneapolis at the price of No. 3,

which may contain all the defects allowable in that grade, including the excessive moisture which renders it unstorable, at a price of at least 20 cents below the price of No. 1.

The rules of the Chamber of Commerce of Minneapolis make No. 1 Northern Spring contract grade; No. 2 is deliverable at 3 cents a bushel discount, and No. 4 at 20 cents discount, showing that the grade price of No. 3 is based upon wheat which has been so manipulated at the terminal elevators as to contain all the defects allowable at the great loss of the producer. If the farmer should, through the local elevator, ship this wheat graded down for 1 per cent of excessive moisture to Minneapolis and store it instead of taking out the moisture, it would probably be mixed with drier wheat of which there is usually plenty and then the elevator, when called to deliver the wheat, would deliver No. 3 with all defects. The cost of making this shipment No. 1 would not exceed 5 cents a bushel, but the producer loses at least 15 cents a bushel by the operation. The worst of this is that the prices reflected back to the local elevator is always the price of the grade, which in this instance is at least 15 cents or 20 cents below the real milling value of the wheat as determined by sample sales at Minneapolis.

Instead of adopting the recommendations of Fitz and Coulter, the Secretary leaves the grade requirements as they are, but proposes to issue instructions to grain inspectors at designated points to note on inspection certificates the kind and quantity of inseparable foreign material, other than dockage, and excessive moisture, with the remark "Otherwise No. 1" or No. 2, as the case may be. He also proposes to install a reporting system of cash sample market sales in Minneapolis and other terminals showing the price of each car of wheat in each grade. He does this on the theory that the price of each sample will be reflected back to the local elevator. This, however, is erroneous because good No. 1 wheat with a single defect will still be in the same grade as wheat with all the defects permitted in No. 4 and it will be the grade price, the low price in any particular grade, that will be reflected back to the country. Why he should go back on the report of his own expert commission is hard to understand.

I have submitted the question whether the new regulations are satisfactory to the State inspection authorities in Minnesota and North Dakota and to others interested in agriculture, and they all say that these regulations are no improvement over the present system and amount to a denial of any relief, as shown in the following telegram:

ST. PAUL, MINN., *May 23.*

Congressman HALVOR STEENERSON,
Washington:

Conference was held in my office Friday between members of Board of Grain Appeals inspection department and Mr. Owen, of Farm Stock and Home, and only thing agreed to was to press your bill, as the new rules are of no benefit to the northwestern producers. Our chief inspector, Tunnell, leaves for Washington to-night and will be with you as long as you want him. At the big meeting western part of State I interviewed hundreds of farmers and the opinion is that the only thing to do is to get the bill before Congress so you can explain that the northwestern producers are discriminated against.

Mr. Tunnell will give you full information. Answer.

O. P. B. JACOBSON.

The same view appears in the following article, written by Dr. W. C. Palmer, of the Fargo Agricultural College, and chief grain inspector for the State of North Dakota:

NO CHANGES IN HARD RED SPRING WHEAT GRADES.

[By Doctor Palmer, Chief Grain Inspector, North Dakota.]

"No changes will be made in the hard red spring wheat grades, according to the announcement sent out by H. C. Wallace, Secretary of Agriculture, on April 17, 1922. Repeated requests have been made to the Secretaries of Agriculture for changes in the hard red spring wheat grades. The Secretaries all promised to investigate. Secretary Wallace did appoint a committee to investigate, but set aside its report. It is doubtful if he could have selected a better committee.

"Dr. John Lee Coulter, then dean and director of the West Virginia Agricultural College and Experiment Station, but raised in the spring wheat territory, a student of agricultural economics, was a member of the committee. He has had an unusual experience, studying agricultural economics at several agricultural colleges, and made his studies practical by following such products as grain and cattle from the farm through the terminal to the finished product. He has taught agricultural economics, and is one of the outstanding authorities on this subject. During the period 1910 to 1914 he was chief of the agricultural census, United States Census Bureau. He has been sent to Europe by the Federal Government to make investigations into agricultural economic conditions there. Doctor Coulter's father still operates the home farm in the Red River Valley, on which Doctor Coulter was raised. Doctor Coulter's brothers also farm.

"Mr. L. A. Fitz, in charge of milling investigations at the Kansas Agricultural College, was the other member of this committee. Mr. Fitz, before going to Kansas, was located at the North Dakota Agricultural College, and had charge of milling investigations for the Federal Government, so that he is familiar with the milling of both spring and winter wheat, and has made a special study of the milling qualities of the different grades of wheat.

"This committee made careful study of the grain business as affected by grades, at terminal markets, milling centers, and at the local markets. Each made an independent report to the Secretary of Agriculture, but the reports were unanimous in recommending the dropping of moisture and foreign material other than dockage as grading factors, and that when these were in excess they should be designated on the grade certificate. This would have been a big improvement in the grades, as it would have made the wheat in the straight grades a higher quality wheat.

"Now, for instance, a grade 3 wheat may contain 15 per cent moisture or 0.6 pound more moisture in a bushel of No. 3 than in a bushel of No. 1, and 1.2 pounds more in a bushel of No. 4. This not only means that this amount of moisture must be paid for as wheat, but also that wheat with that much moisture is not a storable wheat. Yet if one buys No. 3 or 4 wheat by grade that contract will be fulfilled if wheat with that much moisture is delivered and the price reflected to the local market for these grades has to be largely fixed on the basis of wheat with that much moisture.

"Most of the wheat brought to the local market has less than 14 per cent of moisture. Why penalize all the wheat marketed in order to penalize the small amount of wheat containing too much moisture? The adoption of the committee report would have made the moisture in all straight grades 14 per cent, and any wheat with more moisture would be excess-moisture wheat, and it would be penalized in price; but there is no reason why it should be penalized any more in price if called excess-moisture wheat than if it is put down in grade and paid for on basis of low in the grade as at present. The price reflected to the local market on the straight grades would be on the basis of 14 per cent moisture wheat. This would be a storable wheat and could be bought on grade. The excess-moisture wheat could be sent to the drier, and for a very few cents per bushel the excess moisture can be taken out and the wheat be made a storable wheat. Designating wheat with excess moisture 'excess-moisture wheat' would also mean that such wheat could be rushed to the driers or otherwise handled so as to remove the excess moisture quite promptly, and so prevent any heating and resulting damage.

"Under the Federal grades a bushel of No. 3 wheat may contain 1.2 pounds foreign material other than dockage and a bushel of No. 4 wheat may contain 1.8 pounds. This means that if one buys No. 3 or 4 wheat by grade each may contain that much material not wheat that has to be paid for as wheat. That is not all; some of this material is difficult to remove, so that it may make the wheat less valuable. The price reflected to the local market is on the basis of wheat containing the maximum amount of these foreign materials. Only a very small amount of the wheat has these foreign materials, yet under the present standards in order to penalize this small amount of wheat all the wheat is penalized. The recommendation of the committee was to designate wheat with foreign materials as 'excess foreign material wheat' on the grade certificate. It is not likely that wheat with the foreign material, if sold as such, would be penalized any more than it is at present when reduced in grade. And then the great bulk of the wheat would sell on the basis of clean wheat and all wheat in the bushel.

"The present Federal grades legalize adulteration, and the only way to get full value when selling by grade is to adulterate the wheat to the limit set. The farmer is in no position to do this. This means that the bushel of wheat sold by the farmer is worth a good deal more than the bushel of wheat of the same grade shipped out of the terminal elevator, yet it is the terminal-elevator wheat that sets the price of the farmer's wheat.

"The Minneapolis Grain Trade has also made a sort of an indirect comment on the Federal grades, in that the rules of the chamber of commerce, promulgated in April, 1923, provide that No. 1 Northern Spring is contract grade, No. 2 Northern Spring is deliverable at 3 cents discount, and No. 3 at 20 cents discount. This is an unfair discount, for the great bulk of No. 3 wheat as it comes from the farm is good milling wheat; but when one realizes that the No. 3 wheat from the terminal elevators is not always a millable wheat, as it can be loaded up to the

limit. (To a bushel of farmer's wheat may be added 11 pounds of mixture, which might, for instance, contain 5½ pounds cheaper wheat, 4 pounds damaged wheat, 1 pound barley, and one-half pound cockle.) And this is the No. 3 that may be delivered on contract; the discount may not more than enable the taker to play safe. With moisture and the foreign materials removed as grading factors, there would be no need for such a big discount, as all straight grades would be good millable and storable wheat and would be all wheat.

"A study of cash sales on the Minneapolis terminal market brings out the fact that wheat in a single grade varies as much as 20 cents per bushel. This is so wide a spread that the grain trade has found it necessary to introduce some extra grades. These new grades are fancy 1, 2, and 3 dark northern spring, in addition to the regular 1, 2, and 3 dark northern spring provided for in the Federal grades. Closing cash prices are quoted on these fancy grades as well as on the regular grades. For March, fancy 1 dark northern spring averaged 8 cents over regular 1 dark northern spring; fancy 2 dark northern spring, 10 cents over No. 2 dark northern spring; fancy 3 dark northern spring, 12 cents over 3 dark northern spring.

"Eliminating moisture and foreign material other than dockage as grading factors will do a great deal to close up the grades, i. e., not to put as low-grade wheat into a grade as is allowed now. It is the price of the low in the grade that is reflected in the local market.

"Eliminating moisture and foreign material other than dockage as grading factors may close up the grades enough so that the grain trade will not need to use the fancy grades, or, if they are still maintained, the difference between the fancy and the regular grades will be less, and hence the regular grades will bring more nearly what they should on the local market.

"The grain trade has to play safe. If the standards allow of too low grades, some of the low in the grade may be received, and if the price is not on the low in the grade there would be a loss on the lot. Grades are not much good if too wide, as it pretty near makes transactions possible only on sample.

"Mr. J. Shanahan, of Buffalo, N. Y., representative of eastern millers at the Chicago hearing on the grades, April 10, 1922, stated that he could not buy hard red spring wheat by grade, but had to make several trips to the Northwest each year to buy wheat on sample. Minneapolis millers have also stated that they can not buy wheat for milling on contract under the Federal standards. The millers can not use the grades in buying hard red spring wheat, and the farmers do not get justice because of them, yet no change can be secured.

"The grades are also working a hardship on our export of wheat. Some foreign countries will not buy wheat from the United States. The wheat they get will not be the good wheat as raised on the farm, but it will be the terminal market wheat. If United States wheat is to have a standing on foreign markets, it must be graded on the basis of the clean wheat and not on the basis of the undesirable things that may be put into it.

"It is the old story of adulteration—that the adulterated article drives the pure article from the market when the sales are by grade. The only way to deal in the real article when adulteration is legalized is to deal by sample or under trade names. And to think that the Federal Department of Agriculture should legalize adulteration in grain when such a valiant fight has been put up to drive out adulteration in other things.

"The present standards on hard red spring wheat also work a hardship on the country grain dealer in this way: It is often desirable to store grain at the terminal market; but if the country grain dealer stores a carload of grain of a certain grade he would have a carload of the same grade delivered, but it would be terminal wheat made to grade, and might be worth 10 to 30 cents less per bushel than farm wheat put in store.

"The changes suggested by Doctor Coulter and Mr. Fitz that moisture and the foreign materials be dropped as grading factors would have remedied some of the worst defects in the Federal grain standards.

"Secretary Wallace, in a statement issued April 17, 1922, states that 'under present conditions it appears that the tendency at country buying points in the central Northwest is to pay an average or flat price for wheat which varies greatly in milling value, the grade being determined primarily on test weight per bushel.' Very little of the wheat marketed in North Dakota is down in grade except on test weight, but the same price is reflected to all parts of the State. The same price or 'flat price' goes to the territory where the wheat is free from the inseparables as well as to where king-heads, cockle, or wild peas abound. When the wheat contains king-heads, the king-heads have to be paid for as wheat, according to the Federal grades, and it is plain that wheat with king-heads is not as valuable as wheat without king-heads and that is all wheat. If the same price is reflected for wheat with king-heads as for wheat that is all wheat, it would seem to follow that either too much is paid for the wheat with king-heads or too little for wheat that is all wheat. In other words, the 'flat price' is on the basis of terminal grade wheat or wheat down on all factors and not on basis of farm-grade wheat, which is usually down on only one factor and hence is too low. If the grades were tightened up, as suggested by Doctor Coulter and Mr. Fitz, there would not be so much difference in value between terminal wheat and farm wheat in the same grade.

"Secretary Wallace further states that 'it is clear that the unsatisfactory condition at country buying points in the central Northwest is primarily due to poor grading and inadequate information on the part of the farmers as to the grades and price distinctions at terminal markets.' Secretary Wallace lays the blame on the grain buyers. But for argument's sake, anyway, suppose that the grading at the country buying points is done perfectly and that the farmers know the grades as well as the price distinctions at the terminal markets, and many of them do, how does that improve matters? The farmer brings in his grain and it is graded. The farmer knows that the price on wheat in that grade varies 20 cents a bushel when sold on the terminal market by sample, but the bottom price is the one reflected to the local elevator. The farmer may be in a position to bargain with the grain buyer, but how will the farmer and the grain buyer know how much the wheat will bring by sample over the low? Of course, the farmer can ship his wheat and consign it to a commission merchant to sell by sample. In this way he would come more nearly getting what his wheat is worth, but the grades would have nothing to do with that.

"As a remedy, Secretary Wallace has decided to make certain changes in the inspection rules so as to require inspectors to state, in addition to the grade of the wheat, adequate information as to the kind and quality of foreign material other than dockage and the amount of moisture when effective as grading factors, and as to what would be the grade of the wheat otherwise than on account of these grading factors. This added information will help the buyer, as he will know more nearly what he is getting.

"But how is that going to help the farmer? There is one way that the farmer can secure some advantage and that will be by sending a sample of the wheat to the nearest inspection department and have it graded. This added information will be on the grade certificate, then with a good market reporting service that will promptly bring the farmer information as to how grain similar in grade has sold on the sample market he would be in a position to bargain with the grain dealer. This added information would not change the grades; hence the price reflected to the local market will necessarily be on the basis of the low in the grade just the same.

"Secretary Wallace is planning a wireless crop reporting service. Dr. J. L. Coulter, president of the North Dakota Agricultural College, has already taken steps to have the wireless station at the agricultural college equipped so that the wireless market reporting service sent out by the Department of Agriculture can be received and sent to all points in North Dakota. County agents or whoever would desire to could have receiving sets and so receive the reports. A more complete and prompt market report could in this way be sent out than is given in the press. By cooperating with the grain-grading department these reports could be made to more fully cover the points on which North Dakota farmers would need information. The efforts being made by Secretary Wallace seem to be aimed at getting around the grades instead of making them workable. The millers can not buy hard red spring wheat by grade. On the terminal market the dealing is on sample and the farmer must likewise sell on sample, and the foreign buyer will need to buy on sample.

"It is a great disappointment that the changes suggested by Doctor Coulter and Mr. Fitz could not have been adopted. Their recommendations, if adopted, would have gone a long way toward reflecting true value to the local market. It would largely have wiped out the difference between the terminal wheat and farm wheat in the same grade. And until this is done, the farmer, to get full value for his wheat, to get full value for farm wheat and not for terminal market wheat, will need to sell his wheat by sample and this can undoubtedly be done the most effectively in a cooperative marketing plan."

Another material change in the existing rules proposed in my bill is to eliminate the subclass "red spring" and to reduce the number of grades to four instead of five, the test weight of the highest and lowest grade to remain as it is now, but the intermediate grades are slightly lowered.

It has been objected that grades should not be prescribed by statute; but this is not unusual. The requirements for the three principal grades in northwestern Canada are prescribed by act of Parliament. The bill also contains a provision that when the new rules have been in force for two years they can be changed, if the interest of agriculture requires, by the Secretary of Agriculture. We appeal to Congress as our last resort.

At all the hearings that I have heard all the farmers have been unanimous in support of the bill, and so are the grain-inspection officials of the States concerned. The president of the Federation of Farm Bureaus of Minnesota attended the hearing and favored the proposals of the bill, and it has also been recommended by the Farm Bureau Federation of 10 Northwestern States and by the Equity Exchange, with headquarters at St. Paul, which controls hundreds of cooperative elevators. The remarkable thing about the opposition of the representatives of millers and the grain trade is that it is based upon the idea that they are the friends of the farmer and are trying to protect him from loss. The evidence indicates that the terminal elevators and millers are making from fifty to one hundred dollars per thousand-bushel car by manipulating the grades. The present situation makes a market like Minneapolis a virtual paradise of the mixers. Grades are for the purpose of informing the buyer of the kind and quantity of the article to be sold in order that the proper price may be applied, but Mr. James F. Bell, a representative of the Washburn-Crosby Co., the largest manufacturer of flour in Minneapolis and probably in the world, in a letter to the undersigned states that the range between the highest and the lowest price on the same day in the same grade ran from 20 to as high as 40 cents a bushel. The market reports in the Minneapolis papers also indicate a very large range on the same day in the same grade. On the same point I call attention to the following from the testimony of Mr. John D. Shanahan, of Buffalo, N. Y., representing the Niagara Falls Milling Co.:

Official closing prices for cash wheat on the Minneapolis Exchange, June 15, 16, 17, and 18, 1921.

Date.	Grade.	Close.	Range.
			Cents.
June 15	No. 1 dark northern spring..	153¾–189¾	36
Do	No. 2 dark northern spring..	149¾–161¾	12
Do	No. 3 dark northern spring..	136¾–151¾	15
June 16	No. 1 dark northern spring..	151¾–187¾	36
Do	No. 2 dark northern spring..	147⅞–159⅞	12
Do	No. 3 dark northern spring..	134¾–149¾	15
June 17	No. 1 dark northern spring..	155¾–191¾	36
Do	No. 2 dark northern spring..	151¾–163¾	12
Do	No. 3 dark northern spring..	138¾–153¾	15
June 18	No. 1 dark northern spring..	151¾–187¾	35
Do	No. 2 dark northern spring..	147¾–159¾	12
Do	No. 3 dark northern spring..	134¼–149¼	15

The cost prices as shown above indicate a range in the July option upon which they were based of only 2 cents per bushel during the four days in question, and the only change in the relative premiums for cash wheat was a narrowing of the range in the No. 1 dark northern grade of 1 cent per bushel.

Why this enormous range in the values of No. 1 dark northern spring wheat? The answer is that the lowest price paid for that grade is for wheat that will "just make the grade" with nothing to spare and no other factor of value to recommend it to the miller purchaser. Such wheat, besides being comparatively weak in its food constituents, contains the maximum of one or more grade factors allowed, such as mixtures of other wheats than red, spring, rye, wild peas, king-heads, wild rose, or other inseparable foreign material, while the top prices were paid for wheat that was infinitely stronger, heavier, and contained little or nothing but such wheat.

The Washburn & Crosby Co., after having examined a copy of my bill, submitted to the committee an amended draft which they said would be satisfactory. It contains the same classes and subclasses as my bill. They raise the standard for No. 1 to 59 pounds instead of 58 and retain the five grades. Their bill eliminates foreign material and moisture as grading factors, the same as my bill, but they place the percentage of moisture permissible at 14 per cent instead of 14½ per cent, as in my bill. This leaves the difference between their bill and mine simply in the grade requirements which are in some particulars higher than the present Federal grades. (See Supplemental Hearings, p. 314.)

The bill (H. R. 7401) after it was reported was reintroduced with the committee amendments and amendments on account of typographical errors, and as House bill 9668 was submitted to the grain inspection departments of North Dakota and of Minnesota and approved in every particular.

I think this is sufficient to show that the objections to the bill raised by interested parties are wholly unfounded. Millers and grain men who have said anything on this subject have admitted that the present grades are faulty and that they do not know how to remedy the fault. In behalf of the farmers throughout the Northwest I ask you to believe that after these many years of study and experience under the present regulations they actually know their own interest better than those who are profiting by present conditions at their expense. In this conclusion they are supported by the scientific men employed in the State experimental mill and the men in the grain inspection force of large experience. We submit, therefore, that the remedy we offer is sound and should be approved by Congress. Grain inspection has been in vogue in Minnesota for more than 30 years, and their experience is very much greater than that of the Federal Bureau of Markets which has only been dealing with the subject for five years. Minnesota laws require the grades to be revised every year to meet new conditions. The Federal Bureau of Markets, which borrowed many of their rules from the State of Minnesota, framed them five years ago, before they had any experience, and have refused to make any material alterations since. All they have ever sought is to have the approval of the grain trade, and the result is that the prices paid to the farmers at the local elevators on the average is 20 cents less per bushel than the same wheat is sold for when it is sold by sample on the grain exchanges in the terminal markets or has been raised in grade by the manipulation of the terminal elevators.

I insert here the report of the Minnesota State experimental mill on the milling value of the different grades of wheat:

STATE TO USE MILLING TEST IN GRADE PLEA—RESULTS AT EXPERIMENTAL PLANT SHOW INEQUITY OF WHEAT STANDARDS.

Figures and facts obtained in milling tests of wheat at the new State testing mill will be used in attempts to secure changes in the Federal grain grades by which grain is now marketed, it was said to-day by O. P. B. Jacobson, chairman of the State Railroad and Warehouse Commission.

The tests, announced Saturday, showed that while millers are paying down to 32 cents less for No. 4 dark northern than for No. 1, the milling value of the No. 4 is only 7 cents less than for No. 1.

They also showed that on January 16, 1922, No. 1 dark northern was worth $1.69 for milling purposes, down to $1.61 for No. 4.

On that date, No. 1 dark northern was selling for $1.39 top, or 30 cents less than its milling value, according to the market page of the Daily Star, and No. 4 down to $1.10, or 51 cents less than its milling value.

The following table shows what the experiments revealed:

Kind.	Actual milling value Jan. 15.	Market price Jan. 15.	Saturday's market price.
No. 1 dark northern	$1.69	$1.33–$1.39	$1.49–$1.64
No. 2 dark northern	1.66	1.31– 1.38	1.45– 1.62
No. 3 dark northern	1.63½	1.23– 1.28	1.38– 1.60
No. 4 dark northern	1.61	1.20– 1.28	1.32– 1.49

The fact that wheat is now selling nearly at the milling value as of January 15 does not necessarily mean that it is now nearer its milling value than it was then.

NEVER UP TO MILL VALUE.

The experiment was based upon the price of flour and feeds upon January 15, when flour was 3.416 cents a pound and the feeds and by-products 1.33. If the price of flour and by-products has risen since then, the milling value of the wheat would have risen in proportion.

The significance of the experiment, according to N. J. Holmberg, commissioner of agriculture, in charge of the mill, and Mr. Jacobson, is in the fact that No. 4 wheat is shown to be worth only 7 cents a bushel less for milling purposes than No. 1, while the market prices vary from 20 to 30 cents less.

"It shows conclusively that the present grading system, based upon the weight and moisture content of the wheat, should be amended or thrown out," said Mr. Jacobson. "Quality, as revealed in these milling tests, should be the basis of grading and not weight.

"But I predict it will be almost impossible to beat down the powerful lobby maintained by the millers at Washington and get a modification of the grades by Congress or by Henry Wallace, Secretary of Agriculture."

The cars of wheat upon which the State mill tests were made came from all over the State of Minnesota.

MILL TESTS SHOW VALUES.

Results on the different grades were, in detail, as follows:

There were five cars of No. 1 dark northern ground at the mill. On these the dockage was 2 per cent, the loss in cleaning 4⅓ per cent, the weight a bushel 59.1 pounds, the moisture before tempering 11.7 per cent. The yields of all mill products on the basis of original moisture content by percentage follows: Straight flour, 74; red dog, 2.67; standard millings, 12.7; bran, 11.96; total feed, 27.33; total returns, 101.33. The flour value was 1.517 and the feeds 15 cents from a bushel.

There were six cars of No. 2 dark northern. On these the dockage was 2.8 per cent, the loss in cleaning 5.40, weight a bushel 57.1, moisture 11.7, by percentages except weight in pounds. Mill products yielded, in percentage, as follows: Straight flour, 72.21; red dog, 2.68; standard millings, 14.25; bran, 11.61; total feed, 28.54; total returns, 100.75. The flour value was $1.48 and the mill feeds 17.7 cents a bushel, a total of $1.657.

Eleven cars of No. 3 dark northern wheat were ground and the average bushel produced products worth $1.63⅔, with $1.453 in flour and 18⅔ cents in millstuffs. On these the dockage was 3.7 per cent; the loss in cleaning, 5.7 per cent; the weight a bushel, 55⅓ pounds; the moisture, 12.8 per cent. The yields a bushel in percentages: Straight flour, 70.88; red dog, 4.55; standard millings, 11.8; bran, 12.01; total millstuffs, 29.3; total returns, 100.422.

Five cars of No. 4 dark northern averaged outputs worth $1.611 from each bushel, $1.411 in flour and 20 cents in feeds. Of these the dockage was 4.8 per cent; the loss in cleaning, 6.69 per cent; the weight a bushel, 53.8 pounds; and the moisture, 11.8. The yields a bushel in percentages: Straight flour, 68.82; red dog, 4.29; standard millings, 15.82; bran, 13.05; total feeds, 32.16; total returns, 100.98.

EXPLANATION OF VOTE.

Mr. JACOWAY. Mr. Speaker, I ask unanimous consent to make a statement for one minute.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. WALSH. About what?

Mr. JACOWAY. To correct the RECORD, I will say to the gentleman from Massachusetts. When the filled milk bill was before the House Mr. MOORE of Ohio came to me and asked me to pair with him. I did so, and the pair was executed. Under the pair his vote would have been "yea" and mine "nay," and I so stated. When the roll was called I voted "nay." It was my intention to withdraw my vote and answer "present," and in order that no injustice be done the gentleman from Ohio I desire to state that I inadvertently and unintentionally violated the pair. I make this explanation in order that Mr. MOORE's position on the filled milk bill will appear in the RECORD and the unintentional injustice done him by me be corrected as far as I am able to do so.

EXTENSION OF REMARKS.

Mr. McLAUGHLIN of Michigan. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the sugar bill which was considered in the House on yesterday.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. HAWES. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by some original observations on the first 10 amendments to the Constitution.

The SPEAKER Is there objection? [After a pause.] The Chair hears none.

The extension of remarks referred to are here printed in full as follows:

Mr. HAWES. Mr. Speaker, without that thoroughness to which the subject is entitled, I direct attention to the first 10 amendments to our National Constitution, called our "Bill of Rights."

My observations are elemental, contain no new thought, and are only a repetition of fundamentals which are known to the lawyer and student.

There was a time when the farmer, the blacksmith, the artisan, and men in every vocation of life understood and were prepared to defend our Bill of Rights.

The last generation was familiar with the Constitution. It was discussed everywhere and upon all occasions. It was the guide which directed legislative enactment and controlled executive discretion.

But during more recent years citizens have neglected its consideration.

The beneficial effects of the first 10 amendments have been so generously accepted that their description and the necessity for their preservation may seem unnecessary. During the period of the war and in the reaction which is now taking place many instances of "official lawlessness" and hasty legislation are again forcing consideration as the sole remaining check upon intemperate legislation and official arrogance and ignorance.

During our preparation for war and participation in it civil affairs were temporarily made subordinate to military necessity.

Ordinary civil procedure in some cases was abandoned and many temporary innovations introduced. The willing citizen, with his mind concentrated upon the one subject of winning the war, made few objections and no protests.

OVERGOVERNMENT.

The war taught organization, and now much of the surplus energy generated during that period is diverted to civic organizations and is manifesting itself in various forms of propaganda, and specially organized minority interests are springing up attempting to force the National Government to do things which were formerly left for the individual to do for himself.

Carried away by haste and an excess of zeal, the fundamental things in our Constitution are assailed in proposed laws, and in many cases public officials are themselves guilty of what is properly termed "official lawlessness" in trying to carry out the extreme wishes of those organized minority groups.

What we shall eat, what we shall wear, what we shall read, how we shall work, and when and how we shall play are to be controlled by statute law rather than by personal inclination.

Some are content to guard with zealous care the rights of life and property, but many others now attempt to regulate, control, direct, and specify what is "the pursuit of happiness."

The word "liberty" used in the Declaration of Independence was not intended in the narrow sense of bodily confinement or a restricted physical action but it extends far beyond to the liberty of thought, of speech, of conscience, as well as of action. In fact, it means self-determination for faculties with which God has endowed us.

Our theory was that government did not give liberty to the citizen but that each individual possessed it as a natural right, and that government was formed for the purpose of protecting it and making it secure.

Everyone was believed to have the natural right to do exactly as he wished except where, in exercising this right, he interfered with similar rights or privileges of others.

CHECKS AND BALANCES.

Finding that all men do not agree, we provided a government, so that the majority might select their own agents or public officials.

If the majority of all the people is to select and direct our Government it follows that a small minority group, or a small association controlled by a vigorous propaganda, should not be permitted to rule the majority. And yet this is being done.

Our Government provides a system of checks and balances intended to preserve the right of the minority from the encroachments of the majority, but minority rule is a new national development.

Our President at times has more power than the king of a constitutional monarchy, but he is checked by the power of Congress, and the power of Congress is again checked by the interpretations placed upon its laws by our Supreme Court, whose duty it is to compel conformity with our written Constitution and protect the rights of citizens which are guaranteed under that instrument.

We are sometimes discouraged, even dismayed, with the toilsome machinery with which we change our laws. This delay is discouraging to the optimist, let alone those who are impatient; but experience has shown that conditions are bettered by steadily gaining point upon point and not by pulling down good and bad together in hasty, ill-advised action.

A clever man has stated:

All political issues may be grouped in three classes: Those which are popular but impracticable; those which are practical but not popular; and those which are both popular and practical.

We are tending more to the first of these; that is, the popular but impracticable legislation.

In providing for a series of checks in our form of government provision was made against hasty and ill-considered demands of even a majority.

The division of the legislative power into two bodies, one serving for two years, the other for six; the independence of the President, and the creation of the Supreme Court to pass upon laws made by Congress, briefly indicate the various checks and balances.

Our Government does not prevent any change in its laws, even a change in the first 10 amendments; but it does prevent change being made hastily, ill-advisedly, and upon the impulse of excitement or passion.

It is not to this division of the powers of Government to which I desire to direct attention, but rather to the first 10 amendments of the Constitution, which first prohibited the National Government from doing certain things and was quickly followed by the insertion in our various State constitutions of the same prohibitions.

OFFICIAL LAWLESSNESS.

These inhibitions are intended to prevent arbitrary or unjust action both by Government and by its officers. Certain acts are described which neither Government nor its agents can do.

Few men can handle an unusual and extraordinary power with moderation and temperate judgment.

The man in office has just as many human frailties as men out of office. So the first 10 amendments were in part to check weakness or lawlessness in the official.

These 10 amendments are a limitation upon government. They draw a sacred circle within which government may not penetrate. They are similar to the restraints placed upon the king.

The words of Lord Chatham, heard before every graduating class at law school, and which I hope will again ring throughout America, contain the doctrine. All we have to do is to substitute the word "government" for the word "crown" and the word "official" for the word "king" and the limitation of power is brought home to us.

The poorest man in his cottage bids defiance to all the forces of the crown. It may be frail; its roof may shake; the wind may blow through it; the storms may enter. But the King of England can not enter. All his forces dare not cross the threshold of the ruined tenement.

When laws are enacted which are difficult of enforcement by reason of their interference with personal rights, then the modern tendency is to introduce new methods of enforcement still further restricting liberty.

These amendments are intended to prevent oppression by the Government and its officers, just as the Magna Charta was intended to prevent oppression by the King. They guarantee individuals against oppression by even their own selected Government. They have been likened by some to the Ten Commandments.

While we voluntarily surrendered certain rights that government might exist, in these amendments we protected the individual rights from the encroachment by government.

Next to religion, the amendments demand our highest reverence, for while liberty is the best offspring of democracy, we must still guard against democracy destroying its choicest product.

Strange as it may seem, there may be democracy without liberty.

Christianity has taught democracy in rousing men to an understanding of his true relations with God. This in turn has taught him his proper relation with his fellow man.

In his fight for religious liberty he secured personal liberty, which is now covered by these 10 amendments.

The Constitution itself was only finally ratified by the various Colonies upon the promise that the Bill of Rights containing these amendments would later be adopted.

While there was some hesitancy upon the part of the States to adopt the original Constitution, there was no hesitancy in the adoption of the Bill of Rights, which was done unanimously by all of the States.

The forefathers thought that even a democracy should not have unlimited power.

We must not fail to remember that when we deprive a single individual of his rightful liberty we endanger the liberties of all.

When we override these guaranties and revert to the old days of unlimited power in government, we prepare the way for monarchy.

LIMITATION UPON OFFICIAL CONDUCT.

Every citizen is, to an extent, his own doctor and, to a much larger extent, his own lawyer, because he is supposed to know the law. He can not be expected to know all of it, but certainly the limitations placed upon official conduct should be understood.

A law writer has summarized them as follows:

By the Federal Constitution as it now stands the citizen, in time of peace at least, is guaranteed, among other matters, (1) the protection of the writ of habeas corpus; (2) freedom from bills of attainder and ex post facto legislation; (3) freedom of religious belief and worship; (4) freedom of thought and its expression; (5) freedom peacefully to assemble with others and petition for redress of grievances; (6) freedom from unreasonable search and seizure; (7) the right not to be prosecuted for infamous crimes except first accused by a grand jury; (8) the right in all criminal prosecutions to a speedy and public trial by an impartial jury; (9) to be confronted with the witnesses against him, and (10) to have assistance of counsel; (11) that he shall not be deprived of life, liberty, or property without due process of law; (12) that his private property shall not be taken from him even for public use without just compensation; (13) that the obligations accruing to him under lawful contracts shall not be impaired; (14) that he shall not be denied the equal protection of the laws.

We can not understand real Americanism unless we are familiar with these limitations.

In instructing both naturalized citizens and our school children, they must be shown that liberty is not license and that considerations of personal right must embody equal consideration for the rights of neighbors.

These limitations are for the protection of the weak as against the strong, against a majority seeking by intemperate action to deprive the minority of its rights, and are the fruition of centuries of struggle involving the sacrifice of thousands of patriotic lives.

The original limitation upon the power of the King was followed by our limiting the power of our own selected Government.

THE DECLARATION AND THE CONSTITUTION.

Judge Wade has drawn an interesting comparison between the provisions of our Declaration of Independence and these prohibitions placed in the Constitution:

Before the passage of the habeas corpus act of 1679 in England, any person of royalty or high official standing in the Government could falsely accuse another person of crime and cause that innocent person to languish in prison for years, or even for life, because he could not get before a court of justice to establish his innocence.

In many European countries the peasants were burdened with taxes to support kings and courts without the slightest representation in the tax-levying authority. In France, just preceding the French Revolution, the peasants were obliged to purchase a certain number of barrels of salt each year, without having the slightest use for the salt, because the Crown lands produced salt and the revenues went to the king.

In many European countries a state church was established and the people obliged to support it by taxes levied against their property, regardless of whether it represented their religious beliefs.

A comparison of the provisions of the Declaration of Independence with those of the Constitution will show the wrongs of the English king righted by the Constitution.

Declaration of Independence: "He has refused assent to laws the most wholesome and necessary for the public good."

Constitution of the United States: "A bill if vetoed by the President may be repassed by two-thirds of the Senate and House of Representatives."

Declaration of Independence: "He has forbidden his governors to pass laws of immediate and pressing importance."

Constitution of the United States: "Congress shall have the power to lay and collect taxes, duties, etc." (See Const. Art. I, S. 8.)

Declaration of Independence: "He has dissolved representative houses repeatedly for opposing with manly firmness his invasions on the rights of the people."

Constitution of the United States: "Congress shall meet at the seat of Government once each year."

Declaration of Independence: "He has refused, for a long time after dissolution, to cause others to be elected."

Constitution of the United States: "The time, place, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the legislature thereof."

Declaration of Independence: "He has obstructed the administration of justice."

Constitution of the United States: "Jurisdiction of courts fixed by Constitution. Judges not responsible to the President, but to Congress, which represents the people."

Declaration of Independence: "He has made judges dependent on his will alone."

Constitution of the United States: "Judges subject to removal only by impeachment of Congress."

Declaration of Independence: "He has kept standing armies * * * without consent of the legislature."

Constitution of the United States: "Congress shall have power to raise and support armies." "To provide and maintain a navy."

Declaration of Independence: "For transporting us beyond seas to be tried for pretended offenses."

Constitution of the United States: "Such trial shall be held in the State where said crime shall have been committed."

Declaration of Independence: "For depriving us, in many cases, of the right of trial by jury."

Constitution of the United States: "The trial of all crimes, except in case of impeachment, shall be by jury."

Declaration of Independence: "For quartering large bodies of armed troops among us."

Constitution of the United States: "No soldier shall in time of peace be quartered in any house without the consent of the owner."

Declaration of Independence: "For imposing taxes on us without our consent."

Constitution of the United States: "Congress shall have power to levy and collect taxes."

THE KING CAN DO NO WRONG.

These were our constitutional answers to the power of the king. They must still be our answer to those who would restore to our Government and officials the powers taken from the king.

These must be our answers to the self-inflated public official whose brief authority causes him to think that he is a king.

"The king can do no wrong" was the old doctrine of tyranny now adopted by some National and State officials who think they can do no wrong.

Soon we may be required to write another Declaration of Independence against the propagandist, the emotional and neurotic crank, and hang high for public contempt the Government official who believes "he can do no wrong," and takes upon himself the power of the king which our Government had destroyed.

We are confronted with what might be termed "legislative lawlessness," which is inspired by the fear of political defeat; for men, in defiance of the Constitution and our Bill of Rights, will vote for the passage of laws which are unconstitutional for the sole purpose of securing votes.

They seek to avoid responsibility themselves by passing the responsibility to the Supreme Court, and answer a minority clamor by voting for legislation which they are too cowardly to combat.

We can not survive with group government. The Government must be "all for all." The personal political fortunes of some one man, or small group of men, may be promoted by group government, but this personal gain is always followed by loss of general welfare.

Ours is a government of law, not of men.

We should know our king, which is the Constitution, and understand the limitation of his power, found in our Bill of Rights.

THE FIRST AMENDMENT.

Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press, or the right of the people peacefully to assemble, and to petition the Government for a redress of grievances.

It will be noted that in the original Constitution (Art. VI, clause 3) any religious test as a qualification for a public office was prohibited.

This was followed by the first paragraph of the first amendment, which reads:

Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof. * * *

I discussed this subject in October, 1921, at considerable length, in part, as follows:

The intolerant is hopeless mentally. As a social unit and as a citizen he can not be changed, but we may, by a frank statement of history, law, and experience, prevent his infection of the body politic and reduce his evil influence to the minimum.

Toleration has developed with education, enlightenment, and a proper understanding of the Christian religion. When we left paganism we abandoned intolerance and advanced to the higher grade of a conscience and religion procured and maintained by reason and persuasion, leaving to the Government only the proper function of protecting the right of each individual to pursue, in his own way, without interference from the State or citizen of a State, the fine exercise of personal choice in the matter of conscience and creed, modified only by the moral suasion of religious associations.

The first requisite for this natural religious selection was a complete separation of church and state and removing from a place in government all attempts to control spiritual conduct and confining its jurisdiction to the protection of the health, happiness, life, and property of the citizen.

The friend of religious liberty is not concerned with the difference between creeds, nor in fact with the difference between faith and unbelief. Nor can he be satisfied alone with the political separation of church and state. He must oppose the invisible government, the secret cabal, or the political movement which attempt to do, by indirection, the thing which is prohibited by law.

The honest friend of religious freedom can not, without protest, permit any man's creed to be made the subject of persecution or the sole measure of his fitness for public office.

We can not lose religious freedom without losing civil freedom, so both must be guarded by zealous citizens.

Our danger will not come from a change in our laws, but from an intolerant spirit which would evade the established law and by indirection do those things which the law prohibits.

The second paragraph of the first amendment reads:

Congress shall make no law * * * abridging freedom of speech or of the press.

This is one of the important safeguards of democracy. It means that our newspapers can print what they deem desirable in time of peace, and that men may speak their minds freely upon all subjects.

It must be understood, however, that whenever a newspaper prints a libelous article, or a speaker engages in slandering his neighbor, they are both amenable to criminal prosecution and civil damages. No public official, nor Congress itself, is permitted to arbitrarily prescribe rules and regulations for either press or speech. This permits criticism of our Government and the officers of our Government.

It does not permit, however, the advocacy of the bomb or the torch or revolutionary methods of changing the form of government. The machinery of our Government provides a lawful way to secure change.

The wildest revolutionist is guaranteed the freedom of speech and of the press, but if he abuses this privilege he can be punished.

The third paragraph reads:

Congress shall make no law * * * abridging * * * the right of the people peacefully to assemble and to petition the Government for a redress of grievances.

This permits the rights of peaceful assemblage, discussion, and the drawing up of petitions to both the legislative and executive branches of our Government, a right which was formerly denied by the King.

THE SECOND AMENDMENT.

A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

This is held to be a limitation only upon the Federal Government, but does not prevent the States from passing laws regulating the use and possession of arms. It was intended to confine the regulation to States and prohibit the National Government from interfering with the rights of States to so regulate this subject.

THE THIRD AMENDMENT.

No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war, but in a manner to be prescribed by the law.

This was intended to subordinate the military to the civil power, so that a civilian would not be subject to the dictation or imposition upon the part of soldiers.

Formerly soldiers arrogated to themselves the right to enter private dwellings and do pretty much as they pleased.

This prohibits a soldier from entering any home without the consent of the owners, except during times of war, and even during a war period only under conditions prescribed by law.

THE FOURTH AMENDMENT.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrant shall issue except upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

This provision of the Constitution is the one which "official lawlessness" most frequently violates. It is what has been termed the "right of castle." No man's home, or office, or habitation may be invaded by an officer of the law unless such officer is armed with a search warrant which describes the place to be searched and must be made upon oath or affirmation showing probable cause.

One of our new official "kings," bent upon mischief, hoping to accomplish some political design, masquerading in the majesty of the law, might enter a man's home, search his papers, go through his sacred belongings, disturb his peace, alarm his family, and subject him to various indignities.

No search can be made except upon a warrant issued by a court, and no such warrant shall be issued until a solemn statement under oath discloses evidence of the commission of an offense. The place must be described; the things of persons to be seized must be described. A warrant issued by any court, no matter how high, without such a sworn statement being presented, is void and in violation of the rights of every person under the Constitution.

A citizen has the right to guard his home and use all necessary force for its protection.

THE FIFTH AMENDMENT.

No person shall be held to answer for a capital or otherwise infamous crime unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property without due process of law; nor shall private property be taken for public use without just compensation.

This amendment may properly be divided into five parts:

PART 1. No person shall be held to answer for a capital or otherwise infamous crime, unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service in time of war or public danger.

This means that no one official shall be permitted to issue a warrant for a capital or otherwise infamous crime until 12 men have agreed that such warrant should be issued.

It must be remembered that the defendant in these cases is not brought before the prosecuting officer or even before the grand jury. It is a secret investigation.

The amendment was to prevent officers upon their own authority from dragging a man into court, putting him into jail, ruining his reputation, and causing him loss of money and humiliation unless 12 men agreed in advance that it should be done.

There are some minor offenses, called misdemeanors, which are not covered by the description "capital or infamous crime," upon which persons can be arrested upon warrant without indictment by the grand jury, but these are never serious offenses and should always be easily bailable.

It is against the unjust, arbitrary arrest for the commission of a grave crime that this amendment was adopted.

The second paragraph:

Nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb.

This means that where a person has been once tried he can not be hauled into court again and again on the same charge as the result of "official lawlessness," which might ruin him in his business and reputation and be made the means of unjust persecution. Once tried and acquitted a man is free, and neither the United States nor any officer of the United States can again take him to trial for the same offense.

The third paragraph:

Nor shall he be compelled in any criminal case to be a witness against himself.

This was directed against the old method of confession by torture, and the new method of confession by the so-called "third degree" administered by some police officers, and officials of the rack and thumb-screw type. In this particular, "official lawlessness" is going to the extreme in many of our large cities.

Arresting a man and then torturing him into confession is not conserving justice. It is defeating it. Our forefathers knew this and placed this restriction in the Constitution.

A man by this provision is protected both against threats and inducements made outside of the court and before trial.

A man can not be compelled to give answers after his arrest while he is in jail, or if he is at liberty under bond, which can be used against him upon trial.

No confession which is not absolutely voluntary and of free will will be admitted by a court as testimony when the same is questioned.

The fourth paragraph:

Nor be deprived of life, liberty, or property without due process of law.

This paragraph immediately causes us to revert back to the Bastille during the French Revolution and to the Tower of London in England and to-day to the lawless procedure of the soviet in Russia.

It means that every man shall have his "day in court," and his property, liberty, or life can not be taken away except by a trial before a legal court, in which he shall have a fair hearing, which involves the element of notice, the chance to appear in person, the right to employ counsel, the privilege of summoning witnesses, and a speedy and public trial; in addition to which he has the right of appeal.

The fifth paragraph:

Nor shall private property be taken for public use without just compensation.

This guards the possession of private property. Formerly the king might take property without compensation if it pleased him to do so.

To-day the Government, which has taken the place of the king, may take property for public use, but must pay for it, the compensation to be determined by a jury.

THE SIXTH AMENDMENT.

In all criminal prosecutions the accused shall enjoy the right to a speedy and public trial by an impartial jury of the State and in the district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor; and to have the assistance of counsel for his defense.

The first paragraph provides:

In all criminal prosecutions the accused shall enjoy the right to a speedy and public trial by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law.

"Speedy" refers to the necessity of preventing long imprisonments of an accused before trial, and that the trial must not only be speedy but must be made in public before a court and jury.

This is intended to bring the power of public opinion to bear against despotic procedure for the conviction of the accused, and to insure a trial where all his rights will be conserved, and his trial must be by an impartial jury which he has the right to challenge because of prejudice, and the jury must be drawn in the State where the alleged crime was committed.

Formerly a prisoner could be hauled, at the behest of the King, away from his home, and sometimes taken beyond the seas for the purposes of trial. If it were not for this provision, a man charged with a crime in New York might be tried in California, or indicted in Missouri and tried in Texas.

Paragraph 2:

And to be informed of the nature and cause of the accusation.

This is to permit an intelligent defense.

The next paragraph:

To be confronted with the witnesses against him and to have compulsory process for obtaining witnesses in his favor.

The reason of this provision is obvious. Everything must be done in open court. It gives an opportunity to test the credibility of a witness, to analyze the testimony, separate the accurate from the false; and the Government is compelled to procure the witnesses for the accused, who in many cases are confined in jail and unable to procure their attendance.

The last paragraph:

And to have the assistance of counsel for his defense.

It would seem strange that the right of counsel granted by the Constitution should require explanation or even comment; but it recently developed in my own State in one district that lawyers were importuned and, according to newspaper accounts, coerced into signing some agreement that they would not defend any person arrested for a particular crime.

In attempting to enforce one section of the Constitution another section was to be violated and to be violated by sworn officers of the law who, before being admitted to the practice of the law, had taken an oath to uphold and defend the Constitution.

Fortunately, the public press in my State unitedly condemned such conduct, and it was promptly abandoned.

The first duty of the lawyer is to his client, as the first duty of a doctor is to his patient, and if men engaged in either one of these high professions can be deterred or intimidated from living up to the ethics of their profession and the Constitution of their country, because coerced or made afraid by a specialized organization, then justice indeed is dead and the great legal profession is disgraced.

It will be noted that this amendment in its entirety provides for every safeguard for a fair trial, but if a defendant was denied the right of counsel or learned advice and thrown on his own resources, his trial would be a farce; so that where a defendant can not procure an attorney of his own selection, one is appointed for him by the court to help him establish his innocence. Therefore, for all attorneys in a local district to combine in an agreement not to defend is a combined agreement to deny justice provided under this amendment.

THE SEVENTH AMENDMENT.

In suits at common law, where the value in controversy shall exceed $20, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise reexamined in any court in the United States than according to the rules of the common law.

This is an extension of the right of trial by jury in civil matters, and it is wisely determined that the judgment of 12 men on matters of fact is better than the judgment of 1 man and less susceptible of improper influence or of political or personal bias.

There was objection made to the original Constitution because of the apprehension that the trial of facts in civil matters might be usurped by judges, who would then be judge of both facts and the law, and this amendment was one of those promised to various States at the time they ratified the original Constitution and was an extension of the trial of facts in civil matters by a jury of 12 citizens.

THE EIGHTH AMENDMENT.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishment inflicted.

Excessive bail in former days was used to compel accused persons to remain in prison. It was frequently fixed so unreasonably high that the accused could not secure his liberty pending trial, although the cause for arrest might have been of a most trivial character.

Excessive fines shall not be imposed, nor cruel and unusual punishment inflicted.

This was another check upon the intemperate conduct of a judge or the intemperate conduct of a legislature who would provide excessive and cruel punishment.

History has disclosed that the intolerant, blinded to grave matters, sometimes magnifies a misdemeanor into a heinous crime.

There was a time when men were hanged, drawn and quartered, and left hanging on gibbets at the public roadside; men were pilloried in stocks and lashed in public view and given sentences and punishment all out of proportion to the magnitude of the crime committed.

Debtors were placed in prison and kept there for long periods of time and were transported to the Colonies.

This provision of the Constitution prevents both the Congress and the State from inflicting harsh and uncivilized forms of punishment.

THE NINTH AMENDMENT.

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

One of the serious objections to the adoption of the original Constitution was that it did not contain a Bill of Rights.

Mr. Hamilton contended that this was not necessary. He said:

But a minute detail of particular rights is certainly far less applicable to a Constitution like that under consideration, which is merely intended to regulate the general political interests of the Nation, than to one which has the regulation of every species of personal and private concern.

However, the early fathers, intent upon securing full measure of local self-government, demanded its insertion for fear that Congress might assert implied powers which it did not possess unless they were inhibited..

Judge Cooley remarks:

However unfounded such a fear might be, there could be no harm in affirming by this amendment the principle that constitutions are not made to create rights in the people but in recognition of and in order to preserve them, and that if any are specially enumerated and specially guarded it is only because they are peculiarly important or peculiarly exposed to invasion.

THE TENTH AMENDMENT.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people.

This amendment differentiates between the powers of the United States and the powers of the States. The former are derived by the United States through delegation from the States. The latter, the reserve powers, remain in and are retained by the States, because not delegated or prohibited.

LOCAL GOVERNMENT.

The ninth amendment was evidently intended by the forefathers as a restriction upon the powers of the Federal Government, and the tenth amendment was another restriction withholding any additional powers not granted by the States.

In the language of an eminent authority:

The States intended that all the powers vested by their several constitutions in the State government should be retained and exercised by that government, except such as by the Constitution vested exclu-

sively in the United States or by contractual agreement were prohibited to the States. The consequence is that it is not only natural, but necessary that this amendment should declare that the powers not delegated to the United States, and not prohibited to the States, should still remain with the several State governments or with the sovereign people of each State.

The encroachment upon local self-government by Federal enactment, and National Government by commission and bureau, is a subject requiring separate discussion and greater elaboration.

CONCLUSION.

The great thinkers and educators of our country are becoming alarmed at the neglect of the study of the Constitution.

Judge Martin J. Wade and many others have made notable contributions to this subject, and I have made free use of their observations.

We are in a period of reaction which always follows a great war. Intolerance and bigotry seem to be developing. Hasty and intemperate legislation is proposed. State and Federal officials are attempting to make laws of their own. Organized minority groups are driving the legislative and executive officers into acts of "official lawlessness."

If my limited and superficial discussion of this subject will induce a more thorough study by the average citizen. I shall have accomplished my object, for better understanding will produce the check now so necessary for the preservation of our broader liberties.

CALENDAR WEDNESDAY.

The SPEAKER. The business in order to-day is Calendar Wednesday business, and the Clerk will call the roll of committees.

When the Committee on the Judiciary was called—

Mr. VOLSTEAD. Mr. Speaker, I call up the bill (S. 745).

The SPEAKER. The gentleman from Minnesota calls up the bill which the Clerk will report.

The Clerk read as follows:

An act (S. 745) to amend section 24 and section 256 of the Judicial Code.

Be it enacted, etc., That clause 3 of section 24 of the Judicial Code is hereby amended to read as follows:

"Third. Of all civil causes of admiralty and maritime jurisdiction, saving to suitors in all cases the right of a common-law remedy where the common law is competent to give it, and to claimants for compensation for injuries to or death of persons other than the master or members of the crew of a vessel their rights and remedies under the workmen's compensation law of any State, District, Territory, or possession of the United States, which rights and remedies when conferred by such law shall be exclusive; of all seizures on land or waters not within admiralty and maritime jurisdiction; of all prizes brought into the United States; and of all proceedings for the condemnation of property taken as prize: *Provided*, That the jurisdiction of the district courts shall not extend to causes arising out of injuries to or death of persons other than the master or members of the crew, for which compensation is provided by the workmen's compensation law of any State, District, Territory, or possession of the United States."

SEC. 2. That clause 3 of section 256 of the Judicial Code is hereby amended to read as follows:

"Third. Of all civil causes of admiralty and maritime jurisdiction, saving to suitors in all cases the right of a common-law remedy where the common law is competent to give it and to claimants for compensation for injuries to or death of persons other than the master or members of the crew of a vessel, their rights and remedies under the workmen's compensation law of any State, District, Territory, or possession of the United States."

Mr. VOLSTEAD. Mr. Speaker——

Mr. GARNER. Will the gentleman yield for a moment? Would the gentleman mind telling the House, for the information of the House, if he has it in mind, what he intends to call up after this bill is disposed of?

Mr. VOLSTEAD. Personally, I intend to call up the commercial bribery bill, but Mr. WALSH has permission from the committee to call up the bill to take care of the Supreme Court reporter. He may call that up——

Mr. GARNER. Either the commercial bribery bill or the Supreme Court reporter bill will be called up after this?

Mr. WALSH. The Supreme Court reporter.

Mr. DOMINICK. Is that the Supreme Court reporter bill?

Mr. WALSH. Yes.

Mr. VOLSTEAD. Mr. Speaker, this legislation was introduced in the Senate and passed there earlier this session. It received a good deal of consideration by the Judiciary Committee of the House, largely because legislation somewhat similar to it had twice been held unconstitutional by the Supreme Court. It was held unconstitutional by a divided court, four to five in each instance. This bill, however, differs from the legislation that was held unconstitutional in this: That it does not include the seamen, the men engaged on board vessels. The object of this bill is to give to the longshoremen the opportunity to take advantage of the different State laws which give compensation in case of injury to employees. It is believed by the committee that with this modification there should be no real objection to the bill. It is true that the Supreme Court has held that the longshoremen are subject to the maritime laws, but the old law was held unconstitutional largely upon the ground that the facts in these cases are such that a uniform rule should be applied to them. It is not believed that this rule applies to longshoremen. You remember the old doctrine that a State may act in regulating interstate commerce if the thing it regulates does not necessarily require a uniform law. It seems to me, as to the people who live in the community and are a part and parcel of the citizenship of that community, that they ought not to be subject to a different rule from any other citizen of that community. I can see very readily that a different rule ought to apply to the sailors that may not belong to that community at all. If a nonresident sailor comes inside of a harbor and is injured while there, there is reason why he should not come under the compensation laws of the State and be entitled to compensation. But as to the men that this bill cover, it seems to me clearly that the State ought to be responsible and that the State ought to pay their damages. There can be no good reason for a distinction between these people and the ordinary citizens of the State. The work of the longshoremen has very little to do with shipping as such. They load and unload vessels, repair ships, and do other work of that kind largely on the shore. It does seem to me that in view of this change in this legislation from legislation held void the Supreme Court will find a way to hold this constitutional. I can see no good reason why shipping interests can not protect themselves under such a law as fully as they might under a Federal law.

There is a very strong demand for this legislation. For months my mail has been filled with communications, not only from the longshoremen or labor organizations but from a great many other people. They feel that these people ought to be permitted to get the benefit of the compensation laws of the States.

Mr. BARBOUR. Will the gentleman yield?

Mr. VOLSTEAD. I will.

Mr. BARBOUR. Does the gentleman think it would be a good idea to extend this same right to workmen in interstate and foreign commerce?

Mr. VOLSTEAD. Well, that is not the question now.

Mr. BARBOUR. Well, it seems to me that the same principle is involved. I am in favor of this bill. I think it is a good one.

Mr. VOLSTEAD. In many States employees in interstate and foreign commerce shift back and forth a good deal like seamen do, and the same objection might be made to such a law as has been made where we endeavored to apply the same law to the seamen as to longshoremen.

Mr. BARBOUR. I am not criticizing the bill, because I think it is a good one, but it seems to me that we could go a good deal further with this good work and take in those in interstate and foreign commerce.

Mr. JOHNSON of Mississippi. Would a cause of action have to arise within a harbor or within the 3-mile limit?

Mr. VOLSTEAD. It would have to arise within the State jurisdiction. That, of course, would be inside the 3-mile limit. The longshoremen seldom get outside the 3-mile limit.

Mr. JOHNSON of Mississippi. It is not intended altogether for longshoremen. Any man can come within the provisions of the law?

Mr. VOLSTEAD. This only provides for longshoremen.

Mr. HUSTED. Will the gentleman indicate what part of the bill is new language?

Mr. VOLSTEAD. In line 8, on first page:

To claimants for compensation for injuries to or death of persons other than the master or members of the crew of a vessel—

And so on.

Mr. HUSTED. Is the proviso on page 2 new language?

Mr. VOLSTEAD. Yes.

Mr. HUSTED. That is all new language?

Mr. VOLSTEAD. That is all new language.

Mr. HUSTED. What is the new language in section 2?

Mr. VOLSTEAD. The corresponding language in section 2.

Mr. BARBOUR. Will the gentleman yield for a question?

Mr. VOLSTEAD. I will.

Mr. BARBOUR. I notice that the language of the bill reserves to claimants for compensation for injuries to or death of persons other than the master or members of the crew of a vessel the rights and remedies under the workmen's compensation law of any State, district, Territory, or possession of the United States. Does that mean this, that if a man should be injured, say, in the port of Philadelphia, and the New York compensation law would be more favorable than the Philadelphia law——

Mr. VOLSTEAD. Certainly not. He would not have the right to compensation there. We have no power to confer any such right. We simply seek to withdraw Federal control over these particular cases, the same as we did to liquor in the Webb-Kenyon Act.

Mr. BARBOUR. I have known of cases where railroad men who had been injured in one State had brought suit in other States.

Mr. VOLSTEAD. That might be done because they found the defendant there.

Mr. DYER. Will the gentleman yield for a question?

Mr. VOLSTEAD. I will.

Mr. DYER. Was the Senate bill reported to the Senate by the Judiciary Committee of the Senate?

Mr. VOLSTEAD. It was.

Mr. DYER. Notwithstanding the fact that the Supreme Court had declared it unconstitutional three times they overruled the Supreme Court?

Mr. VOLSTEAD. I do not think they intended to overrule the Supreme Court. They intended to draw a bill that would sufficiently distinguish this legislation from former legislation.

Mr. DYER. This bill as now drawn will, in the gentleman's opinion, take care of the objections raised by the Supreme Court previously?

Mr. VOLSTEAD. We hope so. There is good reason to believe that the court will hold it valid. Of course, in cases where the court divide almost evenly and there is a real demand for the legislation, Congress, even if it is not absolutely convinced, would, it seems to me, be justified in resubmitting it; that is, if it has good reason to believe that it is constitutional.

Mr. CHANDLER of New York. I would suggest that the Johnson amendment of April, 1916, was held unconstitutional on the ground that it sought to apply the compensation laws of the States to injuries arising in interstate commerce. It tried to confine them to peripatetic men, men moving about, instead of to such as longshoremen. This confines it to the longshoremen and meets the objection of the Johnson amendment, on which it was declared unconstitutional.

Mr. DYER. I am in favor of the bill. The reason I rose was to inquire if the Judiciary Committee of the Senate reported the bill when there was apparently some question as to its constitutionality.

Mr. VOLSTEAD. Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Kentucky [Mr. THOMAS], the ranking member of the Committee on the Judiciary.

Mr. THOMAS. I reserve my time, Mr. Speaker.

The SPEAKER pro tempore. The gentleman from Kentucky reserves the balance of his time.

Mr. VOLSTEAD. Mr. Speaker, I yield five minutes to the gentleman from Pennsylvania [Mr. GERNERD].

The SPEAKER pro tempore. The gentleman from Pennsylvania is recognized for five minutes.

Mr. GERNERD. Mr. Speaker and gentlemen of the House, I wish to say that I am quite familiar with the provisions of this bill and its intended operation. A great deal of difficulty has existed in getting proper recognition by claimants who have been injured and who have been deprived of proper compensation. In line with this bill I have been working ever since I have been here trying to draft a bill to cover similar injustices so far as railroad employees are concerned.

After a practice of 15 years, each year I have had the experience of representing persons employed on the railroads who are injured by the same and invariably were deprived of the provisions of the workmen's compensation laws of the State of Pennsylvania because of the fact that they were engaged in interstate commerce.

I am going to give you an illustration of the case of a flagman on a freight train that had stopped at a little village called Alburtis to let a passenger train pass. It was at midnight, and the freight train moved on, but discovered after they had gone some distance that their flagman was missing. They ran back and found the flagman lying along the track, killed. The man left a widow and six children, and the matter was brought up before the referee of the Workmen's Compensation Board of Pennsylvania. There was no evidence as to how he was killed, excepting the violent physical injuries that appeared on the man's person, and that case was dismissed on the ground that he was engaged in interstate commerce, and his widow was deprived of any right, either under the Federal law or under the State compensation law.

Mr. STEVENSON. Mr. Speaker, will the gentleman yield?

Mr. GERNERD. Yes.

Mr. STEVENSON. If it came within the Federal compensation act she certainly was entitled, if he was killed while engaged in interstate commerce.

Mr. GERNERD. My good friend, I can not agree with you. I just want to point out to you that a situation like that ought to be covered by legislation, just as this bill is going to protect the longshoremen.

Mr. BARBOUR. Mr. Speaker, will the gentleman yield?

Mr. GERNERD. Yes.

Mr. BARBOUR. I would like to state that I have introduced a bill along that same line, which is now pending before the Committee on the Judiciary, providing that a man injured in interstate commerce can be covered by the laws of the State in which the injury was incurred.

Mr. GERNERD. I have considered the matter for some time and have taken it up with a number of lawyers, but there seems to be a difference of opinion. My thought is that where there is a workmen's compensation act within a State, the person injured should be given the alternate right either to sue or make his claim under the provisions of the workmen's compensation law of that State or take his chances under the Federal compensation law, but that he should not take advantage of both. He must make his selection either under the one or the other. Therefore I feel that this present bill is a most meritorious one and that the legislation covers a class of injuries that have been mighty cruel in their effects. [Applause.]

Mr. VOLSTEAD. Mr. Speaker, does the gentleman from Arkansas desire to use time on the bill?

Mr. TILLMAN. No, sir; but I desire to yield 10 minutes to the gentleman from Texas [Mr. BRIGGS].

The SPEAKER pro tempore. The Chair will ask whether the gentleman from Kentucky [Mr. THOMAS] is in charge of the time?

Mr. TILLMAN. Yes. The gentleman from Kentucky designated me to represent him.

Mr. BRIGGS. Mr. Speaker, I feel that this legislation is of the highest importance and ought to be passed without further delay.

The compensation acts in various States bordering on the sea, including that of my own State, have been made applicable to longshoremen, dock workers, and others engaged in longshore work; but in view of recent decisions of the Supreme Court so much confusion and uncertainty as to the operation of those provisions has resulted that the authorities of the State do not know what course to pursue. Men who are injured are left, apparently, without any knowledge whether their course of procedure is under the compensation act of the State, which attempts to regulate the subject and control it, or whether they must or can go into the courts for relief. This bill clarifies the situation and allows the State laws to operate in such cases.

In view of the recent decision of the Supreme Court of the United States in the case of the Western Fuel Co. against Garcia, decided on December 5, 1921, which limits the previous decisions of the same court in the Jensen and Knickerbocker Ice Co. cases, and in view of the restricted character of the bill I believe that the objections heretofore raised have been overcome, and that the power of the State to include those engaged in longshore work within the terms of the workmen's compensation acts can be recognized as valid and not in conflict with the maritime law and admiralty jurisdiction of the United States, and does not destroy the uniformity of such maritime law.

Many compensation claims which are recognized as worthy and in many cases have actually been allowed have been denied the further benefit of the State compensation acts until Congress has taken some such action as is contained in the present bill; and the Industrial Accident Board of my own State, as well as others interested, have urged the adoption of legislation of this character in order that the relief provided by the State laws for those injured in longshore work may be awarded in all cases where it is payable, with the assurance that the action of the State is recognized by the Federal Government as not in conflict with the authority of the United States.

I take occasion to read from a letter dated December 29, 1921, written to me by the Industrial Accident Board of Texas, which is as follows:

INDUSTRIAL ACCIDENT BOARD, STATE OF TEXAS,
Austin, December 29, 1921.

Hon. CLAY STONE BRIGGS,
Galveston, Tex.

MY DEAR SIR: When the Texas Legislature originally enacted the law commonly referred to as the workmen's compensation act, it was believed it afforded protection to those employees residing in the various shipping ports of the State whose duties required performance of labor on occasons upon steamboats resting at anchor in the navigable waters, and compensation, for a time, was paid by various compensation insurance carriers to such employees who suffered injury while engaged in the performance of such duties, and to the surviving beneficiaries of deceased employees who had suffered fatal injury while engaged in the performance of such duties. Payments continued until the Supreme Court of the United States rendered an opinion holding that compensation acts of the various States were inoperative in so far as they attempted to provide a rule of recovery for injuries inflicted under maritime and admiralty jurisdiction. Since the final rendition of the opinion mentioned, workmen, such as longshoremen and local repairmen at the docks, are in the unfortunate position of being denied the protection afforded by the compensation act of the State, and they must look

alone for recovery to the rules of admiralty law. This necessarily works a very great hardship upon such workmen who suffer injury and upon the beneficiaries of such workmen who meet death in the course of their respective employments.

There is now pending in the House of Representatives a measure that is designed to relieve the situation that results from the declaration of the law through the opinions of the Supreme Court of the United States. It is believed by the sponsors of that measure that its enactment will accomplish the desired ends, and that in the event it is finally enacted into law that the various compensation acts of the country, including the act of Texas, may be relied upon by the classes of employees mentioned for relief.

You are therefore very earnestly urged to give to the above measure your earnest support, as it is hoped that its enactment will prove of great benefit to workers at the deep-water ports in this State.

Yours very respectfully,

INDUSTRIAL ACCIDENT BOARD,
By J. H. FOWLER, *Chairman*.

The Federal Government has not at yet enacted any Federal workmen's compensation act of general application, and this legislation now proposed to be passed in the pending measure can in no wise be regarded as doing anything more than according to the various States recognition of their right to deal with the question in a just and fair way for those of their citizenship who suffer from injury and for whom the respective States desire to provide means and opportunity for receiving compensation.

The SPEAKER pro tempore. The gentleman from Texas asks unanimous consent to revise and extend his remarks. Is there objection?

Mr. CHANDLER of New York. Mr. Speaker, I make the same request.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas yields back the remainder of his time.

Mr. VOLSTEAD. Mr. Speaker, I move the previous question on the bill.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. VOLSTEAD, a motion to reconsider the vote whereby the bill was passed was laid on the table.

PRINTING AND DISTRIBUTION OF SUPREME COURT REPORTS.

Mr. WALSH. Mr. Speaker, by direction of the Committee on the Judiciary, I call up the bill H. R. 11450, and ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. The gentleman from Massachusetts calls up the bill H. R. 11450. The Clerk will report it.

The Clerk read as follows:

A bill (H. R. 11450) to provide for the printing and distribution of the Supreme Court reports, and amending sections 225, 226, 227, and 228 of the Judicial Code.

The SPEAKER. The gentleman asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. WALSH. Mr. Speaker, this measure is made necessary principally because the provisions of the existing law fix the price at which the official reports of the Supreme Court decisions shall be sold at such a figure that the reporter who now has the publishing of them under a contract is not able to enter into a contract for the printing of them. The law provides that they shall be sold at $1.75 a volume. The committee have had hearings on this and have heard the Chief Justice, and we have amended the provisions of the Judicial Code in several material particulars. First, we have provided that the printing, if done under contract, shall be done only after competitive bids have been secured, and that an award of a contract shall be made only after an estimate has been procured from the Public Printer, and the Public Printer's estimate is more than the bid, or the Chief Justice shall certify that it is for the public interest that the printing shall be done in a private establishment. We have now fixed the salary of the reporter of the Supreme Court at a definite sum, namely, $9,000. Under the existing arrangement he gets $4,500, and he has been receiving a part of his compensation from the printing establishments with which he makes the contract. They publish a certain number of volumes and they allow him a certain amount upon the number of volumes sold. The committee felt that it was unwise and not good policy to continue that practice, that this is an important public official, and that he should be paid from the Treasury of the United States. We further provide that if this printing is done under private contract the volumes shall be turned over to the Public Printer, together with the plates, the proofs, and all the appurtenances thereto, and that these volumes shall be sold by the Superintendent of Public Documents at a price to be fixed by him to cover the cost and a sufficient amount in addition to pay at least half the expenses of the reporter and the allowances which we provide.

We further provide that if the volumes are to be printed in the Government Printing Office they shall likewise be sold by the Superintendent of Public Documents, and that he is required to turn over to the Attorney General a sufficient number of these volumes to make the distribution required by law.

Mr. RAKER. Will the gentleman yield?

Mr. WALSH. If the gentleman will pardon me for just a moment, then I will yield. The subcommittee of the Committee on the Judiciary, of which I have the honor to be chairman, must plead guilty to the delay which has ensued in taking action upon this measure. It was brought to our attention several months ago, before the present contract expired. It was a five-year contract. Since that time, because of the inability of the reporter to enter into a new contract with the publisher, he has been without any compensation since October 1; and recently, there being no contract, the Treasury Department cut off the allowances which he has under the law for rent and clerical assistance.

Mr. RAKER. Right in that connection——

Mr. WALSH. Now, I yield to the gentleman from California.

Mr. RAKER. Some suggestion has been made about the salary of the reporter being excessive. Let me ask the gentleman if it is not a fact that the reporter prepares the manuscript of the volumes that are to be printed?

Mr. WALSH. Yes; I was about to refer to the amount of the salary. There was some difference of opinion in the committee as to what the salary of this reporter should be. The reporter of the Supreme Court, as I stated, is a very important official. He has to verify every opinion which is written by the justices of that court. He has to check up the citations which they make. He reads the proofs, I think he stated two or three times, and he has to write the syllabus for each case. And as the gentleman from California appreciates, in the reports of the court of last resort of the Nation it is necessary that the syllabus of the case be prepared with great care and particularity.

Mr. RAKER. Do not the members of the court rendering the opinions assist in preparing the syllabi?

Mr. WALSH. They do not assist in the preparation of the syllabus, but the syllabus when prepared is submitted to the justice rendering the decision, and sometimes corrections are made in accordance with the suggestions of the justices.

Mr. RAKER. Before the syllabus is published?

Mr. WALSH. Yes.

Mr. RAKER. That is what I mean.

Mr. WALSH. Yes; it is submitted to the justice delivering the opinion for his approval.

Now, the clerk of the Supreme Court is paid $6,000 from the Treasury and $3,000 from the receipts of the court. Prior to this year the clerk of the court in some years got as high as $12,000 or $14,000, and I think in one year he got more than the Chief Justice of the court received.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. WALSH. I yield to the gentleman from Mississippi.

Mr. JOHNSON of Mississippi. What becomes of the $10 charge which is made for the swearing in of attorneys when they are admitted to practice in the Supreme Court?

Mr. WALSH. Under the order of the court now that is turned in to the receipts of the court and all over and above what is necessary for printing, stationery, and certain expenses of the court is now by order of the court covered into the Treasury.

Mr. JOHNSON of Mississippi. My information was that that went to the clerk.

Mr. WALSH. It did until recently. And I may say in passing that the subcommittee of the Judiciary Committee took that matter up personally with the Chief Justice, and we held a hearing upon a bill which has been introduced by the gentleman from West Virginia [Mr. GOODYKOONTZ] seeking to fix these fees. The committee were satisfied that under the order which had been issued by the court no legislation was necessary, as the clerk now gets only a stated amount for his salary, namely, $6,000 from the Treasury and $3,000 from the receipts of the court. So we have fixed the salary of the reporter of the court at $9,000. It was the opinion of most of the committee that this work requires most careful scrutiny of this official and that the responsibility resting upon him, although of another kind, was fully as great as that resting upon the clerk of the court.

Mr. RAKER. Will the gentleman yield?

Mr. WALSH. Yes.

Mr. RAKER. In this connection the gentleman might give us the information which has been in my mind for some time. Does the reporter furnish the companies that print the advanced sheets of the Supreme Court reports; does he furnish the manuscript from which they print those advanced publications?

Mr. WALSH. The gentleman means the law-publishing firms?

Mr. RAKER. Yes.

Mr. WALSH. No. Under existing practice—and it is to be permitted under this law—pamphlet installments of the decisions are to be printed. Little booklets of opinions of the Supreme Court in a single case are printed, as I understand it, by the same office that prints the original decisions of the justices. Those are printed within three or four days after the decision is rendered and are available for distribution. The West Publishing Co. and other publishing concerns get the opinions from that booklet.

Mr. RAKER. After you let the contract under the provisions of this bill to some particular firm to do the printing, which occurs to me wise, will this printer have protection from other publishers, or will there be any monopoly?

Mr. WALSH. The printer will not get any monopoly. He will be paid for doing the actual work, and after the actual work of printing is done all of the sheets become the property of the United States, including the plates, books—everything is turned over to the Government Printing Office.

Mr. RAKER. So there will be no monopoly?

Mr. WALSH. No. Previous to this there has been, but the committee felt that that policy ought not to be continued.

Mr. RAKER. The committee found that in the past there has been a monopoly and that the printed decisions have been more expensive than they should have been.

Mr. WALSH. I would not say that they had been more expensive; they have been sold for cash at the price fixed by law, but under the interpretation of the publishers and the reporter, if it was not paid for at the time, they held that they could charge $2.30 for them, and even under that arrangement the present publisher was unwilling to renew the contract. This company which has been printing them—the Banks law firm in New York have been printing the volumes for the last 40 or 50 years. Of course, they have been doing it under a contract running for 5-year periods, entered into between the reporter and this publishing concern.

Mr. RAKER. I understand also that the general mechanical appearance of the reports will be in the future, as they have been in the past, the original official volume. They are the most readable volumes you can find in a library.

Mr. WALSH. Yes; the gentleman will notice that in the first section of the bill it is set forth that the style, form, and type shall be subject to the approval of the court. I am advised that it is their intention to keep the style of the volumes the same as it has been in the past, both as to the size of type and the kind of paper, and so forth.

Mr. RAKER. I am glad of that, because some of these publications, which I am not criticizing, publish reports that you can not read, and you might as well throw them in the wastebasket.

Mr. WALSH. I think that is true, and a great many are thrown into the wastebasket; but, of course, no one would throw a volume of the Supreme Court reports into the wastebasket, and particularly if they are prepared in the manner and in a way which would appeal to a learned attorney like my distinguished friend from California.

Mr. RAKER. If any lawyer gets able to buy a set of Supreme Court reports, it is the best expenditure of money that he can make.

Mr. WALSH. Now, I want to direct the attention of the House to an amendment which the committee has agreed to and for which I claim no particular credit. It was put in at the suggestion of the gentleman from South Carolina. It is to this effect: That when a contract is entered into there shall be no provision in the contract which will permit the reporter or any of his assistants to receive from the contractor or printer anything by way of additional or further compensation, such as has been done and continued for many years in the past. We further provide an amendment to the last section that while the act shall be effective as of November 1, because since that time the reporter has not been able to receive any compensation or salary, there shall be deducted from it anything allowed him for rent or clerical assistance or for telephone.

One further point, we have insisted that the reporter shall be given a room located in the Capitol convenient to the Supreme Court. At the present time he has an office down town. We believe that the reporter of a court should be located conveniently to the court room, which is in the Capitol, and we have put in a provision so that the authorities in charge of that section of the Capitol Building must see to it that the reporter is furnished with suitable quarters adjacent to the court room with suitable furnishings.

Now, unless there are further questions, I have nothing further to say about the bill.

The SPEAKER pro tempore (Mr. HUSTED). The Clerk will read the bill for amendment.

The Clerk read as follows:

SEC. 2. That section 226 of the Judicial Code is hereby amended to read as follows:

"SEC. 226. The salary of the reporter shall be $9,000 per annum, payable out of the Treasury in monthly installments. He shall also be allowed for professional and clerical assistance and stationery not to exceed $4,500 per annum, to be paid upon vouchers signed by him and approved by the Chief Justice. He shall be furnished a room in the Capitol, with suitable furniture, convenient to the space occupied by the Supreme Court and the law library thereof."

With the following committee amendment:

Page 3, line 13, after the word "installments," insert: "which shall be in full compensation for the services required by law; and neither the reporter nor any assistants shall receive further or additional compensation by reason of any contract entered into under the provisions of section 225 of the Judicial Code as amended by this act."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. DOMINICK. Mr. Speaker, I move to amend, on line 11, page 3, by striking out "$9,000" and inserting in lieu thereof "$7,500."

The SPEAKER pro tempore (Mr. HUSTED). The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as folows:

Amendment offered by Mr. DOMINICK: Page 3, line 11, strike out "$9,000" and insert in lieu thereof "$7,500."

Mr. DOMINICK. Mr. Speaker, this bill and its object has been very fully and thoroughly explained by the gentleman from Massachusetts [Mr. WALSH], who has the bill in charge. It is a proper bill and should have been passed some time ago, to correct what might be called the loose practice which has been going on for a good long while in the publishing of our official reports and in the compensation for the Supreme Court reporter. However, in fixing this, I think we should be mindful of what has taken place in the past, and if we are going to correct the present plan as it now is we should not make it any worse than it has been. Up to this time, and in my opinion without any authority of law whatsoever, the reporter of the Supreme Court, for probably 40 years or longer, has been permitted to enter into a private contract with the publishers of these official reports, for which he has received from $6,000 to $6,500 a year in addition to a salary of $4,500 allowed by law. I do not mean to charge that the present reporter or any other has been willfully violating the law in making such a private contract. They were only following in the footsteps of their predecessors, and it was a practice that should have been stopped. That is what we propose in this section of the bill, by inserting the amendment which has been explained by the gentleman from Massachusetts, absolutely prohibiting the reporter from accepting any additional compensation by reason of the publication and printing of the reports.

The salary of the reporter under the present law is fixed at $4,500 per annum. Under the contract which he has had with the publishers he has been receiving, as I have stated, $6,500 per annum in addition to that. He is allowed by law some $1,200, I think, in cases where there is more than one volume of reports issued per term of court, and, as I understand it, now the usual number of volumes issued to carry the decisions of the court is three.

In addition to that I think he was allowed something like $1,500 for clerical services, rent, telephone, and so forth, making his total compensation, or his aggregate receipts for all purposes for his services, clerk hire, office rent, and so forth, about $14,000. Now, we come along with this bill, and if we let these figures remain as they are at the present time we will be paying him more than he is receiving under the present contract. In the first place, we provide a salary of $9,000 per annum. In addition to that we propose to give him for clerical and for professional assistance, stationery, and so forth, not to exceed $4,500. We all know that this is a very important position. We all know that it is work which is very careful

and painstaking and the position should be filled by a man of ability. I am sorry that I have not at hand the salaries paid to the reporters of the respective appellate jurisdictions throughout the country. If we had them before us I am satisfied that we would find that none of them anywhere receives anything near approaching the amount allowed to the Supreme Court reporter in this bill.

The SPEAKER pro tempore. The time of the gentleman from South Carolina has expired.

Mr. WALSH. Mr. Speaker, I ask unanimous consent that his time be extended for five minutes.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. DOMINICK. This bill allows him $1,500 more than the salary of a Representative in Congress or a Senator, and $4,500 in expenses is allowed, which is excessive, according to the statement of the reporter himself. In his testimony before the Committee on Appropriations in rendering a detailed statement of the total expenses of the office of the reporter for the years 1916, 1917, 1918, 1919, and 1920 we find that in 1916 for clerical hire, office rent, telephone, stationery, and miscellaneous he expended $2,737.54; for 1917, for the same items, $2,886.49. In 1918, for the same items, $3,001.90; in 1919, for the same items, $3,239.14; and in 1920, for the same items, $3,170.68. Yet by this bill we propose to give him $9,000 salary and an expense account of $4,500, and in addition to that furnish him an office in the Capitol, which ought to be done, and with which proposition I am in hearty accord, rent free, telephone service, and in all probability his stationery will be furnished by the court. As I say, we allow him $4,500 expenses, which is $1,400 more expenses than he spent for the year 1920.

These are small items, and some one might suggest that it is foolish to take up the valuable time of the House in moving a reduction of $1,500 in this salary. However, we have to keep things down somewhere, and in view of these circumstances I hope that the amendment which I have just offered will be adopted, and that the one which I shall subsequently offer, without debate, reducing the expense account to $3,500 instead of $4,500, will also be adopted.

Mr. WALSH. Mr. Speaker, just a word with reference to the gentleman's contention. The salary of the reporter of the court is fixed at the same figure as I stated before as the clerk receives. While I agree with the gentleman that the salaries of public officials should not be fixed by Congress at any exorbitant figure, I feel that when we consider we are dealing with the third coordinate branch of our Government—the judiciary, the Supreme Court, which is established in the Constitution—we ought to fix a salary for that very important position which will make certain that the court will be able to get a competent and efficient man for the work which it is necessary for him to do. It is true that the amount expended for allowances heretofore has been less than what is fixed in this bill, but heretofore the amount allowed has been paid to the reporter. We now provide that none of this money for clerical and professional assistance is to be paid except upon a voucher approved by the Chief Justice of the Supreme Court, and the $4,500 is a maximum. It was felt, in view of the radical departure in the matter of policy which this bill inaugurates, that we ought not to be in the position of appropriating a sum which might, under certain circumstances, restrict the court.

And so the original proposition, as my friend from South Carolina will recall, was to fix the salary of the reporter at $10,000 and to allow him $3,500 for professional assistance, $1,500 for stenographic assistance, and $1,200 for rent and telephones, and so we have reduced the figures materially, and it was felt that in view of the testimony brought out before our committee and the statement of the Chief Justice of this great court that it would be very seemly indeed if we accorded the figures which were suggested as being adequate.

Mr. CAREW. Will the gentleman yield?

Mr. WALSH. I will.

Mr. CAREW. Is not this salary larger than the salary of a district or circuit judge?

Mr. WALSH. The salary is the same as the circuit judge; it is larger than a district judge. But you pay your supreme judges in New York more than we pay the Chief Justice of the United States Supreme Court.

Mr. CAREW. Of course that is true.

Mr. WALSH. We pay in Massachusetts our reporter a fixed sum and furnish him with all his assistants and quarters, so the total expenditure in Massachusetts for the reporter of the supreme court of Massachusetts is more than the salary of a judge of the superior court.

Mr. CAREW. The gentleman does not think it requires a more talented man for this duty than for a district judge who sometimes presides over the trial of a man for life?

Mr. WALSH. No; but the gentleman must understand that the person holding this position is in a way required to devote himself to this work, and the results of his efforts do not appear, and if it is desired to keep up the standard which has been kept heretofore, and particularly in view of the fact that the reporters under the arrangement that has existed in the past have received much more than this, the committee felt that the salary of the reporter ought at least be equal to that of the clerk.

Mr. CAREW. Does not the gentleman think that the judges of the Supreme Court ought to have known what was going on in their household all these years?

Mr. WALSH. They did.

Mr. CAREW. Do I understand the gentleman to say they knew of this situation?

Mr. WALSH. Absolutely. It has been carried on by every reporter of the court since practically they began printing their decisions.

Mr. CAREW. Does not the gentleman think the practice has been very short of a sort of petty graft?

Mr. WALSH. No; I do not think it was petty graft. I think it was rather unfortunate practice to indulge in, but you must recollect that the reporter was required to publish this volume to be sold at a certain price, and if there was more than one volume he was only allowed a certain amount in addition, and if there was a third volume, as there has been for a good many years, he was allowed nothing in addition, and he had to put in all that work for what he was getting under the contract. I do not care to characterize it as any sort of graft, but I think it was a practice that should not be permitted to continue, and I think the gentleman will agree with me that if we have a public official, even though he be connected with the judiciary branch of the Government, that the people should know what his salary is and how much it is costing the taxpayer, and nobody else ought to contribute to the compensation. That is what this bill accomplishes, and for the reason that the Supreme Court clerk gets more than district judges, and that this man has very responsible work to do, we did not think this was an exorbitant salary.

Mr. CAREW. Mr. Speaker, I offer a substitute for the amendment of the gentleman from South Carolina. Strike out the figures "$9,000" and insert "$6,000."

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Mr. CAREW offers as a substitute for the amendment offered by Mr. DOMINICK: Page 3, line 11, strike out the figures "$9,000" and insert in lieu thereof "$6,000."

Mr. CAREW. Now, Mr. Speaker, in view of the remarks of the gentleman from South Carolina, and also in view of the very fair remarks of the gentleman from Massachusetts, I think those of us who have been familiar with the situation which developed in the Supreme Court in regard to this office of reporter ought to do what we can to cut this thing down to a reasonable amount. A district judge of the United States, who presides over litigation that may involve life or any amount of money, gets $7,500 a year. He only got the $7,500 within very recent years; he used to work for $6,000 a year. A circuit judge, who sits on a circuit court of appeals, gets $9,000, and he used to get $6,000 a year. Of course, those of us who are lawyers know that this gentleman who acts as reporter of the Supreme Court is not a great deal more than a proof reader.

Mr. WALSH. Will the gentleman yield?

Mr. CAREW. Yes, sir.

Mr. WALSH. Does the gentleman know of any proof reader anywhere who is able to write a syllabus of any decision of a court?

Mr. CAREW. I know a great many law students and law clerks who can write very good syllabi and, of course, the gentleman knows that this syllabus is submitted to the justice who wrote the opinion, and he revises it. Now, I do not believe that this man earns $9,000 when you compare what he does with the work that district judges and circuit judges do. I think he will be amply compensated if he gets $6,000 a year and gets all of these expenses he used to pay out of his fees and perquisites, and which will now be paid for him by the Government. He will be amply paid if he gets $6,000 a year. That is all that I desire to say.

Mr. HUSTED. Mr. Speaker, I happen to be a member of the Subcommittee of the Committee on Appropriations which heard

the testimony of the United States Supreme Court reporter touching his compensation, and we found a rather peculiar state of affairs. He receives a salary fixed by the statute. He also receives a certain amount for expenses. In addition to that, he has the right to let a contract for the publication of the Supreme Court Reports, and he exacts from the publishers, the Banks Publishing Co., a considerable part of the contract price for the privilege of printing the reports.

I do not mean that he did anything illegal, but it was mighty bad practice, and this amendment is a great improvement upon existing law. Of course, the publishing house wanted the business because it was fine publicity for any publishing house to have its name on the reports of the highest court in the United States. The publishing house took the contract at a very low price. It undoubtedly did not make any money on it; and then in order to make enough out of it to cover expenses proceeded at once, as I think, to evade the law in the most palpable way. In other words, the statute fixes the price at which the reports can be sold, but the publishing house tried to get around it by saying, "If you come here and buy one of these reports over the counter, we will sell it to you at the statutory price; but if you live up in the country and want one of these reports sent to you, we will just about double the price." I believe they have no right under the statute to take any more than the statutory price plus the necessary cost of transporting the volume through the mails and the cost of wrapping for shipment.

Now, as the result of these different methods of securing compensation, I found the reporter last year got about $12,000 for his services. The reporter for the Court of Claims gets $1,000 a year for his services, and he reports one big volume of decisions—a good deal bigger than any one of the Supreme Court reports—and he does exactly the same kind of work, although, of course, it is not so important, because the court is not so important and because the decisions are not the last word, as are the decisions of the United States Supreme Court. But, nevertheless, he had more actual work to do in preparing one volume of the decisions of the Court of Claims than the reporter of the United States Supreme Court had in any one volume, because there are a great many more pages of Court of Claims decisions than in any one volume of Supreme Court decisions. We found, in addition, that for the past few years the reporter has been getting out three volumes of United States Supreme Court decisions, and he found a way in the law to get paid for the third volume. He would furnish two volumes free of charge but he insisted upon payment for the third volume, even when that was to be delivered to the departments of the United States Government.

Mr. CAREW. Will the gentleman yield?

Mr. HUSTED. I do.

Mr. CAREW. Is that the man who is now in the office?

Mr. HUSTED. That is the man who is now in the office; and I do not charge him with any violation of law. I believe he had a right to do what he did under a strict interpretation of the statute. I am not finding fault with the man so much as I am finding fault with the vicious system under which this work has been carried on. I do not believe that $6,000 is adequate compensation of the reporter of the United States Supreme Court, but, on the other hand, I believe that $7,500 is fully adequate, and I feel that if the amendment offered by the gentleman from South Carolina [Mr. DOMINICK] is adopted we will be doing the right thing and will fix the compensation at a fair amount. I believe that $9,000 would be excessive.

Mr. CAREW. Will the gentleman yield?

Mr. HUSTED. I do.

Mr. CAREW. Do you not think that the man ought to be removed from his office by the judges of the Supreme Court?

Mr. HUSTED. I am convinced that the Supreme Court knew everything that was going on, and I am convinced he was acting within the law.

Mr. CAREW. If I had not known about him, I would have made some inquiry.

Mr. WALSH. I would like to have a moving picture of the gentleman doing so.

Mr. CAREW. I suppose it will be impossible with the present composition of the House of Representatives and the Senate.

Mr. WALSH. It certainly would if the gentleman from New York was to start anything of that kind.

Mr. CAREW. It would be in line with the policy of the House and of the Senate as at present constituted.

Mr. VOLSTEAD. Mr. Speaker, I realize that Members may differ as to what this compensation ought to be. It is argued that if the judges of the district court get only $7,500, that ought to be enough. Now, we have thousands of lawyers all over this country that would be qualified to fill positions as judges, but there are but a very few men that can satisfactorily fill a position of this kind.

Mr. DOMINICK. Will the gentleman yield?

Mr. VOLSTEAD. I have only five minutes. It does take something besides simply a knowledge of law. A reporter has to have considerable training along entirely different lines from that of a judge. He must draw the syllabi in the cases decided by the Supreme Court. It does take a man of very good judgment to be able to determine definitely just what an opinion does decide. It is true that syllabi are submitted to the Supreme Court judges, but the judges do not, as a rule, pay much attention to them. The reporter has to go through all the cases and consider every feature of them; he has to be very accurate, check every citation, and index each volume. The work is one requiring special training, and the man must have the entire confidence of the court. I believe there is no question but that a court reporter ought to get something more than $7,500.

The SPEAKER. The question is on the amendment of the gentleman from New York [Mr. CAREW] to the amendment offered by the gentleman from South Carolina.

The question was taken.

The SPEAKER. The amendment is rejected. The question is now on the amendment of the gentleman from South Carolina.

Mr. CAREW. Mr. Speaker, I make the point of order there is no quorum present.

The SPEAKER. The gentleman from New York makes the point of order there is no quorum present. It is clear that no quorum is present.

Mr. WALSH. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The roll was called, and the following Members failed to answer to their names:

Andrew, Mass.	Frear	Lineberger	Ryan
Appleby	French	Linthicum	Sanders, Ind.
Atkeson	Frothingham	Longworth	Sanders, N. Y.

Fordney	Lehlbach	Rucker	

The SPEAKER. Two hundred and twenty-four Members have answered to their names. A quorum is present.

Mr. WALSH. Mr. Speaker, I move to dispense with further proceedings under the call.

The SPEAKER. The gentleman from Massachusetts moves that further proceedings be dispensed with under the call. The question is on agreeing to that motion.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors.

The doors were opened.

The SPEAKER. The Chair will state the situation before the House. The gentleman from South Carolina [Mr. DOMINICK]

moved to amend by reducing the salary of the reporter of the Supreme Court from $9,000 to $7,500, and the gentleman from New York [Mr. CAREW] moved to amend that by reducing it still further to $6,000, and the vote first comes on the latter amendment. The Clerk will report the latter amendment.

The Clerk read as follows:

Amendment offered by Mr. CAREW as substitute for the amendment offered by Mr. DOMINICK: On page 3, line 11, strike out "$9,000" and insert "$6,000."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the Speaker announced that the "noes" seemed to have it.

Mr. BLANTON. Mr. Speaker, a division.

The SPEAKER. A division is called for.

The House divided; and there were—ayes 24, noes 72.

Mr. BLANTON. Mr. Speaker, I object to the vote, and make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Texas objects to the vote, and makes the point of order that there is no quorum present.

Mr. WALSH. Mr. Speaker, I make the point of order that there has already been a point of order made, and you can not have two points of no quorum made upon the same vote. The Chair announced previously that the "noes" had it, and the amendment was not adopted. The Chair then stated, "The question now comes on the motion of the gentleman from South Carolina," and it was at that point that the gentleman from New York made the point of no quorum. You certainly can not have two points of no quorum made on the same amendment. There has been a call of the House that disclosed a quorum.

Mr. BLANTON. The other vote was not a vote on this amendment. It was merely a no-quorum call. This is a direct vote, and the vote has disclosed less than 50 votes for and less than 100 votes against, and under the ruling of Mr. Champ Clark, which has been followed by the Speaker, it is held that where there is a direct vote on a proposition and it discloses no quorum, it is always in order to have a roll call on that proposition.

Mr. WALSH. The Chair has announced twice that this amendment has been lost.

The SPEAKER. The gentleman from Massachusetts correctly states that. The Chair did announce, before the point of no quorum was made, that the "noes" had it, and began to state the next question; but the Chair thought that the gentleman from New York was probably trying to attract the attention of the Chair, and the Chair had not noticed him, and therefore he disregarded the Chair's previous statement that the vote had been had. Technically the gentleman from New York [Mr. CAREW] made his point of no quorum too late to secure another vote on his amendment, but the Chair thinking it was accidental allowed another vote, and now advantage is taken of that to secure a no-quorum roll call. The question in the mind of the Chair is whether, a roll call having been just taken and no business having been transacted in between, a point of no quorum can be made; but the Chair is disposed to hold that it can. The Chair does not believe there is a quorum present, and the Chair will sustain the point of order made by the gentleman from Texas [Mr. BLANTON]. The Doorkeeper will close the doors, the Sergeant at Arms will bring in absent Members, and the Clerk will call the roll. As many as favor the amendment offered by the gentleman from New York [Mr. CAREW] will, when their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 83, nays 138, answered "present" 1, not voting 209, as follows:

YEAS—83.

Almon	Deal	Johnson, Miss.	Ricketts
Andrews, Nebr.	Dominick	Kline, Pa.	Sabath
Aswell	Doughton	Lanham	Sanders, Tex.
Begg	Fisher	Lankford	Sandlin
Bell	Foster	Larsen, Ga.	Scott, Tenn.
Benham	Fulmer	Logan	Sisson
Black	Garner	Lowrey	Steagall
Bland, Va.	Garrett, Tex.	Lyon	Stevenson

Mr. Ransley with Mr. Ten Eyck.
Mr. Snyder with Mr. Kincheloe.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the amendment offered by the gentleman from South Carolina [Mr. DOMINICK].

Mr. HUSTED. Mr. Speaker, I ask that the amendment be again reported.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. DOMINICK: Page 3, line 11, strike out "$9,000" and insert "$7,500."

The amendment was agreed to.

Mr. DOMINICK. Mr. Speaker, I wish to offer a further amendment, in line 19, page 3, to strike out "$4,500" and insert in lieu thereof "$3,500."

The SPEAKER. The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. DOMINICK: Page 3, line 19, strike out "$4,500" and insert "$3,500."

Mr. DOMINICK. Mr. Speaker, I just want to call attention to my amendment in a few words. It is to reduce the amount to be allowed to the reporter of the Supreme Court for professional and clerical assistance and stationery. The bill provides that he shall be allowed the sum of $4,500 per annum. My amendment proposes to reduce this amount to $3,500. I do it for the reason, as stated a few moments ago in my general remarks on his salary, that the testimony of the reporter before the Appropriations Committee showed that for the year 1920, which was the year in which the largest amounts were expended by him for clerical assistance, he spent only the sum of $2,441.16 for these items. If my amendment is adopted he will be allowed practically $1,100 more than he spent in the year 1920, the highest amount that he has paid for such services in any year, and I think it is liberal and ample to supply him with sufficient help.

Mr. CANNON. Mr. Speaker, a parliamentary inquiry. Has there been a vote on the $7,500 amendment?

Mr. DOMINICK. Yes; that amendment has been carried. The salary has been reduced from $9,000 to $7,500 by a vote of the House.

Mr. BEGG. Why would not the fair way be to make it $4,500 or such amount as he needs?

Mr. DOMINICK. That is practically allowed by the bill as it is now.

Mr. BEGG. Why does the gentleman need to change it, then, if that is all he can use?

Mr. DOMINICK. The bill allows a maximum of $4,500.

Mr. BEGG. I understand that. What is the damage if you have a provision that it shall be $4,500 or such amount as he requires?

Mr. DOMINICK. The damage is that, according to his own testimony, it is necessary for him to spend only $2,441 for this kind of services in one year.

Mr. BEGG. It might be necessary for him to spend more next year.

Mr. DOMINICK. If it were necessary to spend only $2,441 in 1920, the largest amount he ever expended, why is not $3,500, which is $1,100 more than he has ever expended, sufficient at this time?

Mr. BLANTON. If in the highest year—1920—he spent only $2,441—and that is conceded to be the highest year—why, then, make it $3,500? Why not make it $2,441?

Mr. DOMINICK. I have no objection to making it lower, but I fixed that amount in my amendment to show that I was trying to see that he was amply and liberally provided for, and that he would have sufficient assistance. Furthermore, Mr. Speaker and gentlemen of the House, under the head of "Office rent, telephone, stationery," and so forth, he expended in 1920 $720.52. Those amounts under the terms of this bill are not to be paid by the reporter on account of the fact that, as I stated a few minutes ago, this bill provides that he shall be furnished an office here in the Capitol Building convenient to the Supreme Court, which is a very proper provision, in my judgment. If my amendment is carried I do not see that the reporter, or any one of his apologists, can complain when, under that amendment, he will be allowed $1,100 more than it has been necessary for him to expend in the past for clerical and professional assistants.

Mr. WALSH. Mr. Speaker, the practice heretofore has been to pay the reporter on the lines fixed by law. He has had an office downtown in conjunction with, I think, a law firm where he had the use of the library. Now, under this bill no expenditure can be made without the voucher being approved by the Chief Justice of the United States. Whatever amount is to be expended under this law will have to pass under the approval of the court. It was felt that inasmuch as we were making a departure in the prior practice of the court, that we were fixing a salary which was commensurate at much less than the reporter had been receiving heretofore, we ought to make ample provision for assistance and for the service he necessarily has to have in order to do this important work. In view of the fact that this is a maximum and that no money will be spent unless needed, the committee felt that the provisions of the bill should be adopted.

Mr. DOMINICK. Will the gentleman yield?

Mr. WALSH. Yes.

Mr. DOMINICK. The gentleman knows that when the law fixes a maximum of this kind, the maximum is usually expended.

Mr. WALSH. Sometimes it is and sometimes it is not; it depends on how the expenditure is made. Under this bill I do not believe that the Chief Justice of the United States will be approving any vouchers for expenditures in connection with the issuance of the official reports of the highest court in the land unless the expenditure is warranted.

Mr. RAKER. Mr. Speaker, I move to strike out the last word. Ordinarily it is all right to curtail the salary to be paid to a man, and all right to reduce the expenses allowed him if efficiency can be had. To my mind, outside of the court itself this particular office is one of the most important offices connected with the judiciary in the United States. You can say what you have a mind to about this man being an amanuensis and only a proof reader, but as a matter of fact it requires one of the best-trained legal minds in the country to fill that office. For many years past, and at the present time, it has had some of the best lawyers in the United States. The present incumbent is one of the best lawyers in the United States. He has been an Assistant Attorney General for a number of years, and his work in the Supreme Court has been exceptionally fine. Mr. Knaebel is the present reporter, and those of us familiar with the Western States and the land litigation realize the tremendous work he has had to do and the great success that has followed that work. Now, gentlemen talk as if we were squandering the money. The question is whether a man should be given a reasonable and adequate amount to maintain his office and a proper equipment for his office.

In addition to that this bill provides that the public generally, the lawyers who buy and use these books, pay for this salary of the reporter and all the expenses for maintaining his office. That is provided for on pages 7 and 8 of the bill. That provision reads:

"SEC. 228. The number of bound volumes and advance pamphlet installments, to be printed under the provisions of section 225, shall be determined by the reporter from estimates furnished by the Attorney General and the Superintendent of Documents, and the prices for said bound volumes and pamphlet installments shall be fixed by the reporter with the approval of the Attorney General and shall equal the cost of composition, plating, printing, and binding, and such additional amount as shall equal as nearly as may be one-half the sums appropriated for the salary and expenses of the reporter under the provisions of section 226.

So, as a matter of fact, all of the costs in preparing the decisions of the Supreme Court and, in addition to that, one-half of the expenses of the reporter that attends to that matter and all the expenses of his office is to be added to the cost of the volume to be sold to the people. There would be just as much justice in saying that they should charge enough for the volume to pay the salary of the Chief Justice and Associate Justices of the Supreme Court, for this man is a public officer. But here you are fixing the salary of the reporter to do this work. It requires a high-grade man, a man of years of experience and legal training. You add one-half of his expenses to the cost of the book. As a matter of fact, the books prepared as they are now ought to go to the public at the actual cost of production. So, while you are talking about reducing it, do not cut it to such a small amount as to get an inefficient man in the service and inadequate and improper equipment.

That is not economy. Economy is when you are actually saving and paying for a thing what it is actually worth. Wherever you reduce a salary and get an inefficient man or a poor article that is not economy. If you get poor material and pay less than you do for first-class material, you are not economizing; you are wasting the public money. It is the same way in hiring a man as it is in obtaining an article. Pay a good, fair price and get the best. Hire the best experienced and intelligent man you can get and pay him a reasonable and fair price.

Mr. BLANTON. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. BLANTON. Did the gentleman hear the speech of the gentleman from Kentucky on the amount that this reporter receives?

Mr. RAKER. I was here, as is my usual habit when the House is in session. I say he ought to be paid what he is worth, and he ought to have a good, fair salary. It requires a he man, a man of experience, to do that kind of work and do it properly. If it required a larger sum, and it was necessary, I should vote to pay it to him.

Mr. WALSH. Mr. Speaker, I move that all debate upon this section and all amendments thereto close in five minutes.

Mr. BLANTON. Mr. Speaker, I want to offer a substitute.

The SPEAKER. The gentleman from Massachusetts moves that all debate upon the section and all amendments thereto close in five minutes.

Mr. BLANTON. I hope the gentleman will give us an opportunity to offer a substitute.

Mr. WALSH. Question, Mr. Speaker.

The SPEAKER. The question is on the motion of the gentleman from Massachusetts that all debate upon the section and all amendments thereto close in five minutes.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 92, noes 3.

Mr. BLANTON. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Texas makes the point of order that there is no quorum present. It is clear that there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in absentees, and the Clerk will call the roll.

The Clerk called the roll; and there were—yeas 207, nays 8, answered "present" 2, and not voting 215, as follows:

YEAS—207.

So the motion was agreed to.

The Clerk announced the following additional pairs:

Until further notice:

Mr. Andrew of Massachusetts with Mr. Wright.

Mr. Ansorge with Mr. Campbell of Pennsylvania.

Mr. Atkeson with Mr. Humphreys.

Mr. Bacharach with Mr. Garner.

Mr. Barbour with Mr. Lyon.

Mr. Beck with Mr. Park of Georgia.

Mr. Lineberger with Mr. Garrett of Texas.

Mr. Chandler of New York with Mr. Carter.
Mr. Kelley of Michigan with Mr. Montague.
Mr. Graham of Pennsylvania with Mr. O'Connor.
Mr. Bond with Mr. Crisp.
Mr. Connell with Mr. Hayden.
Mr. Butler with Mr. Oldfield.
Mr. Cole of Ohio with Mr. Linthicum.

The SPEAKER. The Chair will vote.

The Clerk called the name of the Speaker, and he answered "yea."

The result of the vote was announced as above recorded.

A quorum being present, the doors were opened.

Mr. HUSTED. Mr. Speaker, I think the amendment offered by the gentleman from South Carolina [Mr. DOMINICK] a very reasonable one. It provides considerably more money than was expended by the reporter during the last fiscal year in which complete returns have been made, or than has been expended by him in the past, so far as the testimony before the Subcommittee on Appropriations developed the facts. This bill provides $4,500 for professional and clerical services and for stationery. At the present time the reporter employs one assistant. I think he pays him about $1,800 a year, but he does not get all of his time. He permits him to practice law. Under the present law he is compelled to rent an office. The bill provides an office for him in the Capitol, so that he will not be required to pay any rent. The bill also provides for furniture for the office, and that it shall be convenient to the United States Supreme Court. The reporter has from time to time employed some temporary assistants. I think in one year those expenses went up as high as $180, but if you allow this man $4,500 for expenses and deduct $250 for stationery, an ample allowance, he could take the $4,200 left and employ an expert who could do nearly all of the work which the Supreme Court reporter is called upon to do. Three thousand five hundred dollars is ample to cover the necessary and reasonable expenses of the office, provided the reporter himself does his proper share of the work. If you make provision for $4,500, even though the expenditure is to be approved by the United States Supreme Court, I think it only fair to assume that the court, which approved this amount to the Committee on the Judiciary, would approve the full expenditure of that amount if the items were brought in by the Supreme Court reporter.

Mr. VOLSTEAD. Will the gentleman yield for a question?

Mr. HUSTED. Certainly.

Mr. VOLSTEAD. Is it a fact under this language the Committee on Appropriations could limit the appropriations to $3,500 if it saw fit, and this simply is the maximum allowance, so if the Committee on Appropriations should find that $3,500 was sufficient it would not be necessary to appropriate any more, it seems to me.

Mr. HUSTED. Well, I do not know about that——

Mr. VOLSTEAD. Is it not true——

Mr. HUSTED (continuing). You have got a provision here for $7,500 for the salary of the Supreme Court reporter. Suppose the Committee on Appropriations only allowed $7,000. The man would have a claim against the Government for the $500 additional, and he would be sure to get it. The Supreme Court is a law unto itself, so far as the expenses of the court are concerned.

Mr. VOLSTEAD. This is clearly expenses to be approved——

The SPEAKER. The time of the gentleman has expired.

The question is on the amendment offered by the gentleman from South Carolina.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

SEC. 5. That this act shall not affect the existing duties of the reporter of the Supreme Court and the present publisher of its official reports in relation to reports of decisions rendered prior to the October, 1921, term, nor the contractual relations subsisting between the reporter and the publisher: *Provided*, That the existing price limitations governing sales to the public are hereby repealed, and the maximum price at which the Attorney General may purchase is hereby fixed at $3 per copy. The allowance made to the reporter by section 226 of the Judicial Code for clerk hire, office rent, stationery, and contingent expenses shall continue in force until superseded by appropriations for the allowances specified in that section as hereby amended, and thereupon the amounts that shall have been drawn from such existing allowances since October 1, 1921, shall be debited against such new appropriations.

The committee amendment was read, as follows:

Strike out all of section 5 and insert in lieu thereof the following:
"SEC. 5. That the provisions of this act shall be effective as of November 1, 1921: *Provided, however*, That there shall be deducted from the salary and allowances fixed by section 226, as amended hereby, such sums as may have been paid or allowed out of the Treasury to the reporter for work done by him in the preparation for printing and binding of reports of decisions rendered since the opening of the October, 1921, term of the Supreme Court.

"Such sums as may be necessary to carry into effect the provisions of sections 225, 226, 227, and 228 of the Judicial Code as amended by this act are hereby authorized to be appropriated annually out of any money in the Treasury not otherwise appropriated.

Mr. WALSH. Mr. Speaker, I offer an amendment, page 9, line 19, after the figures "226," insert the words "of the Judicial Code." This is an inadvertance in leaving those words out.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 9, line 19, after the figures "226," insert the words "of the Judicial Code."

The question was taken, and the amendment to the committee amendment was agreed to.

The SPEAKER. The question is on the committee amendment as amended.

The question was taken, and the committee amendment as amended was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. WALSH, a motion to reconsider the vote by which the bill was passed was laid on the table.

The SPEAKER. Has the Committee on the Judiciary any further business?

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed the following concurrent resolution, in which the concurrence of the House of Representatives was requested:

Senate Concurrent Resolution 24.

Resolved by the Senate (the House of Representatives concurring), That there shall be printed 5,000 additional copies of Senate Document No. 179, Sixty-seventh Congress, entitled "Report of the United States and Canadian Government engineers on the improvement of the St. Lawrence River from Montreal to Lake Ontario," of which 3,000 copies shall be for the use of the Senate document room and 2,000 copies for the House document room.

SENATE CONCURRENT RESOLUTION REFERRED.

Under clause 2, Rule XXIV, the following concurrent resolution was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

Senate Concurrent Resolution 24.

Resolved by the Senate (the House of Representatives concurring), That there shall be printed 5,000 additional copies of Senate Document No. 179, Sixty-seventh Congress, entitled "Report of the United States and Canadian Government engineers on the improvement of the St. Lawrence from Montreal to Lake Ontario," of which 3,000 copies shall be for the use of the Senate document room and 2,000 for the House document room—

to the Committee on Printing.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 2263. An act to amend the Federal reserve act approved December 23, 1913.

BRIBERY AND OTHER CORRUPT TRADE PRACTICES.

Mr. VOLSTEAD. Mr. Speaker, I call up the bill H. R. 10159.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 10159) to further protect interstate and foreign commerce against bribery and other corrupt trade practices.

Be it enacted, etc., That it shall be unlawful for any person, corporation, partnership, or other organization to give or offer to give to any employee, representative, or agent of another or to a member of his family or to anyone for his use or benefit, directly or indirectly, any commission, money, property, or other valuable thing as an inducement, a bribe, or reward for doing or omitting to do any act or for showing or forbearing to show any favor or disfavor by such employee or agent in relation to the affairs or business of his employer or principal, which affairs or business constitute or directly affect commerce among the States or with foreign nations or in the District of Columbia, or for any employee or agent to solicit, accept, receive, or take, directly or indirectly, any commission, money, property, or other valuable thing as an inducement, a bribe, or reward for doing or omitting to do any act or for showing any favor or disfavor in relation to the affairs or business of his employer or principal, which affairs or business constitute or directly affect commerce among the States or with foreign nations or in the District of Columbia: *Provided, however*, That the foregoing shall not apply to transactions between an employer or principal and his employee or agent.

SEC. 2. That it shall be unlawful for any person, corporation, partnership, or other organization to use or to give to an employee or agent of another, or for any employee or agent to use, approve, or certify, with intent to deceive the employer or principal, any receipt, account, invoice, or other document, in respect of which the employer or principal is interested, which contains any statement which is false, erroneous, or defective in any material particular or which omits to state fully the fact of any commission, money, property, or other valuable thing having been given or agreed to be given to such employee or agent, whenever such document directly relates to a transaction in interstate or foreign commerce or commerce in the District of Columbia.

SEC. 3. That evidence shall not be admissible in any proceeding or prosecution under this act to show that a gift or acceptance of any commission, money, property, or other valuable thing as is mentioned

in this act is customary in any business, trade, or calling, nor shall the customary nature of such transactions be any defense in any such proceeding or prosecution.

SEC. 4. That in any proceeding or prosecution under this act no person shall be excused from attending and testifying or from producing documentary evidence in obedience to the subpœna of the court on the ground or for the reason that the testimony or evidence, documentary or otherwise, required of him may tend to criminate him or subject him to a penalty or forfeiture. But no natural person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he may testify or produce evidence, documentary or otherwise, in obedience to the subpœna: *Provided*, That no natural person so testifying shall be exempt from prosecution and punishment for perjury committed in so testifying.

SEC. 5. That any person guilty of an offense within the purview of this act who shall first report the facts, under oath, to any United States district attorney shall be granted full immunity from prosecution under this act with respect to the offense reported.

SEC. 6. That whoever violates any of the provisions of this act shall upon conviction be punished by a fine of not more than $3,000 or imprisonment for not more than two years, or by both. If a corporation, partnership, or other organization is guilty of a violation hereof, the person or persons through whom the corporation, partnership, or other organization acts shall also be deemed guilty and punished as aforesaid.

SEC. 7. That if any provision of this act shall, for any reason, be adjudged to be invalid, such judgment shall not affect, impair, or invalidate the remainder of the act.

SEC. 8. That the acts prohibited by section 1 of this act are declared unfair methods of competition within the meaning of section 5 of an act approved September 26, 1914, entitled "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes."

SEC. 9. That nothing herein contained shall be deemed to repeal or construed as a repeal of any existing law prohibiting bribery and other corrupt trade practices in interstate and foreign commerce, but that a prosecution under one statute pertaining to such offense shall be a bar to a prosecution for the same offense under another statute.

During the reading,

Mr. BLANTON. Mr. Speaker, I move to strike out the last word after that section.

The SPEAKER. This bill is in the House and the bill has to be first read.

The Clerk continued and concluded the reading of the bill.

Mr. VOLSTEAD. Mr. Speaker, a bill similar to this has been pending in this House for a number of years. When first introduced it was sent to the Interstate Commerce Committee. In the last Congress it was referred to the Judiciary Committee from the Interstate Commerce Committee. It was reintroduced in this Congress. A great many people have become interested in this legislation, as the evil it seeks to eliminate has become better known through various investigations. The Interstate Commerce Commission has been urging legislation along this line for quite a while, and in its report of 1920 it pointed out the evils that had grown up inside the transportation business and urged that something be done for the purpose of correcting them. The Federal Trade Commission has made a number of investigations and a number of suits have been brought in different States involving transactions of this kind. There are in quite a number of State statutes of this kind.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. VOLSTEAD. I will.

Mr. JOHNSON of Mississippi. I do not understand how this affects interstate commerce, I confess.

Mr. VOLSTEAD. It affects both interstate and foreign commerce. It is impossible, it has been stated, to sell anything to ships without paying the captain a bribe, and the amount paid is no bagatelle—it runs from 2 to 5 per cent upon every item that is to be furnished to ships.

Mr. JOHNSON of Mississippi. Where the ship is located and the shipowner or captain, or whoever accepts the bribe, does not the State law affect him?

Mr. VOLSTEAD. In some cases there are no State laws, but in some States there are State laws that cover it.

Mr. JOHNSON of Mississippi. May I ask how many States have no laws of that kind?

Mr. VOLSTEAD. I can not tell the gentleman, because I have not examined definitely as to that, but there are quite a number of States that have laws of this kind.

Mr. BLANTON. To bring the question nearer home I may say in the State of Texas several merchants ship a carload of merchandise to themselves in Texas, and under the present custom before they can get their car placed for unloading they have got to pay the unloading crew from $10, $15, $20, $25, or $50 to get the car placed, and whoever pays the amount to the unloading crew first is the one who gets his car placed first. Does this bill meet that situation?

Mr. VOLSTEAD. Yes. The Pennsylvania Railway System has called attention to it, and has been trying to prevent this evil which has been prevalent in the distribution of their cars throughout the country.

Mr. NEWTON of Minnesota. I do not see how this can not be covered by State statutes. Are not we by the enactment of this legislation invading the States? Here is a case cited by the gentleman from Texas. To use that as an illustration, why can not that evil be corrected right in the State of Texas? Why is it necessary, because it involves an interstate transaction, to make a Federal law and prosecute it in the Federal courts?

Mr. VOLSTEAD. In many instances, I imagine, there is considerable difficulty in getting witnesses in State courts. The Interstate Commerce Commission has urged such a law very strongly and considers it a proper matter for Federal control. I can see very readily that the persons who move back and forth over our railroads may not be easy to secure as witnesses in a State trial. In the Federal court these witnesses can be had. Then this only relates to interstate and foreign commerce. The objection you suggest is just as pertinent as if you objected to the Sherman law, the Federal Trade Commission law, or other like laws. Congress can not afford to take the position that it will not regulate such commerce. It is the special duty of Congress, and not of the State, to protect interstate commerce.

Mr. NEWTON of Minnesota. In the case cited by the gentleman from Texas [Mr. BLANTON] there would not be any occasion for getting men outside of the jurisdiction of the court.

Mr. VOLSTEAD. It might not be necessary in that case.

Mr. NEWTON of Minnesota. Has the gentleman any information for the House as to the complaints by the States or State prosecutors of inability to prosecute because of inability to get witnesses that are outside of the jurisdiction of the State courts?

Mr. VOLSTEAD. I do not know that I have any specific complaints on that score, but I have any number of letters received from business houses all over this country, urging legislation along this line. The very nature of the evil is such that it can not be handled by the States. Business houses compelled to meet this method of competition in the various States where it prevails must pay bribes or go out of business. The evil must be stopped everywhere or it can not be stopped anywhere. Eventually the man who has to buy the goods that are handled in interstate commerce in this fashion must pay this additional charge, and it has gotten so that in many instances the bribe amounts to as much as 5 per cent of the price of the goods.

Mr. BLANTON. Will the gentleman yield right there?

Mr. VOLSTEAD. Yes.

Mr. BLANTON. The gentleman from Minnesota will take notice that at the city of East St. Louis, Ill., the other side of the river, is in another State, in Missouri, and you have to move cattle coming in from Texas and Oklahoma going to East St. Louis across the river. They are stopped across the river, in Missouri, where a crew assumes charge of them in Missouri to take them across. Suppose the gentleman had to pay that crew a certain amount to get his cattle across, or to pay a certain amount to get his car of merchandise placed so that he could unload it—say, in a city like Texarkana, where the main street is the State line between Texas and Arkansas—the gentleman can readily see it needs a Federal statute to reach the situation.

Mr. NEWTON of Minnesota. I will state this, with the permission of the gentleman from Minnesota [Mr. VOLSTEAD]: In Texarkana there are other crimes that are committed, where one witness may live in Texas, and the crime is committed in Arkansas. Now, they certainly get jurisdiction in some way of the witness in Texas, and they could do the same thing in the same way the gentleman has just indicated.

Mr. BLANTON. Under the statute, where felony is committed within a certain distance of the State line, it can be prosecuted in either State. Suppose it is a misdemeanor.

Mr. NEWTON of Minnesota. The gentleman has in mind the distinction between counties and not between States. I know of no statute which would permit States to have dual jurisdiction.

Mr. BLANTON. I meant counties, of course.

Mr. VOLSTEAD. There is dual jurisdiction on State lines along the Mississippi River and some other rivers. A State can go across the river to the other shore.

Mr. COOPER of Ohio. I would like to ask the gentleman from Minnesota if this bill would interfere with the employees on railroads receiving transportation?

Mr. VOLSTEAD. It has not a thing to do with such a case. It has got to be a bribe given by some third person to an employee to influence his action in performing his duty toward his employer. The thing the gentleman speaks of does not come within the scope of this bill.

Mr. COOPER of Ohio. I do not want the gentleman from Texas [Mr. BLANTON] to leave the impression with this House that all the railroad employees in this country ask for a bribe before they will do the work that is assigned to them. Of course, it is true in certain instances that railroad men have

accepted money where there were cars on sidings to be unloaded; but, as a rule, it is not the railroad man that solicits the money. It is the agent for the goods in the car that comes to the railroad employee and says, "If you will do this work for me in a certain length of time I will make it all right." The majority of the railroad employees of this country are honest and law-abiding citizens. I do not like to see the gentleman from Texas leave the impression that they are all grafters and holding out for money.

Mr. BLANTON. The gentleman did not mean to put out any such inference, but they do accept these fees for placing cars. The gentleman will not deny that.

Mr. COOPER of Ohio. As I say, the railroad men do receive little tips for doing this, but it is not because they solicit them, but because somebody comes to them and offers them a certain amount of money for doing the work.

Mr. VOLSTEAD. Let me give you some instances of this practice, as they appear in official reports and court proceedings.

The report of the Select Committee on United States Shipping Board Operations on March 2, 1921, called attention to many instances of overcharges, defective work, and improper material in connection with the repairs to ships, particularly in the New York district, especially with reference to the payment of gratuities or bonuses by repair yards to officers of the various ships. The report states that this custom has been common in marine circles for many years, and there is no question but that it is a vicious practice.

A shipbuilder and owner of a dry dock testified on January 15, 1920, before the House Committee on the Merchant Marine and Fisheries concerning the cost of marine bribery, and stated that there were two concerns at least that would create additional dry dock and repair facilities in one of the principal ports of the east coast if it were not for the fact that it is known that there would be no use unless you wanted to perjure your soul to get into the business.

A former special agent of the Department of Investigation of the Shipping Board testified before the Select Committee on Shipping Board Operations that one man had admitted to him and to the chief traveling auditor that he had overcharged about 60 per cent on $400,000 by reason of the alleged necessity of giving gratuities in the shape of automobiles, whisky, entertainments, and so forth, to captains and stewards. He also referred to another case where $11,000 was carried on the books of a certain firm as gratuities, and stated that he had taken the confessions of stewards who were paid 10 per cent on bills; that the story is so common that the files at 45 Broadway are filled with them; and that they had at that time about 2,000 cases open.

A witness in a proceeding before the Federal Trade Commission testified under oath that the books of the respondent dry dock and shipbuilding company showed, under the heading "Gratuity," expenditures during the years 1917, 1918, 1919, and three months of 1920, in the amounts of $19,229.39, $31,067.97, $29,985.50, and $19,066.31.

A representative of a packing house supplying the marine trade testified under oath that he had given gratuities to captains and stewards; that if he had not given them he would have been out of business; that if he had given them and his competitors had not, they would have been out of business; that they were charged up as merchandise; that the consumer has to pay; that captains and stewards had in some cases solicited short weights under these circumstances.

The representative of another packing house admitted under oath that gratuities amounting to 5 per cent had been given to captains.

A representative of a dry dock and shipbuilding concern admitted under oath that they had paid $8,800 in a year and three months for gratuities, so called. Referring to the practice of ship chandlers giving short weights, he said: "We scrap about that here in Mobile all the time."

A sailmaker admitted under oath that his firm had paid $4,500 in 20 months, and if it had not been necessary to give gratuities to the captains he could have and would have been inclined to make the prices 5 per cent lower. He stated, in substance, that the man who pays the bills ultimately pays the gratuity.

A market man supplying the marine trade admitted under oath that he had given to the captains of schooners and steamers approximately 5 per cent; said that if he had not given the gratuities he would not have supplied the vessels on the next trip; that he could have sold cheaper if he had not given gratuities; that he no longer gives them and figures at a less price.

A ship chandler admitted that he had paid gratuities, charged them up in different ways, considered them overhead, and stated that the captains seldom questioned the prices closely. Also stated that stewards had suggested that short weights or measures be given for the purpose of covering gratuities, but that he had not yielded.

Another ship chandler stated under oath that when you do not give gratuities and your competitor does, the latter gets the business; that it is a universal custom; that the cost falls on the purchaser; that if gratuities were not given it would be possible to reduce the prices; and that gratuities add to the cost of transporting the cargoes.

A marine supply man stated on oath that his firm had tried to eliminate the gratuity business, but that the captains went away and gave their business to competitors; that they had paid the captains from 1 to 5 per cent; that he never saw gratuities paid to such an extent until he came to this country; and that the Government should make it a criminal offense for the captain to receive gratuities.

The bookkeeper and stenographer for the same firm testified on oath that she had paid the captains in a private room used by no one else.

Another representative of this firm admitted under oath that a bill will run anywhere from $50 to $7,000; that they usually give the captain $100 or $200 and charge it to trade discount; that the custom is so old that the captains expect it without demanding it.

A ship chandler admitted under oath that they gave commissions to the captains, the amount depending upon what they made on the transaction; that these commissions have been running from 2½ to 4½ per cent; that 5 per cent is the limit; and when asked how recently he had given a captain a commission, admitted that he had given 3½ per cent, he believed, the day before yesterday.

During the trial of a meat dealer of the District of Columbia, charged with conspiracy to defraud the United States, a corporal of the United States Army, stationed at Fort Monroe, also under indictment, testified that he received from the dealer 3 per cent commission on purchases of about $3,000 worth of meat.

A private, butcher at the post exchange, in charge of the buying in the meat department, admitted that he had been paid $200 by the dealer (seven $20 bills, one $10 bill, and one $50 bill) after he had given an order for about $3,300 worth of goods; that he had noticed that the prices of this dealer were higher than those of competitors; that he had complained of the high prices, and pointed out that 10 ribs of beef were furnished as prime instead of 7, and that the loins of beef had flanks on when they should have been trimmed. Bologna was priced at 28 cents per pound when Swift and Armour were selling it at 18 cents. After the payment of the bribe competition was entirely excluded and purchases from that firm were increased. During the month of November they increased several thousand dollars, $8,000 or $10,000.

The party paying the bribes was sentenced to the Atlanta Penitentiary for 18 months and fined $5,000, but this judgment was reversed by the Circuit Court of Appeals for the Fourth Circuit, the post exchange not being such an institution as that fraud upon the United States could arise from the transactions complained of.

SOAP.

A decree of the Chancery Court of Bradley County, Tenn., finds that the defendant, while in the employ of the complainant, a woolen mill, received from various persons, firms, and corporations, from whom he purchased material, bribes, rebates, and secret profits amounting in the aggregate to $16,570; that as a result of a corrupt agreement to receive commissions on soap bought for the complainant, an inferior grade of soap was supplied, and that the damages sustained by the mill amounted to $53,856.65.

In another civil suit brought by the same mill a witness testified that the customary commission was a cent a pound; that the lowest commission, when any was paid, was one-half cent per pound, and that the highest was 1½ cents per pound. He also testified that it was customary to put one good barrel of soap in every lot shipped, to be kept set aside by the overseer for analyses and inspection. In that barrel a nail would be put through the plug, or a different batch number would be put on the head, and the finisher advised accordingly.

Witnesses in another proceeding against a firm selling textile soaps and degreasing materials testified under oath that dyers and finishers were paid from $10 to $12 per barrel; one of the witnesses testified that in some instances the finisher would spoil goods in order to assist in placing the respondent's goods in the mills. The money was usually paid to the men in cash—handed to them personally. One of the witnesses refused to answer for the sole reason that the answer might tend to incriminate him.

DYESTUFFS AND SIZING MATERIALS.

In another case a witness admitted that his company had paid secret commissions to employees of customers purchasing dyes and sizing materials; that they had been paid with the knowledge, consent, and approval of respondent's officers; that other companies gave like commissions; that the money was accounted for as "salary" and charged to the officers; that in one year they had paid between $30,000 and $40,000, or from 8 to 10 per cent of their total sales; that these gratuities were taken into consideration in making up the cost of the goods; that they naturally tended to increase the selling price; and that they undoubtedly would have sold these goods for less money if gratuities had not been given. These gratuities had been paid in North Carolina, South Carolina, Rhode Island, Connecticut, New Hampshire, Massachusetts, New York, and New Jersey.

The Alien Property Custodian in 1918 stated in his annual report that bribery of dyers had been carried on almost universally and on a large scale; that the dyers frequently controlled the situation; that nothing was easier than to control the complicated process of dyeing in such a way that the dyes furnished by the house which was the least liberal to the dyer would produce wretched results.

So extensive was this corruption that I came across only one American consumer who had escaped its ill effects.

* * * Honest domestic competition found the utmost difficulty in maintaining itself, and it is therefore not strange that until the outbreak of the war the American industry was of little importance.

The United States Tariff Commission in 1918 stated that it is notorious in the dye and textile trades that the agents of German manufacturers habitually resorted to bribery in the form of money payments or "gifts" to purchasing agents, and more especially to dyers, who frequently were in a position to dictate the dyes that their employers should use. Most managers of textile mills and converters preferred to ignore the practice rather than to expose themselves to the irritations and the spoiling of goods that dishonest dyers could bring about with impunity.

Affidavits submitted to the Committee on Ways and Means in 1919 state that the practice of bribing dyers was followed by all German companies but one selling in this country; that the company referred to in the affidavit either increased the purchase price of the merchandise by the amount of the commission paid or delivered goods of inferior quality to the customer, the grade of inferiority of the goods depending upon the amount of the commissions paid; so that in all cases the commission was indirectly paid by the employer of the dyer.

One of the deponents stated that the amount of the bribes was agreed upon by the salesman and the dyer, and varied from 5 cents to 25 cents per pound.

A witness before the same committee referred to this as—

the most extraordinary system of commercial corruption that I think the world has ever seen. There was hardly a textile mill whose dyers were not corrupted. I say this advisedly.

In another proceeding against a dyehouse a former officer testified under oath concerning disbursements to dyers, stating that for a time such payments were charged on the books to a concern that did not exist; that subsequently they were charged to another account equally misleading, and that to this account was charged during the years 1914 to 1916 and part of 1917 the sums of $110,010.18, $115,188.48, $172,524.38, and $100,777.60, respectively.

The witness mentions certain additional items during two succeeding months, namely, $1,500, $300, $2,600, $4,225, $150, $500, $250, $6,000, $2,500, $2,500, $500, $6,000, and $3,500.

The witness stated that the above yearly figures were drawn from the books when they were under examination in the State court and that they had also been drawn and verified by Government accountants.

GLUE.

In a proceeding before the Federal Trade Commission against a glue manufacturer the facts, as stipulated by counsel, show that a salesman formerly employed by respondent reported to the company that he could secure the glue business of a certain manufacturer using as much as 300,000 pounds of glue per annum, or more than $100,000 worth, for the payment of a "commisssion" of 5 per cent; that this arrangement was agreed to and later increased to 5 cents per pound instead of 5 per cent; that immediately following this arrangement the glue then being used by that prospective customer was reported bad by the employee deciding such matters, who also suggested that glue be purchased from the respondent. Thereafter for some time glue was purchased from the respondent to the total exclusion of the competitor who had furnished glue for a number of years. The amounts paid on account of such so-called commissions covering such sales from February 1, 1919, to January 1, 1921, to about the sum of $34,000, no part of which was ever received by or reached the treasury of the purchasing company. The injured competitor was not permitted to make tests or demonstrations of his glue, although his request so to do was reenforced by the request of the purchasing department, but subsequently when trouble was reported with respondent's glue they were afforded every opportunity to make tests and rectify the trouble, such tests and experiments running over a period of weeks.

Subsequently the respondent reduced the price of its glue sold on this account in the amount of 5 cents per pound, and such reduction was not made on account of the quality or market price.

SHELLAC SUBSTITUTE.

In a similar proceeding against a manufacturer of shellac substitute, respondent's counsel, after the taking of considerable testimony, admitted that salesmen and other representatives of the respondent company have secretly given and offered to give cash commissions and other gratuities to foremen, finishers, and other employees of its customers and prospective customers, with the knowledge and consent, express or implied, of the managing officers and directors of the respondent company as an inducement to said employees to influence their employers to purchase and use respondent's products; that it further admits that the giving of such gratuities by respondent tends to and does compel competitors of the respondent to adopt such methods of competition or suffer the loss of business; and that such expenditures necessarily become a part of the distribution expense of the company and are added to the cost of such products to the purchasing public.

Some 55 complaints were filed against concerns engaged in the manufacture and sale of paint, oil, varnish, and kindred products. The widespread interest aroused by the commission's activities in this field caused the paint and varnish manufacturers to organize a bureau to take care of such matters. This bureau, according to the commission, has more than justified its existence by its work in eliminating commercial bribery.

Likewise, a group of progressive concerns in marine circles organized the American Ship Service Corporation to engage in similar work in eliminating bribery.

The American Bar Association on September 4, 1919, adopted a recommendation of the committee on commerce, trade, and commercial law indorsing three bills which proposed to suppress commercial bribery. The committee did not indicate any preference as to these bills, but recommended the passage of one of them.

PRINTING INK.

In November, 1917, 68 manufacturers agreed not to pay secret commissions or bribes, and urged the passage of Federal criminal legislation prohibiting the giving, offering, receiving, and soliciting of bribes, commissions, gratuities, and so forth, for the purpose of corruptly influencing the conduct of any agent or employee in relation to his principal's or employer's business. The parties to this agreement represented about 90 per cent of the manufacturers of printing ink. The National Association of Printing Ink Makers is endeavoring to rid the industry of the bribery evil.

The records available show that bribery has been resorted to in influencing the sale of printers' rollers, lifeboats, rafts, engines, rope, machinery, boiler compounds, oils, greases, chemicals, and other products.

Here is an evil that has gradually grown up until it has become a very serious matter. Throughout the country more or less of an effort has been made to suppress it. The same is true with respect to Europe. They have a law similar to this bill in England, in Australia, New Zealand, and in practically all of the various English Provinces.

Mr. JOHNSON of Mississippi. Mr. Speaker, will the gentleman yield?

Mr. VOLSTEAD. Yes.

Mr. JOHNSON of Mississippi. Under the gentleman's bill a negro porter on a Pullman car traveling from one State to another who would accept a 25-cent or 50-cent tip could be punished under this bill?

Mr. VOLSTEAD. No; certainly not. There is no provision in this bill covering such a case. The payment must be done to influence the employee to do something to the injury of his employer.

Mr. JOHNSON of Mississippi. If he should change a man's sleeping quarters from the upper to the lower berth, and show him any favoritism whatever, he could be punished under this bill?

Mr. VOLSTEAD. There is no reason for any such contention.

Mr. JOHNSON of Mississippi. Oh, yes; there is. I have had it done myself.

Mr. WINGO. Mr. Speaker, will the gentleman yield?
Mr. VOLSTEAD. Yes.
Mr. ACKERMAN. Mr. Speaker, will the gentleman yield?
Mr. VOLSTEAD. Yes.
Mr. ACKERMAN. Would this prevent a manufacturer or employer at Christmas time giving boxes of cigars to his employees with his compliments in recognition of faithful services?
Mr. VOLSTEAD. No; not at all.
Mr. WINGO. Mr. Speaker, will the gentleman yield?
Mr. VOLSTEAD. Yes.
Mr. WINGO. Suppose I have a baggageman go up to the baggage room in the station and get my bag for me. Would I violate the law?
Mr. VOLSTEAD. No. That would be payment for a service actually rendered.
Mr. WINGO. He would be doing me a favor?
Mr. VOLSTEAD. Yes. He would be rendering an actual service to you, too.
Mr. WINGO. And if a car were placed on a sidetrack, that would be a service to me. He would not be required to do it as a matter of routine until the afternoon, let us say, and I get him to take it out of its order in the morning and switch it in for me.
Mr. VOLSTEAD. The idea is that he has to deal fairly with the public. The obtaining of a favor at the expense of his employer is one of the things we are trying to prevent. If otherwise the employer grants a favor, this bill will not prevent payment.
Mr. WINGO. You have a law now against discriminations against shippers on the railroads, have you not?
Mr. VOLSTEAD. The Interstate Commerce Commissioners call attention to that and say that that is not sufficient to relieve the situation.
Mr. WINGO. You say the States refuse to punish?
Mr. VOLSTEAD. Some of the States do not have laws on the subject at all, while there are a number of States that do have.
Mr. STEVENSON. Mr. Speaker, will the gentleman yield?
Mr. VOLSTEAD. Yes.
Mr. STEVENSON. Is it proposed to deal with this just as it was proposed to deal with the question of rebates by transportation companies? In other words, do you suppose this will be protected under the decisions sustaining penalties imposed on railroads and other public carriers for granting rebates in freight rates and things of that kind?
Mr. VOLSTEAD. Of course, that law is not strictly apropos, but this class of statutes have been held valid in a number of States.
Mr. STEVENSON. What I was trying to get at is, under what authority Congress is dealing with this. I take it that inasmuch as this is in interstate commerce, this is practically a gratuity, which is the same thing as a rebate in transportation.
Mr. VOLSTEAD. Of course, this deals only with interstate and foreign commerce. It does not deal with anything else.
Mr. HOCH. Mr. Speaker, will the gentleman yield?
Mr. VOLSTEAD. Yes.
Mr. HOCH. I understand the language used here, in line 11, is, "any act" used "in relation to the affairs or business of his employer," and so forth. Does the gentleman think that Congress has the power to enact a law concerning something that simply bears a relation to a business interest of that character? It does not say that the act has a bearing or effect on interstate commerce. You provide here a control on the part of Congress "in relation" to the affairs and business when the affairs and business are interstate commerce.
Mr. VOLSTEAD. If you read the rest of that sentence you will see that it is "in relation to the affairs or business of his employer or principal, which affair or business constitutes or directly affects commerce among the States."
Mr. HOCH. Yes; the business itself may constitute commerce.
Mr. VOLSTEAD. Yes; and the affair or business must directly affect interstate commerce.
Mr. HOCH. The language you use is "in relation" to that business. I can conceive of an act that may have a relation to that business which——
Mr. VOLSTEAD. It must be an act which directly affects interstate commerce.
Mr. HOCH. Is it not possible that a business might be an interstate business and yet some act merely in relation to that business would not constitute any effect on interstate commerce?
Mr. VOLSTEAD. I would like to know where the gentleman finds his language.
Mr. HOCH. On line 11, page 1. I am trying to get information. Perhaps I did not get the language correctly.
Mr. VOLSTEAD. Read the language. Here it is:

In relation to the affairs or business of his employer or principal, which affairs or business constitute or directly affect commerce.

Mr. HOCH. That is what I am trying to get at. There is no question but that the business affects interstate commerce, but you are penalizing any business that relates to that business. Offhand, it seems to me that is going much further than any control I know of in these other acts in relation to interstate commerce.
You do not provide that you penalize an act that relates to interstate commerce, but any act in relation to a business that has to do with interstate commerce.
Mr. VOLSTEAD. I have no doubt that if the gentleman will read the language of the bill he will come to a different conclusion. As I have said, legislation of this kind has been urged by the Interstate Commerce Commission, the Shipping Board, the Federal Trade Commission, the Department of Commerce, and by a very large number of business houses in the different sections of this country.
A State can not deal successfully with this evil. The merchant selling goods in different States, as most wholesalers do, must, to meet this kind of competition, pay bribes or go out of business. In selling his goods he necessarily quotes the same price in all the different States where he distributes. If some of these States permit this practice, it becomes necessary for him to increase the price of his goods not only in the States permitting such bribery but to all his customers.
Farmers selling grain in the Middle West, no matter what the laws of their States may be, must help to pay these bribes as a part of the cost of sending their products to market, and they must submit to a like exaction on what they purchase.
This bill is not local but national in purpose. There is just as much reason for enacting a national law to stop this evil as there was for prohibiting trusts and monopolies. This bill only deals with the interstate and foreign commerce—a subject that it is the duty of Congress, and not the States, to protect.
The National Government is the only one that has the machinery to enforce such a law—the Interstate Commerce Commission, the Federal Trade Commission, and the force in the Department of Justice charged with making the antitrust laws effective. The States have no corresponding machinery that can effectively reach this evil.
Mr. LONDON. The intention of the bill, as I understand it, is to punish an employee who for a consideration does an act injurious to the interests of his employer. Is not that the object of the bill?
Mr. VOLSTEAD. Yes; injurious to his employer.
Mr. LONDON. If that is so, the language employed in line 10, on page 1, is too broad. The language in lines 9 and 10 reads:

For doing or omitting to do any act or for showing or forbearing to show any favor or disfavor by such employee.

There is a world of difference between doing a favor or a disfavor and doing something that is injurious to the interests of the employer; and, it being a criminal statute, the language should be strict and specific and should not permit of more than one interpretation.
Mr. VOLSTEAD. If the gentleman cares to offer an amendment when we come to that feature of it, we will consider it later on.
Mr. LONDON. And in section 2 I find the same elastic language employed. There the language is—

Any receipt, account, invoice, or other document, in respect of which the employer or principal is interested, which contains any statement which is false, erroneous, or defective.

The submission of an erroneous or defective statement is made a crime. The language is altogether too broad for a criminal statute.
Mr. VOLSTEAD. It must be with intent to deceive the employer or principal. If it is done for that purpose, I can see no reason why this is too indefinite.
Mr. SANDLIN. Mr. Speaker, I make the point of no quorum present. I think on an important matter like this we should have a full House.
The SPEAKER. The gentleman from Louisiana makes the point that there is no quorum present. The Chair will count. [After counting.] There is no quorum present.

ADJOURNMENT.

Mr. VOLSTEAD. Mr. Speaker, I move that the House do now adjourn.
The motion was agreed to; accordingly (at 4 o'clock and 40 minutes p. m.) the House adjourned until Saturday, May 27, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

617. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination and survey of the coast of Texas in the vicinity of Aransas Pass, Port Aransas, Rockport, and Corpus Christi (H. Doc. No. 321); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

618. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Monongahela River, Pa. and W. Va.; to the Committee on Rivers and Harbors.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. LEHLBACH: Committee on Reform in the Civil Service. H. R. 11428. A bill to fix the salaries of the Civil Service Commissioners and of certain employees of the Civil Service Commission; without amendment (Rept. No. 1032). Referred to the Committee of the Whole House on the state of the Union.

Mr. RAYBURN: Committee on Interstate and Foreign Commerce. H. R. 11128. A bill to authorize the construction of a bridge over the Rio Grande between the cities of Del Rio, Tex., and Las Vegas, Mexico; without amendment (Rept. No. 1033). Referred to the House Calendar.

Mr. COOPER of Ohio: Committee on Interstate and Foreign Commerce. H. R. 11646. A bill authorizing the construction of a bridge across the Ohio River near Steubenville, Ohio; without amendment (Rept. No. 1034). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. ROSE: Committee on Claims. H. R. 11571. A bill for the relief of the Clyde Steamship Co., of New York, N. Y.; without amendment (Rept. No. 1035). Referred to the Committee of the Whole House.

Mr. EDMONDS: Committee on Claims. H. R. 2702. A bill for the relief of J. W. Glidden and E. F. Hobbs; without amendment (H. Rept. 1036). Referred to the Committee of the Whole House.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. ANDERSON: A bill (H. R. 11798) to enlarge, extend, and remodel the post-office building at Rochester, Minn., or to authorize the purchase of a site and the erection and completion of a building thereon, in the discretion of the Secretary of the Treasury; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 11799) to enlarge, extend, and remodel the post-office building at Albert Lea, Minn., or to authorize the purchase of a site and the erection and completion of a building thereon, in the discretion of the Secretary of the Treasury; to the Committee on Public Buildings and Grounds.

By Mr. YOUNG: A bill (H. R. 11800) increasing the limit of cost for a Federal building at Jamestown, N. Dak.; to the Committee on Public Buildings and Grounds.

By Mr. KAHN: A bill (H. R. 11801) to amend section 210 of the war risk insurance act as amended by the act of August 9, 1921, as is now applicable to allotments paid to beneficiaries designated under the Army allotment system by any person who served in the Army; to the Committee on Interstate and Foreign Commerce.

By Mr. SINNOTT: A bill (H. R. 11802) to authorize the addition of certain lands to the Oregon National Forest; to the Committee on the Public Lands.

By Mr. MORIN (by request): A bill (H. R. 11803) to provide for the manufacture of explosive compounds for the use of the Army and Navy; to provide for the manufacture of fertilizer for agricultural purposes; to conserve water for power, stream control, and navigation; to incorporate the Federal Chemical Corporation; and for other purposes; to the Committee on Military Affairs.

By Mr. KAHN: Joint resolution (H. J. Res. 336) to authorize and regulate details in the executive or administrative service of the Government; to the Committee on the Judiciary.

By Mr. ANSORGE. Joint resolution (H. J. Res. 337) granting consent of Congress and authority to the Port of New York Authority to execute the comprehensive plan approved by the States of New York and New Jersey by chapter 43, Laws of New York, 1922, and chapter 9, Laws of New Jersey, 1922; to the Committee on the Judiciary.

By Mr. SABATH: Joint resolution (H. J. Res. 338) to return money or other property now in the hands of the Alien Property Custodian or in the Treasury of the United States to the owner or owners, and for other purposes; to the Committee on Interstate and Foreign Commerce.

Also, resolution (H. Res. 354) requesting the Secretary of State to make immediate inquiry of the French Government regarding Hon. Charles R. Crane, of Chicago, Ill.; to the Committee on Foreign Affairs.

By Mr. OGDEN: Memorial of the Legislature of the State of Kentucky, urging relief for those who lost in the operation of their business during the year 1920 regarding tax exemptions, the same as those who lost in 1919 or 1921; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BACHARACH: A bill (H. R. 11804) for the relief of Robert Turner; to the Committee on Claims.

By Mr. BROWN of Tennessee: A bill (H. R. 11805) granting a pension to Robert King; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11806) granting a pension to George W. Hacker; to the Committee on Invalid Pensions.

By Mr. CLOUSE: A bill (H. R. 11807) granting a pension to John Poor; to the Committee on Pensions.

By Mr. COOPER of Wisconsin: A bill (H. R. 11808) for the relief of Mrs. D. H. Jeffris; to the Committee on Claims.

By Mr. FESS: A bill (H. R. 11809) granting a pension to Lilly Murphy; to the Committee on Pensions.

By Mr. GERNERD: A bill (H. R. 11810) granting an increase of pension to A. Laurie Nicholson; to the Committee on Pensions.

By Mr. LANGLEY: A bill (H. R. 11811) granting a pension to Flem Blair; to the Committee on Pensions.

By Mr. LONDON: A bill (H. R. 11812) for the relief of Flora Yost Klinowski; to the Committee on Claims.

By Mr. MORGAN: A bill (H. R. 11813) granting an increase of pension to Rachel H. Kendall; to the Committee on Invalid Pensions.

By Mr. RUCKER: A bill (H. R. 11814) for the relief of Caroline Kuhlman and others who have suffered losses on account of their lands being destroyed and washed away by the Missouri River at a point adjacent to Little Missouri Bend, Missouri River, State of Missouri; to the Committee on Claims.

By Mr. SWING: A bill (H. R. 11815) for the relief of James W. Sweetman, C. A. A. McGee, H. R. Fay, and E. E. Hendee; to the Committee on Claims.

By Mr. TAYLOR of Tennessee: A bill (H. R. 11816) granting a pension to Hiley Galbraith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11817) granting a pension to James O. Craig; to the Committee on Pensions.

Also, a bill (H. R. 11818) granting an increase of pension to Barbara E. Rhea; to the Committee on Invalid Pensions.

By Mr. WYANT: A bill (H. R. 11819) granting a pension to Catharine M. Painter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11820) granting a pension to Annie M. France; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11821) granting a pension to Dolly P. Beckner; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5788. By the SPEAKER (by request): Resolution adopted by the Cleveland Grays, indorsing the Bursum bill, S. 1565, and urging its passage; to the Committee on Military Affairs.

5789. By Mr. FAIRFIELD: Petition of citizens of Kendallville, Ind., protesting against the passage of House bill 9753, House bill 4388, or Senate bill 1948; to the Committee on the District of Columbia.

5790. By Mr. FULLER: Petition of the Haddorff Piano Co., of Rockford, Ill., favoring the McNary-Smith bill, H. R. 10164, for the reclamation of arid lands; to the Committee on Irrigation of Arid Lands.

5791. Also, petition of Emerson-Brantingham Co., of Rockford, Ill., favoring the McNary-Smith reclamation bill; to the Committee on Irrigation of Arid Lands.

5792. Also, petition of the Goding Shoe Co., of Chicago, and the Jos. Saenger Mercantile Co., of Belleville, Ill., protesting against a tariff on hides; to the Committee on Ways and Means.

5793. Also, petition of the Free Sewing Machine Co., of Rockford, Ill., favoring a tariff on sewing machines; to the Committee on Ways and Means.

5794. Also, petition of the American Nickeloid Co., of Peru, Ill., favoring a tariff on plated or coated tin plate; to the Committee on Ways and Means.

5795. Also, petition of the Peoria Farm Bureau, the Tazewell County Farm Bureau, the Association of Commerce of Pekin, Ill., and the American Distilling Co., for a tariff duty on blackstrap molasses; to the Committee on Ways and Means.

5796. Also, petition of I. I. Hanna, of Ottawa, Ill., opposing a high tariff on potash salts; to the Committee on Ways and Means.

5797. Also, petition of the Godfrey-Brewer Investment Co., of Rockford, Ill., favoring the Green resolution, to prohibit the issue of tax-exempt securities; to the Committee on Ways and Means.

5798. Also, resolutions of the Texas Chamber of Commerce, favoring a constitutional amendment to prohibit any further issue of tax-exempt securities, and favoring the repeal of section 28 of the shipping act; to the Committee on Ways and Means.

5799. Also, resolutions of the Hamilton Club, of Chicago, favoring a Navy personnel of 80,000 enlisted men and 6,000 apprentices under training; to the Committee on Appropriations.

5800. Also, resolutions of the Women's International League for Peace and Freedom, favoring the abolition of war, and suggesting various measures to that end; to the Committee on Military Affairs.

5801. Also, petition of Frank Jaycox, commander of the Colonel Thomas G. Lawler Post, No. 342, Veterans of Foreign Wars, favoring bill to place on the retired list disabled emergency officers of the Army who served in the late World War; to the Committee on Military Affairs.

5802. Also, petition of the Third National Bank of Rockford, Ill., favoring bill for perpetual charters for national banks; to the Committee on Banking and Currency.

5803. Also, petition of the International Association of Fire Fighters, favoring the modification of the prohibition enforcement law; to the Committee on the Judiciary.

5804. Also, petition of the National Dairy Union, favoring H. R. 8086, relating to the manufacture and sale of filled milk or the transportation thereof in interstate commerce; to the Committee on Agriculture.

5805. Also, resolutions of the Hamilton Club, of Chicago, favoring a provision in the Budget that will render Great Lakes Naval Training Station as useful in the future as it has been in the past; to the Committee on Appropriations.

5806. By Mr. GALLIVAN: Petition of Rosina W. Sheldon, chairman legislative committee, American Legion Auxiliary, Department of Massachusetts, Salem, Mass., urging passage of the Bursum bill; to the Committee on Military Affairs.

5807. By Mr. KELLY of Pennsylvania: Resolutions adopted by the Pennsylvania State Chamber of Commerce, favoring taxation of exempt securities; to the Committee on Ways and Means.

5808. By Mr. KISSEL: Petition of the Brooklyn College of Pharmacy, Brooklyn, N. Y., relative to the tariff duty on glassware and chemical apparatus; to the Committee on Ways and Means.

5809. Also, petition of Baugh & Son Co., Baltimore, Md., opposing the proposed tariff bill; to the Committee on Ways and Means.

5810. By Mr. LARSON of Minnesota: Petition of the Presbytery of Duluth, Duluth, Minn., indorsing House bill 9753, regarding Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

5811. By Mr. LEA of California: Petition of 70 citizens of Oakland, Calif., protesting against the passage of pending Sunday legislation bills; to the Committee on the District of Columbia.

5812. By Mr. LINTHICUM: Resolution of the Baltimore Federation of Labor, urging support of House bill 10646; to the Committee on Interstate and Foreign Commerce.

5813. Also, petition of Farmers & Planters' Co., Salisbury, Md., opposing tax on potash; to the Committee on Ways and Means.

5814. Also, petition of the Baltimore Live Stock Exchange and the Union Stock Yard Co., Baltimore, Md., protesting against Senate bill 3298, to allow State supervision over weighing at public stockyards; to the Committee on Agriculture.

5815. Also, petition of George W. Hardy, president Maryland State Game and Fish Protection Association, Baltimore, Md., favoring passage of House bill 5823 without amendment; to the Committee on Agriculture.

5816. By Mr. RAKER: Petitions of Eddie Schmidt, Popkin & Nestor, Chas. Levy & Son, and Edwin Hartley, all of Los Angeles, Calif., protesting against paragraph 1116, H. R. 7456, and the Carded Woolen Manufacturers' Association, of Boston, Mass., relative to reform in the framing of wool schedules; to the Committee on Ways and Means.

5817. Also, petition of Mrs. W. B. Hamilton, acting chairman of the Vigilant Committee, of San Francisco, Calif., urging an appropriation for the carrying on of the work of the Interdepartmental Social Hygiene Board; to the Committee on Appropriations.

5818. Also, petition of the National Milk Producers' Federation, of Washington, D. C., indorsing H. R. 8086, the Voigt bill, to prohibit the movement in interstate and foreign commerce of so-called filled milk; to the Committee on Agriculture.

5819. By Mr. ROSSDALE: Resolution adopted by the Bronx Board of Trade, of New York City, recommending that the Stanley bill should not be approved; to the Committee on Patents.

5820. By Mr. WILLIAMSON: Petition of W. W. Thompson and many other residents of Hot Springs, S. Dak., urging the passage of the Bursum and Morgan bills; to the Committee on Invalid Pensions.

SENATE.

SATURDAY, *May 27, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Borah	Harreld	McLean	Rawson
Brandegee	Harris	McNary	Robinson
Broussard	Harrison	Moses	Sheppard
Bursum	Heflin	Myers	Shortridge
Calder	Hitchcock	Nelson	Simmons
Capper	Johnson	New	Smoot
Caraway	Jones, N. Mex.	Newberry	Spencer
Cummins	Jones, Wash.	Nicholson	Sterling
Curtis	Kellogg	Norbeck	Sutherland
Dial	Kendrick	Norris	Townsend
Dillingham	Ladd	Oddie	Underwood
Elkins	La Follette	Overman	Wadsworth
Ernst	Lenroot	Page	Walsh, Mont.
Fletcher	Lodge	Pepper	Warren
France	McCormick	Phipps	Watson, Ga.
Gooding	McCumber	Poindexter	
Hale	McKinley	Ransdell	

Mr. MOSES. I wish to announce the absence of my colleague [Mr. KEYES] on account of illness. I ask that this announcement may stand for all roll calls during the day.

The PRESIDENT pro tempore. Sixty-six Senators have answered to their names. There is a quorum present.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had passed a bill (H. R. 11450) to provide for the printing and distribution of the Supreme Court Reports, and amending sections 225, 226, 227, and 228 of the Judicial Code, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the bill (S. 745) to amend section 24 and section 256 of the Judicial Code.

ENROLLED BILL SIGNED.

The message further announced that the Speaker of the House had signed the enrolled bill (S. 2263) to amend the Federal Reserve Act approved December 23, 1913, and it was thereupon signed by the President pro tempore.

REPORTS OF COMMITTEES.

Mr. HARRELD, from the Committee on Claims, to which was referred the bill (H. R. 9048) to authorize the California Débris Commission to reimburse the city of Sacramento, Calif.,

for money expended by said city in the construction of the Sacramento weir, reported it without amendment and submitted a report (No. 725) thereon.

Mr. CALDER, from the Committee on Banking and Currency, to which was referred the bill (H. R. 9527) to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as to provide succession thereof until dissolved, and to apply said section as so amended to all national banking associations, reported it with amendments.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HARRELD:

A bill (S. 3651) granting a pension to Nancy A. Hailey; to the Committee on Pensions.

By Mr. WALSH of Montana:

A bill (S. 3652) for the relief of the estate of James W. Mardis; to the Committee on Claims.

By Mr. KELLOGG:

A bill (S. 3653) granting a pension to Ella Mitchell York; to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 3654) to repeal section 28 of an act entitled "An act to provide for the promotion and maintenance of the American merchant marine, to repeal certain emergency legislation, and provide for the disposition, regulation, and use of property acquired thereunder, and for other purposes," approved June 5, 1920; to the Committee on Commerce.

By Mr. NORBECK:

A bill (S. 3655) granting an increase of pension to Betsy Anderson (with accompanying papers); to the Committee on Pensions.

AMENDMENT TO NAVAL APPROPRIATION BILL.

Mr. JONES of Washington submitted an amendment proposing to appropriate $100,000 for the employment of draftsmen and other technical employees in the Hydrographic Office for the construction, compilation, and reproduction of nautical charts, etc., intended to be proposed by him to House bill 11228, the Navy Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

AMENDMENT TO DEFICIENCY APPROPRIATION BILL.

Mr. LODGE submitted an amendment proposing to appropriate $15,956 covering certain items of unavailable funds in the accounts of the Assistant Treasurer of the United States, and in the general account of the Treasurer of the United States, representing a shortage found upon discontinuance, October 25, 1920, of the subtreasury at Boston, Mass., etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

HOUSE BILL REFERRED.

The bill (H. R. 11450) to provide for the printing and distribution of the Supreme Court reports, and amending sections 225, 226, 227, and 228 of the Judicial Code, was read twice by its title and referred to the Committee on the Judiciary.

CONTINUATION OF LAND OFFICES.

Mr. NORRIS. Mr. President, last night during my absence from the Chamber the Senate passed the bill (S. 3425) to continue certain land offices, and for other purposes. The bill was passed with certain amendments. The bill is still in the possession of the Senate; it has not been sent to the House.

Certain land offices, which were omitted by mistake in the act making appropriations for the Department of the Interior, were included in the bill which passed the Senate last night, with the exception of one, the land office in Nebraska, which is exactly the same as the others and has the same recommendation from the Secretary of the Interior. As nearly as I can learn, there is no objection to the bill, and I think there will be no objection to the amendment which I desire to offer. In order that I may offer it, I ask unanimous consent to reconsider the votes by which the bill was ordered to a third reading and passed.

The PRESIDENT pro tempore. The Senator from Nebraska asks unanimous consent that the votes by which Senate bill 3425 was ordered to a third reading and passed may be reconsidered. Is there objection? The Chair hears none, and the votes are reconsidered.

Mr. NORRIS. I move to amend the bill by inserting in line 9, page 1, after the word "Arkansas," "Alliance and Broken Bow, in the State of Nebraska."

The amendment was agreed to.

Mr. SPENCER. Mr. President, I have upon my desk an amendment, which I intended to propose to the bill, providing for the land office which has existed for many years at Springfield, Mo., and which is, according to my information, in precisely the same situation as the other offices. It was omitted for some reason. I move, after the amendment just incorporated in the bill, that there be inserted the words "Springfield, in the State of Missouri." Then the bill can go to the House with all these land offices in it.

The PRESIDING OFFICER (Mr. SUTHERLAND in the chair). The amendment will be stated.

The READING CLERK. After the amendment just agreed to, the Senator from Missouri proposes to insert:

Springfield, in the State of Missouri.

Mr. OVERMAN. Mr. President, I want to say again that all these matters were before the Appropriations Committee, and hearings were had and many of the offices were omitted. I am not going to object at this time, but the Appropriations Committee was asked to provide for all these land offices and did provide for many of them. There was some mistake made, I admit, which ought to be corrected as to some of them, but there are some asked to be included now upon which there were hearings had and due consideration given by the committee. The committee turned them down, and the appropriation bill passed the House of Representatives without providing for them. I am willing that some of them may go in and let the House settle the question.

Mr. McCUMBER. Mr. President, may I say to the Senator that probably there would not have been a mistake if the committee having that bill before them had just notified the Senators from the States affected that such a matter was being considered. I know that neither my colleague nor myself had any knowledge whatever that there was any such provision in the bill or we would have gone before the committee and presented reasons to the committee which would have satisfied them.

Mr. OVERMAN. I am sorry the Senator was not there, but several Senators did come, and they presented their matters to the committee.

Mr. NORRIS. Will the Senator from North Carolina yield to me?

Mr. OVERMAN. I yield.

Mr. NORRIS. I think I can make it plain as to how this misunderstanding occurred.

The PRESIDING OFFICER. The Senator from Missouri has the floor, but yielded temporarily to the Senator from North Carolina [Mr. OVERMAN].

Mr. NORRIS. Will the Senator from Missouri yield to me?

Mr. SPENCER. I yield to the Senator from Nebraska.

Mr. NORRIS. Mr. President, the Senator from Utah [Mr. SMOOT] is the chairman of the Committee on Public Lands and Surveys, and it was before that committee that these various bills were pending. Everybody knows that so long as the tariff bill is before the Senate for consideration the Senator from Utah, being a member of the Committee on Finance, can not attend to the detailed duties of the committee of which he is chairman. I happen to be the next Senator in rank on that committee. The Senator from Utah has several times had conferences with me with a view of calling that committee together for the consideration of these bills. We thought of notifying all the other Senators who had introduced various bills in reference to the general subject. I have been also tied up with the Agricultural Committee nearly as much as has the Senator from Utah with the Committee on Finance. I had, however, told the Senator from Utah and also other Senators having bills in reference to this subject that as soon as I could arrange it I would notify the Senator from Utah so that he could call a meeting of the Committee on Public Lands and Surveys, and that I would attend and take charge of the meeting. I intended to give the Senator from Utah that notice this morning, as I had arranged matters in the Agricultural Committee so that a meeting of the Public Lands Committee could be held on Monday morning next to consider these bills.

Mr. OVERMAN. Mr. President——

Mr. NORRIS. Just let me finish this statement. So far as I know, though I have not looked into the facts in reference to all of them, all of these land offices occupy exactly the same position, and it was really a mistake when they were left out of the appropriation bill. The Secretary of the Interior, as to all of the offices with which I am familiar, has recommended their continuation. I have no knowledge as to some of these offices, because the committee has not had a meeting, and I have not considered some of them and do not know whether or not the pending amendment covers one of the offices which the Secretary of the Interior has recommended shall be continued.

Mr. OVERMAN. I merely desire to state that this matter came over to the Senate from the House of Representatives. It was represented to the Senate that there had been due consideration given to these land offices. There was a member of the subcommittee from one of the Western States who knew all about these land offices, and he stated that provision had been made for those which were deemed necessary, but he admitted that there was one mistake, and only one. I am not going to object, but I am merely explaining the status of the matter. It now appears that there are four offices as to which it is admitted a mistake was made. It was then proposed to get a general bill or joint resolution passed through the House of Representatives covering those four offices.

It may be perfectly proper to pass this bill and let it go over to the House of Representatives and let the matter be considered over there. I repeat, I am not going to object in any way at all, but I am merely explaining the situation.

A good many Senators insisted that their States be considered and provided for in the appropriation bill. Hearings were given by the other House. I am sorry that the Senator from South Dakota was not notified. It was not our fault; the bill was here, and I thought every Senator was given a hearing who desired a hearing, and the bill was considered and passed. I am not going to throw any obstacle in the way of the passage of the pending bill. Let the bill pass and go over to the House of Representatives. I am merely explaining how it was that these land offices were left out by the House of Representatives.

Mr. SPENCER. Mr. President, the Senator from North Carolina [Mr. OVERMAN] is entirely right in regard to these land offices. As a matter of fact, the Committee on Appropriations approved them, and the Senate, at least so far as the one I am now speaking of, provided for them; but when the matter got to conference in the other House some of them were eliminated. The purpose of this bill is merely to ascertain if there has not been a mistake in regard to some of these offices. Of course, it is perfectly fair that they all shall have consideration.

Mr. OVERMAN. I agree to that.

Mr. SPENCER. Therefore I ask that my proposed amendment be now stated.

The PRESIDING OFFICER. The Secretary will state the amendment to the pending bill proposed by the Senator from Missouri.

The READING CLERK. In the amendment agreed to on last evening between the names "New Mexico" and "Harrison" it is proposed to strike out the word "and," and following the name "Nebraska," in the amendment heretofore agreed to, to insert the words "and Springfield, in the State of Missouri."

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Missouri.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

TRADE WITH CHINA.

Mr. CUMMINS. Mr. President, I ask unanimous consent that the tariff bill may be temporarily laid aside and that the Senate proceed to the consideration of the conference report on the bill (H. R. 4810) to authorize the incorporation of companies to promote trade in China.

Mr. ROBINSON. Mr. President, the Senator from Wisconsin [Mr. LA FOLLETTE] desires to be present when the conference report is considered. He stated to me a moment ago that he was compelled to leave the Chamber to meet some engagements, and desired that the conference report be not considered in his absence. In view of his request, I shall be compelled to object to the present consideration of the conference report, although I myself have no objection to it.

Mr. CUMMINS. I recognize that a single objection at this time will prevent the consideration of the report. I desire to say that while I shall not do so at this moment, very soon I shall be compelled to move that the Senate proceed to the consideration of the conference report, for it is highly necessary that the report be disposed of one way or another.

RAILROAD AND HIGHWAY EASEMENT, FORT SHERIDAN, ILL.

Mr. McKINLEY. Mr. President——

Mr. McCUMBER. I yield to the Senator from Illinois.

Mr. McKINLEY. I ask unanimous consent for the present consideration of the bill (H. R. 241) to authorize the Secretary of War to grant a perpetual easement for railroad right of way and a right of way for a public highway over and upon a portion of the military reservation of Fort Sheridan, in the State of Illinois.

The bill has passed the House of Representatives unanimously, and, in his report on the measure, the Secretary of War says:

> The bill as drawn has been reviewed and approved by the local military authorities, as well as the railroad company and the city of Lake Forest. For reasons as stated, it is urgently recommended that the bill in its present form be enacted into law.

That is the statement of the Secretary of War.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. FLETCHER. Mr. President, the Senator from Illinois in his statement with regard to this measure, as I understood——

Mr. WARREN. If the Senator will allow me, I will say that the bill has been reported unanimously from the Committee on Military Affairs.

Mr. FLETCHER. I understand that, but I am not quite clear about its effect. As I understand, the Government is giving a perpetual easement or right of way; but it is really to the advantage of the Government as well as to the public generally to take that action.

Mr. McKINLEY. Yes, sir; it is proposed to change the route. The road is there now, but by changing its location it will be possible to eliminate two railroad crossings. The bill is designed to accomplish that purpose.

Mr. FLETCHER. I have some recollection of that now.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SECOND ASSISTANT SECRETARY, DEPARTMENT OF LABOR.

Mr. BORAH. Mr. President——

Mr. McCUMBER. I yield to the Senator from Idaho.

Mr. BORAH. I desire to direct the attention of the Senate for a moment to Senate bill 3396, being order of business 671. This is a bill to create a second assistant secretary for the Department of Labor. I am asked to present this bill at the urgent request of the Secretary of Labor, who says that the duties of the department are such that it is necessary to have some additional assistance. I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the Senate as in Committee of the Whole proceeded to consider the bill (S. 3396) creating the positions of second assistant secretary and private secretary in the Department of Labor, which had been reported with an amendment in section 3, on page 2, line 9, after the word "hereby," to strike out "appropriated" and insert "authorized to be appropriated," so as to make the bill read:

> *Be it enacted, etc.*, That there shall be in the Department of Labor an additional Secretary, who shall be known and designated as Second Assistant Secretary of Labor. He shall be appointed by the President and shall receive a salary of $5,000 a year. He shall perform such duties as shall be prescribed by the Secretary of Labor, or required by law, and in case of the death, resignation, absence, or sickness of the Assistant Secretary shall, until a successor is appointed or such absence or sickness shall cease, perform the duties devolving upon the Assistant Secretary by reason of section 177, Revised Statutes, unless otherwise directed by the President, as provided by section 179, Revised Statutes.
>
> SEC. 2. That there shall be in the Department of Labor one private secretary to the Second Assistant Secretary of Labor at a salary of $2,100 a year.
>
> SEC. 3. That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $8,283.34, or so much thereof as may be necessary, to pay the salaries of the Second Assistant Secretary of Labor and the private secretary to the Second Assistant Secretary for the fiscal years 1922 and 1923.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JOSÉ LOUZAU.

Mr. WATSON of Georgia. I ask unanimous consent for the present consideration of the bill (S. 2753) for the relief of José Louzau. The bill has been unanimously reported by the Committee on Claims after careful consideration. I can state to the Senate that the claim is entirely meritorious and ought to have been paid long ago.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Claims with an amendment, in line 7, to strike out "$11,481.60" and insert "$5,000," so as to make the bill read:

> *Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and there is hereby appropriated for

such payment, to José Louzau the sum of $5,000 for personal injuries caused by being struck by a United States Army truck in San Juan, P. R., August 27, 1920.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CROW RESERVATION, MONT.

Mr. MYERS. Mr. President, I ask the indulgence of the Senate for about two minutes.

House bill 9344, Order of Business 699, is a bill which has passed the House, and it is unanimously recommended by the Senate Committee on Indian Affairs. It is a bill which merely authorizes the Secretary of the Interior, in his discretion, to use certain funds of the Crow Indians, in Montana, for the purpose of purchasing additional water rights for the Indians, with which to cultivate their allotted lands. The Indians are short of water, they need it, and the Interior Department is anxious for the bill to pass. Summer is coming on, the irrigation season is at hand, and if this measure is to be of any benefit whatever to the Indians it ought to pass now.

Mr. SMOOT. What is the calendar number?

Mr. MYERS. It is Order of Business 699. It only puts the matter in the discretion of the Secretary of the Interior. It merely authorizes him, in his discretion, to take such action in this matter as he may see fit, within certain limitations and bounds. It is wholly discretionary, and fixes a certain maximum limit of price which the Secretary of the Interior may pay for the water.

I ask unanimous consent for the immediate consideration of the bill.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 9344) providing for the appropriation of funds for acquiring additional water rights for Indians on the Crow Reservation, in Montana, whose lands are irrigable under the Two Leggins Irrigation Canal, which had been reported from the Committee on Indian Affairs with amendments.

The amendments were, on page 2, line 2, to strike out "$12.50" and insert "$20," and, in lines 2 and 3, to strike out "plus 6 per cent interest per annum on deferred payments," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to withdraw from the Treasury of the United States the sum of not to exceed $24,000 of any tribal funds on deposit to the credit of the Crow Indians, in the State of Montana, and to expend the same, or so much thereof as may be necessary, for the acquiring of additional water rights for Indian allotments that are irrigable under the Two Leggins Canal, but which have no water rights: *Provided*, That the amount to be paid for the acquiring of such water rights shall be not to exceed $20 per acre, and that said sum, or such part thereof as may be used for the purpose indicated, shall be reimbursed to the tribe under such rules and regulations as may be prescribed by the Secretary of the Interior.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

ALASKA FUR-SEAL SKINS.

Mr. ASHURST. Mr. President, I ask the attention of the chairman of the Committee on the Judiciary [Mr. NELSON] whilst I request unanimous consent for the immediate consideration of Senate Resolution 287, reported favorably from the Committee on the Judiciary.

Mr. SMOOT. What is the calendar number?

Mr. ASHURST. It is Order of Business 713, on page 19 of the calendar. I ask the attention of the chairman of the Judiciary Committee to this resolution, and ask unanimous consent for its present consideration.

Mr. McCUMBER. Mr. President, may I say at this time that while I have tried to accommodate Senators just as much as possible with these bills, I do not want this to become a general calendar day.

Mr. HITCHCOCK. Mr. President, is Senate Resolution 287 before the Senate now?

The PRESIDENT pro tempore. The Senator from Arizona has asked unanimous consent that the tariff bill be temporarily laid aside——

Mr. ASHURST. Mr. President, I beg the Chair's pardon, but I did not employ that language.

The PRESIDENT pro tempore. That is the only language that could be employed that would enable the Senate to reach this resolution.

Mr. ASHURST. Then, yielding to the Chair's suggestion, I ask unanimous consent that the tariff bill be temporarily laid aside.

The PRESIDENT pro tempore. Is there objection?

Mr. McCUMBER. I will not object now if it does not require any long debate, but I want to reserve the right to object later on.

The PRESIDENT pro tempore. If there is no objection, the Chair lays the resolution before the Senate.

The resolution was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the Secretary of Commerce be, and he is hereby, directed to furnish the Senate, for its information and use, a statement showing the total number of Government-owned Alaska fur-seal skins, as annually taken, and showing the total proceeds from said skins, as annually sold or disposed of under authority of act of August 24, 1912, up to April 5, 1922, inclusive; said statement to make a detailed showing of the time, place, and number of skins sold at each of said annual sales, with the classification of all the skins so offered and prices obtained for each grade at said sales.

Resolved further, That a complete record of the total annual payments made to the Governments of Great Britain and Japan since 1912, to January 1, 1922, inclusive, by the Secretary of Commerce, as provided for in said act of August 24, 1912, be furnished the Senate by him, together with copies of the Government contracts made with Funsten Bros. & Co. in 1915, and the Foulke Fur Co. in 1921, for dressing and dyeing fur-seal skins owned by the Government.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDENT pro tempore. The Secretary will state the next amendment of the committee.

Mr. McCUMBER. Mr. President, I should like to go back this morning to paragraph 316, on page 59.

The ASSISTANT SECRETARY. On page 59, paragraph 316, round iron or steel wire, the first amendment——

Mr. McCUMBER. Taking the committee amendment on line 22, where we strike out "20" and insert "35," I move to strike out "35" and insert "25."

The PRESIDENT pro tempore. The Chair will state that there is already an amendment pending at that point, offered by the Senator from Arkansas [Mr. ROBINSON], to strike out "35" and insert "15."

Mr. McCUMBER. Very well.

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from Arkansas to the amendment of the committee.

Mr. ROBINSON obtained the floor.

Mr. CARAWAY. Mr. President, will the Senator from Arkansas yield to me?

Mr. ROBINSON. I yield to my colleague.

ATTORNEY GENERAL DAUGHERTY.

Mr. CARAWAY. Mr. President, here is a telegram which may interest Senators. It deals with a question which was called to the attention of the Attorney General on the 4th day of May, and is, Is the Attorney General undertaking to intimidate Members of both Houses by putting special agents to spy upon and shadow both Senators and House Members?

I shall make no complaint myself, Mr. President, if the Attorney General wants to spend the public money in that way. So far as I am individually concerned, I shall make no objection. I do want, however, to call attention to this:

On the 5th day of May of this year an open letter addressed to the Attorney General, and a copy of which was mailed to him, appeared in the CONGRESSIONAL RECORD. The letter bears date of May 4, 1922, and appears in the RECORD of May 5, 1922, on pages 6364 and 6365.

The Attorney General yesterday had reached the 2d day of May in his reading of the RECORD. According to his letter, though, he thought it was the 12th. To-day he will be on the 3d of May, and to-morrow he will reach the 4th, if he keeps reading the RECORD consecutively, one a day. We may hope then to have an answer to this letter that has been called to his personal attention, because it was mailed to him, and has been commented upon. It appears in the RECORD of the 5th of May and it has been published in all the leading newspapers. It is this, Mr. President:

When two Republican Members of Congress, two ex-service men, ROY O. WOODRUFF and ROYAL C. JOHNSON, made charges against the Attorney General on the 11th day of April, 1922, according to this letter, the Attorney General, instead of an-

swering them, put secret-service men to trail them. The letter is specific. After calling attention to the fact that the Attorney General's chief advisers in the prosecution of war-graft cases were men who sought and obtained exemption from military duty during the war, and one of them, at least, had said that the department had no intention of prosecuting war-fraud cases, the letter says this. I read from charge 9, on page 6365.

9. Is it not a fact that after Congressmen JOHNSON and WOODRUFF addressed their colleagues in Congress on April 11, 1922, you immediately assigned agents Rescellar R. Gray (colored), James Connolly, H. F. Crawford, and A. C. Raynor, of the Bureau of Investigation, to shadow these Congressmen and myself; and is it not a fact that you brought various agents of the Bureau of Investigation from out of town to Washington and employed them for the same purpose?

10. Is it not a fact that you had two bags of mail belonging to Congressman ROY O. WOODRUFF shadowed, followed, and inspected? Is it not a fact that Agent H. F. Crawford, of the Bureau of Investigation, followed these bags of mail belonging to Congressman WOODRUFF to the post office in Washington and inspected their contents?

11. Is it not a fact that one of the highest-paid agents in the Bureau of Investigation is Rescellar R. Gray, a negro, who has been in your employ for a number of years as a valet and chauffeur for your family, and that this negro was ordered by you to trail these Congressmen and myself? I ask you to affirm or deny that the reports of these agents will show that they were in the House Office Building and that they mention the names of these Congressmen in connection with my own?

That is a specific charge, Mr. President, not only naming the Members of Congress whom the Attorney General was shadowing but naming the agents that he used to do it. That letter was written to him and mailed to him on the 4th day of May, 1922, and has been in his hands a long time. That letter appeared in all the leading newspapers. It appeared in the CONGRESSIONAL RECORD of May 5, 1922. It is specific and direct in its charge. It not only names the Members who were being shadowed but it names the agents who were being used for that purpose. I have talked to Congressman ROY O. WOODRUFF, a Republican, a man of high character. I asked him if he had positive proof that the Attorney General did this, and he says there is not a doubt about it, and it could be proved if the House would give them an investigation.

Yesterday WOODRUFF and JOHNSON tried again to get an investigation, and it by a Republican vote was denied. A witness came to my office, of whose character I know nothing except as I judge from the responsible position which the witness holds, and told me that an assistant of the Attorney General told her within a few weeks, in explaining another case, that the Attorney General had been shadowing both House and Senate Members, and with the certain knowledge that her position is at stake, she seems willing to testify to that fact. Whether it is true or not I do not know; but I am compelled to believe that one is not willing to throw away her right to work if the statement is not true.

Here is a telegram which came to me this morning from a highly intelligent gentleman in my own State, whom I know intimately and well, a personal friend of mine, a man who has held a responsible position, a man whose word, I take it, would be accepted anywhere, an intelligent man, very much above the average in intelligence. This is the telegram. It is dated Little Rock, May 26:

Senator CARAWAY, *Washington:*

Man here by name of Matthews representing Attorney General making extensive inquiry at this point, Hot Springs, and elsewhere, concerning you confidentially.

J. H. ANDERSON.

I would like to have the Attorney General tell the Congress just how much of the $500,000 Congress gave him to investigate war fraud cases he is spending in "investigating" Members of both Houses of Congress. He ought not to object to doing that. It is a trust fund, given to him with a specific instruction, and I believe that the Congress has the right to know how much of it he is using trying to intimidate Representatives and Senators, not to protect the Government, but to protect Harry Daugherty himself. That he is doing it I do not take it any living man who has taken 10 minutes of his time to investigate the facts will question. I base that assertion upon the letter that was written him on the 4th day of May, in which not only the men he was shadowing but the agents he was using to shadow them are named. It was written to him by a man who knew what he was talking about, because he had been in the department and had gone out just a few days before because he was unwilling to cooperate with the Attorney General in his attempt to shield war grafters from prosecution.

He makes a charge, specific and definite. He says:

You shadowed ROY JOHNSON, of South Dakota, and ROY WOODRUFF, of Michigan. You had ROY WOODRUFF's mail searched, and these are the agents that you employed in your department to do it, and we ask you now to affirm or deny.

For 22 days that charge, definite, certain, and specific, has remained unanswered by the Attorney General. I now have this telegram, showing that investigators representing the Attorney General are in my own State trailing me, with the expectation of trying to silence me by threatening to hurt me. I do not care. The Attorney General is welcome to do it. I say, however, that the man who, instead of defending himself, is cowardly enough to sneak around and thus seek to intimidate others from telling the truth about him, is a mighty poor representative of this Government as the Attorney General and the head of its great Department of Justice. No man who has a true conception of what an American citizen is ever did it, and yet the Attorney General does that thing.

Mr. President, on yesterday the Attorney General, in order to shield himself, undertook to put the brand of Ananias on the brow of the Senator from Indiana [Mr. WATSON]. I do not know how far Senator WATSON will submit to it. I have no doubt on earth but what Senator WATSON told the God's truth, and the Attorney General knows it. Another Republican Senator on this floor told Senator WATSON of Georgia and myself, sitting out there in the lobby, shortly after that incident, that the Attorney General told him the same thing. Now, in order to shield himself from criticism, he may have induced the Senator from Indiana to say, "You may make whatever statement you please, and I will remain silent." I do not doubt that high office may have great attraction for some people, but, so help me God, before I would submit to such an infamy, I would surrender my commission and go back to the people who sent me here and make an honest living by some other means.

But, waving that aside, I want to show that unless the interview which the Attorney General himself gave out in 1912, and which was published in a paper in his own city, misrepresented him, the Attorney General did not tell the truth then. I shall read it. It is short, and will not take much of the time of the Senate. This is an interview given out to a paper published in Columbus, Ohio. This is what Mr. Daugherty said in this paper in 1912:

Mr. Daugherty convinced the President through the Attorney General—George W. Wickersham—that Mr. Morse has but a few months to live, and the President thereupon commuted the banker's sentence, so he could be released at once.

Here is what Mr. Daugherty said:

My interest in the case was not as an attorney to get Mr. Morse's freedom.

That is what Daugherty said.

My interest in the case was not as an attorney to get Mr. Morse's freedom but representing a number of certificate holders in a steamship company interested with Mr. Morse. Mr. Morse's attorneys in Atlanta are Anderson, Felder, Roundtree & Wilson, a firm with which our firm has had considerable business, and we became interested through them.

About $2,000,000 is involved in having the affairs of these certificate holders straightened out satisfactorily, and unless they could get the advantage of Mr. Morse's aid—for he is a genius and a wizard—a lot of innocent people would suffer. His health was such that it was necessary to get him in a position to assist us as soon as possible. The President said a year ago when efforts were made to get a pardon for Morse that he would not consider the case again until January 1, 1913, but by that time Morse will be dead.

So I went to Washington and laid the facts before Secretary of War Stimson and before the Attorney General and Judge Hough, the trial judge. Mr. Wickersham was opposed to taking any action whatever the first time I saw him, but the facts were presented to him so completely that he took the matter up, had examinations made by Government physicians, and then laid the matter before the President. The President personally sent a Government physician to make an examination and report to him, then commuted the sentence.

Morse was sent to the penitentiary as the result of a bank war in New York City. There were three or four examinations of his bank, and all reported everything O. K., but still another man was sent to make another examination, and he made the report that caused the trouble.

Morse's violation of the law was entirely technical.

That was Daugherty's statement in 1912.

Mr. WATSON of Georgia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arkansas yield to the Senator from Georgia?

Mr. CARAWAY. I yield to the Senator.

Mr. WATSON of Georgia. Let me remind the Senator from Arkansas that the very first paragraph in Felder's letter about this thing states that Morse was to pay Daugherty a retainer of $5,000.

Mr. CARAWAY. I have the letter right here and am going to read it.

Mr. WATSON of Georgia. I want to say that sometimes a lawyer of high standing will take the case of a man whom he knows to be all right, knows to be honest, without a retainer, but no lawyer whose services are really valuable will take the case of an accused person who is unknown to him without a retainer and a binding contract as to the ultimate payment of the remainder of the fee, and in Felder's letter he says that

Daugherty, in the New York office or in a New York hotel, during an interview between these three crooks—Morse, Felder, and Daugherty—denounced Morse in unmeasured terms because he had not paid the remainder of the fee.

Mr. CARAWAY. I think he had a right to do it.

Mr. WATSON of Georgia. I am simply reminding the Senator of the facts.

Mr. CARAWAY. I thank the Senator from Georgia. I read the interview in which Daugherty said, in 1912, that he did not represent Morse, except that Morse was a witness; that Morse's attorneys were Roundtree, Felder, and so on, in Atlanta.

I have here a photostatic copy of a letter, which letter is now admitted to be authentic, which was read into the RECORD the other day, bearing Daugherty's law firm's title and post-office address, dated April 30, 1913, which reads:

Mr. C. W. MORSE,
New York City.

MY DEAR SIR: I inclose you herewith copy of the letter setting forth the contract you made of August 4, 1911, with Mr. Felder for his services and mine. You will observe that I was correct in the statement that there was a balance due of $25,000 when you were commuted. I also hand you a copy of a paper you handed me in the prison some time after that time, and I have to-day asked Mrs. Daugherty to send to you by express the papers which I got from Harry and others from time to time which you spoke to me about.

As I advised you, I have telegraphed Mr. Felder and written him to meet me there with you next Monday or Tuesday. I will advise you as soon as I have a confirmation from him of this engagement.

Yours very truly,

H. M. DAUGHERTY.

Here is the contract, Mr. President, and I want to focus the attention of the Senate on this. Daugherty in 1912 said:

My interest in the case was not as an attorney to get Mr. Morse's freedom but representing a number of certificate holders in a steamship company interested with Mr. Morse. Mr. Morse's attorneys in Atlanta are Anderson, Felder, Roundtree & Wilson, a firm with which our firm has had considerable business, and we became interested through them.

He makes the positive, unequivocal declaration that his interest in the Morse case was not as an attorney to get him out of prison, but that he was representing other people. Here is the contract he made with Morse, and here is a letter written to C. W. Morse by Anderson, Felder, Roundtree & Wilson and signed by Felder, and that is the letter which Daugherty transmitted to Morse in 1913 to show that Morse was his client and that Morse owed him $25,000:

In further relation to the employment of Hon. H. M. Daugherty and myself, permit me to say that we will undertake to represent you in your civil and criminal matters upon the following basis.

Not representing some stockholders, but "we will represent you, Charles W. Morse, in your criminal and in your civil matters on the following basis." Then it continues:

1. You are to pay Hon. H. M. Daugherty a retainer of $5,000 and the actual expenses incurred by him in looking after your matters, expenses not to exceed $1,000.

That was to be the retainer. Morse was to pay Daugherty that before he—Daugherty—moved, and I have Felder's letter here, saying that amount was paid, but Daugherty yesterday said Morse did not pay it.

2. I will pay such expenses as I may incur in connection therewith.

3. You are to direct counsel heretofore employed to withdraw your appeal in the habeas corpus proceedings heretofore instituted.

4. We are to receive, in the event we secure an unconditional pardon or commutation for you, the sum of $25,000, which is to be in full compensation for services rendered in connection with your application for pardon.

Now, Daugherty says he did not represent him, and here is where he contracted for $25,000 to do it. I continue reading:

5. We are to receive 25 per cent of whatever sums we may be able to recover by compromise or litigation in the matter of the Metropolitan Steamship Co., said transaction being fully described in your letter addressed to me dated August 2, 1911. If we find it necessary in the prosecution of these matters to have associated with us other counsel, we are to select such counsel, subject, of course, to your approval, and they are to be provided for out of our compensation.

Look at this significant language:

6. In all matters herein undertaken in your behalf we are to have full and absolute control, and you are to accept implicitly our counsel and advice.

No lawyer ever made a client sign a contract like that who had an honest lawsuit.

If the above and foregoing terms are satisfactory, you will signify your acceptance thereof in writing.

I remain, yours very truly,

THOMAS B. FELDER.

P. S.—You can terminate this contract at any time after January 1, 1912, by giving 10 days' notice in writing.

THOMAS B. FELDER.

I accept the above, this the 4th day of August, 1911.

C. W. MORSE.

Now, the Attorney General in 1912 said that he did not represent Morse in getting his pardon. Here is his contract in which he contracted for $25,000, with an additional $5,000 as a retainer fee and $1,000 expenses, contingently to get him out of the penitentiary either with a pardon or commutation of sentence. I do not care whether the Senator from Indiana [Mr. WATSON] told the truth or not, the Attorney General has got to square this question of veracity with Harry M. Daugherty in 1912, and this contract of Harry M. Daugherty made in August, 1911, and published the other day. Until he does it there is not a man who walks the earth but will know that one of those statements is not the truth, and Harry M. Daugherty made both of them.

That is not all, Mr. President.

Mr. WATSON of Georgia. Mr. President——

Mr. CARAWAY. I yield to the Senator from Georgia.

Mr. WATSON of Georgia. Yesterday there was in my office in the Senate Office Building a gentleman from Georgia, who has been mayor of his city, judge of one of the courts, and president of one of the most exclusive clubs in the country. He said that in Brunswick there is now living a retired physician, of independent means and high character, who knew all about the manner in which Daugherty and Felder and Morse worked this fraud on President Taft and that this retired doctor would be perfectly willing to give President Harding the benefit of his knowledge.

I contended yesterday and do now that fraud vitiates promissory notes, contracts, mortgages, deeds, last wills and testaments. By the force of logic it would also vitiate a pardon obtained by fraud. Such a thing would have no existence in law and could not be pleaded in any court of justice as evidence, because the judge would rule it out as having been vitiated by fraud. Therefore, President Harding could treat the pardon as null and void and send United States marshals to Maine and seize Morse, put him back in the penitentiary, and compel him to serve out his term of 16 years.

Mr. CARAWAY. Oh, Mr. President, Attorney General Wickersham, as shown by the letter of Felder in 1917, had this evidence—and I shall read it in the RECORD in a minute—that a fraud had been perpetrated on the Government in procuring the commutation of Morse's sentence, and the present Attorney General went with Felder to Mr. Wickersham and made an elaborate argument, saying that the President once having issued this commutation, it was final and could not be modified or revoked, and apparently wrung from him a promise that if he ever intended to revive it he would let them, Felder and Daugherty, know. Does anyone think the Attorney General in good faith, after having prevented another Attorney General who knew the whole facts from acting in this matter, would now say, "I have changed my relations and I am going to consent that justice be done."

Mr. WATSON of Georgia. Answering the question of the Senator from Arkansas, I will say about Wickersham, that I think he is as rotten as Felder and Daugherty. His record in regard to the friar lands in the Philippines proved it. He wrote out and back-dated the opinion in the Ballinger case, and they tried to bluff the thing over Congress and the country, as Daugherty and Felder and Morse are now trying to bluff the country on this matter, but finally the pressure became so strong that Ballinger had to resign.

Mr. CARAWAY. I am not familiar with that feature of it.

Mr. WATSON of Georgia. The Senator from Nebraska [Mr. NORRIS] is.

Mr. CARAWAY. The one thing I do know is that Felder's letter, which some way or other I have mislaid for the moment, calls attention to the fact that all these matters were brought to the notice of Attorney General Wickersham, and that he had knowledge of the fraud, and that Mr. Felder and Mr. Daugherty if not originally parties to the fraud became parties to it by at once coming to the defense of their client Morse. They argued and persuaded and induced, by whatever means I do not know, the Attorney General from taking action, although Felder in his letter said, "We were not unmindful of the fact of the damaging evidence the Department of Justice had," and then went into detail as to some of these things—that Morse was given a chemical or soapsuds each time before he was examined to make his kidneys bleed so that doctors would think he had Bright's disease when he did not. Felder, in his desire to write letters, set out the history of the fraud, and then said, oh, so naively, that "Daugherty and I did not have anything to do with it, and we were not even suspected, but we were afraid to sue our client when he would not pay us because we were afraid somebody would talk about it, and we had had about as much notoriety and publicity as we wanted, and we were also afraid if the public got hold of the fact that the fraud had been perpetrated the Attorney General then would set aside the commutation of sentence." Lord, oh, Lord, Felder in his desire to write letters writes it all.

In this letter which Attorney General Daugherty wrote yesterday there is something significant, aside from not being candid—and that is a polite way of saying what I know it contains. Here is what it says:

MY DEAR SENATOR:

It is addressed to Hon. JAMES E. WATSON. Of course, Daugherty took advantage of the fact that he knew WATSON was out of the city. I will read it all:

OFFICE OF THE ATTORNEY GENERAL,
Washington, D. C., May 22, 1922.

Hon. JAMES E. WATSON,
United States Senate, Washington, D. C.

MY DEAR SENATOR: To-day for the first time I have had an opportunity to read the CONGRESSIONAL RECORD of May 12, page 6175, relative to the colloquy in the Senate regarding my connection with the Morse case. I have read newspaper comment on this discussion, but it was of a general character, and I thought it required no particular attention on my part.

I remember very well a general discussion we had some time ago regarding the Morse case. I certainly did not in that discussion make the statement to you that I had no connection with the Morse cases, civil and criminal. My connection with these cases was well known throughout the country, because of extended publicity some years ago. I never denied it, and I have no disposition to deny it now. Nothing was done by me or anybody else in connection with these cases that could not be known to the whole world without reflection upon anyone.

Morse was released upon the recommendation of Attorney General Wickersham, who based his recommendation upon the reports of eminent physicians of the Government, including the Surgeon General of the Army, and the records in the department show all the facts pertaining to the physical condition of Morse when he was released, which was the sole ground for Executive clemency.

As for compensation, I never received anything from Mr. Morse personally. All I ever received from anybody in connection with the Morse cases, both civil and criminal, was about $4,000 advanced to me by Mr. Felder, and was about half enough to pay my necessary expenses and disbursements connected with over a year's active investigation, preparation, and service in the cases.

I regret, Senator, if you misunderstood me.

Sincerely yours,

H. M. DAUGHERTY,
Attorney General.

There are two things in the letter, Mr. President. The first is that he had not had this matter called to his attention until yesterday. Ah, the papers were full of editorials demanding his resignation on the very ground of lack of veracity, as disclosed by the statements of the Senator from Indiana and the record of his contract with Morse. He had seen "only general discussion" of it in the newspapers. The newspapers carried the contract in full.

Now, Daugherty says there is nothing about his connection with that contract that anybody could not know, and it does not reflect on anybody. I appeal to every honest man—I will not say lawyers—when it is admitted, as it is in this case, that the Attorney General had evidence that Morse was doped to give him the appearance of Bright's disease when he did not have it, if he would say that there was not something connected with the case that everyone should not know and that it does not reflect upon him (Daugherty)! There is not an honest lawyer anywhere who would not have retired from the case if he found out that he was being imposed upon and being made to make a representation for his client that was not true, because whatever public opinion may be, lawyers are not hired to lie. An honest lawyer would not do it any more than honest preachers or honest doctors or honest farmers or anybody else that is honest.

Now, the Attorney General, with that shameful record of having perpetrated a fraud upon the Executive, Mr. Taft, who was his personal friend and political friend, and then went to the Attorney General, Mr. Wickersham, and induced him not to take action, says that there was nothing about that case that he would object to people knowing or that anybody could criticize.

That is not all. The Attorney General says he only got $4,000, and he got that through Felder. He says, "That is all I got personally." He does not say who else got money. That was only half enough to pay his part of the expenses, he says. I want to ask the Attorney General this question: What use did you have, Mr. Attorney General, with $8,000 for your part of a swag to get one man's sentence commuted, if he had an honest case for his commutation?

Mr. WATSON of Georgia. What were his expenses?

Mr. CARAWAY. I should like, as the Senator from Georgia suggests to me, for the Attorney General to give us now a bill of particulars, an itemized expense account. "What acts did you do, Mr. Attorney General, that took $8,000 to present Morse's case and present all these things? Whom did you employ? What doctor did you get to issue a false certificate that you had to pay him any such exorbitant fee as that? You paid Fowler, Mr. Attorney General, by putting him back into the place from which he was kicked for being crooked in this deal; you have made him the doctor in charge of the Atlanta Penitentiary, and he is drawing the salary now. You paid him in that way. To whom did you pay the $8,000? In common decency, Mr. Attorney General, you can not tell the people that you spent $8,000 legitimately to represent one man in getting his sentence commuted. You were not employed as a lawyer, as you said, to represent a client, because your counsel tells why you were hired, and I think his letter is authentic and admitted to be authentic. Even Felder, who wrote the letter, says it is the truth. It is dated Washington, D. C., October 12, 1917, and it is addressed to Hon. Leon O. Bailey, Hanover National Bank Building, New York, and reads:

MY DEAR SIR: I am in receipt of your favor of recent date advising me that Mr. Grafton Johnson had turned over to you for collection or adjustment $25,000 of common and preferred stock in the Morse Securities Co., which I gave to him a year ago as collateral security for a loan which I obtained. You ask me to acquaint you with the facts of this transaction before you take the matter up with Mr. Morse and to tell you why interest upon these stocks has not been paid and why they were transferred to him.

He goes into that, Mr. President. I shall not relate it all, but I want to read a little of it:

To begin at the beginning—

That is Felder's language. He believes in beginning at the beginning and never ending—

To "begin at the beginning," permit me to say that after Charles W. Morse was sent to the penitentiary in Atlanta, Ga., under a 15-year sentence, and after his attorneys and family had exhausted every resource that they possessed or ingenuity could suggest, Hon. Fred L. Seely, the then editor and proprietor of the Atlanta Georgian, who had, as I understand it, a benevolent and charitable interest in the fate of Mr. Morse, and who had been for some years theretofore a client of mine, came to my office and stated to me that I had convinced him of my resourcefulness and my capacity to "do things."

And "do things" is in quotations. And "do things" is exactly what he always has done, according to his reputation—

and while the Morse situation seemed hopeless, because the President had refused on the best showing that could be made either commutation or pardon, yet he desired me to examine thoroughly the record, and if, in my judgment, anything could be done, he would cause me to be employed in the case—

Not "employ me," but they are letting on now like Seely was their client and that Seely employed them, but here is what Felder said then:

and if, in my judgment, anything could be done, he would cause me to be employed in the case—

Not "employ me," but "would cause me to be employed"—

and would see that I was substantially compensated for services rendered in proportion to their value to Mr. Morse.

That is a contingent fee.

I read the record, studied the case thoroughly, got in touch—

Here is where Daugherty comes in—

with Mr. H. M. Daugherty, of Columbus, Ohio, who stood as close to the President as any other lawyer or citizen of the United States, interested him in the case, agreeing to divide with him any compensation that I might receive.

Why was he hired? Because he stood as close to the then President Taft as any lawyer or any citizen of these United States; not because he was a lawyer, not because he had any interest in some litigation, as Daugherty says in his interview in 1912, but because he had the confidence of the President of these United States. "I got in touch with him, and I agreed that whatever we got out of Morse I would divide with him; and here is the contract I made with Morse." The $5,000 retainer and $1,000 expense money were to be paid Mr. Daugherty to start with. I want to read it from the letter:

We took the matter up with the Attorney General and with the President, stating to them that the record disclosed that in refusing to extend Executive clemency reasons were given which were not borne out by the record, and we requested that the case be reopened. We were informed by the President and the Attorney General that the act of the President rendered the matter a "closed incident" for the present; but if we would bring the matter to their attention again just before the term of office of the President expired in March, 1913—

That is, after the next election—

the matter would be reopened and perhaps a different action taken in respect thereto.

They did not want to take it up on the eve of the primary in which Mr. Daugherty was acting as chairman, as I understand, of the committee in Ohio promoting Mr. Taft's candidacy for reelection. "You boys wait until we get beyond the election and come back and the President will talk to you."

This decision was communicated by Mr. H. M. Daugherty and myself to Mr. Morse who had agreed to pay—

Now, listen—

$6,000 cash to cover expenses (this sum was paid).

Morse had not agreed to pay the $6,000 cash; he had agreed to pay $5,000 retainer fee to Harry M. Daugherty, and $1,000 expense money to Harry M. Daugherty, making $6,000.

This decision was communicated by Mr. H. M. Daugherty and myself to Mr. Morse who had agreed to pay $6,000 cash to cover expenses (this sum was paid) and $25,000, conditional upon our obtaining his release from the penitentiary. When this result was reported to Mr.

Morse, he stated to us in the presence of the penitentiary guard that if we would renew our efforts to obtain his release he would pay us, in addition to the amount agreed upon, the sum of $100,000, and exclaimed, "Gentlemen, I will make you both rich if you will get me out of here."

At this consultative conference with Morse, I thought that I had discovered in him a very marked physical deterioration since the last conference I had with him, so after leaving the penitentiary I called upon Dr. A. L. Fowler—

He was there—

at his office in the Candler Building (this doctor having been the prison physician at the date of the inception of Morse in the penitentiary)—

I am not responsible for the language—

and asked him to inform me as to the state of Morse's health at the date of his inception in the penitentiary and thereafter during his incumbency as prison physician. Doctor Fowler referred to his reports and advised me that his initial examination disclosed casts in his urine which denoted incipient Bright's disease; that this disease was progressive; that the mental condition exercised a powerful influence over the physical and accelerated its ravages; and that he entertained no doubt that if Morse was left in the penitentiary for any considerable length of time that this disease would progress rapidly and result in his death.

Here is Felder with this "cue." What cue? The statement about Bright's disease.

With this cue, Mr. Daugherty and myself took up the matter de novo. We returned to Washington, discussed this phase of the case with the Attorney General and with the President. We received an intimation that if a physical examination of Morse by experts verified our suspicions that his continued incarceration would prove fatal, he would be released. A board of medical examiners was appointed at our request, an examination was made, and the three physicians reported that Morse's condition was not serious.

Then, as I understand from the Senator from Georgia, they got another board appointed that never saw him, and Doctor Fowler or somebody transmitted a specimen of his urine. Is that what the Senator from Georgia understands?

Mr. WATSON of Georgia. Or that of somebody else.

Mr. CARAWAY. Well, that of somebody else; which they said was his, and a board of physicians—I did not know it before—who never saw him, were appointed to pass upon the urine that was said to be Morse's, but doubtless belonged to some "nigger" down there in Georgia. They reported Morse was in bad shape, and when he was pardoned they never let a single man, woman, or child in Georgia see him, but they hastened him away in a closed carriage to the hotel, and then shipped him out on a special car, so that nobody could see him. They carried him to his home in New York, as I understand, and nobody, not even the reporters, were allowed to see him. From there they hustled him on board a ship, into a closed stateroom, and shipped him out of the country. He took a drink of water or something in Europe and came back and at once reopened his office and commenced to do business along the same old lines. But, God bless his soul, he is a good client; he followed instructions. They contracted with him that he must be reasonable; they said, "Whatever we tell you, you must do; if we want you to lie, you will lie." He did not hesitate, but kept it up until they wanted his money, and then he said to them, "A crook will lie to keep out of the penitentiary, and a crook is not expected to keep his word, and I will not pay you." Daugherty got mad, according to the letter, and denounced Morse in a hotel in New York for everything he could think of, berating him with every imaginable epithet that a man could apply to another, because he had not paid, and Felder said to Daugherty, "Do not let's get mad; money is better than anger." So they followed him up and got $25,000 of bonds from Morse, but Felder says they turned out to be "soap-wrapper" bonds, and he could not collect on them. But he said they could not sue him because they found out that the then Attorney General had discovered the fraud that had been practiced in getting him out of the penitentiary, and if they sued him that this will come out, and besides, "Harry and I had got about all the notoriety out of this thing that we wanted." Therefore he would not sue him. Oh, Mr. President, the Attorney General said he did nothing in this matter that anybody could criticize. My God, Mr. President, if that is the idea of the Attorney General of what is professional ethics, God pity this country so long as he is Attorney General of these United States.

Mr. WATSON of Georgia. Mr. President——

Mr. CARAWAY. I yield to the Senator from Georgia.

Mr. WATSON of Georgia. Let me read into the RECORD, Mr. President, an additional paragraph from a letter from South Carolina, the writer of which is vouched for by the junior Senator from South Carolina [Mr. DIAL]. I have not had the opportunity of consulting the senior Senator from South Carolina [Mr. SMITH], but the writer refers to both Senators. I will not use his name, because he marks the letter "personal."

You will recall that Felder came to South Carolina and was employed to assist the attorney general of the State in the investigation of the dispensary graft scandal several years ago. I am one of the few people in the State that realize that he by virtue of this employment protected the grafters, hoodwinked the attorney general, and got away with it.

Under the inspiration of his success he returned to Atlanta, sought and obtained employment to assist in the Frank prosecution, and by virtue of his position sought to frame up a defense for Frank, until he was caught and exposed by Dorsey and practically driven out of Georgia.

From my knowledge of Felder's methods and the incidental fact that he sought to employ Investigator Scaife in the fraud cases, I feel sure that the system of double-crossing, Felder's method of handling graft and other cases, is being employed in the graft cases.

As I said at the outset, a knowledge of Felder's methods, obtained by close study and observation, brings to me the firm conviction that there is being framed up a gigantic fraud to conceal fraud, and I wish you Godspeed in your efforts to prevent it.

Mr. CARAWAY. Mr. President, of course I do not think there is any use of offering any more testimony about who Felder is, and Felder is not important at all, except that he seems to be the partner of the present Attorney General. Felder and the Attorney General "framed up" Taft and got a commutation of sentence, and I do not think any man on earth, however partisan he may be, could offer a word of defense of that transaction. It is conclusive, it is inevitably conclusive, and nobody can follow the record and not know that they perpetrated a fraud, and the Attorney General never has denied it.

Mr. NORRIS. Mr. President, may I interrupt the Senator?

Mr. CARAWAY. Yes.

Mr. NORRIS. The Senator was reading, when he was interrupted, from a letter written by Felder.

Mr. CARAWAY. Yes; from a letter written in 1917.

Mr. NORRIS. To a banker in New York.

Mr. CARAWAY. No; to a lawyer who was going to sue Morse.

Mr. NORRIS. On account of some bonds.

Mr. CARAWAY. Yes.

Mr. NORRIS. Does Mr. Felder in the letter narrate the method that they used to bring about the apparent sickness of Mr. Morse?

Mr. CARAWAY. I will read it. I am skipping a good deal, because it is a long letter. Felder, you know, runs to words. He is the only man I ever knew who liked to employ a whole paragraph to state his own infamy. He says that when they were trying to collect, when they went up to New York to see Morse, Morse ran away and would not see them. After he came back they had much trouble in getting into communication with him, but finally made an appointment to see him, and he says:

On this occasion Mr. Daugherty complained very bitterly of our treatment by Morse, became very angry, and left the office before the negotiations were conducted. After he left Mr. Morse requested me to take the stocks up to the McAlpin Hotel, where we were stopping, and to urge Mr. Daugherty to take a different view of the matter; to either accept the stocks in payment of our $25,000 demand or as collateral security to be redeemed by him at a very early date, stating that he would come by the McAlpin during the afternoon on his way home. I left his office about noon, went to the McAlpin, lunched with Mr. Daugherty, and explained the circumstances to him. He positively and emphatically declined to take the stocks, either in payment or as collateral security, although I urged him to do so, stating that I had confidence in Morse's integrity and faith in his purpose to make good his numerous promises.

About 4 o'clock that afternoon Mr. Morse and his son, Harry, appeared and came to my room; Mr. Daugherty came in. An animated discussion followed in which Mr. Daugherty denounced Morse in unmeasured terms, declining emphatically to accept the stocks tendered either as collateral or payment. In this humor he left the room, and after some further discussion with Mr. Morse he asked me to hold the stocks until he could make some other arrangement in respect to them. I told him that I could not use the stocks, but he left the room and left them on my dresser; and when I left the city that night for my home in Atlanta, Ga., I took the stocks along in my valise.

I am skipping in reading:

In conclusion, permit me to state that I have not been more aggressive in my efforts to force Morse to pay his obligations to us for the sole and simple reason that I have always felt apprehensive that if we brought suit or agitated the matter that immediate steps would be taken by the Department of Justice to secure an annulment of the Executive order and the return of Morse to the penitentiary. I have not been unmindful of the damaging evidence secured by the Department of Justice in the prosecution of its investigations to ascertain whether or not a fraud had been perpetrated upon the Government by Morse in his efforts to obtain his freedom; and while I knew that if a fraud had been perpetrated that Hon. H. M. Daugherty and myself were not only not connected therewith, but were not even suspected of being connected therewith, but that the disclosure and publicity would be disagreeable if not embarrassing to everybody concerned.

We were informed that the department was in possession of evidence going to show that after physicians were appointed to examine Morse and before they appeared on the scene that soapsuds or chemicals or something would be taken by him to produce hemorrhage of the kidneys, and that as soon as the examination was over that the patient would recuperate rapidly. As I have stated, we have not brought suit or instituted any proceedings in the matter because both Mr. Daugherty and myself felt that we had had all the notoriety and newspaper publicity that we should in reason have in connection with this transaction. As a matter of fact, during the years that have intervened I have had frequent intimations that this matter would be reopened, and I have always promptly taken steps to stop it. I have recently heard a well-authenticated rumor that steps are likely to be taken at any moment to have the matter investigated; that certain interests in New York were demanding that this be done.

Before that he said that he and Daugherty, when this matter arose, went to see Wickersham. Let me read that. It will take only a minute. He says:

A few days thereafter he went to New York, and instead of sending check for $25,000, or any other amount, he sailed for Europe for an indefinite leave of absence. As soon as I read in the press that Morse had gone to Europe without making any reference to his obligation to us, I immediately communicated with his son, Harry Morse, who had apparently directed his father's affairs, requesting an explanation. I received a very prompt reply to my letter, stating that the condition of his father's health was such as to require his immediate departure for some mineral spring in Europe; that his condition was such as to preclude his transacting any business before his departure, but he knew his father would effect a settlement with us upon his return to the States. Immediately after Morse's departure for Europe there appeared in the press of the country numerous sensational articles to the effect that there was nothing the matter with Morse's health; that his release from the Federal penitentiary had been secured by fraud, and officials were urged to take immediate steps to have him remanded to the penitentiary.

An investigation was instituted, and Mr. Daugherty and myself, as Morse's counsel, were advised that steps would likely be taken to have Morse remanded to the penitentiary to serve the balance of his sentence. His son, Harry Morse, requested Mr. Daugherty and myself to meet him and his brothers in Washington for a conference. We met him and his brother, who then resided in Baltimore, at the Willard Hotel. We conferred at length in relation to the matter, and a decision was reached that we should get in touch immediately with the Department of Justice and forestall, if possible, any efforts to carry out the threat. We made an appointment with the Attorney General—

That was Wickersham—

discussed the matter with him at length. We took the position in this conference that an Executive order having been signed and promulgated commuting the sentence of the said Morse, that it was not within the power of the Executive to either change, modify, or revoke the same. That if said order had been obtained by fraudulent means and artful practices and the department desired to test this question, that it would be necessary to take Morse into custody and submit the question to a jury whose exclusive province it was to pass upon the issue of fact.

We were requested to submit a brief upon this subject. I returned to Atlanta and devoted several days to the preparation of an exhaustive brief upon the subject; returned to Washington and submitted the same to the Attorney General. In addition to this, while in Atlanta I obtained additional evidence going to show that Morse was, in fact, suffering with Bright's disease.

Mr. WATSON of Georgia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arkansas yield to the Senator from Georgia?

Mr. CARAWAY. I yield.

Mr. WATSON of Georgia. Can the Senator from Arkansas inform the Senate and the country how the four sons of Morse kept out of the Army during the World War, when so many millions of other boys went? Is Bright's disease a family epidemic among the Morses?

Mr. CARAWAY. No, sir; I do not know. I have no information on that subject.

Continuing:

In this last-mentioned conference with the Attorney General he indicated that no immediate steps would be taken, and that if later any action looking to Morse's return to the penitentiary was taken that we would be duly advised. We have never been reimbursed for the expenses incurred in connection with the services rendered as above set forth, and no effort of any kind or character has been made to compensate us for these, although we were assured by the Morse brothers at the Willard Hotel that these expenses and a reasonable fee would be promptly forthcoming.

You know, Mr. President, he sets out the whole conspiracy. He tells what they did. He not only tells what they did but, after it was discovered, he tells the steps they took to prevent the President from righting a wrong.

Let me say this in conclusion, Mr. President:

The present Attorney General, Harry M. Daugherty, has possessed the confidence of two Executives of this land. He possessed the confidence of President Taft.

This letter shows that he sold him out. He betrayed him for $25,000, and engaged in a conspiracy to make Mr. Taft do a thing that Mr. Taft would not have done if he had known the facts; and Taft set down in his article in 1914 that this case shook his confidence in expert opinion, and also he might have said in professional friends.

The Attorney General possesses the confidence of one other Chief Executive, the present President of these United States; and if the statements can be believed that are made by Members of Congress of his own party, he has betrayed this administration just as he betrayed the administration of President Taft.

I do not know what the present President will do. The conduct of the Attorney General may meet his approval. I shall be somewhat surprised if it does. At least he might remember that President Taft, who followed Daugherty, in the subsequent election received eight electoral votes. He got Vermont and he got Utah. I shall be much mistaken, Mr. President, if the present President, if he does not eliminate from his Cabinet the present Attorney General, in the coming election will get any more than Utah.

Mr. McCUMBER. Mr. President, there is no Harry Daugherty amendment proposed to paragraph 316.

Mr. CARAWAY. No; he is on the free list.

Mr. McCUMBER. There is no Attorney General amendment to paragraph 316; but, Mr. President, having spent an hour and forty minutes this morning without ever touching the tariff bill, I think it is quite proper for me to say to the Senator from Arkansas and to other Senators that while there is no rule at present which will enable the Senate to proceed in an orderly way to the business before it, at least I might suggest that if Senators feel that it is necessary to do any kind of laundry work in the Senate we ought to follow the ancient and honorable custom of making Monday the wash day, and, Mr. President, like our forefathers, we should approach with a contrite and patient heart Blue Monday.

Mr. WATSON of Georgia. Mr. President——

Mr. McCUMBER. Just a minute. But, Mr. President, we have to-day only this question presented by the senior Senator from Arkansas [Mr. ROBINSON], as to whether we should so amend paragraph 316 as to reduce the rate to that of the Underwood tariff; and I hope that we may hold straight to that one proposition until we dispose of it.

I yield to the Senator from Georgia.

Mr. WATSON of Georgia. Mr. President, if it be true, as is contended by the Senator from Arkansas [Mr. CARAWAY], that the Department of Justice is being systematically used by corruptionists to cloak the frauds of those who robbed the Government while our soldiers were at the front shedding their blood under the flag, is not that quite as important as any item in this tariff bill?

Mr. McCUMBER. Well, Mr. President, one can easily see into what this controversy is developing. I know nothing about the case as between Mr. Daugherty and Mr. Felder and Mr. Morse. I know absolutely nothing about it except as I am compelled to listen day after day to what is being presented. Mr. Daugherty is not here to defend himself, and in that controversy between themselves there are courts and there are other places where they can be heard. Inasmuch as they could have no hearing here where all sides could open up their case, it seems to me, at least at the present time, that we ought to hold to our tariff bill and discuss the real question at issue; and, being in charge of this bill, I am going to do all I can to invite—aye, to plead with Senators that we consider this bill and, if it is necessary, to take some day off to consider all that we may say upon other questions; that we fix a day for that purpose rather than to take up by piecemeal day after day an hour or two hours upon this question. The Senator sees that there are no Senators present except the few who gather around the Senator to listen to that subject, because it is not pertinent to the question under discussion. Now let us return to the tariff bill and to the amendment offered by the Senator from Arkansas.

POST OFFICE DEPARTMENT APPROPRIATIONS.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives on certain amendments of the Senate to House bill 9859, the Post Office Department appropriation bill, which was read as follows:

IN THE HOUSE OF REPRESENTATIVES, UNITED STATES,
May 13, 1922.

Resolved, That the House recede from its disagreement to the amendments of the Senate numbered 40, 54, 55, and 59 to the bill (H. R. 9859) entitled "An act making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes," and concur therein;

That the House recede from its disagreement to the amendment of the Senate numbered 32, and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment insert: "*Provided*, That the Postmaster General may use not exceeding $10,000 of this appropriation for adjusting claims arising under section 1 of the act entitled 'An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1886, and for other purposes,' approved March 3, 1885: *And provided further*, That that part of the act approved March 3, 1885 (23 Stat. L., p. 386), which provides that a lease for premises for use as a post office shall cease and terminate whenever a post office can be moved into a Government building, is hereby repealed."

That the House recede from its disagreement to the amendment of the Senate numbered 58, and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment insert:

"SEC. 4. That for the purpose of carrying out the provisions of the act entitled 'An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes,' approved June 11, 1916, and all acts amendatory thereof and supplementary thereto, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the following additional sums, all such sums to be expended in accordance with the provisions of such act:

"The sum of $65,000,000 for the fiscal year ending June 30, 1923.

"The sum of $75,000,000 for the fiscal year ending June 30, 1924.

"PAR. 2. For the purpose of carrying out the provisions of section 23 of the Federal highway act, approved November 9, 1921, there is hereby authorized to be appropriated for forest roads and trails, out of any

money in the Treasury not otherwise appropriated, the following additional sum, to be available until expended, in accordance with the provisions of said section 23: The sum of $6,500,000 for the fiscal year ending June 30, 1924.

"PAR. 3. For the purposes of this section and of the acts heretofore making appropriations to aid the States in the construction of rural post roads the term 'bridges' includes railroad grade separations, whether by means of overhead or underpass crossings.

"PAR. 4. If any State, for a period of one year from the date the Secretary of Agriculture approves, or has heretofore approved, a road project, shall fail to put under contract such road project, the Secretary of Agriculture may require the said State to submit one or more projects to replace the said project; and if the said State shall fail to submit such other projects within the time set by the Secretary of Agriculture for the State to act, the Secretary of Agriculure may order the sum of money allotted to the said road project returned to the general road fund, and he shall then reapportion said sum of money among all the States as provided by the Federal highway act and all amendments thereto.

"PAR. 5. Section 5 of the act entitled 'An act to provide appropriations for the Post Office Department, and for other purposes,' approved February 28, 1919, is hereby amended to read as follows: 'That the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved June 11, 1916, is hereby amended to provide that the term "rural post roads." as used in section 2 of said act, shall be construed to mean any public road, a major portion of which is now used, or can be used, or forms a connecting link not to exceed 10 miles in length of any road or roads now or hereafter used for the transportation of United States mails, excluding every street and road in a place having a population, as shown by the latest available Federal census, of 2,500 or more, except that portion of any such street or road along which the houses average more than 200 feet apart: *Provided*, That section 6 of said act be further amended so that payments which the Secretary of Agriculture shall make, from sums appropriated under the provisions of this act or any act amendatory thereof or supplemental thereto for the fiscal year ending June 30, 1923, shall not exceed $12,500 per mile, exclusive of the cost of bridges, of more than 20 feet of clear span: *Provided further*, That the payments which the Secretary shall make from sums appropriated under the provisions of this act or any act amendatory thereof or supplemental thereto, after the fiscal year ending June 30, 1923, shall not exceed $10,000 per mile, exclusive of the cost of bridges, of more than 20 feet of clear span: *Provided further*, That the limitation of payments herein provided shall apply to the public-land States, except that the same is hereby increased in proportion to the increased percentage of Federal aid authorized by section 11 of the act entitled "An act to amend the act entitled 'An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes,'" approved November 9, 1921.'

"PAR. 6. Section 24 of the act entitled 'An act to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes,"' approved November 9, 1921, is amended to read as follows: 'That in any State where the existing constitution or laws will not permit the State to provide revenues for the construction, reconstruction, or maintenance of highways, the Secretary of Agriculture shall continue to approve projects for said State until five years after November 9, 1921, if he shall find that said State has complied with the provisions of this act in so far as its existing constitution and laws will permit.'

"PAR. 7. If any officer, agent, or employee of the United States, or any officer, agent, or employee of any State or Territory, or any person, association, firm, or corporation or any officer or agent of any person, association, firm, or corporation shall knowingly make any false statement, false representation, or false report as to the character, quality, quantity, or cost of the materials used or to be used, or the quantity or quality of the work performed or to be performed, or the costs thereof in connection with the submission of plans, maps, specifications, contracts, or costs of construction of any project submitted for approval to the Secretary of Agriculture under the provisions of the Federal highway act, or shall knowingly make any false statement, false representation, or false report or claim for work or materials for the construction of any project approved by the Secretary of Agriculture under said Federal highway act and all amendments thereto, or shall knowingly make any false statement or false representation in any report required to be made under said Federal highway act or acts supplementary thereto with the intent to defraud the United States shall, upon conviction thereof, be punished by imprisonment not to exceed five years or by a fine not to exceed $10,000, or by both fine and imprisonment within said limits.

"PAR. 8. That if any provision of this section, or the application thereof to any person or circumstances, shall be held invalid, the validity of the remainder of the section and the application of such provision to other persons or circumstances shall not be affected thereby.

"PAR. 9. That all acts or parts of acts in any way inconsistent with the provisions of this section are hereby repealed."

That the House recede from its disagreement to the amendment of the Senate numbered 60, and concur therein with an amendment as follows: In line 1 of said amendment, strike out "8" and insert "6."

That the House recede from its disagreement to the amendment of the Senate numbered 61, and concur therein with an amendment as follows: Strike out "9" and insert "7."

That the House insist upon its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 17, and 52, and agree to the further conference requested by the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. SLEMP, Mr. MADDEN, and Mr. SISSON be the managers of the conference on the part of the House.

Mr. TOWNSEND. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the action of the House.

The PRESIDENT pro tempore. Without objection, it is before the Senate for action.

Mr. TOWNSEND. The first three amendments mentioned do not make any material changes in the Senate provisions. No. 32 is simply a rewording of the proposition relative to leases, to carry out the clear intent of the Senate and the House. Nos. 60 and 61 are simply renumbering sections. I move that the Senate concur in these House amendments.

The motion was agreed to.

Mr. TOWNSEND. Amendment No. 58 makes a change in the road program. The House substituted its bill for the Senate provision. I move that the Senate insist upon its disagreement to the road proposition and ask for a further conference.

Mr. McCUMBER. Mr. President, if there is no objection and there will be no debate on the subject, I certainly do not want to interpose an objection myself, but it looks to me, with several Senators on their feet, as though there is likely to be some debate upon the matter.

Mr. TOWNSEND. I do not think there will be.

Mr. ROBINSON. I wish to ask the Senator from Michigan if I correctly understood his statement. The Senator is not asking the Senate to recede on what may be termed material amendments?

Mr. TOWNSEND. We are not. The amendments we have agreed to are amendments that had to go back to the House and the House made some verbal changes in three of them. The one great amendment now in dispute between the two Houses is the road legislation. There is a material difference on that, and I want the Senate to insist upon its amendment, in order that we may consider it further.

Mr. ROBINSON. I make no objection.

Mr. HEFLIN. I understand that the Senator from Nevada [Mr. PITTMAN] is interested in the proposed road legislation and wants to be in the Chamber when the matter is considered.

Mr. TOWNSEND. If I understand correctly, Mr. President, the Senator from Nevada is insisting as strongly as we are against the House amendment to Senate amendment No. 58. His State has petitioned me, through its highway commissioners, and in the discussion we had on the floor the other day it was clear that the Senator from Nevada is in agreement with the Senate provision rather than with the House provision.

Mr. HEFLIN. Will not the Senator state briefly what difference there is between the House provision and that of the Senate?

Mr. TOWNSEND. The Senate, as the Senator will recall, provided for an appropriation of $50,000,000 for the coming fiscal year and an authorization of $65,000,000 for the next year and $75,000,000 for the following year, under existing law. The House bill, known as the Dunn bill, makes an amendment to the existing law, which is the principal objection to it, as we look at it. It provides that there shall be a limitation on the expenditure per mile, on the system of roads as it may be made up, of $12,500 for the coming fiscal year and $10,000 for the next year. It makes no appropriation; it simply authorizes $65,000,000 for the coming fiscal year and $75,000,000 for the next.

The difference between the two Houses now is on the question as to whether we shall carry an appropriation this year, as provided by the Senate, and whether we shall maintain the same ratio as to the expenditure of the money per mile as in existing law.

Mr. ROBINSON. If the Senator from North Dakota will permit me, from the statement of the Senator from Michigan I think the course he has suggested is calculated to carry out the will of the Senate as heretofore expressed, and for that reason I again say I have no objection to the present consideration of the report.

Mr. TOWNSEND. I have heard no objection from any Senator. In fact, I have had requests from Senators that we do insist on the action of the Senate.

Mr. ROBINSON. In view of the fact that I am informed that the Senator from Nevada is on his way to the Senate, I suggest that we let the matter go over for awhile and proceed with the tariff bill.

Mr. TOWNSEND. I am very anxious to get it into conference.

Mr. HEFLIN. I understand the Senator from Nevada will be here in a moment.

Mr. ROBINSON. The Senator from Michigan can call it up at a later hour in the day.

Mr. HEFLIN. I see the Senator from Nevada entering the Chamber now.

Mr. ROBINSON. I withdraw my objection, the Senator from Nevada having arrived in the Chamber.

Mr. PITTMAN. Mr. President, I simply wish to know from the chairman of the committee what action the conferees took in regard to the appropriation for roads.

Mr. TOWNSEND. I have just explained that the Senate conferees insisted upon the Senate provision appropriating $50,000,000 for the coming fiscal year, and authorizing $65,000,000 and $75,000,000 for the succeeding two years, under existing law. The House conferees could not agree to it. They took it back to the House, and the House moved to concur in the Senate

amendment with an amendment. Their amendment substituted the Dunn bill, which limits the appropriation to $12,500 per mile for the coming year, and $10,000 for the next year, and makes no appropriation for the coming fiscal year. We insisted that we were right, and I am asking the Senate now to insist upon the disagreement and ask for a further conference.

Mr. PITTMAN. As I understand the Senator from Michigan, the managers on behalf of the Senate do not desire to agree to the amendment put on by the House adding the limitations of the Dunn bill?

Mr. TOWNSEND. We do not.

Mr. PITTMAN. And they are asking the Senate to disagree to that. I am in thorough accord with the chairman. I certainly hope that will be the action of the Senate, because if we should adopt the Dunn provision it would mean an absolute cessation of cooperation by the States in building the roads and would practically mean the death of the Federal good roads law.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Michigan that the Senate insist on its amendment numbered 58, and request a further conference with the House on the disagreeing votes of the two Houses, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the President pro tempore appointed Mr. TOWNSEND, Mr. STERLING, Mr. MOSES, Mr. WALSH of Massachusetts, and Mr. BROUSSARD conferees on the part of the Senate at the further conference.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House disagreed to the amendments of the Senate to the bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service; requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MCKENZIE, Mr. KRAUS, and Mr. BYRNES of South Carolina were appointed managers on the part of the House at the conference.

READJUSTMENT OF ARMY AND NAVY PAY.

Mr. WADSWORTH. I ask the Chair to lay before the Senate the action of the House of Representatives on House bill 10972.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair) laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. WADSWORTH. I make the usual motion, insisting on the Senate amendments and granting the request of the House for a conference, and that the Chair appoint the cenferees on the part of the Senate.

The PRESIDING OFFICER. The Senator from New York moves that the Senate insist on its amendments, accede to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. WADSWORTH, Mr. NEWBERRY, and Mr. FLETCHER conferees on the part of the Senate.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. ROBINSON obtained the floor.

Mr. MCCUMBER. Will the Senator from Arkansas allow me to take up his proposed amendment for just a moment?

Mr. ROBINSON. Very well.

Mr. MCCUMBER. I call attention to the fact that the committee, while they do not agree with the view of the Senator that the 35 per cent ad valorem should be reduced to 15 per cent ad valorem, on line 22, do suggest an amendment to the committee amendment to strike out "35" and insert in lieu thereof "25." They will also ask the same reduction on the next page, in line 5, and also on line 15, and equivalent changes in the other amendments to that paragraph. I desire to call the attention of the Senate, and especially that of the Senator from Arkansas, to the fact that the Payne-Aldrich rate is 40 per cent ad valorem and the Underwood rate 15 per cent, and if this paragraph 316 is amended as suggested by the committee, we will give a duty of 25 per cent ad valorem.

Mr. CARAWAY. Will the Senator yield to me?

Mr. ROBINSON. I yield to my colleague.

Mr. CARAWAY. Mr. President, a moment ago, in that convincing tone of voice which the Senator from North Dakota alone possesses, he read me a lecture and assured me that the Senate was not interested in whether the Attorney General was a gentleman or a scoundrel; at least he was not, and that therefore he wanted to go on with the tariff bill.

He kindly referred to the fact that there were no Senators present. I should like to say to the Senator from North Dakota that no great crowd rushed in when he commenced to speak. There is one Republican Senator on the other side now—I do not want the Senator from North Carolina to be counted as on the side of the Senator from North Dakota—so that if the question as to what the Senate is interested in is to be tested by the number who come to hear, there were at least 12 or 15 on the other side, and there is only 1 on the side of the Senator from North Dakota now, and he came in without knowing that the Senator was going to speak.

Of course, it is nothing to me if the Senator thinks that his administration should be honeycombed with corruption, if he approves it, if he wants to protect the Attorney General and say "We do not care what you do, Mr. Attorney General."

We do not have any interest in that. Go ahead and be a rascal if you want to. It meets with the approval of the Senator from North Dakota. All we want to do is to fasten upon this country a tariff bill that will make every man, woman, and child contribute to the coffers of the trusts which finance our campaigns. If they can do that, Mr. President, time is not wasted, according to the idea of the Senator from North Dakota, but if anything interferes with putting over this tariff bill, the Senator from North Dakota reads us a very emphatic lecture.

I have not taken half as much time in the year I have been in the Senate in discussing Daugherty and all other questions as the Senator from North Dakota took in leading us right up to the passing of a bonus bill and then backing off from it and explaining why they did not pass it.

I have not taken half as much time as the Senator from North Dakota has taken in talking about the necessity of fastening this infamous tariff bill upon the necks of the toiling masses of America. I do not intend to do it. It is not necessary to do it.

Mr. WATSON of Georgia. Mr. President, will the Senator yield to me?

Mr. CARAWAY. My colleague has the floor.

The PRESIDENT pro tempore. Does the senior Senator from Arkansas claim that he has the floor?

Mr. ROBINSON. I understood that I was recognized. I yielded to my colleague.

The PRESIDENT pro tempore. The Chair desires to say that he does not recognize any rule of the Senate by which a Senator can yield to another Senator for the purpose of making a speech.

Mr. CARAWAY. Mr. President, that there may be no chance to reply, I am perfectly willing for the Senator who occupies the chair to invoke any rule he wants to, and I will yield the floor.

Mr. ROBINSON. Mr. President, with reference to the action of the Chair in denying to me the privilege of yielding to my colleague when he requested me to do so, I desire to say that throughout the long period of service of the present occupant of the chair, the long service of the Senator from North Carolina [Mr. OVERMAN], who is a member of the Committee on Rules, and the brief period of my own service, the custom has existed in the Senate of permitting a Senator having the floor to yield to others. Technically, if any Senator objects, the Senator having the floor can only yield for questions, but unless notice is given that objection will be made the practice of the Senate has been not to deprive a Senator of the floor who yields to another desirous of making a statement.

The RECORD discloses many instances daily where Senators have yielded to others to make prolonged statements.

That occurred yesterday while the present occupant of the chair was making a speech upon the general question of the tariff in no wise related to the paragraph immediately under consideration. He was interrupted by a number of Senators with his consent, among the Senators interrupting him, as I know he will recall, being the present occupant of the floor.

During the course of the debate, as the occupant of the chair must know, whatever remarks I have submitted have been directed to the measure under consideration and usually to the

paragraph immediately pending. Senators on the other side of the Chamber and on this side alike have interrupted other Senators who were speaking to make statements not directly related to the question pending.

The statement of my colleague was provoked, invited, by a discussion on the part of my friend the Senator from North Dakota [Mr. MCCUMBER] entirely irrelevant to the question immediately under consideration. If the Senator from North Dakota has that right and chooses to exercise it when he pleases, it ill becomes the occupant of the chair, in my opinion, voluntarily to restrict the right of other Senators to yield when requested to do so by their colleagues. With that statement, which I know the present occupant of the chair knows is entirely consistent with the history of proceedings in the Senate, I shall revert to my usual custom and confine my remarks from now on to the question immediately under consideration.

The pending paragraph 315 is one of the most important in the tariff bill. It relates to a diversity of interests and many commodities. It covers all forms of importations of wire, the ordinary steel and iron wire, which are converted into wire nails, into barbed wire, and into wire rope. It does not seem necessary for me to point out to the Senate the importance of these commodities and their common use. The paragraph not only embraces iron and steel wire, but copper, bronze, and brass wires, which are also of very extended use. It includes aluminum wire and wires which are used in the manufacture of wire cloth, telegraph, telephone, and other wires and cables, including insulated wire and cables, submarine, underground, and of whatever description. The paragraph embraces wire rope. It embraces wire heddles and healds, and many other articles of constant and almost daily use.

The production statistics show the value of the output of 117 establishments in the United States for the manufacture of wire during the year 1919, amounting in the aggregate to $409,000,000 and more. Of this total amount more than $401,000,000 represent wire and manufactures of wire. The value of the output of steel and iron wire and manufactures thereof was approximately $265,000,000, of copper wire and its manufactures approximately $114,270,000. The output of brass wire was something more than $16,000,000.

The total production of steel and iron in 1919 was more than 2,500,000 short tons, which was a slight increase—about 3 per cent—over that of 1914. The production of coated wire in 1919, including galvanized wire, was nearly 400,000 tons, as compared with approximately 375,000 tons in 1914.

The country's output of bare copper wire in 1919 was 193,370 tons. The total production of insulated wire and cable for the same year was valued at $129,623,100, of which the major portion was reported by insulating establishments which purchased the wire. The output of brass wire was reported in 1919 as 50,000,000 pounds; that of other metals amounted to 14,500,000 pounds, valued at nearly $6,500,000.

The imports of various kinds of wire are reported in separate tables in the Summary of Tariff Information, at pages 48 to 410, inclusive. I will ask leave to print those tables in the RECORD in connection with the remarks which I am submitting.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The tables referred to are as follows:

Imports: Imports of wire and wire manufactures included in this paragraph have been, since 1917, as follows:

Imports of wire and wire manufactures.

ROUND IRON OR STEEL WIRE.

Calendar year.	Quantity.	Value.	Duty.	Ad valorem rate.
	Pounds.			*Per cent.*
1918	58,787	$35,198	$5,280	15

Mr. ROBINSON. The same request is submitted respecting exports. I ask that the table on page 410 showing exports of copper wire, brass wire, wire rope, insulated wire and cables, and wire not specially provided for, and other manufactures of wire not specially provided for, be incorporated in the RECORD, showing the relation between imports and exports of the commodities of daily and common use.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The table referred to is as follows:

Exports.	1918	1919	1920	1921 (9 months).
Copper wire:				
Quantity ..... pounds..	15,689,554	55,551,602	41,812,713	10,146,666
Value	$4,750,942	$14,810,357	$10,191,273	$1,973,754
Brass wire:				
Quantity ..... pounds..	1,748,883	1,115,908	1,159,087	388,874
Value	$707,287	$403,899	$398,328	$132,119
Wire rope	$4,225,019	$4,379,478	$2,148,294	$1,203,047
Insulated wire and cables	$5,604,929	$8,815,212	$8,208,539	$7,621,993
Wire, n. s. p. f.:				
Quantity ..... pounds..	352,177,754	426,074,277	427,769,910	130,554,482
Value	$20,704,503	$24,641,881	$25,371,776	$7,730,872
Other manufactures of wire, n. s. p. f.	$3,677,127	$5,090,491	$6,765,429	$2,541,442

Mr. ROBINSON. Since the amendment I proposed last evening was submitted the chairman of the Finance Committee has this morning advised the Senate that the committee now proposes a reduction in the rate submitted with its report on the bill. If the chairman of the committee should see fit to make a further reduction, namely, to the point fixed in the House bill, I myself would be content for the present to accept the same. The rates, however, which he proposes are 5 per cent in excess of the rates carried in the House items, or approximately that. It is 5 per cent as to most of the items. Unless he sees fit to make that further concession, it is my purpose to offer and have voted on by the Senate, with a record vote, the amendment which I have offered.

Mr. SIMMONS. Mr. President, may I ask the Senator, who I know has looked very carefully into this item, as I have not myself had an opportunity to do, a question?

Mr. ROBINSON. I yield to the Senator from North Carolina.

Mr. SIMMONS. While his statement relating to the ad valorem rates in the House bill and Senate committee bill is correct, has he compared the specific rate which this item carries with the House rate?

Mr. ROBINSON. The specific rates in the bill are the House rates. There is no amendment proposed to the paragraph which I am discussing relative to any specific rate incorporated by the House. I ask the Senator from North Dakota if that is not correct?

Mr. McCUMBER. That is correct.

Mr. ROBINSON. So that under the rule of the Senate by which we are now proceeding it is not in order to submit an amendment to any specific rate in the bill. Under the agreement heretofore entered and the rules of the Senate, amendments must be confined to the ad valorem rates embraced in the amendment of the committee which, as I have stated, were at first very much higher than the committee now proposes to make them.

Mr. McCUMBER. I want to say to the Senator that if he will take the beginning of the section he will find that 1 cent per pound on the cheaper wire is equivalent to about 25 per cent ad valorem, and if I were to consent to reduce the other or the higher-priced wire below the 5 per cent ad valorem, the Senator can see that they would be improperly related——

Mr. ROBINSON. That might be true.

Mr. McCUMBER. Even though both might possibly take a little lower rate. If, when we consider the section itself, we then should reduce the rate on the cheaper wire, we can very easily make a rate on the correspondingly highest-priced wire as proposed by the committee, but I should not wish at this time to agree to an amendment on these items which would bring them out of proportion with the previous portion of the paragraph.

Mr. ROBINSON. I understand that perfectly. I would like very much to see a reduction in the specific rates carried in this paragraph, and if it were not for the parliamentary situation preventing it, my first amendment would be to reduce those rates. I feel morally sure that if a substantial reduction can be effected in the ad valorem rates, material reductions will naturally follow in the specific rates, and that is one of the reasons why I am urging a reduction in the ad valorem rates. If we agree now to the rate, even as reduced by the Senator from North Dakota and thus give it the appearance of unanimous action in the Senate, there will be no possibility hereafter of securing any reduction in the specific rates or any reduction in the ad valorem rates relating to wire.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Does the Senator from Arkansas yield to the Senator from North Carolina?

Mr. ROBINSON. I yield.

Mr. SIMMONS. I would like to ask the chairman of the committee if it is not possible for the committee to furnish Senators with the ad valorem equivalent of the specific rate and the compound rate? In every tariff bill that has been presented heretofore since I have been a member of the committee the Senate has been put in possession of the ad valorem equivalent. Senators will readily see how difficult it is for a Senator to understand what a rate amounts to as applied to a particular product when it is part specific and part ad valorem. It is necessary, in order that he should have any understanding of it at all, that he should go and find what the price of the particular product is. Here we have five or six different forms of the same product with specific duties on some and compound duties on others. If we knew the ad valorem equivalents, they would convey to the mind of a Senator some idea of the amount of the tax, but if the tax is partly specific and partly ad valorem a Senator does not know and can not have any real conception of what the amount of the tax is, unless he can ascertain the value of the product and apply the specific rate to it reduced to the form of an ad valorem.

I have had this matter up with Mr. McCoy, the statistician of the Treasury Department, who has generally furnished the committee with such information, and Mr. McCoy tells me that he has been at work on it, but has not been able to furnish the committee or the Senate with the information; and he can not furnish it to me because he is so busily engaged in the other work of the committee and the general work assigned to him by the Treasury Department. If Mr. McCoy can not furnish us the equivalent ad valorem of these rates, can not the Senator from North Dakota arrange with the Treasury Department for somebody else to work out the ad valorem equivalents? I am saying this because I know that it would assist me greatly in the preparation of my argument when I make any argument about this measure, and I know it would assist other Senators. Senators are coming to me every day and asking me what is the ad valorem equivalent of a certain specific rate, but I am utterly unable to furnish them any information. I am simply asking the Senator from North Dakota if he can not help the Senate to get this very necessary information.

Mr. McCUMBER. Mr. President, before reporting the pending bill to the Senate, I requested the Tariff Commission to try to secure for us just the information for which the Senator from North Carolina is now asking, but up to the present time, in view of the work they have on hand, they have not been able to supply us with that information.

Mr. ROBINSON. If I may make a suggestion to the Senator from North Dakota, the incorporation in a paragraph of two different bases for the imposition of tariff rates necessarily results in confusion. There are undoubtedly reasons why specific duties should in some instances be imposed and ad valorem duties be imposed in others; but I can conceive of no reason why a specific duty should be placed on round iron or steel wire not smaller than ninety-five one-thousandths of an inch in diameter and an ad valorem duty imposed on the same wire that happens to be worth more than 6 cents a pound.

Mr. SMOOT. Mr. President——

Mr. ROBINSON. Just one moment. Such a manner of dealing with the subject causes confusion and certainly does not promote clarity. Why not incorporate an amendment providing ad valorem duties on all steel wires?

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from Utah?

Mr. ROBINSON. I yield.

Mr. SMOOT. In this paragraph where specific duties are provided they are on the ordinary common, round iron or steel wire which is made by ordinary processes and manufactured in bulk by thousands and tens of thousands of tons. The price of such wire is always low. The ad valorem duty applies only to wires valued above 6 cents a pound, which is the lowest price per pound for wire involving more difficult processes of manufacture. The wire falling under that classification will run as high as $1.25 per pound, perhaps up to $1.50 a pound. The limitation begins at 6 cents a pound, because such wires are of a special character, and when imported they are imported as specials. Most of this character of wire comes from Norway, I presume, where it is claimed the best steel wire in the world is made under a process that requires a great deal of labor and also the use of alloys such as tungsten and others which are provided for in the iron and steel schedule. It would be impossible to put a specific duty upon that class of goods in the same bracket with the wires which are cheaper in value and carry specific duties.

Mr. ROBINSON. No doubt all that the Senator from Utah has said is true; and it is somewhat illuminating; but it does not in any degree answer the question, Why should not ad valorem rates be imposed on all wire? The rates might vary, just as the specific duties vary. The reason that the Senator from Utah has given for the adoption of the specific rates does not justify any distinction between the ad valorem rates and the specific rates, because the ad valorem rates could be incorporated under separate paragraphs, or brackets, as he terms them, just as well as the specific rates. If the ad valorem equivalent were stated, then some comprehension could be had of the actual amount of protection afforded by these specific rates.

The Senator from North Dakota said a moment ago, if I heard him correctly, that the first rate of three-fourths cent is equivalent to about 25 per cent ad valorem, although subsequently, when asked by the Senator from North Carolina about the specific rates in the paragraph, he did not claim to have very much information on the subject. I should like to ask the Senator if he knows what the ad valorem equivalent of 1¼ cents per pound referred to in line 19 would be, and what would be the ad valorem equivalent of 1½ cents per pound in line 20?

Mr. McCUMBER. I have had an expert working on those figures, and he gave me the information for which the Senator asked. The information that he gave me was that the duties would average somewhere along about 25 per cent. That is the best information I can possibly give the Senator. Of course, there is a question whether we should take the present price or the pre-war price or the last report that we have on the subject, and each one would give a different result.

Mr. ROBINSON. Certainly; the effect of any ad valorem rate depends upon the price.

Mr. McCUMBER. Certainly.

Mr. ROBINSON. And it varies as the price varies, no matter what the percentage is.

Mr. McCUMBER. But taking the price which we may look for as to all these items I think the rates would average about 25 per cent.

Mr. SIMMONS. Mr. President, I call attention to this matter at this time because the examination of this particular paragraph illustrates probably as well as any paragraph of the bill the admixture of specific and ad valorem rates, and the imposition of specific rates altogether and of ad valorem rates altogether. I suppose the Senator from North Dakota will admit that this bill, probably to a greater extent than any tariff bill we have ever had, adopts either specific rates or compound rates. Is not that true?

Mr. McCUMBER. I do not know that it does so to a greater extent than any bill we have ever had, but the House passed the bill in that form, and we preferred rather than get into a conflict where it was not necessary to make the duties conform to what we thought was about right and leave them in the form in which they were adopted by the House. I agree with the Senator that wherever it can be done, as a rule, we ought to have specific duties alone or ad valorem duties alone.

Mr. SIMMONS. I am not discussing that phase of the question now; I am not objecting to specific rates; I am not objecting to the compound rates; I am not discussing those; but what I am anxious about is, if it is possible, that the committee shall furnish the Senate with the ad valorem equivalents of the specific rates or of the compound specific and ad valorem rates. I think that information is absolutely necessary in order to enable us understandingly and intelligently to discuss these schedules.

Mr. McCUMBER. If the Senator will allow me, on what basis would he desire that to be estimated—on the pre-war basis, on the 1921 basis, or the last information that we can get from the reports of sales?

Mr. SIMMONS. I suppose when the committee imposed these specific rates they probably had some information as to the unit value of the article, that it was worth so many cents a pound. I suppose the committee had some information or some basis for ascertaining the value of that particular article.

Mr. McCUMBER. The Senator is correct. However, we did not keep a record of just what the price happened to be on that day nor have we any testimony concerning it. There has been a considerable change, as the Senator knows, in some of these prices even since we reported the bill.

Mr. SIMMONS. That is very true, but I suppose the rates were determined upon the basis of prices before the committee at the time the bill was prepared; and I have understood that those prices were ascertained largely, though not altogether, from the Reynolds report.

Mr. McCoy, the Actuary of the Treasury Department, aided by other experts, has never heretofore found it difficult to give the Senate at least an estimate—of course, it could be nothing but an estimate—of the ad valorem equivalents.

Mr. McCUMBER. Let me say, if the Senator will allow me, that the actuary is giving all of his time, day and night, to other work, a portion of which is making estimates for the Treasury Department, and it is impossible to lay anything more upon him. As I have stated to the Senate, I asked the Tariff Commission to try to give us that information at the time I reported the bill but I have not as yet received it.

Mr. SIMMONS. Mr. President, I fully appreciate the situation so far as the Actuary of the Treasury Department is concerned. He has been the hardest worker whom I have ever known, and one of the most conscientious workers. I know he has not the time; he tells me that he has not. I am not saying this in any controversial spirit, but what I wish the Senator to do or the committee to do, if the Actuary of the Treasury has not time to compile the information, and the Senator's appeals to the commission have not as yet resulted in securing the information, is to impress upon the commission the importance of having this information, and see if he can not speed them up.

Mr. McCUMBER. I shall try to do so, Mr. President.

Mr. SIMMONS. I really feel that it is a very important matter in connection with this subject.

Mr. McCUMBER. I will again call the attention of the commission to my previous request, but so far I have not received the information. Whether they will be able to furnish it in the near future or not I can not answer.

Mr. ROBINSON. Mr. President, I am compelled to leave the Chamber for a few minutes to meet an imperative engagement, and I shall conclude my remarks on the pending amendment at once.

The item embraces piano wire, needle wire, crucible steel of small gauges, common wire. These commodities ought not to carry an excessive rate of duty. There is nothing in the condition of the industry that has been brought to my attention that either makes necessary or justifies a high protective rate on importations.

Considering the very important uses to which some of the commodities included within this item are put, I feel justified in asking the Senate to vote on the amendment which I have proposed, although, of course, the amendment which the Senator from North Dakota has indicated that it is his purpose to submit if mine is rejected is far preferable to the original committee amendment, because it does substantially reduce the rate carried by that original amendment.

I am ready for a vote.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Arkansas to the amendment of the committee.

Mr. ROBINSON and Mr. ASHURST called for the yeas and nays, and they were ordered.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Delaware [Mr. DU PONT] and will vote. I vote "nay."

Mr. JONES of New Mexico (when his name was called). I announce the transfer of my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED] and ask that this announcement may stand for the day. I vote "yea."

Mr. MOSES (when Mr. KEYES's name was called). I am authorized by my colleague [Mr. KEYES] to state that if present he would vote "nay" on this question.

Mr. McCUMBER (when his name was called). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Maryland [Mr. WELLER], which notice of transfer may stand for the day, and I vote "nay."

Mr. NEW (when his name was called). I transfer my pair with the junior Senator from Tennessee [Mr. McKELLAR] to the junior Senator from New Hampshire [Mr. KEYES] and will vote. I vote "nay."

Mr. WALSH of Montana (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Texas [Mr. CULBERSON], and will vote. I vote "yea."

Mr. WATSON of Georgia (when his name was called). I transfer my pair with the Senator from Arizona [Mr. CAMERON] to the Senator from Massachusetts [Mr. WALSH], and will vote. I vote "yea."

Mr. CURTIS (when Mr. WILLIS's name was called). I have been requested to announce the absence of the junior Senator from Ohio [Mr. WILLIS]. He is paired with his colleague, the senior Senator from Ohio [Mr. POMERENE]. I will let this announcement stand for the day.

The roll call was concluded.

Mr. DILLINGHAM. I have a general pair with the junior Senator from Virginia [Mr. GLASS]. I observe that he has not voted. I therefore transfer my pair with him to the junior Senator from Oregon [Mr. STANFIELD], and will vote. I vote "nay."

Mr. ERNST. I transfer my pair with my colleague [Mr. STANLEY] to the Senator from Pennsylvania [Mr. CROW], and will vote. I vote "nay."

Mr. FLETCHER. I transfer my pair with the Senator from Delaware [Mr. BALL] to the Senator from Nebraska [Mr. HITCHCOCK], and will vote. I vote "yea."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 27, nays 36, as follows:

YEAS—27.

Ashurst	Gerry	Norris	Smith
Borah	Harris	Overman	Spencer
Broussard	Harrison	Pittman	Swanson
Capper	Heflin	Ransdell	Underwood
Caraway	Jones, N. Mex.	Robinson	Walsh, Mont.
Cummins	La Follette	Sheppard	Watson, Ga.
Fletcher	Myers	Simmons	

NAYS—36.

Brandegee	Johnson	McNary	Poindexter
Bursum	Jones, Wash.	Moses	Rawson
Calder	Kellogg	New	Shortridge
Curtis	Ladd	Newberry	Smoot
Dillingham	Lenroot	Nicholson	Sterling
Elkins	Lodge	Oddie	Sutherland
Ernst	McCumber	Page	Townsend
France	McKinley	Pepper	Wadsworth
Hale	McLean	Phipps	Warren

NOT VOTING—33.

Ball	Frelinghuysen	McKellar	Trammell
Cameron	Glass	Nelson	Walsh, Mass.
Colt	Gooding	Norbeck	Watson, Ind.
Crow	Harreld	Owen	Weller
Culberson	Hitchcock	Pomerene	Williams
Dial	Kendrick	Reed	Willis
du Pont	Keyes	Shields	
Edge	King	Stanfield	
Fernald	McCormick	Stanley	

So Mr. ROBINSON's amendment to the amendment of the committee was rejected.

Mr. SMOOT. Mr. President, on line 22, I move to strike out "35" and insert "25."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. On page 59, line 22, in the committee amendment, it is proposed to strike out "35" and insert "25."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Utah to the amendment of the committee.

Mr. SPENCER. Mr. President, the tariff on that drawn wire is now 15 per cent. The House bill made it 20 per cent. The motion of the Senator from Utah now is to make it 25 per cent ad valorem. The truth of the matter is——

Mr. SMOOT. If the Senator will wait until the next amendment is reached, on page 60, line 5, we will then consider the wishes of the Senator.

Mr. SPENCER. No; I am on page 59.

Mr. SMOOT. The item in which the Senator is interested, or of which he is desiring importations, is on page 60, line 5. I shall offer an amendment there, and then whatever the Senator desires to say will be upon that amendment.

Mr. SPENCER. The interest of the Senator from Missouri is even broader than the Senator from Utah thinks, and it is precisely on this item which we are now considering, for this item has to do with the drawn wire. The item the Senator has in mind on the next page has to do with the woven-wire rope, With regard to the drawn wire, I may say to the Senator that these facts can not be contradicted:

Drawn wire is made and sold in the United States at 7.45 cents a pound. When they get the drawn wire from England, they have to pay from 10 to 22 cents a pound. Where is there any need of a duty?

Mr. SMOOT. Simply because the two wires are no more comparable than softwood and hardwood, and the Senator knows it.

Mr. SPENCER. The Senator does not know it. This wire upon which you now seek to put an increased duty—first over the present law, then over what the House put in—is the kind of wire that comes in competition with the wire that is made in England. You can not defend it on a revenue bill, because the whole amount imported last year was only a million and a quarter of dollars, and the year before it was about the same amount.

Mr. FLETCHER. Mr. President, will the Senator tell me what paragraph he refers to?

Mr. SPENCER. This is paragraph 316, on page 59.

There is no plea for it upon the ground of the condition of the producers, because every producer of drawn wire in the United States has prospered under the present tariff.

Mr. SIMMONS. Mr. President, is the Senator aware of the fact that we just voted upon an amendment offered by the Senator from Arkansas [Mr. ROBINSON] to reduce this rate to 15 per cent?

Mr. SPENCER. The Senator from Missouri is aware of that, and the Senator from Missouri voted in favor of the amendment to reduce it to 15 per cent.

Mr. SIMMONS. Is the Senator now going to vote for the committee amendment?

Mr. SPENCER. The Senator is not going to vote for the committee amendment imposing a duty of 25 per cent. There is no justification for it.

Mr. SIMMONS. The Senator is right.

Mr. SPENCER. Of all the wire rope that is made in the United States, 80 per cent is consumed by those who make it. I mean to say that the drawn wire that goes into the making of wire rope, the single strand, is made in the United States and is made by the producers of wire rope. They use their own production, except for about 20 per cent of it, and that comes in competition with English drawn wire, and the English drawn wire costs more in England than the American drawn wire does in the United States. Where is there any ground for a protective tariff upon it?

The Senator from Utah says the two wires are entirely distinct. What two wires? This bill provides for any wire selling for more than 6 cents a pound. Where is there any differential between drawn wires in the mind of the Senator from Utah?

Mr. SMOOT. The wire which Broderick & Bascom, of St. Louis, import to make a special wire.

Mr. SPENCER. On what page of the tariff bill is that referred to?

Mr. SMOOT. It is in the very item the Senator speaks of.

Mr. SPENCER. So is the other wire of which I speak.

Mr. SMOOT. The Senator knows that the other wire made here is not comparable with the English wire.

Mr. SPENCER. Made here?

Mr. SMOOT. The Senator knows that the wire rope made from the wire imported by Broderick & Bascom sells for more than the American rope sells for.

Mr. SPENCER. I think the English wire is a better wire.

Mr. SMOOT. Certainly it is.

Mr. SPENCER. Because it is made from Swedish ore, and I think the ingredients of phosphate in Swedish ore make it more adaptable to making wire rope than the American ore; but the fact still remains that under this bill you make it impossible to bring any wire in.

Mr. SMOOT. I will say to the Senator that if the rate were even 25 or 30 per cent the wire would come in. They would use that kind of wire. They will not buy American wire. They built their trade up on making their particular kind of wire rope, and I suggest to the Senator that he ask the purchaser what he pays for the rope when buying it.

Mr. SPENCER. I think there is a good deal in what the Senator from Utah says. In other words, there is such a demand for that yellow strand wire rope that it will be bought irrespective of its price. That is the point the Senator from Utah makes, is it not?

Mr. SMOOT. It is an advertised brand, a special wire, there is no doubt about it, but if the Senator gets a low rate on wire, he will want double the rate on the manufactured article.

Mr. SPENCER. I do not care whether you put any tariff on the drawn wire or not.

Mr. SMOOT. No; I know the Senator does not.

Mr. SPENCER. Leave them both out, if you like; but I will follow that a little with the Senator. If the Senator from Utah is right that that special brand of wire rope will be used, irrespective of its price, what is the argument for increasing that price to the consumer, when for the last eight years it has been produced and bought and used at a price and without affecting injuriously any American competitor?

Mr. SMOOT. Broderick & Bascom would not sell it for a penny less. They sell it now for every dollar they can get, and they would if it were free.

Mr. SPENCER. If you increase the duty upon the drawn wire which makes up that rope, will not the price of the finished product be increased?

Mr. SMOOT. There is no doubt about that.

Mr. SPENCER. Why increase the price of the finished product if there is no competition?

Mr. SMOOT. I know the Senator is interested in seeing that they continue to make the profits they have been making, but I want to say to the Senator now that, as far as I am concerned, I would prefer to see a little of the profit go into the Treasury of the United States.

Mr. SPENCER. The Senator knows that the importation of that wire is negligible. There is no revenue feature in it.

Mr. SMOOT. Every pound that is made into that wire rope comes into the United States from England.

Mr. SPENCER. What was the total amount of importations last year, or the last year before that? Neither of them exceeded in the aggregate a million and a half dollars. The revenue feature is negligible.

Mr. SMOOT. There is only one concern making this rope, and the wire that goes into every pound of rope they make and every pound they sell comes from England. Not an ounce of the wire is made in the United States.

Mr. SPENCER. Let me say to the Senator from Utah, for his judgment is good and his fairness is great, that if that wire rope, as the Senator says, is a special product, which the American people who need it will use at any price, why does the Senator insist on increasing the duty on the raw material, the drawn wire, so as to raise the price to the consuming public in the United States, when, as the Senator says, there is no competition with that rope? What is the argument for it?

Mr. SMOOT. I did not say there was not any competition, because if they get too high, of course the people will purchase other grades.

Mr. SPENCER. I thought the Senator said they would buy it irrespective of the price.

Mr. SMOOT. No; I did not go that far. I said many would buy that rope as against any other rope in the United States, even at a higher price; and they will.

Mr. SPENCER. Where is the utility, where is the revenue, where is the principle for increasing the price of wire rope when there is no American competition for it?

Mr. SMOOT. The revenue will be the difference between 15 per cent and 25 per cent. They will import just as many pounds of that wire with the duty of 25 per cent on it as they will with the duty of 15 per cent on it, and that makes a difference of 66⅔ per cent in the rate, and a consequent difference in the amount of money which will go into the Treasury of the United States.

Mr. SPENCER. With an aggregate of imports not exceeding a million and a half?

Mr. SMOOT. The duty on $1,500,000 is worth while looking out for.

Mr. SIMMONS. Mr. President, let me suggest to the Senator from Missouri that we have had many illustrations here in the last few days of the fact that as soon as it was shown that there was no justification for a rate imposed from a protective standpoint, because there were practically no importations of the article, at once the committee, finding itself unable to justify the rate upon the protective principle, said that it was levied for the purpose of getting revenue.

Mr. SPENCER. The Senator from Utah says that when we get the wire-rope matter settled he proposes to offer an amendment to cut the rate below the rate proposed by the committee. Am I right about that?

Mr. SMOOT. The Senator from Utah proposes to cut the 35 per cent on the wire to 25 per cent, and then proposes to cut wire rope generally—that is, the wire under which this would fall—from 40 per cent to 35, making a differential of 5 per cent.

Mr. SPENCER. In other words, this is what is happening now. Under the present law the tariff upon the drawn wire, which is the raw material, if you like, is 15 per cent. The tariff upon the manufactured wire rope is 30 per cent, double the other. Now the Senator comes in and proposes to increase the rate on the raw material from 15 to 25 per cent, or 66⅔ per cent, and then to decrease the differential on the product from 40 per cent, as you have it in the bill, to 35 per cent.

Mr. SMOOT. That is right.

Mr. SPENCER. In other words, you add to the duty upon the raw material 10 per cent ad valorem and you add to the duty on the finished product only 5 per cent, which, of course, as the Senator knows, drives out of business the great concern in the city where I live which has been in business for 50 years. You increase the duty upon the raw material 66⅔ per cent, and then diminish the duty upon the finished product. I say to the Senator that there is no foundation in principle for any such tariff, and the Senator knows how strong I am for a protective tariff. The Senator has not advanced any reason to support it.

Mr. SMOOT. The Senator from Missouri does not want any duty. He would like to have this wire come in free, so he is not a protectionist as far as wire imported here by Broderick & Bascom is concerned.

The wire rope sells for twice the amount of the wire. The committee has increased the rate from 15 to 25 per cent, which is a 66⅔ per cent increase of the rate, or 10 per cent increase in the duty.

Mr. SPENCER. Why? What is the reason for it? Who is asking it? Where is the interest back of it?

Mr. SMOOT. Broderick & Bascom are not asking it.

Mr. SPENCER. Who is asking for it? Where is there any reason for it? I know what the committee has done.

Mr. SMOOT. It would be very foolish, indeed, to make a bill and have round iron and steel wire of the smaller sizes carrying an equivalent duty, as was provided for by the specific rate of 25 per cent, and then, because Broderick & Bascom want the higher priced wire to come in, have the specific duty less than that on the common steel wire. There has to be some uniformity in this legislation.

Mr. SPENCER. The uniformity for 15 years has been in the proportion of 1 to 2. Where, I still ask the Senator, is there any reason for this?

Mr. SMOOT. The Senator can not say that that has been true for 15 years. As to this particular item, there has been that differential since the Underwood law went into effect.

Mr. SPENCER. Since 1913. What was the differential in the Payne-Aldrich law? Was it not 2 to 1?

Mr. SMOOT. On the round iron and steel the Payne-Aldrich rates were about 37 per cent.

Mr. SPENCER. What was the difference between the drawn wire and the wire rope? Was it not approximately two to one?

Mr. SMOOT. No; not nearly two to one.

Mr. SIMMONS. While the Senator from Utah is looking up the data, I should like to make a suggestion to the Senator from Missouri. As there are a great many different kinds of wire in this particular paragraph, I had supposed that these duties were imposed for protection, but it seems that the one he is talking about, which can not be justified upon any protective principle, they now claim was levied for the purpose of obtaining revenue. I suggest to the Senator, if he is going to speak on the various wire items in this schedule, that he ask the Senator from Utah before he begins to discuss them to tell him on which one of these articles the rate was levied for the purpose of protection, and on which ones the rate was levied for the purpose of obtaining revenue.

Mr. SMOOT. Mr. President, I find that in the Payne-Aldrich law the rate was 35 per cent.

Mr. SPENCER. On what?

Mr. SMOOT. On the wire.

Mr. SPENCER. On the drawn wire, or on the wire rope?

Mr. SMOOT. It reads, "All of the foregoing * * * shall pay a duty of not less than 35 per cent ad valorem."

Mr. SPENCER. On what?

Mr. SMOOT. In other words, the rate may even be higher than on the steel wire.

Mr. SPENCER. On the single strand?

Mr. SMOOT. On the strand itself.

Mr. SPENCER. How much on the wire rope?

Mr. SMOOT. Then it says, "whether rolled or drawn through dies or rolls, or otherwise produced," not specially provided for in this section, shall pay a duty of not less than 35 per cent ad valorem. It is the same thing. It is not less than 35 per cent ad valorem on both of them.

Mr. SPENCER. In the Payne-Aldrich law?

Mr. SMOOT. Yes.

Mr. SPENCER. Then I can date back only to 1913?

Mr. SMOOT. Yes.

Mr. SPENCER. Since 1913 we have had 15 per cent ad valorem upon drawn strand and 30 per cent on wire rope. The Senator knows well enough that wherever you can put your finger upon any plant, upon any industry, where the cost of manufacturing is less abroad than it is in the United States, and we need to protect the American workingmen in their wages and living conditions, we have the foundation for the protective tariff in which I believe. The Senator knows that if we can see any place where in the future an industry has a fair chance of being developed in these United States, if we protect it against foreign competition, against competition with cheap labor abroad, I am in favor of it, for I do believe in a protective tariff.

But the Senator brings up a case like this where since 1913 there has been prosperity for the American manufacturer and where, so far as I know—and I ask the Senator to correct me if I am wrong and I challenge him to the statement—there is no objection, no competition which would be affected disastrously by a continuance of the present tariff rate. Why does the Senator increase the tariff on strand wire? He says it goes into wire rope that is made by the Broderick & Bascom Wire Co. at St. Louis, and that is true. He said the product is an excellent product, that it has a market because of its excellency. That is true. Of course, its price to the consumer depends upon the cost of the material that goes into it and the labor that puts that material into the making of rope. Since 1913 that wire rope has been made largely from English wire, upon which a duty of 15 per cent has been placed. What is the reason for increasing the rate? Where is the demand for it? It can do only one thing, and that is that it can and it will raise the price of wire rope to the American consumer, and it will not benefit a single American factory nor give employment to another American man. Where is there any reason for it?

Mr. SIMMONS. Mr. President, will the Senator kindly tell the Senate what the wire rope is used for and who uses it, so we may see whether the situation is such as to justify a revenue tariff upon the article?

Mr. SPENCER. It is used in the State of the Senator from Utah in mining operations. It is used where strong, durable wire rope is necessary for hauling or for drayage or for any other purpose that requires a wire rope of tensile strength and durability. It is used wherever wire rope is generally used. It is used for cable purposes. It fills the general field that wire rope fills.

Mr. SIMMONS. It is used largely in connection with the operation of our ships?

Mr. SPENCER. Yes. I say right now that my voice is silent if the Senator from Utah can show me any American industry that will be benefited if there are any of the familiar bases of a protective tariff underneath this increase. I make no objection even to the increase from 15 per cent, the present law, to 20 per cent, the rate proposed by the House bill. Of course I thought perhaps they might get along, but from my own city I am telling the Senator that if he puts this tariff rate into operation as the Senate committee has reported it, that great industry, 50 years old, employing hundreds of men in the city where I live, will go out of business in the making of the wire rope; and it is no answer for the Senator to say "Oh, they will make their wire rope; they will continue to sell it as they always have," for those who know that factory know to the contrary.

Mr. SMOOT. Mr. President, the Senator talks about that firm going out of business, a firm 50 years old. They did not go out of business while the Payne-Aldrich law was in operation nor while the other tariff laws before that were in operation, when the duty upon wire was exactly the same as the duty upon the finished product. In this bill we are imposing 25 per cent, and we are giving them 35 per cent upon the finished rope. Talk about going out of business! Under the Payne-Aldrich law they imported this exact wire and paid 35 per cent on it, and the wire rope made from it under the Payne-Aldrich law bore a rate of 35 per cent. They did not go out of business with no differential whatever, and now we propose to give them a 10 per cent differential; that is, from 25 per cent upon the wire to 35 per cent upon the rope.

Mr. McCUMBER. Mr. President, I want to ask the Senator from Utah, who certainly understands the use of this wire rope and its value, and so forth, and knows how it is made, if he believes that it will cost them more than 10 per cent ad valorem to twist that wire into rope?

Mr. SMOOT. The 10 per cent is upon the value of the article as compared with the wire, and they sell the rope for twice the amount of the wire to-day. The 10 per cent is not only upon the wire cost, but upon the value cost of the rope, and that is twice the amount of the wire. There is no more danger of them going out of business than there is of the heavens falling.

I want to modify the statement that I made that I thought this particular rope was the best rope in the market. I fear my statement was that it was the best wire in the world. The American manufacturers deny that it is, but I do know that, in my opinion, it is very much better wire for special purposes than the American rope and they get more for it. Therefore I made that statement, but I want it to apply, so far as I am concerned and not so far as any statement made by the Tariff Commission. The Tariff Commission takes issue with me, I see, and claim that there is not so very much difference in the value of the article, but I think there is a difference.

Mr. SPENCER. Inasmuch as the firm is in St. Louis, I have more confidence in the Senator's opinion regarding the excellence of its output than I have in his judgment on the rate.

Mr. SMOOT. I thought the Senator would, and I assure the Senator from St. Louis that the company will not be harmed in any way, shape, or form by a 25 per cent rate on wire, with a differential of 10 per cent on the rope.

Mr. SPENCER. That is gratifying as an evidence of intention, but it does not satisfy the condition at all.

Mr. SIMMONS. I suggest to the Senator from Missouri that he had better take a bond and not rely upon the personal assurance of the Senator from Utah.

Mr. SPENCER. I would take the Senator's personal bond either upon that or any other matter, but I am sure the Senator from Utah will confine his guaranty to verbal utterances on the floor of the Senate, which the Senator knows have no legal force.

Mr. SMOOT. I would like to take payment for that bond on a percentage basis of their gain over and above a certain amount. Then I would give them the bond.

Mr. SPENCER. We may have a bargain right here on the Senate floor. I will give the Senator the percentage.

Mr. President, a parliamentary inquiry. As I understand, the motion of the Senator from Utah is to change the present proposed rate from 35 per cent to 25 per cent?

The PRESIDING OFFICER. That is the pending amendment to the committee amendment.

Mr. SPENCER. Is a motion in order to change to 20 per cent instead of 25 per cent?

The PRESIDING OFFICER. It is not in order. That would be an amendment in the third degree.

Mr. CARAWAY. Mr. President, is that a Democratic filibuster in progress on the other side of the Chamber?

Mr. SMOOT. No. We had that this morning when the Senator from Arkansas had the floor.

Mr. CARAWAY. What are we having now?

Mr. SMOOT. This is discussion of the bill. The Senator was engaged in filibustering this morning.

Mr. CARAWAY. What is the Senator doing now?

Mr. SMOOT. I am talking about the bill.

Mr. CARAWAY. Is he filibustering?

Mr. SMOOT. No; I am answering questions, just the same as I would if Senators on the other side of the Chamber asked them.

Mr. CARAWAY. I thought the Senator was filibustering.

Mr. SMOOT. Oh, no. The only filibuster we have had this morning was by the Senator from Arkansas himself.

Mr. CARAWAY. What is the Senator from Utah doing now?

Mr. SMOOT. Answering the Senator from Arkansas.

Mr. CARAWAY. He is filibustering, then, is he not?

Mr. SMOOT. Oh, no.

Mr. CARAWAY. The Senator says I am filibustering.

Mr. SMOOT. I did not say now. I said the Senator was filibustering this morning.

Mr. CARAWAY. But the Senator is helping me now, is he not? We are running together, the Senator from Utah and myself.

Mr. HEFLIN. Mr. President, the Washington Post of to-day contains an article about the prosecution of the Cement Trust——

Mr. SIMMONS. Mr. President, may I suggest to the Senator from Alabama that the paragraph which we have up now for consideration is extremely interesting. Let us get through with that, and then the Senator can proceed.

Mr. HEFLIN. It will only take two minutes, and I want to bring this in before we vote.

Mr. SIMMONS. This paragraph is so very interesting that I thought the Senator would let us finish it.

Mr. HEFLIN. I shall only take a moment or two.

Mr. President, the Cement Trust of the United States is being prosecuted. I read from this morning's Washington Post:

NEW YORK, May 25 (by the Associated Press).—The jury which heard the evidence against cement manufacturing firms and several of their officials, charged with violation of the Sherman antitrust law, failed to agree after 35 hours' deliberation and to-night was dismissed by Federal Judge Knox.

* * * * * * * *

The Atlas Portland Cement Co. and 18 other corporations, together with 44 officials, were the defendants in the suit.

I had occasion to make a few remarks the other night on the subject of taxing cement. The Cement Trust of the United States now holds the American consumer in the hollow of its hands. It violates the Sherman antitrust law. Some of the people who are being pinched and robbed by the prices fixed by the Cement Trust have gone into the courts to prosecute the concern. The case is now pending, and while it was going on, while the Cement Trust is resisting the lawfully constituted authority of the Government in the performance of its duty, the Republican Senate, sitting in the Capitol of the United States, imposes a tax upon cement and practically shuts out all imports, leaving the people more than ever absolutely in the hands of the Cement Trust.

The point I want to make, and I promise my good friend, the Senator from North Carolina, that I shall not take more than a moment and will let them proceed with the item now under consideration, is that the Cement Trust of America, holding up every consumer in the country, now defying the law of the land, haled into court by the people who have been outraged by these fixed prices, is powerful enough, influential and persuasive enough, to have a Republican Senate put a tax upon the cement that comes into the country in competition with theirs, which would give the consumer an opportunity through competitive selling to obtain cement at a reasonable price.

The law is being violated, but the trust is so powerful and so influential now that it secures the passage through this body of a tax upon cement. It holds the American people in and shuts out cement which might enable them to get it at a fair price and leaves them helpless at the mercy of the Cement Trust of the United States.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Utah [Mr. SMOOT] to the committee amendment.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question is on the amendment as amended.

Mr. SIMMONS. Upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. BALL]. In his absence, I transfer that pair to the Senator from South Carolina [Mr. DIAL], and vote "nay."

Mr. MOSES (when the name of Mr. KEYES was called). My colleague [Mr. KEYES] has authorized me to make the statement that, if present, he would vote "yea" upon this question.

Mr. NEW (when his name was called). Making the same announcement as on the previous vote in reference to the transfer of my pair, I vote "yea."

Mr. WALSH of Montana (when his name was called). I transfer by general pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Texas [Mr. CULBERSON], and vote "nay."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the Senator from Arizona [Mr. CAMERON], which I transfer to the junior Senator from Massachusetts [Mr. WALSH], and vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my pair with the Senator from Indiana [Mr. WATSON] to the Senator from Rhode Island [Mr. GERRY], and vote "nay."

The roll call was concluded.

Mr. DILLINGHAM. Making the same announcement as to my pair and its transfer as heretofore, I vote "yea."

Mr. HALE. Making the same announcement as before in reference to my pair and its transfer, I vote "yea."

Mr. ERNST. I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from South Dakota [Mr. NORBECK], and vote "yea."

Mr. LODGE. I transfer my general pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the Senator from Colorado [Mr. NICHOLSON], and vote "yea."

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 37, nays 27, as follows:

YEAS—37.

Brandegee	Harreld	Moses	Shortridge
Broussard	Johnson	Nelson	Smoot
Bursum	Jones, Wash.	New	Sterling
Calder	Kendrick	Newberry	Sutherland
Cummins	Lenroot	Oddie	Townsend
Curtis	Lodge	Page	Wadsworth
Dillingham	McCumber	Pepper	Warren
Ernst	McKinley	Phipps	
Gooding	McLean	Poindexter	
Hale	McNary	Rawson	

NAYS—27.

Ashurst	Harrison	Norris	Smith
Borah	Heflin	Overman	Spencer
Capper	Hitchcock	Pittman	Swanson
Caraway	Jones, N. Mex.	Ransdell	Walsh, Mont.
Fletcher	Kellogg	Robinson	Watson, Ga.
France	La Follette	Sheppard	Williams
Harris	Myers	Simmons	

NOT VOTING—32.

Ball	Elkins	McCormick	Stanfield
Cameron	Fernald	McKellar	Stanley
Colt	Frelinghuysen	Nicholson	Trammell
Crow	Gerry	Norbeck	Underwood
Culberson	Glass	Owen	Walsh, Mass.
Dial	Keyes	Pomerene	Watson, Ind.
du Pont	King	Reed	Weller
Edge	Ladd	Shields	Willis

So the amendment of the Committee on Finance as amended was agreed to.

The PRESIDENT pro tempore. The next amendment will be stated.

The READING CLERK. On page 59, paragraph 316, line 24, after the word "provided," it is proposed to strike out "for, except" and to insert "for (except"; and in line 25, after the word "or," to strike out "platinum" and to insert "platinum)," so as to read:

All wire composed of iron, steel, or other metal, not specially provided for (except gold, silver, or platinum).

The next amendment was, on page 60, line 4, after the word "produced," to strike out "and all other wire not specially provided for, 20" and insert "35," so as to read:

All flat wires and all steel in strips not thicker than one-quarter of 1 inch and not exceeding 16 inches in width, whether in long or short lengths, in coils or otherwise, and whether rolled or drawn through dies or rolls, or otherwise produced, 35 per cent ad valorem.

Mr. SMOOT. Now, Mr. President, on page 60, line 5, before the words "per cent," I move to strike out the numerals "35" and to insert the numerals "25."

Mr. HITCHCOCK. Mr. President——

The PRESIDENT pro tempore. The question is on the amendment of the Senator from Utah to the committee amendment.

The amendment to the amendment was agreed to.

Mr. SIMMONS. Mr. President, my understanding is that the vote just taken was upon the question of reducing the rate provided by the committee from 35 per cent to 25 per cent.

Mr. SMOOT. It was.

Mr. SIMMONS. But we have not yet voted upon the question of adopting the amendment as amended providing for the 25 per cent rate.

The PRESIDING OFFICER. The question now is on agreeing to the amendment as amended.

Mr. SIMMONS. I thought the Senator from Nebraska desired to discuss that question.

Mr. HITCHCOCK. I did not exactly understand the parliamentary situation when the first question was put. I was going to ask the Senator from Utah what warrant there is for mak-

ing the rate 25 per cent instead of 15 per cent as under existing law?

Mr. SMOOT. We have discussed that question for three-quarters of an hour.

Mr. HITCHCOCK. Can the Senator state what the reason is?

Mr. SMOOT. This bracket relates to high-priced steel, steel valued at above 6 cents and running to $1 a pound or more, and an ad valorem rate of 25 per cent we thought was absolutely necessary to cover all of the steel within that bracket.

Mr. HITCHCOCK. Are the imports such as to threaten the American industry?

Mr. SMOOT. There is one firm in the United States that imports all of this particular class of the steel which is used in the United States. It is English steel. The steels embraced in this paragraph are generally alloy steels and are of the highest price.

Mr. HITCHCOCK. I should like the Senator to give the figures, if he has them, showing a comparison between the imports and domestic production.

Mr. SMOOT. The Senator from Nebraska has them before him if he wants to put them into the RECORD, but they have already been put into the RECORD by the Senator from North Carolina [Mr. SIMMONS], I think.

Mr. SIMMONS. No; they were inserted in the RECORD by the Senator from Arkansas [Mr. ROBINSON].

Mr. SMOOT. They were inserted in the RECORD by the Senator from Arkansas.

Mr. SIMMONS. Let me ask the Senator from Utah a question. When we were considering the amendment, on page 59, in line 22, striking out 35 per cent as proposed by the committee and reducing the rate to 25 per cent, the Senator from Missouri made it clear that the 25 per cent rate, which is an increase of 10 per cent over the present law, could not be justified, and stated to the Senate that if the rate were increased from 15 per cent, which is the rate of the present law, it would destroy a very important industry in this State, one employing thousands of laborers, and he appealed to the committee to relent and to accept the present rate. They refused to do that. He then proceeded to show that there was no principle of protection upon which this increase in rate could be justified, and he presented facts and figures to sustain his contention, and then the Senator from Utah stated that this duty was levied for purposes of revenue.

Mr. SMOOT. No; I did not say for purposes of revenue.

Mr. SIMMONS. For revenue purposes.

Mr. SMOOT. No; I said we would collect two-thirds more than we would under the 15 per cent.

Mr. SIMMONS. But did not the Senator finally contend that it was a revenue duty, and that that was the purpose?

Mr. SMOOT. No. I spoke of revenue as being one of the features, and said that the amount would come in here whether it was 15 per cent or 25 per cent, and that the revenue would be two-thirds more.

Mr. SIMMONS. Of course, I always accept what my good friend from Utah says; but I was under the impression that the argument of the Senator from Missouri [Mr. SPENCER] had so competely demolished the contention that this increased rate was necessary for purposes of protection that the Senator from Utah, finding that he could not sustain it upon that principle, had proclaimed that it was a good duty to get revenue out of.

Now I want to ask the Senator from Utah if the duty of 35 per cent which is proposed on page 60 with reference to another class of wire, and which he proposes to reduce to 25 per cent, is imposed for the purpose of protection, or is it imposed for the purpose of revenue?

Mr. SMOOT. It is imposed for the purpose of protection.

Mr. SIMMONS. I am not in possession of the facts myself; the Senator from Arkansas [Mr. ROBINSON], who discussed this matter only very briefly, was compelled to leave the Chamber, and never finished his real discussion. Will the Senator from Utah give us the facts upon which he justifies this increase in the rate for the purpose of protection? Of course, if it is justified upon the ground that we need the revenue, and that this is an article upon which we can afford to impose a revenue duty, that would end the argument; but the Senator now says that this duty is imposed for the purposes of protection, and I suggest that the Senator ought to give the Senate some reasons why this additional protection is needed.

Mr. SMOOT. Mr. President, this duty is on "all flat wires and all steel in strips not thicker than one-quarter of 1 inch and not exceeding 16 inches in width, whether in long or short lengths, in coils or otherwise, and whether rolled or drawn through dies or rolls, or otherwise produced." That is the highest standard of finished product that can be shipped into this country that goes into the finest steel goods made. The razor blades made in this country are produced from steel falling under this provision, and tax only razor blades of all kinds——

Mr. SIMMONS. This includes wire as well as steel strips.

Mr. SMOOT. It is all made in that shape, and it comes in that shape, and the duty is absolutely necessary in order to protect the manufacturer of the highly specialized products made from this high-priced steel.

Mr. SIMMONS. Will the Senator answer me a further question? The Senator from Missouri [Mr. SPENCER], who, I presume, speaks with some degree of experience, because the industry that he was discussing is one that is located in his own town——

Mr. SMOOT. Not this at all; this is an entirely different proposition.

Mr. SIMMONS. I was going to ask the Senator whether the facts that he gave then are at all applicable to this. The Senator from Missouri stated, with reference to the other item in this paragraph, that the wire imported into this country sold for 10 cents a pound as against the domestic price of 6 cents a pound. I want to ask the Senator if this high grade and high standard of steel that he speaks of is imported here from Great Britain, and if from Great Britain, whether the price charged for that article is below or in excess of the price charged for the comparable article produced in this country?

Mr. SMOOT. The Senator is going back now to an item——

Mr. SIMMONS. No; I am asking about this particular item.

Mr. SMOOT. These items run all the way from 6 cents a pound up to $1.25 a pound.

Mr. SIMMONS. That does not answer the question I asked. I am asking the Senator whether the foreign price of this high-grade steel that he talks about is higher than the domestic price?

Mr. SMOOT. I think the domestic price is higher than the foreign price.

Mr. SIMMONS. Is it enough higher than the foreign price to justify a duty of 25 per cent?

Mr. SMOOT. I think so.

Mr. SIMMONS. It seems to me the Senator ought not to think about that; the Senator ought to have the information about that. This duty was imposed by the committee of which he is one of the leading members, and I assume that the Senator would not impose a duty of 25 per cent on an article if there is any doubt about whether the foreign article undersells or oversells the domestic article. If it oversells the domestic article, then, of course, there is no justification for it. If it undersells the domestic article there is no justification for that amount of duty unless it is necessary, according to their theory, to bring the foreign price up to the domestic price.

Mr. SMOOT. Mr. President, of course, I could not make any answer that would be satisfactory to the Senator from North Carolina.

Mr. SIMMONS. But the Senator might make one that would be satisfactory to somebody else in the Senate, or satisfactory to the country, if not to me, if I am so obstinate about this matter that he can not satisfy me.

Mr. SMOOT. I am going to call the Senator's attention to the facts as submitted here in the Reynolds report. Of course, that would not satisfy the Senator, but I want him to see what that shows.

Mr. SIMMONS. Mr. President, I simply asked the Senator for the facts about this. I have not said that I would not accept his facts. I asked him to give the facts because I think the Senate is entitled to the facts; I think the country is entitled to the facts; and when I ask questions of Senators over on the other side in a proper spirit—and I certainly have done that—it is no answer to say that I would not be satisfied whatever the price might be. I am not the one to be satisfied; it is the country.

Mr. SMOOT. The Reynolds commission collected three items under this paragraph, steel in strips. The country from which it came was Sweden. Most of it does come from Sweden. Some comes from England. Particularly that which comes from England, however, comes in strands of wire. The quantity was 100 pounds. The foreign value was $51.10. The landing charges were $1.34. The selling price of the imported article in the United States was $65.98, and the selling price of the comparable article in the United States was $80. The rate required to equalize, allowing a reasonable profit, was 85 per cent. That is what the Reynolds report shows.

Mr. SIMMONS. Will the Senator tell me under what——

Mr. SMOOT. Under paragraph 316.

Mr. SIMMONS. Yes; but I was going to ask the Senator if he would tell me what table in the summary on page 408 this product would come under. There are about 15 or 20 different

tables there, and I am not sufficiently familiar with this item to determine under which table it falls. It seems to me, however, it would fall under the table "Wire of iron or steel or other metal coated by dipping." Perhaps that is not the proper one, but I should like to have information from the Senator upon that point.

Mr. SMOOT. I think if the Senator will look on page 409, "All other wire not specifically provided for," and also "All other manufactures of wire not specifically provided for," the two brackets there no doubt would cover this.

Mr. SIMMONS. The two bottom tables?

Mr. SMOOT. I think they would cover it.

Mr. SIMMONS. I am not now in possession of the amount of production in this country; but the table, second from the last, shows that in 1918 the importations into this country, measured in dollars, were only $63,000. In 1920 they were only $203,000. In 1921 they were only $171,000. It shows that the duty collected—if this is a revenue item—in 1918 was $8,000; in 1919, $9,000; and in 1920, $30,000.

Mr. President, I do not know exactly what the production was, but perhaps I can find out.

The total of steel and iron wire—that is it—produced in this country in 1919 was 2,508,890 short tons. That is the amount—2,500,000 short tons—and the importations amounted in 1918 to $55,000. I think that if the Senator has any respect for the measure of protection which he has laid down as the proper measure of these duties, upon a consideration of those facts—2,500,000 tons of production and $55,000 worth of imports—he would be compelled to say that this duty was not a protective duty, but that it was a revenue duty; but, whether a revenue duty or a protective duty, it is evidently a duty that will increase the price of this commonly used article to a very considerable extent to the American consumers.

If it is a revenue duty it could not be justified, because of the insignificant amount of revenue which would accrue. The revenue is so small because the importations are so small; and therefore it seems to me logically it must follow that this duty is imposed simply to protect some interest that feels that it is entitled to have the American market absolutely safeguarded from foreign competition in the future, in order that it may fix the price of its products and increase its profits at will.

Mr. HITCHCOCK. Mr. President, it may be that the Senator from Utah is able to understand this paragraph and to analyze it so as to have a clear view of what these different classes of wire and wire manufactures are. I must confess that I can not, and I think it is one of the evils of this bill that it is almost impossible, as to some of the schedules, to make a proper comparison with existing law.

The existing law levies a tariff of 15 per cent on all of these classes of wire, which in this paragraph are divided up. Some of them have specific duties, like three-fourths of 1 cent per pound, or 1¼ cents per pound, or 1½ cents per pound, and nobody but the most astute statistician can tell what the ad valorem rate is, and can make any comparison with existing law.

Then these various wire schedules are divided in accordance with the size of the wire, and then still another specification is made as to the cost of the wire, and finally we come down to the pending amendment, and find that all wire composed of iron, steel, or other metal not specially provided for had a duty of 20 per cent levied on it by the House, the Senate committee recommended 35 per cent ad valorem, and I understand now the Senator from Utah proposes 25 per cent ad valorem.

Why all of this specification? Why all this confusion? No one can compare these various specifications with the existing law, which is simply 15 per cent ad valorem. I ask the Senator, has there been any undue competition from abroad under the 15 per cent ad valorem rate as it exists to-day, and if there has been such undue competition, even from the Republican standpoint, can he clearly state what it is? I am not able to find it in the statistics here. I find that the Tariff Commission states specifically that the present production of wire and the present production of wire products in the United States is enormous. There seems to be no intimation that any foreign competition is at all deterimental, and yet we have an increase in this schedule. In three particulars it is made a specific rate instead of the existing ad valorem rate, and no man can tell whether that is an increase or not. When we come down to the ad valorem rate of 20 per cent, as proposed by the House, or 25 per cent, as proposed by the Senate committee, then we can compare and see what it amounts to in this particular, almost a doubling of existing rate, and I ask why it is doubled. Can the Senator state why it is doubled?

Mr. SMOOT. I made a statement as to that twice, and the Senator now comes into the Chamber, when the Senator from Arkansas has left and the Senator from North Carolina has left and wants me to go over exactly the same ground I have already gone over twice, and I do not think it is necessary to waste the time of the Senate in doing that.

Mr. HITCHCOCK. Then, if the Senator declines to state it, I state that there is nothing in the figures showing a considerable import of this wire, and there is not considerable importation of any product, practically, made from this wire. On the contrary, the information furnished by the Tariff Commission is that for the year 1919 the wire-drawing mills of the United States—and of them there are 117 establishments—produced $409,000,000 worth of this, and of that output $401,000,000 represents wire and manufactures of wire. I assert, if the Senator will not offer the figures, that there is no importation of wire and wire products which in the slightest degree threatens that great production in the United States, amounting to over $1,000,000 a day at the present time.

The Senator from Iowa [Mr. CUMMINS] said that this is an inopportune time to enact a tariff bill. He stated that he did not like to vote for an increase of a tariff unless and until some responsible authority could show that the increase was justified by the difference in the cost of labor abroad and in the United States, or at least the difference in the cost of manufacture abroad and in the United States. The committee makes no showing of that sort, makes absolutely no showing to the Senate as to any difference in the cost of manufacture in the United States and abroad. On the other hand, the evidence shows that we have an enormous production in the United States, and importations which are almost negligible.

It may be that Senators can justify voting for nearly doubling the schedule under these circumstances. This article of wire, and this particular wire we are discussing—that is, wire composed of iron, steel, or other metal, not specially provided for—is used in the manufacture of immense quantities of what have come to be regarded as the necessaries of life. It is used in the manufacture of telephone wire, it is used in the manufacture of telegraph wire, it is used in the manufacture of nails, it is used in the manufacture of tacks, it is used in the manufacture of wire fence, and used in a dozen other capacities for the common use of the American people. Yet, without any information, without even an intelligent statement of what the difference in the proposed schedule is, we are asked to vote for what seems to be a rate which is about twice as high as the rate in existing law, although the rate in the existing law produces but little revenue and under the existing law but trifling imports come into the country.

The Senator from Utah has made the technical objection that the technical lines upon which we are now engaged represent a high-priced wire. I think he is mistaken in that. The high-priced wire is provided for on page 59, in the proviso which reads:

Provided, That all of the foregoing valued above 6 cents per pound shall pay a duty of 20 per cent—

according to the House provision, and as the Senate committee recommended, 35 per cent. So that all wire valued at above 6 cents per pound is already provided for by that section, and it is evident that all wire composed of iron, steel, or other metal not specially provided for can not be valued at above 6 cents per pound.

Mr. SMOOT. I do not want to interrupt the Senator, but——

Mr. HITCHCOCK. I would be glad to have the Senator interrupt me if I have erroneously stated the case.

Mr. SMOOT. The "above" refers to high-priced wire, and even that wire runs all the way from 6 cents a pound up to 90 cents and $1 a pound. But this refers to wire which is in long or short lengths, coils or otherwise, and does not exceed 16 inches in width. It is entirely a different proposition. It is to provide for the steel that comes in for razor blades and the highest type of manufactured article.

Mr. HITCHCOCK. I think the Senator has read it incorrectly.

Mr. SMOOT. I know that is what this item covers and what the articles are used for.

Mr. HITCHCOCK. On line 23 the language is, "All wire," which is a pretty general term, "composed of iron, steel, or other metal." I can not see how it could be more general.

Mr. SMOOT. What we are talking about is all flat wires and all steel in strips.

Mr. HITCHCOCK. It does not say anything about that in what I have quoted.

Mr. SMOOT. No; but that is what this proviso we are now discussing is concerned with.

Mr. HITCHCOCK. The proviso reads:

That all of the foregoing valued above 6 cents per pound shall pay a duty of 20 per cent ad valorem.

We have passed that. Then it goes on, after a semicolon, "All wire composed of iron," and so forth. That is a repetition. It does not refer to flat wire.

Mr. SMOOT. Read a little further.

Mr. HITCHCOCK. It says, "All wire composed of iron, steel, or other metal not specially provided for." Does not that include all wire made from any metal that is not provided for either above or subsequently? The general basket clause, "all wire," the House subjected to a tariff of 20 per cent, and the Senate committee proposes to raise it to 35 per cent, and the Senator now is willing to accept 25 per cent; but that refers to all wire.

Mr. SMOOT. Not specifically provided for.

Mr. HITCHCOCK. Where is this cheap wire otherwise provided for?

Mr. SMOOT. It is all above that. It is a specific duty, the same as it was in the act of 1909. As I have stated here three times, that is the bulk of production in the United States. The wire the Senator refers to is that not specially provided for here, and is nothing but the things which would fall in the basket clause covering wire, and will carry a rate of 25 per cent if the amendment offered by me is adopted.

Mr. HITCHCOCK. Of course, those specific provisions are not before us, because they have not been amended by the committee.

Mr. SMOOT. Why does the Senator ask the question, then?

Mr. HITCHCOCK. Because I am suspicious of these basket clauses. I know that in the past they have been used for the purpose of imposing inordinate duties, and I think that the general basket clause, "all wire composed of iron, steel, or other metal, not specially provided for," is likely to embrace a very large proportion of the wire manufactures.

Mr. SMOOT. Does it embrace them to-day under existing law? Was a tariff bill ever written that did not contain a "not specially provided for" clause?

Mr. HITCHCOCK. It is provided for in the existing law under the same clause in which all the other wires are covered. There is no attempt to mislead the unsuspicious reader by putting in a specific duty in one sentence, and then making a change in another, and then imposing an ad valorem duty in the next, so that nobody but a Philadelphia lawyer can tell what the rate is, and the committee will not enlighten us.

Mr. SMOOT. The rates are exactly the same in this paragraph. They are 25 per cent in both cases, and it does not take a Philadelphia lawyer, or anybody else, if you know anything about tariff matters, to see that they fall under identically the same rate in this bill, just as they did in the other law.

Mr. HITCHCOCK. Is the Senator able to state the equivalent ad valorem of three-fourths of 1 cent?

Mr. SMOOT. The average rate is about 25 per cent.

Mr. HITCHCOCK. I am not talking about the average rate. What is the equivalent ad valorem of 1¼ cents per pound?

Mr. SMOOT. About 25 per cent.

Mr. HITCHCOCK. And 1½ cents?

Mr. SMOOT. It will be about 25 per cent. It all depends on the thickness. The finer the wire is the more it costs.

Mr. HITCHCOCK. Then, as a matter of fact, it is increasing the existing rate of 15 per cent to a proposed rate of 25 per cent, when we have an enormous production of that wire in the United States at the present time, and an insignificant importation of it.

Mr. SMOOT. I can tell the Senator now what the exact ad valorem rate was in 1909, based on the prices then. One and one-half cents in the Payne-Aldrich law——

Mr. HITCHCOCK. The people repudiated the Payne-Aldrich law. I am talking about existing law. The rate in existing law is 15 per cent, and it is existing law you are changing. You are not changing the Payne-Aldrich law. What is your warrant for nearly doubling the rate in the existing law? Is it the cost of production at home and abroad? You do not know; you can not tell the Senate what that is. Is it the great importation of the stuff? You know the figures show there is not a great importation. Why, then, are you proposing to double the existing rate on a very necessary article, an article which goes into the manufacture of so many things which the people are compelled to consume? There will not be an answer to that any more than there was when we asked you why you were proposing to raise the tax on wood alcohol, the world manufacture of which is almost controlled by the American manufacturers.

Why are you proposing to raise the rate on ink, or why are you proposing to raise the rate on a number of other articles? They are not luxuries; they are necessaries of life, and every time you impose a higher tax on them you increase the cost of living to the American people. In this particular case, as to wire, you are increasing the cost of building; you are increasing the cost of merchandising, in which wire nails are used so extensively. Yet we have not any justification or any attempt to justify it from any standpoint.

Mr. SIMMONS. Mr. President, I wish to call the attention of the Senator from Nebraska to the fact that the provision which he has just been discussing is a matter upon which we have voted. I think his remarks were very illuminating, but in the part of that proviso which we are discussing the question of "not specially provided for" does not come in, and yet they have made the rates the same.

Mr. SMOOT. The clause "not specially provided for" does not have to appear in every bracket. It is in the paragraph, but it does not have to appear in every bracket. There is no need of having it in two places.

Mr. SIMMONS. I desire to inquire whether the amendment of the committee reducing the proposed rate from 35 to 25 has been agreed to?

The PRESIDENT pro tempore. It has been agreed to.

Mr. SIMMONS. The question now is upon the adoption of the committee amendment as amended?

The PRESIDENT pro tempore. The question is now upon agreeing to the committee amendment as amended.

Mr. HITCHCOCK. That raises the House rate, as I understand it?

Mr. SIMMONS. Yes. Upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. ERNST (when his name was called). Making the same announcement as before, I vote "yea."

Mr. FLETCHER (when his name was called). I have a general pair with the senior Senator from Delaware [Mr. BALL], which I transfer to the junior Senator from Rhode Island [Mr. GERRY] and vote "nay."

Mr. MOSES (when Mr. KEYES's name was called). I am authorized by my colleague [Mr. KEYES] to state that if present he would vote "yea" on this question.

Mr. NEW (when his name was called). Making the same announcement as on the previous vote with reference to the transfer of my pair, I vote "yea."

Mr. WATSON of Georgia (when his name was called). Making the same announcement as before, I vote "nay."

Mr. WILLIAMS (when his name was called). I have a general pair with the Senator from Indiana [Mr. WATSON]. I transfer that pair to the Senator from Nevada [Mr. PITTMAN] and vote "nay."

The roll call was concluded.

Mr. HALE. Making the same announcement as before, I vote "yea."

Mr. DILLINGHAM. Making the same announcement as before, I vote "yea."

Mr. SUTHERLAND. I transfer my pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Idaho [Mr. GOODING] and vote "yea."

Mr. HARRISON (after having voted in the negative). Has the junior Senator from West Virginia [Mr. ELKINS] voted?

The PRESIDENT pro tempore. He has not voted.

Mr. HARRISON. I have a general pair with that Senator. In his absence, being unable to obtain a transfer, I withdraw my vote.

Mr. CURTIS. I wish to announce the following pairs:

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE];

The junior Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The senior Senator from Rhode Island [Mr. COLT] with the junior Senator from Florida [Mr. TRAMMELL].

The result was announced—yeas 37, nays 26, as follows:

YEAS—37.

Brandegee	Kellogg	Nelson	Smoot
Broussard	Ladd	New	Spencer
Bursum	Lenroot	Newberry	Sterling
Curtis	Lodge	Norbeck	Sutherland
Dillingham	McCormick	Oddie	Townsend
Ernst	McCumber	Page	Wadsworth
France	McKinley	Pepper	Warren
Hale	McLean	Phipps	
Johnson	McNary	Poindexter	
Jones, Wash.	Moses	Shortridge	

NAYS—26.

Ashurst	Fletcher	Norris	Swanson
Borah	Harris	Overman	Underwood
Capper	Heflin	Ransdell	Walsh, Mont.
Caraway	Hitchcock	Rawson	Watson, Ga.
Culberson	Jones, N. Mex.	Sheppard	Williams
Cummins	La Follette	Simmons	
Dial	Myers	Smith	

NOT VOTING—33.

Ball	Frelinghuysen	McKellar	Stanley
Calder	Gerry	Nicholson	Trammell
Cameron	Glass	Owen	Walsh, Mass.
Colt	Gooding	Pittman	Watson, Ind.
Crow	Harreld	Pomerene	Weller
du Pont	Harrison	Reed	Willis
Edge	Kendrick	Robinson	
Elkins	Keyes	Shields	
Fernald	King	Stanfield	

So the committee amendment as amended was agreed to.

ORDER FOR RECESS.

Mr. McCUMBER. Mr. President, at this time I desire to ask unanimous consent that when the Senate completes its session on this calendar day it shall recess until 11 o'clock a. m. on Monday.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

DEDICATION OF LINCOLN MEMORIAL.

Mr. CURTIS. Mr. President, the Senate has already accepted the invitation to attend the Lincoln Memorial exercises Tuesday afternoon. Under the unanimous-consent agreement previously entered into the Senate would take a recess at half past 1 on Tuesday until Wednesday morning at 11 o'clock. In order that some of the Senators who have engagements for Tuesday may make the necessary arrangements, I ask unanimous consent that when we conclude the business of the Senate on the calendar day of Monday, May 29, the Senate shall take a recess until 1.25 o'clock p. m. on Tuesday. That will give us time to meet at 1.25, remain in session for 5 minutes, and then join the procession to attend the ceremonies at the Lincoln Memorial.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Kansas?

Mr. UNDERWOOD. Mr. President, I have not any objection at all. Tuesday is Decoration Day, of course.

Mr. CURTIS. That is why I have asked for a modification of the unanimous-consent agreement, in order that Senators may have all day Tuesday. If they desire to attend the exercises at Arlington in the morning, they may do so and then meet here only for 5 minutes and attend the exercises at the Lincoln Memorial.

Mr. UNDERWOOD. There is no conflict between the request of the Senator from North Dakota and the request of the Senator from Kansas?

Mr. CURTIS. None at all. I may state to the Senate that arrangements will be made for automobiles to carry Senators to the exercises at the Lincoln Memorial. Later in the day, if possible, I shall have printed in the RECORD the program for that day so that Senators may know what the arrangements are and can govern themselves accordingly.

The PRESIDENT pro tempore. Is there objection to the unanimous-consent request of the Senator from Kansas? The Chair hears none and it is ordered accordingly.

The PRESIDENT pro tempore subsequently said: The Chair has received a communication addressed to the Vice President from Lieut. Col. C. O. Sherrill, Corps of Engineers, United States Army, relative to the ceremonies to be held at the Lincoln Memorial May 30, 1922. Without objection, it will be printed in the RECORD and lie on the table for the information of Senators.

The communication is as follows:

LINCOLN MEMORIAL COMMISSION,
Washington, May 27, 1922.

Hon. CALVIN COOLIDGE,
President of United States Senate, Washington, D. C.

MY DEAR MR. VICE PRESIDENT: It is requested that the following information be given out to Senators in reference to the ceremonies to be held at the Lincoln Memorial on May 30 at 2.30 p. m.

It is requested that all Senators who attend arrive at the memorial by the Twenty-third Street route. This street will be closed to all except southbound traffic. The Senators are to get out of their cars at the northwest of the Lincoln Memorial on the circular sidewalk around the memorial. At this point they will be met by the Sergeant at Arms of the Senate and his assistants, and will be assembled not later than 2.30 p. m. on the circular grass area north of the memorial and immediately adjoining it. At 2.30 p. m. the Senators who have assembled will be conducted by the Sergeant at Arms to their seats on the Senate platform on the upper terrace of the memorial.

The cars of Senators will be parked on the outer side of the circular road surrounding the memorial, as indicated on their special parking cards, which should be attached to the windshield of motor cars.

After the services are over the Senators will again enter their cars at the same point at which they leave them and the cars will proceed northward up Twenty-third Street or Twenty-first Street.

It is of great importance that the Senators be advised that no one whatever will be authorized to use the special tickets provided for the Senators in the Senate section except the Senators themselves. It is, therefore, suggested that such of these tickets as are not going to be used by the Senators themselves be turned over to the Sergeant at Arms to be returned to this office.

The Sergeant at Arms is fully familiar with all the details in reference to the ceremony and will be present to identify the Senators and admit them to the special section reserved for the Senate.

Very sincerely yours,

C. O. SHERRILL,
Lieutenant Colonel, Corps of Engineers,
Executive and Disbursing Officer.

Mr. McCUMBER. Mr. President, I desire to state at this time that I hope the Republican members of the Committee on Finance, who have had charge of making the rates in the pending bill, will be able to sit and work with us during the day of Tuesday, instead of taking a holiday on that day. Of course, I shall not insist that anyone of them do that, but I hope that they will be able to do so, because there are a great many matters coming up daily which are presented to us, in the consideration of which I should like to have those members of the committee join in our sessions.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDENT pro tempore. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. On page 60, line 6, it is proposed to strike out the word "steel" and to insert the same word with a comma immediately thereafter.

The PRESIDENT pro tempore. Without objection, the amendment is agreed to.

The next amendment was, on the same page, in line 7, to strike out the word "electrolytic" and to insert the same word with a comma following.

The PRESIDENT pro tempore. Without objection, the amendment is agreed to.

The next amendment was, on the same page, in line 12, to strike out the word "except" and to insert "(except."

The PRESIDENT pro tempore. Without objection, the amendment is agreed to.

The next amendment was, on the same page, line 13, to strike out the word "platinum" and to insert "platinum)."

The PRESIDENT pro tempore. Without objection, the amendment is agreed to.

The next amendment was, on the same page, in line 15, before the words "per cent," to strike out the numeral "30" and to insert in lieu thereof the numeral "40," so as to read:

telegraph, telephone, and other wires and cables composed of iron, steel, or other metal (except gold, silver, or platinum), covered with or composed in part of cotton, jute, silk, enamel, lacquer, rubber, paper, compound, or other material, with or without metal covering, 40 per cent ad valorem.

Mr. SMOOT. When the time comes I shall move to strike out "40" and insert "35" in that amendment and in each of the three following amendments.

I will say to the Senator that these articles are cables composed of steel, iron, or other metals, and there is the differential between the 25 per cent rate on the wire and upon the finished manufactured article.

Mr. SIMMONS. Will the Senator from Utah be kind enough to tell me in which one of the tables on pages 408 and 409 of the Tariff Summary the articles in this bracket are covered?

Mr. SMOOT. The Senator from North Carolina may consult the table on page 409, at the middle of the page.

Mr. SIMMONS. What is the heading of it?

Mr. SMOOT. "Telegraph, telephone, and other wires and cables." I will afterwards tell the Senator where the other items are found in the table, although the articles we have now reached embrace virtually all of the items which are produced in any great quantity.

Mr. SIMMONS. Then the items we are now to consider are covered by the table headed "Telegraph, telephone, and other wires and cables"?

Mr. SMOOT. Yes; and all wires "covered with or composed in part of cotton, jute, silk," and so forth.

Mr. SIMMONS. Will the Senator advise me, if he has any figures in reference to the matter, what is the domestic production of these wires?

Mr. SMOOT. If I remember correctly, there is no information given by the Tariff Commission specifically on that item, but I will say to the Senator that the production in this country is very large.

Mr. SIMMONS. I will ask the Senator from Utah if the production is not covered in the Tariff Commission's report by the statement—

The total production of insulated wire and cables for the same year—

That is, for 1919—
was valued at $129,623,100?

Mr. SMOOT. Yes; I will say to the Senator that covers the item.

Mr. SIMMONS. Mr. President, we have this situation: The production of this article is $129,623,100, or, in round numbers, $130,000,000. The imports for the year 1918 were valued at $17,964; in 1914 at $44,955; in 1920 at $59,074; and in the first nine months of 1921 at $139,504. I think we might say in face of those figures that, with a domestic production of $130,000,000, there are practically no importations of this commodity.

I assume, therefore, that this duty is imposed for revenue purposes. I will ask the Senator from Utah if the purpose of the imposition of this 40 per cent duty, which the Senator now proposes to reduce to 35 per cent, is for revenue?

Mr. SMOOT. No; it is for protection.

Mr. SIMMONS. In face of those facts I should like to ask the Senator to give us the reason why it should be protected. I do not know why, and I should like to be informed.

Mr. SMOOT. If the Senator from North Carolina will notice, he will see that in 1918 there were only 170,981 pounds imported; in 1919 the importations rose to 327,000 pounds; and for the nine months during 1921 they rose to 830,000 pounds. The information I have is that the importations are now increasing very rapidly. I will admit, however, to the Senator that the importations are small as compared with the domestic production in this country at this time.

There is a duty of 25 per cent upon the wire itself; this bracket embraces wire covered with or composed of cotton jute, silk, enamel, or other material, making a cable, and there should be a differential between the raw product and the manufactured article of 10 per cent.

Mr. SIMMONS. Does the Senator contend that this duty is put on for compensatory purposes?

Mr. SMOOT. I did not say it was for compensatory purposes. I said the differential between the raw product and the manufactured article is 10 per cent.

Mr. SIMMONS. We do not get much of an idea by making the comparison in pounds; dollars answer a much better purpose; they enlighten the mind to a greater extent. One hundred and thirty million dollars' worth is the domestic production, and the Senator says because of the fact that importations have increased in four years from $17,000 to $138,000 worth admonishes the Republican Party that they ought to put a 35 per cent duty upon this product. At that ratio of increase it would probably be 100 years before there would be imported into this country 25 per cent of the domestic production. I do not think the tariff bill ought to anticipate the future for 25 or 50 years.

But, Mr. President, the duty imposed does not seem to be justified upon any protective principle. The Senator has not told us that this product can be produced cheaper abroad than it can be produced here; that it is being sold here at ruinous prices, or that the industry will be destroyed by the importation of this cheap product from abroad. The Senator has not told us that the domestic article costs more than the foreign article; the Senator has not told us that the foreign selling price is so much under the American price that it is necessary to put a duty in order to raise the foreign price up to competitive conditions in this country; the Senator has not given us any of the facts that are supposed to be necessary to underlie and support a protective duty. The Senate is not in possession of a single fact that would justify a protective duty. The only fact that it is in possession of is that the importations are $138,000, as against a production of $130,000,000, and that, Mr. President, upon an article that is in common use from one end of this country to the other. It includes not only wires necessary to carry telephone messages from one end of the country to the other, but it includes, I assume, telephone wires.

Mr. SMOOT. Oh, no; it covers cables.

Mr. SIMMONS. The table the Senator gave me a little while ago, under which he said this paragraph falls, covers "telephone and telegraph and other wires and cables."

Mr. SMOOT. "And cables." The wires referred to are in cables.

Mr. SIMMONS. It does not say "in cables"; but "telegraph, telephone, and other wires and cables." That, the Senator from Utah says, is the heading under which these importations come in, and the descriptive term under which the estimate of the domestic production is made is "Production of insulated wires and cables." It will not do for the Senator to say that this is confined to cables when it is not confined to cables.

Mr. SMOOT. It is confined to wire covered with or composed in part of cotton, jute, silk, and so forth.

Mr. SIMMONS. They may be covered with other materials, but I asked the Senator if he justified this rate upon the ground that there was a duty upon the articles that cover the wire and if therefore the wire wrapped up in these things is entitled to a corresponding compensatory duty, and he said he did not. The Senator ought to give the Senate some reason which would justify this rate according to the terms of either protection or revenue. He certainly has not given any that justify it as a protective duty, and he can not give any that justify it is a revenue duty, for the amount of revenue under the importations for 1918 was only $2,690 and the amount of revenue derived in 1921 was only $8,861. There is practically no revenue from the duty. Why, then, should we impose a duty of 35 per cent, which is more than a third value of the product, upon these wires and cables used by the people of the country as extensively as any other product of the steel industry is used?

I have no disposition to pursue this matter unnecessarily. If we could secure some information from the Senator that would justify it we would be in a better position to vote intelligently upon it.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the committee.

Mr. WALSH of Montana. Mr. President, before we proceed to a vote, the particular amendment under consideration, as I understand, is found on line 15, page 60, but it is followed up by one of the same tenor in the following line applicable to wire rope and wire strand upon which the duty fixed by the House was 30 per cent ad valorem and the duty proposed by the Senate Finance Committee is 40 per cent ad valorem, which the Senator from Utah now proposes to reduce to 35 per cent. I imagine that the Senator from Missouri [Mr. SPENCER] had some special interest in this particular feature of the paragraph—wire rope.

Mr. SIMMONS. I will state to the Senator that there is an industry in the town of the Senator from Missouri producing a certain class of these wires in which he is very much interested. He thought that the proposed duties, being so excessively high, would destroy that industry, and he voted with us against them, but that item having been passed, he is not so particular about the industry of somebody else.

Mr. WALSH of Montana. I understood that the particular feature to which the Senator from Missouri was objecting was the provision on page 59 with reference to the duty upon the iron or steel wire entering into the composition of the wire rope referred to near the close of the paragraph. The Senator believes that the wire itself ought to be protected to the extent of 35 per cent.

Mr. SMOOT. No; the Senator wanted a lower rate on the wire, and 35 per cent on the wire rope.

Mr. WALSH of Montana. Twenty-five per cent is the figure eventually agreed upon, according to my recollection—25 per cent protection given to the producers of the iron or steel wire. The manufacturers of wire rope are given a compensatory duty of 25 per cent, and then a protection, under the proposition now made, of 10 per cent. In other words, the makers of iron or steel wire are protected to the extent of 25 per cent, but the manufacturers of steel rope are protected to the extent of only 10 per cent. Perhaps the Senator from Missouri would be able to shed some light upon the invidious distinction in the rate of protection with respect to these two articles.

For myself, I can see no very good reason why, if any of these commodities need protection, the manufacturers of wire rope should not be accorded just exactly the same measure of protection as the manufacturers of the wire of which the rope is made; but that is not the feature of the thing that particularly interests my State. It is deeply interested, however, as is every mining State, in the duty upon wire rope.

Every mine must be equipped with this kind of rope. Much of it is woven in great flat strands, and the consumption in my own State must involve, I am sure, an annual expenditure of some hundreds of thousands of dollars.

Mr. McCUMBER. Mr. President, may I ask the Senator if he does not think that the difference between 25 per cent ad valorem on the wire and 35 per cent ad valorem upon the rope is a sufficient conversion cost or differential?

Mr. WALSH of Montana. It is a matter of no consequence to us who buy the stuff how you distribute it. The fact of the matter is that you propose to charge us 40 per cent more for wire rope than we can buy it for elsewhere.

Mr. McCUMBER. I have noted that the Senator suggested that possibly the Senator from Missouri could explain the necessity for more than this 10 per cent differential in the ad valorem rate.

Mr. WALSH of Montana. Yes.

Mr. McCUMBER. I asked the Senator the straight question whether he considered 10 per cent difference a sufficient duty to differentiate.

Mr. WALSH of Montana. I consider it ample. From the figures given, I see no reason why there should be any; but if you give 25 per cent protection to the manufacturers of the wire, what justification is there for cutting off the manufacturer of the wire rope with 10 per cent? Of course, my view about the matter is that there should not be any duty upon either of them.

Mr. SMOOT. This is the justification for not making it more than 35 per cent:

One pound of wire costs 8 cents. One pound of rope costs 16 cents. Twenty-five per cent of the 8-cent wire is 2 cents duty. Thirty-five per cent on the 16-cent rope is 5.6 cents, or a differential of 3.6 cents; and that is ample protection.

Mr. WALSH of Montana. That is an odd way of figuring it, but let it go at that.

Mr. SMOOT. That is the only way.

Mr. WALSH of Montana. That is not my quarrel. My quarrel is that for every $100,000 worth of wire rope that comes to Butte, Mont., the purchaser must pay $140,000. In other words, he is taxed to the extent of $40,000 on every $100,000 worth of wire rope that is bought, and, from the figures exhibited here, without a justification on earth for it, the production in this country vastly exceeding the imports, which for all practical purposes are negligible.

Mr. President, copper is the chief mineral production of my State.

Mr. SMOOT. The Senator knows that even the present law provides a duty of 30 per cent.

Mr. WALSH of Montana. I do not care what it is.

Mr. SMOOT. No; I see the Senator does not.

Mr. WALSH of Montana. I am calling attention to the fact that the miners of copper in the State of Montana—an industry that is not protected in any way whatever, and can not be—are obliged to pay, for some reason or other which is not disclosed, $140,000 for every $100,000 worth of wire rope they purchase.

As I said, the copper industry is not protected. In common with all branches of the mining industry, it has been suffering for a period of two years such distress as has never afflicted it before in the history of the industry. The mines in Butte, now operating in a small way, have been closed down for a period of nine months, signifying such distress in that community as can scarcely be imagined.

Mr. SMOOT. Mr. President——

Mr. WALSH of Montana. I yield to the Senator.

Mr. SMOOT. The Senator, of course, knows that there has been distress in the zinc-mining industry and the lead-mining industry, and there are duties upon those metals.

Mr. WALSH of Montana. Yes; if the Senator will pardon me, I intend to read from the Engineering and Mining Journal of January 21, 1922, something about the state of the mining industry in this country.

> The future of the copper industry is influenced by many unmeasured factors. Certain world-wide tendencies are evident, but the effect of such tendencies in individual countries is obscure. A revival of the domestic industry—

Which, of course, indicates that just now it is dead, or moribund—

> during the first half of 1922 is expected by some, but is mainly dependent upon general business revival here and in Europe.

"And in Europe"—the revival of the copper industry in this country depends upon the revival of business in Europe.

I clipped from the paper a day or two ago a very gratifying little memorandum to the effect that the foreign demand for copper has shown some evidence of improving, as a consequence of which the price has gone up to 13½ to 13¾ cents a pound. The revival of the industry depends upon the revival of the purchasing power of Europe, to which we annually send 60 per cent of the American product; and we propose now to put up a tariff wall so that Europe can not sell any of her goods to us so as to permit her to buy our copper.

But it is not only the copper industry that is thus paralyzed, Mr. President. I read from the same volume touching lead mining:

> Conditions during 1921 in the lead-mining industry, particularly in the stated States, were most discouraging. The selling price of the metal had returned to the pre-war level, but costs, certainly at the beginning of the year, were still on the war level.

Now, it is proposed to put a tariff upon one of the prime things that they must use in lead mining, an increase over the tariff prescribed by the present law, so as to increase further the costs of mining:

> Mining, milling, and smelting costs had more than doubled since 1914; wages had increased in no districts less than 75 per cent, and in many operations over 100 per cent; efficiency had dropped; materials, supplies, and railroad freights had in general more than doubled, and on some roads quadrupled. Unless costs could be brought down, most of the ore in the United States would cease to be ore in the generally accepted sense.

Zinc mining is equally suffering:

> The year 1921 was most disastrous to the zinc miners. The effects of the war produced a financial crisis which required a drastic curtailment of all expenditures and brought about a hand-to-mouth rate of expenditure extremely detrimental to the industry and to general prosperity and well-being, which involves providing for future as well as present requirements.

And gold mining:

> In the United States the decline in the production of gold continued throughout 1921. The small reduction in the cost of supplies and labor which took place during 1921 was not sufficient to warrant starting up many of those properties that were closed down during the peak of the rise in price. The production of gold in the United States has also been diminished by the closing down of the copper mines, from which a certain amount of gold was produced as a by-product.

As I have stated upon the floor heretofore, the copper mines in Butte are now down to a depth of nearly 1 mile, 3,600 to 4,000 feet. The ore is all hoisted from a depth varying from 300 feet from the surface to 4,000 feet, the average depth being, I should say, about 2,000 feet. In other words, Mr. President, every mine that is operating upon an average uses continuously at least a mile of this wire rope, usually from 6 to 8 inches in width; and it is proposed now, in view of the depressed state of the industry, to make the miners pay for the wire rope they use 40 per cent more than it could be purchased for from the foreign manufacturer, when the figures show that there is no occasion whatever for it.

I can not understand how Senators can think of imposing these awful burdens upon the industries of the country in the interest of those who happen to be making wire rope.

Mr. McCUMBER. Mr. President, the Senator has so often reiterated the statement that this bill compels the person who purchases wire rope to pay 40 per cent more than he would pay except for this bill that I think it is proper to call his attention to the fact that the Underwood-Simmons law provides for 30 per cent. We propose to reduce this to 35 per cent, so that there would be a difference of only 5 per cent between the rate in this law and the rate in the Underwood law.

Mr. UNDERWOOD. Of course, I can not recall everything that is in the present law, but will the Senator call to my attention what provision in the present law provides for 30 per cent? My recollection is that the present law provides for a rate of 15 per cent.

Mr. McCUMBER. That is the rate on the wire. We are now talking of the rope. That is what the Senator from Montana is speaking of. The act of 1913, paragraph 114, provided, "wire rope, 30 per cent ad valorem."

Mr. UNDERWOOD. The wire, however, is taxed 15 per cent, is it not?

Mr. McCUMBER. Yes; but the Senator from Montana was talking about wire rope, and the Senator from Montana is insisting that this bill will compel the Montana purchaser to pay 40 per cent more for his wire rope. Assuming that every penny of a tariff added a penny to the final cost, he would simply pay 5 per cent more than under the present law and not 40 per cent more.

Mr. WALSH of Montana. Mr. President, the Senator from Montana made no comparison between what the Montana purchaser would have to pay under this provision and what he would have to pay under the existing law. I insisted he would have to pay 40 per cent more than he could get it for abroad.

Mr. McCUMBER. I think the Senator put it a little broader than that, because he said we were compelling him to pay 40 per cent more than we otherwise would compel him to pay. Does the Senator believe that it should be free? Does he think that we should have not even a penny of revenue duty upon it?

Mr. WALSH of Montana. The figures show that there is no revenue derived from it.

Mr. McCUMBER. If there is no revenue whatever derived from it, I assume it is not injuring anyone particularly. I can not understand the position taken by the Senator from North Carolina about everything in this paragraph. The conditions are practically the same, as shown by his figures, as they were in 1913. He says the importations are a bagatelle. They were a bagatelle at that time. They amounted to but very little, and yet he put a duty of 15 per cent upon this article. We propose a duty of 25 per cent on it. If you can excuse a duty of 15 per cent, you can equally excuse a duty of 25 per cent, unless you establish the fact that it will come in at 15 per cent but will not come in at 25 per cent.

Mr. SIMMONS. Mr. President, I would like to ask the Senator this: If a 15 per cent duty excluded importations, why is it necessary to raise that to a higher figure?

Mr. McCUMBER. Because it did not exclude. I do not think importations will be excluded even with the higher duty. I think we will get substantially about the same proportion we got before, and that the difference in duty of 10 per cent will not affect it one way or the other. I believe there will still be a very slight importation.

Let me explain. There is one item which has already been explained by the Senator from Utah [Mr. SMOOT] and the Senator from Missouri [Mr. SPENCER]. One claims, the other admits, that the English wire is better than any wire produced in the United States for a particular purpose, and that therefore they can obtain whatever price is necessary for them to continue in business in the United States. I will assume that that wire will come in, and that it will be manufactured in the United States, and there will be a sale for the rope into which it goes, notwithstanding the fact that we have added 10 per cent ad valorem duty on the wire, because it is considered, at least by the purchasers, as superior to the American-made wire, and they have to pay a higher price, and they claim they are being held up for an excessive price. So I think it will be sold.

Mr. President, it seems to me we ought to take either one side or the other, and say they all ought to be on the free list or that they ought to have some rate of duty imposed on them, and then the question would be only what rate of duty should be imposed.

Mr. UNDERWOOD. Mr. President, I am listening with very great interest to the Senator, but I can not follow his argument. He admits that the 15 per cent rate of duty under the present law practically allows no importations, and the Government gets no revenue from it, practically speaking. Then, because that happens under a 15 per cent rate, the Senator justifies increasing that rate to 25 per cent on the ground that there probably will be about the same amount of importations.

I want to say to the Senator, so far as my interest in the present law and my responsibilities for it are concerned, I made some mistakes, as every other man who has ever attempted to draft a tariff bill has made them, but I have always been willing to admit my mistakes. I said the other night that in writing the present law my effort was not to be radical, and I am sure I can say the same of the Senator from North Carolina [Mr. SIMMONS]. We were trying to be conservative in our reductions and we did greatly reduce the rates under the former Republican law in this schedule, but it is evident we did not reduce them enough, that we did not produce any competition. We practically produced no revenue, and if we had the writing of that bill again this rate on wire and wire rope would undoubtedly be reduced. The fact that it is exclusive under the 15 per cent rate the Senator takes as justification for making the rate 25 per cent. I must say I can not follow him in that line of reasoning.

Mr. McCUMBER. Perhaps the Senator can follow me in this line of reasoning. I can understand my own proposition and the reasons for it, and to me it is clear.

If there is a certain kind of wire coming in which is used to make a certain kind of rope, which is considered of greater value than any other kind produced in the United States, it would probably be sold if it carried a 10 per cent higher duty than that which was fixed in the Underwood tariff law. I think I can understand that, even though the Senator is not able to follow me, as he says, along that line of reasoning. But let us take the matter we just had under consideration—insulated wire. In 1913 we imported only $4,448 worth. The Senator had those figures before him when he fixed his rate of 15 per cent ad valorem. It was a small amount, and I might reasonably ask him why he put a 15 per cent ad valorem rate upon an article the importations of which even then amounted to only $4,448.

Mr. UNDERWOOD. I can tell the Senator very readily, if he wants the information.

Mr. McCUMBER. I would be glad to have it.

Mr. UNDERWOOD. The rate under the Republican law, which was on the statute books at the time the present law was written, was 40 per cent, and we reduced it to 15 per cent, believing that a reduction from 40 per cent to 15 per cent would produce some competition and some revenue. We reduced it to a third of the existing rate, but nine years' time has run by and it has been demonstrated that reducing the rate from 40 to 15 per cent did not bring in any importations, and therefore we ought to have reduced it to a lower figure. That is the reason.

Mr. McCUMBER. Let me follow the Senator's reasoning right along down to 1921, when the importations increased to the value of $193,864. If, therefore, the Senator finds that they are enormously increasing, at least in percentage, over what they were when the Underwood tariff law was enacted, then we should increase the rate, because we would get more revenue; and it has increased to this amount very rapidly within the last year.

Mr. UNDERWOOD. But the increase amounts to nothing when considered in comparison with the great number of industries, as the Senator knows.

Mr. McCUMBER. That is true; but we have many an article on this list out of which we would not get $50,000. We will get $50,000 out of this, and we will need a great many sums of $50,000 to meet the appropriations which are to be made for next year. I think we are justified in raising the rate, and this amendment raises it only a small amount. I think we are justified in raising the rate 5 per cent ad valorem upon the rope which is produced.

Mr. UNDERWOOD. The Senator overlooks the fact that for the $50,000 which he says we might get out of the imports on an industry which mounts way up into the many millions, he is enabling those who manufacture behind the tariff wall to make the American people pay ten, and it may be a hundred, times $50,000.

Mr. McCUMBER. I have not assumed that there was a complete monopoly and that the American people are wholly in the hands of a monopoly. I believe there is competition in this line. Certainly there is some competition between the Missouri firm and the others here in the East which are manufacturing this rope, each one insisting that his is as good as the others', at least, and where there is that competition I do not think we need fear that it will cease the moment we put this added 5 per cent ad valorem on.

The Senator's reasoning is that 30 per cent ad valorem does not unjustly raise the price, but if we make it 35 per cent ad valorem, then we are adding 35 per cent to the cost of the entire product.

Mr. UNDERWOOD. No; the Senator can not put any reasoning of that kind into my mouth, because I repudiate it. I said that although it is claimed that in the present law the rates contained in the former Republican law were greatly reduced, it was evident that we had not reduced them enough, and that if we had the opportunity now we would greatly reduce the rates in the present law. The Senator can not put any reasoning in my mouth to the effect that I am justifying any rate in the present law, when conditions have proved that the rate is not justified, although it was an immense reduction from the rates of the former law.

So that is no argument to me. If I were rewriting the bill I would probably reduce the rate very much lower or I would put the item on the free list. But because the committee thinks that, although the committee makes a tremendous reduction, we did not reduce it enough nine years ago, is no justification for the Senator's present stand.

Mr. McCUMBER. Mr. President, I think we have argued this matter long enough. I believe it will stand the 5 per cent higher duty than that fixed under the Underwood Tariff Act.

Mr. GOODING. Mr. President, I would like to ask the Senator from Alabama if he feels now that the rates in the Underwood-Simmons law were too high at the time that law was enacted.

Mr. UNDERWOOD. I will answer the Senator in a moment as soon as I can get the floor. I will take the floor if the Senator has concluded.

Mr. GOODING. I am through.

Mr. UNDERWOOD. Some of the rates were not too high and some of them were too high. I think many of the rates were too high, although we put pig iron and ore and coal on the free list, and reduced the taxes that were levied by the Payne-Aldrich law, the Republican law that was then on the statute books. In many cases we cut the Payne-Aldrich rates in half, and many times we cut them more than that. I think on most of the iron and steel products we did not cut them enough. Of course, I did not expect to work out the problem all at one time. I am free to say if we had a Democratic Government instead of a Republican Government, and if I were writing that law, I should certainly advocate that the rates which were written in the present law in the iron and steel schedule, at least in regard to a great percentage of the items, should be greatly reduced. There is no question about that.

I am glad the Senator from Idaho asked the question, because it brings to my attention another paragraph in the bill just following the one under discussion, and I will call that to his attention. The Senator, being a consistent Republican, believing thoroughly in the doctrine of protection that prohibits, has supported, as far as I have observed, every item in the bill, every

amendment proposed by his party. Right down the line he has stood for them. The Senator was advocating protection the other day for the farmers, justifying a protective tax of 20 cents a bushel on corn. Of course, it has never gone through my intellect how the farmer will get any benefit from that tax of 20 cents a bushel on corn when he ships corn all over the world and none comes in here.

But I would like to call the Senator's attention now to what the present law is doing. I have no doubt the Senator from Idaho will gladly support the next paragraph when the time comes to vote on it. That is paragraph 317, which reads as follows:

All galvanized wire not specially provided for, not larger than twenty one-hundredths and not smaller than eight one-hundredths of 1 inch in diameter, of the kind commonly used for fencing purposes, galvanized wire fencing composed of wires not larger than twenty one-hundredths and not smaller than eight one-hundredths of 1 inch in diameter; and all wire commonly used for baling hay or other commodities, one-half of 1 cent per pound.

That covers all the wire which was under the paragraph in the present law, except barbed wire. The committee very kindly left barbed wire on the free list. Everybody knows that barbed wire makes an immense roll. It is difficult to get it into a ship. The freight rates are intensely high and none comes in here even without any tariff on it. None could come in under any circumstances. The freight rates are high on this wire.

Under the present law, as the Democratic Party wrote it nine years ago, all of the items with reference to this wire were on the free list. We could not put the rates any lower. This is wire that the farmer uses. In return for the benefit that the Senator from Idaho is to give the farmer in putting a protective tariff tax on his corn, he is going to make the farmer pay one-half of 1 cent per pound on all the wire he uses.

Let us analyze this just for a moment, so that the Senator and I can understand it. I admire the Senator's consistency. He is rock-ribbed in his Republicanism and his protectionism, and I like to see a man stand for his own flag. But I want to draw the line so clearly that it shows the difference between the flags under which we stand.

Mr. GOODING. Mr. President, I want to pass the compliment right back to the Senator from Alabama. I am a Republican protectionist; he is a Democratic free trader. We understand one another very clearly and I like to discuss the principle of protection and free trade with the Senator from Alabama. He is always fair in his discussion, and always clear.

Mr. UNDERWOOD. I thank the Senator for his compliment, and I take no offense at his calling me a free trader. I do not believe in levying taxes on the American people except for revenue. I do believe in a revenue tariff at the customhouse, but only for the purpose of revenue.

I want to call the attention of the Senator to paragraph 317. There is no amendment in that paragraph, and we can not vote on it this afternoon. However, there will probably be a chance hereafter, and I want the Senator to think about it before he hands this burden to the American farmer in exchange for 20 cents a bushel on his corn.

The description of this paragraph in the Summary of Tariff Information reads as follows:

Wire provided for in this paragraph is that used for fencing purposes and for baling hay and other commodities. The fencing wire is limited to galvanized while the baling wire may or may not be galvanized.

Barbed wire is on the free list. This is the farmer's wire, on which he has no tax now. It is now coming in free. It has free competition from the markets of the world if any would come in.

As to production, I will refer only to one year. The production was large in 1914, and increased up to 1919. The production in 1919 amounted to 312,150 tons, of a value of $30,527,000. The imports for the year 1919 amounted to 42 tons, valued at $26,424. The imports amounted to less than one-tenth of 1 per cent when the product was on the free list. The production in this country amounted to 312,150 tons, which, converted into pounds, would amount to 699,216,000 pounds. With a tax of one-half of 1 cent a pound, it would increase the cost of this wire to the farmers of America to the extent of $3,496,080.

We exported this same wire in 1919 to the amount of $933,143, showing that with that wire on the free list, as against a production of 312,000 tons, only 42 tons were imported. Yet it is proposed in this paragraph to put on this wire, which is the farmers' wire, a tax of one-half of 1 cent per pound, and, I suppose, for the purpose of evening up what he has been given on corn—20 cents per bushel.

I see no reason for this tax. I see no reason why the committee should put it on. It is not protection that is needed. There can be no purpose in putting it on except to let the man who makes the wire raise the price. There is no revenue to come from it, because at one-half of 1 cent per pound it would cost the people $3,500,000, and the only revenue we got out of the item in one of the years of largest importations, and they never were large, was $26,000.

I am not going to take the time of the Senate about the matter, but it is one of the items that I want my friend from Idaho, in his stalwart strength as a great protectionist in his party, to take to heart and see if he is going to add this tax to the farmers of America, even if he has been given a so-called protection of 20 cents a bushel on corn.

Mr. GOODING. Mr. President, I wish to say in reply to the statement of the Senator from Alabama that so far as the steel schedule is concerned, with the exception of wire and steel rails, there is a very great difference in the two schedules.

Mr. UNDERWOOD. If the Senator——

Mr. GOODING. Please wait until I get through.

Mr. UNDERWOOD. I want the Senator to prove that statement, because he can not justify it, in my opinion, under the provisions of the bill.

Mr. GOODING. When we take the increased cost of labor in this country, which is now 105 per cent higher than pre-war prices, and when we take the railroad rates into consideration, which are 53 per cent higher than the pre-war rates, even after the 10 per cent reduction was made in July, the Underwood rates on an average are higher than the rates proposed in the McCumber bill. Taking the whole bill through, one schedule with another, the rates are higher than the bill which we have under consideration, especially when we take into consideration the wages paid in Germany as compared with pre-war prices. That is all there is to it.

The question of protection is the laboring man's question. The labor is what enters largely into the cost of iron all the way through. Some place or other, in producing the iron ore, or the finished product in the factory, and all along the line, there is labor entering into it as an element. That is what it represents.

Here are some of the prices they are paying in Germany to-day as compared with what they paid prior to the war.

The average wages for bakers in 1913 in Germany were $6.14 a week, and the wages paid on December 31, 1921, were $2.52 per week. The average wage paid to brewery workers in 1913 was $7.73 a week, while the average on December 31, 1921, was $2.43 a week. The average wage paid to unskilled brewery workers in 1913 was $5.68 a week and on December 31, 1921, it was $2.39 a week. All down the list, Mr. President, we find that the workers in Germany to-day are being paid about one-third of the pre-war wage, while in this country the laborers are being paid wages 105 per cent higher.

In many of the schedules I do not think the rates in the pending bill are sufficiently high to protect us against German labor. Before the war half of all the labor in Germany was employed in getting ready for the Great War, building munitions for the war, building up a big army, building up a big navy. To-day they are all doing work in industrial plants. Germany can manufacture for the whole world along some lines, and unless we have protection to the extent of the difference in the cost of production in this country and in Germany, she will absorb a great many of our markets and there is no hope for us. There is no question about that.

I have a paper roll over in my office, brought to me by a Mr. Clark, that I am going to exhibit here in the near future. The paper mills to-day are sending their designs to Germany and having them made over there out of copper. It is all hand work; that is, the roll itself is of wood, but the work in making the design is all done by hand and of copper. There is an industry that is going to be destroyed. This bill gives it but 40 per cent protection. It can not continue to exist without 100 per cent protection. I am going to produce the figures; I am going to bring the roll here and show that the industry will be entirely lost to America unless it is given proper protection. If the Senator from Alabama [Mr. UNDERWOOD] will simply consider the question of labor in foreign countries and the increased cost of production in America, and will take the law which bears his name and compare it with the McCumber bill, he will find that on the average the rates imposed in the Underwood law are very much the higher of the two, so far as the manufacturer is concerned.

Mr. UNDERWOOD and Mr. ASHURST addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Idaho yield and, if so, to whom?

Mr. UNDERWOOD. I will wait until the Senator from Idaho shall have concluded, as I wish to answer him.

Mr. GOODING. I yield to the Senator from Alabama.

Mr. UNDERWOOD. I do not wish to interrupt until the Senator shall have concluded his speech.

Mr. GOODING. I have no intention of making a speech, but I am interested in keeping the great principle of protection and free trade clearly defined, and I think the Senator from Alabama has done that splendidly.

There is not any question as to the relative position of the Republican and Democratic Parties to-day. The Senator from Alabama has gone further than to say that protection is unconstitutional; he has stated that, in his judgment, it is morally wrong. That is the issue that we are going to fight out in the coming campaign and not the question of rates. The Republicans can defend every rate in this bill, in my judgment, but it is the question of principle the American people must decide; whether we shall have free trade or protection.

The Senator from Alabama has told us when he undertook the revision of the Payne-Aldrich law that he found the duties imposed therein very high; that they were on stilts, and he put a jackscrew under them and commenced to let them down; but he says that in the Underwood law the duties were not made low enough, and if the Democrats could frame that bill over again they would have made the rates of duty even lower. That is the question which confronts the American people. I think the duties are too low in the Underwood law, and had it not been for the outbreak and duration of the World War, God only knows what might have happened to American industries.

I am glad to have the principle defined and the position of the Democratic Party stated by its great leader—I am more interested in that than I am in the question of rates—so that we may go before the American people and fight out the issue. If they want free trade, they may have it, and that is what the policy championed by the Senator from Alabama means, and is absolutely nothing else and nothing less than that.

Mr. UNDERWOOD. Mr. President, speaking personally and for nobody but myself, I am delighted to meet the issue proposed by the Senator from Idaho. The Senator first stated that I defined the proposition which he has presented as being immoral. Well, I do not say that every Republican bill is immoral, but I do say, and I have always believed, that the principle is immoral of using the power of the Government through the instrumentality of taxation to take dollars out of one man's pocket and put them into the pocket of another, and especially when that other may be a great monopoly. Many people may not agree with me, but I regard that proposition not as the immorality that sends a man to jail or the immorality that makes him a leper among his fellow men, but it is that immorality that stamps the mark of greed upon his conscience; it is that immorality that puts into men's souls the desire to grind down other men for their own advantage.

Mr. GOODING. Mr. President, I agree with the Senator from Alabama absolutely, that any tariff bill which makes the rich man richer and the poor man poorer would be a crime and is a crime. Any tariff bill that would give the American manufacturer a complete monopoly, in my opinion, is a mistake. The point I am making is that the pending bill only makes allowance for the honest difference between the cost of production between this country and foreign countries, and in many cases is not even that much, if the price of labor in America and the price of labor in foreign countries be fairly considered.

Furthermore, I want now to say to the Senator—and if he will investigate the facts he will find that I am correct, though he and I have disagreed about it before—that something like 30,000,000 American people who are living in the great cities may be reached by water transportation from foreign countries, and may be clothed and also fed, if you please—I do not say that that is now being done, but it may be done—by our foreign competitors under freight rates very much cheaper than the farmers of America pay when they send their freight over the lines of railroads which are manned by the most expensive labor in the world and on which freight rates are of necessity high. That is the situation.

Mr. UNDERWOOD. Mr. President, the Senator from Idaho avoids the issue between us.

Mr. GOODING. No. In order that the Senator may not misunderstand me, I repeat that I agree with him thoroughly that any tariff bill that will make the rich richer and the poor poorer is a crime. No Republican advocates that.

Mr. UNDERWOOD. I am glad the Senator admits that much; but when he advocates exclusive rates, levied so as to protect the American production, he advocates a policy which enables the manufacturer to stand behind that protective wall and charge higher prices to the American people than he would charge if such rates did not exist. If that is not through Government instrumentality taking the money out of one man's pocket and putting it into another's, I do not know what it is. The whole history of tariff legislation has demonstrated that many men have grown inordinately rich because their business had been protected by a tariff such as is now proposed.

I am glad, however, that the Senator from Idaho agrees with me that when that happens it is immoral; and it is bound to happen under legislation that prohibits imports. That is what I am pointing out right now. Of this very article which is under consideration there are no imports which can come in now, and the Committee on Finance have put the rate higher for that purpose.

Mr. GOODING. But the Senator from Alabama says that any protection is morally wrong and unconstitutional. The Senator belongs to the school which advocates that doctrine. That is the principle that we are going to discuss in the coming campaign, and which should be discussed here.

Mr. UNDERWOOD. The Senator from Idaho can not put me in the record wrong. I was one of the men who wrote the present law.

In collaboration with my associates I helped to levy taxes at the customhouse which would yield revenue for the Government, and I endeavored to levy those taxes in such a way that imports could come into this country at least to a reasonable degree and afford competition in order to hold down prices. I made some mistakes; awhile ago I admitted a mistake which was made in connection with the paragraph now under consideration. The rate was reduced from 40 per cent in the old law to 15 per cent, hoping to abolish a prohibitive rate and reduce the tax to a point where it would be a revenue rate and allow some competition to come in, but I did not make the rate low enough. I intended to do it, and yet those in charge of this bill now are turning around and putting the rate at 35 per cent. Although the Senator from Idaho winds up his statement by saying that the rates in the present law, which he calls the Underwood law, are too low and says that I would lower them still further, yet in the beginning of his speech he said on account of the difference in prices and labor costs between this country and foreign countries the duties in the present law, the so-called Underwood law, at the time it was framed were higher than they will be under the McCumber bill.

Mr. GOODING. That is according to the cost of production.

Mr. UNDERWOOD. The respective scales of wages are going to apply equally, whatever they may be, under both bills; these bills are not going to change the scale of wages. There is going to be the same scale of wages under the McCumber bill that there is under the present law. Under the present law the bill which was prepared when I was chairman of the committee in the House and the distinguished Senator from North Carolina [Mr. SIMMONS] was chairman of the committee in the Senate, under our joint efforts the wages, as the Senator knows, have not decreased, and yet if the Senator will take the items of this bill in almost every case he will find there is an increase over the present rates, and in many cases they are doubled, and some cases trebled, in the tax that is levied at the customhouse.

Mr. GOODING. Mr. President, the difference between the Senator and myself is that he is not willing to take the wage scale into consideration, where I believe it must be taken into consideration. I believe that there is an honest difference between the cost of production in this country and the cost of production in every other country on earth, and American standards can not be maintained without a protective tariff.

Mr. UNDERWOOD. The Senator asserts that.

Mr. GOODING. If the Senator desires to destroy the American standards, just let him reduce the rates below the level of protection, and there will be no question as to what will happen.

Mr. UNDERWOOD. The Senator asserts that, and he has asserted it many times. I have continually contended——

Mr. GOODING. That is an honest difference between the Senator from Alabama and myself.

Mr. UNDERWOOD. Certainly; but if the Senator will allow me to proceed——

Mr. GOODING. And there is not the least feeling about it, so far as I am concerned.

Mr. UNDERWOOD. None whatever; but I merely wish the Senator to let me proceed until I can explain to him this question of the difference in wage rates. I know the Senator thinks there is a great wage difference as to every item in this bill, and therefore the duty on every item should be increased and additional taxes levied on the American people. In some commodities there is a difference in the wage scales, but when it comes down to the iron and steel products the wages do not count. The difference in the cost of wages is infinitesimal, because they are machine-made articles. The real cost is in the investment in the machinery, in the organization of the plant.

In those items where there is a real difference in wage costs between the foreign articles and the American article in the iron and steel schedule the articles are left on the free list.

The man who delves in the coal mine or the man who delves in the iron mine must work with the brawn of his arms, and in such industries a cheaper wage may be registered in production. The Senator may say that I assisted in putting coal and iron ore on the free list when I supported the present law, and that the present law carries them on the free list; but now the Republicans come along and leave that class of labor on the free list. When, however, it comes to the pig-iron furnace, with its automatic hoists where the work is all practically done by machinery, where the difference in cost between this country and abroad does not amount to 50 cents a ton, it is proposed to put a tax of $1.25 a ton on the product. In the case of the wire products which we have been discussing, they are largely the result of machinery with only a few men here and there to guide the wire as it comes through the machine rolls; it actually comes out of the billets, is rolled into wire, and is wound up by machinery, with only a few guards here and there to direct its course, so that the labor cost is infinitesimal, and the increased efficiency of our American mills and their machinery more than wipes out any difference in labor costs; it amounts to nothing; and yet on the pretense of helping labor it is proposed to take these articles off the free list and impose on them a tax of one-half cent a pound.

That tax is put there for something or for nothing. In the best year it produced only $26,000. If it registered on the product, it would amount to $3,500,000. I can not see any reason why you put it here if it was not that you intended that the farmers of America should pay it, and they certainly are not going to pay it to the Government. It is to be paid to the manufacturers of this class of wire, who prospered as they never prospered before under a law that carried this product on the free list, and I say that is typical of all articles of this kind in the iron and steel schedule, and there are other schedules that we will come to before we finish this bill. The clothes that go on the farmer's back, the tools of his industry, he has to pay for under this idea of levying a protective tariff, and in return you give him a tax of 20 cents a bushel on corn.

Mr. McCUMBER. Mr. President, the committee is having its daily sessions. Of course, it can not have very long ones before 11 o'clock in the morning. It undoubtedly will from time to time make modifications even in its own amendments. Possibly some rates will be raised, probably more lowered. Undoubtedly when we get through with the committee amendments we will take up other amendments which we may suggest from time to time. The only point I desire to make now is that I wish we could hold to these amendments, at least, and dispose of those; and when we come to the bill in general, then amendments will be offered, some possibly by the committee, many more undoubtedly by those who oppose the measure, and then we will argue over again the same questions that we are now discussing.

I only pause long enough to say this with reference to the general observation made by the Senator from Alabama.

It is true that conditions have not become so normal that we are receiving the imports from foreign countries that we may reasonably expect in the future, and we have to take that into consideration; and if we take our principal competitor and find that the wages of labor have gone down to practically one-third of what they were in 1914, while in this country they have gone up to 100 per cent higher, or twice as much as they were before, we can see then that that would spread the difference six times; and if we say that in 1914 American labor was $3 a day and German labor was $1 a day, that would be a difference of $2, or twice as much, and that would be multiplied to six times as much to-day.

Mr. UNDERWOOD. Now, if the Senator will pardon me——

Mr. McCUMBER. Just a moment. If there is that much difference, and it is liable to remain very nearly that, we will have to take that into consideration in fixing rates of duty which we think will be reasonably protective when conditions become more normal, and our competitor is producing as much as he can produce, and is entering our field for the profit.

Mr. UNDERWOOD. Now, if the Senator will allow me just one minute, that is a beautiful theory that he has advanced.

Mr. McCUMBER. Oh, I am not making that the sole difference by any means.

Mr. UNDERWOOD. If the Senator will allow me there, though he is advancing a beautiful theory——

Mr. McCUMBER. It is not beautiful; it is an ugly theory.

Mr. UNDERWOOD. But there is no justification in the fact. I know this business, and I know that although the wages went up in war times they are coming back now, and have nearly reached the level that they were before the war.

Mr. McCUMBER. In the foreign countries?

Mr. UNDERWOOD. In this country. There has been a downward trend of wages every hour since the war came on, and they are approximating now what they were before the war. On the other hand, the wages in foreign countries like Germany, where they went to the bottom, are advancing, as the reports show, every day. If the Senator has been reading recent trade journals he knows, as I know, that the general trend of wages in Germany has greatly increased, the cost of living there is increasing, and the cost to American tourists is going up there. The papers have been full of it, and so the fact is just exactly the reverse of what the Senator bases his argument on. Of course the Senator and I could never agree on a tariff bill, because we differ so much in principle.

Mr. McCUMBER. No; but we ought to agree upon the facts and the figures.

Mr. UNDERWOOD. There is no question about the facts, because I know. I know in the furnace business that we shut down for a year, and I know that until there was a readjustment of wages we could not operate at all, and that now we are coming back, and I know that in this industry the wages have gone back down, down, and I know, on the other hand, if you can believe the trade journals, that the wages in Germany are going up, up from what they were a year ago, when the Senator says there were some importations coming in here, but I want to say this:

The Senator intimates that there is no use in our discussing these problems, because his committee may lower the rates. I am glad to know that; but, of course, all I can debate and all I can consider is what you present to the Senate now. You may come in here with amendments and cut down these unjustifiable rates. I hope you will. I hope the light is dawning on the other side of the Chamber; but, until it does dawn, I am justified in criticizing the bill as you present it to the Senate.

Mr. McCUMBER. Mr. President, I say that at least the Senator and I ought to agree upon well-established facts. It seems that we do not agree upon the wage scale of our competitors as compared with our own. I do not think the wages have gone down in Germany; I agree that the wages have gone up as measured by the mark; but the mark has gone down, and measured in American dollars wages have not increased to any material extent. The mark has gone down and gone down enormously. I do not know whether it has struck the bottom yet or not. It has gone so low that there is only one way out of it, and that is repudiation finally, and undoubtedly that will be the result.

Mr. GOODING. Mr. President——

Mr. McCUMBER. Just a moment. In our own country the skilled labor is more than 105 per cent higher than it was before the war. The highest skilled labor is more than 175 per cent higher than it was before the war. I can not speak for the Senator's particular mills down there. He may be getting down close to a pre-war basis, and when I speak of the skilled labor I am speaking of it in general, and I will admit that possibly labor constitutes a less proportion of the cost of production in the iron and steel industry than in any other industry. Still it is important when there is that immense spread between them.

Mr. GOODING. If the Senator will permit me——

Mr. UNDERWOOD. If the Senator will just let me answer the question——

The PRESIDENT pro tempore. To whom does the Senator yield?

Mr. McCUMBER. I will yield first to the Senator from Alabama, and then to the Senator from Idaho.

Mr. UNDERWOOD. If the Senator will allow me, of course, there may be one great skilled workman who handles a great piece of machinery whose wages have gone up; but if the Senator will take the comparison of the wage scale in the iron and steel industry he will find that just what I say is true, that in the aggregate—and that is what counts here; it is the aggregate, because it is the aggregate that makes up the cost of the material—it has been dropping ever since the war. I know that to be a fact, and you can take any trade journal and you will find that it is a fact.

Mr. McCUMBER. Does the Senator mean to tell me that it dropped in 1920?

Mr. UNDERWOOD. I say that it has been dropping ever since the war.

Mr. McCUMBER. Then from 1918 right down each year it has been lower? I think the Senator is mistaken. I think he

will find that the peak of high wages was reached in 1920, and not at the close of the war.

Mr. UNDERWOOD. For about 9 or 10 months after the war we continued to have abnormal times, and of course wages did not drop until after that time; but from the time that was reached wages in the iron and steel industry have been going down, and it is due to that adjustment that the plants have been able to go back to work. There is not any question about that.

Mr. McCUMBER. I yield now to the Senator from Idaho.

Mr. GOODING. Mr. President, my information in regard to the average wages in this country being 105 per cent above pre-war prices was secured from the Bureau of Labor Statistics on Monday morning of this week.

Mr. McCUMBER. Buf that is the average of all.

Mr. GOODING. That is the average increase.

Mr. McCUMBER. I say the skilled labor has not gone down in proportion to the unskilled labor.

Mr. HITCHCOCK. Mr. President, may I ask the Senator from North Dakota a question?

Mr. McCUMBER. Yes.

Mr. HITCHCOCK. Can the Senator give us figures showing what the cost of labor is in the manufacture of wire?

Mr. McCUMBER. Not the particular cost of labor; no. I know generally that the labor in the foreign country has decreased a certain percentage, while other labor has gone up a certain percentage. Therefore, if we are going on the protective theory we would have to have a greater protection, other things being equal, than we would have to have under a condition in which the wages more nearly approach each other.

Mr. HITCHCOCK. I am asking the Senator, in the manufacture of a thousand dollars' worth of wire in this country, what is the labor item cost?

Mr. McCUMBER. I can go back to the testimony, perhaps, and pick it out for the Senator, but I think that is almost a waste of time.

Mr. HITCHCOCK. I will say to the Senator that the census figures give exactly what the costs are.

Mr. McCUMBER. I will get them from the testimony, but I do not care about taking up the time now.

Mr. HITCHCOCK. Will the Senator permit me to read these figures to him?

Mr. McCUMBER. I will take one. The Senator has asked me a question, and I will take Mr. Campbell's testimony:

> I have figured the cost on every product that we manufacture, from the ore mine and the coal mine and the limestone quarry, including transportation, to the finished product. I can give you the items. You take, for instance, barbed wire, which is one of the things that is on the free list. Galvanized barbed wire carries a labor cost from mine to the finished product alone of $39.33, which is the highest labor cost, with one exception, of any product that we manufacture, and we manufacture a large line.

I have given it upon that alone. I do not care about running over all of the items, because we are drifting from the particular matter on which I want a vote.

Mr. HITCHCOCK. Mr. President, I want to be specific at this point. The official figures of the census for 1919 give the total expenditure for labor of the wire manufacturers at $32,000,000. The total product which was made by the use of the $32,000,000 spent for labor was $162,000,000. So the labor amounted to 20 per cent. In spite of the fact that the labor cost in the manufacture of wire, as shown by the official figures of the American census, amounts to only 20 per cent, you are imposing a duty upon wire of 25 per cent, which would reimburse the manufacturer of wire, not for the difference in the cost of American labor and labor abroad, but would reimburse him for the total cost to him for labor, and 5 per cent besides.

Mr. McCUMBER. Mr. President, labor is not the only item in the cost to the manufacturer that has increased. The labor which produces the ore, the labor which produces the iron, the labor which produces the steel, the labor which produces the wire have all raised in the same percentage and necessarily increased to that extent the cost of the raw product.

But I want to call attention to the fact that it is now a quarter of 5 o'clock. Most Senators like to get away about 5 o'clock on Saturday evening, and last Saturday I consented to take a recess very much earlier than that; but we have practically done nothing to-day. We have had votes on only one or two items. I was greatly encouraged yesterday by the progress we made, and I hope we can get a few votes upon this matter before we recess to-day. I do not want to hold the Senate in session any longer than is necessary.

Mr. HITCHCOCK. Mr. President, I do not think the Senator will accuse me of delaying, but I want to call attention to one or two features of the history of the manufacture of insulated wire in the United States, which is exactly the item we are considering.

Under the Payne-Aldrich tariff law of 1909 the tariff tax levied upon this wire was 40 per cent, and when the Democratic majority amended that tariff it reduced it to 15 per cent, a very radical reduction. That reduction was met with the prediction that it was going to ruin the insulated-wire business in the United States. What are the cold facts?

In 1910 the total manufacture of insulated wire in the United States, was in round figures, $51,000,000. One year after the passage of the Underwood-Simmons bill the production had increased to $69,000,000 in the United States, notwithstanding the reduction of the tariff from 40 per cent down to 15 per cent. We have already heard this afternoon that in the nine years the Underwood-Simmons tariff law, with the 15 per cent duty on insulated wire, has been in effect the production in this country has increased from $69,000,000 to $130,000,000 a year. That ought to be pretty good proof, even to a high-tariff Republican, that this industry could exist and prosper and grow and develop under a 15 per cent tariff. But that is not all.

The figures as to the imports during that time are worth considering. We hear a great deal of talk about the difference in the cost of manufacture here and abroad, but "the proof of the pudding is in the eating." The proof of whether or not this wire can be manufactured abroad and sold in the United States to the destruction of the American industry, or to the injury of the American industry, under a 15 per cent tariff is to be found in the records of imports during the last nine years. What were they?

The first year following the passage of the Underwood-Simmons law, in which the reduction was made from 40 per cent to 15 per cent, the imports of this wire were $31,000. That does not sound as though it was a great destruction. In 1915 the imports amounted to $43,000. In 1916 they amounted to $10,000. In 1917 they amounted to $8,000. In 1918 they amounted to $28,000. In 1919 they amounted to $49,000. I have not the record of the imports for the year 1921, but they have not substantially increased. I think the Senator from North Carolina [Mr. SIMMONS] gave them as not very large.

Let us see what has happened to the exports. Have we an export trade in this product on which you are seeking to put a 35 per cent rate? We have. We are selling this product in competition with all the world. In 1918 we exported $5,600,000 worth.

In 1919 we exported $8,800,000 worth. In 1920 we exported $7,600,000 worth. I have not the figures of the exports for 1921; but these figures show definitely and conclusively that we are able to manufacture this insulated wire and supply the American market with it, practically to the exclusion of competition, for the competition is negligible. The imports amount to less than $400 a day and the exports amount to $25,000 a day.

I bring the figures down to a daily record, because they are more striking than if I give the larger figures for the year. We are not only supplying the American market but we are exporting $25,000 worth of this product a day and importing the negligible quantity of $400 worth a day.

Why put a 35 per cent tariff at this time on that article under those circumstances? We have the proof in the figures. We have the proof that we can manufacture in this country in competition with the world. We have the proof that we can actually manufacture and ship the product to other countries and compete with the world, yet you are proposing to increase the existing tariff from 15 per cent to 35 per cent.

What is this wire? In the first place, let me say that it is not a luxury, and you are not imposing a tariff for the purpose of getting revenue. You are imposing a tariff so as to give an opportunity to the American manufacturers, confined to a few great concerns, to raise the price.

What is this insulated wire commonly used for in the United States? We use it in every building that is built nowadays, practically. It is used in the construction. It is used in the wires which convey the electric current in response to the push buttons all over our buildings. It is used for the insulated electric-light wires in all our buildings. It is used for insulated telephone wires. Thousands of people in every city use it. It is used for every imaginable purpose, wherever wires are brought into use in a building. It is used in millions of our automobiles all the time, and you are attempting to impose a 35 per cent tax on it for the very obvious purpose of increasing the cost of it to the American people. You are doing that in the face of the fact that the present consumption is something like $130,000,000 worth a year.

If there is any man who can defend the imposition of a tax like that on a necessary article, used by all classes, used in all buildings which are constructed from time to time, used in telephone and telegraph communication—if there is any man

who can justify such an increase when there is no danger from destructive competition, I wish he would state his reasons definitely.

Mr. SMOOT. Mr. President, on page 60, line 15, I move to strike out "40" and to insert in lieu thereof "35."

Mr. SIMMONS. Mr. President, my understanding is that the committee proposed 40 per cent, and now it moves to make the rate "35" instead of "40," and the vote is upon agreeing to that amendment to the amendment. Then we will vote upon agreeing to the amendment as amended.

Mr. SMOOT. That is correct.

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from Utah.

The ASSISTANT SECRETARY. On page 60, line 15, strike out "40" and insert in lieu thereof "35," so as to read:

telegraph, telephone, and other wires and cables composed of iron, steel, or other metal (except gold, silver, or platinum), covered with or composed in part of cotton, jute, silk, enamel, lacquer, rubber, paper, compound, or other material, with or without metal covering, 35 per cent ad valorem.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question now recurs upon the amendment as amended.

Mr. SIMMONS. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. ELKINS (when his name was called). I have a general pair with the junior Senator from Mississippi [Mr. HARRISON]. I transfer that pair to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "yea."

Mr. ERNST (when his name was called). I transfer my pair with the senior Senator from Kentucky [Mr. STANLEY] to the senior Senator from Pennsylvania [Mr. CROW] and vote "yea."

Mr. FLETCHER (when his name was called). I have a general pair with the senior Senator from Delaware [Mr. BALL]. I transfer that pair to the Senator from Montana [Mr. MYERS] and vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. JONES of Washington (when his name was called). I have a pair for the day with the Senator from Virginia [Mr. SWANSON]. I transfer that pair to the Senator from New Hampshire [Mr. MOSES] and vote "yea."

Mr. WALSH of Montana (when his name was called). Transferring my pair as heretofore announced, I vote "nay."

Mr. WATSON of Georgia (when his name was called). Making the same announcement as before, I vote "nay."

Mr. WILLIAMS (when his name was called). I have a pair with the senior Senator from Indiana [Mr. WATSON]. Inasmuch as I have been unable to secure a transfer, I am not at liberty to vote. If I were at liberty to vote, I would vote "nay."

The roll call was concluded.

Mr. DILLINGHAM. Making the same announcement as before, I vote "yea."

Mr. SUTHERLAND. Transferring my pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from New Hampshire [Mr. KEYES], I vote "yea."

Mr. FLETCHER (after having voted in the negative). I notice that the Senator from Montana [Mr. MYERS] to whom I transferred my pair, has entered the Chamber. Being unable to obtain another transfer, I must withdraw my vote. If privileged to vote, I would vote "nay."

Mr. CURTIS. I wish to announce the following pairs:

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL].

The result was announced—yeas 32, nays 22, as follows:

YEAS—32.

Brandegee	Hale	McKinley	Poindexter
Bursum	Harreld	McLean	Smoot
Curtis	Jones, Wash.	Nelson	Spencer
Dillingham	Kellogg	Newberry	Sterling
Elkins	Kendrick	Nicholson	Sutherland
Ernst	Ladd	Oddie	Townsend
France	Lodge	Page	Wadsworth
Gooding	McCormick	Phipps	Warren

NAYS—22.

Ashurst	Gerry	Myers	Smith
Broussard	Harris	Overman	Underwood
Capper	Heflin	Pittman	Walsh, Mont.
Caraway	Hitchcock	Ransdell	Watson, Ga.
Cummins	Jones, N. Mex.	Sheppard	
Dial	La Follette	Simmons	

NOT VOTING—42.

Ball	Frelinghuysen	New	Stanfield
Borah	Glass	Norbeck	Stanley
Calder	Harrison	Norris	Swanson
Cameron	Johnson	Owen	Trammell
Colt	Keyes	Pepper	Walsh, Mass.
Crow	King	Pomerene	Watson, Ind.
Culberson	Lenroot	Rawson	Weller
du Pont	McCumber	Reed	Williams
Edge	McKellar	Robinson	Willis
Fernald	McNary	Shields	
Fletcher	Moses	Shortridge	

So the committee amendment as amended was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. In paragraph 316, page 60, line 16, the committee proposes to strike out "30" and insert "40," so as to read:

Wire rope and wire strand, 40 per cent ad valorem.

Mr. SMOOT. I move to amend the committee amendment by striking out the numerals "40" and inserting in lieu thereof the numerals "35."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Utah to the amendment of the committee.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee as amended.

Mr. WALSH of Montana. Mr. President, before the vote is taken I desire to say just a few words in addition to what I have heretofore said. I call attention to the fact that wire rope is extensively used in the mining industry in this country. Every mine operated on any scale whatever must be supplied with an abundance of wire rope. If the mines are deep the quantity is something enormous.

Attention is called to the fact that the production in this country is stupendous, while the imports are practically negligible, and yet it is proposed to put upon wire rope, a necessity of the mining industry, now suffering a condition of depression that has hardly been known heretofore in the history of the country, a duty to the extent of 40 per cent ad valorem.

Let me give the Senate a few facts with reference to the matter. There is produced in this country wire rope to the extent of $13,500,000. Let me add that it is, of course, used extensively also in the construction of ships, and we are all interested in relieving ship construction from any unnecessary burdens. It is also used in logging operations.

There was manufactured in this country in 1914, $13,500,000 worth of this product, and the production continues to increase. Now let me call attention to the imports: In 1909 the imports amounted to $67,057; in 1913, $109,000; in 1916, $48,000; in 1917, $38,000; in 1918, $24,383; and in 1919, $20,064.

Not only is our production enormous and our imports are altogether negligible, but we export this commodity in great quantities. I read from information furnished us by the Tariff Commission on this subject, as follows:

The manufacture of wire rope falls under two classifications in the census—wire and wirework. In the former class are establishments which draw their own wire, whether from rods which they purchase or which they manufacture. In 1909 such establishments made 45,303 tons of iron and steel wire rope, valued at $6,683,771. Establishments classed under wirework—i. e., which bought their wire—manufactured a product valued at $5,406,923. The total production was thus valued at $12,090,694.

In 1914 the wire mills produced 52,735 tons, valued at $7,973,537, and establishments classified as wirework a product of $5,462,786. The total value was thus $13,436,323, an increase of 11 per cent over 1909.

It will be observed that the production continues, notwithstanding the reduction in the rates imposed by the present law.

Now I wish to read what is said about competitive conditions and tariff questions:

American conditions have turned the attention of the manufacturers to the production of a high-quality rope, which may be subjected to severe treatment, to an extent which has not been true of the British manufacturer or the German. The Hazard Manufacturing Co. said, respecting these countries:

"There are about 40 English and about 6 German rope manufacturers. Four or five of the English and none of the German are first class."

Here is a case in which we need not be frightened about the competition in Germany.

Mr. HARRIS. Mr. President, may we not have order in the Chamber? There is a great deal of confusion here.

The PRESIDENT pro tempore. The Senate will be in order.

Mr. HARRIS. We are very anxious to hear what the Senator from Montana is saying in order that we may make rapid progress in the consideration of the bill.

Mr. PITTMAN. Mr. President, I think the Senator from Georgia is unkind. I do not think that the framers of the bill should be required to listen.

Mr. WALSH of Montana. I read further:

There are about 40 English and about 6 German rope manufacturers. Four or five of the English, and none of the German, are first class. For purpose of importation, only the English need be considered, as the German rope will probably not figure to any extent, due to the few factories there and their comparatively small size. Most English ropes are made of basic O. H. wire, which is cheaper than acid O. H. Cheap rope will work fairly well in England, where engineering practice is very conservative and where sheaves are large, speeds slow, loads moderate, acceleration low, and everything is in favor of the rope; whereas the usage over here has been the reverse, requiring an exceedingly high standard of rope to meet our exacting conditions. Quality of foreign rope has never been equal to the best American product, and it is well known to anyone who has dipped into the export trade that English and German "export quality" is far inferior to their own domestic grade and is simply "made to sell."

On the export market the American rope has a reputation for reliability superior to the British or the German. These markets lie in the regions where logging, mining, and construction are being carried on, as is often the case in new countries. Prior to the war the United States, Great Britain, and Germany were the chief competitors in these new fields, particularly in South America and Africa. In South America, Great Britain and Germany held the bulk of the trade. Of the imports of wire rope into Central America, 66 per cent comes from the United States; of that into Mexico, 80 per cent. The United States also exports into Canada in competition with Canadian and British rope over a 32½ per cent duty, while the British rope is dutiable at only 22½ per cent.

Mr. President, the distinguished Senator from Idaho [Mr. GOODING] earnestly declared here a few minutes ago that the contest in this Chamber at this time and before the country will be between the policy of protection on the one hand and free trade on the other. I respectfully differ. The wisdom of the policy of protection—even of high protection—may be conceded for the purpose of the argument; but how are you going to defend this particular rate?

Mr. President, it is perfectly well understood that the Republican Party is wedded to the policy of protection; this bill has met their approval and is a protective policy bill. The validity of it must be discussed upon that basis; that is, the basis upon which I am canvassing this rate. If the Senator from Idaho should go before the people in the next campaign, as he suggests, and canvass before them the question of the wisdom of the policy of protection as against free trade or tariff for revenue only, it is quite likely that some one in the audience would say, "Yes; I am a protective tariff man myself; but what do you say on the theory of protection, Senator GOODING, about this duty on wire rope, which is utilized so largely in your State by the miners there?"

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Idaho?

Mr. WALSH of Montana. I yield.

Mr. GOODING. So far as the question of protection is concerned, because wire rope is used in the mines, or by whom it is used, does not make any difference to me. I have been discussing the principle of protection to American labor; that was my thought all the way through.

I have discussed what the Senator from Alabama has had to say about the Underwood rates being too high, and his statement that had he been making the rates at the present time he would reduce them still more. That is what I was discussing. I insist that the difference between the two parties is one of free trade and protection and it can not be camouflaged in any way at all. The issue has been clearly brought here by the leader of the Democratic Party and we are going to meet the Democrats on that issue.

Mr. WALSH of Montana. The comments of the Senator of Idaho were made in response to an interrogation directed to him by the Senator from Alabama as to how he justified the particular tariff on galvanized wire, and he proceeded to argue the wisdom of protection as against free trade, and I am asking how, on the theory of protection, he justifies this particular rate upon wire rope. I resume reading from the Tariff Information Survey:

The war has brought about the substitution of domestic for foreign wire, which seems a permanent one.

Reference has been made, Mr. President, to the difference in the cost of wages in Germany and in this country. Of course, wages often constitute a very large element in the cost of the production of any article, but it does not by any means follow that a foreign country can compete with us in the production of every article because wages there are lower than in our country. Germany does not seem to be able to get into the wire-rope market at all, notwithstanding the low rate of wages in that country. She is a negligible factor in the matter of the manufacture of wire rope, and always has been.

Of course everybody knows that the country having the lowest wages has likewise the lowest efficiency of labor. I was in Haiti two years ago and I learned that the rate of wages there was 30 cents a day; but no one would undertake to contend that Haiti can compete with this country in the production of anything except it be sugar; and it can not compete with Cuba in the production of sugar, where wages at the time of which I speak were $2.50 a day, as against 30 cents a day in Haiti, and laborers were going from Haiti at the time by the hundreds to Cuba to work in the sugar fields. The argument that seems to be entirely conclusive and satisfactory to gentlemen upon the difference in the rate of wages here and in Germany is for the consumption of people who do not think on these matters.

The war has brought about the substitution of domestic for foreign wire, which seems a permanent one. The important consideration today is the sufficiency of the duty on the rope as against foreign rope rather than the height of the duty necessary to compensate for that on foreign wire.

Mr. President, there is not anything to be said in favor of this duty, and it ought not to be imposed upon industry of this country.

Mr. SIMMONS. I ask for the yeas and nays, Mr. President.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment as amended.

Mr. WALSH of Montana. I move to amend the committee amendment by substituting the numeral "15" for the numeral "40," and upon that I ask for the yeas and nays.

The PRESIDENT pro tempore. The Chair is in doubt with regard to the amendment proposed by the Senator from Montana being in order.

Mr. SMOOT. Mr. President, in order that the Senator from Montana may have a vote upon his amendment, I withdraw my amendment and allow the Senator to offer his amendment.

The PRESIDENT pro tempore. But the amendment proposed by the Senator from Utah has been agreed to.

Mr. UNDERWOOD. Why is there any doubt as to the amendment offered by the Senator from Montana being in order? The committee amendment has been amended; that is settled; but the committee amendment is still open for further amendment. It can not be held because one amendment is offered and has been agreed to that no other amendment may be proposed. An amendment in the third degree may not be offered, but as it now stands the committee amendment fixes a rate of 35 per cent. Of course, that is the committee amendment as it stands now, and that is subject to amendment.

The PRESIDENT pro tempore. The Senate has agreed to the amendment fixing the rate at 35 per cent.

Mr. UNDERWOOD. I understood that the question was on the committee amendment as amended, which proposes to fix the rate at 35 per cent.

The PRESIDENT pro tempore. That is the question.

Mr. UNDERWOOD. And that amendment is still open to amendment.

Mr. WALSH of Montana. If the Senator will pardon me, the committee proposes to amend the House provision by fixing the rate at 40 per cent; the Senator from Utah moved to amend the committee amendment by fixing it at 35 per cent.

Mr. SMOOT. And that has been agreed to.

Mr. WALSH of Montana. Wait a moment. Now, Mr. President, I would not be permitted to move to amend the amendment offered by the Senator from Utah because that would be in the third degree. Under those circumstances, I would not be permitted to submit any amendment at all; in other words, apparently the parliamentary situation is such that unless my motion is now in order we must take the figure offered by the Senator from Utah or take nothing. It does not seem to me that can be right.

The PRESIDENT pro tempore. It was within the power of the Senate to vote down the amendment of the Senator from Utah, but it did not do so; the Senate agreed to the amendment of the Senator from Utah to the committee amendment; and, while the Chair is willing to be advised in regard to the matter, it seems to the Chair that that vote will have to be reconsidered.

Mr. PITTMAN. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from Nevada will state his parliamentary inquiry.

Mr. PITTMAN. Has the committee amendment been adopted?

The PRESIDENT pro tempore. The committee amendment has not been adopted.

Mr. PITTMAN. How does the committee amendment now read? I will ask to have it stated by the Secretary.

The PRESIDENT pro tempore. The committee amendment has been amended.

Mr. PITTMAN. I asked whether the committee amendment had been adopted, and the Chair said it had not been adopted. I should like to have the committee amendment stated.

The PRESIDENT pro tempore. The committee amendment has not been adopted.

Mr. PITTMAN. I ask to have the committee amendment stated as it now stands.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. As agreed upon, in line 16, page 60, the committee amendment is to strike out "30" and insert "35."

Mr. PITTMAN. I ask the Chair to have the Secretary state the committee amendment as it now reads.

The PRESIDENT pro tempore. There is no committee amendment——

Mr. PITTMAN. The committee amendment, then, has not been voted on?

The PRESIDENT pro tempore. The Chair will state the situation as it is understood by the Chair. The House text provided for a duty of 30 per cent; the committee reported in favor of a duty of 40 per cent——

Mr WALSH of Montana. Mr. President, if the Chair will pardon me, it occurs to me that under any circumstances this motion is in order, and I move to substitute for the committee amendment the numeral "15."

Mr. SMOOT. That presents the same situation.

Mr. PITTMAN. Let me conclude my parliamentary inquiry. I am listening to the Chair.

The PRESIDENT pro tempore. The Chair intended to answer the inquiry, but was interrupted by the Senator from Montana.

Mr. PITTMAN. I know, and I am awaiting the answer of the Chair.

The PRESIDENT pro tempore. The Senator from Utah moved to amend the proposed committee amendment by substituting "35 per cent" for the "40 per cent" rate proposed by the committee. Thereupon there was a vote, and the Senate agreed to the amendment proposed by the Senator from Utah to the committee amendment. That is the present parliamentary situation.

Mr. PITTMAN. May I ask that the Secretary be required to state the committee amendment as it read originally?

The READING CLERK. On page 60, line 16, strike out "30" and insert "40."

Mr. PITTMAN. Now, may I ask how the committee amendment reads at the present time?

The READING CLERK. Strike out "30" and insert "40."

Mr. PITTMAN. I am sure that the reading clerk is in error.

The PRESIDENT pro tempore. The Chair suggests that the proposed committee amendment has been disagreed to in substance.

Mr. PITTMAN. Mr. President, I have made a parliamentary inquiry. The reading clerk is evidently wrong under the statement of the Chair. I want to know what I am voting on; I want to know if I am voting now on a 40 per cent rate or a 35 per cent rate.

The PRESIDENT pro tempore. That would depend upon how the Chair rules upon the amendment of the Senator from Montana.

Mr. PITTMAN. The amendment of the Senator from Montana is to make the rate 15 per cent. The Senator from Utah has offered an amendment to make the rate 35 per cent instead of 40 per cent.

Mr. SMOOT. And that has been agreed to.

Mr. PITTMAN. That has been agreed to. Therefore does it not read now 35 per cent?

Mr. SMOOT. Certainly it does.

Mr. PITTMAN. The Clerk says it reads 40 per cent.

The PRESIDENT pro tempore. The Senate has agreed to the amendment proposed by the Senator from Utah that the duty shall be 35 per cent. That is the present situation.

Mr. PITTMAN. I do not understand which is right. Originally the Chair put the question, Will the Senate agree to the committee amendment, which provides for a rate of 40 per cent? Then the Senator from Utah arose, as he had a right to do, I assume, and offered an amendment to the committee amendment. His amendment to the committee amendment was adopted. Therefore is not the question now on the adoption of the committee amendment as amended?

Mr. McCUMBER. Yes.

The PRESIDENT pro tempore. The Chair has so stated more than once.

Mr. PITTMAN. Then, of course, it is the committee amendment as amended. Do we have to vote either "yea" or "nay" on that? Are we not at liberty——

The PRESIDENT pro tempore. The Chair does not know of any other way to vote except "yea" or "nay."

Mr. PITTMAN. Are we not at liberty to amend the committee amendment after it has been once amended?

The PRESIDENT pro tempore. The question is now, unless the amendment of the Senator from Montana is received—about which the Chair is in doubt—upon agreeing to the committee amendment as amended.

Mr. PITTMAN. That is true. Now, I propound this parliamentary inquiry: In agreeing to the committee amendment as amended are we limited to voting "yea" or "nay," or are we at liberty to amend the committee amendment as amended?

The PRESIDENT pro tempore. That is precisely the question presented by the amendment proposed by the Senator from Montana, and upon which the Chair has not yet ruled.

Mr. PITTMAN. I was simply asking for the ruling, Mr. President. That is the purpose for which I rose.

Mr. BRANDEGEE. Mr. President, before the Chair rules on the question I should like to say a word.

As the bill stands, the committee has recommended that the House text be amended. An amendment was proposed to the rate proposed by the Senate committee in their amendment, and that amendment proposed has been agreed to. It seems to me that simply substitutes by the action of the Senate a rate in place of the one recommended by the committee, so that the report of the committee stands according to the reduced rate to which the Senate agreed; and that seems to me to be open to further amendment.

Mr. SMOOT. I want to call the Senator's attention to the fact that it is not now a committee amendment; it is a Senate amendment, and it has been agreed to.

Mr. BRANDEGEE. It has not been agreed to by the Senate. The pending question is, Will the Senate agree to the committee amendment as amended?

Mr. SMOOT. As amended.

Mr. BRANDEGEE. When a committee amendment is amended by a vote of the Senate, it still stands as a committee recommendation, does it not, subject to amendment?

Mr. SMOOT. Up until the time the Senate voted on it; and then, when the Senate voted on it, it agreed to it. If it wants to vote that amendment down now, the Senate can vote it down, if it is not satisfied with the amendment.

Mr. BRANDEGEE. I know it can. The Senator may be right; of course, I do not speak ex cathedra about it; but if the Senator is right we are confronted with the proposition that if a Republican Senator who only wants to scale a very little the rate reported by the committee gets action on his amendment, no discussion can be had upon a further reduction.

Mr. McCUMBER. Allow me to suggest to the Senator from Connecticut one thing that the Senate has voted upon. It voted that it would fix the rate at 35 per cent. Now, it can not vote that it will fix it at something other than 35 per cent unless we reconsider the vote by which we fixed the rate at 35 per cent. Of course, it can amend that amendment in any other respect; but, having fixed the rate at 35 per cent by a vote of the Senate, we can not now change it and make it another rate without a reconsideration. But, Mr. President, if the Senator from Montana wants a vote upon his amendment, I will ask that the vote by which 35 per cent was agreed to may be reconsidered.

Mr. ASHURST. Mr. President, on that I wish to be heard.

Mr. McCUMBER. We can do that by unanimous consent.

Mr. ASHURST. No; there is a principle involved, and I do not want a precedent set that will always plague us.

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Arizona?

Mr. ASHURST. I desire to be heard.

Mr. McCUMBER. I yield to the Senator.

Mr. ASHURST. Mr. President, this question runs to the vitals of this and every other bill.

The error into which esteemed Senators are falling is this: They recall that an amendment in the third degree is not in order. That is true; but after an amendment has been amended other amendments are in order. I would be petrified with painful surprise and astonishment if Senators who have presided over legislative bodies, for example, the Senator from Connecticut [Mr. BRANDEGEE] or the Senator from the State of New York [Mr. WADSWORTH], were to rise here and say that the one who got the floor first and secured the adoption of an amendment to an amendment would foreclose every other Senator from offering further amendments. The Senate should adjourn sine die if such a ruling as that could stand. Bear in mind that parliamentary rules are made for the minority and not the majority. One of the most learned men who ever sat in that chair, John J. Ingalls, a crisp, partisan, parliamentary officer, held over and over again that these rules are for the protection of the minority; that majorities can take care of themselves.

Mr. President, you are a man of considerable experience in public affairs, you are a strict party man—of that I make no complaint—but I believe you are a fair man, and I know that you do not want to stain the annals of the Senate with such a ridiculous decision, the effect of which would be to say that whoever jumped up first and secured the adoption of an amendment to an amendment precluded other Senators from further tendering amendments to the provision. Of course, an amendment to an amendment to an amendment would be in the third degree, but that is not the case here. The question simply is, May an amendment be offered to a provision that has once been amended? Since when did we adopt a rule which in effect would be to say that but one amendment can ever be made in the Senate to an amended proposal?

The parliamentary status, with perfect respect to you, Mr. President, is as follows:

The committee reported this bill with amendments, and a committee amendment occupies precisely the same status as does every other amendment. The committee amendment has no higher right, no other privilege, and no preference over any other amendment. By unanimous consent we permitted the committee amendments to be considered first, and that required unanimous consent. That is the only privilege the committee amendments possess, and that privilege was acquired by unanimous consent. So, when the question is on the committee amendment, the committee has the right, every Senator has the right, to perfect or to offer other amendments before the provision is finally adopted. The Senator from Utah [Mr. SMOOT] had the right—he exercised the right of offering an amendment. He offered an amendment to a pending amendment which we call by courtesy a committee amendment. Does that mean, sir, that every other Senator is denied the right to offer further amendments?

My learned friend from Massachusetts, the senior Senator from that State [Mr. LODGE], does me the honor to give his attention to what I now say, and if you should ask him, he would openly say, "Mr. President, the parliamentary rule is that an amended amendment is still open to further amendment." Ask the Senator from New York [Mr. WADSWORTH]. Ask the Senator from Connecticut [Mr. BRANDEGEE]. Ask any Senator who ever presided three hours over a legislative body, and he will tell you that no Senator by jumping up and securing the adoption of an amendment to an amendment can preclude other Senators from offering other amendments.

So, Mr. President, I object to the request made by my friend from North Dakota. This principle is too vital to be jockeyed away. Such a precedent if rigidly followed would strike down the very thing for which parliamentary rules are set up, namely, to give each a chance to perfect the bill, and you would spike the noblest battery that ever thundered in behalf of parliamentary law.

The amendment of the Senator from Montana [Mr. WALSH] is in order. It is not an amendment in the third degree. He is offering an amendment to the committee amendment, which has already been amended.

I have heard this fallacious doctrine or rule once before on the floor of the Senate, and I heard it from none other than the distinguished Senator from Utah [Mr. SMOOT], that, forsooth, because an amendment has been amended, it could be amended no further.

If that be true, then when the Senate adopted the amendment of the Senator from Utah [Mr. SMOOT], why should the Presiding Officer put the question again? One might sit at the feet of the Senator from Utah and learn wisdom in fiscal affairs or in statecraft; but the Senator from Utah can lead us into a deeper and more tangled wildwood than any man in this Chamber when it comes to parliamentary law, and I say this with great respect; and I know that if the Senator from Massachusetts be fair, he will say I am right.

Mr. LODGE obtained the floor.

Mr. SMOOT. Mr. President——

Mr. LODGE. Mr. President, I believe I have the floor.

The PRESIDENT pro tempore. The Senator from Massachusetts has been recognized.

Mr. LODGE. I think this discussion, on which I can restrain my feelings——

Mr. ASHURST. What did the Senator say?

Mr. LODGE. I say, on which I can restrain my feelings.

Mr. ASHURST. As on every other subject.

Mr. LODGE. I am not excited about it. I think this discussion arises from a slight confusion with a well-known principle of parliamentary law. If, for instance, we have a bill before us, and we move to strike out and insert, and that motion is lost, a motion to insert something else can be made; but when the body has once agreed upon a form of words by striking out and inserting—I take it that is the easiest example—then, at that stage, that form of words to which the body has agreed is not subject to amendment.

In this case the body has reached no final agreement on the form of words. It is still dealing with an amendment. If the body had agreed to 35 per cent, it would not be open to amendment; but the body has not agreed to 35 per cent. It has only agreed to substitute it in preference to 40 per cent. The final vote is still ahead of us. The body has not finally agreed on 35 per cent; and therefore, this being an amendment, and no final agreement on the form of words having been reached, it seems to me that it is open to further amendment.

Mr. McCUMBER. Mr. President, may I ask the Senator whether it is open to an amendment now to strike out "35" and insert something else, after we have voted in "35"?

Mr. LODGE. Yes; entirely.

Mr. McCUMBER. Then we can keep on voting as long as we please on a question of a mere figure.

Mr. LODGE. That is perfectly true. The fact that it is a mere figure does not alter the fact as to the form of words.

Mr. WADSWORTH. Mr. President, does the Senator from North Dakota contend that we have voted in "35"?

Mr. McCUMBER. No; we have not. We have voted "35" into the committee amendment. We have not adopted the committee amendment.

Mr. LODGE. No; exactly.

Mr. McCUMBER. Now, we can vote the committee amendment up or down; but we have voted in favor of "35," and we can not now change the "35" to "25" or "15" or anything else unless we vote down the committee amendment.

Mr. WADSWORTH. I can not agree with the Senator.

The PRESIDENT pro tempore. The Chair is in very grave doubt with regard to the matter, and desires to say one word only before making a ruling.

If the amendment of the Senator from Montana is received and voted upon, assume that it is adopted. Then another Senator can again move that the rate be made 35 per cent, and that is adopted, and so on, ad infinitum; and it seemed to the Chair that it presented an almost impossible parliamentary situation. In view, however, of the difference of opinion which has developed with regard to the matter, the Chair will hold that the amendment proposed by the Senator from Montana is in order, and the question is upon agreeing to the amendment of the Senator from Montana to the amendment of the committee as amended.

Mr. WALSH of Montana called for the yeas and nays, and they were ordered.

The reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. McKINLEY (when his name was called). I transfer my pair with the junior Senator from Arkansas [Mr. CARAWAY] to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "nay."

Mr. SUTHERLAND (when his name was called). I transfer my pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from New Hampshire [Mr. KEYES] and vote "nay."

Mr. WALSH of Montana (when his name was called). Transferring my pair as on the previous vote, I vote "yea."

Mr. WILLIAMS (when his name was called). I transfer my pair with the Senator from Indiana [Mr. WATSON] to the Senator from Massachusetts [Mr. WALSH] and vote "yea."

The roll call was concluded.

Mr. JONES of Washington (after having voted in the negative). I understand the senior Senator from Virginia [Mr. SWANSON] has not voted. I am paired with that Senator for the day. I transfer that pair to the Senator from New Hampshire [Mr. MOSES] and allow my vote to stand.

The PRESIDENT pro tempore. Before the result of the vote is announced, the Chair desires to say that it had no opportunity to examine the precedents upon the question raised by the amendment just voted upon. Having examined the precedents, the Chair desires to say that its ruling must not be taken as a precedent because the rulings have been the other way.

Mr. McCUMBER. When the vote is announced, I shall make a parliamentary inquiry, but I want to have the vote announced.

The result was announced—yeas 20, nays 30, as follows:

YEAS—20.

Ashurst	Heflin	Overman	Smith
Dial	Jones, N. Mex.	Pittman	Townsend
Gerry	Kendrick	Ransdell	Underwood
Harris	La Follette	Sheppard	Walsh, Mont.
Harrison	Nicholson	Simmons	Williams

NAYS—30.

Brandegee	Gooding	McKinley	Smoot
Bursum	Hale	McLean	Spencer
Capper	Harreld	Nelson	Sterling
Cummins	Jones, Wash.	Newberry	Sutherland
Curtis	Kellogg	Oddie	Wadsworth
Dillingham	Lodge	Poindexter	Warren
Elkins	McCormick	Rawson	
France	McCumber	Shortridge	

NOT VOTING—46.

Ball	Fernald	Moses	Shields
Borah	Fletcher	Myers	Stanfield
Broussard	Frelinghuysen	New	Stanley
Calder	Glass	Norbeck	Swanson
Cameron	Hitchcock	Norris	Trammell
Caraway	Johnson	Owen	Walsh, Mass.
Colt	Keyes	Page	Watson, Ga.
Crow	King	Pepper	Watson, Ind.
Culberson	Ladd	Phipps	Weller
du Pont	Lenroot	Pomerene	Willis
Edge	McKellar	Reed	
Ernst	McNary	Robinson	

So the amendment of Mr. WALSH of Montana to the committee amendment as amended was rejected.

Mr. McCUMBER. Mr. President, the Senate now having voted affirmatively to fix the rate at 35 per cent ad valorem, and then having voted negatively that it would not change that 35 per cent rate, I desire to make a parliamentary inquiry. Is it in order for me now to move to make the rate 40 per cent?

The PRESIDENT pro tempore. The Chair is of the opinion that such a motion would not be in order. The question now is upon agreeing to the committee amendment as amended.

Mr. PITTMAN. Mr. President, I wish to offer an amendment and get the ruling of the Chair. I move to strike out "35 per cent ad valorem" and to insert in lieu thereof "1 cent per 10,000 pounds."

Mr. McCUMBER. Mr. President, I make the point of order that the Senate having voted upon the rate, it can not vote again upon it. I understand that this is the same amendment——

Mr. PITTMAN. I am not dealing at all with the ad valorem rate. I am dealing with an entirely different method, which I ask to have substituted for the House rate. If it were on a 35 per cent or a 15 per cent rate, it would be a different question. I am now asking that the Senate, instead of substituting 35 per cent for the House provision, substitute a specific duty for it. Is there any way by which I can obtain a vote on that proposal?

Mr. McCUMBER. I make the point of order that the Senate having voted that the rate should be 35 per cent ad valorem, and then again having voted that it would not change that rate, it is not now in order to make another kind of a motion to change it.

The PRESIDENT pro tempore. The Chair sustains the point of order.

Mr. PITTMAN. Mr. President, from that ruling I respectfully appeal.

Mr. McCUMBER. I move to lay the appeal on the table.

The PRESIDENT pro tempore. The Senator from Nevada appeals from the ruling of the Chair, and the Senator from North Dakota moves——

Mr. McCUMBER. If there is to be no argument, I will withdraw my motion to lay the appeal on the table, and we can vote directly on it.

The PRESIDENT pro tempore. The question is, Shall the decision of the Chair stand as the judgment of the Senate?

Mr. PITTMAN. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same announcement as before, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. ERNST (when his name was called). Transferring my pair with the senior Senator from Kentucky [Mr. STANLEY] to the senior Senator from Pennsylvania [Mr. CROW], I vote "yea."

Mr. McKINLEY (when his name was called). Transferring my pair with the junior Senator from Arkansas [Mr. CARAWAY] to the junior Senator from Pennsylvania [Mr. PEPPER], I vote "yea."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. WALSH of Montana (when his name was called). Transferring my pair as heretofore, I vote "nay."

Mr. WARREN (when his name was called). Transferring my pair with the junior Senator from North Carolina [Mr. OVERMAN] to the senior Senator from Colorado [Mr. PHIPPS], I vote "yea."

The roll call was concluded.

Mr. JONES of Washington. The senior Senator from Virginia [Mr. SWANSON] being absent, I withhold my vote.

The roll call resulted—yeas 26, nays 17, as follows:

YEAS—26.

Bursum	Gooding	McLean	Spencer
Capper	Hale	Newberry	Sterling
Curtis	Harreld	Nicholson	Sutherland
Dillingham	Kellogg	Oddie	Townsend
Elkins	McCormick	Poindexter	Warren
Ernst	McCumber	Rawson	
France	McKinley	Smoot	

NAYS—17.

Ashurst	Harrison	Pittman	Wadsworth
Brandegee	Heflin	Ransdell	Walsh, Mont.
Dial	Jones, N. Mex.	Sheppard	
Gerry	La Follette	Simmons	
Harris	Lodge	Underwood	

NOT VOTING—53.

Ball	Frelinghuysen	Nelson	Smith
Borah	Glass	New	Stanfield
Broussard	Hitchcock	Norbeck	Stanley
Calder	Johnson	Norris	Swanson
Cameron	Jones, Wash.	Overman	Trammell
Caraway	Kendrick	Owen	Walsh, Mass.
Colt	Keyes	Page	Watson, Ga.
Crow	King	Pepper	Watson, Ind.
Culberson	Ladd	Phipps	Weller
Cummins	Lenroot	Pomerene	Williams
du Pont	McKellar	Reed	Willis
Edge	McNary	Robinson	
Fernald	Moses	Shields	
Fletcher	Myers	Shortridge	

The PRESIDENT pro tempore. On this question the yeas are 26 and the nays are 17. Less than a quorum having voted, the Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Gerry	McKinley	Shortridge
Borah	Hale	McLean	Simmons
Brandegee	Harreld	Newberry	Smith
Bursum	Harris	Nicholson	Smoot
Capper	Jones, N. Mex.	Oddie	Spencer
Cummins	Jones, Wash.	Phipps	Sterling
Curtis	Kellogg	Pittman	Sutherland
Dial	La Follette	Poindexter	Underwood
Dillingham	Lodge	Ransdell	Wadsworth
Ernst	McCormick	Rawson	Walsh, Mont.
France	McCumber	Sheppard	Warren

The PRESIDENT pro tempore. Forty-four Senators have answered to their names. There is not a quorum present. The Secretary will call the roll of absentees.

The reading clerk called the names of the absent Senators.

The PRESIDENT pro tempore. Forty-four Senators have answered to their names. There is not a quorum present.

Mr. McCUMBER. I move that the Sergeant at Arms be directed to procure the attendance of absent Senators.

The motion was agreed to.

The PRESIDENT pro tempore. The Sergeant at Arms will execute the order of the Senate.

Mr. WILLIAMS, Mr. ELKINS, Mr. NORBECK, Mr. HARRISON, and Mr. GOODING entered the Chamber and answered to their names.

The PRESIDENT pro tempore. Forty-nine Senators have answered to their names. There is a quorum present.

RECESS.

Mr. McCUMBER. I move that the Senate take a recess in accordance with the unanimous-consent agreement previously entered into.

The motion was agreed to; and (at 6 o'clock and 12 minutes p. m.) the Senate, under the order previously entered, took a recess until Monday, May 29, 1922, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

SATURDAY, *May 27, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Look down upon us our heavenly Father while we breathe the chant of immortal love, saying: Holy, holy, holy, Lord God Almighty. O inspire us by Thy nature that we may with confidence repose our trust in Thee. Help us to be constantly mindful that the basis of all worthy achievement is in unswerving fidelity to the accepted sanctities of public and private life. Remember the avenues of our country through which we are endeavoring to spread the knowledge of the truth and the spirit of good will. Bless our households and all their consecrated loves and hopes. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate by Mr. Craven, its Chief Clerk, announced that the Senate had agreed to the amendments of the House of Representatives to the amendments of the Senate numbered 32, 60, and 61 to the bill (H. R. 9859) making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes; that the Senate had disagreed to the amendment of the House of Representatives to the amendment of the Senate numbered 58 to said bill; that the Senate further insisted upon its amendments numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 17 to said bill, had asked a further conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and had appointed Mr. TOWNSEND, Mr. STERLING, Mr. MOSES, Mr. WALSH of Massachusetts, and Mr. BROUSSARD as conferees on the part of the Senate.

SPEAKER PRO TEMPORE FOR SUNDAY.

The SPEAKER. The Chair will designate the gentleman from Virginia [Mr. MONTAGUE] to act as Speaker pro tempore at the exercises to-morrow.

DEDICATION OF LINCOLN MEMORIAL.

The SPEAKER. The Chair has been requested to state for the information of the House something in relation to the Lincoln memorial services on Tuesday. An invitation was sent to each Member. The Chair is informed that some Members have misunderstood the invitation. The tickets requested by Members have been sent to them. Only the Representatives themselves can use the tickets indorsed in red "For Representative," for the Members are expected to be seated in a body by themselves. A representative of the Sergeant at Arms' office will be there to identify Members. Each Member has two tickets for his family, and then he has four others for friends, which are also for exceedingly good seats. Members who have not already received tickets can now procure them by applying at the Sergeant at Arms' office. The Members are requested to meet at the circle at the foot of Twenty-third Street, near the monument, at 2.20 p. m. Parking space for automobiles is arranged there.

EXTENSION OF REMARKS.

Mr. JOHNSON of South Dakota. Mr. Speaker, I make the point that no quorum is present.

Mr. VOLSTEAD. Will not the gentleman withhold that for a moment?

Mr. JOHNSON of South Dakota. I will.

Mr. VOLSTEAD. Mr. Speaker, I ask unanimous consent to extend in the RECORD remarks I made on the bill H. R. 10159.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

ALIEN PROPERTY CUSTODIAN.

Mr. WINSLOW. Mr. Speaker, on the 12th of May the President of the United States sent to the Congress a communication from the Alien Property Custodian, and it took the form of Senate Document 189, Sixty-seventh Congress. The Speaker pro tempore made reference of it to the Judiciary Committee of the House. It seems after consideration that perhaps it was not properly referred. It should have gone to the Committee on Interstate and Foreign Commerce, to which committee has been referred right along all matters bearing on the department of the Alien Property Custodian. As chairman of the Interstate and Foreign Commerce Committee I have consulted the gentleman from Minnesota [Mr. VOLSTEAD], chairman of the Judiciary Committee, in respect of the motion which I propose to make for the rereference, and he concurs and approves. I have also consulted the Speaker pro tempore, the gentleman from Massachusetts [Mr. WALSH], and he has authorized me to say, in his absence, that he also concurs and approves. So if no one desires to say anything on my proposed request, I will make that motion.

Mr. GARNER. The gentleman should ask unanimous consent.

Mr. WINSLOW. Mr. Speaker, I ask unanimous consent that it be rereferred to the Committee on Interstate and Foreign Commerce.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that the matter be rereferred from the Committee on the Judiciary to the Committee on Interstate and Foreign Commerce. Is there objection?

There was no objection.

Mr. WINSLOW. Mr. Speaker, Members are persistently inquiring of our committee and also of the Alien Property Custodian in respect of the various features connected with the administration of the custodian's office. It is a matter requiring a great deal of labor for the Alien Property Custodian to make answer and many times he fails to convey the desired information to inquiring Members of the House and the Senate. I have the manuscript of a speech made by the Hon. Thomas W. Miller, Alien Property Custodian, on January 14, 1922, which covers nearly all the queries which he reports are commonly made of him. In order to relieve the work of the department and the Committee on Interstate and Foreign Commerce and to facilitate the office work of Members of the House, I ask unanimous consent to have published in the RECORD the document I have referred to. There is no politics in it; it is a businesslike statement in respect of the various queries which have been made from time to time in relation to the work of the custodian's department.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

Mr. MONTAGUE. Reserving the right to object, would the gentleman have it printed in small type?

Mr. WINSLOW. I think the usual term is 8-point type, and I include that in my request.

Mr. MONDELL. Will the gentleman yield?

Mr. WINSLOW. Yes.

Mr. MONDELL. Has the gentleman thought of the propriety of printing it as a House document?

Mr. GARNER. It ought to be made a House document.

Mr. MONDELL. Has it occurred to the gentleman that it would be more convenient for Members for reference?

Mr. WINSLOW. Yes; it is my idea that it would be much more convenient. It would save the Members a lot of writing.

Mr. MONDELL. Then each Member could have a copy and refer to it.

Mr. WINSLOW. It would also be of service to the Alien Property Custodian's Department, and if there is no objection, I accept that suggestion and make my request that it be printed as a House document.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that the document referred to be printed as a House document. Is there objection?

Mr. CONNALLY of Texas. Mr. Speaker, reserving the right to object, I want to ask the gentleman from Massachusetts a question. Has the gentleman or any other person from his committee in view any legislation for the winding up of the business of the Alien Property Custodian and the return of alien property to those who may be entitled to receive it? When is the Alien Property Custodian's office to be demobilized, so to speak, and when are the questions involved to be settled?

Mr. WINSLOW. Mr. Speaker, if the gentleman from Texas will permit me to reply as an individual, I would say that as to the matter of thought being given to the subject of legislation along that line, I can assure him that there is altogether too much thought for the happiness of the chairman of the committee, but it does not seem to get anywhere definitely. The matter is being brought up by a thousand and one different people, who approach the general subject from many angles. That is about all the answer that I can give to the gentleman; and as to when it is going to be wound up, I would have to refer to some one better informed than I. I really do not know. We are trying to work out some plan which will be reasonably comprehensive and be in the nature, if possible, of blanket legislation covering as many points as possible, which are being contested. There are innumerable points of view, and each one seems to stumble up against some sharp edge somewhere.

Mr. CONNALLY of Texas. Do any of the plans now before the gentleman's committee or in the minds of the committee contemplate the satisfaction of American claims out of any of this property, or do they contemplate simply a return of the property to the original owners?

Mr. WINSLOW. I would not feel justified in answering that, not because there is any particular secret involved, but the matter is too chaotic for me to separate out that particular feature, although I think it is a pertinent inquiry.

Mr. CONNALLY of Texas. I saw in the press sometime ago a statement that the State Department was carrying on informal parleys with Germany with reference to arriving at a treaty later on which would adjust this alien property matter and the American claims in connection with it. Does the gentleman know anything about that?

Mr. WINSLOW. I have no official knowledge and no personal knowledge other than what I have read in the newspaper.

Mr. MOORE of Virginia. Mr. Speaker, will the gentleman yield?

Mr. WINSLOW. Yes.

Mr. MOORE of Virginia. I would like to call the gentleman's attention to an article which I read in this morning's New

York World, which discusses an important alien property transaction and apparently subjects it to pretty severe criticism. The correspondent finds occasion to refer to the ubiquitous Attorney General in that connection. I do not undertake to say what the merits of that particular transaction are, but there is certainly a prevalent opinion that Congress ought to legislate and not postpone the matter any longer.

Mr. WINSLOW. That seems to be a pretty general idea in respect to all legislation.

Mr. JOHNSON of South Dakota rose.

The SPEAKER. The gentleman from South Dakota.

Mr. JOHNSON of South Dakota. Reserving the right to object to the gentleman's request, does he not think there ought to be a rather real investigation made of the chemical foundation sale and the Bosch magneto matter, among other of these iniquitous transactions that occurred several years ago in the office of the Alien Property Custodian before the business of that office is wound up?

Mr. WINSLOW. Does the gentleman want me to answer the question or is he satisfied with having asked it? [Laughter.]

Mr. JOHNSON of South Dakota. I recognize the fact that the gentleman does not want to answer the question.

Mr. WINSLOW. The gentleman recognizes, as he does in many other respects, something that does not exist. I am very willing to answer if I am accorded the time and it is germane and the House desires me to do so, but if the House does not I do not propose to waste any time that might be properly given to something real.

Mr. JOHNSON of South Dakota. Then, Mr. Speaker, I ask unanimous consent that the gentleman be given 15 minutes in which to discuss the chemical foundation sale and the Bosch magneto sale.

Mr. CAMPBELL of Kansas. Mr. Speaker, I object.

Mr. MONDELL. Mr. Speaker, this is no time in which to discuss alleged frauds in a former administration.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts that the matter to which he refers be printed as a House document?

Mr. SABATH. Mr. Speaker, reserving the right to object, are there not some articles written or matters of opinion given out by the Attorney General in regard to the Alien Property Custodian, and would it not be wise also to embody them in this document?

Mr. WINSLOW. The gentleman is asking something I know nothing about. I would rather confine my request to the things of which I have some knowledge. This is merely a statement of conditions and facts which would help us in our correspondence. It is not an argument one way or the other, while the matter to which the gentleman referred, as he can see, might become a very long drawn-out matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts to print this document as a House document?

There was no objection.

EXTENSION OF REMARKS.

Mr. HUDDLESTON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

Mr. MONDELL. Upon what subject?

Mr. HUDDLESTON. Touching the services of my colleague, Judge TYSON, in Congress.

The SPEAKER. Is there objection?

There was no objection.

The extension of remarks referred to are here printed in full as follows:

Mr. HUDDLESTON. Mr. Speaker, under leave given me to extend my remarks I desire to publish a statement showing something of the services in Congress of my friend and colleague, Hon. JOHN R. TYSON, of Alabama.

ANSWERING SENATOR PENROSE.

1. The first matter of great moment, especially to the people of the South, in which Judge TYSON took part was to write an article showing that the bill introduced in the Legislature of Pennsylvania, fathered by the late Senator Penrose, of that State, attempting to require that equal privileges in hotels, cafés, restaurants, educational institutions, and amusement places be accorded to the Negro on equal terms with the whites, was unconstitutional, resulting in the defeat of the bill in the senate of that State after being passed by the house.

WORK ON CENSUS COMMITTEE.

2. As a member of the Census Committee of the House, Representative TYSON was appointed on a subcommittee of three, the other two members being Republicans, to make a report defining the jurisdiction of the committee with respect to a reduction of representation of the Southern States in the House because of an alleged denial to the Negro of the right to vote. The subcommittee reported, in substance, that the basis of representation in the House under the Constitution is that of population, and that a denial to the Negro of a right to vote under the fourteenth and fifteenth amendments to the Constitution could only be considered by Congress upon the introduction of a bill or resolution for an investigation having reference to a particular election in a specified State. The report was adopted unanimously by the committee.

3. As a member of the Census Committee he led the fight to a successful conclusion not to report a bill apportioning the number of Representatives in the House under the census taken in 1920, thus preventing a loss in representation in the House to Mississippi and Louisiana and defeating an increase in the Republican membership.

PEACE RESOLUTION.

4. He voted for and advocated on the floor of the House the adoption of the peace resolution declaring that peace exists between Germany, Austria-Hungary, and the United States. As noted in the Literary Digest, July 16, 1921, he contended "that cotton sales would be improved." In other words, he contended that upon the adoption of the resolution the markets in Germany and Austria-Hungary for cotton would, in a large measure, be reestablished, and this has come to pass.

TARIFF BILL.

5. He opposed and spoke against the Fordney tariff bill. In his speech he asserted, among other things, that it taxed practically every necessity of life and carried a tax of $50 per ton on potash, a necessary ingredient of fertilizers, used by the farmers of Alabama, enhancing the cost of fertilizers, where potash is a component part, of at least $10 per ton.

REVENUE BILL.

6. He voted against this bill because he regarded it as the most vicious piece of legislation ever offered to be enacted by any legislative body. He asserted that its manifest purpose is to relieve the wealthy individual and corporations as far as possible from taxation and impose it upon the less fortunate. In other words, roughly estimating, 75 per cent of the corporations of this country will have to pay an increased tax, while the remainder of them are accorded a substantial reduction. Individuals who have an income of $66,000 per year or more will pay proportionately less income tax than the individual who has a lesser income. He advocated the repeal of the so-called nuisance taxes.

RAILROAD FUNDING BILL.

7. He opposed the passage of this bill because he believed and stated that it involved simply a scheme to permit the railroads of the country to filch the Treasury of the United States under the guise of a loan which would never be repaid and because of his opposition to a donation of the people's money. He insisted that on an accounting, instead of the Government being indebted to the railroad companies, the railroad companies, as the result of United States administration of them, are indebted to the Government $300,000,000. Notwithstanding it was vehemently urged that unless the bill was passed at once—August 22, 1921—many of the railroads of the country would go into the hands of a receiver, and although the bill has not yet been passed by the Senate no important line of railroad has yet gone into the hands of a receiver. Their earnings are greater than they have ever been in the history of the country, in face of a gradual reduction in freight rates.

REFUNDING FOREIGN DEBT.

8. He voted against this bill because he entertained the view that it is the initial step leading to the final forgiving of all foreign debts, in order that the national bankers may collect some five billions of dollars due them by the foreign debtor countries.

ANTILYNCHING BILL.

9. This bill is the product of the demand of the northern Negro and seeks to punish sheriffs and other executive officers who fail or neglect to protect the life of any person put to death by a mob composed of three or more persons, and to impose a penalty on the county in which the death occurs of $10,000, recoverable for the use of the family of the deceased, and also punishes those who participate in the mob violence. He voted against this bill and made one of the ablest speeches that was made against it, demonstrating its unconstitutionality. As noted in the Washington Star of May 24, 1922, Senator BORAH, a Republican, chairman of the subcommittee of the Judiciary Committee of the Senate, has joined with Senators OVERMAN and SHIELDS, Democratic members of that committee, in agreeing with Representative TYSON that the bill is unconstitutional. These gentlemen compose a majority of the subcommittee.

AUTHORIZING COOPERATIVE MARKETING OF FARM PRODUCTS.

10. He voted for this bill, which permits farmers of the country to organize cooperative associations and corporations, without paying in any capital, to market farm products, the purpose being to enable farmers to dispense with, if possible, the cost of their products being handled by the middleman and to facilitate their dealing directly with the consumer.

IMMIGRATION.

11. He voted for the bill which restricts immigration into this country.

SWEET BILL ESTABLISHING VETERANS' BUREAU.

12. He voted for this bill, which facilitates the adjusting of compensation and hospitalization of the disabled war veterans.

BILL AMENDING FARM LOAN ACT.

13. He voted for the two bills which provide for additional credit to the owners of farm lands.

GOOD ROADS BILL.

14. He voted for this bill, which provides aid for the States in the construction of rural post roads. It also contains a provision that any State desiring to avail itself of the benefits of the act may have three years after the adjournment of the first regular session of the State legislature from and after the approval of the act to provide State funds each year at least equal to the amount apportioned for such year by the Federal Government.

AMENDING WAR FINANCE CORPORATION ACT.

15. He voted for the "bill to amend the War Finance Corporation act to provide relief for producers of and dealers in agricultural products." That act provides for loans and fixes the rate of interest to be charged for the money loaned. Loans may be made for agricultural purposes, including the breeding, raising, fattening, and marketing of live stock, as well as upon cotton, corn, oats, wheat, and like farm produce.

APPROPRIATION FOR MILITARY AND NONMILITARY ACTIVITIES.

16. He voted for this bill, which increases the personnel and pay of the National Guard.

TO AMEND FEDERAL RESERVE ACT.

17. This bill amended section 10 of the Federal reserve act by increasing the Federal Reserve Board to eight members and providing for a representative of agriculture on that board. He voted for this bill.

MATERNITY BILL.

18. He voted for this bill, expressing the view that care of mothers and infants is more important to the Nation than that of animal life.

Men are what their mothers make them. (Emerson.)
The future destiny of the child is always the work of the mother. (Napoleon.)

ADJUSTED COMPENSATION FOR VETERANS OF WORLD WAR.

19. He voted for and was an advocate of the passage of this bill. Alabama furnished approximately 100,000 men in the military and naval forces in the World War. Under the bill the Alabama ex-service men will receive approximately $20,000,000 which will be spent in that State, more than is contributed by the taxpayers of that State to the National Government. He abhors that the fate of the veterans of the World War should be as that expressed in the lines of Southern in "Loyal Brothers":

Dost thou not know the fate of soldiers?
They're but ambition's tools, to cut a way
To her unlawful ends; and when they're worn,
Hack'd, hewn with constant service, thrown aside,
To rust in peace and rot in hospitals.

COMPENSATION, HOSPITALIZATION, AND VOCATIONAL TRAINING.

20. Representative TYSON has energetically and vigorously assisted several hundred disabled World War veterans in securing compensation, vocational training, and hospitalization.

GOVERNMENT PUBLICATIONS.

21. He has mailed to his constituents many valuable Government publications.

FORD'S OFFER FOR MUSCLE SHOALS.

22. Mr. Ford, on July 8, 1921, executed his proposal to the Government for the Muscle Shoals property, which was transmitted shortly thereafter to the Secretary of War. As soon as it was made public Representative TYSON became a strong advocate of its acceptance by Congress and has done as much as any Member of Congress to arouse public sentiment in favor of its acceptance. He says of the proposal:

An impetus and a quickening of interest in water-power development throughout the country is the result of the Ford offer for Muscle Shoals, which will be of incalculable value to the entire Nation. His offer has developed a realization of the enormous value of the Tennessee River for transportation and hydroelectric purposes. It has pointed the way for cheaper fertilizer, cheaper transportation, and cheaper power for industrial enterprises. It has awakened in Congress an appreciation of the illimitable potentialities of the Tennessee River, of other undeveloped water powers, and of their inestimable value to the people of this country.

—

[From the Montgomery Advertiser, June 9, 1921.]

DEMOCRATS OF SOUTH WIN SIGNAL VICTORY—QUESTION OF REAPPORTIONMENT OF REPRESENTATIVES IN CONGRESS SETTLED FOR TIME BEING.

(Advertiser Bureau, Washington, D. C. By Jesse S. Cottrell.)

Southern Democrats on the Census Committee of the House have won a signal victory and settled during the life of this Congress the question of reapportionment of Representatives in Congress, which might have caused a reduction of the representation from the South. Led by Representative TINKHAM, of Massachusetts, and a small coterie of eastern Republicans, a movement has been gaining headway during the present Republican ascendancy to cut down the representation from the South in retaliation for the alleged denial of the votes of the negroes. Eastern negroes and their Republican advocates have insisted that all negroes in the South are not permitted to vote and that Congress should take cognizance of the fact. Various bills bearing on the question were invariably referred to the Committee on the Census. In this committee the question arose as to just how far the committee could go, which incidentally brought the activities of this committee into prominence in so far as it was handling these bills.

Led by Representative JOHN R. TYSON, of Alabama, a former chief justice of the supreme court of his State, and Representative J. E. RANKIN, of Mississippi, a movement was started in the committee for a decision to define the jurisdiction of the committee in handling reapportionment matters. Judge TYSON was the Democratic member of a subcommittee which has reported to the full committee. The entire committee has in turn gone on record adopting the subcommittee's report, to the effect that the clause of the fourteenth amendment to the Constitution providing for a reduction in representation on account of a denial of a right to vote at any election can only be brought before Congress by the introduction of a bill or resolution for an investigation with reference to a particular election in a specific State or States.

—

[From the Birmingham Age-Herald, Sunday, April 3, 1921.]

TYSON RAPS BOSS PENROSE, WHO, DIPPY TO HOLD VOTES, FIGURATIVELY KISSES NEGRO.

(By Washington bureau of the Age-Herald, 500 Davidson Building.)

WASHINGTON, April 2.—(Special.)—At last there comes a man to Washington with sufficient temerity to beard the lion in his den.

As a result Senator Penrose, the Republican boss, whose procedure has been characterized by arrogance and contempt for conventional opinion, must reckon with Judge JOHN R. TYSON, of Montgomery, who, on April 11, will take the oath of office as a Representative from Alabama.

In a statement issued to-day Judge TYSON not only proves fallacious the legal argument of Senator Penrose that the Negro is entitled to public entertainment and education on a basis of equality with the white man but denounces as an absurdity the afterthought of the Senator that, despite his views, he does not believe in social equality.

PENROSE EFFUSIVE.

Some days ago Senator Penrose, in most fulsome language, welcomed pompous Negro celebrities on the occasion of their visit to Washington. In the course of his speech he declared that the Negro must be accorded equal privileges in hotels, cafés, restaurants, educational institutions, and places of amusement, and that such rights must be sustained by legislation providing heavy penalties for their denial.

Judge TYSON points out that the Constitution does not require a proprietor to entertain anyone who would be offensive to his other guests, and adds that the Supreme Court of Pennsylvania has held on two grounds the justice of a company in providing separate street car compartments for the races, the two grounds being the right that the company had in its property and the public interests.

TYSON TO G. O. P. BOSS.

Says Judge TYSON to Senator Penrose:

"To permit negroes to be educated at white schools would necessarily bring about social intermixture, resulting in amalgamation, which is contrary to the law of races. Social equality can not be established, enforced, or maintained by legislation.

"The statement that Senator Penrose does not stand for social equality in face of the fact that he advocates establishing conditions by penal statutes which would enforce the intermingling of races, bringing about a contact necessarily promotive of social associations, and, therefore, equality, is an absurdity."

Judge TYSON is a former chief justice of the Supreme Court of Alabama.

—

LETTER OF HON. JOSEPH W. BYRNS, OF TENNESSEE, RANKING DEMOCRAT ON HOUSE COMMITTEE ON APPROPRIATIONS.

WASHINGTON, D. C., *January 18, 1922.*

Hon. JOHN R. TYSON, M. C.,
Washington, D. C.

MY DEAR JUDGE: I wish to express my appreciation of your great speech in opposition to the so-called Dyer antilynching bill which appears in to-day's CONGRESSIONAL RECORD. It is a magnificent constitutional argument—one of the very ablest of the many good speeches which were made in the course of the debate. In my judgment, you have clearly demonstrated the unconstitutionality of the measure, and for this lasting public service you are entitled to the thanks of your constituents and the entire country. There is no question but that if this unwise and improper measure should pass the Senate and become a law your speech will serve a great purpose in demonstrating its unconstitutionality in the courts of the country. May I say that, coming from the same section that you do, I have been highly gratified to hear similar comments from Members on both sides of the Chamber? You have more than justified your reputation as one of the great lawyers of this Congress.

With high personal regards, I am,
Sincerely yours,

JOSEPH W. BYRNS.

LETTER OF HON. J. B. ASWELL, OF LOUISIANA, OF THE COMMITTEE ON AGRICULTURE.

WASHINGTON, D. C., *March 25, 1922.*

Hon. JOHN R. TYSON, M. C.,
House of Representatives, Washington, D. C.

MY DEAR JUDGE: I am writing to express to you my very great appreciation of your work as a member of the Census Committee of the House of Representatives.

Having been for several years a member of that committee, I am personally familiar with the details of its work and with your forceful part in it.

At the beginning of this Congress I retired from that committee to become a member of the Committee on Agriculture, when you became a member of the Census Committee.

When the Republican leaders proposed a reapportionment bill, reducing representation in Congress from several of the Southern States, including Louisiana and Mississippi, you will recall that I appealed to you to oppose the measure. You promptly took the lead in the fight and became recognized as one of the real leaders of the committee in opposition to the proposed Republican measure. With your masterful skill, judgment, and courage, the fight was successful and the measure defeated.

You deserve very great credit for holding southern representation in the Congress as it now exists and in preventing the Republicans from increasing their membership in the House.

With very cordial good wishes, I am,
Sincerely yours, J. B. ASWELL, M. C.

LETTER OF HON. CLAUDE KITCHIN, OF NORTH CAROLINA, DEMOCRATIC LEADER IN THE HOUSE OF REPRESENTATIVES.

SCOTLAND NECK, N. C., *August 11, 1921.*

Judge JOHN R. TYSON,
House of Representatives, Washington, D. C.

MY DEAR JUDGE: I have just read your speech on the tariff and hasten to write you to congratulate you on its excellence. It is one of the best speeches I have read on the tariff and it does you great credit. I took much pleasure in reading it.

With assurances of my high regards and best wishes, I am,
Your friend sincerely,
CLAUDE KITCHIN.

Your thrust at MURPHY, of Ohio, was especially happy.

Mr. DENISON. Mr. Speaker, Mrs. Gen. John A. Logan has written a short story of the history and origin of Memorial Day. It is very interesting and full of information. There is no one living who can speak on this subject with more intimate and reliable knowledge of the facts than can Mrs. Logan. I think all of the Members of the House, as well as the rest of the country, ought to read it, and I ask unanimous consent for permission to extend my remarks in the RECORD by incorporating that article. Mrs. Logan is one of our country's greatest women and, aside from our interest in Memorial Day, I am sure we are all interested in anything she might wish to say.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD by printing an address by Mrs. Logan in respect to the origin of Memorial Day. Is there objection?

There was no objection.

The matter referred to is as follows:

HOW MEMORIAL DAY CAME TO BE—THIS STORY OF THE AMERICAN DECORATION DAY IS TOLD BY THE WIDOW OF THE MAN WHO ORIGINATED THE HOLIDAY.

(By Mrs. John A. Logan.)

To properly appreciate the establishment of Memorial Day readers should know about the organization of the Grand Army of the Republic. The comradeship and patriotic principles which prompted the organization of this, the greatest organization the world has ever known, inspired General Logan in writing the immortal order No. 11, when commander in chief of the Grand Army of the Republic. Without the Grand Army of the Republic there never would have been a Memorial Day or a medium through which it could have been established.

It gives me great pleasure to tell you the true story. These are the facts:

The late Col. Charles L. Wilson, editor of the Chicago Journal of that day, invited a party consisting of his niece, Miss Anna Wilson (later Mrs. Horatia May), Miss Farrar, his fiancé (all now dead), General Logan, and myself to visit the battle fields around Richmond in March, 1868. The importance of some measures then pending in Congress prevented General Logan, at the last moment, from going, but he insisted upon my going with these friends. We made a tour of every battle field, fortification, temporary barricade, and cemetery around the erstwhile Confederate capital, driving about in old tumbledown vehicles drawn by lean, jaded horses, driven by thinly clad, poorly fed men, who had survived the long siege of Richmond. We saw the colored men, women, and children digging out the lead and iron which had been shot into the fortifications, almost the only support of these wretched people. Visiting cemeteries and churchyards, we were deeply touched by the withered wreaths and tiny flags that marked the graves of the Confederate dead. In the bleak March wind and light-falling snow the desolation seemed most oppressive.

GENERAL LOGAN HEARS STORY.

Returning together to the old Willard Hotel, where we then lived, sitting in our parlor after dinner, we recounted to General Logan the incidents of the trip and how deeply touched we were by the devastation and ravishes of war. In the churchyard around an old historic church at Petersburg every foot of the ground seemed occupied by the graves of the Confederate dead. Upon them lay wreaths once beautiful flowers now crumbling, which had been placed there by loving hands. Little faded Confederate flags marked each grave, mute evidence of the devotion of the Southern people to their loved and lost. General Logan was much impressed by our description, saying, "The Greeks and Romans in the day of their glory were wont to honor their hero dead by chaplets of laurel and flowers, as well as in bronze and stone," and that as commander in chief of the Grand Army of the Republic and Member of Congress from Illinois, which he then was, he would issue an order establishing Memorial Day, then called Decoration Day. He declared at the same time that he believed that he could secure the adoption of a joint resolution making it a national holiday and a national ceremony. He then took up a pencil and piece of paper and wrote the matchless order No. 11, and remarked he would submit it to his staff of the Grand Army of the Republic, then composed of Dr. W. T. Collins, assistant adjutant general; Bvt. Brig. Gen. N. P. Chipman, adjutant general; Capt. T. C. Campbell, quartermaster general; and Capt. Edward Jardine, inspector general. He read what he had written to Colonel Wilson, who expressed his appreciation of the order and predicted it would be received with great enthusiasm all over the country.

LOGAN'S STAFF AGREES.

The following evening, upon his invitation, his staff assembled in our rooms and he submitted the order to them. Without a dissenting voice they thought it would receive a ready response from all loyal hearts in the Union. He handed the order No. 11, Grand Army of the Republic, to Adjutant General Chipman to be issued at once from the headquarters of the Grand Army of the Republic. If Colonel Wilson made any notes or subsequently advocated the movement, they were all lost a few years later in the great conflagration which visited Chicago and reduced to ashes newspaper files, homes, and business establishments.

As far as I know, Bvt. Brig. Gen. N. P. Chipman and myself are the only living persons of all of those who had any knowledge of General Logan's authorship and conception of this immortal order, which, like an electric shock, awakened the latent gratitude in all loyal hearts toward the men who had laid down their lives that the Union might live.

I claim without fear of contradiction that I know the facts and that my memory is as dependable as that of any one else in all the world who had not the same interest which I had then and shall have as long as I live.

George Francis Dawson, now deceased, wrote the life of Maj. Gen. John A. Logan from all the records, notes, and memoranda of General Logan which were placed in his hands. The following is from Dawson's "Life of Logan:"

"MEMORIAL OR DECORATION DAY.

"In January, 1868, General Logan's comrades of the Grand Army of the Republic elected him commander in chief of that order, and afterward honored him and themselves by twice reelecting him to that distinguished position. It was during his first incumbency that General Logan, as commander in chief of this military society ,issued the order—which he often afterwards, alluded to as 'the proudest act of my life'—setting apart the 30th of May as a day in memory of the dead soldiers who lost their lives to perpetuate this Union—a day on which to decorate their sacred graves and keep in mind their glorious deeds. This memorable order—which was issued to all the comrades of the 'Grand Army of the Republic' throughout the land—was in these inspiring words:

"HEADQUARTERS GRAND ARMY OF THE REPUBLIC,
"ADJUTANT GENERAL'S OFFICE,
"446 FOURTEENTH STREET, WASHINGTON, D. C., *May 5, 1868.*

"General Orders, No. 11.

"I. The 30th day of May, 1868, is designated for the purpose of strewing with flowers, or otherwise decorating, the graves of comrades who died in defense of their country during the late rebellion, and whose bodies now lie in almost every city, village, hamlet, and churchyard in the land. In this observance, no form of ceremony is prescribed, but posts and comrades will, in their own way, arrange such fitting services and testimonials of respect, as circumstances may permit.

"We are organized, comrades, as our regulations tell us, for the purpose among other things, "of preserving and strengthening those kind and fraternal feelings which have bound together the soldiers, sailors, and marines, who united together to suppress the late rebellion." What can aid more to assure this result than by cherishing tenderly the memory of our heroic dead, who made their breasts a barricade between our country and its foes. Their soldier lives were the reveille of freedom to a race in chains, and their deaths the tattoo of rebellious tyranny in arms. We should guard their graves with sacred vigilance. All that the consecrated wealth and taste of the Nation can add to their adornment and security, is but a fitting tribute to the memory of her slain defenders. Let no wanton foot tread rudely on such hallowed grounds. Let pleasant paths invite the coming and going of reverent visitors and fond mourners. Let no vandalism of avarice or neglect, no ravages of time, testify to the present or to the coming generations that we have forgotten, as a people, the cost of a free and undivided Republic.

"If other eyes grow dull and other hands slack and other hearts grow cold in the solemn trust, ours shall keep it well as long as the light and warmth of life remain to us.

"Let us, then, at the time appointed gather around their sacred remains and garland the passionless mounds above them with the choicest flowers of springtime; let us raise above them the dear Old Flag they saved from dishonor; let us, in this solemn presence, renew our pledges to aid and assist those whom they have left among us a sacred charge upon a nation's gratitude—the soldier's widow and orphan.

"II. It is the purpose of the commander in chief to inaugurate this observance, with the hope that it will be kept up from year to year, while a survivor of the war remains to honor the memory of his departed comrades. He earnestly desires the public press to call attention to this order, and lend its friendly aid in bringing it to the notice of comrades in all parts of the country in time for simultaneous compliance therewith.

"III. Department commanders will use every effort to make this order effective.

"By order of— "JOHN A. LOGAN,
"*Commander in Chief.*

"Official:
"N. P. CHIPMAN,
"*Adjutant General.*

"RESOLUTION IN THE HOUSE.

"This order having been generally complied with throughout the country with beautiful and touching ceremonies at the graves of the dead, Mr. Logan, on June 22, 1868, introduced a resolution in the House of Representatives, which was unanimously adopted, in these words:

"'*Resolved*, That the proceedings of the different cities, towns, etc., recently held in commemoration of the gallant heroes who have sacrificed their lives in defense of the Republic, and the record of the ceremonial of the decoration of the honored tombs of the departed shall be collected and bound, under the direction of such person as the Speaker

shall designate, for the use of Congress.' (Congressional Globe, 40th Cong., 2d sess., June 22, 1868, p. 3364.)

"Since then, as is well known, Decoration Day has been observed as a national holiday nearly everywhere in the United States."

(The above is from Dawson, G. F., Life and Services of Gen. John A. Logan, pp. 123–125.)

In Gen. Robert B. Beath's History of the Grand Army of the Republic, on page 92, Gen. N. P. Chipman, adjutant general, G. A. R., General Logan's staff, refers to Memorial Day:

"Probably no one act in your administration has done more to cement the brotherhood of our order and to remove any prejudice that might remain in the minds of the public against it than the inauguration of the practice of an annual commemoration to the memory of our departed comrades. The day set apart last year was observed in all departments and by almost all the posts, and with the most gratifying results. If this feature alone was the result of the organization, I think the establishment of a national Memorial Day a sufficient reward to our comrades for all they have done, and this alone would be motive sufficient to perpetuate our order. No other society was in a position to originate the observance, and probably no other would have done so."

THE FIRST OBSERVANCE.

The first observance of this order took place May 30, 1868. The whole country was still in mourning over the sacrifices of the bravest and the best "that government of the people, by the people, and for the people should not perish from the earth." The gaping wounds of the bloody carnage in the mighty conflict were still unhealed. Widows and orphans made up the larger part of the multitudes who came with floral tributes for their loved and lost, while the ex-Union soldiers, to the music of solemn dirges, marched up and down the streets of the silent cities, stopping ever and anon to mark the grave of a fallen comrade with a duplicate of the starry emblem of liberty.

The exercises of the day were replete with addresses, poems, and stories of the patriotism and heroism of the Nation's living and dead defenders. Men who had led the sturdy columns against a dauntless foe told of the superhuman courage of those who fell fighting for the preservation of the Union, painting such vivid pictures of scenes in which they had participated as to bring tears to eyes unused to weeping.

Alas, the majority of those who inaugurated the beautiful ceremonies of the national Memorial Day have passed away. Their brave spirits have joined the hosts who are tenting on "fame's eternal camping ground."

The fact that all over this continent loyal people are still repeating their annual commemoration of the gallant deeds of the heroic dead who have died during and since the Civil War proves that "other eyes have not grown dull," "other hands slack," or "other hearts cold in the solemn trust." Nor will the "ravages of time testify to the present or to the coming generations that we have forgotten as a people the cost of a free and undivided Republic."

NOBLER NATION BORN.

Out of the great conflicts and agony of war, with all its horrors, a nobler Nation has been born, consecrated to universal Christian freedom. Right valiantly have they pressed forward and upward, bearing bravely the burdens of the peoples of many races and conditions. There have been no deviations from the pathway to glory and prowess for this Republic.

Time, however, has smothered the furrowed plain and bridged the gulf that once divided the sections of our country. War for the oppressed of other peoples has joined in inseparable bonds the North and the South, the East and the West, for freedom, progress, and humanity.

The survivors of the lamentable conflict, under the providence of God, can on this hallowed day assemble around the graves of their sacred dead and cover them with nature's loveliest canopy.

Peace, white-winged peace, hovers above us, and we believe that "The Star-Spangled Banner in triumph shall forever wave o'er the land of the free and the home of the brave."

The beacon light of liberty, brighter from the burnishing by the clash of arms, still attracts the oppressed and downtrodden of the whole world. This generation and the generations that are to follow are and will be beyond question committed to the perpetuation of constitutional freedom, and liberty regulated by law, and to the work of securing for all men equality before the law, the right to pursuit of happiness and the worship of God according to the dictates of their own conscience.

Founded upon these principles, our Government has won its prowess among all the peoples of the earth. Momentary outbreaks of the lawless may for a time disturb the harmony and brotherhood of citizens of certain localities, but the supremacy of the law established in every part of the United States by the armies and navies of the Union will stand forever. Obedience to the lawfully expressed will of the majority, as declared in the Pilgrims' covenant of 1620, is a principle so fixed in our political system that it can never be otherwise; against it the weight of the rebellion of '61–'65 was not able to succeed. The liberty, justice, and humanity of the American Government stands immovably, as has been demonstrated by the recent conference which will enable the United States to win and hold the confidence of the peoples of the earth until all have been enrolled under the banner of the Cross and white-winged peace.

THE AMERICAN LEGION.

The American Legion, if wisely organized, since the close of the World War is in a position to do immeasurable service for our country, destined as it probably is to bear so conspicuous a part in the world's work. I can not resist the temptation to urge the American Legion to harken to an appeal made by General Logan to ex-Union soldiers, sailors, and marines in an address made at the close of his second term as commander in chief of the G. A. R. He said:

"It should be the aim of the Grand Army to bring within its fold every honorably discharged soldier and sailor, and by the constant exercise of the virtues we profess exert an influence second only to the church of Christ. Exalting the hopes and aspirations of our own members, we thereby help to give a proper tone to public sentiment and crush out all opposition to civilization, loyalty, and Christianity, as well as hold our organization above the criticism of the most fastidious, who, beholding our 'good works,' will rise up 'and call us blessed.' We shall need no appeal to call forth the support of all good citizens, who will gladly sustain our lectures and other means of support to our family of sufferers, in whose interest we have solicited public patronage, with liberal responses already.

"The tree of liberty, watered and trained by the influences of the Grand Army, will send forth no disloyal shoots to dishonor our flag, but every branch as it takes up its burden of life will have that vital principle of loyalty so engrafted that treason can never destroy it. And when the encampments that know us now 'shall know us no more forever' the feeling of fraternal regard we have nourished will shed its silent tear over our graves; the charity we have promoted will throw its mantle over our shortcomings, and the spirit of loyalty we have cultivated will still rally round the flag we loved, to perpetuate our memories."

LAYING ON THE TABLE CERTAIN BILLS AFFECTING THE NAVY.

Mr. HICKS. Mr. Speaker, there are certain bills reported by the Committee on Naval Affairs which have been disposed of and which are still upon the calendar. I ask unanimous consent to lay on the table the bill (H. R. 10909) to authorize the President to cancel or modify certain contracts for battleships and battle cruisers, and for other purposes; the bill (H. R. 5219) to create a bureau of aeronautics in the Department of the Navy, and the bill (H. R. 6297) authorizing the construction of an airplane carrier for the Navy of the United States.

The SPEAKER. The gentleman from New York asks unanimous consent to lay upon the table the bills to which he has just referred. Is there objection?

There was no objection.

Mr. JOHNSON of South Dakota. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. It is clear that there is no quorum present.

Mr. MONDELL. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

Anderson	Echols	Kinkaid	Reber
Andrew, Mass.	Edmonds	Kirkpatrick	Reed, N. Y.
Ansorge	Evans	Kitchin	Riddick
Anthony	Fairchild	Knight	Riordan
Arentz	Fess	Knutson	Roach
Atkeson	Fields	Kreider	Rodenberg
Bacharach	Fish	Kunz	Rogers
Bankhead	Fitzgerald	Langley	Rosenbloom
Barkley	Focht	Larson, Minn.	Rossdale
Beck	Fordney	Layton	Rouse
Benham	Foster	Lee, Ga.	Ryan
Blakeney	Frear	Lee, N. Y.	Sanders, Ind.
Bland, Ind.	Free	Lehlbach	Sanders, N. Y.
Bland, Va.	Freeman	Linthicum	Schall
Boies	French	Longworth	Scott, Mich.
Bond	Frothingham	McArthur	Scott, Tenn.
Bowers	Fuller	McFadden	Sears
Brand	Gallivan	McLaughlin, Pa.	Siegel
Britten	Garrett, Tenn.	McPherson	Slemp
Brooks, Ill.	Garrett, Tex.	MacGregor	Smith, Mich.
Brooks, Pa.	Gensman	Maloney	Smithwick
Browne, Wis.	Glynn	Mann	Snyder
Burke	Goldsborough	Martin	Speaks
Burroughs	Goodykoontz	Merritt	Stafford
Burtness	Gould	Michaelson	Stiness
Butler	Graham, Ill.	Mills	Stoll
Chandler, Okla.	Graham, Pa.	Moore, Ill.	Strong, Pa.
Clague	Griest	Moore, Ohio	Sullivan
Clark, Fla.	Griffin	Morin	Sweet
Clarke, N. Y.	Haugen	Mudd	Tague
Classon	Hawes	Murphy	Taylor, Ark.
Cockran	Hays	Nelson, A. P.	Taylor, Colo.
Codd	Henry	Nelson, J. M.	Taylor, Tenn.
Cole, Iowa	Hill	Nelson, Me.	Ten Eyck
Cole, Ohio	Himes	Newton, Minn.	Tilson
Collins	Hogan	Newton, Mo.	Tinkham
Connell	Hudspeth	O'Brien	Treadway
Connolly, Pa.	Humphreys	Olpp	Vare
Cooper, Wis.	Husted	Paige	Voigt
Copley	Hutchinson	Parker, N. J.	Volk
Coughlin	Ireland	Parker, N. Y.	Walsh
Crago	Jefferis, Nebr.	Parks, Ark.	Walters
Cramton	Johnson, Wash.	Patterson, N. J.	Ward, N. Y.
Curry	Jones, Pa.	Perkins	Wason
Darrow	Jones, Tex.	Perlman	Watson
Davis, Minn.	Kahn	Petersen	Williams, Ill.
Dempsey	Kelley, Mich.	Porter	Wood, Ind.
Dickinson	Kennedy	Rainey, Ala.	Wyant
Drane	Kiess	Rainey, Ill.	Zihlman
Driver	Kincheloe	Ransley	
Dunbar	Kindred	Reavis	

The SPEAKER. Two hundred and twenty-nine Members have answered to their names; a quorum is present.

Mr. MONDELL. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors.

READJUSTMENT OF PAY OF DIFFERENT SERVICES.

Mr. McKENZIE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 10972, to disagree to all the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from Illinois asks unanimous consent to take from the Speaker's table the bill H. R. 10972, to disagree to all the Senate amendments, and ask for a conference. The Clerk will report the bill by title.

The Clerk read as follows:

An act (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and the Public Health Service.

The SPEAKER. Is there objection?

Mr. KRAUS. Mr. Speaker, reserving the right to object, when this matter was called up in a similar way a few days ago I called the attention of the gentleman from Illinois to the fact that the main difference between the House and Senate was in the amendment relating to retired pay. Quite a number of gentlemen of the House are strongly opposed to the Senate provision, and we must admit that there is a possibility and a probability that the House members of the conference committee might recede in whole or in part so far as the House is concerned, and gentlemen in favor of the House provision would like to have an opportunity, when this provision of the bill comes from the conference committee, in case there is a total or partial recession, to express their views to the House and attempt to get an expression from the House on that particular question. That is the only purpose.

Mr. OLIVER. Mr. Speaker, I agree with the gentleman from Indiana that the real difference between the House and the Senate on the pending bill relates to retired pay of officers. The other differences will be readily adjusted on a basis entirely satisfactory to both the House and the Senate. Now, in view of the fact the gentleman from Illinois [Mr. MCKENZIE] was opposed to the action of the House relative to the matter now in dispute, I hope that before the gentleman agrees to recede from the position taken by the House that he will give the House an opportunity to declare its present attitude on the question involved, but I have no desire to impose that as a condition to the bill going to conference. I would like, however, to have the assurance of the gentleman from Illinois that if any recession is made from the position of the House as to retired pay, he will either give the House an opportunity to vote on it or give Members an opportunity to present their views to the House before any vote is asked on the conference report.

Mr. MCKENZIE. Mr. Speaker, in reply to my two colleagues on the committee, I wish to say, as I understand the rules of the House, when the conference report is called up I will have one hour's time at my disposal, and I want to say to my two colleagues I certainly would have no objection and would be glad to yield them a liberal part of that hour, or to anyone else whom they may designate and who desires to express an opinion on the conference report.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the conferees.

The Clerk read as follows:

Mr. MCKENZIE, Mr. KRAUS, and Mr. BYRNES of South Carolina.

Mr. LUCE. Mr. Speaker——

Mr. JOHNSON of South Dakota. Mr. Speaker, I rise to a question of privilege.

The SPEAKER. The gentleman from South Dakota will state it.

Mr. JOHNSON of South Dakota. Mr. Speaker, on page 7741 of the RECORD of May 26, I brought before the House a question of privilege in reference to House Resolution 323, the Woodruff resolution, suggesting at that time that the Rules Committee order the chairman of the Committee on Rules to report that resolution, and that he had refused to do so and still refuses to do so. I think the quorum call disclosed the gentleman is not here, which is evidence he does not intend to report it to-day. I believe that the expiration of 24 hours since the ruling of the Speaker yesterday has brought me within the construction of the word "reasonable" that was laid down by the Speaker on yesterday.

I believe the Speaker of the House, like a court, must not close his eyes or shut his ears to absolute facts. The fact that the chairman of the Committee on Rules on yesterday remained silent when I asked the definite question if he ever intended to report this resolution, brings this case within the rule of law that a contract, although a "reasonable" time may be given to have it executed, may be called for execution at once if the party who agrees to perform a certain act says definitely he will not keep the contract. I think a "reasonable" time has expired and that the chairman of the Committee on Rules, in accordance with the ruling of former Speaker Reed, ought to be compelled to present this resolution to the House itself, and I move that he be compelled to do so.

The SPEAKER. The Chair is ready to rule. Regardless of the question of whether a reasonable time has transpired since yesterday, the gentleman from Massachusetts [Mr. LUCE] is now claiming recognition for the purpose of presenting a contested-election case.

According to endless precedents a contested-election case is the highest privilege of the House. Granting for the sake of argument that the contention of the gentleman from South Dakota is correct, it would certainly not give him the right to bring it up now in opposition to a contested-election case. Therefore, and on that account, the Chair declines to recognize the question of privilege.

Mr. JOHNSON of South Dakota. Mr. Speaker, a parliamentary inquiry. If it should be brought to the attention of the Chair that between now and next Thursday, when I understand there is to be a meeting of the Rules Committee, at which time certain gentlemen who voted for the reporting of this Woodruff resolution are going to move to reconsider and kill it—if it should be brought to the Chair's attention that that is the case, and the leadership of the House should determine on Wednesday next, the only other day that we meet, to bring up another contested-election case, would the Chair then feel he could recognize me on the question of privilege?

The SPEAKER. The Chair will cross that bridge when he reaches it.

The gentleman from Massachusetts [Mr. LUCE] is recognized.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed without amendment bills of the following titles:

H. R. 10925. An act to authorize the Secretary of War to sell real property, known as the Pittsburgh Storage Supply Depot, at Pittsburgh, Pa.; and

H. R. 241. An act to authorize the Secretary of War to grant a perpetual easement for railroad right of way and a right of way for a public highway over and upon a portion of the military reservation of Fort Sheridan in the State of Illinois.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. WADSWORTH, Mr. NEWBERRY, and Mr. FLETCHER as the conferees on the part of the Senate.

CONTESTED-ELECTION CASE OF CAMPBELL *v.* DOUGHTON.

Mr. LUCE. Mr. Speaker, in behalf of Committee on Elections No. 2, I call up the report of the committee in the election case of Campbell against Doughton, Report No. 882, House Calendar No. 159.

The SPEAKER. The gentleman from Massachusetts calls up a resolution, which the Clerk will report.

The Clerk read as follows:

Resolved, That James I. Campbell was not elected a Representative from the eighth congressional district of the State of North Carolina and is not entitled to a seat herein.

Resolved, That Robert L. Doughton was duly elected a Representative in this Congress from the eighth congressional district of the State of North Carolina and is entitled to retain a seat herein.

Mr. LUCE. Pending the consideration of the report, I ask unanimous consent that debate thereon be limited to 2 hours and 40 minutes; that 80 minutes of this time be in the control of the gentleman from Ohio [Mr. CABLE], and that he be allowed to grant 20 minutes of the 80 minutes to the contestant, Mr. Campbell; that the other 80 minutes be divided as follows: In my own charge, 30 minutes; in charge of the gentleman from Louisiana [Mr. WILSON], 50 minutes, of which time he will yield 20 minutes to the contestee, Mr. Doughton.

The SPEAKER. The gentleman from Massachusetts presents a unanimous-consent request, which the Clerk will report.

The Clerk read as follows:

Mr. LUCE asks unanimous consent to limit general debate to 2 hours and 40 minutes—30 minutes to be controlled by Mr. LUCE; 80 minutes to be controlled by Mr. CABLE, of which 20 minutes is to be given to Mr. Campbell; 50 minutes to be controlled by Mr. WILSON, of which 20 minutes is to be given to Mr. Doughton.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Chair assumes that in that time consent was given that the contestant should address the House for 20 minutes.

Mr. LUCE. In the last election in the eighth congressional district of the State of North Carolina the returns, with conceded corrections, showed a vote of 32,944 for Robert L. Doughton and 31,856 for James I. Campbell, making Doughton's apparent majority 1,088.

The seat is contested on various grounds. There were irregularities to an important degree in numerous particulars. If I may judge from the report of the minority member of the committee, the gentleman from Ohio [Mr. CABLE], the committee has been unanimous in its conclusion that in all but two particulars, namely, the matter of absentee voting and that of the votes cast in two precincts, the contestant has not made out his case. If that should not be wholly accurate, it is certain that eight of the nine members of the committee agreed to such

effect, reaching their conclusion after a perusal of the evidence and having no hesitation in the formation of their judgment.

In view of the fact that the report of the minority member dwells only upon the two matters to which I have referred, there is little occasion to review the other allegations of the contestant. But for the sake of the record at least a few minutes should be taken in setting them forth. They involve some interesting questions, but directly the opposite of those that usually arise in an election case, for the evidence does not indicate that in these irregularities there was enough fraud, enough wrongful intent, enough of criminal practice to call for action. It is the unusual condition of wrongful practices indulged in by common consent, with the consent of the electorate itself with the consent of the leaders of both parties in the district, and to some degree with the consent of the candidates, or, at any rate, without their protest. And this raises the very interesting question of whether the Congress may connive at, may condone the violation not alone of the statutes but of fundamental law by a whole electorate. This was the feature of the case that gave me the most anxiety, for there has never been a time in our day when it was of more importance that obedience to law should be thoroughly observed, emphatically enforced.

These violations of law were chiefly of two classes, violations of two provisions of the constitution of North Carolina as it then stood. This constitution required, in the first place, save for a few exceptions that I need not mention, the payment of poll taxes as a prerequisite for voting. The requirement was in disfavor. At this very election it was taken out of the constitution by the vote of the people of the State. In this district it seems to have been particularly unpopular, and by general agreement, in some cases by formal agreement, it was not enforced. There seems to have been uncertainty in the matter, for after a time, in the course of the campaign, some men changed their minds as to the desirability of enforcing it; but there was nowhere any thorough or adequate enforcement of that provision. This had an incidental feature of consequence, by reason of the fact that a large number of voters were in the Army, either abroad or but recently returned, and the attorney general of the State went so far as to construe the word "infirmity" so as to permit the acceptance of votes from many solders who it was agreed had not paid their taxes. This forced construction, of course, is open to serious question. But in view of the spirit of patriotism inspiring the construction and the general desire of the people that such a construction should prevail, I am not disposed here to do more than to call it to your attention.

Another class of irregularties concerned a provision of the constitution requiring that every voter, with some exceptions, should be able to read and write. Here, too, there was, in some sections of the district at any rate, general agreement that the question should not be raised. If you peruse the huge volume of testimony, you may find delightful sidelights thrown on human nature and may discover plenty of proof of the prevalence in our country still of the doctrine embodied in the query, "What's the Constitution between friends?"

Also stress was laid upon the charge of intimidation by reason of the circulating of a gross libel upon the Republican candidate for President—a libel for which there can be no word of defense, outrageous in the extreme. But surely it can not be contended that because one candidate on a ticket is grossly libeled the votes cast for other candidates on that ticket should be brought into question.

Also there was much testimony in the matter of the conduct of the registrars, who by the law of North Carolina are allowed on all save the four Saturdays prior to the election to travel about the district and register as they see fit. This was wholly permissive, and if these men—as undoubtedly they did in many cases—remembered that they were partisans, there can be found no warrant in law for criticism.

Coming to the irregularities presenting the two issues raised by our friend from Ohio [Mr. CABLE], let me dispose first of the conditions in the precincts of Big Lick and Furr. An hour or two after the polls opened in the morning it began to rain. In one of these precincts it had been planned to hold the voting out of doors. Particularly for the comfort of women desiring to vote the election officials went indoors, using a room not at all adapted to the conduct of the election. Likewise, in the other precinct the room was not adapted to such a use, especially on a cloudy day. Each of these rooms was very dark. At best it would have been difficult to find the names on the poll book, for they had not been properly arranged, and the voting was frequently delayed in trying to find names where large groups began with the same letter.

That was notably the case with the letter "H." Also women were voting for the first time, and we have not yet systematized our records of the names of women, so that much confusion is everywhere caused by lack of insistence upon the use of the given name rather than that of the husband or his initials. These conditions of themselves would have somewhat delayed the voting.

In each case, however, there was further delay by the course of conduct of the crowd outside trying to get in. The testimony has introduced me to a new word—"scrouging." [Laughter.]

A MEMBER. Spell it.

Mr. LUCE. S-c-r-o-u-g-i-n-g.

Mr. HARDY of Texas. Mr. Speaker, will the gentleman yield right there?

Mr. LUCE. Yes.

Mr. HARDY of Texas. That is a word that I learned in my boyhood; also in my babyhood. [Laughter.]

Mr. ROSE. I want to make the same statement as the gentleman from Texas.

Mr. LONGWORTH. I understand that was used in Plymouth Colony. [Laughter.]

Mr. LUCE. Well, "scrouging" is unfamiliar in these days in my part of the country. I find that it describes the action of a confused mass of men in physical contact with each other, engaged in swaying back and forth, with some scrapping, if I may use the word here——

Mr. TEMPLE. That word is familiar, too——

Mr. LUCE. Constituting, if such a thing may be conceived, a peaceful riot.

Now let me give you the language, if I can, of one man who participated in this joyous merriment.

Mr. CHINDBLOM. Mr. Speaker, will the gentleman yield?

Mr. LUCE. Yes.

Mr. CHINDBLOM. Is it a game? Is it planned or does it happen by accident?

Mr. LUCE. In this particular case it is alleged by the contestant that it resulted from conditions which were planned. As a game I should not see attractions in it myself, but they seem to have reveled in this thing all day long. Here is the way one man describes it in replying to the question, Tell how they were crowded:

> Answer. They were packed in; locked arms on one another's shoulders, and locked arms one around the other. Once in awhile the crowd would break and turn wrong outside out. I thought I might get in, but some got to the door facing and turned back on the crowd.

[Laughter.]

These precincts were overwhelmingly Republican, and the crowd was overwhelmingly Republican. A witness, on being asked to explain about it, replied:

> I reckon 50 or 75 crowded all the time. The Republicans would go in and vote and come out and say, "Let's crowd out the damned Democrats."

[Laughter.]

The contention in regard to these precincts is being raised by the Republican contestant, I have no doubt—I am sure—in perfect good faith; but, unfortunately, no small part of the trouble in these precincts was caused by his own friends. There was no testimony to which weight could be given to the effect that once inside the building there was any discrimination, and the testimony does not indicate that outside the building there was such discrimination on the part of the crowd itself as to warrant the conclusion that a purely partisan end was in view. The good nature of the whole proceeding is further shown by the fact that in the forenoon it was agreed to admit all the women, so that they might not have to stand out in the rain, and all the men more than 60 years old; and it is not denied that the women and the men more than 60 years old, regardless of party, had the opportunity to vote. The young men, those under 60—and I put it that way with personal considerations in mind——

Mr. TEMPLE. Gratification——

Mr. LUCE. Yes, gratification, as is suggested—the young men stood out there and enjoyed themselves all day.

Seriously, this was a reprehensible procedure, not to be excused, and most unfortunate. I am quite certain that all the skill was not displayed by the election officers there in handling the crowd or receiving the ballots that should have been displayed; but of the total vote cast in those two precincts about three-fourths was cast, and the vote was cast at the rate of more than one a minute throughout the day. Under those conditions it did not seem to eight of the nine members of your committee that we would be justified in throwing out the whole vote of those two precincts, a vote cast at the rate of more than one a minute, with three-quarters of the registered vote cast.

Furthermore, of the voters excluded there was a percentage composed of Democrats; and it seems almost incredible that

partisans should conspire to attempt to gain advantage by shutting out their own adherents because in their expectation the percentage of their opponents shut out at the same time might be larger than that of their adherents excluded.

Coming next to the question of absentee voting, the testimony shows that a very large number of the absentee votes were cast for the Democratic candidate and but a small proportion for the Republican candidate.

Mr. ROBSION. Will the gentleman yield?

Mr. LUCE. Yes.

Mr. ROBSION. On the point in which the two precincts were involved, did the contestant request that those votes be thrown out in those two precincts?

Mr. LUCE. I understood that the contestant requested that the whole vote of the two precincts be thrown out.

Mr. ROBSION. If they were thrown out, what bearing would it have on the result?

Mr. LUCE. It would not change the result unless in connection with other features of the election.

Mr. CABLE. Will the gentleman yield?

Mr. LUCE. Yes.

Mr. CABLE. Is it not a fact that instead of requesting that the vote of these two Republican precincts be thrown out, the contestant requested that the Republicans and Democrats deprived of voting be counted?

Mr. LUCE. My understanding was that the whole precinct was to be thrown out.

Mr. CABLE. Are not both those precincts overwhelmingly Republican?

Mr. LUCE. They are overwhelmingly Republican.

Mr. CABLE. And the question came up as to whether the contestant would not have the right to count the Republican voters who were standing outside, and who did not get the opportunity to vote.

Mr. LUCE. The question was raised, but I understood that in the minority report the contention was made that the whole precinct should be excluded. However, if I am in error, and it is desired only to give credit for the votes of the men who did not get the chance to vote, that would not change the result unless in connection with gains for the contestant in the more important particular to which I must devote the rest of my time.

The minority report alleges that by reason of the apparent discrepancy in the volume of Republican and Democratic absentee voting fraud must have been perpetrated. On examination of the record it will appear that these absentee votes were chiefly contested on the ground of nonpayment of poll tax or other disqualification, notably that of nonresidence.

This brings up the question of domicile, one of the most difficult subjects in the range of the law. It is a matter of intent, and if you will study the record you will find that in almost no instance was there presented any proof whatever bearing upon the intent of the voter. The allegations of the witnesses were largely opinion or hearsay, mostly unsupported by other witnesses, allegations that would not stand for a moment in any court of justice.

Mr. CABLE. Will the gentleman yield?

Mr. CLOUSE. Will the gentleman yield?

Mr. LUCE. There will be opportunity later. I desire here to close this part of my remarks in order that others may dwell upon these questions in detail. With this review of the general outline of the case, I will reserve the remainder of my time and yield the floor to the gentleman from Ohio [Mr. CABLE].

The SPEAKER pro tempore. The gentleman reserves seven minutes of the time allotted to him. The Chair recognizes the gentleman from Ohio [Mr. CABLE] for one hour.

Mr. CABLE. I yield myself 30 minutes at this time.

The SPEAKER pro tempore. The gentleman is recognized for 30 minutes.

Mr. CABLE. Mr. Speaker and gentlemen of the House, the gentleman who just preceded me has referred to the scrouging in the precincts of Big Lick and Fur. At the outset I want to call the attention of this House to the so-called scrouging in the absentee ballots. The record discloses that of those who voted in person a majority of the votes went to the Republican contestant, but by reason of the overwhelming number of absentee ballots the contestee was seated.

The number of Democratic absentee ballots is 1,596. The contestee obtained the benefit of these, and only by reason of this large number of ballots was he given a majority of the votes cast. On the other hand, contrasting the 1,596 absentee Democrats, I call the attention of the House to the fact that there were only 201 Republican absentee ballots cast for the contestant.

Mr. CLOUSE. Will the gentleman yield right there for a question?

Mr. CABLE. I yield to the gentleman from Tennessee.

Mr. CLOUSE. What per cent of the absentee vote had paid their poll tax, which was a condition precedent to the right to vote?

Mr. CABLE. I do not raise that question at all in this case. There were several issues raised. One was the poll tax.

Mr. CLOUSE. There was one other question I wanted to ask the gentleman in order to get it clearly in my mind. Did the majority report of this committee recognize the validity of an agreement between individual leaders of the parties or factions to eliminate the condition of the law that a voter must have paid his poll tax? And by voting for the majority report would this House approve that action of waiving a specific statute in order to give women and children or individuals not qualified under the law the right to vote?

Mr. CABLE. I do not think any children voted, but there were dead people and insane people who voted.

Mr. CLOUSE. I understood the chairman of the committee to say that a large number voted without having paid their poll tax.

Mr. CABLE. They did; and that question was raised and it was thrashed out, and I think it was proved that there were 200 or 300 who voted without payment of their poll tax. But the soldiers——

Mr. CLOUSE. What effect would that have had on the final result of the election if they had been eliminated?

Mr. CABLE. There is only one thing that could have an effect on the final result of this election, and that is the absentee vote. I am here, and have filed a minority report asking that all absentee votes be thrown out and the Republican contestant seated. The question of the poll tax, while it might gain a few, if they proved every one of them it would not seat the contestant; but if we have shown that the absentee ballots were corrupt and illegal, as I hope to show to you, then the Republican would be seated by 300 or 400.

Mr. CLOUSE. Go ahead.

Mr. CABLE. The State of North Carolina is famous for a great many things. It is famous because it produces all the varieties of agricultural products produced in any State of the Union, yielding the agricultural products of both North and South. It is the only State that fills every blank of the census of agricultural products. It is famous because in that State was established the second State university in this country. It is famous because Uncle JOE CANNON was born in that State. [Applause.] It is famous because at least one President was born there. It is more famous and always will be, unless they change the practice, for its election machinery. The senior Senator from North Carolina is reported to have said that by means of their election machinery in North Carolina they gain at least 40,000 votes, and I do not doubt it a bit. In the eighth congressional district alone they gain the difference between 1,596 and 201 on the absentee ballot.

North Carolina is famous for another thing. It is the only State in the Union that does not have the Australian ballot system in voting, except one county, and that county is called Buncombe. I do not know why they have the Australian ballot system in Buncombe County, but they do, and that is the only one in which they do.

The votes of those who voted in person for the contestee, Doughton, numbered 31,338, while the votes cast in person for Campbell, the contestant, numbered 31,655. That gives Campbell a majority of 317, if you throw out the absentee ballots.

Then, in addition, there are two precincts, Fur and Big Lake, where the Republicans and Democrats entered into a conspiracy to deprive the Republicans of their opportunity to vote. In some precincts 1,500 or 1,600 Democrats voted, but in these two precincts, where the Republican vote was heavy, they deprived 254 Republicans of their vote and only 24 Democrats. In other words, they crowded around there; the election officials took so long to find the names that when the polls closed there were standing outside ready to vote, according to the record, 254 Republicans and 24 Democrats. The election machinery down there is not excelled by any other in the United States, so far as keeping Democrats in power. They have a State election committee and the majority is Democratic; they have a county committee and the majority is Democratic; they have a local committee, one Republican and one Democrat. But in every voting precinct they have what they call a registrar, and in every precinct except one he is a Democrat. In one a Republican.

Mr. CHINDBLOM. What does the gentleman mean by a committee?

Mr. CABLE. The board of election, State and county. The election officials.

Mr. LONDON. Has the gentleman exhausted the subject of the absentee vote?

Mr. CABLE. Oh, no; I have not started on that yet. This third man, who is a Democrat except in one county, has complete charge of the election machinery. They do not register down there except once, and when your name gets on the registration book it is on there sometimes, as in this case, after you are dead. Once registered always registered. They bring the registration forward every two years, and the Democratic registrar brings up the old list, and if he knows anyone who has moved out of it, or is dead, he is supposed to strike the name off the list, but sometimes he does not carry that out.

In this election district the Democratic registrar prior to an election stays at the voting place four Saturdays. The rest of the time he can go over the precinct registering voters. The Republicans under the law can not make a copy of the registration after it is in the hands of the registrar. Here is the way the Democrats feel about it. In the letter on page 265 of the record, entitled "Exhibit B," you will find that it says:

EXHIBIT B.

ASHE COUNTY DEMOCRATIC EXECUTIVE COMMITTEE.
Jefferson, N. C., October 26, 1920.

DEAR SIR: We lost the last election by not getting our voters out. Get them out this time and win. You should make a list of every voter in your township who is unable to get to the election and see that they vote by mail. I would also suggest that you make a list from the register books of every Democratic voter in the township and have some one at the polls to check each one's name as they vote. In this way you can tell at any time who has not voted, and no one should be overlooked.

In case the Republicans attempt to copy the register books this next Saturday, you should object. The registrars are honest men and the register books speak for themselves. The Republicans have a right to inspect but not to copy.

All the tickets to be voted are now ready for distribution, and you should send some one for them at once, as they can not be mailed.

Let every Democrat work this next week and victory is ours.

Yours truly,

W. B. AUSTIN.

Now, they have an absentee election law down there, and it is in line with the balance of the election machinery. If I want to go out of town or out of the voting precinct the day of election, I apply to the chairman of the county board, who is a Democrat. No record is kept of my application. He gives me one or two forms of ballot or a certificate. Right here I want to explain that they do not have the Australian ballot system there. To vote in person you go to the voting place—they have two tables outside—and if I am a Republican I walk up to the Republican table and take up the ballot and put it in the box; if I am a Democrat, I go to the Democratic table and get a Democratic ballot. If I am going to be absent, I get one of two forms of ballots or a certificate. Here is a blue certificate to be signed by the absentee voter:

CERTIFICATE TO BE SIGNED BY ABSENT VOTER.

STATE OF NORTH CAROLINA,
Post office, Mount Pleasant; date, October 23, 1920.

To the registrar and judges of election, Bradshaw precinct:

I, G. F. Cline, do hereby certify that I am a duly qualified elector in Bradshaw precinct, Rowan County, N. C., and I inclose herewith ballot or ballots which I wish to vote in the election to be held November 2, 1920.

(Signed) G. F. CLINE.

Witness:
GEO. F. MCALLISTER.

Now, the ballots which the Democratic chairman has had handed me, or the certificate calling for a straight vote, I mail to the Democratic registrar, who keeps them until election day—3 o'clock on election day. The Republicans do not know who have voted absentee up to that time, as no public record is kept. At 3 o'clock he reaches into his pocket, pulls out the ballots, and they are counted. That is the first time the Republicans know who has voted absentee.

Now, there is another form of ballot down there, a certificate to be signed by the absent elector. Here is one:

CERTIFICATE TO BE SIGNED BY ABSENT ELECTORS.

SCOTTS, N. C. (State),
October 29, 1920 (Date).

To the registrar and judges of election, Gold Hill precinct:

I hereby cast my vote for each nominee of the Republican Party to be voted for at the election to be held on November 2, 1920.

If the absentee voter is Republican and the certificate calls for a Republican ticket, the registrar goes to the Republican table, takes up the ballots for the man, and puts them in the boxes. There is no way of identifying them; they are destroyed after the vote is counted. This was the law which was passed in 1917. It was passed for a good reason, and that was to permit the soldiers to vote by absentee; but in 1919 it was amended, and the amendment specifically provides that these certificates shall be retained. The law in part says:

Absent voter may sign name on ballot; ballots and certificates to be kept. In voting by the method prescribed in this article the voter may, at his election, sign, or cause to be signed, his name upon the margin or back of his ballot or ballots, for the purpose of identification. The ballot or ballots so voted, together with the accompanying certificates, shall be returned in a sealed envelope by the registrar and poll holders, with their certificates of the results of the election, and kept for six months, or, in the case of contest in the courts, until the results are finally determined.

Now, the law was recodified and in the recodification they omitted a part of it. The act specifically stated that they had no right to change any part of it, and only the part of the law was repealed that was in conflict with the consolidated statute. Whether they had the right under the law or not to destroy the evidence of this, they did do it.

A commission was appointed to consolidate the North Carolina laws, but the commission was specifically denied the authority to change any of the existing laws. Section 4a, above quoted, requiring that all certificates of absentees should be preserved for six months, because a law on March 11 and on the day previous the legislature specifically provided in part that the commissioners should complete and perfect the consolidated statutes and "they are hereby authorized to change the number of sections, transfer sections, chapters, and subdivisions of chapters, and make such other corrections which do not change the law as may be deemed expedient."

Section 5966 of the Consolidated Statutes was written to carry into effect section 4a of the act of 1919, and to properly construe the meaning of the Consolidated Statute it is necessary to carry into it the intent of the legislature when it passed section 4a. Section 5966 of the Consolidated Statutes is as follows:

Absent voter may sign name on ballot; ballots and certificates to be kept. In voting by the method prescribed in this article the voter may, at his election, sign, or cause to be signed, his name upon the margin or back of his ballot or ballots, for the purpose of identification. The ballot or ballots so voted, together with the accompanying certificates, shall be returned in a sealed envelope by the registrar and poll holders, with their certificates of the results of the election, and kept for six months, or, in the case of contest in the courts, until the results are finally determined.

The Consolidated Statutes went into full force and effect from and after August 1, 1920. The election in question occurred that fall. The law concerning the Consolidated Statutes appears in chapter 135, section 8100 and following. Section 8101 deals with "Effect as to repealing other statutes," and is as follows:

All public and general statistics not contained in the Consolidated Statutes are hereby repealed, with the exceptions and limitations hereinafter mentioned. No statute or law which has been heretofore repealed shall be revived by the repeal contained in any of the sections of the Consolidated Statutes. All public and general statutes passed at the present session of the general assembly shall be deemed to repeal any conflicting provisions contained in the Consolidated Statutes.

It should be noted that public and general statutes are repealed only when they conflict with the provisions of the Consolidated Statutes. There is no conflict between paragraph 4a, requiring the preservation of the certificates and identified ballots for six months, and section 5966 herein cited, formerly section 4a.

The courts have never passed upon the question as to whether or not it is legal to destroy the absentee certificates prior to the six months' period of time. There is no law authorizing the destruction of the general election ballots. No matter how a court should construe this provision, the record clearly shows that the destruction of the certificates was a part of the conspiracy whereby many illegal votes were cast.

Now, here is what was accomplished by destroying the certificates that should have shown the residence or temporary address of the voter. In Iredell County the vote was 523 to 47. In Rowan County, Democratic absentee 518, Republican 48. In the next county, Stanly, the vote was 94 to 23. In Ashe County the vote was 186 to 30, and in Caldwell County the vote was 275 to 61. That makes a total of 1,596 Democratic absentee votes to 201 Republican. The only way that they could prove the number was by asking the Republican or the Democratic officials what the absentee vote was in that particular precinct.

Mr. KEARNS. Mr. Speaker, will the gentleman yield?

Mr. CABLE. Yes.

Mr. KEARNS. Is there any record of the number of ballots that are printed for election? Are they numbered, say, as from one to a thousand?

Mr. CABLE. No. They evidently print them by the bale, because they have no record at all. For example, if you are a candidate for Congress, it simply says, "For Representative in Congress," then gives the name, either Mr. Doughton or Mr. Campbell, and that is all there is on the slip.

Mr. KEARNS. The voter who makes application for an absent voter's ballot makes no record of his application?

Mr. CABLE. That is one of the troubles with the election law down there. The Democrats are in power, and they keep no record of who is going to vote and the Republicans do not know about it until 3 o'clock.

Mr. KEARNS. Then this election official puts his hand in his pocket and pulls out a bunch of tickets?

Mr. CABLE. The absentee ballots are sent to the registrars of the various precincts in an envelope like this.

Mr. KEARNS. And there is nothing in the law to prevent a dishonest member of an election board from putting fraudulent votes in his pocket and at 3 o'clock pulling them out and giving them to the election officials?

Mr. CABLE. They have registration; but if a man moved, say five or six years before, nobody can prove that he has gone, and they count the ballots just the same.

Mr. LUCE. Mr. Speaker, will the gentleman yield?

Mr. CABLE. Yes.

Mr. LUCE. I think the gentleman from Ohio [Mr. KEARNS] does not understand that these ballots and certificates are in envelopes which are opened at the time the ballots are deposited.

Mr. KEARNS. But an election official could take that ballot and put it in an envelope and seal it.

Mr. LUCE. Of course he can; but there is an official of the other party at hand.

Mr. KEARNS. I understood the gentleman from Ohio [Mr. CABLE] to make the statement that no Republican could know until 3 o'clock of that day who had made application.

Mr. LUCE. When the envelopes are opened there are two Democrats and one Republican opening them.

Mr. KEARNS. But prior to that a dishonest Democratic official could put as many as he wanted in the envelope.

Mr. LUCE. If he was willing to commit a forgery; yes.

Mr. KEARNS. I assume from what the gentleman from Ohio said that one could find somebody down there who would commit the forgery.

Mr. GAHN. Mr. Speaker, will the gentleman yield?

Mr. CABLE. Yes.

Mr. GAHN. Will the gentleman explain how, if all these absentee votes are thrown out, it would change the result of the election?

Mr. CABLE. Yes. The people who went to the polls and voted in person cast more motes for Mr. Campbell, the contestant, than for Mr. Doughton, the contestee. There is a difference of 317. In other words, Mr. Campbell received 31,655, and Mr. Doughton 31,338, or a majority of 317 for Mr. Campbell, if the absentee votes are thrown out.

Mr. KEARNS. Mr. Speaker, will the gentleman yield again?

Mr. CABLE. Yes.

Mr. KEARNS. The gentleman from Pennsylvania [Mr. TEMPLE] has just suggested something to me, and I want to ask a question of the gentleman from Ohio. Take the election officer who has in his possession all of the absentee votes. He can suspect those who have voted Republican and those who have voted the Democratic ticket. Could he withhold some of those ballots, destroy them, not hand them over to the election officials, and if he did that, would there be any way of keeping tab on him at all?

Mr. CABLE. The gentleman is correct. When I apply for my absentee ballot, I go to the Democratic chairman. There is no record of my application. There is no record of sending out the certificate and the ballots. There is no record kept by the Democratic registrar of the ballots he receives in the envelopes similar to this, and there is no record at all until he comes in on election day at 3 o'clock and pulls them out of his pocket and they open the envelopes and proceed to count them.

Mr. KEARNS. Are all of these registrars of election in that State Democrats?

Mr. CABLE. I do not know about the State, but in this district all of them but one are.

Mr. LUCE. Mr. Speaker, the gentleman does not mean all election officials, all judges of election are Democrats.

Mr. CABLE. I did not say that. I said all registrars.

Mr. LUCE. While I am on my feet, may I ask the gentleman how the testimony shows the absentee votes to be divided between the two candidates, and how he knows how the absentee voters voted?

Mr. CABLE. Because in every particular case the witness testified to that effect. The record shows in each particular precinct whether he was a Democrat or a Republican, and in a good many cases they had to go to a hostile Democratic official to get the vote and the number of it.

Mr. RAKER. Mr. Speaker, will the gentleman yield?

Mr. CABLE. Yes.

Mr. RAKER. On the matter of the absentee vote, at 3 o'clock the election officer takes from his pocket in sealed envelopes the number of absentee votes that have come to him as such officer. Is that correct?

Mr. CABLE. Correct.

Mr. RAKER. Both Democratic and Republican votes?

Mr. CABLE. Yes, sir; those all go to the registrar.

Mr. RAKER. The same man?

Mr. CABLE. Yes, sir.

Mr. RAKER. Is there any contention that these envelopes with ballots and certificates in them are fraudulently sent to the registrar or that the registrar fraudulently secured them?

Mr. CABLE. Yes, sir. I contend the record shows that absentee ballots were cast on behalf of contestee Doughton, in part, as follows: In the name of the dead; the insane; without the knowledge or consent of those who did not vote; a second absentee ballot without knowledge or consent of those who had already voted; for and by many nonresidents of the State; for and by many who had not paid their poll tax, as required by law; on forged certificates.

By destroying or secreting the absentee certificates and marked ballots it was impossible for contestant Campbell to obtain or to trace and discover the identity and eligibility of the absentee voter in every case; that is, from the certificate itself. Contestant, however, by means of witnesses, introduced evidence showing that votes were cast as above outlined.

To be a qualified elector in North Carolina section 5937, in part, provides:

> The residence of a married man shall be where his family resides, and that of a single man where he sleeps.

Notwithstanding this provision of the law, evidence was introduced by contestant showing that many absentee ballots were cast in the name of actual nonresidents of the voting precincts and even the State; such absentees were living in Ohio, Illinois, Kentucky, Georgia, California, and many other States of the Union, sometimes for 10 or 12 years.

Mr. CROWTHER. Mr. Speaker, this is a very important question, and I think we ought to have an audience, and I make the point of order that there is no quorum present.

The SPEAKER. There is no quorum present.

Mr. BEGG. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

Andrew, Mass.	Fairchild	Kincheloe	Parker, N. Y.
Ansorge	Fairfield	Kindred	Patterson, N. J.
Arentz	Favrot	Kinkaid	Perkins
Atkeson	Fenn	Kirkpatrick	Perlman

Voigt	Ward, N. Y.	Wingo	Yates
Volk	Wason	Wise	Zihlman
Walsh	Watson	Wood, Ind.	

The SPEAKER. Two hundred and seventeen Members have answered to their names; a quorum is present.

Mr. CROWTHER. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. The gentleman from New York moves that the House do now adjourn.

The question was taken, and the Speaker announced the noes appeared to have it.

On a division (demanded by Mr. CROWTHER) there were—ayes 30, noes 79.

So the House refused to adjourn.

Mr. LUCE. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

Mr. CROWTHER. Mr. Speaker, I am not satisfied with the vote. It does not show a quorum, and I make the point of order that there is no quorum present.

The SPEAKER. It does not take a quorum to adjourn. The gentleman from Ohio had the floor.

Mr. CABLE. Mr. Speaker and gentlemen, with reference to 1,596 votes absentee Democratic and 201 Republicans, I would like to call the attention of the House to the fact that this number was obtained by putting the officials of the various precincts on the witness stand. In 27 precincts those figures were obtained from Democratic hostile witnesses. In 20 cases the figures were obtained from Republicans and in 5 precincts the figures were obtained from both. In a great many precincts the absentees were put at the end of the list on the ballot in alphabetical order, and in that way the number could be ascertained. I first want to call the attention of the House to the case of a man named Charles T. Bostian. A vote was cast for Charles D. Bostian. The post office given on the envelope and inclosing the certificate and ballot was Morganton, N. C.; the postmark where it was mailed was Winston-Salem railway post office, which does not reach or touch Morganton, N. C., where Charles was confined in an insane asylum.

Mr. H. S. Bostian testified, on page 466, as follows:

Q. What man voted there that day, absentee voter, that was in the insane asylum at Morganton?—A. Mr. Charles D. Bostian.
Q. How did he vote?—A. Democratic ticket.
Q. Was that vote mailed in?—A. Yes, sir; I suppose so. The registrar had it.
Q. Have you got the envelope that the vote came in?—A. Yes, sir.
Q. Will you please exhibit it?—A. [Witness produces envelope.]
Q. Where is Morganton?—A. In western North Carolina; on the main line to Asheville.
Q. From Salisbury?—A. To Asheville; yes, sir.
Q. Does the Winston-Salem Railroad go toward Morganton?—A. I guess not. I think the terminus of that division is Pittsboro.
Q. From where?—A. Greensboro; by Winston-Salem and Wilkesboro.
Q. Is that the envelope that his vote came in?—A. Yes, sir. [Contestant introduces envelope, which is marked "Contestant's Exhibit 22."]
Q. Read what the postmark is on that.—A. "Winston-Salem railway post office."

This shows that a vote was cast for a man who under the testimony had no right to vote. In my opinion the envelope contained a forged Democratic certificate and Democratic votes were cast pursuant thereto. To conceal the identity of the forger the envelope was mailed in another part of the State. Later I expect to show numerous similar transactions.

Mr. GAHN. Mr. Speaker, I make a point of order that there is no quorum present.

The SPEAKER pro tempore (Mr. HICKS). The Chair will count. [After counting.] It is evident there is no quorum present.

Mr. GAHN. Mr. Speaker, I move that the House do now adjourn.

The question was taken, and the Speaker pro tempore announced that the noes appeared to have it.

Mr. GAHN. Mr. Speaker, I demand a division.

The House divided, and there were—ayes 35, noes 69.

So the House refused to adjourn.

Mr. LUCE. Mr. Speaker, I move a call of the House.

The SPEAKER pro tempore. The gentleman from Massachusetts moves a call of the House.

Mr. LUCE. Mr. Speaker, I rise to a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. LUCE. I understood before the motion to adjourn had been made that the Chair had decided that there was no quorum present.

The SPEAKER pro tempore. The Chair does not hear the gentleman.

Mr. LUCE. The Chair announced that no quorum was present, and in view of the fact that no quorum is present I move that the Sergeant at Arms be instructed to secure a quorum, and I move a call of the House.

The question was taken, and the Speaker pro tempore announced the ayes seemed to have it.

On a division (demanded by Mr. BEGG and Mr. LINEBERGER) there were—ayes 87, noes 18.

So the call of the House was ordered.

Mr. KEARNS. Mr. Speaker, I move that the House do now adjourn.

Mr. RAMSEYER. Mr. Speaker, I make the point of order that that is dilatory.

The SPEAKER pro tempore. The Chair sustains the point of order. The Clerk will call the roll.

The roll was called, and the following Members failed to answer to their names:

Anderson	Edmonds	Kinkaid	Ransley
Andrew, Mass.	Evans	Kirkpatrick	Reavis
Ansorge	Fairchild	Kitchin	Reber
Anthony	Fairfield	Kline, N. Y.	Reed, N. Y.

Driver	Kiess	Radcliffe	
Dunbar	Kincheloe	Rainey, Ala.	
Dyer	Kindred	Rainey, Ill.	

Mr. KEARNS. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman rise?

Mr. KEARNS. To move that we adjourn.

The SPEAKER pro tempore. The Chair feels that that motion is not in order until an announcement has been made in regard to the roll call, which has not yet been completed.

Mr. KEARNS. Mr. Speaker, I understand the roll call has been completed.

The SPEAKER pro tempore. No; the roll call has not yet been completed.

Mr. BEGG. A point of order, Mr. Speaker.

The SPEAKER pro tempore. The gentleman from Ohio will state it.

Mr. BEGG. Is it not entirely possible to interrupt a roll call with a motion to adjourn?

The SPEAKER pro tempore. The Chair would think that until the roll call is completed and announcement made it would not be proper. The Chair will refer the gentleman to volume 5 of Hinds' Precedents, paragraph 6053, where it was so held.

Mr. KEARNS. Mr. Speaker——

The SPEAKER pro tempore. Two hundred and five Members are present; not a quorum.

Mr. LUCE rose.

Mr. KEARNS. Mr. Speaker——

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. LUCE] is recognized.

Mr. KEARNS. Mr. Speaker, I move that the House do now adjourn.

The question was taken, and the Speaker pro tempore announced that the ayes seemed to have it.

Mr. MONDELL. Division, Mr. Speaker.

The House divided; and there were—ayes 39, noes 107.

So the motion was rejected.

Mr. TINCHER. Mr. Speaker, I ask for the yeas and nays.

Mr. BEGG. Mr. Speaker, I make the point of order there is no quorum present. I object to the vote.

The SPEAKER pro tempore. The Chair will state to the gentleman from Ohio that it does not require a quorum on a motion for the adjournment of the House.

Mr. BLANTON. When the House decides not to adjourn a quorum call is in order.

The SPEAKER pro tempore. The gentleman made the point that there was no quorum present.

Mr. BEGG. I object to the vote on that account.

Mr. BLACK. Mr. Speaker, the gentleman has the right to ask for the yeas and nays on the motion to adjourn.

The SPEAKER pro tempore. Undoubtedly, and the Chair recognizes that right. The gentleman from Kansas asks for the yeas and nays. Those who favor taking the vote by yeas and nays will rise. [After counting.] Not a sufficient number, and the yea-and-nay vote is refused.

Mr. BLANTON. Mr. Speaker, I make the point of order that the House having on a vote decided not to adjourn, the point of order raised by the gentleman from Ohio [Mr. BEGG] is in order; that there was no quorum on that vote, and he is entitled to a roll call after this no-quorum point.

The SPEAKER pro tempore. The Chair will state his views: On the motion to adjourn, the vote disclosed the absence of a quorum and the gentleman from Ohio [Mr. BEGG] made the point of order that there was no quorum present and objected to the vote on that ground. Under ordinary circumstances such a situation would have produced an automatic roll call, but the Chair is of the opinion that the automatic roll call was introduced into our legislative procedure for the purpose of expediting, not hindering, public business. As the roll has just been called a repetition of it would delay procedure. The Chair is also of the opinion that in order to put the automatic roll call into operation, some legislative proposition—not merely an adjournment—should be under consideration. The Chair overrules the point of order.

Does the gentleman from Massachusetts [Mr. LUCE] make a motion?

Mr. LUCE. Mr. Speaker, I move to dispense with further business under the call.

Mr. BEGG. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER resumed the chair.

Mr. MONDELL. Mr. Speaker, I move that the roll of absentees be called for excuses for absence.

The SPEAKER. The Clerk will call the list of the absentees.

The Clerk called the list of absentees.

The SPEAKER. Two hundred and twenty-three Members are present.

Mr. MOORE of Virginia. Mr. Speaker, my colleague, Mr. BLAND of Virginia, is unable to be present on account of sickness.

Mr. CRISP. Mr. Speaker, I ask leave of absence for my colleague, Judge BRAND, who is sick.

Mr. OLDFIELD. Mr. Speaker, I desire to announce the illness of my colleagues, Judge DRIVER and Mr. TAYLOR of Arkansas.

Mr. VAILE. Mr. Speaker, if leave of absence has not already been granted to my colleague, Mr. TAYLOR of Colorado, I ask leave of absence for him.

The SPEAKER. Without objection, the request of the gentleman from Colorado will be granted.

There was no objection.

Mr. OLIVER. Mr. Speaker, I think my colleague, Mr. BANKHEAD, has asked for leave of absence. He has had to leave for home this morning.

Mr. POU. Mr. Speaker, I would like to announce the illness of my colleague, Mr. CLAUDE KITCHIN, who can not be here.

The SPEAKER. Two hundred and twenty-three Members have answered to their names. A quorum is present.

Mr. GERNERD. Mr. Speaker, I ask for leave of absence until next Friday, on account of important business.

The SPEAKER. The gentleman from Pennsylvania asks for leave of absence until next Friday, on account of important bus ness. Is there objection?

There was no objection.

Mr. MONDELL. I move that further proceedings under the call be suspended.

The SPEAKER. The gentleman from Wyoming moves that further proceedings under the call be suspended. The question is on agreeing to that motion.

The motion was agreed to.

Mr. CABLE. Mr. Speaker, I reserve the balance of my time, and I yield one minute to the gentleman from Ohio [Mr. MORGAN].

The SPEAKER. The gentleman from Ohio is recognized for one minute.

Mr. MORGAN. Mr. Speaker, the people of the country are very greatly interested in the protection of the health and educational development of children employed in industry. The press of the country is reflecting the sentiment of the people in this regard. A number of prominent organizations are going on record in favor of the pending Fitzgerald constitutional amendment, and I hold in my hand a resolution that was adopted by Columbia Typographical Union, No. 101, of Washington, D. C., which I desire unanimous consent to print in the RECORD.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD for the purpose indicated. Is there objection?

There was no objection.

Following are the resolutions referred to:

Resolutions adopted by Columbia Typographical Union, No. 101, at its regular monthly meeting held May 21, 1922.

Whereas Congress has on several occasions passed laws the intent of which were to prohibit the employment of young children in the cotton mills, mines, manufacturing establishments, and sweatshops of the country, and

Whereas such employment endangers their health, lives, and morals, is a disgrace to our Christian civilization, a flagrant injustice to the children, and an infamous crime against humanity and the welfare of the Nation, and

Whereas the Supreme Court has declared these several laws unconstitutional as an infringement of the rights of the States, and

Whereas Senator JOHNSON, of California, and Representative FITZGERALD, of Ohio, have introduced joint resolutions (S. J. Res. 200 and H. J. Res. 327) proposing an amendment to the Constitution of the United States to give Congress the power to regulate or prohibit throughout the United States the employment of children under 18 years of age; Therefore be it

Resolved, That it is the sense of Columbia Typographical Union, No. 101, that Congress should pass one of the proposed amendments during the present session, that the States should promptly ratify it, and thereby remove this horrible exploitation of innocent and helpless children.

That this resolution expresses the predominant sentiment of the country it seems to me there is no question. From the recent Supreme Court decision declaring the child-labor law unconstitutional, nothing remains but a constitutional amendment which will empower Congress to pass a child-labor law.

Hardly could there be found a subject closer to the hearts of the people and particularly to the mothers of this country than the enactment of a child-labor law which will regulate working hours and conditions in a manner that will protect the health and permit the educational development of children employed in industry.

I believe that legislators who preach American standards and ideals and who have promoted legislation for the regulation of interstate commerce in the interest of industrial welfare, can not fail, in the interest of humanitarianism and the future welfare of our country, to give such benefits to children as will protect our country against the destructive forces which are, through social, industrial, and governmental disturbances, tearing Russia and certain European countries asunder. Such conditions always follow undeveloped, unsound bodies and dwarfed intellects.

Labor to excess produces fatigue. By fatigue the physical powers of children are so weakened as to increase susceptibility to disease, immorality, and crime. Excessive work of children of tender years in many cases results in unsound bodies and undeveloped intellects.

If our system of Government is ever destroyed it will be from causes within and not from forces without. Oppression and greed must not be tolerated at the expense of the health and educational opportunities of future generations. This country must be maintained the land of equal opportunity.

Statistics reveal that in 1910 there were 1,900,225 children between the ages of 10 and 15 years employed in the United States on full time. They also reveal that there were 5,515,163 illiterates, of whom 1,650,361 were of foreign-born parentage. These statistics evidence the necessity of legislation which will overcome this condition. We have immigration laws requiring certain tests as to qualifications for entry in order that we may protect, as far as possible, our country against illiterate immigrants, and at the same time many States have failed to provide laws which would develop the standards required of

immigrants and against the destructive forces that naturally follow illiteracy and a weakened population.

We can not longer tolerate robbing children of their vitality, coining it into money and putting it into the pockets of those who are exploiting and devitalizing them in sweatshops, mills, and factories, where duties are imposed beyond their physical endurance. What argument can these men advance? There is but one—that it means money to them.

It is exceedingly fortunate that there is a growing sentiment in the States that have adopted child labor laws in favor of strengthening such laws in a manner consistent with the welfare of the children employed and the perpetuity of the principles upon which our Government was formed.

A large manufacturer in Ohio, who has made a careful study of the operation and benefits derived from child labor laws, solicited me to cooperate in the promotion of a Federal law similar to the Ohio law. The Ohio law provides that no boy under 15 years and no girl under 16 years can be continuously employed, and a school certificate for all boys under 16 and girls under 18 is required. They can not be employed for more than 8 hours in 1 day or 48 hours in 1 week, nor before 7 a. m. nor after 6 p. m.

The American Bar Association some years ago recommended the adoption of a uniform child labor law by the various States. The Fitzgerald proposed constitutional amendment is in accordance with this suggestion and I believe it will be adopted and meet with universal approval.

Mr. MORGAN. I also ask that I be further allowed to extend my remarks in the RECORD on the subject.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

Mr. CABLE. Mr. Speaker, I have reserved the balance of my time.

The SPEAKER. The gentleman from Ohio reserves the balance of his time.

Mr. LUCE. Mr. Speaker, will the gentleman from Louisiana [Mr. WILSON] please use his time?

Mr. WILSON. Mr. Speaker and gentlemen of the House, in my judgment there is not in many respects any more important business that comes before the House than the consideration and decision of an election contest. The law makes the House of Representatives the judge of the election and qualification of its Members; and, while this is a legislative operation, it is really a judicial proceeding, and a very serious obligation rests upon a Committee on Elections in presenting one of these cases to the House, because in most instances, just as it has happened in this case, there is a vast volume of testimony. In this record there are more than 1,600 pages that the Members of the House have not an opportunity to read, and they must take the record and the findings thereon as presented to them by the Committee on Elections.

I believe, if I may have the attention of the House for a few moments, I can convince you that the chairman of this committee [Mr. LUCE] has presented to this House a proper decision of this election contest. As was stated to you, when this case came before this committee a great many questions were involved, all of which have been abandoned except two. On the question of poll tax a vast volume of testimony was taken, and the committee was convinced that it made no difference in the result of the election, and so was the contestant convinced, and that was abandoned. The feature of registration was also abandoned, and the intimidation of voters was abandoned, and, as my good friend from Ohio [Mr. CABLE] told you a few moments ago, the whole thing depends upon the proper consideration and disposition of the absentee vote.

Now, the gentleman from Ohio [Mr. CABLE] would lead you to believe that the election laws of the State of North Carolina are unfair. I think it is quite impossible to find any State which has a fairer election law—one that would lead to more equitable results in an election where the people are divided into opposite parties—than that which exists in the State of North Carolina. Of course, we all know that the dominant party in any State is going to keep control of the election machinery when it is in power.

Mr. CLOUSE. Mr. Speaker, will the gentleman yield?

Mr. WILSON. I can not yield now.

The election law of the State of North Carolina is simply this: The Governor of the State appoints a State board of election officers of five members. Of this board three are of the majority party and two of the minority. If North Carolina should have a Republican governor, three of the board would be Republicans and two would be Democrats. As she has a Democratic governor, of course, three of the board are Democrats and two are Republicans.

Then that State board appoints county boards of election, each consisting of two members of the dominant party and one of the minority party. That would be true, no matter which party is in power. This county board selects officers in the various precincts throughout the State. One of those is the registrar of voters, naturally of the dominant party. One other is of the dominant party and one of the minority party. This Republican judge of elections is not selected by a Democratic majority of the board. The law makes it obligatory to select him on the recommendation of the chairman of the Republican committee of that county. So that in every phase of the election, from the beginning with the State board down to the place where the votes are polled and finally counted, each party has representation.

Now, when the registration is completed in that State, two opportunities are offered for challenge. The law sets a challenge date after the registration is completed and the books are thrown open to everybody. That day is fixed on Saturday, when everybody comes to town; so that, my friends, there is an opportunity afforded to challenge the public register of absentee voters and other voters whose names should not be on said list.

Another opportunity for challenge is on the day of the election, when the voter appears to deposit his ballot in person or when the absentee vote is opened. So in this election under the laws of that State the minority party has had representation at every step and every stage of the proceedings, with fair opportunity to challenge any name on the registration list. This record and the evidence in this case will show that in the entire district very few challenges were made by either party, and in only one precinct in the nine counties comprising the district did the Republican judge of elections fail to sign and certify to the correctness of the results as to Congressman.

Mr. CHINDBLOM. Will the gentleman yield for a question?

Mr. WILSON. Yes.

Mr. CHINDBLOM. Does the law provide for the presence of a challenger or a representative of each party on the election day?

Mr. WILSON. Yes; the law provides that when the books are thrown open on this Saturday set aside as challenge day and known to all the people as challenge day, any man may challenge any name.

Mr. CHINDBLOM. I do not mean on Saturday. I mean on election day.

Mr. WILSON. On election day; yes. A full and free opportunity is offered to either party for challenge on either day.

Mr. CAMPBELL of Kansas. Will the gentleman yield for a question?

Mr. WILSON. Yes.

Mr. CAMPBELL of Kansas. I want to find out, if I may, was there fraud charged in respect to these absentee voters in this case; and if so, was there any fraud proved?

Mr. WILSON. I am coming to the absentee vote, because I understand from Mr. CABLE that he bases his whole case on that.

Mr. CAMPBELL of Kansas. I understand the question hinges on that.

Mr. WILSON. I doubt if you could show a dozen votes altogether where as a legal proposition the voter was not qualified. The committee failed to find any considerable number.

Mr. BOX. That is of the absentee voters.

Mr. WILSON. Of the absentee voters. Now, my friend from Ohio [Mr. CABLE] says the whole thing hinges on that feature and that the entire absentee vote should be set aside, and that if you do that Doctor Campbell will have a majority of something over 317.

Mr. CAMPBELL of Kansas. Set aside on account of fraud, or for what reason?

Mr. WILSON. The minority views of the gentleman from Ohio [Mr. CABLE] say they should be set aside for the reason that the truth can not be deduced in relation to the absentee vote. That is what he says and that is what his report says. Now, when a man comes to this House sitting as a jury with a proposition like that, contending that there is a large percentage of the votes that should be cast out and thereby the result of the election be changed, the obligation, of course, is upon him to convince the House that that is true. In his statement he says that the absentee vote should be disregarded. I am sure the House understands that. In its minority views he goes on and gives the number of votes, and says:

> But the absentee votes included above are "so tainted with fraud that the truth can not be deductible therefrom." The ratio of the absentee votes of Doughton and Campbell tell their own story, 1,596

to 201, respectively. Without this absentee vote Campbell wins by 317 votes. In Iredell and Rowan Counties Doughton received a total of 1,041 to Campbell's 87, or 12 to 1. The illegal absentee votes can not be separated from the legal, and all absentee ballots should therefore be rejected.

Mr. RAKER. Will the gentleman yield for a question right there?

Mr. WILSON. No; I can not yield.

Mr. RAKER. All right.

Mr. WILSON. Now, that is offered solemnly to this House as the entire absentee vote of that district, because you would not be willing to take one-third or one-half of the absentee vote and cast it aside and leave the other standing. But these minority views of the gentleman from Ohio [Mr. CABLE] and everything that has been said by him would lead this House to believe that that is the whole absentee vote—1,596 Democratic and 201 Republican. What are the facts? In this district there are nine counties. Six of them went Republican, and in four of those counties that went Republican not one absentee vote is asked to be thrown out. There are absentee votes in every county. So I say it is not fair to this House to come here and put down a certain number as being the total absentee vote of this district, and say that this whole election should be settled by casting out, as Mr. CABLE says in his speech and in his report, all the absentee votes, when in four of the counties not one absentee vote is named or referred to.

Mr. CABLE. Will the gentleman yield?

Mr. WILSON. I will yield in a minute.

Mr. CABLE. I just want to ask about the absentee vote, and ask you if there is anything in the record concerning any of those counties, and whether Mr. Doughton made any effort to get the evidence as to that vote from any of the other counties?

Mr. WILSON. That is a strange thing to ask of a defendant in a lawsuit, to charge on behalf of the plaintiff that all the absentee votes should be cast aside, and then come here and say that Mr. Doughton, the defendant, has not shown that the absentee vote should be cast aside in the four counties concerning which there is not a line of testimony.

That is not all. Take Rowan County, for instance. The gentleman from Ohio [Mr. CABLE] says you should take out 518 absentee votes from Rowan County and names the precincts from which they should be taken. And in like manner for the five counties that make up the 1,596 votes. What is the fact about Rowan County? There are 11 precincts named in that county as having 518 absentee votes that should be taken out, but he did not tell the House that there are 28 precincts in Rowan County, 17 of which were not considered and most of which went Republican, where he has not asked you to take out a single absentee vote. Is that fair to the House? And the same thing is true of the other counties—for instance, the county of Caldwell; there are 17 precincts in that county and the absentee votes are given as to 12 of them only.

Mr. CABLE. Will the gentleman yield?

Mr. WILSON. Not at present. How are you going to cast out all the absentee votes of Rowan County, with 28 precincts, and not a single absentee vote referred to in 17 of them? How are you going to do that for Caldwell County, where there are 17 precincts with only 12 in which the absentee votes are given?

Mr. CABLE. Will the gentleman yield now?

Mr. WILSON. No; not until I get through with my line of argument. Then there is Ashe County. There are 16 precincts in that county, and 8 precincts only are presented in the record making up this case as to absentee votes. The next is Stanley County. There are 15 precincts in that county, and if you will examine the minority views there are only 4 precincts in that county in which they ask you to consider the absentee vote. So, if you will just ask the gentleman from Ohio [Mr. CABLE] to live up to the proposition that all the absentee votes are to be cast out, you will find him unable to do so. He asks you to take just those particular precincts that went Democratic which are counted here, to reject the absentee vote. Now, I say that is not fair to the House or either party to this contest. Why, it is not over one-third of the absentee votes in that district in which over 64,000 votes were cast. Less than one-third of the precincts in the district are considered.

Mr. CABLE. Will the gentleman yield?

Mr. WILSON. Not until I get through with this particular question. So that the 1,596 and 201 absentee votes come out of the consideration of less than half of the vote of the district. This plea for the rejection of the absentee vote comes about in this way: You are given a definite number of votes that should be cast out. You would not be authorized under the law to do that unless those votes were shown to be fraudulent. No attempt is made to do that. When absentee votes are sent in at 3 o'clock under the law, these absentee votes are opened up and deposited as directed by law. If the name of the voter is on the registration book, his ballot is voted as indicated by him. If a man votes a straight party ticket, he may send a certificate stating that he desires to do so. The judges of election put the ballots in the box. Neither the certificates nor the ballots are preserved under the law of North Carolina unless the latter are signed by the voter, but, whether they are or not, it has been decided by this House and by every court in the country that you can not penalize the voter by the failure of the election officer to file a certificate after the vote has been put in the box.

Certain requirements under an election law are mandatory as to the voter; for instance, he must register, he must be present on election day, or, if absent, meet the requirements of the election law in order to have his ballot there. All such matters are within the control of the elector and provisions of the law in relation thereto are mandatory as to him, and the failure to reasonably comply therewith forms a sufficient basis for the rejection of his ballot. But after the elector has complied with these requirements and cast his ballot, or taken the steps necessary to have his ballot deposited, then, after that, the provisions of the law affecting election officers in order to have a correct return of the result made are simply directory as to the voter. Hence the failure of the election official to keep a proper record or to return any kind of certificate in connection with the record has never been held to invalidate the vote or to disfranchise the elector. To hold otherwise would place it within the power of election officials to make ineffective our system of election by the people.

Now, I want to say one thing further about the absentee vote. The gentleman from Ohio [Mr. CABLE] will not contend that what he has presented is all the absentee vote in the district.

Mr. CABLE. Will the gentleman yield?

Mr. WILSON. I will.

Mr. CABLE. I want to ask the gentleman whether he is arguing upon what is in the record or is out of the record.

Mr. WILSON. I am arguing upon what is in the record. There are 28 precincts in Rowan County, and the gentleman has given the count in 11, stating that all absentee vote ought to be deducted.

Mr. CROWTHER. Mr. Speaker, I make the point that no quorum is present.

The SPEAKER. The gentleman from New York makes the point that no quorum is present. The Chair will count.

Mr. CROWTHER. Mr. Speaker, I withdraw the point.

Mr. WILSON. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has 13 minutes.

Mr. WILSON. I think the House must be satisfied that it has no opportunity to consider the entire absentee vote. This tabulation in the minority report is copied exactly from the brief of the contestant in this case. An inspection of pages 35, 36, and 37 of the plaintiff's brief will verify this statement. So there is no question raised by the minority report that was not presented to the committee and had its full and careful consideration.

I believe that I can also convince this House that the testimony in respect to even these 1,596 votes for Doughton and 201 for Campbell, which are offered as being fraudulent votes, is entirely unreliable. There seems to be some confusion as to how the absentee vote comes in.

This testimony relied upon to prove this small portion of the absentee vote is fraudulent is not reliable. In the county of Rowan, for instance, take Spencer precinct. It is claimed by the minority report that 70 should be taken from Doughton and 10 from Campbell. You are solemnly referred to page 419 of the record for evidence by which to do that. Now, here is a Republican judge of election on the stand:

Q. Your name is J. Lee Armstrong?—A. Yes, sir.
Q. Where do you live?—A. Spencer.
Q. State whether you were for awhile on the 2d day of November last a Republican judge of election at that place.—A. Yes, sir; I relieved Mr. Dorsett. I don't know the exact time. Some time between 2 and 3 o'clock.
Q. State whether you were sitting as judge at the time the absentee ballots were opened.—A. I was.
Q. Who opened the envelopes?—A. The registrar, Mr. Cruse.
Q. Do you know how many were opened?—A. No, sir; I don't know the exact number. I can give you the approximate number. There were as many as 80 absentee votes.

Of course, he could not know the exact number because these votes had been put in the box and mingled with the others, and the witness was testifying several months after the election. I think he was testifying very frankly.

Q. Do you recall whether they were actual absentees or persons present in the precinct and ill?—A. Quite a number were persons present in the precinct and ill.

In other words, the absentee voters are not necessarily out of the State; they may be in the precinct and unable to get to the polls.

Q. What proportion of the absentee congressional ballots was for Mr. Doughton and what proportion for Mr. Campbell, approximately?—A. I think there was 10 for Mr. Campbell and as many as 70 for Mr. Doughton. I am not positive about that. That is an approximate statement.

That is all of the testimony there is on that question, and yet we are asked to take out 70 votes for Doughton and 10 from Doctor Campbell.

Mr. RAKER. Will the gentleman yield?

Mr. WILSON. Yes.

Mr. RAKER. Under the law of North Carolina can a man vote, is he entitled to vote, by sending it in as you describe it?

Mr. WILSON. Yes.

Mr. RAKER. That being the case, where is there anything to show that the votes cast were fraudulent votes?

Mr. WILSON. There is not anything in this record; there may be a half dozen instances.

Mr. RAKER. Who is to blame for the counting of those absentee votes which the law says must be counted?

Mr. WILSON. There is nobody to blame. The law says they must be counted.

Mr. BROOKS of Illinois. Mr. Speaker, will the gentleman yield?

Mr. WILSON. Yes.

Mr. BROOKS of Illinois. The gentleman said a man might vote by certificate or by ballot.

Mr. WILSON. Yes.

Mr. BROOKS of Illinois. Does that have to be sworn to under the law?

Mr. WILSON. The certificate does; yes.

Mr. BROOKS of Illinois. Does the ballot?

Mr. WILSON. No. He sends his ballot in just as he wants it voted, with a certificate, duly attested, showing that he is a qualified voter.

Mr. BROOKS of Illinois. If he lives in a precinct and is sick, does that fact have to be sworn to?

Mr. WILSON. I am not so positive about that.

Mr. CABLE. If the gentleman will yield me, I can answer the question. When a man is sick he is supposed to file a statement, an affidavit, with his certificate or ballot, but when he files a certificate with the ballot, that does not have to be sworn to.

Mr. WILSON. Take Mount Ulla precinct, where there are 10 taken from Mr. Doughton and none from Mr. Campbell. I quote from the testimony in that case; N. R. West on the stand.

Q. Where do you live?—A. Near Mount Ulla.
Q. Were you connected with the election last November?—A. I was one of the judges.
Q. And assisted in holding the election?—A. Yes, sir.
Q. Who were the other election officials?—A. John K. Goodman was the other judge and Mr. Price Sherrill was registrar.
Q. They were Democrats?—A. Yes, sir. I was Republican judge.
Q. How many absentee votes were cast there?—A. Seven or eight or ten.
Q. Do you know how they voted?—A. All Democrats.

Right under that is Enochville precinct. A. J. Sloop is on the stand. He was the judge. He was asked the question how many absentee ballots, and he replied:

A. I reckon about eight or nine or something like that.
Q. Republican or Democratic?—A. They were about half Republican and half Democrat.

That precinct is not mentioned where they solemnly tell you it is your duty to take out all of the absentee votes. That is the way the record runs. There is no positive testimony.

Here is another one at East Salisbury. That is a place in which there is something like 100 votes to be taken off Mr. Doughton, according to this brief. The witness, J. L. Austin, was asked:

Q. Were you present on election day?—A. Yes.
Q. Do you know how many absentee votes were cast in this ward on that day?—A. Between 75 and 100.

Then they ask you to take 100 votes from Mr. Doughton. The testimony will run like that all through the record. So many votes "I think," so many votes "I estimate." That is the case even in those precincts which are put down here and in which you are asked to take the vote away without showing that the electors are disqualified. I say that it is not fair to this House to come up and ask you to decide an important election contest on testimony on which you would not render a judgment in the justice of the peace court for any amount of property, because it is unreliable, even though you take this small portion of the vote accounted for.

Mr. HARDY of Texas. Mr. Speaker, will the gentleman yield?

Mr. WILSON. Yes.

Mr. HARDY of Texas. Do I understand, where the vote shows 75 or 100, that the position of the contestant is that you should take off the whole 100?

Mr. WILSON. That is the way it is in this copy that is made from the brief, written for the contestant, and which is copied varbatim in this report, except that the report does not fefer you to the page on which you will find the testimony.

Mr. DAVIS of Tennessee. Which report?

Mr. WILSON. The minority report.

Mr. CABLE. Mr. Speaker, will the gentleman yield?

Mr. WILSON. I will yield in a minute. Here is another case. Take the question of Chestnut Hills precinct. The registrar is on the stand—

Q. How many absentee votes in that township?—A. Twenty, twenty-five, or twenty-eight.

Now, you are asked to take off the 28. Why, gentlemen of the House, even if this report represented all of the absentee votes, and you felt that if you had sufficient testimony to satisfy you that you ought to deduct the entire absentee vote of that district, you have absolutely nothing on which to rest your verdict. Then, how can you reject the absentee vote without knowing its extent and without evidence to support the charges against a portion of it?

Mr. CABLE. Mr. Speaker, will the gentleman yield?

Mr. WILSON. Less than one-half of the precincts in some of the five counties named are accounted for, and there are absentee votes in every one of those omitted. In four other counties the House is given no information at all about the absentee vote. In the counties which gave larger Republican majorities in the district, the absentee votes are omitted from the minority report.

The SPEAKER. Does the gentleman yield?

Mr. WILSON. Not at present. You are asked to render a verdict on a charge in a report which says that all absentee votes should be deducted, and which leads you to believe that 1,596 to 201 constitutes all of them. But even if that were true, the burden would be upon the contestant in this case to show that those people were not qualified to vote. A great deal is said about the percentage of absentee votes being larger for Mr. Doughton than for Mr. Campbell. The record will show as it goes that the percentage was larger, I think; that there were more absentee voters in Washington who were Democrats than Republicans. I think that I can account for that. We had just been through eight years of Democratic administration. Many deserving Democrats in North Carolina had been sent to Washington to hold jobs, and if this administration does what it is likely to do, and what it probably ought to do, many of those Democrats will be back in North Carolina following civil pursuits, and in the next election that situation will be reversed. There is no testimony to show that these voters were disqualified. Republican witnesses show that many of them were ill, many of them were in Washington, many were off teaching school, young men in college and engaged in other pursuits.

If a majority of these voted for a Democratic candidate they had a perfect right to do so. If they were not qualified electors the burden was upon the contestant to prove that. The record contains no such proof. When we speak of absentee voters in North Carolina it does not follow that they are all absent from the State, and it is admitted in this record that many of those votes were cast by people in the State, in the county, and within the precinct on election day, being persons ill or physically unable to go to the polls. I can not believe that the contestant would seriously ask you to disfranchise these people and reject their votes, or to pursue that course in relation to the absent worker, the school teacher, or the traveling salesman.

Now, the chairman of this committee has given you a fair and clear report in this case. He has considered and reported upon all the issues involved, I believe, according to the law and the evidence. I want to say one other thing to this House. Each Member here, I am sure, wants to decide this case upon its merits, and without partisan bias or prejudice. The facts are that only the members of the committee have had the opportunity to make a full investigation and to know what facts are established by the evidence. The report of the chairman, Mr. LUCE, and the speech he has just made, set forth very clearly the findings of the committee, with the exception of the gentleman from Ohio [Mr. CABLE], in this case.

Mr. CLOUSE. Will the gentleman yield?

Mr. WILSON. I will.

Mr. CLOUSE. This question is somewhat troubling me. Does the gentleman think this Congress ought to place the stamp of approval upon the State of North Carolina, or any other State, that has a statutory provision with respect to

the qualification of the voters, such as having paid the poll tax in advance of the election? Do you think we should do that?

Mr. WILSON. That raises a very serious question, as the chairman stated, as the gentleman no doubt refers to the fact that both parties in North Carolina waived the poll-tax provisions of the constitution and no challenges were made on account of nonpayment of poll tax.

The SPEAKER. The time of the gentleman has expired.

Mr. DOUGHTON. I yield the gentleman two additional minutes.

Mr. WILSON. Both parties agreed to do that. It is true that poll taxes were not required. This law was never popular in North Carolina and has since been repealed. We went into that very thoroughly, and, as the chairman told you, the poll-tax proposition would not change the result of the election.

Now, in respect to this agreement by parties and candidates in North Carolina to waive the provisions of the law regarding the payment of poll tax, we are not called upon to discuss the effect of such waiver generally. But the courts in some cases have held that a candidate for office who has been a party to a waiver of this kind before an election is held, and after taking the chances of securing the benefits resulting therefrom, can not afterwards be heard to contest the election on that account. In other words, he is estopped by his own act.

Mr. CLOUSE. Following this line, would it not be possible, if we approve of such conduct as that, the leaders of the party might go down there and say we will permit children to vote?

Mr. WILSON. We are asked to pass upon that question.

Mr. CLOUSE. But might it not encourage them to do that very thing?

Mr. WILSON. We are not passing upon that question, and that would have no effect upon the result of this election.

I know in one of the counties they had a biparty treaty to waive the poll tax provisions of the law. It was reduced to writing and the plenipotentiaries of both parties signed and ratified it without reservation. This was understood and consented to by all the candidates. After this I do not believe a candidate should be heard to contest the election on account of nonpayment of poll tax. Apparently this view has been adopted by the contestant, or at least that is not a matter of contention here, according to the minority report.

So, Mr. Speaker, if the only question to be considered by the House in relation to this contest is the absentee vote, I respectfully submit it is entirely impossible to pass an intelligent judgment upon that issue, under the evidence submitted.

The gentleman from Ohio [Mr. CABLE], who filed this minority report, and who is contending that the result of this election, as found and certified to by the sworn officials of North Carolina, be set aside and changed and that the findings of the Committee on Elections and the report made by the chairman thereof be reversed, can not inform you as to what this absentee vote is. In his minority report in respect to this vote he sets forth that the absentee vote amounts to 1,596 for the contestee, Doughton, and 201 for the contestant, Doctor Campbell, and publishes therewith a tabulated statement from five of the nine counties of the district. In these five counties there are 95 precincts. In making up this statement only 54 precincts are considered and the testimony as to the absentee vote in those is based upon guesswork and mere estimate. This is said without any criticism of the witnesses who testified, for the evidence was taken several months after the vote was counted, and they could not reasonably be expected to remember the number of absentee voters at their precincts. We are entirely without testimony as to 33 precincts in the five counties referred to and as to all the precincts in the other four counties, yet there were absentee votes involved in each and all of them. To be more exact the total vote polled at the precincts where testimony was taken at all in relation to absentee voters is 28,651, while that at the precincts where no testimony was taken and at which the House has no opportunity to consider the absentee vote at all amounts to 36,039.

Under the law and under an unbroken line of precedents established by this House the burden of proof rests upon the contestant to establish his cause by at least a fair preponderance of the testimony. In this case he has not only failed to do that but omits to furnish any proof at all in respect to the absentee votes cast at a majority of the precincts, involving about 60 per cent of the entire vote cast. So I repeat that if the House should desire to decide this whole case on the absentee vote, as it is urged to do in the minority report, it would be unable to do so for the want of proof as to what that vote is. However, the request to do this is entirely unreasonable because the laws of North Carolina, as do those of 43 States in the Union, authorize absentee voting. The absentee votes in this district were cast and counted after a full and fair opportunity was offered for challenge on the day fixed by law and also upon election day. The unchallenged vote received by the sworn officials of both parties is admittedly correct. I therefore respectfully submit that the majority report of the committee should be adopted.

Mr. LUCE. Does the gentleman desire to consume more time on that side now?

Mr. DOUGHTON. Let Mr. CABLE use some of his time.

Mr. CABLE. I have only myself and one other speaker.

Mr. DOUGHTON. How many more speeches have you on that side?

Mr. CABLE. Myself and the gentleman from North Carolina, Mr. Campbell.

Mr. DOUGHTON. There is only one on this side.

Mr. MONDELL. Mr. Speaker, gentlemen seem to have some difficulty in determining about going on this afternoon, and I doubt the possibility of maintaining a quorum under the conditions that exist, and I move that the House do now adjourn.

The SPEAKER. Will the gentleman withhold that for a moment?

Mr. MONDELL. I will.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. JONES of Texas (at the request of Mr. LANHAM), for May 26 and 27, on account of official business.

To Mr. BLAND of Virginia, for the day, on account of sickness.

To Mr. BANKHEAD, indefinitely, on account of important business.

To Mr. ARENTZ, for an indefinite period, on account of business in his home district.

To Mr. SCOTT of Michigan, for 10 days, on account of business.

To Mr. A. P. NELSON, indefinitely, on account of death in family.

POST OFFICE APPROPRIATION BILL.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Post Office appropriation bill, to further insist on the disagreement to the Senate amendments, insist on the amendment of the House to Senate amendment No. 58, and agree to the conference.

The SPEAKER. The gentleman from Illinois asks unanimous consent to take from the Speaker's table the Post Office appropriation bill, to further insist on the disagreement to the Senate amendments, insist on the House amendment to Senate amendment No. 58, and agree to the conference. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 9859) making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes.

The SPEAKER. Is there objection?

Mr. GARNER. Reserving the right to object, is this agreeable to the minority Member?

Mr. MADDEN. Yes, sir.

The SPEAKER. The Chair hears no objection and appoints the following conferees.

The Clerk read as follows:

Mr. SLEMP, Mr. MADDEN, and Mr. SISSON.

EXTENSION OF REMARKS.

Mr. SANDERS of Texas. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by having printed in small type an article prepared by the commissioner of the bureau of markets of Texas on the subject of grading and marketing cotton.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The extension of remarks referred to are here printed in full as follows:

Mr. SANDERS of Texas. Mr. Speaker, under permission heretofore given I submit an article on the grading and marketing of cotton, prepared by the Hon. Charles E. Baughman, commissioner of markets and warehouse department of the State of Texas.

The article is as follows:

The cotton growers of the United States, because of reduced demand for raw cotton, need to give more thought to methods of planting, harvesting, and marketing this great staple crop.

Every farmer might well afford to undertake to produce the present average crop on half the number of acres now planted, but get away from the idea of making "two blades grow where one is now grown." Take care of the one already grown in a fair profit added to cost of production.

This bulletin is intended to be educational—an appeal to business and professional men and the producers of the world's cotton crop, to take steps to have corrected some of the long existing evils surround-

ing the system of price fixing, and more especially to acquaint the people with the unfair methods of arranging differences as regards our low-grade cotton.

Not an appeal to prejudices but to the higher and better judgment of well-meaning men who have at heart the betterment of all our economic conditions.

The Federal Government has established standards for grades, and these standards have been likewise adopted by this department, and we believe it within the province of the Federal Government to promulgate differences in accordance with fair governmental mill tests, which have been made, and which are representative of every grade, and every section of our cotton producing area.

Let us back our efforts by sober thought, earnestness of purpose, and determination to bring about relief for the man who toils in the field in an effort to produce the basis of the world's clothing supply.

COTTON VALUES.

Since the origination of the different grades of cotton recognized today by the trade there has been more or less diversity of opinion as to how much premium value should be added for the grades above the middling type or how much discount should apply for the grades below that type.

The trade has been guided by what the *demand* was for relative grades, making the values for them from such bases, yet such a fact does not argue that such conclusions are correct; that is, values obtained in that way are not evidences of intrinsic worth. There is a true value to every relative grade, or half grade, of cotton if the fact establishing it can be found, and apparently no better way can guide us to that conclusion than by going to the cotton mills for it. Tests made in such manner shows variations in percentage of the same grade, but if a number of them are taken an average can be drawn, which should give a fair valuation from any middling base.

This is an old story, but it has new features to which the attention of the public is called; not to the daily fluctuations that we constantly experience but to the wide difference between the values made arbitrarily by the cotton trade and those shown by actual tests made in milling the staple.

To be fair and just in the matter averages have been made between the highest and lowest mill tests for conservative reasons, as hereinafter explained. Tests were made at Clemson College in its textile department in 1912 and showed an average for mill waste to be for: G. M., 12 per cent; St. M., 12.5 per cent; M., 13 per cent; St. L. M., 13.75 per cent; L. M., 14.75 per cent; St. G. O., 16 per cent; G. O., 17 per cent.

These tests were not constant in results; that is, one sample of middling might show a loss of only 6 per cent, while another would go as high as 12 per cent, practically the same variations existing in all the relative grades by reason of the fact of good or bad ginning, careful or careless picking, care, etc., of the cotton.

Tests made by the Bureau of Markets, Department of Agriculture, at West Raleigh, N. C., and Fall River, Mass., as given in their bulletin No. 591, December 26, 1917, exhibited variations on tests similarly as those shown at Clemson College, but the percentage of loss as mill waste was not so great.

Tests made by this department were on cotton from every part of the cotton belt and on that of 15/16 to 1 inch staple. The grades tested were for middling fair, good middling, middling, low middling, and good ordinary. Averaging the table on page 10, Bulletin 591, results in the percentage of loss in mill waste to be for G. M., 5.50 per cent; middling, 7.31 per cent; L. M., 8.48 per cent; G. O., 11.37 per cent; the other grades intervening between these given have been added by the writer, shown below, as stated, to be conservative. These departmental percentages have been added to those of Clemson College, from which a new average has been drawn, showing for the following to be for: M., 10.20 per cent; St. L. M., 10.90 per cent; L. M., 11.60 per cent; S. G. O., 13.00 per cent; and G. O., 14.50 per cent; and from these latter figures the following comparative statement is made for clearly elucidating the idea intended:

M. basis 16 cents per pound, 500-pound bale.

MILL DIFFERENCES IN POUND AND VALUES.

Loss in weight refining and spinning.	Additional loss over middling.	Loss in values—mills.	Trade differences, pounds values.
Per cent. Pounds.	*Pounds.*		
Mid.....10.20=51.....			
St. L. M.....10.90=54½.....	3½	$0.56	$5.00
L. M.....11.60=58.....	7	1.12	11.25
S. G. O.....13.00=65.....	14	2.24	16.25
G. O.....14.50=72½.....	21½	3.44	21.25

NOTE.—Mill waste is the loss thrown out of a bale of cotton during the process of manufacture, and consists of the leaf trash, stems, mote naps, short fibers, dust, dirt, etc.

"Trade differences" means the above and below middling basis method of arriving at the price to pay.

The mill waste for the grades below middling is calculated on the excess number of pounds below that grade, while the trade discounts are taken from the official quotations given by United States Weekly Bulletin No. 101, February 6, 1922, for the Texas district.

From the records I am unable to obtain any history showing where cotton-manufacturing concerns ever attempted to dictate the relative prices they should pay for cotton, basing such purchases upon the mill-waste value for the different grades, hence the inference is they do not care to make purchases of raw cotton this way, preferring to hold to the practices of the trade, using the arbitrary differences as made by it, giving the advantage of making purchases for less than the intrinsic value of the lower-grade cotton.

Comparing the two, it would seem an agreement could be reached between the spinner and the grower, or the spinner and the trade buyer, to handle cotton at its intrinsic value and not on arbitrary prices as practiced to-day.

If it be conservative to say that a loss of only 3½ pounds exists between middling and strict low middling, as a mill waste, that its value as a loss at 16 cents a pound is 56 cents on a bale of cotton, justice in the matter would pronounce it absurd to discount a strict low middling bale of cotton $5, as the trade now exacts. Reasoning upon the same line, as indicated by the comparative schedule made in the foregoing it will be noted that the loss from middling to low middling indicates 7 pounds, as a visible and an invisible waste, which on a 16 cents a pound valuation equals $1.12, while the trade penalizes it around $11.25.

These trade discounts vary often, but nowhere do I find them ever coinciding in value with the physical losses made at the mills.

Should it be contended that the value for the lower grades is more than shown in the statements made here, for corroboration of these statements I refer again to Bulletin No. 591, December 26, 1917, page 11, from which I have made an average resulting in showing that for low middling the loss in mill waste is 8.78 per cent; for good ordinary, 12.42 per cent. Taking middling as showing a loss of 7.57 per cent, with the average loss between it and strict low middling, its equivalent is 8.18 per cent, and reckoning in the same manner the different percentage loss for strict good ordinary is found to be 10.60. Placing these figures in a tabular form the comparative percentages shown are for—

Mill differences in pounds and values compared with those of trade middling basis, 500-pound bale.

Mill differences and waste value.	Added loss.	Trade differences.
Per cent. Pounds.	*Pounds.*	
M., 16¢..... 7.57=37.85		
S. L. M..... 8.18=40.90	2.05=$0.328	$5.00
L. M..... 8.78=43.90	6.05= .968	11.25
S. G. O.....10.60=53.00	15.15= 2.42	16.25
G. O.....12.42=62.10	24.25= 3.88	21.25

This table is made up from a Government source exclusively, a review of which demonstrates that the loss for mill waste is less than that shown in the preceding table, made from an average of the results of the Clemson College tests combined with that of the Federal Government.

It may be well to state that in making these scientific tests some of them divulged the fact that practically no difference existed between middling and strict low middling, while in others tested for mill waste on the same grades showed a wide departure therefrom.

A number of our Texas mills are manufacturing valuable articles very serviceable in character, such as heavy and light weight ducks, Osnaburgs, drills, heavy sheetings, shirtings, bedticks, denim, and a variety of wrapping twine, from cotton ranging in quality from middling to low ordinary, mostly strict low middling to good ordinary, inclusive, with sometimes an injection of a good class of bollies with other grades.

Statements from two Texas cotton mills interrogated say the loss for mill waste runs, on an average, around 17 to 17½ per cent, which on a 500-pound bale of cotton shows a loss of 85 to 87½ pounds. Comparing this with the preceding table declaring a loss of 37.85 pounds for middling, indicates a difference of 49.65 pounds, less for good ordinary, equaling a value of $0.95, leaving a wide margin between that value and the trade discount of $21.25, as shown.

It was found that the two Texas mills using the low grades of cotton mixed them very thoroughly before allowing them to enter the machines for fabrication into the finished product, and from the result of this mixing the percentage of loss was ascertained.

The percentage of mill waste is not an entire loss because of the fact, exclusive of the foreign substances thrown out, a mass of short fibers are caught, which find a market with concerns making hats, quilts, blankets, shoddy goods, rope, carpet, mattresses, cellulose, guncotton, and many other articles of value, so the 10.20 per cent or any per cent given, shown in first table as a loss, does not finally result as such when brought to its final conclusion.

From the foregoing let me assume the prerogative to say that I hold to the opinion that a safe and sane line can be drawn, a base can be made upon which both buyer and seller can stand, meet each other fairly and squarely upon satisfactory terms, eliminate differences of opinion as to the relative lower grades, establishing a definite value for them, and forever bring harmony out of chaos.

This I suggest in the following, assuming and accepting middling as the base, recognizing at the same time the inconstancy or variableness of the percentages of loss, conceding the greater losses, even discounting them, then designating the differences to be applied, for an accepted compromise the values will be as follows, say:

Middling, 16 cents, 500 pounds.	Intrinsic value.	Trade value.
Pounds.		
St. L. M..... 5=$0.80	$79.20	$80.00 / 75.00
St. G. O..... 10= 1.60	78.40	68.75
G. O..... 35= 5.60	74.40	58.75

In making the pound deductions I have discounted greatly the lowest discounts made in the foregoing mill waste, giving a definite number of pounds to be deducted for each grade, equivalent to saying that any buyer purchasing a strict low middling bale deducts 8 pounds; for low middling he will take off 15 pounds, etc., figuring the price at middling quotation for the pounds off, paying the seller at the same time full middling value, less the number of pounds off. It is apparent to me that if a definite number of pounds can be agreed upon for the relative grade discounts to be applied, the same publicly quoted, the grower as well as all interested can know at all times the worth of any character of cotton ready for the market, as the number of pounds off can be given instead of percentages.

The preceding summarizes in substance a guide designed to be safe for the purchaser, at the same time reflecting no great financial loss to the grower.

To determine with greater exactness a series of tests covering a period of several years should be made, and from them correct figures obtained for the true discount to apply; but in the absence of such figures I have assumed the responsibility to dictate the preceding, based upon the data given, and most earnestly solicit the assistance and cooperation of all desiring to see justice in the premises. This I do because the present practice of discounting the lower grades is, in my opinion, uneconomic, unwise, puts an onerous burden upon the back of labor, which can be taken off if those in authority will exercise the power vested in them and come to the rescue.

Mr. WILSON. Mr. Speaker, I ask unanimous consent to revise and extend my remarks on this contested-election case.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. SHELTON. Mr. Speaker, I ask unanimous consent to extend my remarks on the tariff and the prohibition question.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The extension of remarks referred to are here printed in full as follows:

Mr. SHELTON. Mr. Speaker, this country has had many experiences on the question of tariff. I have thought it settled several times. It was not. It is one of the questions that is like Banquo's ghost. It will not down. In the beginning it was not a party question, and I believe it should not be now. It is said that among the first acts of the First Congress of the United States was a protective tariff act. And for many years its wisdom was never questioned. George Washington favored it. Thomas Jefferson, the denominated founder of the Democratic Party, and a man of whom any party or country could well be proud, in his first annual message to Congress in December, 1801, congratulated that body upon the revenue derived from the tariff duties and suggested that the internal taxes could safely be dispensed with and tariff depended upon for support of the Government and the payment of the public debt, and further suggested that the surplus funds could be used for internal improvement. Andrew Jackson while United States Senator from Tennessee voted for a protective tariff in 1824, and after he became President, when South Carolina refused to obey the tariff laws, sent General Scott with United States troops down there to see that the law was enforced. The noted Thomas H. Benton, United States Senator for 30 years from Missouri, said of the tariff law of 1816:

'A free trade measure; no price for property or produce; no sales but those of the sheriff and the marshal; no purchasers at auction sales but the creditors or some hoarder of money; no employment for industry; no demand for labor; no sale for the products of the farm; no sound of the hammer but that of the auctioneer knocking down property; no medium of exchange but depreciated paper; no change even but the little bits of foul paper marked so many cents and signed by some tradesman, barber, or innkeeper; exchange deranged to the extent of 50 or 100 per cent; distress, the universal cry of the people; relief, the universal demand, thundered at the door of all legislatures, State and Federal.

THE EFFECT OF TARIFFS.

It is impossible to enact a measure that will redound to the direct interest of every individual. It is the people as a whole that have to be considered. It is true that a protective tariff on the manufactured goods of the New England States does not help directly the agriculturalists of the South and West, but it does indirectly help them. It furnishes labor for the working people of the New England States, thereby creating a demand for the products of the South and West. In that way it helps them. The same is true of a tariff on agricultural products of the South and West. It shuts out foreign cheap labor products and stimulates agriculture to produce the necessary raw material for manufacturers. The manufacturing districts employ labor, creating a market for all the products of the country. It is and must be a reciprocal proposition. It is very difficult to understand how one who claims to be a protectionist can favor protection for himself and deny it to others. That is only a quasi-protectionist.

As has been said, the tariff should not be a party question. It is strictly a fundamental American principle. It will not be a party question much longer. The whole country has awakened to the fact that it is necessary to the prosperity of this country.

Put a tariff on the products of our country high enough that the foreigner can not send in his cheap labor products and undersell our home markets. That will open up the mills, factories, and mines, give employment to our people and a market for our home products. It is a recognized fact that in normal times we furnish a market for 90 per cent of all our products. If we will start up the industries of this country, give employment to our laboring people, furnish them with the means to buy 90 per cent of our products, we may throw the other 10 per cent in the fire, or give it to suffering humanity, and we will be many times better off than we are, or should be, by sending all of our products abroad and letting our home people be idle, naked, and hungry. We should not weep over the condition of our neighbor's children when our own are at our feet crying for bread. Charity begins at home. When we have cared for our own, then is the time to help our neighbors. We have always done so, and shall continue to do so. I contend that a man's first duty is at home, and that that is true of a nation.

It may be that some people can not understand the working of a protective tariff. It is also true that they can not understand just how the water gathers in the heavens and comes down in rain, but they know that when such is true we have abundance of crops. The same is true of the protective tariff. When we have it, we have prosperity, as a rule. It is true that there are other disturbing elements that sometimes bring on national difficulties, but under a protective tariff administration they are much less likely to come, and are much easier to overcome.

I am a protectionist, pure and simple. I believe in it. I think it is good for every industry and every enterprise in the land that comes in contact with the products of cheap foreign labor. I do not favor protection for the manufacturer and free trade for the producers. I do not favor protection for the producers and free trade for manufactured goods; but I favor protection for the American industries, great and small. I want to protect the East, West, North, and South. America for Americans first. Would it work well for the producers' products to be protected and the manufacturers' not protected? Think for a moment just what the situation would be. Then again put your thoughts to working, and protect the manufacturer and the producer, and see what a happy combination that would be. The factories would be running, the mills and mines would be operating, the farmers would be producing, the carpenters would be building, and all labor would have employment, and wives and children would be singing and rejoicing all over the land.

AN ORGANIC BODY.

The Government of the United States is a vast organic body, composed of many organs, each having certain duties to perform. No body so constituted can give the best results without the cooperation of all its organs. What are those organs? They are many, the chief of which is the producing factor. Upon the production of the material out of which must necessarily be made the things that supply the needs and wants of mankind, lies the secret of success. To this must be added many others, namely, the manufacturing industries, the mining industries, the milling industries, the great common laborers, the business enterprises, the professional vocations of many kinds, all combine to make the great body of the machine that moves the wheels that bring success.

If any of those factors fail to function, the best results can not be obtained. What is necessary to move the wheels of progress? I think a uniform, well-regulated protective tariff is the greatest factor. By guaranteeing to the people the home markets it will start the manufacturing and other industries, they will employ labor; employed labor creates a demand, demand creates good prices, good prices stimulate industries of all kinds, thereby making the whole machinery work in harmony. When that is done, the story is told, and prosperity will reign.

I hope that the time may soon come when every man or woman who is elected to this House or the Senate may come with the avowed purpose of legislating for the whole country. We are all made of the same material. Our wants are the same and must be supplied if the country is to prosper. It is obvious that since the protective policy is fundamental to our prosperity it should not be subject to such radical changes as it always has to undergo every time our Government changes from one party to another. There is nothing that does more to insure the prosperity of our country than the stability of the principles and policies upon which the country's business is based.

It has been proven that under free trade or low tariff our imports are increased and that our exports are decreased. Can we prosper when the balance of trade is against us? Certainly not. Can an individual accumulate wealth when his expenses are greater than his income? It can not be done. Neither can a nation under such circumstances prosper.

Why can not we meet foreign competition? It is very clear if you will just think of the difference in the ways, habits, ideas, manner of living, and costs of production in many of the foreign countries and ours. It should not be said in a boastful spirit, but the American people are not going to subscribe to such conditions. In many of the foreign countries the climatic conditions are very different. They need but few clothes, and their accustomed food is a very simple diet and costs but little. It is different here, and we can not help it.

Let us draw a comparison; take the wool industry. In Australia it is said that a flockmaster can get forage for his sheep at 8 cents per head for a year; that no hay or other expensive feed is required. New Zealand is the same; Argentina is almost the same. How is it with the Western States of this country? There it costs from $4 to $8 per head to winter sheep. Wool can be shipped from those foreign countries to the eastern markets of this country cheaper than it can from the Western States. How can we compete with the foreign countries when such is true? It is clear that we must have a

tariff sufficient to equal the difference in the cost of the products of the foreign country plus freight and that of our own.

It was brought out in the hearings by the Ways and Means Committee of the House that there were eggs to the value of $2,602,352 imported from China during the year 1920. Eggs can be produced in China at from 4 to 6 cents per dozen and can be sold here at 6 to 12 cents per dozen.

There are other countries from which eggs are imported, among which are Australia, Argentina, and others, all of which can produce eggs much cheaper than the United States. This is true because they can feed their hens much cheaper and can get girl labor at from $5 to $7 per month to care for their flocks. The same can be said of many other articles.

It is not the price that is put on the horse every time that prevents you from buying him, but the price that you have in your pocket. If the horse is priced at $10 and you have not the $10, you can not buy him. But if he is priced at $100 and you have the $100 you can buy. Destroy our tariff and you destroy our home market, destroy our home market and you destroy our prosperity.

It is a simple proposition. We had a creamery erected at our town, on the promise that the dairymen would patronize it and make it a success. For a while they did so and the matter went on all right. But soon some of the large creameries from a distance sent an agent into our town who began to pay more for the cream than the local men could pay and have a profit left. Thoughtless men began to sell to him, and soon the local creamery had to quit business. As soon as that was done prices began to go down in a hurry. It was not long till the gains were all gone and a loss sustained. This thing was repeated and again some stood ready to jump at the bait and suffered the same result. The same is true of the foreign and home markets. If we allow foreigners to come in and undersell us till they destroy our home markets, then they will use their opportunity and we shall have to pay for it.

My theory is to put our own house in order, produce all we can, use all that is necessary for home consumption, utilize our own capital, labor, and skill; then seek the best market possible for the surplus.

The main object of the Government is to promote the welfare of its citizens; not some of them but all.

Who are the real producers of the wealth of this country? There is no doubt about that; they are the tillers of the soil, the herdsmen, and the miners, chiefly. That means the men who labor in the heat and the cold, the rain and the sun, on the farm; the men who expose themselves to all kinds of weather in driving and herding their flocks of various kinds; and the men who go into the bowels of the earth and bring forth the various minerals and put them to man's use. The interest of those men should be safeguarded by an adequate tariff, properly adjusted.

"Truth crushed to earth will rise again." The once acknowledged tariff policy of our country is fast coming to the front again. The South, where once it was a crime to mention the tariff, is now fully awakened and is anxious to have its interests protected, that they may make their various industries profitable. They have had quite an experience in competing with foreign cheap labor and have realized the difficulty and now ask for a tariff, and are awake to its importance. Experience is the best teacher in the world. They have taken a course in its school. This fact is demonstrated by the organization of the Southern Tariff Association. Some of the best, most logical tariff arguments are made by men of the South, such men as Senators Broussard and Ransdell, of Louisiana, and John M. Parker, governor of Louisiana, besides many other able Members of the House on the Democratic side. The emergency tariff bill was supported by the following Democrats: Hudspeth, Parrish, Blanton, and Jones of Texas; Smithwick and Clark, of Florida; Dupré, Favrot, Martin, and Lazaro, of Louisiana; Lankford, of Georgia; and Deal, of Virginia.

At the first meeting of the Southern Tariff Association it passed a resolution, among other things saying:

Whereas it is apparent to even the casual observer of the trend of events that the present tariff laws will be revised and other laws enacted in their stead by the next Congress; this without reference to the result of the impending election; and

Whereas it is likewise apparent that such laws will be formulated as to result in the collection of huge sums of money, in the form of revenue, to satisfy the demands of Government and to supplant in large part the funds now realized from the payment of income and other direct taxes, and such policy will result in the fixing of heavy tariffs upon most, if not all, commodities; and

Whereas it has been established to our thorough and complete satisfaction that the various industries of the South are facing imminent ruin by reason of being compelled to compete with foreign producing countries, where the wages of labor are pitiably low and the cost of production comparatively slight, and are, therefore, in need of a tariff designed to compensate for the difference in the cost of production in this country and that in foreign countries; we especially direct attention of Congress to the importation of vegetable oils from the Orient and other foreign countries as the direct cause for the reduction in prices of cotton seed and peanuts below the cost of production to the producers and manufacturers of this Nation, who suffer jointly, and we demand a tariff that will adequately protect these industries from foreign competition with cheap labor of the farm and factory of the countries named. We particularly direct attention to this menace on account of the proportion, reaching, as it does, practically every farm in the South.

Whereas it is evident that unless a compensative tariff shall be levied, the southern producer must necessarily go out of business, to the certain ruin of those engaged in agricultural and other lines of production in the South, and to the manifest injury of the country at large: Now, therefore, be it

Resolved—

First. That we pledge this association and all the organizations and individuals who are members thereof to do all within our power to properly place before the United States Tariff Commission, before the Ways and Means Committee of the House and the Finance Committee of the Senate, and before the Members of the House of Representatives and Senate of the United States the facts bearing upon the cost of production in this country and abroad, and all such facts as may be properly taken into consideration in the fixing of a tariff, to the end that such tariffs may be placed as will enable the southern producer to continue in business and to reap a reasonable profit as a result of his thrift and endeavor.

Second. That we earnestly request all of those interested in the production of southern products and all of its industrial leaders, and those interested in the prosperity of the South, to do all in their power to further the subjects herein expressed.

Third. That we particularly call upon the Members of the United State Senate and House of Representatives from the South to do all in their power to see that southern products receive the benefits incident to the levy of such duties as are herein indicated: Be it further

Resolved, That in the levying of tariff duties this organization is unalterably opposed to discrimination as between occupations, citizens, or sections of the United States; that it does not ask for favors in any form, but opposes favoritism in all its forms.

Why dally with fundamentals? Acknowledge their value and profit by their use. Pass a general tariff bill as soon as possible, that business may be revived and the people relieved.

I want to emphasize the importance of safeguarding and protecting the producers of our country. It is said by some that that would be class legislation. It would not. Legislation that will benefit the producers of our country is in the interest of every man, woman, and child in the land. No class can prosper long unless the producers succeed.

Upon them must depend the success and prosperity of our country.

The policies by which the manufacturers will be manufacturing, the producers producing, and the laborers laboring and buying the necessaries of life are policies by which the country will prosper.

Let us have it.

WILL THE NATION RETREAT?

Mr. SHELTON. Mr. Speaker, Will the Nation retreat? After 138 years of devotion to duty shall it falter? Many clouds of darkness have enveloped it, many troubles that try the very souls of men have confronted it, but the spirit that led the forefathers to that victory which has ever filled the hearts of men and women that love justice has ever been present to guide the people aright.

Difficulty after difficulty has been overcome, victory after victory has been won, and after nearly a century and a half triumphing over obstacles and winning in every contest, shall we retreat? Can anyone, looking through the cycles of time, fail to see the hand of Divinity directing the destiny of this Nation?

The people of this country have a right to congratulate themselves upon having such a body of men as they did to lay the foundation of human happiness. Never in the history of the world was there a greater body of men than those who wrote the Declaration of Independence and the Constitution of the United States of America. Endowed with the highest and most exalted ideals that men ever possessed, they set their goal high and have never yielded to any difficulty that lay in the way of its achievement.

They were the first to hold that all men are created equal, in that they have a right to life, liberty, and the pursuit of happiness. They, therefore, declared themselves free from any power that denied those rights. The world knows the results.

ADOPTION OF THE CONSTITUTION.

After adopting a Constitution that guarantees the citizens of this country the greatest privileges of any people in the world, they proceeded to move forward in the world to higher planes. One achievement after another followed, one of which deserves special mention—the liberation of the slaves. That was another step toward the fulfillment of the declaration—

that all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these are life, liberty, and the pursuit of happiness.

After having liberated the slaves, and while meditating upon the great achievement, they realized that none were really free; that there was still a power that held the human family in

subjection. The great Lincoln, after seeing the shackles fall from the hands of the slaves, said:

I prophesied 25 years ago that the day would come that there would not be a slave or a drunkard in the land. I have seen the first part come true.

The power referred to was King Alcohol. Many tyrants ruled by the sword and the guillotine, but King Alcohol ruled by feeding the appetite while entwining the individual with a chain of irresistance. The tyrants slew by the hundreds and by the thousands, while King Alcohol has slain his subjects by the millions.

Time works wonders. The people were slow to awaken, but once awakened they never slept till John Barleycorn was entombed. The same spirit that drove back the British forces and liberated the American people, knocked the shackles from the hands of the slaves, and put John Barleycorn in the tomb has put the women of our country in their rightful places among men, and is going on conquering and to conquer but never to be conquered. Will the people who have wrought such wonderful works and placed the American people on the highest plane of civilization that has ever been attained in all the world now retreat?

They tell us that prohibition is unconstitutional and can not be enforced, and to prove it they give instances where the traffic is going on. If that justifies the people in saying that we can not enforce prohibition and that we should not try, we had just as well throw the statutes in the fire and quit. The same reasoning will apply to murder, robbery, arson, rape, forgery, and all other crimes. Is any crime entirely eliminated by law? Can any law be strictly enforced? Not one. Would anyone say that because we could not perfectly enforce the law against the various crimes of the country that we will repeal them? Surely not, and this applies to the prohibition law the same as to other laws.

Why say prohibition is unconstitutional? Some say that it conflicts with Article IV of the amendments of the Constitution. Many say that it does not. Suppose it does; how does it agree with Article XVIII? No one can possibly say that it conflicts with that. When was Article IV adopted? In 1791. When was Article XVIII adopted? In 1919. Then which prevails? Section 3 of Article I of the Constitution provides that—

The Senate of the United States shall be composed of two Senators from each State, chosen by the legislature there.

Article XVII provides—

That the Senate of the United States shall be composed of two Senators from each State elected by the people thereof.

Is Article XVII binding? No one disputes that it is. Neither can they logically say that Article XVIII is not binding.

WHAT HAS PROHIBITION DONE?

It has dispensed with the obnoxious saloons, done away with the custom of public treating to drinks, removed the various cures for drunkenness, reduced the number of insane, put clothes on the little children's backs, food in their mouths, shoes on their feet, reduced drunkenness, lifted many heavy burdens from the backs of mothers, and elevated the minds of the youths of our country.

Before prohibition was adopted there were 20,000,000 drinkers. The number who have stopped regular drinking is 17,500,000; the number who still drink is 2,500,000; of this number only 1,000,000 are regular drinkers. The amount of liquor both legally and illegally used last year was 80,000,000 quarts, or a little less than three-fourths of a quart per capita. In 1917 the per capita consumption was 20 gallons.

This certainly is a good showing for two years under prohibition. Everybody knows that the prohibition law is not properly enforced; neither can it be until the forces who are in control of enforcement get thoroughly organized. No one could expect a better showing for the time that we have been under prohibition.

Does anyone want to go back to the saloon, with all that it means? Do you want to erect new Keely cures, add numbers to the insane asylums, bring back the darkness to those who have been permitted to see the gloom pass with the hope that they were to be permitted to enjoy life unclouded by drunken debauchery?

The claim is made by some that the Government is depriving them of their liberty. There are certain liberties that have been recognized heretofore that should be taken away. When any liberty that has been granted becomes destructive of human happiness and national prosperity, it should be removed. How does civilization advance? Only by learning what to do and then doing it. It was never intended that one should have liberties that deprived others of all that they hold near and dear in life. Liberty should be a just liberty, and not one that robs little children of their just dues and mothers and fathers in their old days of all that is dear to them.

There is no good reason why the expenses of enforcement should not be largely borne by the collection of fines and sales of property that was seized at the time of making arrests of violators, since the report of Mr. Haynes, the prohibition commissioner, say that there were seized 600 automobiles, 40 boats, 26 wagons and carriages, 45 horses and mules, 1 airplane, 5 motor cycles, $7,500, 10 tracts of land, and 7 stocks of merchandise, all of which, under certain restrictions, can be sold and the money paid into the Government funds.

Only 15 per cent of the former drinkers are now drinking, and they drink only 5 per cent of the amount that was formerly consumed, and the entire drink bill has been decreased $2,000,000,000, all for the betterment of humanity.

What does retreat mean? It means ragged, hungry, cold, uneducated, poverty-stricken, humiliated children; sending the mothers back to the washtub; a disrupted home; it stops many jewels from meeting their glad father at the gate with outstretched arms and a smiling face; it stops the proud smile of the father from meeting the reciprocating smile of the elated mother. If you favor these things, hoist the white flag and beat a retreat. If you do not favor a retreat, fling Old Glory to the breeze, sound the order to march, stop at no difficulty, scale the height of honor, plant the Stars and Stripes upon mount eminence, there to wave forever.

History teaches us that the first temperance society that was ever organized in America, I presume the first in the world, was organized in 1826 at Boston, known as American Society for the Promotion of Temperance. Several years later (1840) six men who knew the evils of the vice of intemperance, from their own personal experience, met in Baltimore, signed a total abstinence, and founded the Washington Temperance Society. That movement did immense good and restored, it is said, a hundred and fifty thousand drunkards to the manhood they had lost through drink. Since then a great change has come over society; "strong drink" still slays its thousands in the United States and elsewhere, but the young man beginning life now has this in his favor; all the best influences are on the side of temperance—70 years ago nearly every influence was on the other side. To the great credit of Maine, in 1846, it established prohibition, the first State to take such a step.

It is said by those who oppose the prohibition law that it is a bad law. How do we test the value of laws? It is said enforce a law and if it is a good law retain it. If it is a bad law repeal it. Give that test to the prohibition law, then if it proves worthless it can be repealed. As much as I favor the law, I will be willing to say that if it is properly enforced and proves detrimental I shall gladly aid in its repeal. But I am not willing for the lawless to declare it is a bad law and ignore or repeal it. No man has a right to claim that he is a good citizen and at the same time ignore and violate the laws of his country after they have been upheld by the higher courts of the land.

Mr. RAKER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the volunteer officers' retirement bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. HICKS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the accomplishments of the Washington conference.

The SPEAKER. Is there objection?

Mr. GARNER. I did not hear the gentleman's request, on what subject?

The SPEAKER. On the accomplishments of the Washington conference.

Mr. LONGWORTH. Is it an eloquent speech?

Mr. HICKS. Very.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The extension of remarks referred to are here printed in full as follows:

Mr. HICKS. Mr. Speaker, of the many important achievements of President Harding's administration, the one which is destined to be most beneficial to America and to all humanity was the inception of the Washington conference. That alone justifies popular approval and public confidence in his administration, and warrants the enthusiastic support of the American people.

Skeptics may belittle the lofty idealism and scorn the noble altruism so strongly voiced at the conference and so cogently expressed in the treaties, yet as President Harding eloquently said in welcoming the delegates:

It is impossible to overappraise the importance of such a conference. It is no unseemly boast to declare that the conclusions of this body will have a signal influence on all human progress—on the fortunes of the world.

All honor is due President Harding and he deserves well of history. Honor is due him not merely because he is the Chief Executive of the Nation which summoned the conference. It is due him because of his unquestioned earnestness and his abiding faith; because of his sympathetic appeal to human consciousness and his calm determination that the peoples of the world should find a fulfillment of their hopes and aspirations. He had the courage of his convictions to chance the possibility that his policy would prove a failure and in the chaotic conditions prevalent in the world, that chance was not remote. His unselfishness and frankness created a feeling of good will and mutual confidence, allaying old suspicions and prejudices. As the delegates saw him, heard him, and came to know him, they trusted him. Then they began to trust one another. In such an atmosphere men's minds can meet without fear or distrust. It has been truly said:

But for the President's sincerity and charm, it may well be doubted if they would have met at all. The conference was the triumph of an ideal and of good will, and Mr. Harding, of all those present, best represented in his person and his character, the American conscience and the American spirit that made it possible and successful.

The exceptional intellectual powers and high statesmanship of Secretary Hughes were never more brilliantly displayed than in the masterful presentation of his subject on the opening day of the conference, so aptly described by Mr. Balfour as "that inspired moment, that fateful Saturday, unique in history." His logic of argument directness of statement, and straightforward avowal of the aims of the convention, and his candid advocacy of the methods by which they could be attained made a profound impression and gave to the deliberations a standard of thought that continued undiminished through all the meetings. His address possessed three elements of greatness—soundness of principle, simplicity of program, and consistency in proclaiming that all international relationships must rest on honor and justice. Who can forget those words of Mr. Hughes in which he declared:

We can no longer content ourselves with investigations, with statistics, with reports, with the circumlocution of inquiry. The time has come, not for general resolutions or mutual advice, but for action.

The conference wrought a complete reversal of the accepted practice of the organized efforts of man. Formerly the extreme expression of voluntary cooperative endeavor has been in the direction of making war. This conference inaugurated a new phase in international relationships, where nations met for the organized purpose of curtailing their power to make war.

The convention has been spoken of as the Battle of Washington and pictured as the greatest naval conflict in all history. It was the most expensive and the cheapest; it heralded the grandest victory and proclaimed the worst disaster. All the nations involved in the conflict were triumphantly defeated and the commanding officers congratulated each other on the result. This naval engagement, which witnessed the destruction of more ships and of greater value than were ever sunk in any war, was fought on dry land, without a shot fired, a life lost, or a flag hauled down. All were victors; all were losers.

The purposes for which the conference met were to reduce and limit armaments and remove the causes of misunderstanding in the Pacific and Far East, thereby diminishing, if not eliminating, the possibilities of a conflict in that portion of the world.

It is well to bear in mind that the inauguration of huge military programs is very largely the result of a state of mind in which the expectation of an attack by one nation prompts another nation to prepare to meet that attack. Such a condition arises largely because of suspicion, and powerful armaments result. Remove apprehension by a common understanding; replace fear by friendship and the need of great military power disappears. The rule of conscience and reason, not the reign of might and hate, should dictate the actions of nations.

To estimate correctly the character and value of these several treaties, resolutions, and formal declarations they should be considered as a whole. Each one contributes its part in combination with the others toward the establishment of conditions in which peaceful security will take the place of preparation for war.

These covenants do more than save the expenditure of vast sums of money; they do more than lighten the burden of staggering debts; they do more than stabilize economic conditions. They go to the very source of international morality and to the hearts of men. They transmute idealism into a concrete proposition, reconcile theory with fact, and vitalize into reality the dream which poets, reformers, and publicists have held before mankind as the goal to which human endeavor should aspire. That goal is peace, fellowship, respect, and honor between nations.

In addition to the tangible results, the conference demonstrated that this method of dealing with world affairs is feasible and practical. It showed that it is a better plan to talk about things than to fight about them, and as this convention proved a success it is a beginning to be greeted with high hope, a fitting basis for future accomplishments.

The naval treaty of the five great sea nations and the four-power agreement achieve many things. They reduce armaments afloat, curtail new construction of capital ships and their armament, prevent ruinous competition in naval programs, and limit fortifications ashore. They retard battleship development, which in the minds of many is rendered obsolete by the advance of aviation. They lighten the stress of financial strain and ease the burden of taxation. They turn our national energies and our resources into the channels of development instead of hurling them into the abyss of destruction. They divert men's minds and actions from proficiency in the arts of war to productivity in the fields of peace. They open up a new phase in the Pacific by destroying an old situation which was full of danger. They create an association of four nations in place of the Anglo-Japanese alliance and they will eventually replace the Franco-Japanese compact. They provide for peace in the Pacific by mutual pledges of the powers to respect the territorial integrity of each. They invite frank consideration and amicable adjustment of controversies. They bar discussion of the Pacific as the scene of a new conflict. They quiet the agitation of the militant element in their weighing of Japanese power against American strength. They bring about, after three centuries of naval superiority, the surrender on the part of the British Empire of the supremacy of the seas. They will give to America in less than a decade and without an enormous outlay of money, naval strength equal to that of Great Britain.

With the ratification of the naval treaty, certain achievements can be measured with accuracy. On the financial side alone its justification is sufficient. There is now under steam or on the ways in the navies of the five great sea powers a capital ship tonnage of 3,341,567. When the treaty shall stand fulfilled there will be 1,811,590 tons of first-line fighting vessels, a discard of 44 per cent, and this tonnage will be reduced to 1,715,000 when replacements are completed. That a reduction in Federal expenditures will result and Navy budgets no longer demand an abnormal proportion of our national wealth is inevitable. By the provisions of the treaty a total of 29 American battleships, built or building, will be scrapped. The signing of the naval treaty met with a quick response in the American Congress in the consideration of naval appropriations for the year ending June 30, 1923, as a comparison of the following figures will demonstrate:

Appropriations for year 1921–22	$426,000,000
Probable appropriations for year 1922–23	275,000,000
Reduction	151,000,000

Great Britain and Japan have also materially reduced their naval budgets.

With the ratification of the four-power treaty, dealing with far eastern questions, any real or imaginary cause for war in the Pacific between the great sea nations will disappear. An agreement satisfactory and honorable to all concerned, neither infringing the rights or alienating the territories of any signatory nation, has been entered into, and it is inconceivable that during the life of the treaty any conflict of interests can lead to war.

Let America and every nation party to the compacts faithfully and honorably observe the spirit as well as the commitments of these treaties, and thereby contribute to international confidence and promote the peace of the world.

Permit me to read this statement from a great educator, a prominent citizen of my State, a noted publicist, and a profound student of world affairs, the president of Columbia University:

If President Harding's administration were to rest its claim of public satisfaction and confidence upon the Washington conference alone, it would be justified. The calling and the conduct of that conference by President Harding marked a long and thoroughly practical step forward, not only in reconstructing a world broken and impoverished by war but in preventing the likelihood of future wars. The Washington conference was a sternly practical body. It dealt not with remote probabilities and theoretical problems but with concrete realities with which the nations were face to face. First of all, it met in an atmosphere and spirit of mutual confidence. From the first personal and national antagonisms and jealousies were put in the background and almost every advanced step that was proposed was quickly hailed with approval by the representatives of the participating powers. The details of the several projects as outlined were worked out in patient cooperation and with the strong purpose of achieving results. The consequence is that at once Great Britain, Japan, and the United States are able sharply to reduce their appropriations for naval construction and naval maintenance, thereby greatly relieving the tax-

payer. Other nations will quickly take similar steps. If what is vaguely called the problem of the Pacific should arise in any acute form, agreement has been made as to a mode of approaching and solving that problem in a spirit of confidence and peace rather than in a spirit of antagonism and war. The great congeries of peoples and local governments known as China has been protected against exploitation by alien forces and given a new chance to establish itself upon a firm basis as an independent and self-controlled State.

In human affairs progress is made not by passing resolutions but by taking action. The Washington conference took action, and therefore it made progress.

A great deal remains to be done, and in that the United States must play, in its own interest and in accordance with its own ideals, a very important part. The Washington conference has paved the way for what is to follow by manifesting a spirit of international confidence and cooperation and by proving how much that spirit can accomplish.

NICHOLAS MURRAY BUTLER.

Mr. Speaker, no more fitting conclusion to this review of the treaties can be expressed than by quoting the inspired words of the President in congratulating the delegates on their work:

This conference has wrought a truly great achievement. It is hazardous sometimes to speak in superlatives, and I will be restrained. But I will say, with every confidence, that the faith plighted here to-day, kept in national honor, will mark the beginning of a new and better epoch in human progress.

In the revealing light of the public opinion of the world, without surrender of sovereignty, without impaired nationality or affronted national pride, a solution has been found in unanimity, and to-day's adjournment is marked by rejoicing in the things accomplished. If the world has hungered for new assurance, it may feast at the banquet which the conference has spread.

It has been the fortune of this conference to sit in a day far enough removed from war's bitterness, yet near enough to war's horror, to gain the benefit of both the hatred of war and the yearning of peace. Too often heretofore the decades following such gatherings have been marked by the difficult undoing of their decisions. But your achievement is supreme because no seed of conflict has been sown, no reaction in regret or resentment ever can justify resort to arms.

It little matters what we appraise as the outstanding accomplishments. Any one of them alone would have justified the conference. But the whole achievement has so cleared the atmosphere that it will seem like breathing the refreshing air of a new morn of promise.

You have written the first deliberate and effective expression of great powers, in the consciousness of peace, of war's utter futility, and challenged the sanity of competitive preparation for each other's destruction. You have halted folly and lifted burdens, and revealed to the world that the one sure way to recover from the sorrow and ruin and staggering obligations of a World War is to end the strife in preparation for more of it, and turn human energies to the constructiveness of peace.

No intrigue, no offensive or defensive alliances, no involvements have wrought your agreements, but reasoning with each other to common understanding has made new relationships among governments and peoples, new securities for peace, and new opportunities for achievement and attending happiness.

Here have been established the contacts of reason, here has come the inevitable understandings of face-to-face exchanges when passion does not inflame. The very atmosphere shamed national selfishness into retreat. Viewpoints were exchanged, differences composed, and you come to understand how common after all are human aspirations; how alike, indeed, and how easily reconcilable are our national aspirations; how sane and simple and satisfying to seek the relationships of peace and security.

When you first met I told you of our America's thought to seek less of armament and none of war; that we sought nothing which is another's, and we were unafraid, but that we wished to join you in doing that finer and nobler thing which no nation can do alone. We rejoice in that accomplishment.

NOTES ON THE TREATIES.

The treaty for the limitation of naval armaments contains the following provisions:

The number and total tonnage of capital ships to be retained is as follows:

	Number.	Tonnage.
America	18	525,850
Great Britain	22	580,450
France	10	221,170
Italy	10	182,800
Japan	10	301,320

Article II provides that when the treaty becomes effective all other capital ships than those named in the treaty "built or building" by the five powers shall be scrapped.

Article III constitutes an agreement by the powers to abandon their respective capital-ship building programs and neither to build nor acquire any new capital ships except under the replacement agreement.

Article IV is the naval ratio agreement, and it gives in standard displacement tonnages the aggregates for capital ship replacement as follows:

	Tons.	Ratio.
United States	525,000	5
Great Britain	525,000	5
France	175,000	1.75
Italy	175,000	1.75
Japan	315,000	3

The powers agree not to exceed these aggregate tonnages.

Article V fixes 35,000 tons as the maximum for any capital ship.

Article VI provides that no ship shall carry a gun exceeding 16-inch caliber.

Article VII fixes the total tonnage of aircraft carriers as follows: United States and Great Britain, each 135,000; France and Italy, each 60,000; Japan, 81,000.

Article IX fixes the limit of each aircraft carrier to 27,000 tons, but by a special exception the contracting powers are permitted to build not more than two aircraft carriers of a tonnage not to exceed 33,000. In order to effect economy, the scrapping of capital ships as provided for in Article II is qualified by granting permission to any of the contracting powers to use for the purpose of constructing aircraft carriers any two of their ships, built or building, which otherwise would be scrapped, providing these ships do not exceed 33,000 tons.

Article X limits the size of guns that aircraft carriers may carry to 8 inches and limits the number to 10 for a 27,000-ton carrier and to 8 for a 33,000-ton carrier.

Article XII provides that no vessel hereafter laid down, except capital ships, shall carry guns in excess of 8-inch caliber.

Article XIII provides that no vessel which is liable to be scrapped shall be reconverted into a warship.

Article XIV provides that no preparations shall be made on merchantmen in time of peace for the purpose of converting such vessels into warships "other than stiffening the decks for mounting guns not exceeding 6-inch caliber."

It is laid down that warships to be scrapped must be treated so that they "can not be put to combatant use." The scrapping may be effected by sinking, breaking up, or conversion into targets.

It is also provided that, with the exception of ships lost or accidentally destroyed, no replacement tonnage shall be laid down until 10 years after November 12, 1921. This is the so-called naval holiday.

Article XIX provides that the present situation in the Pacific in reference to fortifications or naval bases shall be maintained. In relation to these fortifications, the United States has agreed not to extend the fortifications of the Philippines and not to begin land works in Guam, Samoa, the Aleutian Islands, nor in any other Pacific possession with the exception of Hawaii. Japan on her part has agreed not to extend the fortifications in her island possessions, and Great Britain has similarly agreed not to fortify Hongkong further.

The treaty provides that all these stipulations shall remain in force until December 31, 1936, and if none of the powers have given notice two years before that date of their intention to terminate the treaty it shall continue in force until the expiration of two years from the date notice is given.

The treaty relating to insular possessions in the Pacific (four-power pact) provides that for the preservation of the general peace and the maintenance of national rights, if there should develop between any of the high contracting parties a controversy arising out of any Pacific question and involving their said rights which is not satisfactorily settled by diplomacy and is likely to affect the harmonious accord now happily subsisting between them, they shall invite the other high contracting parties to a joint conference to which the whole subject will be referred for consideration and adjustment.

If the said rights are threatened by the aggressive action of any other power, the high contracting parties shall communicate with one another fully and frankly in order to arrive at an understanding as to the most efficient measures to be taken, jointly or separately, to meet the exigencies of the particular situation.

MEMORIAL EXERCISES.

Mr. MONDELL. Mr. Speaker, as I understand it, the House will be in session to-morrow at 12 o'clock for the purpose of holding special services.

The SPEAKER. The House will meet in session at 12 o'clock to-morrow for the purpose of holding memorial exercises.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 40 minutes p. m.) the House, under its previous order, adjourned until to-morrow, Sunday, May 28, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

619. Under clause 2 of Rule XXIV, a letter from the Acting Secretary of the Navy, transmitting a draft of a bill for the relief of the Royal Italian Government for losses sustained by collision of the tug *Mahorney* with the barge *Anode*, was taken from the Speaker's table and referred to the Committee on Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. NEWTON of Minnesota: Committee on Interstate and Foreign Commerce. H. R. 11634. A bill granting the consent of Congress to the county of Norman and the town and village of Halstad, in said county, in the State of Minnesota, and the county of Traill and the town of Herberg, in said county, in the State of North Dakota, to construct a bridge across the Red River of the North on the boundary line between said States; without amendment (Rept. No. 1037). Referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. NEWTON of Minnesota: A bill (H. R. 11822) to amend the interstate commerce act and the transportation act of 1920; to the Committee on Interstate and Foreign Commerce.

By Mr. VAILE: A bill (H. R. 11823) to amend section 402 of the war risk insurance act; to the Committee on Interstate and Foreign Commerce.

By Mr. MADDEN: Joint resolution (H. J. Res. 339) making available funds for repairing and restoring levees on the Mississippi River above Cairo, Ill.; to the Committee on Appropriations.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DUPRÉ: A bill (H. R. 11824) to place John R. Harrell, of New Orleans, La., on the retired list of the Navy, with the rank of lieutenant; to the Committee on Naval Affairs.

By Mr. LANHAM: A bill (H. R. 11825) authorizing the removal of the restrictions from 40 acres of the allotment of Isaac Jack, a Seneca Indian, and for other purposes; to the Committee on Indian Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5821. By Mr. ANSORGE: Petition of Knickerbocker Chapter, Daughters of the American Revolution, New York City, urging passage of H. R. 6774, asking that Yorktown, Va., be made a national park; to the Committee on Military Affairs.

5822. By Mr. GERNERD: Petition of evidence in support of H. R. 11810, granting an increase of pension to A. Laurie Nicholson; to the Committee on Pensions.

5823. By Mr. KNIGHT: Resolutions adopted by Summit Lodge, No. 203, International Association of Machinists, of Akron, Ohio, demanding the United States Government recognize the present Russian government; to the Committee on Foreign Affairs.

5824. By Mr. KISSEL: Petition of the Bank of America, New York City, N. Y., urging the reappointment of Hon. W. P. G. Harding governor of the Federal Reserve Board; to the Committee on Banking and Currency.

5825. Also, petition of Martin J. Gillen, New York City, N. Y., relative to the Morse case; to the Committee on the Judiciary.

5826. By Mr. SUMMERS of Washington: Resolutions indorsing House bill 9753, adopted by the Presbytery of Columbia River, South Bend, Wash., signed by Ernest A. Reed, presiding officer, and Grant Merchant, secretary; to the Committee on the District of Columbia.

5827. Also, resolutions adopted by the Central Washington Presbytery, Naches, Wash., signed by Daniel S. Brown, secretary, indorsing House bill 9753. Senate Joint Resolution 31, and House Joint Resolution 131; to the Committee on the Judiciary.

5828. By Mr. SWING: Petition of various citizens of Chino, Calif., protesting against House bill 9753; to the Committee on the District of Columbia.

5829. By Mr. VARE: Memorial of the Pennsylvania State Chamber of Commerce, asking passage of amendment providing for taxation of State and municipal securities; to the Committee on Ways and Means.

5830. By Mr. YOUNG: Resolution of the North Dakota State Federation of Labor, urging reclamation in the Mississippi and Missouri Valleys; to the Committee on Flood Control.

HOUSE OF REPRESENTATIVES.

SUNDAY, *May 28, 1922.*

The House met at 12 o'clock noon, and was called to order by Mr. MONTAGUE as Speaker pro tempore.

Rev. Page Milburn, of Washington, D. C., offered the following prayer:

Lord, Thou hast been our dwelling place in all generations. Before the mountains were brought forth, or ever Thou hadst formed the earth and the world, even from everlasting to everlasting, Thou art God.

Thou art our God. We worship Thee, and we come to Thee with our prayer this morning that Thou wilt manifest Thy presence and power and grace unto every heart. And as we remember one who gave himself in service to humanity and to the State, we ask that Thy blessing may rest upon those who take part in this service and upon all who shall hear the words spoken, and that to each heart there may come inspiration to go out and serve the Nation, serve the people, and in doing so serve the Almighty God, the Father of us all.

And as we remember those who gave their lives to preserve the Union, who laid down at the feet of the people and of the Nation all that they had and all that they were, and as we shall in a day or two strew upon their graves flowers of beauty and of fragrance, may we remember their lives, and dedicate our lives again unto the service of this great country and of the world.

We ask of Thee that Thou wilt forgive us all our sins, for we have fallen far short of the glory of God. Fill us with the inspiration to do that which is right and pleasing in Thy sight. May we be what Thou wouldst have us be, and do what Thou wouldst have us do, and go where Thou wouldst have us go; and after this life is over may we look forward to that other service at the right hand of God. Through Thy Son who taught us to pray and taught us to exalt Thee.

And may the blessing of the Father, and of the Son, and of the Holy Ghost rest upon and abide with us all evermore. Amen.

The SPEAKER pro tempore. Without objection the reading of the Journal will be deferred.

There was no objection.

THE LATE REPRESENTATIVE FLOOD, OF VIRGINIA.

The SPEAKER pro tempore. The Clerk will report the special order of the day.

The Clerk read as follows:

On motion of Mr. MONTAGUE, by unanimous consent,

Ordered, That Sunday, May 28, 1922, be set apart for addresses on the life, character, and public service of Hon. HENRY D. FLOOD, late a Representative from the tenth district of the State of Virginia.

Mr. TUCKER. Mr. Speaker, I offer the following resolution.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read as follows:

House Resolution 356.

Resolved, That the business of the House be now suspended that an opportunity may be given for tributes to the memory of Hon. HENRY DELAWARE FLOOD, late a Member of this House from the State of Virginia.

Resolved, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of these exercises, shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolution was agreed to.

Mr. TUCKER. Mr. Speaker, HENRY DELAWARE FLOOD was born on the 2d day of September, 1865, in the county of Appomattox, Va., and died December 8, 1921, in the city of Washington. His early education was acquired at local schools in his own county, after which he attended the academic department of the Washington and Lee University, and subsequently graduated in law at the University of Virginia.

His father was Maj. Joel W. Flood, who himself was a citizen of Appomattox County all of his life and the member of a family which had been long noted for its probity and high standards of life. His mother was a daughter of Hon. Charles James Faulkner, of Martinsburg, W. Va. She was a woman of many charms and had been reared in an atmosphere of refinement and culture. Her maternal grandfather was Elisha Boyd, of Berkeley County, who himself had occupied a prominent position in that county for many years.

Mr. FLOOD graduated in law at the University of Virginia on June 30, 1886, and at once began the practice of his profession in the county of Appomattox, which he continued actively to the day of his death, except for the interruptions which an active

political life necessarily brought. Soon after he was admitted to the bar he was elected to the General Assembly of Virginia, in 1887, and so strong was his hold upon the people of his county that, I think, he held office continuously from that time to the day of his death, in 1921. He was Commonwealth attorney of his county for nearly 10 years, serving with ability and efficiency, and was elected, after he had served several terms in the General Assembly, to the Senate of Virginia from the district composing the counties of Appomattox, Buckingham, and Fluvanna. In 1896 he was nominated for Congress at Amherst Courthouse by the convention of the tenth district of Virginia. In this election he suffered defeat, but in 1900 he was again nominated for Congress, and held that position, practically without opposition in his party, from that day to his death.

He was chairman of the Committee on Territories of this House and the author of the resolution admitting Arizona and New Mexico to statehood. He was chairman of the Committee on Foreign Affairs from January, 1913, to March 4, 1919, and April 2, 1917, introduced the resolution declaring a state of war to exist between the United States and the Imperial German Government, and on December 5, 1917, the resolution declaring war on the Imperial and Royal Austro-Hungarian Government. During the war, as chairman of this great Committee on Foreign Affairs, his duties were most onerous and exacting, and no committee of the House was concerned with greater or more important problems than that over which he had the honor to preside. He was a member also of the Virginia constitutional convention which assembled in 1902. He was a member of the Virginia debt commission, involving the controversy between Virginia and West Virginia on the old debt, and in this work he was active and efficient, and lived to see the final adjudication of this question in favor of his native State determined by the Supreme Court of the United States. During the last year of his life he was elevated to the position of chairman of the Democratic Party of the State of Virginia, and he was also chairman of the Democratic national congressional committee. His life was, indeed, a full one, and in every position to which he was assigned he exhibited those qualities which distinguished him in life, great energy, untiring work, enthusiasm, and ability.

Mr. FLOOD was born at the close of the greatest revolution that had ever convulsed this country, and born at the spot where the immortal Lee surrendered the remnant of his unrivaled army; and he came to manhood in the midst of another great political revolution which was shaking the foundations of "the Old Dominion." He was, indeed, the child of revolution, and it had much to do in forming his character and accounting for the aggressive spirit which he exhibited to advantage so often in the field of politics. No man who can recollect the conditions in Virginia between 1865 and 1885 can wonder why such surroundings should produce men of the strongest fiber. The Confederate soldier returned home with broken fortune, often with broken health, to find the farm wasted, labor disorganized, and the newly enfranchised race wandering from place to place, aimlessly seeking the realities and joys of freedom, and usually finding none. Their condition was pathetic. How well I remember it as a boy, especially the older negroes, whose fidelity to master and mistress had never failed, now restless, roving aimlessly from plantation to plantation, going to town or to the courthouse, week by week and month after month, hoping to receive the long-promised 40 acres and the mule. The old negro soon became the toy of the carpetbagger, the plaything of the scalawag. These faithful, deluded souls passed the last days of their lives amid disappointments and delusions.

The younger class, more readily accepting the poisonous doctrines of the political intriguer, were taught and soon learned the lesson of distrust of their only friends, their former owners and masters; and when the fifteenth amendment accorded them the right of suffrage, they were led like sheep to the shambles and corralled by wicked and designing men for the perpetuation of untold indignities on the white people about them. In many places in the South, in many places in Virginia, of which Appomattox was one, and the adjoining counties, the voice of the whites was silent before the black majorities which existed in those counties. The Confederate soldier that climbed the heights of Gettysburg, or laid in the trenches at Petersburg, regarded those trials as trivial compared to those that now faced him in the struggle for the supremacy of a civilization which had been the glory of "Old Virginia" since her foundation. The contest might be long, but the issue could never be doubtful. That issue made every man a politician, for politics then meant the supremacy of white civilization over that of ignorance and corruption.

The father of our deceased colleague was a prominent actor in those days in the county of Appomattox. He was a man of commanding presence, great courage, and sound judgment. This one subject engrossed the attention of the people in all of their assemblies—at the church, before and after the service, at the courthouse, at the blacksmith shop, at the store. Every man communed with his neighbor and his friends. In the home, at the fireside, at the table, all subjects were as nothing compared with the threatened destruction of life, liberty, and property, which seemed impending. The child of the family, with its first flash of intelligence, became an interested listener and participated in the family discussions.

HENRY D. FLOOD was brought up amid these stirring times, and I remember him as a boy, and remember how the condition of his country had aroused his nature and made him in boyhood and early manhood a leader among his elders. The record of his life shows that he attained to many high distinctions, but I greatly doubt whether his services were ever more useful or effective than in the early days of his life, when he so unselfishly devoted his energies to the maintenance of white civilization in Virginia.

As I look upon the fair fields of Appomattox County to-day, as I travel through its bounds and compare them with the condition 35 years ago, the change has been marvelous. I recall my visits to that county years ago, while the struggle was still on and before the victory had been finally won. I recall the wasted condition of the farms, untilled and growing up in weeds and brush, the lack of suitable and necessary furnishing of the houses, the inefficiency of labor, the poor horses and indifferent cattle, the gully-washed land, and impassable roads. It made one realize fully "the abomination of desolation," spoken of in the Scripture.

Others who have served with him will speak of Mr. FLOOD's position as a Member of this House for nearly 22 years, and of his long service in the legislature of Virginia, but I believe the people of Appomattox, who knew him best and loved him well, when they come to consider his long record in public life will accord to him a more fruitful service to his people in his home county in the preservation of its ancient civilization than he has rendered in any other field of service.

In the last analysis, the best estimate of a man is found among his neighbors at home, and we find among the resolutions adopted at Appomattox after his death by the farmers assembled on the 17th day of December, 1921, a beautiful tribute to their deceased friend, and I ask attention to the resolutions passed at a mass meeting of the Democrats of Appomattox on the 28th of January, 1922. These resolutions were drawn by Hon. Samuel L. Ferguson, Mr. FLOOD's lifelong friend, and fittingly describe the admiration and affection of the author and the Democrats of Appomattox for Mr. FLOOD:

Whereas HENRY DELAWARE FLOOD departed this life on the 8th day of December, 1921; and

Whereas for more than 20 years this able, brave, and tender man in every storm of life was oak and rock, but in the sunshine was vine and flower. The friend of all heroic souls, he climbed the heights of great men, and where manhood's evening almost touches noon and while the shadows scarcely fell toward the east he wrapped the drapery of his couch about him and lay down to rest; and

Whereas it was by the Democrats of Appomattox County that he was first honored with a position of trust, and upon which he builded his great and marked career; and

Whereas the Democrats of Appomattox County, in mass meeting assembled, on this 28th day of January, 1922, to elect delegates to the district convention to nominate a successor to him in the Congress of the United States, desire to express their sorrow for his death and their appreciation for his life and service: Thereupon be it

Resolved—

First. That Appomattox has lost its ablest and most distinguished citizen, a man whose high character and upright life have been an example to his fellow men. Both as a Christian gentleman and as a citizen he so conducted himself throughout his life as to win from his countrymen a verdict of unstinted respect, honor, and praise. He loved his native county and countrymen and used his best efforts to further their every interest; he sympathized with the weak; was the friend of the poor; with a willing hand gave alms, and with a loyal heart and pure hands he faithfully discharged his duties as a good citizen.

Second. That in the death of HENRY DELAWARE FLOOD the Nation and his native State have lost one of its ablest and most influential statesmen, and the tenth congressional district, which he served with such marked distinction and patriotic fidelity for more than 20 years, its best-beloved public official, and one who dealt with them with such frankness and sincerity that he won their confidence, admiration, and esteem.

Third. That the Democratic Party of Virginia has lost an able chairman and leader, a wise and safe counsellor; that he virtually sacrificed his life in the service of his party, for it was while leading his party to the most successful victory it has had in the past 20 years, coupled with the strain of official duties and as chairman of the national congressional committee, that the bounds and limitations of physical endurance were broken and exhausted nature fell upon her shield; that the Democrats of Appomattox County will ever revere and cherish his services and memory, for it was largely through his efforts that this county was wrested from the grip of the common enemy and Negro domination, and "The flower we will lay upon his tomb is the forget-me-not, the emblem of enduring affection."

Fourth. That we deplore the loss of the great service which he so generously and unselfishly rendered to his county, State, and Nation.

Fifth. That the sincere sympathy of the Democrats of Appomattox County be extended to the family of our deceased friend in their great bereavement.

Sixth. That the secretary of this mass meeting send a copy of this resolution to the members of his family, and that a copy be spread upon the minutes of the Democratic county committee, and a copy published in the county paper.

To those who loved and admired him, to his family, his friends, and his neighbors, I extend my sincere and hearty sympathy in his death.

Mr. HARRISON. Mr. Speaker, HENRY DELAWARE FLOOD was born in Appomattox County on September 2, 1865, within a few miles of the historic battle field and a few months after the epochal event that transpired there. He was of distinguished parentage on both sides of his family. His father, Maj. Joel W. Flood, was a distinguished Virginian, who traced his ancestry from the Irish orator and patriot, Henry Flood. His mother was the daughter of the late Charles James Faulkner, who was conspicuous for many years in the national life. He was at one time ambassador to France under Buchanan's administration and served in both branches of Congress.

Major Flood evidently had a full conception of the responsibilities which must be faced by the then rising generation, and determined to give his son the advantages of scholastic training. HENRY DELAWARE FLOOD was an alumnus of both the great universities of Virginia, and by both in after life was he honored. Washington and Lee University conferred upon him its highest honorary degree, that of doctor of laws, and for eight years he was a member of the board of visitors of the University of Virginia, and as such rendered loving service to his alma mater during some critical years of her existence.

Born amid the embers of the ancient civilization which had made Virginia the mother of States and statesmen, reared amidst the chaotic scenes of the birth of a new era, inheriting from a long line of ancestry the hero spirit which faces battle with adverse elements with the determination to conquer, it is not surprising that we find him a leader in his section before he had hardly obtained his majority.

In 1886, as soon as he reached the age of 21, he begins the practice of law. In the next fall he enters political life and is elected to the General Assembly of Virginia. From that time on for 35 years he becomes more and more prominently identified with the political life of the Nation.

In 1896 he was the candidate of his party for Congress. Owing to a technical error he was under the letter of the law entitled to the certificate of election and by the State authorities it was tendered to him. He was, however, in fact, defeated by a few votes less than 100. Let it be recorded to his honor that he refused an honor which was his only by the letter of the law and not according to its true intent.

For eight years he was in the Virginia Legislature, for a number of years Commonwealth's attorney, and a member of the constitutional convention. In 1892 he was a presidential elector. From 1901 to 1921 a Member of the House of Representatives.

His career in the House of Representatievs was that of a trusted leader. When the Democratic Party controlled Congress he always headed one of the important committees. As chariman of the Committee of States and Territories he was the patron of the bill admitting Arizona and New Mexico to Statehood. Two stars in the American Flag were placed there by his untiring efforts.

It was as chairman of the Committee on Foreign Affairs that he played a great and commanding part. It was his duty to present the resolution declaring a state of war against Germany. In this crowded Chamber, with a listening world, he stated America's attitude upon entering the war with an eloquence and a completeness that left no room for criticism or hesitancy. In all the war measures that were rendered necessary, without faltering, without seeking favor, he used his great influence to secure the passage of all such measures that were the most efficient. Never a political trimmer, he led public opinion, so that the political trimmer in this great crisis was scourged from the temple. America owes him a great and lasting debt for the early triumph of her arms.

He became a leader in the councils of his party. He was chairman of the Democratic campaign committee and he was chairman of the Democratic State committee of Virginia, and as such led his party to its most notable victory in the last political campaign. A hard and persistent fighter, he never struck a blow below the belt. His political foes met a foeman worthy of their steel, but never one whom they feared to meet in the dark.

And so in the glory of his powers his career ended by his untimely death, beloved by a host of friends and respected and admired by all. He died with his armor on, battling for God and country at the time when in reclamation work the need of his country for devoted service was the sorest. The path to yet higher honors lay bright before him, but when the summons came he was still the Virginia chevalier, sans peur et sans reproche. He laid him down with the draperies of his couch about him to pleasant dreams, the honors of achievements past thick about his pillow, and earthly triumphs yet to come forgotten in the glories of his Savior's smile.

He was a successful business man and delighted especially in the farm. It is difficult to draw the screen that hides from the public gaze the domestic happiness of the public leader, but how beautiful his home life was we who were close and near to him were privileged to know. He married most happily on April 18, 1914, Miss Anna V. Portner, and was the father of two children. I shall not attempt to draw a picture of that lovely Virginia fireside where as husband and father he presided with fostering tenderness. Heaven furnishes no happier forerunner of the bliss to come than the home where love rules and no tears and partings are known.

I shall obtrude here but briefly my own personal loss. He was always ready to sacrifice his personal ambitions to the good of the common cause. But when he was a friend no one had a truer, more self-sacrificing support than he. There was no sacrifice that he would not make for his friend. I have been the recipient of too many instances of this not to bear my testimony to his unselfish heart.

We entered public life together. For eight years we served in the Virginia Legislature together. We came together again in the constitutional convention, and again we were brought into close association in Congress, and we were both in public life all the intervening years. I loved him with an affection superior to a brother's love. It is hard to bid farewell to earthly association with all its sweetness, but as I bid farewell I greet a memory immortal in its beauty, which will abide with me while my heart beats.

Mr. LINTHICUM. Mr. Speaker, in expressing myself upon the death of my esteemed and cherished friend, the Hon. HENRY DELAWARE FLOOD, I can find no better words than those found in the memorial address on the Hon. Champ Clark expressed by Mr. FLOOD himself, when he said, "I held his character and his great service to mankind and his country in the very highest esteem; I admired his splendid talents, his magnificent loyalty to principles and to friends, his courage, his lovable traits of character; and I was bound to him by ties of friendship which continually grew stronger."

It was at the first meeting of the Foreign Affairs Committee of the House of Representatives at the extra session called in April, 1911, that I met Mr. FLOOD. From then until the time of his death I served with him as a member of that committee, during six years of which time he was chairman of the committee, and during which six years the greatest questions which probably ever confronted that committee and Congress, those relating to the great World War, were met and disposed of with great dispatch and honor.

Mr. FLOOD was lovingly known by all of the Members of the House as "HAL" FLOOD; he was most affable, courteous, and gentlemanly; he represented the older type of the Virginia gentleman and planter. He was a lawyer by profession, but after he entered Congress he devoted his every energy and activity to the fulfillment of his duties as a Member of this House. Few men have been more conscientious in their obligations to their constituents and to the country; few have given greater time and study to the subjects which confronted them as a Member of Congress and as member and chairman of the Foreign Affairs Committee.

He was a student of international law and had given great study to those decisions and treaties which grew out of the relations between our country and foreign nations. Just prior to the war and during the war itself I was particularly gratified to find that we had a chairman who had given his time and attention to precedents which should rule us in our decisions upon the various questions that arose.

Prior to the war Mr. FLOOD endeavored to hold the committee and himself to strict neutrality, but when war was declared by our Government against the Central Powers his great ambition was to further those measures which would bring success to the American arms and those of our allies, to those measures which would shed luster and glory upon American achievements. His debates in the House were strong, well prepared, and con-

vincing; in every line of his remarks could be found that stern earnestness of purpose and honesty of intention.

Mr. FLOOD was a man of decision, and having decided, his every energy was put into action to carry into effect that decision. He was a Democrat, and being a man of the caliber I have described, he was a strong, militant Democrat. He believed in every man making his decision, and after making it to advocate it by every honorable means. He held no grudge against any man whose decision was different from his, but he never ceased to fight to make his prevail. He was a man of many friends, for whom he had the greatest love and admiration. He was willing to go out of his way to help them at any time, and I verily believe much of the interest he took in public life was because it enabled him to meet people and make friends, and by his manner and attachment to bind them more closely to him throughout life. He therefore left not alone in his own district nor even in the great Commonwealth of Virginia thousands of friends, but through his close connection and work in Congress they are scattered throughout the land.

I said he was a student of international law; that he was a trained Representative. I may add that his early training and education well equipped him for the positions which he afterwards attained in life. He was a graduate of the Washington and Lee University and the University of Virginia, a member of the Phi Beta Kappa fraternity and other fraternities, and held the degree of doctor of laws from the Washington and Lee University. He had served in both branches of the General Assembly of Virginia and had introduced and secured the passage of a law providing for a constitutional convention of that State and was a member of the convention. As a lawyer he held the high position of attorney for the Commonwealth for Appomattox County. It will be seen, therefore, that physically, mentally, and by education and training he was destined to the high position which he held in this the greatest parliamentary body in the world.

The hearts of all of us go out to his widow and children in their sad bereavement—a father cut off in the very prime of life when so many honors no doubt still awaited him. He has gone to his reward, his place in the hereafter is assured. He acted well his part in life and did those things which should entitle him to everlasting glory. Nothing we can say to-day will add one bit to his splendid character and great record of deeds done; he was just, he was considerate, he loved the right and hated the wrong. Death can not deprive him of the riches of service and self-sacrifice. Men who have so lived will never die, and as the years roll by and the works of this great Virginian are better known the greater will be the admiration of his countrymen.

Thou sleepest not; for now thy love hath wings
To soar where hence thy hope could hardly fly.

And often, from that other world, on this
Some gleams from great souls gone before may shine,
To shed on struggling hearts a clearer bliss
And clothe the right with luster more divine.

Mr. WOODS of Virginia. Mr. Speaker, HENRY DELAWARE FLOOD, whose life and achievements we here commemorate and whose death we mourn to-day, was the friend of my late brother since their college days, spent together at the University of Virginia, and later as coworkers in the general assembly. Our friendship, at the beginning thus inherited, with acquaintance ripened into an affectionate and lasting attachment.

If frailties exist in human character they became apparent to the fellow student and the fellow lawmaker, but our late friend's character so well stood this scrutinizing, unerring, trusty test of merit that without exception the friends of his college and legislative days were his friends always. This could not be said concerning one of less sterling worth or less deserving of friendship. No man had friends more devoted; no man more richly deserved them.

Perhaps his most marked characteristic was his zealous loyalty to the friends he loved and the causes he espoused.

He entered public life as a young man when Virginia was just emerging from the travail of misrule she had suffered since the Civil War. Political strife ran high. Those who had misruled through the power of an unrestricted and, in large measure, an ignorant electorate were clinging in desperation to their fading political power and resentful of the brave spirits who would wrest it from them. Crimination and recrimination were everywhere heard. Young FLOOD felt the State's call to service and with unflagging zeal and dauntless courage entered the lists and redeemed his section of the State, and from that time onward he actively engaged in practically every political contest.

His successes and achievements were not accidental, as is shown by his steady advancement. In fact, no really great life is an accident. In 1887, when but 22, he became a member of the General Assembly of Virginia and faithfully devoted 14 years of his life to that service. Ten years he served as Commonwealth's attorney, two years as a member of the constitutional convention—the most distinguished body convening in the State in the last half century—and closing his life as chairman of the dominant party in the State after a brilliant and triumphant campaign. He had lived to see the consummation of his labors with others on the State debt commission and the final settlement of a question which for 50 years had disturbed the State.

Looking back over his life of public service the people of the State he loved can say with peculiar emphasis, "Well done."

More than 20 years he served in Congress. Here likewise his service was able, fearless, and faithful, leading to his advancement finally to the chairmanship of the Committee on Foreign Affairs and of the national congressional campaign committee.

A man of positive character and conviction, he held hypocracy, dissimulation, and equivocation in contempt. There was never any doubt as to where he stood on public questions or when conflicts arose even between his friends. He was a partisan, but in the larger sense, because he felt that through his party he could best accomplish his patriotic purpose and best promote the highest interest of his State and Nation. He was a politician, but likewise in the larger sense, in that he recognized politics as the science of government whose highest, most beneficent aims can be achieved only by party organization. But above all he was a patriot. He loved Virginia and the Nation; and to him whatever seemed their highest welfare marked the pathway of his duty; and, however rugged, whatever the sacrifice, he followed it with rare zeal and unhesitating courage.

His broader patriotism is shown in his record as chairman of the Committee on Foreign Relations covering the period of the Wilson administration and the war. So considerate was he of the views of his fellow committeemen, including the minority, so well did he guide the course of the committee through that trying period, and so profoundly did he impress them with the loftiness of his purpose that there was never a division in his committee on partisan lines. This fact constitutes a tribute alike to his ability and his patriotism.

The same patriotic zeal, energy, and ability which first caught the attention of his fellow members in the general assembly and led to his election to Congress marked likewise his course in this body, where promotion followed promotion and brought to him in rare degree not only the esteem and confidence but in large measure the affection of his colleagues.

His friendship attachments throughout the State were strong, and deservedly so. His aggressiveness, his genius for organization, his lifelong public service, and his party zeal were so well recognized that when a year ago a vacancy occurred in the State chairmanship he was unanimously elected to fill the vacancy. Disregarding the warnings of his physician, his strenuous work in the campaign no doubt intensified the fatal malady that had fastened itself upon him and perhaps hastened his death.

He has joined that galaxy of most useful public servants, Senator Martin and Congressmen Jones, Watson, Saunders, and James, who were so lately his intimate confiding associates in public service, and whose recent passing has so bereft the State.

His public life was marked by candor, courage, and zealous patriotism. His private life was exemplary. He was faithful to home, to friends, to every trust, and ever exercised a thoughtful, tender devotion to his loved ones. To the graces of chivalry, urbanity, and gentle culture he added in full measure the fundamental—alas, so-called homely—virtues of speaking the truth, paying his debts, and dealing justly with his neighbor, without which no man can achieve true greatness. As with moistened eye we look back over his life of earnest devotion and achievement, and, above all else, see it crowned with a Christian character—the only thing worth living for, the only thing worth dying for, the only thing worth a true man's striving to attain—it gives us assurance that he lives again. To his family he has left the rich legacy of an untarnished name, and to his friends the priceless testament of a worthy example. I cherish with pride the memory of his friendship and shall ever feel keenly his loss. Virginia loved him, and so long as beats the great heart of the old Commonwealth will the bosoms of her children thrill with pride at the speaking of his name.

Green be the turf above thee,
Friend of my better days;
None knew thee but to love thee,
None named thee but to praise.

Mr. DREWRY. Mr. Speaker, the last time I delivered an eulogy on this floor little did I think that the man who sat just in front of me listening so courteously to my remarks on our mutual friend, Senator Martin, would so soon be gone and that it would be my sad duty to express myself concerning him. Such thoughts bring us nearer the Infinite, and I do not know but what it is the proper spirit in which to take part in these exercises. It is well to feel that the presence of our friends is about us, even though they have gone away. It is well, too, that we are allowed to speak our tribute of affection and friendship, even though they can not hear our grief-laden voices nor see our tear-dimmed eyes. Living we do not say to each other the things we would, and it is some slight compensation that we can voice our sorrow when we may hope the departed one's spirit hovers around. This room, Mr. Speaker, is filled with memories—to me—of "HAL" FLOOD. As dean of the Virginia delegation he stood with me when I took the solemn oath to serve my country. As a new Member I listened to his voice, raised always in behalf of what he thought was right, fearlessly, aggressively, and forcefully stating his views on matters of legislation. Here on this floor and in these halls of the Capitol I walked with him and I talked with him, and came to know him well and to love and admire him and call him my friend. Such memories are about me as I rise, Mr. Speaker, to pay my tribute to his memory.

I suppose every man who amounts to anything in the world of men has some outstanding characteristic around which his other characteristics cluster. To me the most striking characteristic of "HAL" FLOOD was his courage—not merely physical courage, though he possessed that in a marked degree, but his mental courage as well.

He was of that coterie of gallant spirits who faced in early manhood the severest test of any men in the country's history—that of reconstruction in the South in the years following the four years of strife and war. No one who did not live in Virginia and other Southern States after that conflict, or who has not lived in the stories of those who participated, can fully realize what it meant to the proud blood of men born to dominate and to lead when they had borne into their consciousness the evils of those days of poverty and subjugation.

I care not to paint the picture, and could not if I would, show it in its awful reality. "Reconstruction," as the South called it, was a horrible nightmare—a necessary result, maybe, of the aftermath of war, or perhaps a working out of the divine plan. We do not know. But these sons of the war-wasted veterans, 20 years after the war was over, saw results that caused their patriotism to bestir itself to right evil conditions. Their beloved old State was in the hands of the ignorant and the vicious; men, whose ancestry dated back to proud Norman forbears, were forced to yield to a mass of ignorant voters, formerly their slaves, who were controlled by men to whom the word "Virginia" meant nothing more than an opportunity to despoil. The time required men—young men, of energy, force, character, leadership, and patriotism. So there sprung into being the young leaders of those days—not playing politics for selfish personal or partisan motives but from high patriotic purpose. Among these HAL FLOOD quickly took high rank. I sat one night at the home of a friend, not a mile distant from FLOOD'S birthplace, and heard the story of how he faced a drunken mob of negroes and a few vicious white men in a negro church in the woods at night, and alone, unarmed, and by the mere force of his courage, told them in language vigorous and forcible that the time had come for them to stop their villainy, and then mounted his horse and rode away unharmed. That required physical courage. Tried out and tested in such a field, he became a leader in his own community, and then his fearlessness attracting the attention of the State, he became one of its political leaders in the legislature and in the convention which was the culminating effort of these young Virginians. In that convention Virginia was forever freed of the political incubus which was holding her back from progress and prosperity. Elected to the National Legislature, he grew in strength, politically, and it was the prediction of many astute politicians that he would have soon realized the ambition of his life to be Governor of Virginia.

No less was he mentally courageous. He had the courage of his convictions. It could not be said of him that he was always looking "to see which way to jump." He made up his mind definitely and was definite in expressing himself. You of his friends here in Congress can probably recall more instances of that than I. Fearlessly he faced life, fearlessly he thought out the path he should trod, and fearlessly he walked in it.

He possessed other characteristics almost as clearly defined. His loyalty to his friends was proverbial. If HAL FLOOD was your friend, there was nothing halfway about it. He "grappled" his friends to him "with hooks of steel." To make friends one must have the qualities of loyal friendship. His friends were devoted to him. Of course, he had his enemies; he would not have been the strong man that he was if he had not made enemies; but they were fighting enemies, and they admired him even though they fought him. He fought as he loved, hard; but no man ever said that he fought unfairly.

Quick tempered, but willing to admit error if he thought he was at fault; impulsive, but tempered by a clearness of thought which saved him from many mistakes; generous when he gave, giving of the best that was in him. Such qualities he possessed, qualities that real men admire and, more than that, love. There was real grief in the hearts of many when he left us, and time has not assuaged that grief in our hearts that he is no longer with us. No man could ask of life more than this.

It would be selfish of his friends in thinking of his personal characteristics so far as they are concerned in their loss of him to fail to mention his work for his beloved State and the Nation. Necessarily it must be told briefly, but I could not talk of him in his public life without first paying him my tribute as his friend. It means much to a new Member in this body to know that he can depend on a man who is friendly, courteous, kindly, and helpful. It meant much to me and to others who knew that in HAL FLOOD they could always count on such kindly aid and advice that their path in the maze of unfamiliar things would be made easier and smoother.

HENRY DELAWARE FLOOD was born in Appomattox County, Va. He came of old Virginia stock, from a family whose record shines forth in the annals of the State. He was educated at Washington and Lee University and at the University of Virginia. Having graduated in law, he began the practice of his profession in the county of his birth and quickly rose to leadership at the bar of his circuit. Possessed of a vigorous, aggressive personality, with a mind clear and able, he made a success in his chosen profession. But political conditions in the State were such that a man of his temperament could not resist the call to political service on behalf of his State and his people.

He was elected a member of the house of delegates and then to the State senate. In both branches he served with distinction. While in the State senate he successfully led the fight for a constitutional convention to revise the suffrage. He was one of the outstanding figures of that distinguished assembly. Before the adjournment of that convention he had become a Member of Congress. Of his career in Congress I shall not speak specifically. It was not my privilege to be his colleague for much more than a year, and I leave his work in this body to be discussed by those more familiar with it.

His work for his State and his aggressive force exerted in behalf of his party had brought him into contact with men throughout the State, and he had attained such personal and political popularity that he was a formidable candidate for any office for which he offered. In the last gubernatorial campaign, when the Republicans let it be known that in their attempt to break the "solid South" they would begin with the capture of the State of Virginia, the Democrats recognized the work that was necessary to be done to combat the influences, political and financial, that would be used by the Republican Party. HAL FLOOD was the unanimous choice of the Democrats of the State as their leader. He organized the forces of Democracy with his usual zeal and energy, and a Democratic governor was elected by a larger majority than had been given in 40 years. He went all over the State, organizing and speaking, sparing not himself in any way in his whole-hearted devotion to his cause. He was in a weakened condition, due to an attack of the "flu," but it was characteristic of the man that he never shirked a duty. The campaign was, however, too strenuous for him and he gave way under the strain and died after the election.

The whole State grieved over his death. Both friends and foes realized that in the death of HAL FLOOD there was taken away from Virginia a man who stood proudly before his fellow men, conscious of his own rectitude in public and private life; a man who held himself "foursquare to the winds that blew"; a man loyal and true to his friends, and fair and just to his enemies; a man patriotic to the core, loving his State whole-heartedly and devotedly; giving to old Virginia the best that was in him, and, finally, in her service yielding up his life.

Mr. OLDFIELD. Mr. Speaker, it is fitting that we should pause long enough in our labors to pay tribute to our beloved dead. HENRY DELAWARE FLOOD served in this House more than 20 years, and for a large portion of that time he was one of the real leaders of his party on this floor. Well do I remember when I came here, in March, 1909; HAL FLOOD was one of the

first Members of the House I met. From that day in March, 1909, until the day of his untimely death he was my friend. Born and reared in the great Commonwealth of Virginia, having served in both houses of the legislature of that State, he came to Congress as a young man and served his State and Nation conscientiously, fearlessly, and well.

During the Great War he served in a distinguished as well as a difficult position on the floor as the chairman of the great Committee on Foreign Affairs, and I have not a doubt that the labor and anxiety of his difficult task during the war hastened his death. He was honored by the Democratic membership of this House by being selected as the chairman of the Democratic congressional campaign committee, which occupied a great deal of his time. In addition to that the Democratic Party of his State selected him as chairman of the Democratic State central committee, and it devolved upon him to manage the campaign in Virginia last year, and as a result of his leadership his party carried the State by the biggest majority in history. When HAL FLOOD, either on this floor or elsewhere, undertook to carry out a certain policy he kept after it until success was accomplished. While he was a partisan in politics, yet he was fair and generous to the opposition. He had many personal and intimate friends on the other side of the aisle in this House and all of the Democratic Members were both his personal and political friends. I think one of the greatest and most beautiful elements of anyone's character is that of friendship, and here permit me to say I have never known a truer and more loyal man to his friends than was HAL FLOOD.

He served many years in the House and it was his ambition to go to the Senate. He wanted to round out his career as a representative of the Commonwealth of Virginia in the Senate of the United States. The opportunity came to him some years ago and the senatorship was offered to him, but he had a very dear friend who also had an ambition to go to the Senate from the State of Virginia, and he gracefully and unselfishly stood aside and permitted his friend to gratify his ambition. I have never known a more genuine friendship than that. Once a very able United States Senator from my State told me there was no such thing as friendships in politics, only alliances growing out of political interest. That may be the rule, Mr. Speaker, but HAL FLOOD was an exception to that rule. I not only admired HAL FLOOD on account of his ability, but I loved him like a brother because he was my friend. He was a brave and courageous man mentally, physically, and morally. On this floor, in the courtroom, on the street he stood up and was ready to fight for his rights, and not only that, but also was ready to fight for the rights of his friends. He loved his family, he loved his country, he loved the State of Virginia, he loved his friends. Our country never had a braver defender and that flag never had a more loyal champion.

The memory of the man whom we meet to honor here to-day is worthy all the praise that is due one who has lived an eminently useful and unselfish life, animated by high ideals and using his talents for the benefit of his fellow man.

I mourn him not only as a fellow Member, but as a very dear friend. To me he was the embodiment of the true meaning of the expression, "A southern gentleman," courteous, honorable, and upright. Mr. Speaker—

He has written his virtues and memory on the rocks, and his faults have we written on the sands.

Mr. HARRISON took the chair as Speaker pro tempore.

Mr. DEAL. Mr. Speaker, my first recollection of and interest in public affairs was aroused by a manifestation of statesmanship in a young man then serving his native State of Virginia in the halls of her legislature. The power, the force, the energy, the fearlessness of his attacks, and defense of the policies meeting his condemnation or approval touched a responsive cord among the young men of the time and assured the destiny of a long and unbroken service, a service which has left its impress upon his State and Nation.

There have been statesmen gifted with great force and power of speech, statesmen with unusual executive ability, statesmen possessing diplomacy of the highest order—others yet endowed with the physical force to storm and break down obstacles of the most appalling magnitude. There have been devout Christian characters, the halo of whose presence carried trust and confidence to the hearts of those who came within the scope of their worlds, but there have been few, very few, enjoying all of these attributes of character in so high a degree as has our departed friend and colleague, HENRY DELAWARE FLOOD.

Earnestness, sincerity, and force, with a clear, resonant voice, were gifts of nature that elevated him to the standard of an orator. As such he could command and hold the attention at all times an audience of any standard of intelligence. This much-prized talent kept him always in the forefront of statesmanship and contributed largely to his continued service in the affairs of his State and Nation. His affability, universal courtesy, and pleasing address, his readiness to meet the views of others, to aid those in distress, cemented friendships once made and added in arithmetical progression to his circle of admirers. As an executive he ranked first among his peers. Success in his private affairs, in his business relations, notwithstanding his unbroken public duties, commanded the esteem of all who knew him and called him to the fore always in the councils of his party. His loyalty to his friends and his energy in all of his undertakings inspired such confidence as to place him at the head of the Democratic Party in his native State. A devout Christian, he was a pillar of strength to his church. An affectionate husband, a loving father, a friend to the needy, he was ever ready to assume the burdens of others. Our hearts throb with sympathy for those whose loss can never be repaired. A well-rounded character, he stood upon a pedestal from which his light so shone that his good works could be seen by all men in glorification of his Father in Heaven.

In the great beyond we have faith to believe that his soul has found its reward. There with his fathers will he await the coming of his loved ones and of his colleagues, to whom the white trail of a clean and noble life will be an inspiration and a beacon by which we may pilot our barks across that uncharted sea of a great unknown into the harbor of eternal peace; free from the rocks, and reefs, and shoals; free from the narrow and tortuous channels that beset us here on every side.

I am the resurrection and the life, sayeth the Lord; who so believeth in me, though he were dead, yet shall he live, and he who so liveth yet believeth in me shall never die.

Let us have faith, and when our earthly career shall have ended we may join our colleague in that city where there are many mansions.

We will place his mortal remains beneath the pines of the State that he loved so well, where the soft and gentle south breezes waft into life the lilac and the rose, sending forth their sweet perfume like the breath of angels as a lullaby to his soul in its eternal repose.

Mr. MONTAGUE. Mr. Speaker, the death of HENRY DELAWARE FLOOD was a surprise and a shock to the Virginia delegation and to the people of Virginia, for but few, if any, knew the serious character of his illness.

Mr. FLOOD and myself were members of the same law class at the University of Virginia. There the great exactions of my studies made it possible for me to cultivate the friendship of but few of my classmates. However, I was thrown with Mr. FLOOD frequently, and inasmuch as his and my father had been fellow members of the House of Delegates of the General Assembly of Virginia, we often found most congenial and pleasant topics of conversation. He was then, as afterwards, urbane and attractive in manners, and made there, as he made in the public life of Virginia, many friends who will remember and mourn him for years to come.

After leaving the university I saw but little of him, our lines and duties of life bringing us but seldom together. He early went into the public life of the State, becoming a member of its house of delegates as early as 1887, the State senate, the constitutional convention, and the Congress. He also served as the Commonwealth's attorney of his home county, the historic county of Appomattox. His services in these various fields of public endeavor, covering a period of over 34 years, have been recounted by others, and I only mention them that the range and nature of his activities may be accentuated. His last service was that of chairman of the Democratic Party of Virginia, a most arduous position, and it was perhaps the intense labor and responsibilities of this position which culminated in his death.

When I became a Member of Congress in 1913 I was again thrown with Mr. FLOOD. He was always courteous and pleasant of manner, and I received his considerate and kind personal recognition. And here in this House he exhibited that same energy, courage, and intensity of disposition shown in his early days and throughout his public life.

The duties devolving upon him incident to the war brought him much into the public eye. As chairman of the Committee on Foreign Relations he submitted the measures and reports declaratory of our Great War and much of the subsequent supplemental and auxiliary legislation in relation to this immeasurable episode.

To his kindly manners and address must be mentioned his marked energy, his courage, ardor, and enthusiasm, which, with his natural abilities and long experience, brought him that distinction that is the heritage of his associates, his friends, and

his family. Many here and many more throughout his district and native Commonwealth will carry with them throughout life tender memories of his striking personality and achievements, which we on this solemn occasion recall with such vivid appreciation.

Mr. HOOKER. Mr. Speaker, I do not feel that I can add anything to the eulogies that have been so splendidly, eloquently, and impressively spoken on the floor of this House to-day, but nevertheless, as a Member of the Virginia delegation and as a personal friend of HENRY D. FLOOD, I desire to say a word and to drop a tribute to the memory of Virginia's faithful representative and beloved and distinguished son, who for a score of years so ably, earnestly, and courageously represented the tenth Virginia district in this House.

It is fitting and proper that the Members of Congress should turn aside from the demands and cares of their daily duties to honor a departed Member, and in tender and loving language pay reverence and tribute to the memory of one who died in the service of his State and Nation.

The grim reaper has taken heavy toll of the Virginia statesmen in the recent years. But a few brief years ago, Jones, who so well represented the first Virginia district for many years; Walter Watson, lovable and brilliant, the Representative from the fourth; and the faithful, loyal, earnest Rorer A. James, of the fifth, who was stricken down just at the beginning of a congressional career of hope and promise; and Senator Thomas S. Martin, whose name is so inseparably connected with everything that is dear to Virginia, and whose name is a synonym of public service; and "HAL" D. FLOOD, the faithful Representative for the tenth for a score of years, were all here, representing the old Commonwealth and serving faithfully and well her people. They are all gone. The rapidity of their passing reminds us that—

In the midst of life we are in death.

In the death of HAL FLOOD Virginia has lost a Representative and statesman whose residing place was not alone in the particular district that sent him here, but in the hearts of the people of the whole State. No State ever had a more patriotic, faithful, and earnest Representative on the floor of this House. While his home district was ever near and dear to him, and no people ever had a Representative who more conscientiously and honestly served them, yet he did not confine his labors to its limits but carefully looked in his representative capacity to the best interests of the Nation.

He was a man of strong convictions, an earnest, faithful, devoted advocate of the people's rights, always consulting their interests as he would his own. He was brave, cautious, vigilant, and honest. He was loyal and true in every relation of life—true to himself, true to his constituents, his State, Nation, and to his friends. His deep, earnest, sincere sense of gratitude and loyalty to his friends were among his strongest traits. His friendship would sacrifice everything but integrity and convictions.

He was controlled by his convictions. I served with him in the convention that framed the present constitution of Virginia. He played an important part in the formation and final passage of the document, and I was always impressed through the long, tiresome, arduous sessions of the convention with the feeling that he was always governed by the principle of right. That principle never seemed to be absent from his mind in the consideration of any proposition that came before the body. When he reached a conclusion that a certain measure or a certain policy was correct and righteous and for the best interests of the State he was immovable, and pursued it with that relentless energy and determination which only a man of his great mental power and moral courage could.

But few men who have lived and died and served Virginia since the Civil War have left a greater impress upon the State than HENRY D. FLOOD. He was elected to represent his home county, Appomattox, in the general assembly soon after he reached his majority, and from that time until he was elected to Congress from the tenth Virginia district he served continuously either in the house of delegates or the State senate. He was a Member of this House when he was also elected to help frame Virginia's new constitution. As a member of the Virginia General Assembly he did much to put life and vigor into the public free-school system of the State, and he contributed as much probably as any other Virginian to the purging and purification of her electorate. He served his community, his county, his State, his district, and the Nation in the most earnest manner in every trust that was reposed in him. The old Commonwealth of Virginia never reared a more loyal, devoted, faithful son and citizen. He loved Virginia, her past history and traditions. He gloried in her present and had hope and faith in her future. He was in the broadest and best sense a good type of American citizen. His life and character stand as a stimulus to honorable, patriotic living—noble, fraternal good feeling and devotion to family, friend, State, and Nation.

He was a Democrat. He believed in the principles of the Democratic Party. He was thoroughly convinced that the enactment of Democratic principles into the legislative policy of the Nation was best for the masses of the people, and so believing, he was just as loyal and unselfishly untiring in his efforts to bring success to his party as he was in the service of his State and Nation in any other direction. He served the party in season and out, and at the time of his death had, as chairman of the State Democratic committee of Virginia, just closed one of the most brilliant campaigns ever waged in the Old Dominion.

His efforts were blessed with wonderful success, the State returning for the Democratic candidates the largest majority given in any recent years. He was one of the most popular campaign speakers in the State, and his services were in demand in every campaign in every section of the State; as a party leader he was able to unite into a solid phalanx all the Democratic voters of the State in a united, harmonious body. His, indeed, was a life of service; service to his county, his State, his Nation, his party, and his friends. His was never a half-hearted service; he never did things by halves. Whenever convinced of the righteousness of his cause he undertook it and prosecuted it with all the zeal and earnestness of his soul, and nothing deterred him from or led him away from its attainment.

I was glad to have known HAL FLOOD personally and gratified that I could call him my friend. But he is gone. Those who were close to him during the campaign in Virginia, which closed only a short time before his death, and saw the vigor and energy with which he conducted the State campaign were not prepared for the shock of his untimely death. It came all unexpected to them and cast a gloom over the people of the entire State where he was loved and admired.

Virginia mourns the death of her faithful servant and distinguished son. She brings her flowery wreath to place upon his grave; she will ever keep alive in her affections his memory; she will hang his image upon her walls, trusting, hoping, believing that the Great Divine in whom he put such implicit trust took him from his State, Nation, and friends for a wise purpose of His own.

Mr. CONNALLY of Texas. Mr. Speaker, "HAL" FLOOD is dead, but that which the world will long remember is that "HAL" FLOOD lived. There have seldom been such splendid tributes paid to the memory of any man as those who knew him best have here in this Chamber to-day paid to the life and services of their colleague. I only knew him since I first came to this body in 1917. He was then approaching the very zenith of his powers and usefulness. I shall not undertake to deal with his career in Virginia before I knew him here. His colleagues have done that so well and so eloquently that I should not dare to invade that field. But those of us who knew him here knew that back of his service here and back of his life here must have been those great qualities that have been described as marking his life before he came to this Chamber. Here he occupied places of distinction and of honor and of usefulness. I was assigned to membership on the committee of which he was chairman, the Committee on Foreign Affairs. The second day after my entrance into this body as a member of that committee it was called upon to deal with the resolution declaring a state of war to exist between the United States and the Imperial German Government. As chairman of that committee "HAL" FLOOD was master of every question and of every detail that affected the international relations of the two Governments.

A few days later he stood here on this floor, as has already been well said, with not only this Hall filled with Members and officials and these galleries filled with spectators and auditors, but he spoke here in a theater upon which all the world looked and listened. In the days to come when the American historian shall set down the causes of the great World War the speech of HENRY DELAWARE FLOOD, giving in detail and in fullness the righteous cause upon which America founded her claim to fight, will form the foundation and the basis of that account, which school children 100 years from now will read and ponder over.

He was a partisan, it has been said. Yes; he was a partisan because he believed that the political theories to which he adhered were those whose enactment and whose realization meant most and best for the American people. He was a cavalier; impetuous, passionate in any cause in which he en-

listed; gallant, bold, and dashing, and yet he always struck like the thunderbolt in any cause which he championed.

His was the life of a cultured, educated man, the life of a friend who loved. I can not forget the tribute that was paid by the gentleman from Arkansas [Mr. OLDFIELD], embodying the same thought that was in my mind, when he said that usually in the field of politics, where clashing ambitions meet, where cold and selfish purpose often marks the course of public men, close and intimate friendships are sometimes regarded as being rare. And this occasion has been made notable to-day by tributes from political associates, not of a day only but of a lifetime, who associated with HAL FLOOD from the time he stepped into the halls of the university until he went out on that journey that stretches away to that shore untouched by the footsteps of mortal man—a rare tribute to him as a man and as a statesman.

The ancients had a custom when laying to rest their beloved dead of depositing in the coffin a coin to pay the ferryman to transport the soul across the mystic river. The Indians had a custom of depositing with the body the arms of the warrior and the huntsman, that he might employ them in the happy hunting grounds. When HENRY DELAWARE FLOOD went out on the final journey he carried no golden coin, he carried no rattling arms; but when HENRY DELAWARE FLOOD left his friends in this Chamber and his family in his home he carried a noble mind and a lofty soul, while yet afar the gates stood ajar. His life, his services, his character were such that he could well have said with Tennyson:

Sunset and evening star,
And one clear call for me;
And may there be no moaning of the bar
When I put out to sea;
But such a tide as moving seems asleep,
Too full for sound or foam,
When that which drew from out the boundless deep
Turns again home.

Twilight and evening bell,
And after that the dark;
And may there be no sadness of farewell
When I embark;
For though from out our bourne of time and place
The flood may bear me far,
I hope to see my pilot face to face
When I have crossed the bar.

Mr. UPSHAW. Mr. Speaker, not having heard until yesterday of this memorial service, I have no prepared tribute, and yet I feel that I would be recreant to every impulse of grateful friendship as well as a keen appreciation of the sterling qualities of a rare and outstanding man if I did not, in a very brief way, lay a flower of loving tribute upon the bier of HAL FLOOD.

I am one of the new men rejoicing to acknowledge his helpful friendship here in the House. I love to think of HAL FLOOD as he impressed me first and last as a man of unfailing courtesy, never effusive, but always gentle and winsome in his manner. He was a rare exponent of what some gifted woman said was her concept of a true gentleman, "a hand of oak in a glove of velvet; gentle to the touch, but firm when pressed."

He loved to go out of his way to make his friends glad. I can but gratefully cherish how one of his generous comments to a prominent Georgian on the work of his colleague from Georgia since coming to Congress did me splendid service in my last campaign for reelection.

I love to think of HAL FLOOD in another way. I never heard an unclean word fall from his lips in the cloakroom or in private conversation. His was a beautiful and shining example of careful speech and lofty conduct as a Member of this House as he walked among his colleagues and among these pages of tender years.

Some of us remember that story of a young officer who dashed into General Grant's headquarters, where some of the wives of the officers had been stopping for a time, and said, "General, I have the finest story to tell. Are there any ladies around?" And that sturdy old soldier said, "There are no ladies, sir, but there might be gentlemen. I believe I would not tell it."

I never heard HAL FLOOD tell a story that he could not have told if the ladies in the gallery, yea, the fair women of his home, had been present.

But I love to think of him most of all as a God-fearing man. I remember how, standing right there where my Christian friend and brother, Congressman LOWREY, sits to-day, he turned and laid his hand upon my shoulder and said: "UPSHAW, how could we get along without the churches in this country, without their saving influence in the community and their regenerating influence in our national life?" This spirit on his part perhaps is intensified to-day because I am fresh from the morning service in the House of God, where I sat by a member of the Cabinet, Secretary Davis, of the Department of Labor, and heard his earnest "amen" accompanying the reading of the Scriptures and the prayer that was offered by the pastor, Dr. H. A. Tupper, and the impact of his golden words as he brought me on to this Capitol, telling me that the influence that holds him day by day in the face of the tremendous drive of responsibilities upon him is the memory of an old-fashioned Christian mother with her wealth of sacred influence, her fervent daily prayers, and her dear old Welsh songs of hope and consecration.

More and more we love to thank God for men in public life who are God-fearing, setting a proper example for our youth to follow, for in vain do we legislate in this Hall unless we plant the laws that we make in that character that rests upon the Rock of Ages.

But, oh, my friends, we stand dumb before the mystery of his untimely death. We remember how the tears came to the eyes of many of us as we were informed that HAL FLOOD had passed away. For, as Talmage said of Henry Grady, "His sun went down at 10 o'clock in the morning of life's beautiful day."

For those who loved him with tenderest ties we are thinking of those beautiful words—

God's plan, like lilies pure and white, unfold;
We must not tear the close-shut leaves apart;
Time will reveal the calyxes of gold.
And if, by faith and patient toil we reach the land
Where tired feet with sandals loose may rest,
Where we shall know and understand,
I think that we shall say, "God knew the best."

God bless the radiant, inspiring memory of this patriotic, God-fearing statesman.

Mr. TUCKER. Mr. Speaker, my colleague, Mr. MOORE of Virginia, found this morning that he was unable to be present, on account of illness. He was very anxious to be here and expected to have been here.

Mr. HARRISON. The gentleman from Illinois [Mr. SABATH] asked me to obtain leave to print his remarks, because he would be unable to be here.

The SPEAKER pro tempore. Without objection, that leave will be granted.

Mr. WOODS of Virginia. Mr. Speaker, our colleague, Mr. SLEMP, of Virginia, was unavoidably detained and could not be here, and he desired me to ask unanimous consent that he might extend his remarks in the RECORD. I ask the same privilege for our colleague, Mr. BLAND of Virginia, who, I understand, is also unavoidably detained.

Mr. TUCKER. And for any others who desire to do so.

Mr. WOODS of Virginia. And for any others who desire to do so, that they may extend their remarks in the RECORD.

The SPEAKER pro tempore. Without objection, that request will be granted.

There was no objection.

The SPEAKER pro tempore. In accordance with the resolution heretofore adopted the House stands adjourned until Wednesday next at 12 o'clock.

Thereupon (at 1 o'clock and 45 minutes p. m.) the House adjourned until Wednesday, May 31, 1922, at 12 o'clock noon.

SENATE.

MONDAY, *May 29, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Gerry	McCormick	Sheppard
Ball	Gooding	McCumber	Simmons
Borah	Hale	McKinley	Smith
Brandegee	Harris	McLean	Smoot
Capper	Harrison	McNary	Spencer
Caraway	Hitchcock	Myers	Sterling
Culberson	Johnson	Nelson	Sutherland
Curtis	Jones, N. Mex.	Newberry	Swanson
Dial	Jones, Wash.	Nicholson	Underwood
Dillingham	Kellogg	Norbeck	Walsh, Mass.
Elkins	Kendrick	Norris	Warren
Ernst	Keyes	Oddie	Watson, Ga.
Fletcher	Ladd	Page	
France	La Follette	Phipps	
Frelinghuysen	Lodge	Pittman	

The VICE PRESIDENT. Fifty-seven Senators have answered to their names. A quorum is present.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House insisted upon its amendment to the amendment of the Senate numbered 58 to the bill (H. R. 9859) making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes; that the House further insisted upon its disagreement to certain amendments of the Senate; agreed to the further conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. SLEMP, Mr. MADDEN, and Mr. SISSON were appointed managers at the further conference on the part of the House.

PETITIONS.

Mr. CAPPER presented petitions of sundry citizens of Iola, Kans., praying that only a moderate duty on kid gloves be imposed in the pending tariff bill, which were referred to the Committee on Finance.

He also presented a resolution adopted by the Chamber of Commerce of Salina, Kans., favoring the passage of the so-called ship subsidy bill, which was referred to the Committee on Commerce.

Mr. NICHOLSON presented a petition signed by 108 citizens of the State of Colorado, praying that only a moderate duty on kid gloves be imposed in the pending tariff bill, which was referred to the Committee on Finance.

PORT OF NEW YORK AUTHORITY.
